COMPARATIVE GRAMMAR

OF THE

INDO-GERMANIC LANGUAGES.

Da muss sich manches Rätsel losen Doch manches Rätsel knüpft sich auch.

Goethe, Faust.

COMPARATIVE GRAMMAR

OF THE

INDO-GERMANIC LANGUAGES.

A CONCISE EXPOSITION

OF THE HISTORY

of Sanskrit, Old Iranian (Avestic and Old Persian), Old Armenian, Greek, Iatin, Umbro-Samnitic, Old Irish, Gothic, Old High German, Lithuanian and Old Church Slavonic

BY

KARL BRUGMANN,

PROFESSOR OF COMPARATIVE PHILOLOGY IN THE UNIVERSITY OF LEIPZIG

VOLUME IV

MORPHOLOGY, PART III:

VERBS FORMATION OF THE SIEM, AND INFLEXION OR CONJUGATION

TRANSLATED FROM THE GERMAN

R. SEYMOUR CONWAY, M. A. AND

LATE FELLOW OF GONVILLE AND CAIUNCOLLEGE, CAMBRIDGE, AUTHOR OF 'VERNER'S LAW IN ITALY', PROFESSOR OF LAFIN IN THE UNIVERSITY COLLIGE, CARDII

W. H. D. ROUSE, M. A

SOME THEE PRILOW OF CHRIST'S COLLEGE
CAMBRIDGE, ASSISTANT MASTER AT
CHELTENHAM COLLEGE.

NEW-YORK.

B. WESTERMANN & CO., 812 BROADWAY.

1895.

TO

JOHN PEILE,

DOCTOR OF LETTERS, MASTER OF CHRIST'S COLLEGE, THE FOUNDER OF THE STUDY OF COMPARATIVE PHILOLOGY IN CAMBRIDGE

THIS TRANSLATION IS DEDICATED

IN TOKEN OF THEIR GRATITUDE AND AFFECTION

BY

HIS OLD PUPILS.

AUTHOR'S PREFACE.

When in 1889 I brought out the part of my work containing the account of Noun Morphology, I had in my mind, and partly on paper, a simpler plan for the remainder of the work than that which the reader has before him. I meant it to include the presentation of the forms of declension and conjugation, and little more In view of the confusion and uncertainty that reigned in this department, where many questions of origin and history seemed utterly unsettled, I then thought it best to restrict the work to these limits; and I only hoped that perhaps after the lapse of years, if a second edition should be called for, the further developement of a science which had already made such rapid progress would have put me in a position to give a practical and useful history of Noun and Verb Inflexion But in the course of my work I was gradually converted from this pessimism; the difficulties no longer seemed insurmountable; and I at length decided to attempt a more complete account, not merely exhibiting the results of the different developements, but even now as far as possible tracing their course. Thus the work grew; and thus it comes about that the size of the latter part is so greatly out of proportion to that of the former.

In giving up my first plan, I was influenced not a little by my belief, that from a comprehensive work such as this,

a work in which it is sought to present the facts and problems of language in connected form, more might reasonably be expected than what I had at first proposed. A student might fairly ask that the many questions which await an answer should not be simply avoided, but that some honest attempt should be made to advance a step towards their answering It must surely be useful that he should not only read that which can be called certain, not only be taught well establisht facts, but that he should at the same time find the various problems and puzzles, with which the study of Indo-Germanic inflexion abounds, at least briefly mentioned and conveniently arranged. So will the scholar guard best against the mistake which not the best scholar is wholly free from, the danger that in trying to bring order and light into his palace of knowledge, he may leave some dark riddle unattempted, and only move it from one corner to another. If amidst these shifting theories I have often taken a decided stand, and declared myself for one or other of them, adding therewithal other and many new views and explanations, I am yet far from believing that I have placed beyond all doubt the view which I have preferred In these matters to indicate a path for future research or simply to establish a prima facie case is far harder than most people think; and many a theory which seemed to be fixt on the firmest foundation and to offer no point to attack, has been broken down in the end. I can only hope that the mistakes which these volumes must inevitably contain, may help to supply the means for their own correction.

A few of my readers perhaps may wonder why certain new and some very recent theories upon Ablaut, proethnic Accent, formation of Roots and Suffixes, and other such matters, have in these last volumes been either altogether disregarded or only just glanced at. A good deal of the most recent work I would indeed have included in this last volume

but that it had to be finisht in 1891.1) In other cases I saw before me hypotheses, which attractive as they are, and fruitful as they may prove to be, at the time of their publication were too slightly worked out by their authors, and had been too little tested to allow of my making them the basis of my own In this volume I have practically not touched the account. newest theories of Ablaut, I confess that I approach the glib and symmetrical systems of Ablaut Series (cp. Bartholomae in Bezzenberger's Beitrage, xvii 105) with very little confidence, and I must refer to what is said on this matter in Vol. I § 309. Even a question of Verb Morphology so important as the form of proethnic Roots (whether they were monosyllabic or not) I have left on one side, I believe neither the one thing nor the other, but only that in the present state of our knowledge we can know nothing about it If in spite of this I have used hyphens freely, I would remind the reader that the hyphen means a real point of composition in such words as Διόσ-γουροι, τοῦ-το, ἀνα-βάλλω, ἔ-φερον, but in $\ddot{\alpha}\gamma$ -0- $\mu \varepsilon \nu$ or $\varphi \dot{\varepsilon} \varphi$ -0- $\mu \varepsilon \nu$ it only shows the etymological and morphological likeness of certain elements. And though I now as ever call -o- in ay-o-use a suffix, I do not thereby commit myself to the statement that such elements were originally independent words See I § 14 pp 16 ff., II § 8 pp. 18 ff.

Whether in all these things I have been so happy as to hit the golden mean, scholars must decide. Bearing in mind

¹⁾ Since then I have had to do without any systematic examination and use of the new works which keep streaming in, or my book would never have come to an end. Only now and then have even the more important works been used, such as those of Bartholomae, Bechtel, Buck, Johansson, G. Meyer, Per Persson, von Planta, W Schulze, Streitberg, and others, Streitberg's work Zur Germanischen Sprachgeschichte first reached me (in proof sheets) after my book was in print as far as the Additions and Corrections, in these I was able to make reference to it However, I was glad to observe that I am in agreement with many others in matters not a few.

the paramount object of this work, I would rather be blamed for giving too little space to the newest speculations than give any reason for the reproach that I have allowed them too much.

A word is necessary as to the principle on which the labours of my fellow-workers have been cited or not cited in the text. Complaints have not been wanting that in giving various theories and views I have not always given the name of him who first suggested them, or mentioned others who before me had thought of much the same thing. My principle has been as a rule not to mention the originator of each view, or all those who ante me mea scripsere, except in such cases as Verner's Law, which I mention under his name. My book does not in the least aspire to be a compendious history of the new school of philology, or to display the part each of us has taken in the gathering of the spoil. Where reference is made in the text to the works of other scholars, this is done for practical ends and no other.

In these last two volumes I have had from Thurneysen the same generous and ready help as before in all that refers to Keltic. Here, as before, the reference to his advice in a few special paragraphs does not in any degree express my obligation to his aid. If the treatment of Irish questions (for I have rarely touched on the British dialects) is at all on a level with recent research, and sometimes even carried beyond it, this is due to Thurneysen. But I must again beg that he be not held responsible for any errors I may have made in using his communications, or for anything but the paragraphs in which his own words are given. I have also to thank Hubschmann for a number of communications on Armenian.

In the text a number of corrections (mostly in unimportant details) have been silently made, which I have received from

reviews and from private letters of fellow-scholars, 1) among whom I would specially name Messrs Conway, Holthausen, Leskien, Leumann, Osthoff, and Rouse. More detailed additions which should bring the first parts of the work up to date, I am obliged to forego, since thanks to the rapid progress of our science, whole paragraphs and pages would have to be remodelled. Naturally enough I am now in a position to improve upon many of the views I formerly exprest, particularly in the Phonology (Vol. I) publisht six years ago. Some of these I have expressly corrected, some tacitly. The reader should therefore consult in each case the explanation which I have given latest.

LEIPZIG, July 2. 1892.

K. BRUGMANN.

¹⁾ Lith galù ('I can') and the like forms are not misprints or oversights, see I § 26 p. 29 To avoid misunderstanding, I again call attention to the fact that while for (Ger. aus) denotes a regular phonetic connexion, instead of (Ger fur), denotes analogical substitution Thus "φιλουμέν for φιλέομεν", but "Att. δαίμοσι instead of pr Gr. *δαιμα-σι".

TRANSLATOR'S PREFACE.

The list of Additions and Corrections given in the concluding part of the German edition have been here put in their proper place in the text. Some few alterations have also been made, with Prof. Brugmann's sanction, by way of making clear what from its terseness might have been misunderstood. A list of misprints is given, but I fear there must be others, I hope that these will be forgiven, in view of the exceeding difficulty of correcting proof with so many different discritic marks.

It may be well to point out that the word "Reduplicator" has been used as equivalent to Reduplicating Syllable or Syllable of Reduplication; and that "Phrase" has been extended to apply to a short complete sentence which fuses into a single word, as ferē-bam, dātásmi (see page 444).

In this volume as before I have to thank Mr. Conway for valuable help

The Indices are nearly ready, and it is hoped they may be publish along with this volume, or at least with small delay thereafter.

CHELTENHAM, July 17. 1894.

W. H. D. ROUSE.

the first personal pronoun) Personal endings make the chief difference between Verbs and Nouns or Pronouns.

But it would be a mistake to explain all the Indo-Germanic personal endings which we find actually used as being without exception personal pronouns Once the Verb was created by aid of real personal pronouns, forms of different origin might be associated with it, and used as though they had a personal pronoun tacked on to the end. In this way, to take an example, the Latin participal form $legi-min\bar{t} = Gr$ $\lambda \epsilon \gamma \acute{o} - \mu \epsilon \nu oi$ - $\mu \epsilon \nu ai$ was associated with the indicative legor etc. (see II § 71 p 165), and the Romans felt no difference between -mint and -mur or -ntur. Again, many different languages employ infinitive forms, which are cases of nomina actionis, as imperatives used of a particular person. In the same way it is probable that some of the personal endings which have come down from the parent language were not really personal pronouns to begin with

Another point is to be noticed. There are some forms without any personal ending at all which have been used like genuine verbal forms from the parent language onwards. The 2nd sing imperative pr ldg 'bhere (= Skr. bhára Gr. qt'qs etc.) is simply the present stem. It must be a survival from the time when tense-stems could be used as independent words. Undoubtedly *bhere had at first a wider use, which narrowed by degrees to the use which it must have had ever since the end of the proethnic period. In the end, the form was quite clearly marked off from all others of its verbal system by the absence of any inflexion, in the same way as the voc. Inne or the nom. Noque were distinguished from all other of their associated cases (see III § 186 pp. 62, 63).

Remark Although personal endings were a sine qua non for the use of a verb form as an ordinary sentence (except *bhere and a few others like it), or as a copula in a sentence, still a sentence could exist without them. At all periods, the Indo-Germanic languages have used sentences that had no finite verb at all. See Paul, Principlen pp. 99 ff.

§ 462. The Verb Infinite consisted of noun forms, chiefly nomina agentis or actions. The difference between these and nouns in the ordinary sense is that these share in certain verbal peculiarities, they have tense, they distinguish between momentary, continuous, or inceptive actions, they have voice, and can govern nouns. The participles were already a large and ramifying group in the parent language, and time has brought about no important change in them. But most of the forms classed as infinitives have arisen since the proethnic period came to an end.

The distinction between the finite verb and the verb infinite is not always kept; for, as we saw in § 461, forms of the latter kind sometimes came to be used in the same way as forms with genuine personal endings. Nor is a line always drawn between the verb infinite and nouns, this we saw in vol II § 144 pp 456 f, and § 156 pp. 470 f

The forms of the Verb Infinite have been discussed under the head of Stem-Formation and Inflexion, so far at least as concerns their formative and inflexional suffixes. We have now to examine the points which mark them as members of a verbal system, connecting, for example, $\lambda \epsilon i \pi \omega r$ with $\lambda \epsilon i \pi \omega$, $\lambda \epsilon i \pi \omega r$ with $\epsilon \lambda i \pi \omega r$, $\lambda \epsilon i \psi \iota \omega r$ with $\lambda \epsilon i \psi \iota \omega$ But for convenience' sake verbal nouns will be only cited now and then while we deal with the various groups of the verb infinite, and the whole of them will be afterwards collected and examined in detail

Verbal Compounds, such as would be formed by joining a real verb-stem to a form of the finite verb, and would answer to O.Pers hama-pith = Gr. $\delta\mu\sigma$ -nárwo among noun compounds, never existed as a distinct category, either in the later stages of the parent language, or since. The only exceptions are reduplicated verb forms such as Skr dár-darti 'he bursts, breaks to pieces', so far as these can rightly be called compounds (§ 464). We must however not forget that the reduplication of uninflected "roots" was certainly older, on

the whole, than the fusion of roots with personal pronouns into verbal forms.

Whether the tense sign -s- in Gr. $\delta \varepsilon i \nu - \sigma \omega \tilde{\varepsilon} - \delta \varepsilon i \kappa - \sigma \omega$ etc. was the verb subst es-, whether -dh- in Skr. sd-dhati Gr. $\tilde{\varepsilon} - \sigma \mathcal{D} \omega$ (\sqrt{ed} -) $\tilde{\varepsilon} - \sigma \chi \varepsilon - \mathcal{D} \sigma \nu$ O.C.Sl i-da etc. is the verb $dh\bar{e}$ - 'ri $\mathcal{D} \dot{\varepsilon} \nu a i$ ', and whether these originally acted as auxiliaries, are questions which must be left alone. Even if this be the truth about them, they must have sunk to the level of inflexions long before the end of the proethnic period, and they could no longer be the type for compounds consisting of verb + verb

Nor do we find in the periods for which there is direct evidence either noun stems compounded with genuine verb forms, or genuine verbal stems compounded with nouns. We cannot class under the second head words like Gr οὐχεί-κακος (from ἄοχω), ἐπιχαιρέ-κακος (from επιχαίρω), Στησ-αγόρης (from ε-στησα), II G. wetz-stein 'whetstone' melk-fass 'milkpail' (from wetze, melke). These are due increly to a perversion or interpretative corruption, and the imitation of older compounds which had a noun stem for the first member. They are not real compounds of a verbal stem with a noun. See II § 30 pp. 51 ff., § 41 pp. 74 f., § 47 p. 86.1)

Forms of the finite verb are clearly seen in composition only in the following classes of words, and here too one of the two parts has usually sunk to a kind of suffix or prefix.

1. A Verb form is compounded with Adverbial words, as Gr. $\dot{\alpha}n$ - $\epsilon \mu \nu$ Lat ab-eo, Lat ne-scio, pr. Idg * \dot{e} -dgkom = Gr. $\ddot{\epsilon}$ -do αror (I regard the augment as a temporal particle), Pruss. $quoit\bar{\iota}$ -lai 'he may wish, he might wish', pr Idg * $bh\acute{e}$ ret-u Skr. $bh\acute{a}$ rat-u, — and also - ι in * $bh\acute{e}$ ret- ι * $bh\acute{e}$ res- $\dot{\iota}$ (beside * $bh\acute{e}$ ret * $bh\acute{e}$ res) was probably a demonstrative particle.

¹⁾ There is a new essay by W. Christ, Abhängigkeitskomposita des Griechischen, Berichte der k bayer. Akad, 1890 pp 187 ff I cannot agree with the theory for which Christ takes up the cudgels again (pp 184 ff.), that ²Aγέ-λαο; arose from the imperative phrase ἄγε λαόν, and that ἀρχί-θέωρος came from ἀρχε-θέωρος by phonetic change of ε to ε

2. A Verb form is compounded with a Case, being itself the final member of the compound. The case, at the time of combination, was either a living case, or some kind of infinitive Examples. Skr. dātāsmi (periphrastic future) for dātā asmi 'dator sum', Lat possum for potis sum, vēnun-do vēnum-do pessun-do, Lat. ārē-bum āre-facio O.C.Sl. nesē-achii (III § 275 p 177), Fr. aimerai (O.Fr amerai) for amāre habeo, Lith. opt. 1st pl. sùktum-bime, etc.

The line between these two classes is not absolutely fixed, as we see from such words as Skr ustam-éti 'goes down' (of the sun), which has for its first part ústa-m 'to one's house, home'.

Remark There is no class of Verbal Compounds answering to Class I of Noun Compounds ($\delta uo-\pi \dot{a}\tau w\varrho$), which might have been a model for later formations. It seems therefore best not to give a special chapter to Verb Compounds, as was done to Nouns, but to describe the various kinds in the place they most naturally come, along with the Tenses, the Personal Endings, or as it may be

One point, however, should be touched on here It is a matter of wider interest, and well illustrates an important principle of word-forma-When a sentence becomes a single word, it may be treated like a simple word, and it may be inflected or otherwise modified just as the Lith dû-k 'give' el-k 'go' (both imperative), consimple word can sisting of the 2nd sing * $d\hat{u}$ (cp Lat $c\iota - do$) and $+e\iota +$ the particle -k, are the foundation for a 2nd pl diskite, cikite etc. and again ciksz 'come here', which itself is el-h + szè 'heie', produced elhsz-te Pruss quoiti-lai 'he might wish' (lai == O C Sl li 'vel, aut') suggested the 2nd sing. quoitilas-se and 2nd pl quoetilas-te. Slav day-me and Mod Gr do:- nov give me' produced the 2nd pl dag-mi-te and so-nov-te Of the same kind were Gr 3rd pl. ayerw-1 ayerw-100 (2nd sing 219erw-, Hesych) agito-te, since Idg. 'age-tod was a compound of the imperative *age with the adv (abl) *tod 'thence, then' Also, according to Osthoff and Bugge, Gr δεδώκαυει δεδώκατε, they explain δεδώνε as *δεδω = Skr dadā(u) + the particle * = Lat ce in cedo Analogous forms of nouns or pronouns are: Gr ovro-s avrn acc. rovro-v Bosot. ovro-1 etc., formed from the nom * $o\tilde{v}$ - τo * $\alpha \tilde{v}$ - τo , whose second part was a particle (cf. O.C.Sl. $k\tilde{v}$ -to 'who'). see II § 4 p 9, III § 415 p. 337, Mid Ir instr pl. donafi-b built up on O.Ir donaib-(h)ī, see footnote on page 357, OHG. gen. deses dat desemo following de-se 'this' with the particle se, see III § 414 pp. 335 f.; Skr. dat. asmá-bhyam Lesb. nom. ἄμμε-ς following aco *ns-me (Lesb ἄμμε) with the particle sme, see § 436 pp. 367 f, § 443 p. 379; Pol gen sing sztukamiesy following nom. sztukamiesa 'a piece of meat', where miesa is the gen. of mieso.

REDUPLICATED VERB-FORMS.

Reduplication, the repetition of a word or other element of speech with the same grammatical force, to express that an action or state is repeated, or to intensify it, is certainly older than the modes of forming cases or parts of the finite verb which we actually see in use. It had at first no special connexion with either verbs or nouns, but was used with both; verb types such as Skr. dár-dar-ti 'it bursts, breaks up' da-dhyš-má 'we have ventured' ci-kit-é 'he knows', and noun types like Skr. dar-dar-a-s 'broken' da-dhyš-ú-s 'venturesome, bold' ci-kit 'knowing' may have been formed quite independently of each other Compare II § 6 pp 12 ff, § 51 ff pp. 94 ff ')

Root reduplication in verbs came to be very important, and this very early in the history of the parent language, because it was turned to account in the formation of tenses.

¹⁾ Works on Reduplication in general have been cited in the footnote to vol II page 12 On Verbal Reduplication see the following A. Williams, On Verb-Reduplication as a Means of Expressing Completed Action, Transactions of the Amer Phil Assoc, 1875 pp 54 ff Pauli, Das praeteritum reduplicatum der idg Spiachen und der deutsche Ablaut, Kuhn's Zeitschr XII 50 ff Osthoff, Zur Geschichte des Perfects, pp 264 ff and pussim - Ernault, Du parfait en grec et en latin, pp 1 ff - Ebel, Reduplicierte Aoriste im Griech, Kuhn's Zeitschr. II 46 ff - Von der Pfordten, Zur Gesch des griech Perf, pp 42 ff - Deecke, De reduplicato linguae Latinae praeterito, Lips 1869 -Stokes, Reduplication im altir Verbum, Kuhn-Schleicher's Beiti II 396 ff Windisch, Das reduplicierte Perfectum im Ir, Kuhn's Zeitschi XXIII 201 ff - A Moller, Die iedupheierenden Verba im Deutschen als abgeleitete Verba, eine etymologische Untersuchung, Potsdam 1866 Scherer, Die reduphoierten Praeterita, Zeitschr. f osterr. Gymn xxiv 295 ff., and Zeitschr f deutsch Altert XIX 154 ff., 390 ff · Sievers, Die reduplicierten Praterita, Paul-Braune's Beitr 1,504 ff. Pokorny, Über die redupl Praet der germ. Sprachen und ihre Umwandlung in ablautende, Landskron 1874. Holthausen, Die reduplicierenden Verba ım Germ, Kuhn's Zeitschr xxvII 618 ff. Hoffory, Die reduplicierten Praeterita im Altnord, ibid. 593 ff. - See also the works cited under the head of Tense-stems.

It was used to distinguish various kinds of action, and also the time at which the action took place. For these purposes Reduplication was very widely used, not only in the parent language but in most of its offshoots far on into the historical period. The wide use of verbal reduplication gave great impulse to similar reduplication in nouns. Noun-reduplication was at first a principle not very active or far-reaching, but thus reinforced it lasted much longer than it would have done, and in later times, under the influence of reduplicated forms in the verb infinite, reduplicated noun-forms appeared again where the proethnic reduplicated type had lost all its reproductive power Examples are Gr. κειράγ-μό-ς (Eur) κέκράγ-μα (Aristoph.) 'cry, outcry', κειράκ-τη-ς 'one who cries aloud' (Aristoph.) beside κε-νοάγ-ιώς κέ-κοάγ-ιι, πεποίθ-ησι-ς 'trust' (Josephus, Philo) beside πε-ποιθ-ως πέ-ποιθ-α, Mod H.G zitterig 'tremulous' beside zittere 'I tremble' = pr Gerin *ti-trō-mi.

- § 465. The following Idg types may be distinguished, according to the form of the reduplication
- I Root-syllable and reduplication-syllable show the same vowel, or two ablaut-grades of the same vowel
- a. The Root begins and end in a consonant, and the syllable of reduplication, or Reduplicator, ends in a consonant which is taken from the final of the Root (we count as consonants the second part of the diphthongs are are and so forth). Of this there are three varieties, the first being a fairly exact reduplication, the second replacing a liquid by a nasal in the reduplicator, and the third inserting \tilde{t}
- 1. Aryan Sanskrit bad-badhé 3rd sing. of bādh- 'press'. dár-dar-ši 2^{nd} sing of dar- $(\sqrt{der}-)$ 'split, break', tar-tūr-ya-ntē 3^{rd} pl of tar- $(\sqrt{ter}-)$ 'pass over', vár-vṛt-ati 3^{rd} pl. of vart- $(\sqrt{uert}-)$ 'vertere', mar-mṛy-yá-tē 3^{rd} sing. of mary- $(\sqrt{merg}-)$ 'wipe'. jan-ghan-ti 3^{rd} sing. of han- $(\sqrt{ghen}-)$ 'strike, kill', nam-namī-ti 3^{rd} sing of nam- $(\sqrt{nem}-)$ 'bend', dán-daś-āna-s partic. of dạś- $(\sqrt{da^znk}-)$ 'bite', jan-jabh-yá-tē 3^{rd} sing. of jambh- $(\sqrt{gembh}-)$ 'snap'. $v\bar{e}-v\bar{e}-ti$ 3^{rd} sing. of $v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-v\bar{v}-$

sing. of nij- (\sqrt{neig} -) 'wash'. $n\bar{o}$ -nu-mas 1st pl. of nu- 'cry out', $c\bar{o}$ - $sk\bar{u}$ - $y\dot{a}$ - $t\bar{e}$ 3rd sing. of sku- 'cover', $\dot{s}\bar{o}$ - $\dot{s}uc$ - \bar{a} na-s partic. of $\dot{s}uc$ - 'light, brighten', a- $n\bar{o}$ -nud-ya-nta 3rd pl. of nud- 'push'. A vestic car^e - ker^e - $mak\bar{i}$ 1st pl of kar- 'think of' (Skr. imper. ca-kr-dhi). dae- $d\bar{o}i\dot{s}$ -t 3rd sing of dis- (\sqrt{deik} -) 'show' (Skr 3rd sing. $d\dot{e}$ -dis- $t\bar{e}$). zao-zao- $m\bar{i}$ 1st sing. of zu- 'call' (Skr. $j\dot{o}$ - $hav\bar{i}$ -mi).

Greek πορ-q τρ-ω I move restlessly for *-qνρ-ιω. cp. Skr jar-bhurī-ti 'moves convulsively, throbs, palpitates' μορ-μύρω 'I roar, murmur' for *-μνρ-ιω cp Lat. murmurāre, O.H.G. murmurōn (§ 595) γαρ-γαίρ-ω 'I swarm' for *-γαρ-ιω (γάργαρα neut pl 'swarm'). γαγ-γαίνειν τὸ μετὰ γέλωτος προσπαίζειν Hesych. (Schmidt conjectures γαγγανεύειν) · cp. O C.Sl ga-gnaja 'I murmur, growl' (adj. gagnivữ) παμ-φαίνω 'I shine clearly' for *-φαν-ιω, Epic partic. παμφανόων, the root was bhā-, and the nasal of the verb was therefore a present-suffix, see §§ 601, 611. άττω Hom. ἀίσσω 'rush, run at something i. e *fai-fin-ιω (I § 96 p 90, § 131 pp. 119 f.) may be connected with Skr. ιξ-νιγ-yά-ιξ (νιγ- 'quicken, burst out') by assuming an Idg. ya²1g-ya²1g- (cp. I § 469. 7 p 346).

Remark The origin of α_i and α_i is obscure in the reduplicating syllable of the following words $\mu_{ii}-\mu \dot{\alpha}_{w}$, $\pi_{\alpha_i}-\phi \dot{\alpha}\sigma_{\alpha_i}$, $\tau_{\alpha_i}-\pi \dot{\alpha}/\lambda \omega$, $\delta_{\alpha_i}-\delta_i \dot{\sigma}\sigma_{\alpha_i} \sigma_{\alpha_i}$ (Fless σ_{α_i} Hesych.), $\pi_{\alpha_i}-\phi \dot{\sigma}\sigma_{\alpha_i}$, $\pi_{\alpha_i}-\pi_i\dot{\sigma}\omega$ and others. The *i*-diphthong recals a reduplicative *i* in Skr bhári-bhi-ati and in Skr bi-bhar-ti Gr γ_i - $\gamma_1 \sigma_{-\mu_{\alpha_i}}$ See § 473 Rem p 17.

Latin. mur-murāre (murmus). cp. Gr. μορμέρω O II.G· murmurōn tin-tinnāre tin-tinnāre, tin-tinnīre beside tinnīre.

Keltic. Mid Ir der-drethar 'there is a sound, or a cry', s-pret. derdrestar, cp II § 52 pp 94, 95.

Germanic OH.G. mur-murōm mur-mulōm 'I murmur' (Mid H.G. murmer murmel 'murmur, growl'). cp. Gr. μορμέρω Lat. murmurāre. O.H.G. rērēm 'I bleat, bellow, roar', pr. Germ. 1st sing *raz-rēzō, cp. Litt. rēju 'I bellow'. This verb changed its inflexion on the analogy of verbs like pr. Germ. *pulē-iō (Goth. pula O.H.G. dolēm), see §§ 592, 708, 739; hence A.S. rūrian, with the same change to the 2nd weak conjugation as is seen in āolian and some others.

Slavonic. O C Sl. qlagolją 'I speak' for 'gol-golją (glagolŭ 'word'); mrŭmŭ ją 'I gnaw, nibble'; gągnają 'I murmur, growl', ep. above, Gr γαγγαίνειν.

§ 466. 2. The reduplicating syllable has a Nasal instead of a Liquid, see I § 282 p. 226. Skr. can-cūryatē 'moves quickly or repeatedly'. Gr. γογ-γίλλω 'I round' (γόγγυλο-ς 'round'), τον-θορίζω 'I murmur' Lat. gin-grīre.

This nasal reduplication passed on from roots ending in a nasal (see § 465) or a liquid to a few others: as Skr. $ja\hat{n}japy\acute{a}t\bar{e}$ from jap- whisper, say half-aloud, $dandah\bar{t}ti$ dandahyatē from dah- 'burn' (which seemed natural in Skr. after such a form as $dan-da\dot{s}$ - from $\sqrt{den\hat{k}}$ - 'bite'), Gr. $\gamma o\gamma - \gamma \upsilon \zeta \omega$ 'I growl'.

§ 467 3 In Sanskrit, i or $\bar{\imath}$ is often inserted between the reduplicating syllable and the root, the Vedic language has $\bar{\imath}$ before single consonants, i before more than one (compare Wackernagel, Das Dehnungsgesetz, p. 18) E. g. bhári-bhr-ati $3^{\rm rd}$ pl of bhar- 'carry', vár $\bar{\imath}$ -vṛ/-at- partic. of vary-'turn, twist', gháni-ghn-at- partic. of han- 'strike, kill', gan $\bar{\imath}$ -gan-ti $3^{\rm rd}$ sing gáni-gm-at- partic. of gam- 'go', kuni-krad-yá-māna- partic. of krand- 'bellow', náv $\bar{\imath}$ -n $\bar{\imath}$ -t $3^{\rm rd}$ sing. of nu-'cry out'.

Where $-\bar{\imath}$ - comes after the root syllable, $-\bar{\imath}$ - is never found after the syllable of reduplication, thus we have only $n\bar{o}$ - $nai\bar{\imath}$ - and $nai\bar{\imath}$ - $n\bar{o}$ -

Forms with an aspirate at the beginning of the reduplicator, such as bhári-bhr-ati gháni-ghn-at-, are the older and are phonetically correct, but those like dávi-dhv-at- and pánī-phaṇ-at- have been altered, the former from *dhávi-dhv-at-following dō-dhavī-ti (cp I § 480 pp. 354 f.), the latter from *phánī-phaṇ-at- following pam-phan-at- (cp I § 475 p 350). Thus at a later stage we find barī-bhar-ti instead of bhárī-bhar-ti too

How to regard this \tilde{i} is not quite clear. Thus much, however, seems to me certain, that it is the same as an \tilde{i} ,

also of varying quantity, which characterises Class III of our reduplicated forms, and I shall give in the Remark to § 473 a conjecture as to its origin

§ 468 4. Gr. ἐγρή-γορα 'I am awake' has the suffix -ē-in the reduplicating syllable after the root (§§ 587 ff.), cp. ἐγρή-σσω 'I am awake', beside έγρ-ε-το 'awoke', ἐγείρω 'I arouse' for *ἐγερ-μω Perhaps the same -ē- is contained in Skr carā-cará-s 'going far away', ghanā-ghaná-s 'killing casily' and similar words (cp. sarī-sγρά-s 'creeping, crawling' and the like).

§ 469. b The Root begins and ends in a consonant, and contains an 2- or u-diphthong. This diphthong is represented in the reduplicator by ι and u sonant, sometimes $\bar{\iota}$ and \bar{u} , not followed by any consonant. Skr bi-bhē-mi 'I fear' 3rd dual bi-bhi-tas partic. bi-bhy-at conj 3rd sing. bī-bhay-a-t, O.H.G. bi-bē-m 'I shake'. Skr. dt-dhy-ē 'I behold', Avest dī-đaṇti 'beholds' Skr pret. $a-ci-h\check{s}ip-a-t$ from $h\check{s}ip$ - 'throw', $a-r\bar{\imath}-i\check{s}-a-t$ from $ri\check{s}$ - 'be hurt'. Skr desid. ti-tik-ša-tē from tij- 'be sharp'. Gr πι-πί-σκω 'I give to drink': cp. Skr. 2nd pl pi-py-a-ta 2nd sing. pī-pi-hi (pī- 'make overflow, give plenty to drink') δίζομαι 'I seek, strive' (orig 'gaze at something') for *δι-δι-ο-μαι (on δίζημαι sec § 594) cp. Skr 2^{nd} sing. $d\iota - d\bar{\iota} - hi$ 3^{rd} pl $d\bar{\iota} - dy - uti$, $d\bar{\iota}$ 'shine, be bright' (ácha di- 'direct one's mind to'). Goth rei-rái-p 'shakes, trembles' cp. Skr *lē-láyu-tı* 'moves, trembles' with reduplication of the type of a (1) above (§ 465); the inflexion reira reirais etc. is explained by the analogy of verbs like paha 'taceo', see §§ 592, 708, 739. Skr. ju-hō-ti 'offers', pret. a-cu-krudh-a-t from krudh- 'grow angry', a-dū-duš-a-t from duš- 'grow bad, perish', desid. bu-bhut-sa-ti from budh- 'wake, learn'

Remark 1 Despite such forms as Skr ši-šu-š $a-p_1-plav-a-m$ Gr. $\tau_1-\tau_1\sqrt{\sigma_{XO}\mu_{Al}}$ $\pi_1-\rho_2\sigma_1\sqrt{\sigma_{XO}}$ (cp II § 52 Rem p 97), I yet believe that where the i-roots had originally i in the reduplication, u-roots had u. The palatal consonant in the reduplicator of verbs whose root initial is a velar consonant does not prove that $ju-h\delta-ti$ is instead of $*ji-h\delta-ti$, a-cu-krudh-a-t instead of *a-ci-krudh-a-t, or bu-bhut-sa-ti instead of *bi-bhut-sa-ti (cp. bi-bhar-ti $a-pi-spi^*s-a-t$ etc, § 473); for ku- may have become cu- on the analogy (say) of a-ci-krud-a-t, and of perfect forms such a $cu-kr\bar{o}dha$ cu-krudhur where cu- is instead of *ca- = Idg. *qe- (cp. Rem. 2).

Remark 2 , or u in the reduplicator of perfects like the following is not original: Skr 11-réca cu-krödha 1-yāju u-váca Lat sci-cidī tu-tudī, O Ir 10 chuala for *cu-clova, see § 851, 868, 878

- § 470. c. The Root begins in a sonant and ends in a consonant, and so also the Reduplicator
- 1 Roots ending in a single consonant Skr. ál-ar-ti 'moves', ām-am-a-t 'he was hurt' Armen ar-ar-i 'I made' (pres ar-ne-m), heside (fr. å ϱ -a ϱ -i σ r ω 'I join to', $\eta \varrho$ -a ϱ -o- ν å ϱ -a ϱ -i σ r, perf a ϱ -u ϱ -a. Gr $\eta \gamma$ -a γ -o- ν å γ -a γ -i τ ν from a γ ω 'I lead', ω 0-o ϱ -o- ν ò ϱ -o ϱ -e $\tilde{\iota}$ r ν from o ϱ - $\nu \bar{\iota}$ μ 'I arouse', perf ö ϱ - ω ϱ -a 'I have arisen, I move', $\tilde{\sigma}$ n- ω n-a 'I have seen, see'
- 2 Where roots end in two consonants, only the first appears in the reduplicator (cp. Skr. vár-vart-ti from √uert-etc., § 465). Gr ἄλ-αλλ-ε 'he warded off' Skr perf ān-áṣa (pres aṣ-nō-ti 'attains' for *n̄k-) O Ir. perf. t-ānac 'I came' (-c-for -nc-) Gr aoi ἐν-εγκ-εῖν 'to bring' (cp. Skr ānāṣa Gr. κατ-ήνονα § 846), Skr. perf ān-án̄ja (un̄)- 'anoint'). On the analogy of these perfects arose in Sanskrit ān-arca (arc- 'shine, praise'), see § 851.
- § 471. II The reduplicating syllable ends in e or \bar{e} , no matter to what vowel grade the root belongs. This was the kind of reduplication used for the Perfect and for certain classes of the Present and Aorist, both in the parent language and later. I have by no means convinced myself that \tilde{e} belonged originally only to forms with \tilde{e} in the root syllable, and that it was the echo of the root, nor that its use with other roots is due to analogy. See § 473, Remark.

First, forms with e short in the reduplication.

Perfect. Skr ba-bhūva Gr $\pi\varepsilon$ -φύαπι, \checkmark bhey- 'become, be' Skr. ta-sthimá Gr. i-σταμεν Lat. ste-timus, \checkmark stā 'stand'. Gr. $\pi\varepsilon$ -παγα $\pi\varepsilon$ -πηγα Lat. pe-pigī Goth fai-fāh, \checkmark pāĥ- pāĝ-'make fast' Gr \checkmark ε΄-γενμαι O Ir. do-roigu for *-ró-gegu (§ 878), \checkmark geys- 'taste, try, enjoy' Gr. $\lambda\varepsilon$ - λ οίπα, \checkmark leiq-'leave' O.Lat pe-pigī By late re-formation, as has been pointed out (§ 469, Rem. 2), we get Skr. r-réca cu-krōdhu i-yāja u-váca Lat. scr-cidī pu-pigī tu-tudī, O.Ir. ro chuala.

Pr. Ar. *sa-zd- (= Avest. hazd-) became Skr. sēd-, e. g. 1st pl. sēdimá (I § 591 p. 447), and pr. Ar. *ia-ut- became Skr. yēt-, as mid. yēt-ē (Avest. 1st pl. act. yaep-ma). ē, which here and in similar examples is regular, spread by analogy, and thus we get pētimá instead of pa-pt-imá (the older form, used along with the later), \sqrt{pat} -'fly, fall', and $n\bar{e}\sin a$, from \sqrt{na} -'be destroyed'. Then again \bar{e} in Irish arose by compensatory lengthening, as perf. ro $g\bar{e}nar$ 'natus sum' for *ge-gn- ($\sqrt{\hat{g}en}$ -), see I § 523 p. 380, § 620 p 467. Lat. sēdunus might be derived from *se-zdimus (I § 594 p. 450), and lēgimus vēnimus be explained on the same principle as Skr. pētimā. But of Germ. forms like Goth. sētum (sat 'I sat') mētum (mat 'I measured') qemum (qam 'I came'), and of Lith. forms like part. séd-ēs (sédu 'I sıt') bég-ēs (begu 'I run') kél-ēs (kelù 1. e *kel--mì 'I lift') vém-ệs (vemiù 'I break wind'), there is none which can be due to compensatory lengthening in these several languages. We must therefore assume that here the unreduplicated root with Idg ē, the 3rd strong grade of the e-series, acted as the weak stem for the perfect. This form of the root is quite clearly the perfect stem in Skr. sāh-vás- beside pres. sáh-a-ti = Idg. *sēĝh-e-ti, and in O Ir. ro mīdar 'iudicavi' beside Gr. μήδ-ε-ται, and others Sec § 480 Rem., and § 494. mētin Goth metum must therefore be identified with O Ir. mid-Gr. μηδ-. Weak reduplicated stems often became hard to pronounce, and hence they were often exchanged for this kind of unreduplicated form in the Germanic and Baltic branches, and perhaps in Latin too. See further in §§ 848 and 893.

The discovery of these doublet stems in the Idg. perfect, se-zd- and sēd-, makes it anything but certain that *ēd- was a contraction of reduplicated *e-ed- in Skr. ādima Lat. ēdimus Goth. -ētum Lith. ēdēs O.C.Sl jadū (from \sqrt{ed} - 'cat'). $^{+}$ ēd-may have been a stem like *sēd-, and this to me seems more likely to be true. See § 848. 3.

Present and Aorist. Skr. 3rd pl sa-śc-atr 3rd sing. sá-śc-a-tr Gr. ε-σπ-οιτο, \sqrt{seq} - 'sequ'. Gr. είπ-α (Gort. προ-

-fειπάτω) stem Idg *yε-yq-, Skr ά-vο̄c-a-t Gr. ε-ειπ-ο-v stem Idg. *yε-yq-yq-yς (cp. §§ 557, 561).

§ 472. \bar{e} is less frequent than e in the reduplicator. Many perfects in the Vedas have $\bar{a} = \mathrm{ldg.} \ \bar{e}$, as $d\bar{a}$ - $dh\bar{a}ra$ (dhar- 'hold'), $m\bar{a}$ - m_f)ur (mar)- 'wipe'), $v\bar{a}$ - $va\dot{s}ur$ ($va\dot{s}$ - 'desire'); an example of this kind in Avestic is Gäthic 3rd sing. $v\bar{a}$ - $ver^ez\bar{e}i$ (var^ez - 'work').

The same a is found in Intensives through all periods of Sanskrit; e g dā-dhar-ti beside dar-dhar-ti, bā-badh-ē beside bād-bādh-é (bādh- 'press, oppress'), pā-pac-ya-tē (pac- 'cook'). A similar agreement between the reduplicators of the perfect and the present intensive is seen in perf. dī-dhay-a and pres. intens. dī-dhē-ti, from dhi- 'think' It is obvious that the closely allied in meaning of the completed perfect (or present perfect) and the intensive had some part in the spread of reduplicating a in the Vedic perfect.

Analogous Greek forms are the perfect $\partial \gamma' - \gamma \varepsilon \rho - \mu \alpha l$ from \sqrt{ger} - 'awake', which agrees with Skr. $\partial \bar{a} - g\bar{a}r - a - \bar{a} - g\bar{g} - v\dot{a}s$ -(present $\partial \bar{a} - g\bar{a}r - t - \bar{j}\bar{a} - g\bar{g} - h\bar{l}$), and the Homeric present $\partial \gamma - \partial \dot{e}\chi - a\tau a l$ 'they welcome' (§ 560)

Remaik. Some have wished to see this iedupl \bar{e} in other Greek perfects. But the view is unsafe. See the Author, Gr Gr 2 § 131 p 164. Nothing much is proved by Cret $\hat{a}_{\pi-\gamma',\sigma\tau\epsilon',\nu\epsilon}$ (Cauer, Del 2 no 132 5) and $\tilde{\gamma}_{-\gamma\varrho\alpha\tau\tau\alpha}$ $\hat{\gamma}_{-\gamma\varrho\alpha\mu\mu\nu}$ o; (J Baunack, Berl Phil Wochenschr, 1887, col. 60, Th. Baunack, Philologus NLIN 594), since it is very doubtful whether they come from $*a_{\eta-\alpha\tau\epsilon'-}$ and $*\gamma_{\eta-\gamma\varrho\alpha\rho-}$ (op § 476, Rem. 2)

§ 473. III. The Reduplicator ends in ι or $\bar{\iota}$, the Root having a different vocalism. This is the prevailing mode, and has been since proethnic times, with certain classes of aorist and present stems. I am very far from satisfied with the view that this $\bar{\iota}$ originally was used only with roots containing i (as Skr. bi- $bh\bar{e}$ -ti, type I b. § 469), which it merely echoed, and that it only spread to other roots by analogy

Remark The t of Skr \dot{a} - $j\bar{\imath}$ -jana-t $b\bar{\imath}$ -bhar-ti Gr γt - γro - $\mu a\iota$, as has been said in § 467 pp 13 f, I would identify with $\bar{\imath}$ in the Skr. intensives $bh\dot{a}_i\bar{\imath}$ -bhar-ti $bh\dot{a}_{i}\iota$ -bhr-ati etc. These and the like reduplicative syllables may once have had a real independence, and $-\bar{\imath}$ $-\bar{\imath}$ may have been some inflexion, perhaps a case ending. These were doubtless

sentences of the same kind as Lith delte degae it burns up clear' (§ 260 p. 161), Umbr. subocau suboco invocatione, I appeal appealingly', for similar phrases from other languages, see Pott, Doppelung, 151 ft

If this is correct, the i of $\tilde{q}\tilde{i}$ - $\tilde{q}en$ - and similar forms originally came from roots ending in a vowel, such as di-do- (dodom), *dhi-dhe- $(\tau' \vartheta_{\eta m})$ When the cohesion between the parts had become so firm that the i-case was regarded as being simply a "reduplication", - this idea was greatly encouraged by the use of real reduplications of the type of I b, as *bhu-bhai- *bhu-bhi- - two results might follow (1) forms like *qi-qen- *bhi-bher- came into existence, and (2) with roots beginning in a sonant a simple i was used for reduplicating, e g *i + oq- becoming *iq- (Skr il.- G: tv-) even in the parent speech, and such forms as Skr. iy-artı Gr l-rύω (see p 19) Further, (3) m Sanskrit, or perhaps earlier still, the use of (say) tan i- and tan- as variant reduplicators (tan i-tr-at- and tar-tan i-tr tan-tun-ana-s) led to the making of man i-my-(instead of *mar ji-my)-) beside mar-my)-, and the like Does at in Gr μαι-μάω παι-φάσσω παι- ια//ω etc represent another case ending, and are the words formed on the same principle as we are supposing these with -i to be? If so, o in the or of τοι- τινών ποι-φυσοώ must be ascribed to the influence of πορ-φύρω κορ-μινώ γο/- -γύλλω etc , for ται-φάσω γαρ- $\gamma \alpha \ell \rho \omega = \pi \alpha \iota - (\rho \nu \alpha \sigma \omega - \mu \omega \rho - \mu \bar{\nu} \rho \omega^{-1})$

If this be really the origin of redupl i, the question arises whether e and \bar{e} in words like Gr $\pi_{\bar{e}-\varphi i\bar{e}m}$ and $\hat{e}_{i'j'-j\bar{e}\bar{e}m}$ Skr $j\bar{a}-g\bar{m}n$ (type II, see §§ 471—2) may not be the case-ending of a root noun. As before, we should have to start from roots ending in a vowel, from groups such as $d\bar{e} + d\bar{o}$ - (Gr $\delta \hat{e} - \delta \omega_{i'} \alpha$ Skr $da - d\bar{a}\dot{m}$)

Skr. ti- δth -a-ti Gr. 7- σr_i -ui Lat. si- $st\bar{o}$ O Ir do-anissid (I \S 109 e p 103, \S 516 p 377) O.H.G se- $st\bar{o}m$ (pr Germ. *si- $st\bar{o}$ -mi, I \S 35 p 35), $\sqrt{st\bar{a}}$ -'st-and' Skr bi-bhar-ti Gr i- σ -nu-o-o-ua (\S 539, 542), $\sqrt{bhe}i$ -'ferre' Skr j-j-j-an-a-t a-j-j-j-an-a-t Gr γi - γv -o-ua Lat. ηi -gn- \bar{o} O.Ir. gi-gnid, \sqrt{gen} -'beget'. In Sanskrit thematic aorists the quantity fluctuated; i before more than one consonant, and before a single consonant when a long syllable followed, \bar{i} before a single consonant followed by a short syllable (cp Wackernagel, Dehnungsg. p 18), e. g a-gi-spi-s-a-t (spu-s-s-t-touch') and a-di-dih-s-a-t (dih-s-s-t (dih-s-t-t), but a-f-f-f-a-t-t Greek has \bar{i} only in πt - πr - ω 'I fall' (cp. Skr. a-f-f-ga-a-a-t), but here \bar{i} may have been borrowed from \dot{b} t- πr ω , which was connected

¹⁾ Another explanation of this is given by Per Persson, Stud zur Lehre von der Wurzelerweiterung, p 216 footnote 1 Per Persson's is really not very different from mine.

with it in meaning; if so, it is no example of the principle we are discussing.

Presents with -s- (§§ 666 ff.). Skr. n-nā-sa-tē from nā-'learn, know', di-dā-sa-tī di-tsa-tī from dā- 'give', mī-mā-sa-tē from man- 'think'. O li no-gigius 'I will pray' for *-gigetsō, beside no guidiu 'I pray'.

Presents with -sh- (§ 678) Gr. δi - $\delta \acute{a}\sigma \imath \omega$ 'I teach' (perf. δs - $\delta i \delta \alpha \varkappa \alpha$), Lat. $d i s c \bar{o}$ for i d i-t c- $s c \bar{o}$ (perf. d i- $d i c \bar{t}$)

The i-vowel alone is used for the reduplication with roots beginning in a sonant. Skr *ipsuti* (cp. apsanta § 659) beside āp-nő-ti 'acquires', írtsati beside rdh-nő-ti 'thrives' fut. ardhišyatē, with tkšatē 'sees' (cp. O.Pers patiy-axšaiy § 559) is connected Gr. $i\pi$ - in Hom. $i\pi$ - $i\pi$ - $\epsilon v'\omega$ 'I ogle' $(\pi\alpha\rho\vartheta\epsilon\nu$ - $o\pi i\pi\eta\varsigma)$, 1) which is an analogical re-formate like $\delta \pi - \omega \pi \alpha$ instead of * $\omega \pi \alpha$, έδ-ηδώς instead of ηδώς. Skr. iy-ar-ti beside ár-ti from ar-'set in motion', Avest 3rd sing conj. uz-yarāb i e. -iyar-āb, Skr. $iy-\bar{e}-ti$ beside $\dot{e}-ti$ 'goes', the only evidence for which is its 2^{nd} sing. pret $\bar{a}iy-\bar{e}-\dot{s}$ (R V, v. 2 8), Avest. 3^{rd} pl. conj. yeyan = Ar. *1y-ay-ān (Bartholomae, Ar. Forsch. II 71 f); Gr. 1-oven 'I spend the night', lógreir ayeir (Hesych) for *1-ay + ozo, O.Ir. 1-orr fut of organ 'I destroy, kill' (beside O.H.G. ang 'that which is bad') The former group, with the reduplication vowel and root vowel contracted together, was certainly proethnic *ip- and 'iq- for *i-op- 'i-oq-, or something of the But it is possible that Skr ly-arti and others of that type are a re-formation of later date, like Goth. perf. ai-áuh from áuka 'I increase', -aí-áik from -áika (af-áika 'I deny, refuse')

On the difference between Gr. τi - $\theta \eta \mu u$, with orig. ι in the reduplicator, and Skr. $d\acute{a}$ - $dh\bar{a}t\iota$ Lith. 2^{nd} pl. $d\grave{e}$ -ste with orig. e, see § 538

It has been pointed out (§ 469 Rem. 1, p. 14) that *i* is found in the reduplicator even where the root contains *u*-vocalism. But, as I said in that place, I regard Skr.

I cannot agree with Kretschmer in deriving ôπτη- from *oqi-oq-(Kuhn's Zeitschr., xxxi 885).

ju-hō-ti, a-cu-hrudh-a-t, bu-bhut-sa-ti and similar forms as being genuine proethnic types, and not as having changed i to u

§ 474. IV. A fourth type, of unknown origin, is represented by a considerable number of forms in Sanskrit, and by two in Greek. (Cp. Bezzenberger, Bezz. Beitr. iii 310).

Skr. desid. ašišiša-ti from aš- 'eat', the grammarians also cite aniniša-ti from an- 'breathe', arjihiša-ti for *arjhijhiša-ti (I p. 480 p. 354) from arh- 'deserve, be worth' and others; aor. arpipa-t (unaugmented) beside arpáyati 'sets in motion, shakes' (§ 797), in grammars also ānina-t, ārjiha-t, āubjija-t (ubj- 'keep down, squeeze together') and others.

Gr. $\partial \rho \dot{\tau} \pi \alpha \sigma - \nu$ from $\partial \rho \dot{\tau} \pi \omega$ T hold back and $\partial \nu \dot{\tau} \pi \alpha \pi \sigma - \nu$ from $\partial \nu \dot{\tau} \pi \tau \omega$ T address; beside $\partial \nu \dot{\tau} \nu \bar{\tau} \pi \sigma - \nu$, type I c (§ 470).

- § 475. A few remarks are now needed on the way in which Consonant Initials are treated in Reduplication.
- 1. There was originally no difference between the beginning of root and reduplicator, when the root began with one consonant, as dō- 'give' Skr. dá-dāti, Gr. δί-δωμι, Lat. de--dit Osc. de-ded, O C.Sl. 3rd pl da-detii But a great many differences were brought about by phonetic change. For instance, in Greek and Sanskrit the initial of the Reduplicator was affected by the principle of dissimilation of aspirates which held in those languages, e. g Sanskrit dádhāti for *dha-dhāti, babhūva for *bha-bhūva (1 § 480 p. 354),1) Gr. τίθημι for *θι-θημι, πεφίασι for φε-φυαντι (I § 496 pp. 364 f). We were introduced in vol. I p. 483 footnote 1 to a dissimilation peculiar to Irish, -roinasc for *-ró-nenasc, -roichan for *-ró--cechan; compare § 878, below The Root-initial is changed e. g. in pr. Idg. *si-zd-\(\vec{o}\) (\$\sqrt{sed-'sit'}\$) = Gr. 7\(\zeta\) (I § 590 p. 447, § 593 p. 449). It often happened, however, that a difference brought about by phonetic change was obliterated afterwards, as in Ved perf. mid. si-sic-ē instead of si-šic-ē

¹⁾ The perfect ja-bhára is a mixture of bu-bhára and ja-hára. See von Bradke, Zeitschr. D. Morg. Ges. XL 665 f.

from sic- 'pour',1) Gr Gort. 9i- $9\varepsilon\theta\theta\omega$ instead of * τi - $9\varepsilon\theta\theta\omega$ Att. τi - $\theta\varepsilon\theta\theta\omega$ (I § 496 p. 365, the Author, Gr Gr.² pp. 73 f.), Ion. perf. $\beta \dot{\epsilon} \beta \alpha$ - $\mu i r$ instead of * $\delta \varepsilon$ - $\beta \mu$ - $\mu i r$ = Idg. *ge-gg- from \sqrt{gem} - 'go' (I § 428 b, p. 316), Umbr. ře-ře 'dedit' instead of *te-ře cp. teřust dirsust 'dederit' (I § 369 Rem. 3 p. 281).

Remark We may not assume that in Idg * p_1 -b-e- t_1 (Skr. pibate Lat b_1b_1t O Ir $_1b_1d$) b is simply for $_p$ by dissimilation. It is quite possible that b came from the imperative * p_1 -b- dh_1 (for * p_2 -p- dh_1), cp § 539.

476. 2. Where a root begins in more than one consonant, only the first of them is reduplicated. This rule held in the proethnic language and holds in its branches too. Examples.

Skr šu-śráva Gr ×i-×vvf O Ir. ro chuala for *cu-clova from \sqrt{kleu} - 'hear' Skr á-su-sröt from sru- 'flow'. Gr. ré-/quau from \sqrt{gluu} 'I sentence', \sqrt{lluu} 'be gracious' for * σ 1- σ 1 η -gluu (I § 565 p 423) O Ir. ad-ge-grannatar 'persecuti sunt', ro selach 'I struck down' i e se-slach (I § 576 pp 431 f.). Goth. gai-grōt from grētu 'I cry', fai-flōh from flōka 'I lament', sai-slēp sai-zlēp from slēpa 'I sleep'.

Skr. sa-smára from smar- 'remember', a-śn-śnat from śnath- 'pierce' (śr εἴμαρται 'it is fated' for *σε-σμαρται (I § 565 p. 422), πέ-πνῖγμαι from πνίγω 'I choke', ποιπνύω 'I pant'. Mid.Ir ro senauh 'stillavit' i e. se-snaich (I § 576 p. 431).

Skr di- $dv\bar{e}$ ša from $dv\bar{s}$ - 'hate', sa- $sv\bar{a}na$ from svan- 'sound', partic. $\dot{s}a$ - $\dot{s}vasat$ - from $\dot{s}vas$ - 'puff, pant, blow', ta- $tyaj\bar{e}$ from tyaj- 'forsake', sa- $syand\bar{e}$ from syand- 'move on'. Hom. $\delta\epsilon i\delta\iota\mu\epsilon\nu$ i. e $\delta\dot{\epsilon}$ - $\delta F\iota\mu\epsilon\nu$ from $\sqrt{d\mu ej}$ - 'frighten' (I § 166 p. 147). O.Ir. do-sefann -sephann from do-sennm 'I hunt, drive' for * $s\mu$ -do- or * $s\mu$ -do- (I p. 175 p. 154, II § 613).

Skr. ci-kṣ̄āya from kṣ̄i- 'possess', ca-kṣ̄āna from kṣ̄anhurt, wound', Gr. r--τημαι from rτάομαι 'I get, win' (cp I § 554 pp. 407 f., Kretschmer Kuhn's Zeitschr. xxxi 433)

¹⁾ We are not at liberty to explain $si\text{-}sic\text{-}\bar{e}$ by saying that sa-= Idg. se- was the reduplicator in pr. Aryan (§ 851).

Avest hi-štaiti O Pers a-i-štatā (I § 558 Rem. 1 p. 410), Gr. Γ-στημι ε-σιητα, Lat. si-stō Umbr se-stu 'sisto', O.Ir. do-airissid sessam for *si-st- (I § 109 e p. 103, § 516 p. 377), from $\sqrt{st\bar{u}}$ - 'stand'. Avest. partic hi-spōsemna- from \sqrt{spek} - 'conspicere'. O.Ir. se-scaind 'he leapt'.

There are several variations from this type, of which the chief here follow.

The first is the commonest of them all (it is found in Sanskrit, Greek, Italic, Germanic), and perhaps began in the proethnic period. When a root began with s + anExplosive, both were often taken on into the Reduplicator, instead of simply the s. Thus Goth stui-stald from stalda 'I possess', skai-skaib from skaida 'I divide'. In Sanskrit, Greek, and Italic dissimilation came in and destroyed the likeness of root and reduplicator; s was dropped either in the reduplicator (so Sanskrit, Greek, Latin) or in the root (Italic). Skr ta-sthāú ti-štha-ti from sthā- 'stand', ca-skánda, 2nd and 3rd sing. káni-škan, cani-škada-t from skand- 'leap', pa-sprdhé from spardh- 'vie, strive for', pani-špadá-s 'quivering' from spand- 'quiver'. This example of the principle of dissimilation Greek and Latin show only in a few nouns ro-orvàμάτια 'shreds of leather' qui-squiliae, γα-σχάνδις 'leek' are examples (Fritsche, Curt. Stud. vi 319 f). With s dropt in the rootsyllable Lat. ste-tī sti-tī Umbr stiti-steteies Lat spo-pondī sci-cidī. Compare Osthoff, Paul Braune's Beitr. viii 540 ff., I do not think that his hypothesis is overthrown by Meringer in Zeitschr. ost. Gymn, 1887, pp. 371 f

Remark 1. The reason why the present Lat s_i - s_i kept the old method, while s_i to t_i did not, was that this was the only reduplicated present with a root beginning in s + explosive. Observe too that all its perfect forms were once distinguished by the vowel e in the reduplicator instead of ι (§ 471).

Secondly, when a verb stem beginning in two consonants simplified these to one in its unreduplicated forms, the reduplicated forms were treated as though the verb began originally in one consonant (§ 475). Gr. Doi. $\pi \acute{\epsilon} - \pi \bar{\alpha} \mu \alpha i$ I possess, have authority over instead of * $\epsilon - \pi \pi \bar{\alpha} \mu \alpha i$ 1. e. * $\epsilon - \epsilon - \epsilon \bar{\alpha} \mu \bar{\alpha} i$ (cp.

Skr. -śi-śvi-š), because in the present and other tenses *kyā- became πā- (I § 166 p 147, § 654, 4 pp. 500 f., II § 117 pp. 370, 371) σε-σόβημαι for *τε-σσοβ- (cp. Skr. ta--tyάja) following σοβέω 'I scare away' ground-form *tjogέχο (Ι § 459 p. 337). τε-θιοαλία Thess πε-φειράνου[τες beside θήο Thess φείο 'wild beast' for Idg *ghyēr- O.C Sl zvěrī Lith. žveri-s (see Buck, Amer Journ Phil xi 211 ff.), so that the reduplication would properly have been to. Locr. partie. Εε-Εαδηρότα following Εανδόνω (άνδάνω) 'I please' from √ syād- (cp Skr sa-svadē) ģέ-μιπται (Pındar) following ύτπτω 'I throw' for 'Fοίπτω, and Att ζοριπτοι instead of the regular *(f)ενρίπται (the Author, Gr. Gr 2 p 31). re-νηγθαι from ryxw 'I swim' for *orazw (Skr 3rd pl sa-sn-ur). Lat me--mor memoria formed from a perfect *me-morī, which probably arose on the analogy of unreduplicated forms with mer- for smer- (cp merda for 'smerda etc., 1 \ 570 p 427), cp, Skr, sa--smara. O.Ir. perf. 3rd sing in 'gave away, sold' from v perinstead of *i-r for 'pi-pi-e on the principles laid down in I § 339 p. 268, ep. § 878 below

¹⁾ In Bocotian or Laconian we must add to the perfect the aorist form Friara for *Forara Hesychius' gloss Friara Forgour should probably be assigned to one or other of these dialects (cp I § 566 p 423).

Remark 2 It is an obvious suggestion that in ἐβλάστηνα etc we have the augment in place of the reduplication, since in verbs with a vowel initial the augmented preterite and the perfect came to have the same beginning: e g ἢρέβιζον: ἢρέβισμαι (ἐρεβίζω), ἤσνησα ἤσκημαι (ἀσκεω), ἀφ-ῖκόμην ἀφ-ῖγμαι But if so we should expect similar forms in verbs which began with one consonant, and such forms as *ἔ-βηνα instead of βέ-βηκα (see § 475) 1)

We cannot suppose that the form $\tilde{\epsilon}$ - $\varrho\varrho\omega\gamma\alpha$ stands for * $F\epsilon$ - $\varrho\varrho\omega\gamma\alpha$, and that it gave the type for $\tilde{\epsilon}$ - $\beta/\dot{\alpha}\alpha\tau\eta\kappa\alpha$ etc., because the dialect of Gortyn a has $\tilde{\epsilon}$ - $\gamma\varrho\iota\iota\iota\iota\iota\alpha$, and this dialect kept initial F before an ϵ -sound

The Cretan perfects an-harelne n'-/earra mentioned in § 472 Rem, page 17 above, with n-, only give a fresh problem to solve

THE AUGMENT.2)

§ 477. The Augment $(\alpha \tilde{v} \xi \eta \sigma \iota c)$, as it is called, is a syllable, Idg. *e- = Skr. α - Armen e- Gr. \dot{e} -, which prefixed to verbal forms serves to mark past time.

Ebel, Die scheinbaren Unregelmässigkeiten des griech Augments, Kuhn's Zeitschi iv 161 ff La Roche, Das Augment des griech Verbums, Linz 1882 Pöhlmain, Quomodo poetae epici augmento temporali usi sint, Tilsit 1858 Grashof, Zur Kritik des homer Textes in Bezug auf die Abwerfung des Augments, Dusseldorf, 1852. K. Koch, De laugmento apud Homerum omisso, Brunswick 1868 Skerlo, Übei den Gebrauch (die Bedeutung) des Augments bei Homer, Graudenz 1874. Molhem, De augmenti apud Homerum Herodotumque usu, Lund 1876 Bumke, De augmento verbi Herodotei, Braunsberg 1835. H Lhardy, Quaestionum de dialecto Herodoti caput primum De augmento, Berl. 1844

¹⁾ Floy, α instead of $l \neq l o \gamma \gamma \alpha$ in two late sepulchral inscriptions is probably not a mistake in the graving, but a misformation, due to contamination of the perfect $l \neq l o \gamma \gamma \alpha$ or $\epsilon i l l l l l \alpha$ at a time when this kind of perfect had become unfamiliar (Thumb. Mitteil. des deutsch arch Inst in Athen, xvi 176)

²⁾ R Garnett, On the Oligin and Import of the Augment in Sanskrit and Greek, Proceedings of the Philol Society I (1844) p. 265 ff Fr Muller, Einiges ubei das Augment, Kuhn-Schleicher's Beitr, III 250 ff J Davies, On the Temporal Augment in Sanskrit and Greek, Hertford 1865 Faust, Zuridg Augmentbildung, Strassb 1877 A H Sayce, The Origin of the Augment, Transactions of the Philol Society, 1885—1887, pp 652 ff Bréal, De l'augment, Mém de la Soc de lingu. vi 333 ff

J Avery, The Unaugmented Verb-Forms of the Rig- and Atharva-Vedas, Proceedings of the Amer Orient Soc, May 1884, pp. xi f, und Journal of the Amer Orient Soc xi 326 ff

It was originally an independent word, an adverb, followed by the verb, which then became enclide, e.g. *é liqet 'he left' (Armen. e-lik Gr $\ddot{\epsilon}$ -lips), and it may be compared with the Irish particle ro (= Gr $\pi \varrho o$) which is used before verbs of the historic tenses. But in all the languages which have kept the Augment, it has become an inflexional prefix (cp. II § 4 page 6). A trace of its original adverbial character remains in the accentuation of Greek forms like $\pi \alpha \varrho - \dot{\epsilon} - \sigma \chi o \nu$ (I offered), which involves the same principle as that of $\pi \alpha \varrho - \dot{\epsilon} - \vartheta \varepsilon \rho$ (put in between) and of Skr. $sam-\dot{a}-cinut\bar{c}$ ('he heaps together, collects').

As to the origin of this adverb e, and of \bar{e} , which as we shall see later was used in the same way in the parent language, only uncertain conjectures are possible

Remark. Older explanations are cited by Curtus, Verb I² 109 ff Sayce's new suggestions do not commend themselves to me (see page 24 footnote) It would be best to regard *e as a locative of the pron. stem o-, with temporal meaning (see III § 409 p 329), compare *te (Lith tè OCSI te) from *to- and the like (III § 424 p 349) The relation of *e *\bar{v}\$ has plenty of parallels, as *te *t\bar{v}\$, ne *n\bar{v}\$ (III p 349 footnote, § 415 Rem. p 337). Compare also Per Persson, Studia etymologica, p.78

If the verb had other prefixes besides the Augment, this stood immediately in front of the verb. But sometimes a verb compounded with a preposition became to all intents and purposes a simple form, and then the augment came right in front Skr. a-pīdaya-t 'pressed' for *pi-zd- ('sit upon'), Gr. $\hat{\epsilon}$ -nisζor for $ni(\sigma)\epsilon\delta$ -, see § 795. Skr epic a-samblu amat 'he trembled' Gr. Att $\hat{\epsilon}$ -idθsvdor beside $ra\theta$ -nīdor 'I slept'. When the structure of verbs was thus forgotten, there could even be a double augment Skr. epic aprāišīt beside prāišīt = pra-āišīt 'he drove out', Gr. $\hat{\eta}_1$ -siz'unr 'I endured' The same thing occurs in reduplicated forms, see § 850.

§ 478. The augment with verbs beginning in a Consonant. Examples Pr. Idg *é bherom '1 bore'. Skr. á-bharam

Kloppe, Dissert de augmento Herodoteo, cp I II., Schleusingen 1848. Sorof, De augmento in trimetris tragicis abiecto, praemissa de orasi, elisione, aphaeresi quaestione, Breslau 1851.

Avest. a-berem O Pers. a-baram, Gr. $\tilde{\epsilon}$ -qeoor. $3^{\rm rd}$ sing. Skr. á-da-dhāt á-dhāt Armen e-d Gr $\tilde{\epsilon}$ - τ (9ti $1^{\rm st}$ pl ε -9s μ er, \sqrt{dh} c-place'. $3^{\rm rd}$ sing. Skr. á-bādhat a-buldha a-būbudhat Gr $\tilde{\epsilon}$ - π ev-9eto $\tilde{\epsilon}$ - π év9eto è π énvoto, \sqrt{bheu} dh-'awake, notice'. $3^{\rm rd}$ sing. Skr. á-dista a-dikšat Gr $\tilde{\epsilon}$ - δ eizer $\tilde{\epsilon}$ - δ eize, \sqrt{dex} k-'show, point'. $3^{\rm rd}$ sing. Skr. á-gan Armen e-kn, \sqrt{gem} -'go, come' $3^{\rm rd}$ sing. Armen. e-tes Gr. $\tilde{\epsilon}$ - δ e'zeto, \sqrt{dex} k-'sec'.

All that is left of the augment outside of these three groups are a few obscure Germanic forms Goth. iddja 'he went' = Skr \acute{a} -yāt (I § 142 p 127), A.S 3rd pl. $\acute{e}\acute{o}dim$ = Goth. $iddj\bar{e}dun$, op §§ 587, 592, 886 Rem But these are not free from doubt, because we find in Sanskrit epics the unaugmented form $iy\bar{a}$ -t as well as a-yā-t (with iy- instead of y- like iy- \bar{e} , § 493) So iidja too may represent the unaugmented Idg $\acute{e}i\bar{e}$ -t

In Greek, - was often obscured by being contracted with the following vowel, after σ or F which once began the root had dropped (cp. I § 165 p. 146, § 564 p. 421, § 603 pp. 455 f.), e. g εἰπόμην for ε-(σ)επομῶν from ἐπομῶν sequor, εἶρπον for ε-(σ)ερπον from είρπον serpo', εἶδον 'I saw' for ε-(F)εδον (Hom ειδον, Lesb. ενίδον), εἰργαζόμην for ε-(F)εργαζομην (an inser of Hermione has ε΄ Ε-ργάσατο) from ἐργάζομιε 'I work'. On εἴθιζον 'I was accustomed', orig. *ε-σΕεθτζον, εἶλκον 'I dragged', orig. *ε΄-σΕελκον, compare I § 563 7 p. 420, and the Author Gr. Gr. g § 13 p. 33 The aspirate of εἰπόμην εῖλκον εἶρπον, hke that of είγα ἦνα pl εῖμεν (for ε΄-(σ)η- ε΄-(ο)ε-, from ῆνμα 'I send forth' for σοι-σημο) is doubtless due to the transference of the internal h (*ε-hεπόμῶν etc.) to the beginning, so it was in ερό-g for *ελεοό-ς (Skr. εξινά-ε) and other words, see Kretschmer, Kuhn's Zeitschr. xxxi 421

In Greek, again, the augmented pretentes of verbs which have lost their initial consonant are often treated like those of verbs that never had any (§ 480). This is commonest in later times. An example is Att. ώνησα instead of *ε-(F)οι-νησα, from (F)οινέω 'I live, dwell', following such forms as α"δησα (οἰδέω 'I swell'. Armen. aitnum 'I swell' O.H.G. eiz 'sore, abscess').

§ 479 In Vedic, some verbs beginning with v, y, or r have \bar{a} - for their augment, as \acute{a} - $v_l nak$ from $v_l nakt_l$ 'turns round' (see Delbruck, Ai Verb, 79) \bar{a} - is also found as augment with verbs beginning in \check{u} , \check{i} , i; as $\bar{u}\acute{u}nat$ from $un\acute{u}tt_l$ 'wets' (see § 481) That this \bar{a} - was original, at least in some of these forms, is made probable by the use of $\vec{\eta}$ - instead of $\vec{\epsilon}$ -not infrequently before Greek verbs with initial i Examples. Hom. $\mathring{\eta}\acute{s}\acute{l}\delta\eta$ 'he knew' for $\mathring{\eta}$ - $f \acute{s}\acute{l}\delta\eta$; ') Att. $\mathring{s}\acute{u}\acute{u}\rho\sigma r$ 'I saw' $\mathring{\epsilon}\acute{a}\lambda\iota\sigma r$ 'I was captured' for $\mathring{\eta}$ - $f \acute{l}\iota \partial q\sigma\sigma r$ ' $\mathring{\eta}$ - $f \acute{l}\iota \partial a\lambda\sigma r$ (I § 611 p. 462), the aspirate in the last two is to be explained like that of $\mathring{\epsilon}in\acute{o}\mu\eta r$ $\mathring{\epsilon}\eta \acute{r}a$ (§ 478) Words like $\mathring{\eta}\varrho\gamma u \check{\zeta}\acute{o}\mu \eta r$ (beside $\mathring{\epsilon}l\varrho\gamma u \check{a}\acute{o}\acute{u}\eta r$) are less certain. It is true this form may be derived from $\mathring{\eta}$ - $f \acute{l}\iota \varrho g \acute{r}$ -; but so may it be an ad-formate of verbs which began with e- in the pre-Greek period (ep $\mathring{u}\acute{r}\eta\sigma a$ § 478, above).

On the relation of \bar{e} - and e- see § 477 with the Remark, page 25

Remark On Greek forms with β - compare G. Meyer, Gr Gr 2 pp 421 ff, the Author, Gr Gr 2 p 150, and the works there cited

Another view, which I think not probable, is that certain verbs with initial f have a prothetic i-, and that from these were made preterites with the temporal augment (i,i,i), being to i-coincides what i-i-coincides what i-coincides what i-coincides what i-coincides with initial f but without prothetic i- took i- for augment

¹⁾ Some scholars would write $\epsilon \vec{v} \epsilon \ell t$, in the Acolic fashion, for which there is no authority at all. Attie $\vec{\eta} \delta \epsilon_i$ cannot be contracted from $\hat{\epsilon} \epsilon_i \delta$ -but only from $\vec{\eta} \epsilon_i \delta$ -.

§ 480 In verbs with initial Sonant the augment has everywhere ceased to be a separate syllable. It was contracted with the root-initial in the original language (cp. I § 114 p 107)

Examples Pr Idg * $\bar{\epsilon}s\eta$ for *e es η or * \bar{e} es η , cp. pres. *es-mi = Sk1 ásmi etc · Skr ásam Avest. 3^{rd} sing. $\bar{a}s$ O.Pers aham 1 e. āham, Gr Hom $\bar{\eta}a$ Att $\bar{\eta}$ 3^{rd} sing. Dor. $\bar{\eta}_S$; 1) cp O C Sl - $jach\bar{u}$ for * $\bar{e}som$ in imperfects like neséach \bar{u} (§§ 493, 510, 903) Pr Idg * $\bar{e}_L\eta$ from ' e_L-m 'I go'. Skr. áyam 3^{rd} sing āit Avest 3^{rd} sing āip O Pers. ayam 1. e. āyam, Gr $\bar{\eta}a$ instead of * $\bar{\eta}a$ for ' $\bar{\eta}_La$ (§ 502), compare Lith $e_Ia\bar{u}$ 'I went' from the stem * $e_L-\bar{a}-$ (§ 586) Gr. $\bar{\eta}_Ia\bar{\iota}$ 0 C.Sl. s-aorist $\bar{\jmath}$ as \bar{u} = * $\bar{e}t$ -so-m, \sqrt{ed} ·eat'

It is extremely probable that the same augment is seen in Lithuanian present forms of the substantive verb beginning with \bar{e} -, as pleasame csate dual csava csata beside csame etc. and csame (esame) etc. Like O.C'Sl -(j)achŭ -(j)ase etc (see above), these were originally imperfect. But after all the other preterites of present stems with thematic vowel had fallen into disuse, this imperfect of es-was quite isolated, step by step it gave way to buvaũ, while at the same time the forms which ended like those of the present system came to be used as equivalent to them; and later the participle csa was formed and used side by side with csa and in some dialects esù esì beside esù esì. Perhaps Lat. cs 'thou art' (also cs) is also an augmented form, and represents Idg. *ēs-s²)

Remark Osthoff (Perf, 184 ff) assumes that Lat $\bar{e}s$ $\bar{e}st$ $\bar{e}st$ $\bar{e}st$ from $ed\bar{v}$, and Lith $\dot{e}dm$ $\bar{e}du$ etc OCSI jami $(em\bar{i})$ are forms of the augmented imperfect used as present. I think that their \bar{e} - may very well have this origin. But another supposition is quite as good, may

¹⁾ We are certainly tempted to follow Bopp, Lagarde, and Bugge, and add Arm. ēi 'eiam' 3rd sing. ēi ; but Idg ē seems always to become Arm i Compaie Hubschmann, Kuhn's Zeitschr XXIII 12.

²⁾ So too the augment has crept into the present and future in Modern Greek, as $a\tilde{c}$, $\hat{\epsilon}\beta\ell\hat{\epsilon}'n\omega$, $\vartheta\hat{a}$ $a\tilde{c}$, $\hat{\epsilon}\delta\omega'n\omega$ (Hatzidakis, Kuhn's Zeitschr XXX 375), and so the augment of Armen. e-kn 'he came' and e-d 'he placed' has found its way into allied forms, as fut ekic and edic (Hubschmann, Arm. Stud. 1 28, Bugge, Kuhn's Zeitschr. XXXII 38).

better — that they represent the ablaut-grade Idg *ēd-. Then *ēdmi: *edmi (8kr άιδmi) as Ski imper mid. sắk-šiu sắk-šiu (√ seißt-), and as Skr sắhati sáhate (Gr ἔχεται), dhấvati dhavatē (Gr θέω), Gr. μήδομαι μέδουαι, Lith bἔgu Gr ψέβουαι, and so forth (§ 471 p 16), and, if so, the ēd- of *ēdmi must be identified with that of the s-aorist Lat. ēssem O C Sl. μισι (ἐsū), and probably with that of the perfect forms Lat ēdī, Lith édēs O C Sl μαδι (edū); see loc cit above. One view only I must distinctly oppose; the view of those who regard this root as not belonging to the recognised e-series, but to an ē-series, and who regard 8kr. ádmi as not original, while the Ēdmi of Latin and Balto-Slavonic is Compare § 494

How came this \bar{c} -grade ($m\bar{c}d$ - etc.) to exist in e-roots? It is impossible to say. It is found, in the proethnic stage and later, not only in the present and aorist, but in the perfect too (§ 848-3), and also in nouns (e.g. Gr. $\mu_i^{\gamma}\partial c_i$ $\mu_i^{\gamma}\sigma \omega \rho$ Armen mid), and we have no right to limit this \bar{c} to any single tense. It is certainly remarkable that the perfect forms with \bar{c} never had the reduplication (Skr. $s\bar{a}h$ -ids- etc.) But there are other original unreduplicated perfects, as for example * $\mu o \chi de$ 'knows') see loc cit)

What was originally the quality of the resultant vowel, when an augment was contracted with the initial a- or o- of a root, it is hard to say. The Aryan languages of course always have \bar{a} -, whether the root began in e, o, or a, as Skr. \acute{a} yat from ájati 'he drives' Gr. áyei, ápasyat from apasyáti 'is active' Lat operatur. In Armenian, verbs beginning with a- have apparently no augment in the preterite, as ac 'he led', ar 'he took' auc 'he anomted' anc ' $\pi u \varrho \tilde{\eta} \lambda \vartheta \varepsilon$ ', we also find a re-formation with augment \bar{e} -anc (with later \bar{e} instead of e) Greek forms like άγον Ion. ήγον (from άγω 'I lead'), ώζον (from όζω 'I smell'), ιοδησα (from ο δέω 'I swell') are suspicious, because their long vowel might come from analogy, once such forms as *esti $(\tilde{\epsilon}\sigma\tau)$ · $\tilde{\epsilon}st$ $(\tilde{\eta}s)$ had produced a belief that the lengthening of an initial vowel marked the past tense. Beyond all doubt this is the cause of the long vowel in such words as trétevou (from instreuo 'I beseech') and υμεναίουν (υμεναιο 'I sing the bridal song'), compare what is said is § 643 on όρ-νν-με : όρ-νν-μεν.

§ 481. In the plural and dual of the pret. of *es-mi 'I am' and *e½-mi 'I go', if Idg. *e- is allowed to be their augment, we should expect forms like Skr. *ú-sma *á-san, Gr. *ɛ/μεν Lesb. *έμμεν and Skr. *ému *á-yan, Gr. *ɛ/μεν,

op. pres 1st pl. Skr. s-más, ι-más and the unaugmented imperf. Skr. Ved. s-an Avest h-en and Avest. ι-tā Gr. ἴ-την. One such form is Avest. ahma Gathic ēhmā = pr Ar. *a-sma Otherwise we find only ásma ásan āima áyan, Avest 3rd dual āitem, O Pers 3rd pl. aha aya i e. doubtless āha āya, Gr. ημεν ηστε, O.C.Sl 2rd pl. -(j)as-te If we suppose that the augment here was ē (cp. § 477 and Rem p. 25, § 479 pp 26 f), the sing. and dual-pl. agree in their initial syllable right back as far as the parent speech. However, it is possible, and probably better, to assume that the long vowel came from the singular, the initial of āsam ηα as compared with āsmi εἰμὶ being classed in the popular imagination with that of the preterites ājam ānam ηρων etc., which had a long initial vowel in all persons.

Remark 1. η in $\tilde{\eta}_{uev}$ $\tilde{\eta}_{\tau e}$ must be a re-formation (cp. I § 611 p 461) But there is no need to bring in the influence of the sing $\tilde{\eta}_{\alpha}$, since $^*\bar{e} + \underline{i} \cdot ent$ may conceivably have been the 3^{rd} plural (cp. § 1020. 1. α).

Remark 2 Osthoff's view (Pert., 151 f.) that Skr ásta Gr have came from *é esté, and that *esté was the weak-grade form of 1/es- with secondary or bye-accent, is no longer tenable. See Bartholome, Bezz. Beitr. xvii 105

In Sanskrit, verbs beginning with \bar{u} -, \bar{i} -, or r- have $\bar{a}u$ -, $\bar{a}i$ -, and $\bar{a}r$ - in their augmented preterite $\bar{a}u$ nat from unatti wets' (ud-). $\bar{a}u$ hat from \bar{u} hati removes, pushes' $\bar{a}i$ chat from isate owns' $\bar{a}r$ chat from rehati reaches, gets. The augment here was probably \bar{e} ; see § 479 above, on \bar{a} -vrnah etc. Other attempts to explain these are given by Schleicher Comp. 4 p. 738 (cp J. Schmidt, Vocalismus, I 44) and Bartholomae, Ar. Forsch. II 74 f.

§ 482. In Herodotus are a series of apparently unaugmented forms, of which αἴτεε (αἰτέω Ἱ ask), εὐχετο (εὕχομαι Ἱ pray), αύξετο (αὕξω Ἱ increase) are examples. These may be quite regular, and come from older forms with initial ā₂-, ēų-, āų-, as laid down in vol. I § 611 p. 461.

The vowels in the first syllable of such forms as Att. ητουν (αἰτέω), ηὐξάμην (εὕχομαι), ηῦξον (αὕξω), and ἤντησα (ἀντάω 'I meet'), ἦοχον (άρχω 'I lead'), ὤρνυον (όρνῦμι ὀρνύω

'I arouse, set a-going') is due to the analogy of ηγον: άγω, $\eta \rho i \zeta \sigma v : i \rho i \zeta \omega$ etc. $\eta \mu \epsilon v \eta \tau \varepsilon$ are discussed in § 481 with the Remark, just above.

§ 483. The Augment Omitted. In the parent language the augment could be dispensed with The forms with which it was used were not confined to the expression of any particular tense or time, and they could be used for the past without any augment. This was easy enough if past time were unmistakeably indicated by the context, or by some other expression in the sentence, such as Skr. purά Gr. πάρος. Compare § 909

The use of both augmented and unaugmented forms (as *é-bherom and *bhérom in the sense of 'I carried') continued in the separate languages, and survivals of it occur right down into the historic period. The facts are as follows.

In Sanskrit of the Vedic period both modes of expression are used together, in the Rig-Veda they are about equally balanced But even in Vedic we can see a growing preference poetry the augment is rarely omitted. And in later or classical Sanskrit, which was ruled by the native grammarians, augmented forms alone are used In Avestic the double usage is also found, though the augment occurs rarely in comparison with the number of times it is omitted. But Old Persian seems to know no preterites save those which have an augment (a few forms in this language are doubtful).

In Armenian the augment was kept only before monosyllabic verbal forms which kept their root vowel, or before those which without it would not have been a complete Thus the 3rd sing. aor. $e-hk^s = Gr$. $\xi-\lambda i\pi s$ has it, but 1st sing lki has it not.1) It is found in other persons besides the 3rd song with the aorists of the roots dhe- 'place', do- 'give', and gem- 'come'; thus 1st sing. e-di e-tu e-ki 3rd

¹⁾ It is a fair assumption that, in the 1st sing, *eliki beside *liki dropt out of use before *liki became monosyllabic.

sing. e-d e-t e-kn. That the augment was kept or dropt according to the number of syllables in the word is clear from 1st pl. tuak beside sing. 1st pers. e-tu 2nd e-tur 3rd e-t pl 2nd e-tuk 3rd e-tun, and by comparison with 1st pl. e-dak e-kak (beside e-di e-ki). The augment of edi and eki passed into other parts of the verb, for which see page 28, footnote 2.

In the Greck of Homer and the later epic poets, the use of the augment is artificial In the later epic it is less and less omitted as the language approaches more nearly to ordinary prose. In prose, augmented forms predominated from the very first. The only exceptions are the pluperfect, which shows the old variation, e. g. πεπόνθη πεπόνθειν with $\hat{\epsilon} - \pi \epsilon \pi \acute{o} \nu \vartheta \eta$ $\hat{\epsilon} - \pi \epsilon \pi \acute{o} \nu \vartheta \epsilon \iota \nu$, and the iterative preterite in -σνον in Herodotus, as φεύγεσνον, which never has the augment. Perhaps the reason for these exceptions was that the forms of the 2nd plural and dual pluperfect (§ 836) and φευγέσνετε φευγέσκετον could have only one meaning, while τρέπετε τρέπετον, τράπετε τράπετον, τρέψατε τρέψατον could be either indicative or imperative This made the augment useful to make the sense clear. In Sanskrit and Old-Persian there was the same ambiguity (e g. Skr. bhárata = ábharata, and also imperative), and there too a desire for clearness may have caused the augmented forms to become by degrees the only mode of expressing past action.

In all other branches of our group unaugmented forms gained the day. The scanty and obscure remnants of the augmented class have already been given. Examples of unaugmented forms are:

Latin -bam ın plantā-bam for *fu-ā-m 'I was' (§ 583). dīxıt: Gr. $\delta\epsilon$ ī $\xi\epsilon$ ϵ - $\delta\epsilon$ i $\xi\epsilon$ (§§ 823, 867. 3). scidit: Skr. chidá-t á-chida-t (§§ 523, 528, 867. 5)

Old-Irish. s-aorist ro-char 'he loved' for *-caras-t (§ 840).

Old High German. teta O.Sax deda 'I did', if it is an imperfect like Greek $\tau i \theta \eta \nu \ \dot{\epsilon} - \tau i \theta \eta \nu$ (§§ 545. 886), and O.H.G. O.Sax. wissun 'they krew', if it be for *uits-ut (§ 837). Compare Kluge in Paul's Grundr. 1 375.

Lithuanian bùvo 'he was' for *bhuvā-t cp. Lat. -bat: minė 'he thought, devised' for *mnnē-t: cp. Gr. μάνη ε-μάνη (§ 587) Old Church Slavonic be 'he was' for *bhye-t: cp. Gr. qvη ἐ-φύη (§ 587), aor. vezŭ 'I carried, vexi': Skr. váha-m á-vaha-m (§ 514); s-aorist děchů 'I laid': Skr. dhásam á-dhāsam (§ 812).

FORMATION OF THE TENSE STEM. 1)

GENERAL REMARKS

§ 484. In classifying forms of a verbal system the grammars regard meaning rather than form The result is that forms which are closely connected in structure and in derivation have often to be kept apart, and at the same time

Brugmann, Elements IV

¹⁾ Many works on the Present Stem (Imperfect-Present and Aorist - Present) include a mole or less general discussion of tense formation, and it is not always easy to choose where to name them For this reason, works on the Present Stem will here be included along with those on Tense-Formation in general. For works on the sic-Future, see § 747, for the s-Aorist § 810, for the Perfect, § 848 (the Germanic weak preterite § 907)

notice, learn'). Often the same form is imperfect in one language and aorist in another, the forms é-gene-t (\sqrt{gen} -'gignere') and *é-dŷĥe-t (\sqrt{den} ĥ-'bite') are imperfect in Sanskrit (ájanat ádaŝat), and aorist in Greek (èyévero ĕðaxe). Or the same form is both, in one and the same language; Skr. á-pā-t 'drank' is imperfect of the pres. pā-ti, and aorist of the pres. piba-ti. What the meaning of a given form was, whether imperfect or aorist, depended on its relation to others. See Delbruck, Ai. Verb. p 16, Ai. Tempuslehre p. 5 For our purpose, then, the stems of the present and the strong aorist go together, and where it is advisable to refer to the difference in the kind of action implied, we shall use the terms imperfect-present and aorist-present

Some of the forms which in grammars of this or that language are called Future Indicative were originally Conjunctive, for example, Lat eri-s agē-s These will be found under Conjunctive (§§ 910 ff). In form they belong to the Present. In the same place will be found the Idg. series of forms built up with the suffix -sio-, as Skr. dā-syām Lith. dā-siu 'dabo'. The -sio- stands on the same level as -so-sko- and other formative suffixes used in the present tense; it is probably made up of -s(o)- + -io-, as -nio- is of -n(o)- + -io- (§ 743). Thus these futures are treated under the Present Tense.

With the Present also should strictly speaking be classed the s-Aorist. Its characteristic s cannot be separated from the s which is so common in present and regular in future stems, and its whole inflexion follows the same principle as the present. The s-aorist would properly go with Class XIX of Present Stems (cp §§ 655, 656). A separate chapter is given all the same to this

Das Imperf in den slav Sprachen, Sitzungsber d Wien. Akad LXXVII 5 ff. O. Wiedemann, Zur Stammbildung der Verben auf *nati, Arch f. slav. Idem, Einfacher Aorist [in Old-Slovenian], Sitzungsber. der Wien. Akad. LXXXI 100 ff.

Aorist (§§ 810 ff), but merely to assist in getting a general view of this large group of forms

As to the proethnic Perfect, as *dedorke = Skr. dadárša Gr. δέδοργε (\sqrt{der \hat{k}}- 'see'), it is distinguished from present forms by its grade of ablaut in the singular indicative active, by some special personal endings in the indicative, and (if we include the verb infinite) by a peculiar formation in the participle active The remaining forms of the perfect system, with which we must include the pluperfeet, have exact counterparts in the system of the present, and nothing but its use can tell us whether a given one of these forms is perfect, present, or acrist; even the reduplication with e is not confined to the perfect (§ 471 pp. 15 f). Often the kind of action denoted is so little obvious, that grammarians doubt whether to class certain forms under Perfect or Present Stem (cp Delbruck, Altınd. Verb 122 f., Whitney's Sanskrit Gram § 868, Curtius Verb II2 24 f). It is clear that notwithstanding these points of contact between the two classes, a special chapter must be given to the perfect, on account of the peculiarities which it has.

We therefore divide Verb Forms, from the point of view of the Formation of these Tenses, into three groups

I Present (including Imperfect- and Aorist-Present).

II. s-Aorist

III. Perfect

- § 486 Before we proceed to our subject in detail, two distinctions must be explained which are usually made, and to which some attention must be given in discussing Tense Morphology. These are (1) the distinction between Primitive or Primary verbs, and Derivative or Secondary verbs (Denominative or Deverbative): (2) that between Root-Determinatives, and Tense-Suffixes, or the elements used in forming a tense stem.
- § 487. First Primitive and Derivative Verbs. Primitives, such as *es-ti 'est' and *age-ti 'agit', are contrasted with two classes of derived verbs. (1) a class which in the formation of

the stem is wholly verbal, as much as are the primitives, as Sanskrit Desideratives and Intensives ($ni-n\bar{\imath}-\dot{s}a-ti$ $n\bar{e}-n\bar{\imath}-y\dot{a}-t\bar{e}$ from $n\dot{a}ya-ti$ 'leads'), and Inchoatives in Latin ($gem\bar{\imath}sc\bar{o}$ from $gem\bar{o}$): (2) those which clearly contain a Noun Stem, called Denominatives, as Skr. $g\bar{a}tu-y\dot{a}-ti$ 'procures access' from $g\bar{a}t\dot{u}-\dot{s}$ 'access', Gr. $\pioi\mu\dot{a}'rv$ 'I tend' from $\pioi\mu\dot{\eta}r$ 'herdsman', Lat. planta-t from planta.

- (1) The formation of Desideratives, Inchoatives, Intensives, Iteratives, Frequentatives, Causatives and the rest is in principle absolutely the same as that of the so-called Primitive verbs connected with them There is a distinction, however, in the meaning of the present tense, in these verbs the present had a second special meaning in addition This distinguished them from the prito that of time mitives, which had a simpler meaning in the present, and the formation with some special meaning became a more or less fertile type. But they were not originally derived from their primitives for the express purpose of conveying this new meaning; the new meaning, indeed, does not always date from the proethnic stage at all, but belongs to a later period, and it often has nothing to do with the form, but depends on other circuinstances This is the case with Lat. inchoatives in $-sc\bar{o}$ (§ 674). Thus it is clear that we cannot use this different meaning as a principle of classification, our aim is historical, and we base our classification on the conditions which prevailed in the procthnic stage, and as far as possible on etymology. We must then be content to point out the special meaning where it is of any importance, and, wherever it is possible, to explain how the meaning came in
- (2) It is less easy to classify the second group of forms, and to find out how far indicative stems, which we see combined with personal endings into a word, are purely verbal, and how far they are wholly or partly nominal. If we could only see which were based on noun stems and which derived from verbs, this would of course be the main principle of distinction

There is no manner of doubt that the Idg. languages had

not only denominative verbs with an additional suffix between stem and personal ending - such as Skr gatu-yá-ti apas-yá-ti ('is active', from apas- 'work') Lith. pasuko-ju ('I recount' from vāsaka 'account'), which have -10- between stem and ending - but also others where the personal suffix was added immediately to the noun stem. Such forms are Lat planta-s planta-t etc. from planta, O.H.G. salbo-s 'thou anointest' salbo-t etc from salba 'ointment', Lith. ju'sto 'he girds' ju'sto-me from ju'sta 'girdle', Aeol. τίμα-μεν 'we honour' from τιμά 'honour' Also Skr mārga-ti 'tracks, traces' from mārga-s 'path, track', phala-ti 'bears fruit' from phála-m 'fruit', Gr 3/0415-70 'grew warm' from θεομό-ς, ε-χραισμε 'was useful' beside χραισμίω, Skr. jiva-ti Lat. vīvi-t O C.Sl žive-tŭ 'lives' from jī-vá-s vī-vo-s ži-vŭ 'alive' With very good reason, all forms with a thematic vowel, and therefore all presents formed by -o- -no- -to- -to- etc, have been explained as noun-stems with added personal endings (so, for example, Curtius Verb I2 14 f, 161, 239, 296) as specimens take Skr. ája-ti 'drives' Gi äysi Lat agi-t with Skr. ajá-s 'drivei' Gr ayó-s Lat prod-igu-s, Skr. pana-tē 'buys' with pana-s 'wager, stipulation' Lith pelna-s 'profit' (1 § 259 p 212), Skr. véna-ti 'yearns' with vēná-s 'yearning', Goth fraihm-p 'asks' with Skr. prašná-s 'question', containing -nno- -eno- -ono- (Class XIV) compare Skr. hypána-te 'he acts pitifully, begs' with krpaná-s 'pitiful, poor', Gr θηγάνει 'sharpens' with θήγανο-ν 'something to sharpen with, whetstone', (foth us-lūkni-p 'opens itself' with us-lūkn-s 'open'. Lith kùpinu 'I heap up' with kùpına-s 'heaped', Skr vēšta-tē 'turns round' with vēštá-s 'bond, noose', Gr. ε-βλαστε 'grew, sprouted' with βλαστό-ς 'bud, sprout'; Skr. páya-ti 'stinks' with páya-m 'ill smelling discharge, matter' some non-thematic and primitive stems have the same kind of relation to noun stems For example take Skr. dhṛṣṇu-más 'we are brave' and dhṛṣnú-š 'brave'. The rootextending suffix -a-, in *bhuu-a- *bhu-a- (Lith bùvo Lat. -bat), *tr-ā- (Skr. trá-sva imper. 'preserve, save', Lat in-trā-mus $tr\bar{a}$ -ns) it seems necessary to identify with the feminine suffix -a-, compare Skr. 11-jyaú 'he has overcome' (fut. jya-sya-ti etc.) Gr Ion. $\beta \varepsilon - \beta i \eta - \tau ai$ (aur $\beta i \eta' - \sigma a \tau o$ etc.) with fem. Skr. $jy\bar{a}$ - $jiy\bar{a}$ - 'power, superiority' Gr. $\beta i\alpha$ from \sqrt{gez} - (Skr. $j\dot{a}y-a-ti$ $ji-n\dot{a}$ -ti and others) So also -es-, which extends the root in *y-es- 'clothe' (Skr. $v\dot{a}s-t\bar{e}$ Gr $\dot{\epsilon}\pi i$ -sorai and other words) must be the same as the neuter suffix -es-, and the tense-formative -os- in Skr. \dot{a} - $j\bar{a}ii\dot{s}$ -ui 'they have grown old' the same as -os- the neuter suffix (Gr. $\gamma \eta \rho a c$) Many other proofs will meet us in the course of our enquiry

It need hardly be said that these denominatives or nounverbs did not all appear at the same time. The different types of formation belong to very different periods; and in the earliest strata, e.g. in verbs of Class II such as Skr. ája-tı Lat. agı-t, their noun origin was forgotten even in the proethnic language

But of what verbs, then, can we be certain that when their stem was fused with a personal pronoun it was a verb and not a noun? Of none at all. Even where the stem is the bare root, reduplicated or not, as in *es-ti &o-ti, *sta-t oth, *blinbhay-ti Skr. biblië-ti, the stem may be regarded as a nomen actionis or agentis (ep. the Root Nouns, II §§ 159 ff, pp. 478 ff.).

In the formation of those verbs which are traditionally called Denominative there is nothing to distinguish them from what are classed as primary verbs Lat planta-s is just like intrā-s hīā-s, Aeol. ἐττμα-μεν like ἔδοα-μεν έτλη-μεν, Lith. justo like bijos lindo. Even the present formation with -jois nothing peculiar to the denominative class. We see in Skr. apas-yú-ti prtanā-yá-ti Gr δνομαίνω etc the same present secondary suffix -10- as we see in reduplicated forms such as Skr. dēdiš-yá-tē Gr yaoyalow (Class XXVII), in forms such as Skr. grbhā-yá-ti, pass. trā-yá-tē, Gr. δοῶ for *δοᾶ-μω, ἰῶμαι for *loā-10- (Class XXVIII), and in futures such as Skr. ta-s-yá-tē vēd-iš-yá-tı (Class XXX). Lat plantō (for *plantā-1ō) Skr. prtana-yá-tr are related to Lat. planta-s Lith. jústo just as Lat. intro (for *intro-10) Skr. tra-yá-te to Lat. in-tra-s Skr. trā-tı trá-sva, as Skr. dēdis-yá-tē to dēdis-tē, and as Skr. fut vēdiš-yá-ti to aor. á-vēdiš-ma.

That the term Denominative Verbs cannot be restricted to one special mode of inflexion is clear from many other instances where verbs have been derived from nouns by simply imitating the inflexion of any Primary Verb Primary verbs in -610 (Causatives, and Intensives or Iteratives) were the model for Skr. mantráya-tē 'he takes counsel, advises' from mántra-s, and Goth fulljan O.C.Sl plum-ti 'to fill' from full-s plumu. Gothic, primary verbs like af-lifnan were the model for fullnan 'to become full' from full-s, in Lithuanian, kùpin-ti etc. were the model for such derivatives as linksmin-ti 'to make cheerful' from linksma-s, and virstù virsti etc. for gelstù gelsti 'to become yellow' from gelta-s. These and similar re-formations will be discussed in § 793 They were due to the fact that there were nouns from the same root as some of the primary verbs, and from these they were believed to be Then real denominatives were formed and used along with these apparent ones

Thus in our classification of verbs, which depends first and foremost upon differences of inflexion, no use can be made of the traditional distinction between Primary and Denominative.

Even if the term Denominative were to be restricted to its common application it would be misleading. The feeling of a speaker for his language can give no help here it cannot be made out whether the speaker regarded a given form as Denominative or not, his feeling often changed according to suggested associations, and if feeling of this sort were made the standard, we should often enough be led to class with Denominatives verbs which were only so by false analogy, and to class as Primary some which were undoubtedly derived from a noun. If again we took as our standard not the feeling of the speaker, but the actual formation of the words, we should be no nearer to getting a settled boundary line easy to say, let those verbs be called denominative which contain noun formative suffixes, thus showing their noun origin, words that is like Gr. τιμάω from τι-μή, ποιμαίνω from ποι-μήν, or Goth, fullnan from full-s (ground-form *pl-no-s). But not

to mention that this criterion excludes verbs derived from root nouns, little is gained by this mode of classification, for the task of historical grammar is not so much to analyse the forms and to describe their etymological structure, as to discover their origin and growth In numberless instances doubts arise as to the correctness of our terminology. The commonest example is that of two classes of verbs running together, a primary and a denominative, e g in Greek, verbs in -6iō and verbs in -e-10 both become -/w, in Germanic, verbs in -20 -620 and those in -e-20 -2-20 both became (Goth) -3a, in Lithuanian, verbs in -ézō and verbs in -ā-mi (-ā-zō) both became -au (inf. -y-ti) Here the question whether a given verb is primary or denominative is absurd, because it may quite well have been both. For instance, Lith bradaŭ bradýti 'to wade about' may be derived both from bradà subst. 'wading' on the analogy of på'stau på'styti 'to gird', a denominative from 1 use for the analogy of -manaŭ -manýti, the old "primary" ézō-byeform of menù 'I remember', and Greek τροπέω may come from τρόπο-ς on the analogy of νοστίω · νόσ-το-ς, and from τρίπω on the analogy of φορέω (= Skr bhāráya-ti): φέρω

But however faulty our grammatical terminology may be, we cannot afford to dispense with it altogether in a book like this. I shall keep the term Denominative for verbs derived from nouns in the later periods, when the verb stem was still more or less felt to be originally a noun; for instance, Skr qātu-yá-ti, Gr τ̄ιμάω, and Lat. planta-t

§ 488. Turn we now to the distinction drawn between Root-Determinatives and Suffixes or other elements used in forming the Tense Stem.

What is usually understood, or may be understood, by the term Root-determinative has been set forth in II § 8 Rem. 2 pp. 20 f. A reference should be added to Curtius, Greek Etymology² pp 59 ff., and Fick, Worterb. IV³ 44 ff. ¹

¹⁾ Another work, systematic, and valuable in spite of much bold conjecture, is Per Persson's Studien zur Lehre von der Wurzelerweiterung

These elements may appear in any part of the verb. For ınstance, from Idg *rē-dh- 'take counsel' come Skr. á-rādha-t rādhnó-ti rádhya-tē rātsyá-ti, rarádh-a, á-rātsī-t, rāddhá-s rāddhvá etc.; from Idg *sr-eu- sr-u- 'flow' come Skr. sráva-ti, sravišyá-ti, susráv-a, srutá-s etc But they are sometimes found only in present or agrist forms, and disappear in the rest, as Lat. per-cello for *-cel-do beside perf -culi, Lith. vér-du 'I boil' beside pret. viriaŭ inf. vir-ti, O.C Sl. ži-va 'I live' beside aor. ži-chŭ inf ži-ti. 1) Again, present formativesuffixes, to use the stock phrase, spread beyond their own proper area both in the original language and later. These two reasons make it impossible always to keep Root-Determinatives distinct from Present Formative-Suffixes, the origin of both, by the way, is equally obscure The tense which we call Present was almost always the foundation for the whole structure of the Verb and its associated noun forms; and the spread of root determinatives over all the verbal system is due to the same principle which from Skr. pi-nva-ti 'fattens' makes the perfect pininva and the participle pinvi-tá-s, and makes Skr á-ywok-š-mahı Lat. jūnx-ī Lith jùnk-siu from ywokté jungō jùngu (V)eug- 'iungere')

There is something else which shows the impossibility of carrying out the usual distiction between Determinatives and ordinary Inflexions. In discussing the inflexion of the present in primary classes of verbs, it is too common to find the first syllable of a form taken for the uninflected kernel of it. Because in *bhereti 'fert', the syllable bher- is this kernel, that is, the root, therefore in *treseti (Skr. trásati Gr τ_Q 'si) the syllable tres- is called the root; then, because there is not the same syllable in Skr tar-alá-s 'moving to and fro,

und Wurzelvariation, Upsala 1891. This has reached me too late for anything more than occasional use With his treatment of the main questions of principle as set forth on pages 202 and following, I agree.

¹⁾ In Lat $v\bar{\imath}$ - $i\bar{v}$ too the uo-suffix was once confined to the present $v\bar{\imath}x\bar{\imath}$ victum are re-formates, for $v\bar{\imath}$ - $s\bar{\imath}$ * $v\bar{\imath}$ -tum See Osthoff, Paul-Braune's Beitr. VIII 274; Stolz, Lat. Gr. 2 p. 383

trembling Gr. τρ-έμω Lat tr-emō Lith tr-imù 'I tremble', -es- 18 called a "determinative", whilst in Skr vás-tē 'clothes himself' Gr. έπί-εσται (νeu-, in Lith. au-nù Lat ex-uō) -es- is not so called because these verbs are looked upon as parallel to forms like *es-ta. But masmuch as *tres- and *wes- run right through the whole system of their verbs, they have become "roots". And there is no more reason for separating Skr. 1st sing. tr-ásē v-ásē from 1st sing yaz-asē rūj-asē than for separating (say) *bhy-ō (Lat. -bō O.C.Sl. 3rd pl. bq) Skr. ά-hv-a-t Gr ε-πλ-ε from *bher-ō (Gr. $\varphi \not \models \varphi - \omega$) Skr $\alpha - v \cdot d - a - t$. We always hear of an "s-suffix" in such words as Skr yay-asē; but why? Simply because the ending -asē is not the first syllable of the word. The ē of *pl-ē- 'fill' (Skr. prá-si Gr πλη-το Lat -plē-s) is called part of the Root, but it is the same ē which we have in *mpn-ē-Gr ε-μάνη Lith min-e), *tak-ē- (Lat tac-ē-s O.H G. dag-ē-s). where it is called Inflexion. And the "determinative" -dh- is called inflexional in Gr φλεγέθω νεμέθομαι πελάθω, but not in ε - $\delta \rho \alpha$ - θ o- ν $\hat{\epsilon}$ - $\delta \alpha \rho$ - θ o- ν , or $\alpha \chi$ - θ o- $\mu \alpha i$. The question whether a verbal element, which can be analysed no further, is or is not a separate syllable has, it is true, some importance, for it influenced the grouping of the forms in the speaker's memory, and this affected the development of a language in many ways e g. the root in Lith. v-ejù O.C Sl v-ija 'I wind, turn' (= Skr v-áya-ti 'weaves'), since it formed in itself no syllable, did not follow the course taken by the other verbs in -ézō (Class XXXII) in Balto-Slavonic But this cannot justify the making a distinction, as is so often done, between things which are clearly connected. Dealing as we do with the parent language, and from this point investigating the growth of the Verbal System, we must discuss together Skr. v-ásē and yaj--asē, Greek $\pi\lambda$ - $\tilde{\eta}$ -ro ε - $\beta\lambda$ - η and $\tilde{\varepsilon}$ - $\mu\acute{\alpha}\nu$ - η $\tilde{\varepsilon}$ - $\beta\acute{\alpha}\lambda$ - η .

If, as it seems right to do, a special Present Class is given to *és-ti 'is' (Skr ás-ti, \sqrt{es} -), another to *uemo-ti 'vomits' (Skr. $v\acute{a}mi-ti$, \sqrt{uem} -), and a third to *bhsē-ti 'chews up, devours' (Skr. $ps\acute{a}-ti$, \sqrt{bha} *s- seen in $b\acute{a}-bhas-ti$), it is only consistent to distinguish each of the following as another class of Present

Stems: — a u- ey-class for Skr sr-áva-ti Gr. $\dot{\rho}$ -i'(F) $\epsilon \iota$ 'flows' Skr. á-su-srō-t from \sqrt{ser} - seen in Skr sí-sar-tr, for Skr. dr-áva-ti 'runs' á-du-dr-uva-t from √der-, scen in Skr dr-á-ti dr-ama-ti 'runs', and others, an m-class for Skr dr-ama-ti Gr. ε-δρ-αμο-ν from the above mentioned der-, for Gr τρ-έμω Lat. tr-emo Lith. tr-imù 'I tremble' from vter-, seen in Skr. tar-alá-s 'moving to and fro, trembling' tr-ása-ti 'trembles', and others; a u-class (probably connected closely with the u-. euclass) for Skr jt-va-ti Lat. vī-vi-t O C.Sl ži-ve-tii 'lives' from V gez-, seen in Avest. gay-a 'life' jy-anti- 'life' Gr. 51 (for *qi-ē-), O C.Sl ži-ti 'to live', for Avest m-šaurvaiti 'defends' Skr dhúrva-ti 'harms' bhárvati 'chews, destroys' etc In the same way we come to a p-class, a bh-class, a k-class, and so forth But this principle will not be consistently carried out, for two reasons. First, in these and many similar classes which might be made only a few examples occur, and thus for our period such formative elements as these can hardly be said to have any real productive power Secondly, any attempt to make such a classification complete would lead us into labyrinths of root-analysis which would properly be without the scope of a compendium like the present Roots with this kind of Determinatives, then, which we do not place in any separate class, we shall generally assume to be incapable of further analysis, and thus we place (say) Gr τρ-έμω in the same division as νέμω and γέμω

§ 489 The formation of the Moods, the stems of the Injunctive, Conjunctive, Optative, and Imperative, will follow that of the Tense Stem (§§ 909 ff) It must however, be here pointed out that the elements which are generally regarded as mood-formative are sometimes etymologically the same as in the indicative Injunctive and Indicative forms, of course, cannot be separated. And it is beyond all doubt that the short Conjunctive vowel (Gr. $-\varepsilon$ - -o-), as in *es-e-ti Skr ásati Lat. erit (indic. *es-ti 'est'), Hom ã- $\lambda\varepsilon$ - $\tau\alpha$ (indic. $\bar{\alpha}\lambda$ - $\tau\sigma$ 'sprang'), is the same as what is called the thematic vowel in the Indicative (as *a \hat{g} -e-ti Skr. ájati Lat. agit).

Further, I hold that the conjunctive vowel -ā- in Lat. ferā-s etc. is the same as -ā- found after weak root-forms in the indicative (Classes X and XI), and also the same as the ā which forms feminine nouns (§ 487 pp 41 f), thus Lat. fu-ā-mus belongs to the same class of words as the Indic. Lat. -bā-mus (for *fu-ā-mos) and Lith bùv-o-me (§ 578), and that Lat. poscat for *porscā-t, the indic O H.G for scōt 'demands', and the Skr. fem prchā 'question' (common ground-form *prk-skā-) in point of etymology must all go together. So also the Italic conjunctive -ē- is to be identified with the Indicative -ē- (Classes X and XI), and so forth

In all these cases it were proper to keep together whatever forms are etymologically akin. But if we did so, a student who is used to the practice observed hitherto, of arranging forms according to their function, would hardly be able to find his way. So I prefer to give this up, and simply call attention to etymology and structure where it is convenient to do so.

THE PRESENT STEM.

IMPERFECT PRESENT AND AORIST PRESENT.1)

- § 490. The classes of the Present Stem are very commonly divided into two groups.
- (1) Thenatic, or verbs in $-\bar{o}$ (Bopp's First Main Conjugation); and
- (2) Non-thematic, or verbs in -mi (Bopp's Second Main Conjugation

The first group has in the Indicative -o- or -e- just before the personal ending, but $-\bar{o}$ is the ending of the 1st person singular. These vowels were distributed amongst the persons of the singular and plural (we may leave the dual out for the present) in very much the same way as they are in Greek, -e- in the 2nd person of both, and the 3rd singular, -o- in the 1st persons (but 1st sing pres act $-\bar{o}$) and in the 3rd plural:

¹⁾ For works bearing on this subject, see footnote to page 33.

compare 2nd sing. εφερε-ς φέρε-αι έφέρε-ο (for the indic. pres. act. cp (joth bairr-s), 2nd pl φέρε-τε έφέρε-τε φέρε-σθε έφέρε--σθε, 3rd sing έφερε φέρε-ται έφέρε-το (for the indic. pres. act. cp. Goth. bairi-ħ), 1st sing (φέρω) εφερο-ν (φέρη-μαι έφερό-μην), 1st pl. φέρο-μεν έφέρο-μεν φερό-μεθα έφερό-μεθα, 3rd pl. φέρο--ντι (φέσουσι) εφερο-ν φέρο-νται έφέρο-ντο. The variation -e- . -ois the rule in all the present o-suffixes except -10-, where instead of it there is sometimes -i- -ī-, see § 702. The Conjunctive shows a long vowel before the personal endings, as 1st and 2^{nd} pl 4r $\varphi \dot{\epsilon} \varrho \omega - \mu \dot{\epsilon} \nu$ $\varphi \dot{\epsilon} \varrho \omega \dot{\epsilon} - \mu \dot{\epsilon} \vartheta \alpha$ $\varphi \dot{\epsilon} \varrho \eta - r \dot{\epsilon}$ $\varphi \dot{\epsilon} \varrho \eta - \sigma \vartheta \dot{\epsilon}$ Lat. ferā-mas ferā-tis Skr bhárā-ma bhárā-mahāi bhárā-tha bhárā-dhvāi. The Optative has the thematic vowel -o-, and between it and the personal ending 2, which, when the personal ending began in a consonant, combined with the thematic vowel into a diphthong and a single syllable, as 2nd sing. Gr gépoi-g Goth. bairái-s Skr. bhárē-š

To the second group belong all present stems which have no thematic vowel before the personal ending in the Indicative. The personal endings were mostly the same as in the first group. There is a strange difference in the first person singular pres, indic, which had in the parent language, as it has in Greek, the the ending -m; Gr. εί-μι τίθη-μι δάμνη-μι στόρνο-μι etc., not like φέρω βόσεω τύπτω φορέω. In most non-thematic conjugations, the indicative had, and retains, a vowel grading; the syllable just before the personal ending, whether root or suffix, had the strong grade (and accent) in the singular of the active, and the weak grade (no accent) in the active dual and plural. compare Skr. act sing 1st pers. dvéš-mi ('I hate') á-dvēš-am 2nd dvēk-ši á-dvēt 3rd dvēš-ti á-dvēt, but pl. 1st pers. dviš-más á-dviš-ma etc., dual 1st pers. dviš-vás a-dviš-va etc., mid sing 1st pers. $dvi\dot{s}-\dot{v}$ $\acute{a}-dvi\dot{s}-i$ etc., act. sing 1st pers. kṛ-nō-mī ('I make') á-kṛ-nav-am 2nd kṛ-nō-šī á-kṛ-ṇō-š 3rd kṛ-nō-tī \dot{a} -kr- $n\bar{o}$ -t, but pl. 1st pers kr-nu- $m\acute{a}s$ \acute{a} -kr-nu-ma etc., dual 1st pers. Ly-nu-vás ú-ky-nu-va etc., mid. sing. 1st pers. kr-nv-é á-kr-nv-1 etc. On the whole it may be said that the Conjunctive formed with -e- and -o- had the strong stem in active and middle; as 3^{rd} sing act. $dv\tilde{e}s-a-t(t)$ kr-ndv-a-t(t) mid. $dv\tilde{e}s-a-t\bar{e}$ $kr-ndv-a-t\bar{e}$ The optative had in the singular active $-t\bar{e}-it\bar{e}-it\bar{e}$; in the other active forms and in the middle it had $-\bar{t}$ - before personal endings beginning in a consonant and -it- or -t- before a sonant, always with the weak form of the present stem e.g. act. 1^{st} sing dvis-yd-m kr-nu-yd-m 1^{st} pl. $dvis-\bar{t}-md$ $dr-nv-\bar{t}-md$ (what we actually find are dvis-yd-ma kr-nu-yd-ma, contrast Lat $s-\bar{t}-mus$ beside s-ie-m), mid 3^{rd} sing $dvis-\bar{t}-td$ $kr-nv-\bar{t}-td$ 1^{st} sing Avest tunuya 1, e. ta-nv-uy-u

§ 491. Great as is the importance of the difference between thematic and non-thematic stems, it seems best not to make it the chief principle of distinction in what follows

Every class of non-thematic presents with vowel gradation had parallel to it another class, which may be regarded as formed by adding the thematic vowel to the weak stein. Very often the same verb has both. Examples Skr. vét-ti (vid-más) vid-á-ti, vieud-'know, learn'; Gr. ?-orn-oi Skr ti-šth-u-ti, vitū-'stand', Skr 3rd pl sá-śc-ati. 2rd sing sá-śc-a-si Gi ĕ-oro-i-ro, viseq-'sequi', Skr. r-nó-ti 'g-nv-á-ti, vieu-'move', Skr mg-ná-ti 'mg-n-á-ti 'crushes', Skr yunáh-ti: yuñj-a-ti Lat jung-i-t, vieug 'iungere' These two kinds hang closely together, and cannot be treated apart.') I therefore choose a mode of

¹⁾ The closest contact between them is in the 3rd pl active and the partic pres active. I now depart from my previous view set forth in I § 226 p 193, II § 125 p 395 (and elsewhere), I now hold with Streitberg (Idg. Forsch. I 82 ff) that the strong suffix-forms of these parts of non-thematic verbs (3rd pl. act, and pres. act. partic) were -enti-ent and -ent-, e g. *s-énti 'sunt' partic nom pl *s-ént-es It is possible that there were variants, also of the strong grade, -onti-ont and -ont-Then -ent--ont--ui- as in the gen. abl sing -es.-os:-s (III § 228 pp. 111 f) If so, it is very possible that we should class together with the non-thematic conjugation e.g Lat. sont sont, sons, OC.Sl. sqti (sqlŭ) sy, and analyse them *s-onti *s-ont-s, that is to say, regard them as parallel to forms like es-i jes-ii (jes-iū) They would belong to both conjugations This is, however, only a possibility, and I have accordingly treated forms with -o-, like Lat. sunt, in each case as thematic) and thematic only (below, §§ 492 ff.).

classification which takes as its principle some common points of structure or etymology other than the presence or absence of a thematic vowel. Thus one group will comprise presents which have a nasal-formative (as Skr mṛnā-ti mṛnā-ti ṛnō-ti ṛnvā-ti yunāk-ti yunāpa-ti), it is clear that this element was the same in all of them

A CLASSES I 10 VIII:

SIMPLE ROOT, OR ROOT WITH -o-, FOR THE PRESENT STEM, SOMETIMES REDUPLICATED

Class I: Simple Root used for the Present Stem.

§ 492. This class disappeared in most languages, leaving only a few traces. It is commonest in Aryan, as are all the non-thematic forms

§ 493 Idg. *wél-mi 'I choose, wish, will' 1st pl. ^wl-més: Skr. 3rd sing. mid. á-vy-ta opt vr-vyā-t (3rd sing. mid vus-ī-ta¹)), Lat 2nd sing vel for *vel-s (now a particle), 2nd pl vol-tis, Lith pa-velmi 'I will' 3rd sing pa-velt. — With thematic vowel, Lat volō (*yll-ō) 3rd pl vol-u-nt

*gém-tr 'goes, comes' 2^{nd} pl *g η n-té Avest 3^{rd} sing. $Jan-t\bar{u}$ Skr 2^{nd} pl. $ga-th\acute{u}$ 3^{rd} sing mid $\acute{a}-ga-ta$ 3^{rd} pl. $\acute{a}-gm-an$, Armen. 3^{rd} sing e-kn = Skr $\acute{u}-gan$, Gr. 3^{rd} dual $p\acute{u}-r\eta\nu$. Conjunctive Avest $j_1m-a-\rlap/p$ (I § 94 p 89), cp indic Goth $q_1m-i-\rlap/p$. Optative Skr. $gam-y\acute{a}-m$ A.S. cyme (= Goth *kumjau). — With thematic vowel Avest $g^em-a-\rlap/p$ $\gamma m-a-\rlap/p$ O.Pers. mid. $a-gm-a-t\bar{a}$ Skr. opt $gam\acute{e}-t$ i c *g $\eta m-\acute{o}-2-t$ O H.G. 1^{st} sing. indic cumu i. e *g $\eta m-\acute{o}$.

4*

¹⁾ Instead of *ur-ī-ta (cp. partic un-āná-s), see I § 157 p. 141 On the other hand, the regular form with v- is seen in Avest. Gath vairī-maidī for pr. Ar *vp-ī-.

-a-ti áy-a-t (cp indic. 3^{rd} sing. mid. áy-a-tē, Lat eō for *ei-ō, eunt for *ei-o-nt(i)) Optative. Skr i-yā-t Weak forms also found with $\bar{\iota}$ -, $\iota_{\bar{\iota}}$ -. Skr. 1^{st} pl mid $\bar{\iota}$ -mahē opt. $\bar{\iota}$ -yā-t, 3^{rd} sing mid. $\bar{\iota}$ -ya-tē (Class XXVI), 1) Gr conj 1^{st} pl $\bar{\iota}$ -o- μ er (but cp § 914); Skr 1^{st} sing. mid $\bar{\iota}$ -yē (cp. Avest. y-ōi), Lat. $\bar{\iota}$ -ēns, Gr. perhaps 3^{rd} pl. $\bar{\iota}$ -ā σ i (cp. § 502) — With thematic vowel Gr. opt $\bar{\iota}$ -o- ι partic $\bar{\iota}$ -o- $\nu\tau$ - pret Hom $\bar{\eta}$ - ε $\bar{\iota}$ -o- μ er (cp conj $\bar{\iota}$ -o- ι - ι -o- ι -pred $\bar{\iota}$ -o- ι - ι -o- ι -pred (§ 867 5)

*kėns-mi 'I soothsay, praise, say' 1st pl *kūs-mės: Skr. 2nd pl šas-ta (Avest. 2nd pl sas-tā with the nasal of the sing), O C.Sl. 3^{rd} sing setă i e *se = *kēns-t + an additional -tă, like pri-jetă instead of pri-je etc. (§§ 512, 830). Albanian gives us 3om 'I say', for *kēns-mi according to G. Meyer (M. Herz z 70 Geburtst 1888, p 86, Etym. Wtb. der alb. Spr, 91; Alb Stud III 13, 63)

*μέχd-mi 'I see, know' 1st pl *μιd-més Skr. véd-mi 1st pl vid-más, Lith. veizdmi instead of regular *vei(d)-mi (I § 547 Rem 1 p 401). Conjunctive Skr 3rd sing véd-a-ti Gr. Hom. 1st pl. εἰδ-ο-μεν (cp. indic. Skr vēd-a-tē Gr εἰδ-ε-ται) Optative Skr. vid-yά-m, Goth 1st pl. vit-ei-ma. Imperative Skr. viddhí Gr. ἴσθι, cp. Lith veizdi ieizd (I loc. cit, IV § 962). Also peif. 3rd sing. ΄μόμd-e 'knows', with which the above named moodforms were associated (cp II § 136 Rem 1 p 438, IV §§ 846, 912, 939, 959) — With thematic vowel indic. *μιd-ό-, Skr vid-ά-ti Λrmen. e-git Gr ἴδ-ε ενίδ-ε εἶδ-ε.

*és-mi 'I am' 1st pl *s-més Skr ás-mi s-más, Armen em (I § 561 p. 417), Gr $\epsilon i\mu$ Lesb $\epsilon \mu\mu$ (G Meyer, in the work just cited, pp 81 ff, Etym. Wtb der alb. Spr 160, Alb. Stud III 63, 85), Lat es-t Umbr 3rd pl. s-ent, O Ir. 3rd sing. is (I § 66 p 55), Goth im (I § 582 Rem 2 p. 437) 3rd sing is-t, Lith es-mi 3rd sing \tilde{e} s-ti \tilde{e} s-ti O.C.Sl. jes-mi 3rd sing. jes-t\tilde{u}, on the 2nd sing. Skr ási Gr ϵ l see, § 984.1. Pret. Skr ás-am 3rd sing ås 1st pl. ás-ma Gr $\tilde{\eta}$ -a $\tilde{\eta}$ 3rd sing. $\tilde{\eta}$ st pl. $\tilde{\eta}$ uev O.C.Sl. 2nd pl. -jas-te see § 480 p. 28, § 481

¹⁾ A different explanation of these Sanskrit forms may be found in Bartholomae's Ar. Forsch 11 73 f.

pp 29 f., Alban 3rd sing. iš for 'es-t (G Meyer, in the first work cited above, p 91). Conjunctive 3rd sing. Skr ás-a-ti ás-a-t Lat. (fut.) er-i-t (ep. indic Hom. ε-o-v opt. ε-o-v, also εόντω εών, Lith. es-ù = esmì 1st pl. εs-a-me partic. εs-ās, O C.Sl pret. -jach-ŭ -jaš-e § 480 p. 28). Optative: Skr s-yά-m s-iyá-m, Lat. 2nd sing. s-iē-s 1st pl s-ī-mus, O.II.G 1st pl s-ī-m. — With thematic vowel partic. Gr. όντ- instead of *όντ- 's-o-nt- (on the analogy of εἰμὶ etc. which begin with a smooth breathing) Lat s-o-n-t- 'he who is the doer, guilty' O.Icel. sannr 'true, really guilty' (pr. Germ. *s-a-np-a-) Lith sās sanczio O.C.Sl sy sašta, indic Lat. s-u-m s-u-mus s-u-nt O.C.Sl 3rd pl. s-atũ

*dhégh-mi 'I burn' Skr 2^{nd} sing dhák-ši Lith. deg-m? The conjunctive implied by these forms is hidden in the indic. Skr $d\acute{a}h$ -a-ti Lith $deg-\grave{u}$. The weak form *d(h)gh- cannot be found; we have evidence for it in Avest 3^{rd} pl imper sc-anti beside 1^{st} sing indic hax- $m\bar{\imath}$ (pr Ar *sak-mi) from \sqrt{seq} 'sequi', Skr. 3^{rd} pl. \acute{a} - $k\acute{s}$ -an 3^{rd} sing mid. gdha i. e. *ghs + ta (I § 591 p 449) beside 3^{rd} sing \acute{a} -ghas from ghas- 'eat'.

* $d\delta$ -t * $\dot{\epsilon}$ - $d\bar{o}$ -t 'he gave' 2^{nd} pl *do- $t\dot{\epsilon}$ Skr. \dot{a} - $d\bar{a}$ -t 3^{1d} sing mid \dot{a} - $d\iota$ -ta, Armen 1st sing. e-tu 3^{1d} sing. e-t, 1st pl. pres. ta- $m\ddot{k}$, Gr. 2^{nd} pl. ε - δo - $\tau \varepsilon$ 3rd sing mid $\dot{\epsilon}$ - δo - τo (δo - instead of δa -, op. on $\delta \varepsilon$ -, above), 2) Lat. da-mus red-dimus. Optative:

¹⁾ Less probably, some scholars take (a-)dhat to be *dhat = *dha--dh+t, i. e. formed from the weak present stem *dha-dh- (ep a-dha-t-tum)

²⁾ Pauli (Altital. Forsch III 258) compares Venetian zoto 'dedit' with Gr. Joro Admitting that the explanation is in the main correct

Avest. $d-y\bar{a}-\bar{p}$. Imperative. Lat. ce-do, Lith $d\vec{u}-k$. — With thematic vowel Skr dda-t i e. $\bar{a}+a-d-a-t$, Lat. red-d-u-nt, Avest. opt 2^{nd} sing. $d-\bar{o}i-\dot{s}$. 1)

*stā-t *é-stā-t 'he placed himself', 2^{nd} pl. *stə-té Skr. á-sthā-t, 3^{rd} sing. mid. á-sthī-ta, Gr é- $\sigma r \eta$, mid. 3^{rd} sing. è π í- $\sigma r \alpha - r \alpha r^2$), 2^{nd} sing. è $\sigma r \alpha - \theta \eta_S = Skr$ á-sthī-thās (§ 503). Imperative Lith stó-k — With thematic vowel Skr. āsth-a-t, Avest. a-xšt-a-p mid. xšt-a-ta (xšt- instead of št-, see Bartholomae Handb. § 100 Anm. 3 p. 43, and št- instead of st-following compounds like puti-štā-)

§ 494. As the examples in § 493 shew, roots of the e-series took regularly the e-grade (1st strong grade) in strong forms. But probably in the parent language there were forms with the 3^{1d} strong grade, or \bar{e} -grade, also in use.

⁽ep. G. Meyer, Berl Phil Wochenschrift 1892 col 312 f., Thurneysen Wochenschr. class Phil 1892 col 290 f), it is a question whether zoto should not be regarded as $*d\bar{o}$ -to (cp. the s-acrist zonasto 'donavit').

Probably to the same class belongs Avest., being daduyē 2nd pl
 indic pres mid See Bartholomae, Idg Forsch. I 495

²⁾ Fick's connexion of this verb with Skr. partic cit-tú-s is worthless (Fick, Gott gel. Anz 1881 p. 1426, Wtb 1 20 f)

³⁾ In the English translation of this note, 'Spiritus Asper' is a clerical error for 'Spiritus Lenis'.

present forms with $\bar{a}u$ instead of \bar{o} , as $st\bar{a}u-ti$ 'praises' (3rd pl. $stuv-\dot{a}nti$ mid $stu-t\bar{e}$, beside which are found 2^{nd} sing $st\bar{o}-\dot{s}i$ conj. $st\dot{a}v-a-t$) and $sn\bar{a}u-ti$ 'dips' (cp. Gr. $v\dot{\epsilon}\omega$ $v\dot{\epsilon}v\dot{o}ou\alpha\iota$), also $m\dot{a}r\dot{s}-ti$ 'wipes' (3rd pl. $m\chi_{I}-\dot{a}nti$) 1)

Along with these non-thematic \bar{e} -forms stand usually others with the thematic vowel; thus, Lith $\bar{e}d$ -u beside $\bar{e}d$ -m, $s\bar{e}d$ -u beside $s\bar{e}d$ -m, Skr $\bar{a}s$ -a- $t\bar{e}$ beside $\bar{a}s$ - $t\bar{e}$, $d\bar{a}s$ -a-ti beside $d\bar{a}s$ -ti, $s\bar{a}h$ -a-ti beside $s\bar{a}h$ - $\bar{s}va$, $m\bar{u}r$ -a-ti beside $m\bar{u}r\bar{s}$ -ti Compare (ir. μi) $\phi oual$ etc. § 514

§ 495. In all languages, as we shall see, it is common for the strong stem to spread into what should be weak-stem forms, but the reverse is rare

We should especially mention here that the strong-grade \bar{u} , \bar{e} , and \bar{o} spread from roots ending in them to the weak persons which properly had \bar{o} . This re-formation brought about some confusion with Class X, where there is no gradation

Skr 1st pl. ά-sthā-ma Gr ε-στη-μεν instead of *a-sthi-ma *ċ-στά-μεν (cp. § 493 pp 53 f) The difference between ċ-στη-μεν and έ-θε-μεν έ-δο-μεν was due to the intransitive meaning of ἐστην, and to the powerful attraction of a word closely connected in meaning — έβην εβημεν (Skr. ágām ágāma), cp. the Author, Kuhn's Zeitschr xxv 220, Osthoff's Perfect 373 f, and below, § 497 Rem. As regards Lat stā-mus beside dā-mus, see §§ 505, 584 Rem

In Sanskrit we find also \acute{a} -dhā-ma \acute{a} -dā-ma instead of \ddot{a} -dhi-ma *a-di-ma (cp § 493 p 53), and similarly \ddot{a} instead of ι in the plural and dual active of all roots ending in (Aryan) - \ddot{a} Compare opt. 1st pl. s-yā-ma, instead of *s- $\ddot{\iota}$ -ma, following s-yā-m, § 940.

Unlike Gr. $\varphi\eta$ - μ i 'I say' φu - μ i ν , which undoubtedly has original gradation (cp. O.H.G. $bannu={}^{*}bhp$ - $n\mu\bar{o}$, Gr. ψu i $\tau \omega$ *bhp- $n\mu\bar{o}$, see §§ •611, 654), all recorded forms of Skr $bh\bar{a}$ - $t\bar{t}$ 'shines' follow Class X, as pl $bh\bar{a}$ - μt imper $bh\bar{a}$ - $h\bar{t}$ partic

¹⁾ The ablant of $st\bar{a}\acute{u}$ - t_1 and $m\acute{a}\acute{s}$ - t_1 is exactly parallel to that of the s-Aorist. See § 811.

bhā-ta-s etc We must therefore assume for this Skr. verb a stem bh-ā-, 1 c an extension of the root by the ungraduated suffix -ā- (bhā-ti bhā f. = psā-ti psā f), which is also possible for Lat. fā-tur for and O C Sl. ba-ją 'fabulor' (§ 706). 1)

§ 496 The strong stem is remarkable in Skr. $\dot{s}\bar{e}-t\bar{e}$ Avest $sae-t\bar{e}$ (fr $\epsilon\bar{e}-\tau ai$ hes' (cp Skr. perf $\dot{s}i-\dot{s}y-\bar{e}$, $-\dot{s}i-\dot{s}$ lying) heside Skr. $\dot{s}\dot{a}y-a-t\bar{e}$ Gr. Hom. $\dot{e}-o-\tau \tau ai$ opt $\dot{e}-o-\tau -\tau o$ Very uncertain explanations are suggested in vol I § 598 p. 453, and by Meringer in the Zeitschr ost Gymn 1888, p 134 Perhaps the irregularity was due to a very early change from thematic to non-thematic conjugation, which was suggested by $\dot{a}s-t\bar{e}$ $\bar{\eta}\sigma-\tau ai$ 'sits' I believe that this same change must be assumed for $\dot{\gamma}\dot{\epsilon}\nu-\tau o$ $\ddot{\epsilon}-\dot{\gamma}\dot{\epsilon}\nu-\tau o$ (Ilesiod and other poets) beside $\dot{\gamma}\dot{\epsilon}\nu-\tau o$ $\dot{\epsilon}-\dot{\gamma}\dot{\epsilon}\nu-\tau o$ (cp. 3^{1d} dual $\dot{\gamma}\dot{\epsilon}\dot{\gamma}\dot{a}-\tau \eta r$), and for $\dot{\sigma}\dot{\epsilon}\dot{\tau}\dot{\tau}ai$ (only in Soph Tr 645) beside $\dot{\sigma}\dot{\epsilon}\dot{\nu}-\tau ai$ (cp $\dot{\sigma}\dot{\nu}-\tau o$) It is beyond all doubt seen in $\ddot{a}u\dot{\epsilon}i\pi-\tau o=\dot{a}u\dot{\epsilon}i\beta\dot{\epsilon}\tau o$ in Nonnus, and other such forms in late Greek poetry (Rzach, Gram Stud zu Apoll Rhod., 164), and in some Lithuanian presents in -mi (§ 511)

Remark *μεω-ίαμ 'clothes himself' (Skr νάω-ίε Gr ἐπί-εσται ٤π-το) is not of this class, as it must be analysed *μ-εω-ίαμ (§ 656)

¹⁾ $\sqrt{bh\bar{a}}$ - means 'to show, send forth, make known' If we connect with it Skr. $bh\dot{a}nati$ 'sounds, calls out' (Osthoff, Perf 353, Whitney, Skr Roots 109 f), this must be taken as an extension *bh-enoor *bh-yno- (§ 619) With the same extension Moulton connects Lat tenestia (Proceed Camb Phil Soc 1890, May 22, p 9)

²⁾ The 3rd pl mid Ved a-jun-ata beside a-jun-a-nta may be similarly taken. It is true that the wor! may quite well be derived from *e-gan-nto (op. a-ju-ata).

On de Saussurc's hypothesis, bhū- was the weak grade of bheu- (Skr fut bhavi-šyá-ti etc.), and \(\bar{r}\)- the weak grade of er- (Skr fut ari-šyá-ti etc.), and so on

Remark To this list of forms I have hithertho added Skr \acute{a} - $g\bar{a}$ -ma Gi $\rlap/ E - \beta \eta - \mu Ei$, 3rd sing \acute{u} - $\eta \bar{a}$ - \acute{e} - $\jmath \eta$ (op \acute{a} - $bh\bar{u}$ -t $\rlap/ E - \eta \bar{\nu}$), equating $g\bar{u}$ - $g\eta$ -= * $g\eta$ -= (I § 253 p. 206) But another hypothesis appears to be preferable from Skr $\jmath i$ - $g\bar{u}$ -i Gi Hom βi - $\beta \bar{u}$ -. Skr ri- $\eta \bar{u}$ -man- n 'step' Gr $\beta \bar{\eta}$ - $u\alpha$, Skr perf mid $\jmath a$ - $g\bar{v}$, and others of the like nature. This is, that there were original variants * $g\bar{u}$ - and *gem-, like * $dr\bar{u}$ - and *drem- 'uu' (§ 488 p. 47, § 579) It would be easy to decide this point, if only * $g\bar{u}$ - could be found outside of Aryan and Greek. The derivation of Lett $g\bar{u}$ - $g\bar{u}$ is worse than unsafe to adduce O H G pfad 'path' (Fick, Wtb. I 433)

§ 498 Aryan \sqrt{qer} 'make' Skr 2^{nd} sing $k\acute{a}r$ -§i 2^{nd} 3rd sing a-kar 2^{nd} pl kr-thá 3^{rd} pl. \acute{a} -kr-an 3^{rd} sing mid. \acute{a} -kr-ta, Avest 3^{rd} sing $cor^o \rlap/p = pr$ Ar *car-t (I § 94 p 89, § 647 7 pp 493 f) on () Pers.  \sqrt{ed} - 'cat' Skr ád-m át-tt So in all the weak persons ad-, as 3^{rd} pl ad-ant1 2^{nd} pl at-tá imper ad-dht1, obviously because such forms as *ta *dht1 were not clear enough (cp above, Skr $\bar{e}d$ ht1) Conjunctive *ad-a-t1 'ad-a-t2 (cp 2^{nd} sing mid. ad-a-sva G1 $\tilde{e}d$ - ω 1 Lat. ed- \bar{o} Goth u-u1) On the relation between ád-m1 and Lat $\bar{e}st$ Lith $\acute{e}st$, see § 480 Rem. pp 28 f., § 494 pp 54 f

Skr dháhši and others of the same sort, see § 493 p. 53 Skr bhi-šak-ti 'heals' (bhi- is a bye-form of abhi) was no longer recognised for a compound, hence 3rd sing. a-bhišnak R.-V. x, 131. 5, following Class XV, and bhēśajá-s 'healing'.

 $\sqrt{dh\bar{c}}$ - $d\bar{v}$ -, Skr. $dh\bar{a}$ - $d\bar{a}$ - Iran $d\bar{a}$ - (12 Iranian the two stems ran into one, and it is no longer possible to distinguish their meaning exactly), see § 493 p. 53. Skr. \acute{a} - $dh\bar{a}$ -t $dh\acute{a}$ -t $d\acute{a}$ -t pl. \acute{a} - $dh\bar{a}$ -ma \acute{a} - $d\bar{a}$ -ma, Avest. $d\bar{a}$ -p $d\bar{a}$ - $m\bar{a}$ O.Pers a- $d\bar{a}$, on \bar{a} in the plural, see § 495 p. 55; mid. Skr. \acute{a} -dh-ta- \acute{a} -di-ta,

imper dhi-švá Conjunctive Skr $dh\acute{a}$ -ti pl. mid $dh\bar{a}$ - $mah\bar{e}$ Avest $d\bar{a}$ - $it\bar{i}$ mid $d\bar{a}$ - $it\bar{i}$ (§ 933) Optative Avest. d- $y\bar{i}$ - \bar{b} .

 $\sqrt{st\bar{a}}$ -, see § 493 p 55 Skr á-sthā-t á-sthā-ma (like á-dhā-ma, see above), Avest parti-štā-p, mid Skr. á-sthi-ta. Conjunctive. Skr. sthá-ti $2^{\rm nd}$ dual sthá-thas, Avest. mid. x-stā-rtē (§ 933)

 $\sqrt{d\bar{a}}$ - 'separate, divide up' (Gr $\delta\bar{a}$ - μ o- ς): Skr. $d\hat{a}$ -ti 3^{id} pl $d\hat{a}$ -nti (like \hat{a} - $dh\bar{a}$ -ma, above), mid. 1st pl. \hat{a} -di-mahi (cp. partic di-na-s di-ti-s Gr. δa - τ i'o- μa i).

Sometimes in place of $-i = \operatorname{Idg} - i$ in roots of the latter kind, Sanskrit has $-\overline{\imath}$. \acute{a} - $dh\overline{\imath}$ -mah from $\checkmark dh\overline{e}$ -, $m\overline{\imath}$ - $mah\overline{e}$ from $\checkmark m\overline{e}$ - 'measure' (3rd sing $m\acute{a}$ -t), $d\overline{\imath}$ - $\acute{s}va$ from $\checkmark d\bar{o}$ -, \acute{a} - $d\overline{\imath}$ -mah from $\checkmark d\overline{a}$ -. This $\overline{\imath}$ was connected with a very widespread Sanskrit re-formation

There was a certain element used in root-extension, found in the parent language, and appearing in Sanskrit under the forms of $-\bar{\iota}$ - and $-\iota$ -. Whether it be dubbed Root-Determinative or Suffix, matters nothing (see § 488 pp. 44 ff.) Examples of its use are $p\bar{\iota}$ - 'swell, give to drink' from $\sqrt{p\bar{o}}$ - ($p\iota$ - $p\bar{\iota}$ - $t\bar{e}$ $p\bar{\iota}$ - $t\bar{e}$ $p\bar{\iota}$ - $t\dot{e}$ $p\bar{\iota}$ - $t\dot{e}$

Now this -i-, originally only a variant of Ar. -i- = Idg. -i-, encroached upon Ar -i- = Idg. -i-, so that in Aryan

¹⁾ It 19 probable that another strong grade of the same determinative is contained in the Idg present in $-\dot{e}_{l}\bar{v}$ (as Skr. $\dot{\$}v-\dot{a}ya-ti$ vart- $\dot{a}ya-ti$ Lat $qu-e\bar{v}$ mon- $e\bar{v}$), to which belonged a participle in -i-to-s (Class XXXII) And I would now (with Bezzenberger, Zur Gesch. der lit. Spr, 195) recognise a torm exactly answering to Skr $\dot{a}j\bar{a}i-\dot{\$}$ in Gr $\ddot{a}y_{\ell i-\bar{\imath}}$ $\ddot{a}y_{\ell i}$; $\ddot{a}y_{\ell i}$ (for $\dot{\ast}-\bar{e}\underline{\imath}-s$ $\dot{\ast}-\bar{e}\underline{\imath}-t$); see § 987 1, and § 995. 2.

 $\bar{\imath}$ as well as \imath was found in the same ablaut series with $\bar{a}.^{1}$) Hence arose the above named forms $\acute{a}dh\bar{\imath}mah\imath$ instead of $\acute{a}dh\dot{\imath}mah\imath$ beside $\acute{a}dh\bar{\imath}m$ etc., and hence $\acute{s}\imath$ - $\acute{s}\bar{\imath}$ - $\hbar\imath$ * $\acute{s}\acute{\imath}$ - $\acute{s}\bar{\imath}$ - $\hbar\imath$ instead of * $\acute{s}\imath$ - $\acute{s}\imath$ - $\hbar\imath$ instead of * $\acute{s}\imath$ - $\acute{s}\imath$ - $\hbar\imath$ (cp. (ir. - \imath - \imath - \imath - \imath - \imath) beside $\emph{m}\jmath$ - $\emph{n}\acute{a}$ - $\emph{m}\imath$ (§ 597), \acute{a} - \emph{s} - \emph{s} instead of * \emph{a} - \emph{s} - $\emph{$

It is true that there are other instances besides these of variation between Idg. i and \bar{i} , for instance, in the syllable of reduplication, §§ 467, 469, 473. Whether these had anything to do with associating \bar{i} with i=a, and if so, how far, I leave an open question

§ 499. A few more examples may here be added to those already given of the confusion between weak and strong stem

Strong Stem instead of Weak. Skr. 2nd dual spar-tam beside spr-tam from spar- 'save, win'. 2) Avest. 3rd sing. mid man-tā beside Skr. á-ma-ta from man- 'think' Skr 1st pl. á-hē-ma (cp. 3rd pl. á-hy-an) from hi- 'impel'. Skr 2nd pl. stō-ta (cp 2nd dual stu-tam) Avest. 1st pl mid stao-maiāē from stu- 'praise' (cp. Skr stāú-ti § 494 p 54). Skr. 2nd pl. vart-ta (cp 3rd pl. á-vyt-ran) from vart- 'vertere'. Skr 2nd pl mid vādhvam beside ūdhvam 2nd dual act vādham (I § 404. 2 pp. 298 f., § 482 p 356) compared with 2nd sing vákši, \$\sqrt{uegh-}\$ 'vehere'. Skr. 3rd sing. mid. á-tak-ta beside ták-ti 'runs, pushes, shoots', \$\sqrt{teq-}\$, cp the weak grade tq- in Avest partic perf ta-pk-uš- (I § 473. 2 p. 349).

¹⁾ Bartholomae (loc cit) assumes \bar{a} $\bar{\iota}$ to be an orig. ablaut; he believes \bar{a} came from $\bar{a}_{\bar{i}}$ in Idg, and e.g. Lat $er\bar{a}s$ (contrasted with Skr. $\hat{a}s\bar{\imath}-\hat{s}$) is derived by him from *es $\bar{a}_{\bar{i}}$ -s. I cannot approve this theory.

²⁾ Avestic mid. 3rd sing var^e-tū 1st pl. var^e-maidī, compared with Skr. ú-vṛ-ta, are not safe examples to cite in proof of this re-formation, because iar^e- may come from *vṛ-.

Weak Stem instead of Strong: much rarer. Skr 1-m1 beside é-m1 from 1- 'go' (already cited, § 498 p. 59). Skr 3rd sing á-vyk beside várk (mid á-vyk-ta) from varj- 'twist' (but vice versa 2nd dual vark-tam instead of vyk-tam). Avest 2nd sing. a-per'š instead of *a-fraš ground-form *e-prek-s from V prek-'ask' (vice versa, 3rd sing. mid fraš-tā instead of *per'š-tā)

§ 500 In Aryan, the ever increasing use of thematic forms was helped on by the like endings -am in the first person singular, and -anti -an in the third plural. Sometimes the desire for clear expression came in too. Thus Skr. 2^{nd} and 3^{rd} sing ada-s ada-t drove out ada-a (both persons) from ada-a (eat' (1st sing ada-a 3rd pl ada-a), and in Avestic ada-a (eat' (2st sing ada-a), endings of the 3rd pl. middle, were almost entirely dropped in favour of the thematic endings ada-a ante ada-a, by which the plural was more clearly marked, e. g. ada-a as contrasted with Skr ada-a they sit' (§ 1067 1).

Much the same may be said of the other non-thematic present classes. Compare particularly the Avest 3^{rd} pl. of Classes III and V, in -anti -enti instead of -aiti (= Skr -ati), §§ 540, 556, 1018 1 b

§ 501. Armenian e-kn 'he came' Skr. á-gan, common ground-form 'e-gem-t, see § 493 p 51, the 1st sing. ekn and 3rd pl. ekin are said to be adformates of edn edin (see below); Bugge, Kuhn's Zeitschr. xxxii 75.

em 'am' Skr ás-mi, see § 493 p 52. 2nd sing es for *es-si (I § 559 p. 416), 3rd sing. ē following berē 'fert' for *bhere-ti (vice versa, 2nd sing. beres follows es); 3rd pl en doubtless for Idg *s-enti (Bugge, Kuhn's Zeitschr xxxii 71), cp. § 1019

e-di 'I placed'. Skr á-dhā-m, see § 493 p. 53; 2^{nd} sing. e-di-r 3^{rd} sing. e-d 2^{nd} pl. e-di-k 3^{rd} e-di-n. di- = Idg *dhē-(I § 71 p 62), and thus the strong stem has here passed into

¹⁾ Similarly, the forms with an $\bar{\imath}$ -determinative, $\acute{a}s-\bar{\imath}-\check{s}$ $\acute{a}s-\bar{\imath}-t$ 'eras erat' establish themselves in place of $\acute{a}s$ (Vedic for both persons); see § 574.

the plural The same is true of e-tu 'I gave': Skr. á-dā-m, see § 493 p 53. 2^{nd} sing e-tu-r 3^{rd} sing. e-t 2^{nd} pl. e-tu-k 3^{rd} pl e-tu-n, tu- = Idg. *dō- (I § 87 p. 84). But ta- = Idg. *də- is the stem of the present 1^{st} pl. ta-mk 'damus', whence a appears instead of u in the singular tu-m (I § 109 a p. 101).

gom 'I am' is compared by Hubschmann (Arm. Stud I 25, 61) with Gothic visa 'I remain, tarry', and he conjectures that it is derived from *ues-mi, Bugge (as cited, page 7) offers another explanation, but hardly improves upon this.

Remark The Homero 1st sing. -εκται and 3rd sing. ἔκτα are peculiar α is certainly short only in O 432 (ναι', ἔπεὶ ἄνδρα κατέκτα Κυθήμοιαι ζαθέσιαι) Is it possible that the original forms were ἔκταν ἔκτα with Acolic a, which would be re-formates of the same nature as 3rd pl ἔκτὰι ρ Or is ἔκτὰ a re-formate like Skr ά-υμ beside νάν k (§ 499 p. 63), and -εκτὰν due simply to the analogy of ἔκτὰ ρ

V bher- 'ferre' 2^{nd} pl $y \dot{\epsilon} \varphi - \tau \epsilon$ instead of * $\varphi \varphi \alpha - \tau \epsilon$ * $\varphi \alpha \varphi - \tau \epsilon$. Skr bhár-ti 2^{nd} dual bhy-tám, Lat. fer-t (§ 505).

 \sqrt{ger} - 'swallow' ε-ροω ' εφαγεν, έδατε, διέσπασεν , βρω = * $g\bar{t}$ -, weak grade like $q\bar{v}$ - in \tilde{t} - $q\bar{v}$, \S 497 p. 56.

εἶ-μι 'I will go', Idg. *έχ-mι, see § 493 p 52, 2nd sing. εἶ for *εἰ-(σ)ι, 3rd sing εἶ-σι, pl 1st person ἴ-μεν 2nd ἴ-τε; 3rd pl ἴσσι either for *ἰχ-ανει (Idg *ἰχ-ἐntι) or instead of *ἀντι (Idg 'χ-entι) with ἰ prefixt following ἴ-μεν ἴ-τε Pret. 1st sing. ¾α instead of *ἰμα for *ἰχ-α (Skr ἀy-αm) following forms with a personal ending beginning in a consonant, such as $\bar{\eta}$ -μεν (on the augment see § 480 p 28, § 481 pp. 29 f.), unaugmented 3rd dual ἴ-την. Imperative ἴ-θι: Skr ι-hί The old conj. and opt., answering to Skr ἀy-α-tι and ι-yά-t, are not found. Partic. fem. Ἐπ-ἰασσα, epithet of Demeter, for *ἰ-ατ-χα: Skr.

y-at-t — With thematic vowel. indic pres. εἰσ-ἰστοι pret. Hom. ἔ-ε ἢ-ι ή-σμεν Atl imper ὶ-ό-ντων opt. ἔ-σ-ι partic ὶ-ό-ντ- (cp. J Baunack, Curt Stud. x 96 ff., Rhom. Muxxxvii 472), and compare conj. ἔ-ω ἴ-ω-μεν.

Vey- 'lose' mid 3^{rd} sing. $\lambda \vec{v}$ -το $\lambda \vec{v}$ -το, 3^{rd} pl $\lambda \vec{v}$ -ντο (ep. § 1068).

1st pl. ἴδ-μεν (Att. ἴσμεν) 2nd pl. ίσ-τε may be connected with the sing. `μεἰd-mı or οἶδ-α, it matters not which; see § 493 p. 52.

 $\epsilon i\mu i$ 'I am', Idg 'és-mi, see § 493 p 52. 2^{nd} sing ϵi for $*\hat{\epsilon}(\sigma)_i = \text{Skr. } \acute{asi}$, also $\epsilon \acute{l}\varsigma$ ($\epsilon \ddot{l}\varsigma$) and $\hat{\epsilon}\sigma - \sigma i$, see § 987.1. 3rd sing, ἔσ-τι (ἐσ-τὶ). Skr. ás-tι. 1st pl. εἰμὲν (Dor εἰμὲς) for *¿σμεν shows the strong stem for the weak (cp. O Icel. er-o er-u § 507), like the 2nd pl ἐσ-τὲ and the 3rd pl. Ion ἔασι for *ἐσ-αντι, Att. ἐσμὲν follows ἐστὲ in having σ. The 3rd pl. Dor. έντὶ Att. ἐισὶ instead of 'έντι = Goth. sind, Idg. 's-entr (§ 1020. 1); for the breathing compare our- instead of 'o-v-t-§ 493 p. 53. With 3rd pl. Dor. Evri goes the participle Dor. έντ-, nom. pl. έντ-ες whose fem. έσσα is a transformation of * $\acute{a}\sigma\sigma\alpha$ (cp. Skr. s-at- \acute{t}) Pret. 1st sing Hom. $\mathring{\eta}\alpha$ Att. $\mathring{\eta}$ for * $\bar{e}s$ - ηt , $3^{\rm rd}$ sing. Dor. $\bar{\eta} \varsigma$ for * $\bar{e}s$ -t, $1^{\rm st}$ pl. $\bar{\eta} \mu \epsilon \nu$ for * $\dot{\eta} \sigma$ - $\mu \epsilon \iota$ (I § 565 p. 410), 2nd pl ησ-τε, 3rd pl Dor. etc. ην for *ησ)-εν = Skr. ás-an (§ 1020. 1), also Boeot. παρ-εῖαν for *ήαν (§ 1021.1); for the augment, see § 480 p. 28, § 481 pp. 29 f 1st sing. $\eta \nu$ 2nd pl. $\eta \tau \varepsilon$ are re-formates caused by preterites like έβλην, Class X, the point of contact being ημεν. 3^{rd} sing. Hom. $\bullet \vec{\eta} \epsilon \nu$ Att. $\vec{\eta} \nu$ is probably identical with 3rd pl. Dor. η_{ν} for $\eta_{\sigma}(\sigma)$ - ϵ_{ν} ; the Indicative had adopted $-\alpha_{\nu}$ (-σαν) in other forms in place of 3^{1d} pl. -εν (§ 1021), and thus $\tilde{\eta}_{\mathcal{E}\nu}$ ceased to be a clear plural, beginning with sentences like α δή τετελεσμένα ήεν (Σ 4), ένθα μάλιστα μάχη Blugmann, Elements IV.

rai φύλοπι, ήτη (N 789). In the dialect of Herodotus ηα became έμ (1 § 611 p. 462), whence by analogy έα-ς έα-τε cp. § 504 On ησθα and Hom. ιησθα ζην 1 ην, see \$\$ 583, and 858 2 Imper lost for Idg *z-dhi with prothetic vowel (1 § 626 p 470), and Hecatacus has logi with the strong stem introduced The old conjunctive (Skr ús-a-ti ás-a-t Lat. er-i-t) was lost in the historic period, and in its place we find so somer of oner like Ski as-a-t Opt com for Fo-19-r or co-19-r with the strong tense-stem (ep § 943) -There is connexion between 1st pl ?uir in Callimachus, the These 1st sing 240, and Hom int ther cuevas either on the analogy of dor tiverior (Dor erri riverri) and of edge . Tidsing, infinitives were formed to match with Tidsusy and τιθέμεν τιθέμειαι (cp Mess conj ήνται and Hom conj μετ-ήω (§ 934) or the parallel torms ¿ãou ¡ãou, ¿ou ¡ou and so forth gave the impression that the two verbs were distinguished by having one s and the other s before the same endings and thus guir and fuer(a) came into existence on the analogy of iuse (1st pl.) and iuse (au) In any case iui was not made until after euer - The euclisis of sim, as of gram, is due to the fact that the finite verb was always encline in the original language: sec I § 669 p 534, and Wackernagel, Kuhn's Zeitschr xxIII 457 ff - On the thematic forms (*s-o- and *es-o-), see \$ 493 p 53,

 $\tilde{\eta}$ 'said' (with pr. Greek η) for $\tilde{\eta}_{\mu}$ - τ (1 § 652.5 p. 496), ep Skr \tilde{u}_{l} -u Lat $\tilde{u}_{l}\tilde{v}$. The ablant in the root needs explaining (ep Lat ad- $\tilde{u}gum$ $pr\tilde{v}_{l}$ -l-gum). In the mould of $q\tilde{\eta}_{l}$ u- $q\eta_{l}$, $q\eta_{l}u$, $q\eta_{l}u$, $q\eta_{l}u$ beside $q\tilde{\eta}_{l}$ \dot{v} - $q\eta_{l}$ (pi (ir $q\bar{\omega}$ -) were east $\tilde{\eta}_{l}v$, $\tilde{\eta}_{l}u$, $\tilde{\eta}_{l}\sigma$.

 $\sqrt{d\bar{\sigma}}$ 'give' é-do- $\mu\epsilon\nu$ etc., sec § 493 p 53. Similarly from $\sqrt{k\bar{\sigma}}$ 'to be sharp, have one's wits sharpened by

experience' (Gr κά-να-ς, Lat. cos ca-tu-s, O.lr. cath 'wise')
-νο-μεν ήσθόμιθα and κόν είδος Hesych., op partic δόν.

 $\sqrt{bh\bar{a}}$ - 'show, make open, declare' $q\eta$ -m Don $q\bar{a}$ -m 1st pl qa- $\mu \hat{e}$ ν 2nd pl mid. $q\hat{a}$ - $\sigma \theta$ ε, ep. § 495 p 55

 $\sqrt{st\bar{a}}$ - 'stare' .-στη-ν ε-στη-μεν, 2nd sing mid.-pass ε-στά-θης (·Skr ά-sthi-thās, § 503) etc., sec § 493 p 54, § 495 p 55

§ 503 A number of forms of the 2^{nd} sing pret mid. with the personal ending $-9\eta_5 = \text{Skr.} -th\bar{a}s$ were the foundation for the $9\eta\nu$ -aorist, $i-\nu\tau\alpha-9\eta_C = \text{Skr.} \dot{a}-k\bar{s}a-th\bar{a}s$ beside $\alpha\pi-i\nu\tau\alpha\tau$ 0 (§ 502 p. 64), $\dot{\epsilon}-i\dot{\alpha}-9\eta_C = \text{Skr.} \dot{a}-th\bar{a}s$ from \sqrt{ten} 'stretch', $\dot{\epsilon}-\varphi\theta i-\theta\eta_C$ beside $\ddot{\epsilon}-\varphi\theta i-\tau o$ (§ 502 p. 65), $\dot{\epsilon}-\sigma\dot{\nu}-\theta\eta_C$ beside $\epsilon-\sigma\sigma\tau-\tau o$ (§ 504), $\dot{\epsilon}-\tau\dot{\epsilon}-\theta\eta_C = \text{Ski}$ $\dot{a}-dh\nu-th\bar{a}s$ beside $\epsilon-\theta c-\tau o$ from $\sqrt{dh\bar{e}}$ 'place' (§ 493 p. 53), $\dot{\epsilon}-\dot{\theta}\dot{\sigma}-\dot{\eta}_C = \text{Ski}$ (§ 493 p. 53) $\dot{\epsilon}-\sigma\tau\dot{a}-\theta\eta_S = \text{Ski}$ $\dot{a}-ds-th\bar{a}s$ beside $\epsilon-\delta\sigma-\tau o$ from $\sqrt{d\bar{o}}$ 'give' (§ 493 p. 53) $\dot{\epsilon}-\sigma\tau\dot{a}-\theta\eta_S = \text{Ski}$ $\dot{a}-sthi-th\bar{a}s$ from $\sqrt{st\bar{a}-\frac{1}{\sqrt{s}}}$ 'stand' (§ 493 p. 54) See §§ 589 and 1049. 2

§ 504 Some preterite tenses of this sort form a subclass apart in having developed from the $-\sigma$ of the 1st pers sing and $-\alpha r$ in the 3^{rd} plural, a flexion like the s-aorist ($-\sigma \sigma$ - $\sigma \alpha c$ etc.), in which the strong stem appeared instead of the weak in the active plural and dual and in the middle voice

 $\sqrt{g}hey$ 'pour $\varepsilon_{-\chi}\varepsilon(f)$ -a, Aeol (Hom.) εχεν-α 3rd sing. and $\varepsilon_{-\chi}v$ -το χv -το Skr 2nd sing $h \tilde{\sigma}$ -δι From this beginning we have εχεσς εχευσε εχει εχινε εχέσμιν ερείσμεν and so torth, instead of * $\varepsilon_{-\chi}\varepsilon_{+\chi}$ ' $\varepsilon_{-\chi}\varepsilon_{+\chi}$ ' $\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}\varepsilon_{-\chi}$

Of the same sort are the reduplicated $\eta_{\nu-i\gamma\kappa-\alpha}$ $\eta_{\nu\epsilon\gamma\kappa\alpha}$ etc., and sin-a $sin\alpha\varsigma$ ($f_{\epsilon\iota\kappa}=$ "ue-uq-); see §§ 557, 569 Parallel to $\eta_{\nu\epsilon\gamma\kappa}$ is the form $\eta_{\nu-\iota\kappa\alpha}$, which is not reduplicated, but is derived from another root and compounded with the preposition $\dot{\epsilon}_{\nu}$ — (the Author, Idg. Forsch i 174); $\eta_{\nu\epsilon\kappa\kappa}$ too received the inflexion of the s-aorist.

It is easy to understand how this amalgamation with the s-aorist came about, if we may assume that the first step was to change the 3^{rd} person singular active. This would become $\mathring{\epsilon}_{\nu-\varepsilon\iota(\kappa\tau)}$, and if in its stead was used a form with the thematic vowel, $\mathring{\epsilon}_{\nu-\varepsilon\iota/\varepsilon}$ (beside $\sigma_{\nu\nu-\varepsilon\nu\varepsilon'/\varepsilon\varepsilon\tau\iota}$ Hesiod), and similarly $\acute{\epsilon}_{\chi\varepsilon}(F)$? (from $\check{\epsilon}_{\chi\varepsilon\sigma\nu}$) replaced $\mathring{\epsilon}_{\varepsilon-\chi\varepsilon\nu}$, and $\acute{\epsilon}_{\sigma\sigma\varepsilon\nu\varepsilon}$ (beside $\acute{\epsilon}_{\sigma\sigma\varepsilon\nu\acute{\epsilon}\mu\eta\nu}$) replaced $\mathring{\epsilon}_{\varepsilon-\sigma\varepsilon\nu}$, and so forth, the rest followed naturally: for $-\alpha$ in the first and $-\varepsilon$ in the third person brought the forms into direct relation with the s-aorist $\acute{\epsilon}_{u\varsigma}$ $\check{\epsilon}_{a\tau\varepsilon}$ are late, and copied straight from $\acute{\epsilon}_{\chi\varepsilon us}$ $\acute{\epsilon}_{\chi\acute{\epsilon}a\tau\varepsilon}$.

Remark According to Fick (Gott. gel. Anz. 1881, pp 1432 i) and others, in all these preterites the $2^{\rm nd}$ sing. $(-\alpha^-)$, $2^{\rm nd}$ pl. $(-\alpha^-\tau_{\rm E})$, etc. contain original dissyllable roots ending with θ (= Gr α), in which case they will belong to our Class IX. For instance, $\chi_{\rm E} f_{\alpha^-}$ in $\chi_{\chi \in \alpha}$ is connected by these scholars with Skr $hav_{\rm I}$ - in $hav_{\rm I}$ -. This view seems to me less probable Even granting it, however, confusion with the s-aorist is not by any means excluded.

§ 505 Italic. A peculiarity of Latin is the combination of thematic and non-thematic forms to make up the persons of the present indicative A first pers. sing in Idg. -mi cannot be proved for Italic

V bher- 'bear'. Lat, fer-t Skr. bhár-ti; 2nd pl fer-tw imper. fer-te have taken the strong stem, like Gr. $\varphi \not\in \varphi - \tau s$ (§ 502 p 64), and like Skr. 2nd dual bhar-tám beside the regular bhy-tám. The 2nd sing. indic. fer-s and the 2nd sing. imper. fer both represent the Idg injunctive *bher-s: fer is regular (as par for *pars and the like, I § 655 p. 506), but fer-s has had -s added again. In the pres. indic., ferō

¹⁾ That fer comes from *fere, as Pauli asserts (Altit Stud., IV 29), I do not believe If fere in the Song of the Arval Brethren really means 'bring', this, and no other, would represent Idg *bhere; and fere would stand to fer as Marrue 3rd sing pres. fere-t to Lat. fer-t.

ferimus ferunt have a thematic vowel. Umbr fertu 'ferto' may be identical with Lat. fer- $t\bar{o}$, or it may be the same as the thematic Gr. $\eta \epsilon \rho \dot{\epsilon} - r\omega$ (see I § 633 p 474).

Vuel- 'wish'. Lat. 2nd sing, injunct. vel for *uel-s (I \$ 655) p 506), now a particle, 1) 2nd pl. voltis for *ul-tes. Skr. á-vr-ta etc, see § 493 p. 51 3rd sing volt instead of *vel-t. On 2nd ing. veis ois, see below Optative. vel-1-m vel-1-mus, like toth 1st pl. vil-en-ma (1st sing viljan), with strong stem, 2) as contrasted with Skr 3rd sing, mid vin -1-ta for "ull-1-to (see p 51 footnote), in consideration of noli nolite nolito (nolo for ne-volo as malo for mag(e)-volo mavolo, cp. 1 § 432 (p. 322 on the word avilla), this irregularity may be easily explained on the supposition that there was an indic. *uel-(i)io uel-7-s (Class XXVI) which is represented by O.H (4. 1st sing willu Goth inf. viljan partie viljands OCSI velja veli-ši etc (§ 727) 3) - With thematic vowel indic. pres volo, volumus colimus (§ 530), colunt, for 'ull-o etc Umbr veltu 'eligito' is as ambiguous as fertu, see above

Lat 2nd sing vei-s vī-s (beside in-vītu-s), alien forms absorbed into the conjugation of iolū Skr i t-ti 'presses on, strives' 3rd pl vy-anti

\(\cdot e_1 \cdot \text{go'} \) 2nd 3rd sing. Lat \(e_1 - s \) \(\text{t-s} \) and \(i - t \) ground-forms \(e_2 - s \) and \(*e_2 - t t \), see § 493 p. 51 The \(\tau - \) (also written \(e_1 - \)) of the present of the Latin finite verb, \(\tau - mus \) \(t - t \) is \(\tau - t t \) \(t - t \) of the present of the Latin finite verb, \(\tau - mus \) \(t - t \) is \(\tau - t \) to \(t - t \) to \(t - t \) doubtless not the (weak grade) \(i \) of Ski \(t - mah \tilde \) (ir. \(i' - o - \mu v' \) (p. 52), but the strong grade \(e_2 - \), op Pelign \(e_1 - t e' \) the rare Lat. \(3^{rd} \)

¹⁾ Compare Umbr. heris — heris 'vis — vis' = 'vel — vel'.

Originally it was no doubt a question. 'will you have this? will you have that?'

²⁾ I do not consider that proof has been shown for deriving velum from *volum by vowel assimilation. *vel shows that Latin had the grade yel- in this root.

³⁾ A different account of Lat note may be seen in Kuhn s Zeitschr. xxx 313 (Wackernagel's), and Stolz, Lat. Gr.² pp. 378, 379

pl. int was coined to complement thus on the strength of stu-nt. stu-mus, ple-nt ple-mus etc

Partic *iēns* like *prae-s-ēns* (II § 126 p 396, and IV p 50, footnote). With thematic vowel *eō* for *e₂-ō, eunt, partic eunt-is etc., and the conj. eam ep. Skr indic mid. dy-a-tē. ambiō ambiunt are doubtless not to be compared with Gr. ioi elo-lovour etc (pp 52, 65), they must be a re-formation following fīmo, the compound being treated like a simple word

Ves- 'be' 3rd sing Lat es-t, Umbr est est Osc est ist Skr. ás-ti, § 493 p 52 2nd sing es tor es-s, also ēs, the latter perhaps augmented (§ 480 p 28) Weak stem s- in the 3rd pl Umbr. s-ent Osc. s-et The 2nd pl Lat es-tis has taken the strong stem, like Gi êo-rê Conjunctive Lat eiō er-i-s etc with future meaning (§ 910) Optative 2nd sing. Lat s-iē-s s-i-s Umbr sii sii sei, see § 946. To the the thematic stem s-o-belong 1rt sing Lat s-u-m Osc súm sum for s-o-m, the injunctive form, 1rt pl Lat sumus simus (so too possumus possumus, ep volumus volumus above) for s-o-mos, 1) 3rd pl Lat s-o-nt sint Falise sunt, partic Lat sōns sont-is (ep. the Author, Bericht der sachs Ges der Wiss, 1890), pp 230 ff.)

Remark 1 Side by side with potis sum (potis 'mighty, powerful, able' = G1 10-m-1), for which a plural potis sumus was formed instead of *potēs sumus after potis had crystallised (cp. Skr dātāsmas 'we will be giving' instead of dātāruh smas, and like phrases), was a variant pote sum pote is an adverb (acc sing neut. for *poti, or loc in origi-e, see III § 260 p 160), cp bene sum, tāto sum potisset potisse are for potis 'sset' 'sse, cp situst for situs 'st. But potes potist potestis come from pote es etc. So also possum possum (whence possem posse by complementary analogy) come from *potsum 'potsum, pote-sum, pote-sim. It is doubtful, however, whether -c- disappeared by regular syncope, or whether potest cst suggested *potsum sum (I § 501 p 367)

Ved- 'ent' ës ëst ëstis ëste, pass ëstur (on -st- instead of -ss- -s- see 1 \ 501 Rem 2 p 368), with thematic vowel edō edimus edunt, also idis edit etc. See \ 480 Rem pp 28 f. \ \ 494 pp 54 f. \ 498 p 60 Optative ed-i-m ed-i-mus instead

¹⁾ I \$ 110 page 105 should be corrected by this statement.

of d-7-, perhaps to distinguish this optative from the old optative of $d\bar{v}$ - 'give' (see below)

V dhē- 'place' Lat con-di-mus con-di-tis crēdimus for '-fa-mos '-fa-tes. Gi ε -di ε -us·, see § 493 p 53. The forms -dō-dis-dit-dunt are thematic

V dō- 'give'. Lat da-mus du-tis red-dimus -ditis. (ir. i-do--aer, see § 493 p 53 l) Imperative re-do (2nd pl re-tte for 'ce-date *re-dite, 1 § 633 p 474), see § 957. The old optative stem *d-t- (ep \text{ Vest } 3nd \text{ sing } d-y\bar{a}-p) is found in Ose, da-did dedut', to this the conj da-did Lat de-dat is related like Lat ed-\bar{a}-mus ed-\bar{t}-mus (see above). The old singular forms `d\bar{a}-m 'd\bar{o}-s \text{ *do-t} \text{ are gone, we have instead } d\bar{o} \text{ das } \text{ dat.} \text{ The last two represent the stem used in composition for the conjunctive, \$d-a- (ep -b\bar{o}s \text{ for } \frac{\data}{\data}\text{ sind on the analogy of \$d\bar{o} \text{ stas } f\bar{o} \text{ flas etc. In composition we see the same inflexion as \$leq\bar{o}\$ has \$las \text{ for d-do} \text{ red-do} \text{ -dim-us} \text{ -dim-us} \text{ -dim-us} \text{ -dim-us} \text{ must regularly become } \text{ ep \text{ fur. O Lit } reddib\bar{o} \text{ for } \text{ for ed-dab\bar{o}}}

Remark 2 The compounds of this and the were confused in Latin, beginning with the 1st and 2nd plinal, -dis - *-fa- *-this and state - *-da- *-da- Compare Darmesteter, De conflict verbidare, Paris 1877 Postgate, Dure, 'to give' and -dere 'to put', Trans Phil Soc 1880—81 pp 99 ff. Thielmann, Das verbum dure im Lat, Leipzig 1882 the Author Liter Centr 1882 col 1389 ff

Whether the forms std-s sta-t from [/sta-\stand\] are rightly placed here with the rest, as is suggested by Ski a-sthā-t and Gi s-\sigma\) (\(\frac{4}{3}\) p 54) is very doubtful because of $st\bar{a}$ -mus $st\bar{a}$ -tis. One cannot see why an orig *st\(\bar{a}-mus (c)-d\(\bar{a}-mus) should have been altered ($c\sigma\) units as compared with <math>c\delta a\mu$ is quite a different thing, see \(\frac{4}{9}\) p 55); and so it

¹⁾ Bréal (Mém Soc Ling, vii 326) thinks he may regard as an unaugmented preterite dui in Vergil's cratera autiquom quim dat Sidonia Dido (Aen ix 266). Many points in Vergil's manner are in favour of Bréal's assumption (see Ladewig on Aen i 79, ii 275 Kuhner Ausf Gili 30).

is preferable to refer the whole present of this verb stō to *stō-jō; sec § 584 Rem., § 706 This is supported by Umbr. stahu 'sto'

\$ 506 Keltic Ves- 'to be', 1) 3rd sing O. Ir. 18 ().Cymr. 188 18 for *es-t1. 3rd pl. O.Ir 11 O Cymr. 1nt for 3-enti (II p 196, footnote). The a- of the Irish proclitic sing 1st pers. am 2nd at (3rd relat. as), plur 1st ammi 2nd adib (3rd rel. ata), is from -e. The form am then had no -i at the end; and since it is usually written am with one m. it seems to have had m spirant, like Mid Cymr wyf It must therefore not be derived from *esmi The 2nd sing at Mid Cymr rout may contain the pronoun of the 2nd person and may thus be explained as 'est-1-t- Mid.Cymr 1st sing wyf seems to be due to the analogy of the 2nd sing. Is Ir am the same? Others regard these forms as coming from the root et- 'go' The 1st pl ammi Mid Cymr ym may be 'esmesi. In the 2nd pl. adib, -b is certainly an affixed personal pronoun, and -dithe ending of the 2nd pl = -thi -the (ground-form :-tesi, the suffix re-formed on the analogy of the 1st pl, see § 1014) This brings us back to an imaginary ground-form 's-e-test + so-, which would be a re-formate following the 3rd pl *sentr. and so perhaps the 1st pl should be derived from *e-esmesi. a later contamination

Again, the Keltie t-preterite, as it is called is partly of the same kind. In the '3'd sing of this preterite, the ending -/ is said to represent the middle ending *-to (Strachan, Bezz Beitr XIII 128 ff', and Zimmer, Kuhn's Zeitschr. XXX 204 ff.) e. g. O.fr as-bert 'dixii' Mid ('ymr. kymerth 'sumpsit' for *kymberth from 1/bher- When -t ceased to be understood as a personal ending, the other persons which completed the tense were formed on the model of stems ending in -t. O.fr. sing.

¹⁾ Compare Zimmer, Kelt. Stud II 133, Stokes, The Neo-Celtic Veib Subst, 43 ff, Kuhn's Zeitschr. xxvIII 93 ff., d'Arbois de Jubainville, Mém. Soc. Ling, v 239 f., Strachan, Bezz Beitr xv 114 ff. In the text I follow chiefly information received from Thurneysen

1st pers -burt 2nd -burt, plur. 1st -bartmar 2nd -bartad 3rd -bartatur. Compare Lith. eith 'I go' formed from e\(\tilde{\epsilon}\)-t' he goes' = Skr \(\tilde{\epsilon}\)-ti \(\frac{\epsilon}{\epsilon}\) 686 Rem 2, Gr \(\tilde{\epsilon}\)\(\delta\)-tr from \(\tilde{\epsilon}\)-do'-9\(\eta\): = Skr \(\delta\)-th\(\tilde{a}\)s \(\frac{\epsilon}{\epsilon}\) In forms like as-bert Strachan sees rootatorists of this class, Zimmer s-aorists (*ber-s-to). As a matter of fact, both these aorists may have been the source for some preterites such as these. To our Class I belong O.Ir. ro-\(\tilde{\epsilon}\) the took' for *-em-to, Mid ('ymr gwan-t 'percussit, ferin').

§ 507 Germanic Viel-'wish' opt Goth viljau pl vilei-ma O H.G 2nd and 3rd sing. vili O Icel 1rd sing. vilja The strong stem (cp. Skr vr-iyā-t vur-ī-ta). like that of Lat velim, is due to a confusion with the indic *vel-(i)20- *vel-ī- (O.H.G. willu O C.Sl velia). See § 493 p. 51. § 505 p. 69. § 928.

17 gem- 'go, come', opt AS cyme = Goth 'kumjan: Skr gam-yá-m, see § 493 p 51

Ves- 'to be', see § 493 p 52 The indicative forms are toth im, is, ist, sijum sum, sijuh sinh, sind ti H to bim (bist bis), ist, birum, birut sint, () Icel. im. ist, es tRun is) crom erum, erod erud, ero eru. First it must be mentioned that the OHAG 2nd sing bist bis belongs to a present to be described below in §§ 707 and 722, formed from 1/bhey-, namely 1st sing *bhy-yō 2nd sing bhy-t-si etc (A.S. 1st sing héo 2nd sing bis 3rd sing bid. Oh bin etc), and that the similarity of bis and *is (== Goth. is) produced b-im b-irum b-rrut 1st sing (both im OII G. (b-)im for *immi *ismi = Skr ás-mi (1 § 582 Rem 2 p 436) O Icel em instead of regular *1m following the plural forms which begin with e, whence also the e in est and es. Whether the 2nd sing. Goth is comes from Idg Fest or Fes-st (see § 984 1) cannot be decided, O.Icel, est like O.H.G. bist has -t on the analogy of the preterite (§ 990 3), on the very rare O.Icel 2nd sing. es, see Noreen in Paul's Grundr I 515 The 3rd sing Goth ().H.(i. 1st 1s for Idg *es-ti, O.Icel es (Run 1s) A.S. O Sav is are doubtless the old injunctive Idg. 'es-t: the 3rd pl. O.Icel. er-o is also injunctive (other explanations are suggested by J. Schmidt, Kuhn's Zeitschr. xxv 593, von Fierlinger, ibid. xxvn 140 footnote 2, Noreen, loc cit Osthoff, Perf 428 f.) In the plural, the weak stem is seen in Goth. s-ind O.H.G. s-int = Idg. *s-enti ().leel. ero eru is pr (lerm. *iz-unf (§ 1025-1 b), an injunctive in which the strong stem has taken the place of the weak (ep th évan, \$ 502 p 66) As the ending of 'izunp agreed with the so-called pretente-presents such as Goth mun-un (§ 508), on their analogy the 1st pl O Icel erom () [16] (b-)erum and the 2nd pl () leel erod () 11.6 (b-) urut appeared These forms then produced OHG Frank. sind-un OSax AS sind-un. Goth sigure sigul are probably transformed from "iz-um "iz-up, caused partly by smd, partly by the feeling that the opt sijan sijais etc should contain a stem sup. - The optative has always a weak root 1st sing Goth s-ijau OHG 5-1 Olcel 5-jā, on the inflexion, see § 947 — Partic *s-und- == ldg s-ut- in Goth sunjis 'true' for *sund--10- = Skr, sal-ya- true', also thematic 's-o-nt- in sunf-u-'true, truthful' AS sod O Icel samur (cp § 493 p 53)

Remark On OHG stam stem I stand and quan quan I go', see § 708 They certainly do not belong to this class of presents

§ 508. Some Preterite-Presents may also be placed in this class. (60th, minimum 'they think', opt 1st pl minimum 8ki, mid. 3rd sing á-ma-ta partie man-āná-s, V men- 'think mean' (60th, ga-daúrs-un ()11 (6 gi-turum 'they dare', opt (40th ga-daúrs-ei-ma ()11.(6 gi-turu-ī-m) 8kr partie dhṛs-āná-s, V dheis- 'dare' (40th rit-un ().11.(6 vizz-un 'they know', opt (60th rit-ei-ma ()11.(6 vizz-ī-mēs 8kr rēt-ti opt vid-yit-t etc., see § 493 p 52, the weak forms of this ver) were present and perfect at the same time

If this view be right, Goth mun-un ga-daurs-un vit-un were originally injunctive, like leel er-v er-u (§ 507 p. 73). We shall meet again with present forms among the preterite-presents (§§ 646, 887, 893).

§ 509 Connected with Ski 7r- $t\bar{e}$ imper. A sest ar^{e} -soa (fr δg -so, which point to an Idg. and. pres * \bar{r} -tai (mentioned above, § 497, page 57) are AS 2^{nd} sing. ear-t ar-t ear-t thou art' pl ear-un ar-on with ar- = Idg * \bar{r} - For the meaning ep (fr. δg -sog-a), which in late Greek had also the meaning 'I am'. On the 2^{nd} sing, see § 990 3

Remark. Germ ar-was probably not a perfect stem, which would have been ör-. This is said to correct the note in Idg Forsch | 81

Von Fierlinger (Kuhn's Zeitschr. xxvII 436 ff.) deduces some other presents with weak stem and secondary accent, from thematic forms with peculiar vocalism. Thus, for (16th fara 'l fare, go', ν per- (in Gr $\pi \epsilon \rho \dot{a} \omega$ 'l pass through' etc.), he assumes an older present stem * $p\bar{q}$ -, 1st pl. * $p\bar{r}$ -més (cp. Skr 2nd sing $p\dot{a}_1$ -š ι)

§ 510 Balto-Slavonie To ldg *yezd-mi'l see belong Lith reizd-mi, and imperative Lith, veizdi veizd O.C.Sl niždī.— the imperative forms have non-original strong stem, and the OCSl form has i instead of z, see § 493 p. 52, §§ 949, 962. An undoubted re-formate is Lith pa-výzdmi instead of pa-výdžmi invideo', also used (cp. § 511)

Idg 'es-mi 'l am', see § 493 p 52 The Inthuaman forms here to be cited are scattered over various dialects 1st sing lath es-mi () ('Sl jes-mi, on the analogy of thematic verbs with -u lath esmi (like Lett. esmu Pruss asmu), and then a 2nd person esmi was made on the analogy of suki suki 2nd sing Lith. esi (Pruss assai assei asse essei) () ('Sl jesi see § 991 3rd sing lath ēs-ti ēs-ti ēs-ti (Pruss, ast est) () ('Sl jesi-ti The 1st and 2nd pl may have taken es- instead of sin pr. Balto-Slav Lith ēs-me ēs-te (Pruss, asmai, astai astiestei) () ('Sl jes-mi jes-te Partic Pruss, -sins dat. -sentismu ep. Lat. -sēns and Gr. Dor ivi-eş (p. 50 footnote). —

*s-o- in O.C.SI. 3rd pl. sqtŭ partic. Lith sūs sanczio O.C.SI. sy sqsta. *es-o- in Lith. 1st sing. esù 1st pl ēsame 2nd pl ēsate partic. ēsās It is not clear whether Lith opt (permissive) 3rd sing. tesē 'sit' is to be analysed te-sē (cp Pruss 2nd pl opt sei-ti) or as t-esē. With augment pr Balto-Slav. †ēs-o-m etc.. in OCSI. this occurs in the imperfects nesē-achā -aše -aše pl. -achomā -ašete -achā, unthematic 2nd pl -as-te also found (so too the dual has both -asta -aste and -ašeta -ašete), see § 903. in Lith. the preterite ē- passed into the present, esù esì ēsa ēsame ēsate partic ēsūs, see § 480 p 28 — On Lith. 3rd sing. yrà, which comes from the root of Skr ti-tē Avest. ar'-šva (tr óg-wg-a AS ear-ā. see J Schmidt in Kuhn's Zeitschr xxv 595 f

The present of 1/ed-'cat' was in pr Balto-Slav *ēd-mi for its ē see § 480 Rein. pp. 28 f., § 494 p 54. Lith sing 1st pers. émi 'I devour' 3^{1d} sing ésti ést pl 1st éme 2nd éste dual 1st édva 2nd ésta (on édmi édme see I § 547 p. 401) ().C.Sl. sing. 1st pers. jami 2nd jasi 3rd jastă pl. 1st jamă 2nd jaste 3rd jad-ctă (on 1st dual javě instead of *jadvě, see I § 547 Rem 3, p 401) — Also thematic Lith édu édi etc Pruss. opt. 2nd pl udati O C.Sl. partic. jady jadašta

Other presents of this class are found in one only of the two branches, Baltic or Slavonic, not in both

§ 511. In Lithuanian there is a fine array of present forms of this class, but nearly all are defective and have only one or two persons left, chiefly the first and third. Some of them have come into this class quite late Compare § 496 p. 56. Lists of mi-forms may be found in Schleichei pp. 250 ff., Kurschat pp 304 ff, Bezzenberger Beitr. lit. Spr 198 ff. (a few more come from the dialects)

We begin with those which may be regarded as representing Idg. originals.

pa-relm 'I will' 2^{rd} sing. pa-velt, refl. 1^{st} sing. velmë-s Skr. á-v $_7$ -ta etc., see § 493 p 51

ei-mì 'I go': Skr é-mi etc, see § 493 p. 51. 2nd sing ei-sì 3rd sing. eī-ti eī-t. The strong stem passes into the

plural 1st eī-me 2nd eī-te; but 2nd pl High Lithuanian eīste on the analogy of éste . éme, dűste : dűme. Old injunctives are ei 'let him go' (te ne ei 'let him not go') ei-mè 'let us go' (dual ei-và). Imper. eī-k = Lat. ī (§ 957). Indic. now usually ei-nù, as Class XIII (§ 615) Pruss. 2nd sing. ēi-sei 3rd sing. ēi-t 1st pl ēi-mai. Partic. Lith ent-'going' (in old printed books) doubtless stands for *1-ent-, first in compounds with prefix ending in a consonant, such as isz-ent- (I § 147 p 132), cp. p. 50 footnote; but it is possible that it comes from 'lē-nt-, Class X; see § 593. — *1-o- appears to be contained in Pruss opt. 2nd sing. jeis 2nd pl jeiti.

lek-mì 'I remain' 3rd sing. lēk-ti lēk-t· Skr. 2nd dual rik-tam 2nd sing. mid. rik-thās, V leig- 'linquere'.

ráulmi 'I lament' (regularly *raumi, I § 547 p. 401). Avest 3rd sing. mid. raostā with irregular strong stem (cp. § 499 p. 62), \sqrt{reud} 'rudere', cp Skr. $r\bar{o}di$ -ti pl. rudi-mas § 574

deg-mi 'I burn'. Skr $\,2^{\rm nd}\,$ sing. $\textit{dhákši},\,$ see § 493 p. 53

sédmi 'I sit' 3^{rd} sing. sést 1^{st} pl. refl. sédmé-s Skr. 2^{nd} sing sát-si, V sed 'sedere', see § 494 pp. 54 f

 $j\mathring{u}'s-m\iota$ 'I gird' (beside $j\mathring{u}'s\iota u$): Avest. 3^{*d} sing. $y\ddot{u}s-t\iota$, stem $j\ddot{o}s-$ Compare § 656

The imperatives $d\tilde{c}-k$ 'lay' (inf. $d\tilde{c}-t\iota$, $\bigvee dh\tilde{c}-1$) and $d\tilde{u}'-k$ 'give' (inf $d\tilde{u}'-t\iota$, $\bigvee d\bar{o}-1$), of which the latter must be compared with Lat. ce-do, show the same formation as $e\tilde{\iota}-k$ (= Lat. $\tilde{\iota}$) O Lith $d\tilde{u}-d\iota$ $d\tilde{u}-d$ 'give' doubtless = $*d\bar{o}-dh\iota$. See I § 547 Rem. 1 p. 401, IV §§ 546, 957, 962

Some other presents of the same sort, to which there is nothing which answers outside the Baltic group, may here be named bar-mi 'I scold' 3rd sing. ap-bart, V bher- (Lat. feriō), bar- for *bhō-; snēk-ti 'it snows', V sneigh-; mēg-mi 'I sleep' 3rd sing. mēkt 2nd pl. mēkte; ráug-mi 'I belch', V reug- (Gr. ἐρεύγομαι);) sérg•mi 'I protect, watch' 3rd sing. sérkti; kósmi 'I cough' (Skr. kās-a-tē)

¹⁾ On account of a form naugmi, Wiedemann (Lit. Pract 186) derived this word from a groundform *rēug-mi (cp § 494 pp 54 f.), which is very dubious.

All those verbs have in Lithuanian, beside this present formation, another with the same meaning, which in High Lithuanian is almost the only one. It is certainly no mere chance that in so many presents of the mi-class, the bye-form is a verb in -in with accentuated root (1st pl. -i-me Class XXVI § 727), as sédžiu, sérgm, kósiu žúdžiu (žúdmi 'I bloom'). iziáudžiu (cziáudmi 'I sneeze'), stóriu (stóvmi 'I stand'), mérdžiu (mérdmi 'I he a-dying') etc. With these verbs in -in, the 2nd and 3rd sing ran together and became indistinguishable in form (2nd sing -i for -ii, 3rd sing -i for *-i-t) and it is probable that it was a wish to keep these persons distinct which first produced the non-thematic forms in most of these verbs Perhaps on the analogy of sést(i) (sédmi) beside sédžiu was formed sérkit(i) etc.

Observe also tenk-mi unstead of tenkù 'l last' (pret tekaŭ inf. tèkti), and the 2nd pl gélbste (gélpste), from gélbm 'l help' 3rd sing gélbt(i) gélpt(i), — for its s, compare that of eī-s-te § 511 p 77

§ 512. Slavonic The form only without parallel in Lithuanian is se-til 'inquit', explained in § 493 p. 52

Class II Root + Thematic Vowel forming the Present Stem

 kárš-a-te kṛš-á-te 'draws, ploughs. sárp-a-te 'ciawls' á-sgp-a-t, lir. Att. roέπ-ω Doi roáπ-ω (instead of *roaπ-ω) 'I turn', είπ-ω 'I leave' int λείπ-ειν ε-λιπ-ο-ν int λιπ-εῖν, εγ-ω 'I have int εχ-ειν ε-οχ-ο-ν int οχ-εῖν Lat ες-ō ες-ō, νūd-ō (O H G ειαχα) ναd-ō | 'ειαd-¹) (foth veiha 'I fight pr (ferm nέιχ-ō O leel veg 'I compel' pr (ferm "μιχ-ό, Goth trud-a 'I tread O H li trut-u O l'Sl der-a 'I tear' ('zech dr-u Serv -dr-em O l'Sl žud-a 'I wait' (Lath geudźu) žīd-a, lath mélž-u 'I milk O l'Sl mlűz-a The two kinds are often found in different languages with the same root, as trom | dhreugh- 'hurt, deceive' Aryan has only *drughó-, Ski 2nd sing druh-a-s etc and Germanic only *dhréugho- O H, G truqu

To decide the historical relation of these two kinds, two tacts have to be taken into account. First that in Aryan and Greek. Type B constantly expressed agrist action, and A present action. Secondly that type A is conjunctive to indicative forms of Class I, and B often occurs as a variant indicative stein along with stems of Class I, no distinction being drawn between these two present stems in meaning, see \$\$493 ff. How these facts are to be explained is still obscure. Only thus much may be called probable that Type A had originally both indicative and subjunctive meaning (cp. § 489 pp. 47 f. §\$ 578, 910)

Remark Because of the trequency with which these two types (II A and B) are found in the same verb, many scholars, among them Fick and Paul, have supposed that from different persons of the same stem, we have the two stems bhéydh-o- bhéydh-o- and bhudh-o bhudh-é-by levelling originally, they assume, the varying accent produced *bhéydh-o- and bhudh-i- (e g 1st pl *bhéudh-o-mos but 2nd pl *bhéudh-é-te), then, by levelling, we have 2nd pl *bhéudh-i-te beside *bhudh-i-nos beside *bhudh-i-mos beside *bhudh

¹⁾ I here assume that $u\bar{c}\bar{v}$ comes from * $r_{i}c\bar{v}$ and $i\bar{u}l\bar{v}$ from * $r_{i}cul\bar{v}$ But this is not certain for i and u may represent Idg. \bar{i} and u

²⁾ Type B is found distinguishing the acrist sense from other present stems, and not only those of the A type as Skr áchida-t Lat scidi-t (§ 528), but pres. Skr. chinat-ti opt chināc-ta Lat scindā

*bhéydh-o-mos following *bhudh-é-te, and so on. 1) This must have happened, if it did happen, in the procthnic language, because even then the type *bhudhó- had become associated with acristic action, and *bhéydho- with the meaning of the conjunctive

The same double forms are seen in Class XIII (as Gr δήλομαι: βιόλομαι, § 607), and Class XXVI (as O.H.G. wn k(i)u Goth. vaúrhju, § 705). What may be the cause of the difference is no less dark in these than in the other.

§ 514. Class II A. the Root Syllable accented and in the strong Grade. Some forms are used as both indicative and conjunctive, as. indic. Skr áy-a-tē Lat eō eunt. conj. Skr áy-a-ti áy-a-t (beside indic t-ti), see § 493 ff Here we confine ourselves to o-forms with indicative meaning

§ 525 Many forms of this class have in Sanskrit the accent of II A as $d\acute{a}\acute{s}-a-ti$ [$'de\^{n}\acute{k}-$, $g\acute{i}r-\bar{a}mi$ beside $gir-\acute{a}mi$ (§ 523 p 86), $bh\acute{u}v-a-t$ (p 86) $h\acute{r}p-a-t\bar{e}$ 'laments'. Compare § 516 page 82.

§ 526. Armenian. mal-em 'I crush, shatter' \(\sqrt{mel} \):
Lat. mol-o etc., see § 523 p. 86. barj-r. 'I raised' (pres. barnam for *barj-na-m) Skr. byh-a-ti 'strengthens, lifts up', \(\sqrt{bhergh} \)-. e-git 'he found' (pres. gt-anem) · Skr. á-vid-a-t etc., see § 523 p. 87 e-lik 'he left' (pres lk-anem): Gr. è-λιπ-ο-ν inf λιπ-εῖr, \(\sqrt{leq} \)-. e-tuk 'he spewed' (pres. tk-anem).

Greek Here the original distinction of accent between II A and II B is seen in the infinitive, but hardly anywhere else, e. g λείπ-ειν λιπ-ιῖν (cp. I § 676 Rem. 1 p 541) But in Greek this distinction was seized upon and connected with the distinction between present and agrist, so much so. that when verbs of II A were used as aorists, or verbs of II B for the present, their accent was changed, thus we have γεν-ί-σθαι, not γέν-ε-σθαι (see § 518 p 83), and γράφ-ε-σθαι $\gamma\lambda \dot{\nu}q - \epsilon - \sigma\theta\alpha i$ instead of * $\gamma\rho\alpha\phi - \dot{\epsilon} - \sigma\theta\alpha i$ and $\gamma\gamma\lambda\nu q - \dot{\epsilon} - \sigma\theta\alpha i$ (cp. § 775) Rem.) In the finite verb, the original accent of II B remained in a few imperatives like 10-t, see § 958. It is difficult to judge whether the old accent remains in words whose root has ceased to form a separate syllable, as 3rd sing σχ-έ-το conj σχ-ω from V segh-, because the accent must rest on this syllable in any case (cp. I § 676 Rem. 1 p. 543)

Remark 1 The same cause which changed * conver younger to younger and yearpen, acted upon all other classes of thematic stems where the thematic vowel originally carried the accent, causing a change of accent whenever these stems were used as imperfect-presents. Thus we have δάκνων instead of *δων-νώι ep Skr gy-nά-ta (§ 611), τίτωι instead of *τινώι *τιν Γώι cp. Skr 1-11 ά-ti (§ 652), ισνωι instead of *λονών *Γιν-σκώι cp Skr 2-chá-ti (§ 673), βαίνωι instead of *βαικόι *βαι-μών cp. Skr -qam--yá-tē (§ 713), ἄττων instead of *ἀττώι * fai-fiz-iώι cp Skr. vē-vi)-yá-tē (§ 730), $lair\omega v$ instead of $*l(\sigma)-\alpha i-t\omega i$ op Skr $i\xi$ -an-y\(\delta\-i\) (§ 743) This applies to all denominative verbs (Class XXXI), as ogaw, ogo, polem ตุเรียง) rorlor สุรักษ์แท อากแสเลย สิทุร์กิโดง instead of "บ์อุลเดง *ตุเรียง etc. compare Skr. prtana-yá-ti vasna-yáti azati-yá-ti gatu-yá-ti vyšan-yá-ti udhvar-ya-ti. For these denominatives another fact has to be taken into In proethnic Greek, verbs in -+w like gulton had become indistinguishable from verbs of Class XXXII, in $-\dot{e}_l\bar{v}$, as $\varphi_{o\varrho\dot{e}\omega}=8kr$ bhāráyāmı (§ 801), and even before the accent was seized upon to help in distinguishing addist from present, *quision may have become quision by analogy of $\varphi \circ \varrho \in \omega_1$, and then the verbal nouns of other denominative classes may have been drawn into the same circle of attraction

'-πταρ-ο-ν 'I sneezed' πταρ-εῖν from \sqrt{pster} -. ε-βαλ-ο-ν 'I threw' βαλ-εῖν from \sqrt{gel} -. ι -πλ-: ι -πλ-ε-το 'versabatur' from

Observe that the circumflex of these contracted nom sing. masc forms, δρῶν φιλῶν, supports the theory of a change of accent here set forth. The old accentuation of the thematic vowel would have produced *δρών *φιλών like ἐστώ; for ἐσταώ,

√qel-. ¿-ταμ-ο-r 'I cut' ταμ-εῖr from √ tem-. ¿-θαν-ο-ν 'I died' Fav-εiv instead of *qar-, beside ε-θενο-ν from V ghen- (I § 429 Rem. 1 p. 317) Russ žnu 'I cut off' for *qŭn-a, see § 534. ε-πταν-ο-ν 'l killed' εταν-είν from ετεν-, beside 1st pl. ε-ετα-μεν Class I § 502 p 64. av-olym 'I open' for *6-Fig-m, ep Hom. ol-iγ-νυ-ντο and Lesb. int o-είγ-ιν (§ 643) ε-πι-ο-ν 'I drank' πι-είν beside nī-91 Class I, Mi-m 'I hear' beside Mī-91 Class I, § 498 p. 59 (cp. W Schulze, Kuhn's Zeitsehr. xxix 240), it is not certain, I freely admit, that these stems in -i-o- and -v-o- are rightly classed here, see the Remark. Boun-eir govieral (grasp') Hesych. Skr mrś-ά-ti 'touches, grasps'. γοάφ-το 'I scratch in. incise, write'. V gerph- (A.S. ceorfan 'cut, carve' Mid.H.G herben to notch, indent' kerre 'a notch') Dor τράπ-ω 'I turn' (Att τρέπ-ω II A), Att ε-τοαπ-ο-ν τραπ-είν. κάρη-ω 'I dry up, wither', beside Lith skreb-iù 'I grow dry' 5-701-0-1 'sounded, cried, spoke λαι-είν: Lat loqu-or (cp Bartholomae, Bezz. Beitr. xvii 121). έ-παθ-ο-ν 'I experienced' παθ-εῖν beside πένθ-ος ε-πίθ-ε-νο 'he obeyed, listened to' πιθ-ί-σθαι, V bheidh-, on Goth us-bida (Romans 9. 3), see § 722 iv-i-ana 'to arrive' beside pres. Iv-m. έ-στιχ-ο-ν 'I climbed, went' στιχ-είν, V steigh-. γλύφ-ω 'I dig in. engrave meise'. A.S cluf-e 'I cleave, split' (O.H G. chlaub-u. II A); on Lat. $gl\bar{u}b$ - \bar{o} see § 529 $i-\pi v'\theta$ - ϵ -ro 'he learnt' $\pi v \theta$ - ϵ --σθαι· Skr 3rd pl budh-á-nta, Vbhendh- (§ 513 p. 79). ηλιθ-o-r aor 'l came' beside fut. ελείσομαι νίθ-ε 'he hid' beside 1209-10. 1-0x-0-v 'he held, had' 17-27v, beside 1x-00. √ segh-. i-πτ-ε-το 'he flew' πτ-έ-σθαι beside πέτ-ε-ται Partie μαλ-ών 'bleating, crying' beside μηνάσιαι.

With the secondary ending of the 2^{nd} sing middle $i-\sigma/-i-9\eta_5$ beside $i-\sigma/-i-10$, $i\varrho i \partial \eta_5$ significantly is i-i-10, $i\varrho i \partial \eta_5$ significantly in experimental types which produced the whole series of acrists in $-9\eta r$, is of course doubtful, $-th\bar{e}s$ seems originally to have belonged only to non-thematic stems (§ 1047.2).

Remark 2. It is hard to classify forms in $-i\omega - i\omega - \nu$ and $-\nu\omega - \nu \omega - \nu$, along with which forms in $\bar{\imath}$ and $\bar{\nu}$ are common. There is nothing a prior;

against assuming that these have the suffix -10- (Class XXVI), and that -ir fell out between vowels, indeed, this must be done for forms like Lesb quíw (I § 130 p 118) níoum niémer beside níom énior may be ıllustrated by Skr. pī-yά-tē, θέω beside θέω by Skr dhū-yá-tē, λίω beside λύω by O.Icel lỹ-ju 'destroy, crush' (see § 707, and Osthoff, M U. IV 12 ff). But ī and ō may come from forms of Class I, by presents passing from this class into the thematic conjugation, op for example mī-i-µev thematic and $\tau \tilde{\iota} = 9\iota$ non-thematic, $l \tilde{\iota} \omega$ thematic and $l \tilde{\upsilon} = \tau o$ not (also $l \tilde{\upsilon} = \tau o$, for λίω cp. Lat /uo so-luo so-luo, ω-ριω 'I roar' (also valiant ωρύω, cp. Skr. ruv-á-ti) but Skr opt i ū-yū-t (Lat. rū-mor Goth. i ū-na) Then these 7- and 7-forms would naturally be compared with ogotto beside og-100, $F_{-\mu\sigma}/\sigma_{-\nu}$ beside $F_{-\beta}/\sigma_{\nu}$, and other such, see § 497 p. 57 Another possibility is that the long vowel came in by analogy of other tenses, λίω tollowing $\partial \vec{v}$ -ων, $\partial \vec{v}$ ω following $\partial \vec{v}$ -σω, just as we see Att γενω (not *γέω) by analogy of γεύ-σω (the Author, Gr. Gr. 2 p 31), and Lesb. αδικήει (instead of adirect) by analogy of adirection (§ 775).

§ 528. Italic. Lat vol-ō vol-u-nt, √ yel-, see § 493 p. 51. mol-\(\bar{o}\) Armen malem etc., see § 523 p 86 () Lat., \sqrt{tel} . -b\overline{o}, future ending, for *bhy-\overline{o}, see § 523 pp. 86 f. $lu-\bar{o}$ so- $lu\bar{o}$ so- $lu\bar{o}$. cp. (ir. $\lambda \dot{v}$ - ω 'I loose' § 527 Rem. doubtless for *cors-o, ep ac-cerso \$ 662. nivit (O Lat.) for *nigv-i-t (with variant ningu-i-t, Class XVI) Gr. vig-e it snows (also veig-ci, II A), O.Ir snigid 'it drops, rains', V sneigh-. 1) dī-vidō (Umbr vetu 'dividito' II A, see the Author, Ber. sachs. Ges. Wiss, 1890, p. 211), beside Skr. vidh- 'to become empty of, to lack pres undhá-tē Class XVI rudō · Skr. rud-á-tı, see § 523 p. 87. sūg-ō · O Ir. sūg-im O.H G. sūg-u A.S. sūz-e sūc-e () ('.Sl sŭsa 'I suck', we must suppose a root seukor seig-.2) Lat. Osc s-u-m Lat. s-u-mus s-u-nt, Ves-, sec § 523 p. 87 co-inquō probably for *-in-squō, beside secare. pac-i-t O.I.at. (beside pang-ō Class XVI), √pāk- pāĝ-; tag-i-t ().Lat. (beside tang-ō Class XVI), ep. te-tigi-t Gr τε-ταγ-ών 'grasping' Class VI (§ 564).

¹⁾ Since only the 3rd sing *nivit* occurs, there is the possibility of its being a denominative $m\bar{n}e$ (Thurneysen, Über die Herkunft und Bildung der lat. Verba auf $-i\bar{v}$, p. 8).

²⁾ The vieq-, discussed by Osthoff in Paul-Braune's Beitr. viii 279 f, must be kept quite distinct.

Then again, it is probable the 3rd sing and 1st pl of certain Latin perfects, which were originally thematic aorists, belong to this class of forms tuli-tuli-mus, see tulo above. fidi-tidi-mus Skr. opt. bhidēy-am beside á-bhēt 'he split'. scidi-t scidi-mus. Skr. á-chid-a-t 'he cut off'. Compare § 867

§ 529. In Italic it is often doubtful whether a verb belongs to II A or II B, as in the following instances. Lat oc-culo, which may represent either *-celo (cp O Ir. cel-im O.H.G. hil-u § 520 p 84) or ~-cllo. ad-venat Osc kúm-bened 'convēnit', sec § 523 p 86 Lat. glūb-ō, cp O.H.G. chliubu and A.S. clufe \$ 527, p 90 (cp p. 79 footnote 1, on īcō rūdō) This doubt is most common with verbs in $-u\bar{o}$, because -นo in unaccented position may come from *-ouō (1-euō) กา from $-\alpha y\bar{o}$ (1 § 172 1 p 152). Thus $clu-\bar{o}$ 'I am called, pass for (Gr > \lambda \cong and \rangle \lambda \ell (f) \omega \cong i' ru-\overline{\sigma} \text{`I snatch, tear. carry off,} root up' (Gr. ¿ονω 'pull, draw' O.C Sl. rŭv-e-tŭ 'evellit' and Skr ráv-a-ti 'he dashes to pieces'), nu-ō (Skr náv-a-tē 'moves'), clu-ō 'I purify' (Ski śruv-a-ti 'melts'), in-gruo (Litt griūiù 'I break down' § 535), plu-1-t (cp. plovē-bat § 514 p 80) Lastly, some verbs may belong to the go-class, as suo ep Goth siu-ja etc. § 707

The quality of the thematic vowel should be § 530. observed in the 1st pl. sumus simus (possumus possimus), volumus volimus, quaesumus as contrasted with ferimus etc. In these u and a are used to represent a sound between the two (as in magnificus magnificus, maximus maximus), which was here the regular descendant of Idg. -o- (cp (4r φέρ-ο-μεν). The assumption that -i- in leg-i-mus is due to the analogy of leg-i-tis, and replaced u i, is not supported by ferimus beside fertis as compared with rolumus: vultis. sumus must in time have got a distinct u (by analogy of sum and sunt, where u is regular for o in a closed syllable), for the Romance languages show sometimes a form which must come from sumus (Span. Port. somos etc.), sometimes one which must come from simus (Roumanian senni etc.) On the whole subject see L. Havet, Mém. Soc. Ling. vi 26 f.

§ 581. Keltic. Compare the general remarks in the beginning of \$ 520, on page 84, whence it follows that some of the examples here given may really belong to the go-class (\$ 719).

O.Ir marim 'I remain' (also conjugated in the ā-class), ground-form *smrr-ō V smer-. ud-gaur 'convenio' for-con-gur 'I command', ground-form *grr-ō, cp. Skr. gir- 'voice'. Mod. Cymr. malaf 'I grind, grind to powder' V mel-: Armen. malem etc., sec § 523 p. 86).') Mid Ir. blegaim 'I milk': Skr. mr/-á-ti etc., see § 523 p 87. O.Ir dligim 'I earn, have a claim', cp. Goth. dulg-s 'debt, guilt'. ar-fiuch 'I fight' for *uikō, cp. O.H.G. upar-wihit § 532. nigim 'I wash' do-fo-nig -nuch 'I wash off', cp Gr. viçw 'I wet, wash', Class XXVI, V neig-snigi-d 'it drops, rains': O.Lat. nivi-t § 528 p. 91.

§ 532. Germanic. In pr. Germanic the accent still lay upon the thematic vowel, which is proved by a number of forms like O.Icel. veg as contrasted with Goth. veiha from V veig- (§ 513 p 79). Also the West-Germ. ending of the 2nd sing. O.H G. -is A.S. -es as contrasted with Norse -r (for -z), and the A.S. ending of the 3rd sing. -ed, which point to pr. Germ. *-i-si and *i-pi, are in some cases to be referred to verbs which in pr. Germ. belonged to Class II B; see § 990. 1. § 998. 1.

Goth. skulun O.H.G. scolan 'to owe', partic. Goth. skulands O.H.G. scolant-i (indic. skal). 2) Lith. skylü 'fall in debt' instead of *skil-ù (§ 535), V skel- in Lith. skelù (i. e. *skel-jù 'I owe something'. Goth. vulands 'seething, boiling', cp. O.H.G. walm 'heat, glow'. O.H.G. cum-u O.Icel. kom kem (inf. koma) 'I come'. Skr. opt. gam-é-t, V gem-, see § 523 p. 86. Goth. § 535. In Lithuanian, i and u in the root syllable were often lengthened. skylù 'I fall in debt' instead of *skil-ù, compare Goth. skulan, see § 532 p. 93; kylù 'I raise myself' instead of *kil-ù, V qel-, siyrù 'I get the better' instead of *svir-ù, V suer- griūvù 'I break down' instead of *griuv-ù: Lat. in-gruō, see § 529 p. 92; blūvù 'I break out into bellowing or bleating' klūvù 'I stick fast to anything, hang on to' beside O.C.Sl. bljīv-e-tū kljīv-e-tū, see § 534 p. 95. See Leskien. Arch. slav. Phil. v 530, and Wiedemann, Lit. Prat. 71 ff., where the pretty conjecture is offered that on the analogy of pairs of forms like pres. gyjù (gy-jù): pret. gijaū (gij-aū), a present skylù was formed for skilaū, a present griūvù for griuvaū, and so forth.

In Slavonic, it is often doubtful whether a verb belongs to A or B This is the case with pij-e-ti 'drinks', bij-e-ti 'strikes', whose -i- may be orig. -ii- or orig. -ei- (I § 68 p. 60); cp. Leskien as above cited, pp. 501 ff., Skr. pay-a- $t\bar{e}$ supports the derivation of pij-e- $t\bar{u}$ from pei-e-ti (§ 522 p. 85). The same doubt meets us in forms with -e- in the root syllable, since this may be orig. either -i- or -en-, e. g. pei-e- $t\bar{u}$ 'wanders' from pei- $t\bar{u}$ belefied. (see § 532 p. 94); cp. pei-e- $t\bar{u}$ 'bends', § 637.

Class III.

Reduplication ending in -t or -t + simple Root forming the Present Stem.

§ 536. We begin with words from roots containing i or u, which have the same vowel in the reduplication; see § 469, page 14. Next follow stems which have i in the reduplication, but some other vowel in the root; see § 473 pages 17 ff.

Class IV, non-thematic, bears the same relation to this as Class II to Class I (§ 491 p. 50).

§ 537. Roots with i- and u-vowels. Only in Arvan and Germanic.

Pr. Idg. *bhi-bhág-mi 'I quake, am afraid' 1st pl. *bhi-bhi--més 3rd pl. *bhi-bhz-nti: Skr. bi-bhé-mi 3rd dual bi-bhi-tas bi-bhī-tas 3rd pl. bi-bhy-ati, and O.H.G. bi-bē-m, which fell under the influence of verbs in which -ēm was a suffix, and so lost the gradation of its stem 1) Conjunctive: Skr. bī-bhay--a-t. Optative: Skr. bi-bhi-yā-t. — With thematic vowel Skr. 3rd sing. bi-bhy-a-ti.

Aryan. Skr. ci-ké-mi 'I observe, notice' 3rd sing. imper. mid. ci-ki-tām 2nd sing. imper. act. ci-kī-hi; conj. Avest. ci--kay-a-b. Skr. \acute{a} - $d\bar{\imath}$ - $dh\bar{e}$ -t 'he looked' 1st pl. $d\bar{\imath}$ -dhi-mas mid. pres. dt-dhy-ë pret. á-dt-dhī-ta; conj. dī-dhay-a-t. Skr. á-dt- $-d\bar{e}$ -t 'he appeared' 3^{rd} pl. $d\bar{\iota}$ -dy-ati imper. $d\bar{\iota}$ -di-hi; conj. dt-day-a-t; — with thematic vowel Gr. δί-ζ-ο-μαι 'I seek, strive' (orig 'look out for something') for *δι-δι-ο-μαι (see § 469 p. 14, § 549). Skr. $d\bar{\imath}$ - and $dh\bar{\imath}$ - both became $d\bar{\imath}$ - in Avestic cp. Avest. dađāiti = Skr. dádhāti and dádāti, § 540): di-đaeiti; - with thematic vowel imper. di-dy-a, cp. conj. di-dy-a-b. Skr. vi-vēš-ti 'works' 1st pl. vi-viš-mas, conj. 2nd sing. vi-vēš-a-s. uy-ē-ti 'goes' only found in the 2nd sing. pret. āiy-ē-š, Avest. 3^{rd} pl. conj. yeyqn = Ar. *iy-ay-a-n (§ 473 p. 19).

¹⁾ Cp. § 465 p 12, § 469 p. 14, § 739 on O.H.G. rērēm and Goth. resra.

⁷

Skr. $\jmath u$ - $h \bar{o}$ -m i I offer, sacrifice' 1^{st} pl. $\jmath u$ -h u- $m \acute{a}s$ 3^{rd} pl. $\jmath u$ -h v- $a \iota \iota$, conj. 2^{nd} pl. $\jmath u$ -h a v-a-a-t h a, opt. 1^{st} pl. $\jmath u$ -h u- $u \acute{a}s \iota$ from $h \bar{u}$ - 'call'. 3^{rd} pl. $s \iota \iota$ -s v- $a \iota \iota$ from s u-'press'.

Sometimes a strong stem has got into the place of the weak (cp. § 499 p. 62), as Avest. 2^{nd} sing. mid. n-yae-ša from j- 'live', Skr. 2^{nd} pl. ju- $h\dot{o}$ -ta from hu- 'offer, sacrifice', 2^{nd} sing. yu- $y\bar{o}$ -dhi 2^{nd} dual yu- $y\bar{o}$ -tam from yu- 'keep off'.

Remark. k in Skr. c_1 - $k\acute{e}$ - m_1 ($\sqrt{qe_2}$ -), and γ in Avest. γ_1 - γ_4 e- δ_4 ($\sqrt{ge_2}$ -) are taken from the perfect, where they were regular before o in the sing. indic active (I § 445 ff pp. 331 ff.) In considering γ_1 - γ_2 - γ_3 - γ_4 - γ_4 - γ_5 (§ 540), if its root belonged to the e-series, we must remember that one of the stems of this verb is γ_1 - γ_2 - γ_3 - γ_4 (§ 560)

§ 538. Roots with other Vowels.

In Aryan, roots with a long a-vowel have generally in the reduplication a = Idg e instead of i, when the weak stem in the root syllable had not \bar{i} Examples: Skr. $d\hat{a}$ - $d\bar{a}$ - $t\hat{i}$ mid. da-t- $t\hat{e}$ from $\sqrt{d\bar{o}}$ - 'give', $j\hat{a}$ - $h\bar{a}$ -ti pl ja- $h\hat{i}$ -mas from Ar $\hat{z}h\bar{a}$ -'leave, give up'. But on the contrary \hat{s}_i - $\hat{s}\bar{a}$ -ti imper. \hat{s}_i - $\hat{s}\bar{i}$ -hi mid. \hat{s}_i - \hat{s}_i - $t\bar{e}$ from $\sqrt{h\bar{o}}$ - 'whet, sharpen'. In the latter word we see the Idg. root-determinative \bar{i} , which so often forced its way into the place of Ar. $i = \text{Idg. } \hat{o}$ (see § 498 pp. 61 f.); and this \bar{i} is regularly echoed by i in the reduplicator; compare \hat{s}_i - \hat{s}_i -hi with di- $d\bar{i}$ -hi from $d\bar{i}$ - 'appear'. Skr. ja- $h\bar{i}$ -tam beside regular ja-hi-tam (see Whitney, Sanskrit Roots, p. 204) has been altered by the influence of the mid. ji- $h\bar{i}$ - $t\bar{e}$ (§ 540), similarly ra- $r\bar{i}$ -dhvam by that of ri- $r\bar{i}$ -hi ($r\bar{a}$ - 'give').

So too the $\bigvee dh\bar{e}$ - 'place' in Balto-Slavonic reduplicates with e, as Lith. 2^{nd} pl. $d\hat{e}$ -ste like O.H.G. da-tth \hat{a} .

These forms with e belong to Class V, not like Gr. δi - $\delta \omega \mu \iota$ ϵi - $\Im \eta \mu$ etc. It seems to me impossible to decide whether in ldg. the same present stem had both i and e in its reduplicated forms, as *dhi- $dh\bar{e}$ -ti and *dhe- $dh\bar{e}$ -ti, or whether e only came in by analogy of Class V, and is of later date than the parent language. If the latter, then the influence of perfects with e in the reduplicator must by taken into account (§ 555).

Compare Gr. $\hbar \lambda \alpha \vartheta_i = *\sigma_i - \sigma \lambda \alpha - \vartheta_i$ and Lesb. $\hbar \lambda \lambda \alpha \vartheta_i = *\sigma_i - \sigma \lambda \alpha - \vartheta_i \S 542$.

Under these circumstances, I cite Aryan and Balto-Slavonic forms both in Class III and Class V

*pi-pel-mi 'I fill' · Skr. pi-par-mi pi-pr- $m\acute{a}s$, Gr. $-\pi i$ - $\pi \lambda \alpha$ - $\mu \epsilon \nu$ (on the singular $-\pi i$ - $\pi \lambda \eta$ - μ , see § 542). — With thematic vowel Skr. 3^{rd} sing. mid. \acute{a} -pi-pr-a-ta.

*ni-nes-mn from √nes- 'go towards' (Gr. νέ-ο-μω Skr. nás-α-tē): Skr. 3rd pl. mid. nís-atē 'they touch their bodies, kiss' partic. nís-āna-s. — Gr. νίσομω 'I go back, return' for *νι-νσ-μομω (the Author, Gr. Gr. § 45.5 p. 61) contains a stem 'νι-νσ- or *νι-νσ-ο (see § 733).

*dhi-dhē-m 'I place' 1st pl. *dhi-dh-més and doubtless *dhi-dh>-més 1) 3rd pl *dhi-dh-ntı: Skr. dá-dhā-mi da-dh-más (cp. 2nd pl. mid. da-dhi-dhvē) dá-dh-ati, Gr. τί-θη-μι τί-θε-μεν, O.H.G. te-ta O Sax. de-da perhaps for *dhi-dhē- (§§ 545, 886), Lith 2nd pl. dèste i. e *de-d+te. Optative: Skr. da-dh-yā-t. — With thematic vowel Skr. dá-dh-a-ti Lith. de-d-ù.

*si-sē-mi I send forth, let go, throw, sow' 1st pl. *si-s-més and doubtless *si-sə-més · Gr. \vec{i} - η - μ i \vec{i} - ϵ - μ e ν (Lat. serimus for *si-sa-mos? § 543). — With thematic vowel Lat. ser \bar{o} for *si-s- \bar{o}

*di-dō-mi 'I give' 1st pl. *di-d-més and doubtless *di-do-més, 3rd pl. *di-d-nti· Skr. dá-dā-mi da-d-más dá-d-ati, Gr. δί-δω-μι δί-δο-μεν, 2nd pl. Lith. důste and O.C.Sl. daste instead of *deste (§ 546). Optative· Skr. dα-d-yά-t. — With thematic

7*

¹⁾ This form may be due to the analogy of dho-mé(m), cp. \(\xi-9\varphi-\nu\rho\rho\).

But it does not follow, as some have said, that the form cannot be original.

vowel Skr. dá-d-a-ti Sabell. (Vest.) di-d-e-t 'dat', cp. Lith. Lett. dådu and O.C.Sl. partic. dady gen. dadqšta § 546.

*si-stā-mı 'I place, sısto'. Gr. Ἰ-στη-μι Ἰ-στα-μεν, O H.G. se-stō-m. Skr 1st sing. ti-šthāmi may be added, and perhaps Lat. sıstimus (§ 543). — With thematic vowel Skr. ti-šth-a-ti Lat. sı-st-ō Umbr. se-st-u.

Idg. *pr-po-mi 'I drink' is implied by such forms as Skr. mid. 3rd pl. pi-p-atē partic. pi-p-aná-s; to this may be referred Falisc. pipafo 'bibam' (§ 594 Rem.) With thematic vowel Skr. pi-b-a-ti Lat. bibō instead of *pi-b-ō O.Ir. 3rd sing. ibid for *pi-b-e-ti, although the -b- of these words is certainly obscure (cp. I § 325 p. 263). Perhaps the 2nd sing. imper. *pi-b-dhi and 2nd pl. mid. 'pi-b-dhu-, forms which must have had a place among the original non-thematic persons, caused some confusion in the sound. 1) In these -b- was regular, because -p- had been assimilated to the following voiced sound. On the same principle we have explained the variants *deknt-(Skr. dašat-) and delimd- (Gr δεκάδ-), as being due to cases which had a bh-suffix, such as the instr. pl. *dekmd-bhi(s) (II § 123 p. 392). Then p must have levelled out b in the nonthematic conjugation (Skr. pi-p-atē), because this was closely associated with * $p\bar{o}$ -ti (Skr. $p\hat{a}$ -ti), and was especially exposed to the influence of the reduplicated perfect (Skr. pa-p-έ Gr. πέ--πο-μαι). Similarly, Gr. βό-σνω T feed, tend' may be connected with Skr. pá-ti 'tends' through the imperative *b-dhi.

§ 540. Aryan. Skr. ji-ghar-tı 'smells' 3rd pl. ji-ghr-ati, with thematic vowel ji-ghr-a-tı: on gh, see § 537 Rem. p. 98. Skr. ti-tar-tı 'gets over', partıc. ti-tr-at-. Skr. iy-ar-ti, for its reduplication see § 473 p. 19. Skr. 2nd and 3rd sing. dī-dhar 2nd pl. dī-dhī-tā from dhar- 'hold fast'. Skr. imper. pi-pīg-dhī from parc- 'to mix'.

¹⁾ There is no reason that I know of why we should suppose that our prehistoric ancestors had this imperative very often on their lips. But be it remembered that from the one imperative form $d\bar{e}hi$ 'give' in Pali, the whole of the present tense, $d\bar{e}mi$ $d\bar{e}si$ etc., has sprung into existence (E. Kuhn, Beitr. zur Pali-Gramm., 98).

Skr. si-sak-ti Avest. hi-sax-ti, \sqrt{seq} - 'accompany' (cp. Skr 2^{nd} pl. sa-sc-ati, Class V, \S 555). Skr. vi-vak-ti from \sqrt{ueq} - 'speak'. Avest. 2^{nd} pl. mjunct. nista = *nista i. e. *ni-nd+ta from nad- 'roar, abuse'; — with thematic vowel Skr. 3^{rd} sing. ni-nd-a-ti \S 550. Avest. 3^{rd} sing. mjunct. di-das from das- 'consecrate, offer up'.

Roots in Ar $-\bar{a}$ reduplicate with i in Sanskrit when the weak forms have $\bar{\imath}$ as root-determinative (§ 538 p. 98). $\[\sqrt{m\bar{e}} \]$ 'measure' mid. $3^{\rm rd}$ sing $mi-m\bar{\imath}-t\bar{v}$ $3^{\rm rd}$ pl. $mi-m-at\bar{e}$; — with thematic vowel opt. $mi-m-\bar{e}-t$. $\[\sqrt{k\bar{o}} \]$ 'sharpen, whet' $\dot{s}i-\dot{s}\bar{a}-ti$ imper. $\dot{s}i-\dot{s}\bar{\imath}-hi$, — with thematic vowel $3^{\rm rd}$ pl. $\dot{s}i-\dot{s}-a-nti$. $ji-h\bar{\imath}-t\bar{e}$ 'yields, departs' $3^{\rm rd}$ pl. $\jmath i-h-at\bar{e}$ beside act. $\jmath a-h\bar{\imath}-ti$ $\jmath a-hi-mas$ ($\jmath a-h\bar{\imath}-tam$ and other forms have $\bar{\imath}$ by analogy of the middle, see § 538 p. 98).

 $V dh\bar{e}$ - 'place' and $V d\bar{v}$ - 'give' (almost indistinguishable in Iranian, because of the change of dh to d, I § 481 p 355): Skr. dá-dhā-ti dá-dā-ti Avest. da-đā-iti O Pers. pret. a-da-dā. 1st pl. Skr da-dh-más da-d-más Avest. da-đ-mahi, in the Gathas da-de-mahī, mid 3rd sing. Skr dhatté Avest. dazdē from dhē- (I § 482 Rem. 1 p. 356), Skr. datté Avest. dastē from do-. Imperative Skr. dhēhí for pr. Ar *dha-z-dhi from dhē-, and dēhi for pr. Ar. *da-z-dhi from dō-, Avest. da-z-di; Skr. has also the re-formate daddhi instead of dhēhi and of dēhi both (I § 476 p. 351, § 482 Rem. 1. p. 356). In Skr. we also find da-dhi- (cp. Gr. τι-θε-), e. g. da-dhi-dhvé da-dhi--švá beside dha-d-dhvē dha-t-sva. 3rd pl. Skr. dá-dh-atı dá-dh--atē dá-d-atī dá-d-atē (Avest. da-ħ-entī da-d-entē, cp. § 500 p. 63, § 1018. 1. b). Optative: Skr. da-dh-ya-t da-d-ya-t Avest. Gath. daidyā-p. — With thematic vowel dá-dh-a-ti $d\acute{a}$ -dh-a- $t\bar{e}$ $d\acute{a}$ -d-a-ti $d\acute{a}$ -d-a- $t\bar{e}$, Avest. da- \bar{p} -a-iti da- \bar{p} -a- $it\bar{e}$, which forms are also conjunctive (§§ 931 f.)

§ 541. Confusion of Strong and Weak Stem

Weak instead of Strong: Skr. Ep. da-d-mi Avest. 3^{rd} sing. $dazd\bar{\imath}$ ($\checkmark dh\bar{e}$ -) and dasti. These forms are due to the analogy

of $\acute{o}d$ -mi $\acute{a}t$ -ti and the like, the reduplication having been lost sight of in the (pr. Ar) forms *dhadh-mas(i) *dad-mas(i) opt. *dhadh- $y\ddot{a}$ - *dad- $y\ddot{a}$ - conj. *dhadh-a- *dad-a-, which were conceived to be simple roots (cp. the end of § 540). This also produced the forms Skr. pass. dad- $y\acute{a}$ - $t\ddot{e}$ partic. dat- $t\acute{a}$ - $t\ddot{a}$ - from $\bigvee d\ddot{o}$ -, and Avest. inf $dast\ddot{e}$ from $\bigvee d\ddot{o}$ - and inf. $dazd\ddot{e}$ from $\bigvee dh\ddot{e}$ - (cp. Bartholomae, Ar. Forsch. III 48).

§ 542. Greek. From roots ending m -r and -l we have only the weak stem, the strong forms following Class XI. Thus - πi - $\pi \lambda \alpha$ - $\mu \epsilon \nu$ 'we fill' - πi - $\pi \lambda \alpha$ - $\tau \alpha \iota$: Skr. pr-pr- $m \acute{a}s$; * πi - $p \alpha$ - $\mu \epsilon \nu$ 'we bring': Skr. bi-bh r- $m \acute{a}s$ (§ 539, p. 99). But - πi - $\pi \lambda \eta$ - $\mu \iota$ instead of * $\pi \iota$ - $\pi \epsilon \lambda$ - $\mu \iota$ from the stem *p l- \bar{e} -, cp. unreduplicated Skr. $pr \acute{a}$ -si \acute{a} - $pr \bar{u}$ -t Gr. $\pi \lambda \tilde{\eta}$ - τo Lat. im- $p l \bar{e}$ -t u r. - πl - $\eta \alpha \iota$ - $\mu \epsilon \nu$ 'we kindle', sing. - πi - $\pi \varrho \eta$ - $\mu \iota$, $\checkmark per$ - (Mod Slov. $per \bar{e}t \iota$ 'moulder' O.C Sl. para 'steam'). The nasal in $\pi \iota \mu$ - $\pi \lambda \mu \iota \epsilon \nu$ $\pi \iota \mu$ - $\pi \rho \alpha \mu \epsilon \nu$ comes from $\pi \iota \mu \pi \lambda \dot{a} \nu \omega$, see § 621. $i \lambda a \vartheta \iota$ 'be gracious' $i \lambda a \tau \epsilon$ $i \lambda a \mu u$ for * $\sigma \iota$ - $\sigma \lambda a$ - ι (I § 565 p. 422), \checkmark sel-, cp. Lesb. $i \lambda \lambda a$ - $\vartheta \iota$ for * $\sigma \epsilon$ - $\sigma \lambda a$ - $\vartheta \iota$, Class V.

 $\tau i - \vartheta \eta - \mu \iota$ 'I place' $\tau i - \vartheta \varepsilon - \mu \varepsilon \nu$ $\tau i - \vartheta \varepsilon - \tau \alpha \iota$, ' $\ell - \eta - \mu \iota$ 'I send forth' for *σι-ση-μι "-ε-μεν "-ε-ται, δί-δω-μι 'I give' δί-δο-μεν δί-δο-ται, "-στη-μι 'I place' "-στα-μεν "-στα-ται, see § 539 p. 100. Hom. $3^{\rm rd}$ sing. δi - $\delta \eta$ imper. $3^{\rm rd}$ sing. δi - $\delta \dot{\epsilon}$ - $\nu \tau \omega \nu$ from $\sqrt{d\bar{\epsilon}}$ - 'bind'. In the stems $\tau_i - \vartheta \varepsilon - i - \varepsilon - \vartheta_i - \vartheta \varepsilon - \vartheta_i - \vartheta \sigma_i$, ε and σ have taken the place of a previous $u = \text{Idg. } \theta$, as in $\ddot{\epsilon} - \theta \epsilon - \mu \epsilon \nu \ \ddot{\epsilon} - \delta \theta - \mu \epsilon \nu \ \S \ 493$ p. 53, and in τέ-θε-ται δέ-δο-ται § 856: cp. Skr. da-dhi-dhvé 1a-hi-mas. The loss of forms without 2, answering to the Skr. da-dh-más etc., is a consequence of the different forms which some of the persons of this tense assumed in due course; we should have by rule *τιθμεν *θιστε, *διδμεν *διστε, *τμεν *ίστε. 3rd pl. Dor. τίθεντι δίδοντι instead of *τι-θ-ατι *δι-δ-ατι, see § 1020. Sometimes the strong stem prevails, or words follow the analogy of Classes X and XI: Hom. partic. τι-θή-μενο-ς instead of $\tau \iota - \vartheta \dot{\epsilon} - \mu \epsilon \nu o - \varsigma$, imper. $\vartheta \dot{\iota} - \vartheta \iota \omega - \vartheta \iota$ (like Pali $da - d\bar{a} - hi$). On the analogy of verbs in - εω - οω - αω: pres. τιθεῖ διδοῖ, imperf. ειίθει ξείδου, imper. τίθει δίδου ίστα, inf. τιθεῖν συν-ιείν, partic. Delph. διθέουσαι; and then again έτίθεις -ει and

less -ει produced the 1st sing. ἐτίθειν and lesν after the model of μ'ειν 'I went' as compared with μ'εις μ'ει.

As regards visoqua beside Skr. 3rd pl nis-atē, see § 539 p. 99, § 733

- § 543. Italic. There are no forms at all which can be certainly placed in this class. The conjugation was thematic, that of Class IV; as 1st sing. Lat si-st-ō Umbr. se-st-u. However, as we must regard red-dimus red-ditis, notwithstanding reddunt, as descended from *red-dāmus *red-dātis (§ 505, p. 71), so we may regard sermus seritis, sistimus sistitis as derived regularly from *si-sā-mos *si-sā-tes (Gr. ?-ε-μεν -τε), *si-stā-mos -tes (Gr ?-στα-μεν -τε)
- § 544. Keltic The thematic type is seen in O.Ir. i-b-i-d (§ 554), and the extension with -io- in -airissiur (§ 733).

ā-conjunctives are the future Mid Ir gignid nascetur' for *gi-gen-ā-ti, O.Ir. fo-didmae 'patieus' 3rd pl fo-didmat (from pres. fo-daim 'patitur'), see Thurneysen, Kuhn's Zeitschr. xxxi 77 ff. They have the look of conjunctives belonging to thematic Class IV A But probably the conjunctive vowel ā had here taken the place of older -o- -e- (by association with the unreduplicated conj imperf, -genad, and the reduplicated conjunctive of Class IV B or Class VI, bēra); then the forms will originally have been like Skr. bi-bhar-a-t, and gignid must be closely connected with Avest zī-zan-a-p̄ zī-zan-a-nti Skr. á-jī-jan-a-t (§ 548).

- § 545. Germanic O.H.G. se-stō-m 'sisto, I arrange, design', \sqrt{sta} -, with gradation lost, see § 539 p 100. Whether O.H.G. te-ta O.Sax. de-da 'did' is an imperf like Gr. τ /- $\vartheta \eta \nu$ or an old perfect, remains doubtful, see § 886
- § 546. Balto-Slavonic. A few relics are the presents of $\sqrt{dh\bar{e}}$ -'set, place' and $d\bar{o}$ 'give', but with e in the reduplicator (§ 538 p. 98).

In pr. Balto-Slavonic the forms were *dhe-dh-mi and de-d-mi, which may be compared with Skr. da-d-mi and Avest. dazdī dasti (§ 541 pp. 101 f.). But they did not, as these did, arise only by the weak stem spreading into the singular, but from

this and another cause together; the other cause was, that the 2nd sing middle, which originally had the weak stem, had got an active meaning (see § 991 on Lith. dese-s dissi O.C.Sl. dasi). And since *dhe-dh-mi became *dedmi in pr. Balto-Slav. (I § 549 p. 402), the two verbs were confused in the present, and the same forms served for both (cp. Avest. dadānti = Skr. dádhāti and dádāti, § 540 p. 101).

However, it was only in the meaning of 'I lay' that *dedmi survived for any time. Lith sing. 1^{st} pers. $d\grave{e}mi$ for *dedmi, 2^{nd} reflex. dese-s for *de-t-s\grave{e}-s, 3^{rd} dèsti dèst, 2^{nd} pl. dèste. Now the verb is mostly thematic, $de-d-\grave{u}$ ded\(deda\) deda etc. And d\(emi\) 3^{rd} sing. d\(estimates too took \(e \) from non-present forms d\(estimates a\) destin and the like, just as Gr. Lesb. \(d\(estimates a\) or \(estimates a\) instead of \(d\(estimates a\) follows \(d\(estimates a\) follows (estimates a) and (estimates a) instead of (estimates a) follows (estimates a) follows (estimates a) follows (estimates a) and (estimates a) follows (estimates a) following the 20-class (§ 733).

In the meaning 'I give', *dedmi was changed to *dodmi in pr. Balto-Slavonic by analogy of non-present forms with *do-, There is a reason why the vowel of the root got into *dedmi 'I give' and not into 'dedmi 'pono'. It is that the difference between the vowel of the first syllable of the present and that of the other tenses was in *dedmi 'pono' only one of quantity, but in the other it was a difference of quality also; *dedmi: aor. *dē-s- was backed up by such verbs as *tekō: aor. *tēk-s-(O.C.Sl teka těchu), but there was no parallel for *dedm: aor. * $d\bar{o}$ -s-. Lith. sing. 1st pers. $d\vec{u}mi$, 2nd $d\hat{u}si$ for * $d\hat{u}$ -t-si, 3rd dů'sti dů'st, pl. 1st dů'me, 2nd dů'ste; dů'mi dů'me for *důdmi *důdme. Now generally thematic, $d\hat{u}'du$ etc. (also Lett. duduO.C Sl. dami dasi dastu damu daste dadetu, dami dami have -m- for -dm-. Partic. thematic dady (dadašta) like Lith. dů'dās. As regards 1st dual Lith. dů'va O.C.Sl. davě, see I § 547 p. 401.

Remark. The forms of the 2nd pl. found in old Lith. books, destri(e) and distri(e) instead of deste and distre, were derived from the 3rd sing, and pl on the analogy of tirr-t(e): tirr, to distinguish more clearly 2nd plural from 3rd singular and plural.

Class IV.

Reduplication ending in -7 or -2 + Root + Thematic Vowel, forming the Present Stem.

§ 547. This class, like Class II, falls naturally into two sections, according as the root has the strong or the weak grade. The strong form, as in Class II, is the same as that of the non-thematic Conjunctive. Compare § 513 pp. 78 ff.

§ 548. A. Strong Root Syllable.

In Aryan, this section includes a large class of forms, the Sanskrit Causative Aorist, an aorist formation which generally is found along with the present formed by -\delta ya-(\sqrt{s}\sqrt{795} ff.) As to the varying quantity of the reduplicating vowel, see \sqrt{9473} pp. 17 f.

Skr. 3^{rd} pl. mid $\acute{a}-b\bar{t}-bhay-a-nta$ beside $bi-bh\acute{e}-ti$ 'fears'. Imperative mid. $pi-pr\acute{a}y-a-sia$ beside $\acute{a}-pi-pr\bar{e}-t$ 'he satisfied, pleased'. $\acute{a}-cu-cyav-a-t$ beside 3^{rd} pl. $\acute{a}-cu-cyav-ur$ from cyu-'to move, stir'

Skr. \vec{a} - $t\bar{\imath}$ -tar-a-t Avest t-tar-a-t from Skr t-tar-t 'gets over or beyond' Skr. $p\bar{\imath}$ -par-a-t from p-t-par-t 'fills', \vec{a} - $d\bar{\imath}$ -dhar-a-t beside 2^{nd} and 3^{rd} sing. $d\bar{\imath}$ -dhar from dhar- 'hold fast'. Avest. $b\bar{\imath}$ -bar- $\bar{a}mi$ (cp Skr. conj. 2^{nd} sing. bi-bhar- \bar{a} -si) beside Skr. bi-bhar-mi 'I carry'. Skr a- $j\bar{\imath}$ -jan-a-t 'was born' Avest. $z\bar{\imath}$ -zan-a-t 3^{rd} pl. $z\bar{\imath}$ -zan-a-nti, \sqrt{gen} -.

Skr. \(\alpha-p\overline{\tau}-pat-a-t\), \(\sigma\) pet- 'fly', \(\alpha-s\overline{\ta}-\sigma a-t\), \(\sigma\) sed- 'sit'.

On the Irish conjuntive, used for the future, of which we have an example in *gignid* 'nascetur' for *gi-gen-a-ti, see § 544, page 103

Germanic. Apparently we have a form of this sort in Goth. ren-rái-p 'moves, trembles', connected with Skr. lē-láy-a-ti 'wavers, trembles'; it may come from pr. Germ. *rī-rēṣ-ō (§ 469 p. 14, § 708). But this is not a certainty, because it has not yet been made out to what vowel series the root belongs (in Sanskrit we see a pret. á-lē-lē-t, § 568).

§ 549. B. Weak Root Syllable.

Roots with i- and u- vowels. Avest. imper. di-dy-a (con) di-dy-d-b), Gr δίζομαι for *δι-δι-ο-μαι beside Avest. dicaeti, see § 537 p. 97; δί-ζη-μαι (Class XI) δί-ζ-ο-μαι. Avest. $didaeti = -ni-\pi\lambda\eta-ui$ Skr. $\acute{a}-pi-pr-a-ta$ Skr. $p\acute{a}-par-ti$. ri-qhy-a-ti 'drives on' beside hi-nō-ti Class XVII; gh instead of h (I § 445 p 331, § 454 p 335) answers to k in the 3rd pl ci-ky-att, see § 537 Rem. p 98. Also Skr. aorists such as $(\dot{a}-\dot{s}\dot{n}-\dot{s}r\dot{p}-a-t)$ from $\dot{s}r\dot{r}-\dot{s}r\dot{e}-\dot{s}\dot{r}-\dot{s}r\dot{e}-t)$, $\dot{a}-\dot{c}\dot{i}-\dot{k}\dot{s}\dot{r}\dot{p}-a-t$ from kšip- 'throw', á-rī-riš-a-t from riš- 'take hurt', á-šu-śruv--a-t from śru- 'hear', á-cu-krudh-a-t from krudh- 'grow angry', á-dū-duš-a-t from duš- 'grow bad, go to rack and rum'.

§ 550. Roots with other vowels.

Pr.Idg. *ĝi-ĝn-ō, \(\sigma\) ĝen- 'gignere'. Gr. γί-γν-ο-μαι Lat. qi-qn-ō, cp. *q̂i-q̂en-o- § 548. *si-zil-ō, √ sed- 'sit': Skr. stdati instead of *sīd-a-ti (I § 591 p. 447, § 593 p. 449, compare Bartholomae in Bezz. Beitr. xvii 117), Gr. 7ζω i. e. hizdo (I § 593 p. 449), Lat. sido (I § 594 p. 450) 1) *m-nd-ō 'I scold, blame' beside Skr. nad- 'shriek, roar' Gr. όνοσθε 'ye blame, scold' for ovos- (cp. Avest. 2nd pl. msta = *nísta, § 540 p. 101): Skr. nind-a-ti 'scolds, abuses', with which became associated nid- 'reviling, rebuke' á-nēd-ya-s 'blameless' and other similar words, Gr. "virdo, whence oreidog blame'.2) *si-st-ō, \sqrt{stare} stare' Skr. ti-šth-a-ti Lat. si-st-i-t; *pi-b-e-ti, $\sqrt{p\bar{o}}$ - 'drink'. Skr. pi-b-a-ti Lat. bi-b-i-t O.Ir. i-b-i-d, see § 539 p. 100.

¹⁾ Bechtel does not convince me that I am wrong in supposing the Idg form to be *s₁-zd-ō (Bechtel, Hauptprobl. der Idg. Lautlehre, 254). That aldina comes form alzd- or alsd- 1s unproven. Compare Idg. Forsch. I 171 f.

²⁾ This conjecture (cp. Osthoff, Perf. 394 f, and Bartholomae, Ar Forsch. 11 84, Bezz. Beitr. xvii 116) seems to me more likely than that sugested by others (as Fick, Wtb. I4 96), namely, that Skr. nind-a-ti was formed from a /neid- on the principle of Class XVI. The Skr. re-formation perf. ni-nind-a etc. may be compared with perf. sīd-atur fut. sīd--ı qua-tı beside sid-a-tı.

§ 551. Aryan. Skr. 3rd pl á-bi-bhr-a-n partic. bi-bhr-a-nāna-s from bi-bhar-ti 'bears', cp. Avest. bī-bar-āmı (§ 548 p. 105) Skr. 3rd sıng. á-pi-pr-a-ta from pi-par-ti 'fille'. Skr. pi-ghr-a-ti from ji-ghar-ti 'smells'. Skr. pi-ghn-a-tē from han-strike, slay'. Skr. pi-bd-a-tē 'becomes firm, strong', \sqrt{ped} . Skr. ti-šth-u-ti, Avest. hi-št-a-ıtı O Pers. mid. a-ı-št-a-tā· Lat. sı-st-ō, § 550. Skr. 3rd pl. mi-m-a-ntı from mi-mā-ti 'roars' opt. mi-mī-yā-t.

§ 552. Greek $\gamma i - \gamma \nu - o - \mu a \iota$, see § 550. $\mu i - \mu \nu - \omega$ beside $\mu \dot{\epsilon} \nu - \omega$ 'I remain'. $\ddot{\iota} - \sigma \chi - \omega$ beside $\epsilon \chi - \omega$ (* $\sigma \epsilon \chi - \omega$) 'I hold, have', \sqrt{segh} . $\pi t - \pi \tau - \omega$ 'I fall'; whether $\bar{\iota}$ was original (cp Skr. $\dot{a} - p \bar{\iota} - p a t - a - t$, § 548 p. 105) is very doubtful; see § 473 p. 18. $\tau i \pi \tau \omega$ 'I beget' for * $\tau \iota - \tau \pi - \omega$ beside $\ddot{\epsilon} - \tau \epsilon \pi - o - \nu$, cp. the Author, Gr. Gr. § 62 p. 74 $l \dot{a} \chi \omega$ 'I cry out, shriek' for * $f \iota - f a \chi - \omega$, cp. $\dot{\sigma} \iota \sigma - \eta \chi \dot{\eta} \varsigma$ (cp. W. Schulze, Kuhn's Zeitschr. xxix 230 ff).

On present stems extended by the suffix -10- see § 733.

§ 553. Italic. Lat. gi-gn-ō, see § 550. Lat. sīdō for *si-zd-ō, the second sibilant of which is kept in Umbr. ander-sistu 'intersidito' for *-sizd(e)tō (cp. ander-sesust 'intersederit'): ') Skr sīd-a-ti etc, see § 550 Lat. serō 'I sow' for *si-s-ō, beside Gr. γ-η-ω, § 539 p. 99. Lat. bibō instead of *pi-b-ō: Skr pi-b-a-ti etc, see § 539 p. 100; for the assimilation of p-to -b-, cp. Umbr. řeře 'dedit' instead of *teře (fut. perf. teřust dirsust). Vest. di-d-e-t 'dat' (Pelign. dida 'det' Umbr. dirsa dersa teřa 'det' dirstu teřtu 'dato'), beside Gr. δi-δω-ω, § 539 p. 99. Compare § 871, on Osc. fi-fik-us.

¹⁾ For this explanation of the Umbrian form I have to thank a former pupil, Dr von Planta. See now his dissertation, Vocalismus der osk.-Umbr. Dialekte, Strassburg 1892, pp. 214, 277, and his Grammatik.

§ 554. O.Ir. 1-b-i-d 'bibit' for *pi-b-e-ti. Skr. pi-b-a-ti etc, see § 539 p. 100. As to -arrissim -airissiur 'I stand, remain standing, exist', see § 733.

Futures like do-ber 'I will give' may be also added; they were originally a-conjunctives of this class. See § 565.

Class V.

Reduplication in -e (-v) + simple Root, used for the Present Stem.

§ 555. This class has a very close connexion with the The two are distinguished in the indic. present Perfect. by different personal endings (cp. Skr. 3rd pl. sá-śc-ati: perf. 3rd pl. sa-śc-úr, from \sqrt{seq} - 'be with, accompany'), and in the vocalisation of the singular, as 3rd sing. Idg. *se-seq-ti (Skr. *sa-sak-ti): perf. *se-sog-e (Skr. *sa-sac-a). But there was no difference at all between the Preterite of Class V and the Preterite of the Perfect Class (pluperfect), nor between their Conjunctive, Optative, and Imperative moods. Perhaps there was originally only Class VI, which now appears complementary to the fifth class (Skr. sá-sc-a-ti Gr. εσπ-ο-ι-το), but then had the same relation to the perfect as Class II to I, Class IV to III; and then perhaps the indic. present forms of the fifth class were coined on the analogy of classes I and III.

§ 556. Aryan. Skr. ja-jún-ti (grammarians), Avest. za--zan-ti 'gıgnıt' (Bartholomae, Ar. F II 82); cp. á-jī-jan-a-t zī-zan-a-p § 548 p. 105. Skr. 3rd pl. sá-śc-ati, see § 555; cp. sí-šak-tı § 340 p 100. bá-bhas-ti 'chews, eats' 3rd pl. bá--ps-ati, conj. ba-bhas-a-t. á-ja-kš-ur 'they ate', imper. jagdhi for *ja-gž-dhi, partic. ja-kš-at- from ghas- 'eat' (there is a re-formed 3rd sing. jakši-ti on the lines of Class IX); with thematic vowel ja-kš-a-ti. Partic. já-kš-at- from has- 'laugh'. Avestic ni-šanhasti for *sa-sasti Idg. *se-sed+ti, \sqrt{sed-'sedere'; — perhaps a parallel thematic by-form is Gr. εζομαι i e. ξ-εδ-ο-μαι (§ 563).

Skr. $d\acute{a}$ - $dh\ddot{a}$ -ti 'places' $d\acute{a}$ - $d\ddot{a}$ -ti 'gives' Avest. da- $d\ddot{a}$ -iti, see § 540 p. 99. Skr. $\jmath\acute{a}$ - $h\ddot{a}$ -ti 'leaves, gives up' 1st pl. ja- $h\imath$ -mas 3rd pl $\jmath a$ -h- $at\imath$, Avest. za- $z\bar{a}$ -iti; — with thematic vowel, Skr. $\jmath a$ -h-a-ti.

- § 557. Greek. Lesb. έλλαθι 'be gracious' for σε-σλα-θι, pl. ἔλλατε, beside ΐλαθι Class III, § 542 p. 102. κέ-κλυ-θι 'hear', pl. κέ-κλυ-τε. but Skr. ά-ἐνι-ἐταν-υν belong to Class III. εἶπ-α 'I spoke' (Cret. Gort. προ-Γειπάτω) contains a stem *ue-μη- (as regards Γειπ- for *μἔμη-, see the Author, Kuhn's Zeitschr. xxv 306, Gr. Gr.² p. 157; Wackernagel, Kuhn's Zeitschr. xxix 151 f.; Meillet, Mém. Soc. Ling. vii 60); this weak stem eventually ran right through (cp. Skr. da-d-mi § 541 p. 101, Lith. dèmi for *de-d-mi § 546 p. 104); the -α-σf εἶπ-α-ς εἴπ-α-τε is to be explained as in ἔχευας, see § 504 p. 67; with thematic vowel, Skr. ά-νο̄c-α-t Gr. ἔ-ειπ-ο-ν, see § 661.
- § 558. Keltic. Original Conjunctives of this class (cp. Skr. ba-bhas-a-t) are the Irish reduplicated futures, Mid.Ir. ge-gn-a 'vulnerabo' O.Ir. do-gega 'eligam' etc. They originally had the thematic vowel, which they exchanged for ā in the same way as did the future of which gignid is an example, Class III § 544. However, the e of the reduplicator is doubtless, as Thurneysen says, a mutation of i (Kuhn's Zeitschr., xxxi 77 f.); then the forms are not different from gignid and others of that kind.
- § 559. Balto-Slavonic. Lith. dèsti 'lays' for *dhe-dh+ti instead of *dhe-dhē-ti, Lith. dů'sti O.C.Sl. (Russ.) dastĭ 'gives' for * $d\bar{v}$ -d+ti instead of *de- $d\bar{v}$ -ti, see § 546 pp. 103 f.
- § 560. Forms with Idg. \bar{e} instead of e in the Reduplication (§ 472 p. 17). These are Intensives in Sanskrit; e. g. Skr? $d\bar{a}$ -dhar-ti beside (dar-dhar-ti) from dar-'hold fast', 3^{rd} pl. $n\bar{a}$ -nad-at from nad-'shriek, roar'; cp. Avest. partic. $p\bar{a}$ -per t- \bar{a} na- neut. used as a subst. 'fighting'.

Skr. $j\bar{a}$ -gar-mi 'I watch' 3rd pl $j\dot{a}$ -gr-ati imper. $j\bar{a}$ -gr-hi, and an irregular form with weak stem, $j\bar{a}$ -gr-mi; — thematic

jā-gr-a-ti. Compare perf. $j\bar{a}$ -gár-a Gr. ἐγή-γερ-μαι. On the g of $j\bar{a}$ -gar-mi, see § 537 Rem. p. 98.

Remark The fut jāgai išyāti perf jujāgāra may be compared with lašišyati lalāša beside lašati for *le-ls-e-ti, with jahišyati ajījahat beside ja-h-a-ti (§ 562), and others like them; see § 752.

A Greek intensive of this sort is Hom δη-δέχ-αται 'they welcome, greet' imperf. δή-δεν-το (read δη-, not δει-, — so J. Wackernagel), from δέχομαι δέχομαι 'I receive'.

Class VI.

Reduplication in $-e (-\bar{e}) + \text{Root} + \text{Thematic Vowel}$ forming the Present Stem.

§ 561. On the relation of this class to the last, see § 555.

pp. 448 f), \vee seg- (Lith. seg-ù 'I fasten'). Skr. $d\acute{a}$ -dh-a-ti 'places' $d\acute{a}$ -d-a-ti 'gives' Avest. da-p-a-ti from \vee $dh\bar{e}$ - and \vee $d\bar{o}$ -, see § 540 p. 99, § 561. Skr. ya-h-a-ti 'leaves, gives up', see § 556 p. 109. Skr. $r\acute{a}$ -r-a- $t\bar{e}$ from $r\bar{a}$ - 'pour', cp. 2^{nd} pl. ra- $r\bar{t}$ -dhvam (§ 538 p. 98).

With $\bar{a} = \text{Idg. } \bar{e}$ in the reduplication (cp. § 560) Skr. $j\bar{a}$ -gr-a-ti 'wakes' and Avest. 3^{rd} sing. conj $v\bar{a}ur\bar{a}it\bar{e}$ (for * $v\bar{a}$ -vr-) from var- 'choose' (cp. Bartholomae, Bezz. Beitr. XIII 79 f.).

In the later language we find presents in connexion with these aorists, as $\pi \dot{\epsilon} \varphi \nu \omega$, $\kappa \dot{\epsilon} \nu \lambda \omega \omega$. Example 100 of this sort; for $\dot{\epsilon} - 2\delta - 0 - \mu \omega$, from $\dot{\nu}$ sed-'sit' (§ 556 p 108), unless the form comes from * $\dot{\epsilon} \delta - \iota_0 - \mu \omega \omega$ = O.H.G sizzu Class XXVI (§ 721).

§ 564. Italic. Lat. tendō Umbr. ostendu 'ostendito' (I § 499 p. 366) is often derived from *te-tn-ō (V ten-), ¹) to which Gr. τι-ταίνω would be related in the same way as λιλαίομαι to Skr. lašati (§ 562), cp Skr ta-tán-a-t; others analyse ten-dō, and refer it to class XXV (cp. II p. 161 footnote 2, IV § 696); and now R. S Conway identifies it with Gr. τείνω for *ten-zō (Class Rev., v 297), as G. Curtius had done before him.

More certain examples may be found among the Latin perfects, as te-tig-i-t, te-tig-i-mus: Gr. $\tau \varepsilon - \tau \alpha \gamma - \omega' \nu$, pe-pul-i-t: Gr. $\pi \varepsilon - \pi \alpha \lambda - \omega' \nu$ See § 867.

Bartholomae (Stud. 1dg Spr II 95) assumes that *te-tno by analogy of forms with ten- became *tentno-, and hence tendo.

§ 565. Keltic. In this class we may place the Irish a-conjunctive with future meaning. O.Ir. dober 'I will give' 1st pl. do-beram for *bhe-bhr-a-, Vbher- 'ferre'. fris-gera 'respondebit' beside pres. 3rd sing. fris-gair. nad-cel 'quod non celabo' beside pres. celim. Mid.Ir fo-dema 'patietur' beside fo-daim 'patitur'. As regards the compensatory lengthening in these forms, see I §§ 523, 526 pp. 380 f. It is true that the Irish sound-laws do not make it certain that e was the original reduplicating-vowel of this conjunctive. It may have been i, and Thurneysen (Kuhn's Zeitschr., xxxi 81) assumes this in view of gignid etc. (§ 544 p. 103). Since in the reduplicated present both e and i have always been used side by side (cp. Skr. ja-ghn-a-nt- and ji-ghn-a-te § 561 p. 110), it is hardly possible to draw the line.

§ 566. Balto-Slavonic. Lith. de-d-ù 'I lay': Skr. dá-dh-a-ti; Lith. dử d-u 'I give' O.C.Sl. partic. dad-y 'giving'. See § 546 p. 104.

Class VII.

Complete Reduplication + Root forming the Present Stem.

§ 567. On the form of reduplication used in this and the following thematic Class see §§ 465-467, 470, 474.

§ 568. Roots beginning in a Consonant. Certain examples only in Aryan (Intensive Verbs).

Skr. car-kar-mı imper. car-kz-tād, Avest. 1st pl. car-ker--mahī from kar- 'think of, remember'. Skr. 2nd sing. dár-dar-ši imper. dar-dz-hı, Avest. opt. dar-dar-yā-p from dar- 'split'; '1) — with thematic vowel dar-dir-a-t. Skr. 3rd sing. mid. sar-sz-tē sar-sr-ē from sar- 'flow'. Skr. ján-ghan-ti •conj. jan-ghán-a-t

¹⁾ The second syllable of the Avestic form shows irregularly the strong grade, unless *-d\vec{r}-\vec{v}\vec{c}-t\ (I \vec{S} 306 pp 241 f.) is to be assumed for the ground-form (ep. 8kr d\vec{v}-v\vec{a}-t\ \vec{a}-dar-dar-dar-dar-a-t\).

from han- 'strike, kill'. Skr. á-lē-lē-t from lī- 'oscillate'. Skr. 1st pl. nō-nu-mas from nu- 'shriek, cry, call'; — with thematic vowel 3rd pl. mid. nō-nuv-a-nta. Skr. partic. mid. ŋō-huv-āna-s from hū- 'call'; — with thematic vowel Skr. jō-huv-a-t. Avest. zao-zao-mī 'I pour out, consecrate'. Skr. vár-vart-ti 3rd pl. vár-vyt-ati from vart- 'vertere'. Skr. mid. 3rd sing. dē-diš-tē 3rd pl. dē-diš-atē Avest. daṣ-dōiš-t from Ar. diŝ-'show, — with thematic vowel Skr. dē-diŝ-a-m.

Sanskrit has also some forms with \bar{t} after the reduplication (§ 467 p. 13). $bar\bar{t}$ -bhar-ti 3rd pl. $bh\acute{a}r_1$ -bhr-ati from bhar-'ferre' Partic. $gh\acute{a}n_1$ -ghan-at- beside $j\acute{a}n_2$ -ghan-ti (p. 112). $n\acute{a}v\bar{t}$ - $n\bar{o}$ -t beside $n\bar{o}$ -nu-mas (see above). $var\bar{t}$ -vart-ti beside $v\acute{a}r$ -vart-ti (above). $k\acute{a}n_1$ -kranti for $k\acute{a}n_1$ -krad-at- from krand-'roar'.

§ 569. Roots beginning in a Sonant.

Skr. ál-ar-ti 'raises itself'.

Gr. $\eta \nu \cdot \epsilon_{j'k'-\alpha}$ 'I brought' partic. mid. $\hat{\epsilon} \nu \cdot \epsilon_{j'k'-\alpha} \mu \epsilon_{\nu'} \epsilon_{j'k'-\alpha}$, Idg. *en-ehk-. With $\tilde{\eta} \nu \epsilon_{j'k'-\alpha} \epsilon_{j'k'-\alpha}$ etc. compare $\hat{\epsilon} \chi \epsilon_{\nu'} \epsilon_{j'k'-\alpha} \epsilon_{j'k'-\alpha}$ etc. § 504 p 67. Whether the Skr. 2^{rd} and 3^{rd} sing. ānaţ 3^{rd} dual anaṣ-tām conj. 1^{st} pl. anaṣ-ā-mahāi, which belong to the same root, are reduplicated or not, is a question. anaṣ-may be derived from *en-pk-, or from *enek- (cp. Gr. $\delta \iota$ - $\eta \nu \epsilon_{j'} \epsilon_{j'}$).

Class VIII.

Complete Reduplication + Root - Thematic Vowel forming the Present Stem.

§ 570. Roots beginning in a Consonant.

Certam examples only in Aryan (Intensives), compare § 568. Skr. shows injunctives like dar-dir-a-t, nō-nuv-a-nta, jō-huv-a-t, dē-dis-a-m, see above. Avest nae-niž-a-iti 'washes' beside Skr. nē-nēk-ti mid. nē-nik-tē: cp. conj. vōi-vīd-a-itē beside Skr. partic. vē-vid-āna-s from vid- 'find'.

§ 571. Roots beginning in a Sonant.

Armen. ar-ar-i aor. of ar-ne-m 'I make', Gr. ηρ-αρ-ο-ν inf. αρ-αρ-εῖν aor. of αρ-αρ-ίσκω 'I fit'. Skr. am-am-a-t aor. of Brugmann, Elements IV

am- 'injure' (pres $am\overline{\imath}$ - $t\imath$) Gr $\eta\gamma$ - $\alpha\gamma$ -o-r $\dot{\alpha}\gamma$ - $\alpha\gamma$ - $\varepsilon\overline{\imath}r$ from $\dot{\alpha}\gamma$ - ω 'I lead'. 1) 3rd pl. ακ-αχ-ο-ντο from ακ-αχ-ίζομαι 'I am troubled'. άλ-αλκ-ε 'I warded off'. ην-εγκ-ο-ν 'I brought'. ธ์ท-ะๆห-ะเีท beside ήν-εγκ-α (§ 569). Compare § 470

Skr. ann-a-t (pranna-t) from an- 'breathe', arjij-a-t from ari- (ri-) 'direct, procure', āubjij-a-t from ubj- 'keep down', and other examples, only found in the grammarians. Gr. έρίνακ-ο-ν from ἐρτκ-ω 'I hold back', ἢνίπαπ-ο-ν from ἐνίπ-τω 'I address'. Compare § 474 p

CLASS IX R

ROOT + -2- OR ROOT + -1-, WITH OR WITHOUT REDUPLICATION, FORMING THE PRESENT STEM

§ 572. We have here two classes of forms to deal with; examples of which are (1) Skr. vámi-ti Gr. σ'γα-μαι, and (2) Skr. amī-ti.

The first has a after the root. Whether this a was part of the root, as some scholars too confidently assert, or a true suffix (I § 14 p. 17), is doubtful. In Greek along with α are found both s and o. Bartholomae seems to be right in seeing here the Idg. e and o (Bezz. Beitr xvii 109 ff.)

-a- was never found except before personal endings which begin with a consonant, cp Skr. rodi-ti pl. rud-anti.

Forms with -ī- are only found in Aryan. This vowel, Idg. i, was certainly a suffix of some kind ('root-determinative'); a general discussion of it has been given above, § 498 pp. 61 f. Used in the same way we find at in Sanskrit (át-at-š), perhaps the same as ε_{ℓ} in Gr. $\alpha \gamma - \varepsilon_{\ell} - \varepsilon_{\ell}$ (see p. 61 footnote). But it cannot be made in the least probable that -ī- was ever confined to the plural and dual active and the middle of all three numbers, or -āi- to the singular active, like Skr. kr--nu-más etc. as contrasted with kr-nó-mi; -ī- is particularly common in the singular active in Sanskrit.

On Benfey's Sk1. άj-tj-a-t, see Hübschmann, Idg Vocalsyst, 66, Bartholomae, Bezz. Beitr. xvii 116 f.

The spread of -i- in Sanskrit was due in great part to a confusion with -i- = -a-. We have therefore to compare, say, $\dot{s}am$ - $\dot{s}va \cdot \dot{s}am\bar{i}$ - $\dot{s}va$ with Skr. \dot{a} -dhi-mahi. \dot{a} -dhi-mahi.

It is not always possible to say whether -i— was attached to a form in pre-Aryan times, or took the place of i = s in Aryan itself. Thus -s— and -i— may here be comprehended in one class.

§ 573. To forms without Reduplication we cannot point with any confidence except in Aryan and Greek. But Bugge conjectures that some such are contained in the Arm. 2rd aorist mid., e g. cnay from pres cnan-m 'pario, gigno, nascor'. cna- for *geno- (cp. § 583 p. 125) See Bugge, Indogerm. Forsch., I p. 439.

§ 574. Sanskrit. Forms with -i-. vámi-mi vámi-ti (3rd pl. vam-anti, pret. á-vam-ī-t), beside Gr. ¿µέω. áni-ti 'breathes' 3rd pl. an-ánti (pret. án-ī-t). Imper. stani-hi from stan- 'thunder'. Imper. śami-šva from śam- 'take pains'. rōdi-ti 'laments, cries'. 1st pl. rudi-mas 3rd pl rud-anti imper rudi-hi (pret. á-rōd-ī-t) svápi-ti 'sleeps'. śvasi-ti 'snorts' imper. śvasi-hi instead of 'śuśi-hi cp. mid. śuṣ-ē (pret. á-śvas-ī-t) Also śz-nv-i-šé beside śz-nv-i-ré like ja-jn-i-šé beside ja-jn-i-ré. On īṣ-i-tē beside īṣ-tē, see § 853.

-1- in these Verbs is not usually confined to the present stem Compare $\dot{s}am$ - $\dot{s}va$ with $\dot{s}am$ - $t\dot{a}$ -s- \dot{a} -s-s-ta (Gr. $r\dot{a}\mu a$ -to-s), $j\dot{a}n\dot{s}$ -sva with jan- $t\dot{a}r$ -jan-s-sva (Gr. rev-t-tv0 Lat. geni-tor).

To these I add a few forms which both Indian grammarians and European scholars call parts of the is-aorist, to wit: 2rd sing. varti-thās from vart- vertere', á-jay-i-t from ji- conquer', á-tāri-ma from tar- move across, place or pass over', and like forms, along with the 2rd pl. mid in -idhvam instead of -idhvam (§ 839) given by the Indian grammarians, e. g. ábōdhi-dhvam It is true the popular feeling associated these with the s-aorist, as it did the forms á-dhi-thās á-dhi-ta á-kr-thās á-kr-ta; but neither of the two kinds had any real

connexion in form with it (§ 816) 1) Perhaps this apparent connexion was cemented by the original 2nd sing. of the iš-aorist, ending in *-iš (for '-iš-š) which may have been unconsciously analysed into *-i-š (§ 839); cp. ánāit following ánāiš for *a-naiš-š (§ 816).

-7- is commonest in the 2rd and 3rd sing. pret. active (cp. the above examples). am-ī-ti 'injures' (3rd pl. am-ánti) imper. am-ī-šva. Imperative: śam-ī-šva -dhvam beside śami-šva (p. 115). tav-ī-ti 'thrives, is strong' 3rd dual á-grh-ī-tām 'they seized' mid. 2nd sing. grh-ī-thās grh-ī-šva, 3rd sing á-grabh-ī-t, cp. grbh-ī-tá-s grah-ī-šya-ti á-grabh-ī-š-ur. ás-ī-t 'erat'.

The verb $br\'{a}v-\bar{\imath}-ti$ 'says' has $-\bar{\imath}-$ only in those persons which elsewhere have $-\imath$ -, and obviously follows the i-verbs: thus $br\'{a}v-\bar{\imath}-mi$ $-\bar{\imath}-\check{s}i$ $-\bar{\imath}-ti$, $\acute{a}-brav-\bar{\imath}-\check{s}$ $-\bar{\imath}-t$, but $\acute{a}-brav-am$ $br\ddot{\imath}-m\acute{a}s$ $bruv-\acute{a}nti$. Compare Avest. mraom i. e. $mrav-em = \acute{a}-brav-am$, mid. $mruy\bar{e}$ i. e. $mruv-\bar{e}$ (Bartholomae, Handb. § 92 p. 40) = $bruv-\acute{e}$, $mr\ddot{\imath}ut\bar{e}$ $mr\ddot{\imath}u-ta$ = Skr. $br\ddot{\imath}u-t\acute{e}$ $\acute{a}-br\ddot{\imath}u-ta$ and $mrao-\check{s}$ $mrao-\check{p}$ as contrasted with $\acute{a}-brav-\bar{\imath}-\check{s}$ $-\bar{\imath}-t$, like Skr. 3^{rd} sing. $\acute{a}s$ contrasted with $\acute{a}s-\bar{\imath}-t$; but Avestic itself has a similar $\bar{\imath}$ -form in $vy\bar{a}-mrv\bar{\imath}t\bar{a}$ (Y 12 6.), if Bartholomae rightly takes this as 3^{rd} sing. mid. imperf. (see Kuhn's Zeitschr xxviii 37, Stud. Idg Spr. ii 127) By levelling we have Skr imper. $brav\bar{\imath}-hi$ instead of $br\bar{\imath}-hi$, and $br\bar{\imath}-mi$ instead of $br\dot{\imath}-mi$.

From presents in -aya-tı Skr. ūnay-ī-š from ūna-ya-ti leaves unfulfilled', dhvanay-ī-t from dhvanaya-ti 'envelops', ep. opt. mid. kāmay-ī-ta § 951.

This i- and i-inflexion spread widely in Sanskrit because it often served to renew distinctions which had been worn away by phonetic change distinctions which had been worn away by phonetic change distinctions which had been worn away by phonetic change distinctions which had been worn away by phonetic change distinctions which had been worn away by phonetic change distinctions.

On the place which preterite forms in $-\bar{\imath}-\bar{\imath}$ $-\bar{\imath}-t$ filled in the s-aorist, see § 839.

¹⁾ ά-jayı-t: 3rd pl. ά-jayış-ata = Gr. ε-κρέμα-το (κρεμά-θρα): 2nd sing. mid. ε-κρεμάσ-θης (κρεμασ-τό-ς), 800 § 840.

§ 575. Greek. The ϑ -flexion holds ground in the middle voice. $\varkappa \varrho \varepsilon \mu \alpha - \mu \alpha \iota$ 'I hang' (cp fut $\varkappa \varrho \varepsilon \mu \dot{\alpha} - \omega$, $\varkappa \varrho \varepsilon \mu \dot{\alpha} - \vartheta \varrho \bar{\alpha}$ 'hanging basket'). $\ddot{\alpha} \gamma \alpha - \mu \alpha \iota$ 'I revere, honour', $\dot{\alpha} \gamma \alpha - d$ oubtless for ${}^*m g \vartheta - \eta$, from the root of $\mu \dot{\varepsilon} \gamma \alpha$; then $\dot{\alpha} \gamma \alpha - \mu \alpha \iota$ a possible ${}^*\mu \varepsilon \gamma \alpha - \mu \iota$ as Skr. rudi-mas: $r\bar{\upsilon} di$ -mi. Aor. $\dot{\varepsilon} - \pi \varrho \iota \dot{\alpha} - \mu \eta r$ 'I bought' beside Skr. $kr\bar{\imath} - n\bar{\alpha} - t \iota$ 'buys' fut $kr\bar{\imath} - \dot{\imath} y \dot{\alpha} - t \iota$ O Ir. cre-nim 'I buy' conj. 3^{rd} sing. -cria for ${}^*cri - \bar{\alpha} - t \iota$

The active forms perhaps became thematic in prehistoric times: $\dot{\epsilon}\mu\dot{\epsilon}\omega$ 'I spew' instead of * $F\epsilon\mu\epsilon$ - μ Skr. $v\acute{a}m\imath$ -mi, cp. $\check{\epsilon}\mu\epsilon$ - $\sigma\sigma\alpha$, $\delta\alpha\mu\acute{a}\omega$ 'I subdue' instead of * $\delta\alpha\mu\alpha$ - μ , cp. $\delta\acute{a}\mu\alpha$ - $\sigma\alpha$ $\pi\alpha\nu$ - $\delta\alpha\mu\acute{a}$ - $\tau\omega\varrho$; $\grave{\epsilon}\lambda\acute{a}\omega$ 'I drive' instead of * $\grave{\epsilon}\lambda\alpha$ - μ , cp. $\check{\epsilon}\lambda\alpha$ - $\sigma\sigma\alpha$ $\epsilon\lambda\alpha$ - $\tau\acute{\eta}\varrho$, $\acute{a}\varrho\acute{o}\omega$ 'I plough' instead of * $\acute{a}\varrho\emph{o}$ - μ , cp. $\acute{a}\varrho$ - $\eta\varrho\emph{o}$ - $\mu\acute{\epsilon}\nu\emph{o}$ -g $\acute{\eta}\varrho\emph{o}$ - $\sigma\alpha$ $\acute{a}\varrho\emph{o}$ - $\tau\varrho\emph{o}$ - ν . On - ϵ - and - ϵ - beside - ϵ - see § 572 p. 114. But the $\sigma\emph{o}$ -aorist makes it possible to regard these forms as originally ending in - $\epsilon\sigma$ - ω - $\sigma\sigma$ - ω - $\sigma\sigma$ - ω , and answering to Skr. $tar\acute{a}s$ -a-ti arcas- $\bar{\epsilon}$ See §§ 661, 842

Remark. Many other forms seem to be of this group, but their explanation is obscure See, for example, § 550 p. 106 for $\ddot{\sigma}ro-\sigma\alpha i \ddot{\sigma}ro-r\tau\alpha i$, Osthoff Perf. 371, 409 for $\pi\dot{\epsilon}\tau\alpha-\mu\alpha i$, the Author in Kuhn's Zeitschr. XXIII 587 ff for $\dot{\epsilon}\varrho\alpha-\mu\alpha i$. On $\ddot{\epsilon}-\chi\epsilon\alpha-i$ $\dot{\epsilon}-\chi\dot{\epsilon}\alpha-\mu\epsilon r$ and the like, which some scholars place in this category, see § 504 p 67

§ 576. In Latin, Germanic and Balto-Slavonic -\(\textit{-}\) and Idg. -\(\textit{-}\) (in Latin, Idg. -\(\textit{e}\)- as well) must necessarily run together into the same sound. Thus it is always possible that verbs which in these languages belong to Class II originally had -\(\textit{-}\)- and belonged properly to the ninth class. Lat. vomi-t vomi-mus cp Skr. v\(\textit{ami-ti}\). Goth -\(\textit{anan}\) breathe, blow cp. Skr. \(\textit{ani-ti}\) (1st pl -\(\textit{ana-m}\) like \(\textit{ani-mas}\)), O.H.G. \(\textit{riozan}\) 'cry, weep' cp. Skr \(\textit{r\tilde{o}}\) di-\(\textit{ti}\), AS \(\textit{swefan}\) O.Icel. \(\textit{sofa}\) 'sleep' cp. Skr. \(\textit{svaiit}\). Lith. \(\textit{3^{rd}}\) sing. \(\textit{raida}\) 'cries, weeps' Lett. \(\textit{raid}\), beside O.H.G. \(\textit{riozan}\) and Skr \(\textit{r\tilde{o}}\)-ti. Certainty is very far from possible here; indeed, even in Sanskrit these roots can be inflected like Class II \(\textit{vam-a-ti}\), \(\textit{an-a-ti}\) \(\textit{an-a-ti}\) \(\textit{an-a-ti}\), \(\textit{an-a-ti}\).

§ 577. Forms with Reduplication only found in Sanskrit; all have -7-.

-7- in the 2^{nd} and 3^{rd} sing. of some preterites which are usually called pluperfect: as \acute{a} -ja-grabh \bar{i} -t (1^{st} sing. \acute{a} -ja-grabh-am) from grabh- 'seize', \acute{a} -bu-bh $\bar{o}j\bar{i}$ -š from bhuj- 'bend'.

Intensive: $v\bar{a}$ - $vad\bar{\imath}$ -ti from vad-'speak', $p\bar{a}$ - $pat\bar{\imath}$ -ti from pat-'fly'. Compare § 560 pp. 109 f. Intensive · dar- $dar\bar{\imath}$ -ti from dar- 'split' beside dar-dar-i, tar- $tar\bar{\imath}$ -ti (and with irreg. strong stem, 2^{nd} dual tar- $tar\bar{\imath}$ -tas) from tar- 'step over', nan- $nam\bar{\imath}$ -ti from nam- to 'bow, bend oneself', $r\bar{o}$ - $rav\bar{\imath}$ -ti from ru- 'roar, cry', $j\bar{o}$ - $hav\bar{\imath}$ -ti from $h\bar{u}$ - 'call'. Compare § 568 p. 113. The root syllable is never followed by $-\bar{\imath}$ - when the reduplication ends in $\bar{\imath}$: cp. § 467 p. 13.

C. CLASSES X AND XI.

ROOT + $-\bar{a}$ -, $-\bar{e}$ -, OR $-\bar{o}$ - FORMING THE PRESENT STEM.

§ 578. We have here to examine forms such as Gr $\ddot{\varepsilon}$ - $\delta\varrho$ - $\bar{\alpha}$ - ν , $\ddot{\varepsilon}$ - $\beta\lambda$ - η - ν , $\ddot{\varepsilon}$ - $\sigma\beta$ - η - ν , $\ddot{\varepsilon}$ - $\gamma\nu$ - ω - ν . These vowels 1) - $\bar{\alpha}$ -, - $\bar{\varepsilon}$ -, and - $\bar{\sigma}$ - never had any gradation, and the long vowel always runs right through all numbers of active and middle in the Indicative. But some modifications have arisen by a certain law affecting the European languages, by which long vowels were shortened before n or \dot{i} + consonant, as Gr. $3^{\rm rd}$ pl. $\dot{\varepsilon}$ - $\gamma\nu$ o ν for $^*\dot{\varepsilon}\gamma$ - $\nu\omega$ - ν (τ), opt. $1^{\rm st}$ pl. $\gamma\nu$ o $\tilde{\iota}\mu$ e ν for $^*\gamma\nu\omega$ $_{\tilde{\iota}}$ - μ e ν (I §§ 611, 612, 614, 615 pp. 461 ff.).

Originally the root had always its weak grade. In the aorists here cited it has ceased to be a syllable. But a syllable it still is in some forms, as *bhuu-ā-. Lat. (conj.) fuā-s Lith. bùvo (beside *bhu-ā- in Lat. -bā-s); *ii-ē-: Skr. iy-ā-t, cp. perhaps Goth. iddja, whose i- may also be an augment (e-) (beside *i-ē- in Skr. y-ā-ti); *myn-ē-: Gr. $\hat{\epsilon}$ - μ aνη Lith. minē; *liq-ē-: Gr. $\hat{\epsilon}$ - λ iηη Lat. lice-t; Gr. $\hat{\epsilon}$ - β ά λ - η (beside $\hat{\epsilon}$ - β λ - η).

These suffixes had properly nothing do do with either acrist or present meaning. This is clear because they never have been confined to one particular stem. We find them in

The newest theory on "Root-Forms in ā*" may be seen by referring to Kretschmer, Kuhn's Ztschr. xxxx 403 ff.

the Perfect, as Skr. $pa-pr\bar{u}\iota$ Gr. $n\dot{\epsilon}-n\lambda\eta-\nu\tau\alpha\iota$; in the Aorist, as Skr. $3^{\rm rd}$ sing. $\dot{\alpha}-pr\bar{\alpha}-s$ Gr $\ddot{\epsilon}-n\lambda\eta-\sigma-\alpha$, in the Participle, as Skr. $pr\bar{\alpha}-t\dot{\alpha}-s$ Lat. $\iota m-pl\bar{\epsilon}tu-s$, and in the Present, Skr. $2^{\rm nd}$ sing. $pr\dot{\alpha}-si$ Lat. $\iota m-pl\bar{\epsilon}-s$ from stem * $pl-\bar{\epsilon}-$ 'fill' $\sqrt{pel-}$. Often it is just in the present stem that the stems formed with these suffixes do not occur; for instance, we have Skr. fut. $hv-\bar{\alpha}-sy\alpha-t\bar{\epsilon}$ O.C.Sl. aor. $z\bar{u}v-a-ch\bar{u}$ Skr. $hv-\bar{\alpha}-tar-$ O.C.Sl. $z\bar{u}v-a-tel\bar{\iota}$ 'caller', but pres. Skr. $h\dot{\alpha}v-a-t\bar{\epsilon}$ O.C.Sl $zov-e-t\bar{u}$ 'calls'; Skr. $j\bar{n}-\bar{a}-t\dot{\iota}-\dot{s}$ 'near kinsman' Gr. $\kappa\alpha\sigma\dot{\iota}-\gamma\nu\eta\tau\sigma-\varsigma$ $\gamma\nu-\omega-\tau\dot{\sigma}-\varsigma$ 'kinsman, brother' Goth $kn\bar{\epsilon}$ (Stem $kn-\bar{\epsilon}-d\iota$) 'stock, tribe' from $\sqrt{\hat{g}}$ en- 'gignere, Gr $\dot{\epsilon}$ ' ν - σ n $\dot{\gamma}-\sigma\omega$ 'I will say' O.Icel. $sk\bar{\alpha}ld$ 'poet' for pr. Germ. * $sk\bar{\epsilon}-\bar{d}l\dot{\alpha}-$ (Lidén, P.-B. Beitr. xv 507) from $\sqrt{seq-}$ 'say' pres. $\dot{\epsilon}\nu-\dot{\epsilon}n\omega$.

These forms with $-\bar{a}$ - in Italic, Keltic, and Slavonic are also used for the Conjunctive. Besides Lat. $fu\bar{a}$ -s given above we may cite $tul\bar{a}$ -s (cp Gr. Dor. $\tilde{\epsilon}$ - $\tau\lambda\bar{a}$ -s). It is no more strange to find these suffixes in two moods than to find -e-and -e- in both indicative and conjunctive.

So with the $-\bar{e}$ - which meets us in Italic future and conjunctive series, as Lat fut. so- $lv-\bar{e}$ -s conj $\bar{\iota}$ - $r-\bar{e}$ -s Osc. sakraíter fusíd (§ 926), must be identified with $-\bar{e}$ - in $\bar{\epsilon}$ - $\beta\lambda$ - η - ν $\hat{\epsilon}$ - $\mu\acute{\alpha}\nu$ - η - ν , compare Lat ed-e-t with Lith pret. $\acute{e}d$ - \acute{e} , Osc. fu-1-d 'sit' ($\iota = \bar{e}$) with Gr pret $\dot{\epsilon}$ - $q\dot{\nu}$ - η

Greek, in the mood answering to the Latin \bar{a} -conjunctive, has a variation, sometimes $-\eta$ - and sometimes $-\omega$ -; as $\lambda'\pi\eta$ - $\tau\epsilon$ $\lambda'\pi\omega$ - $\mu\epsilon\nu$. Perhaps there were originally two sets of conjunctive forms, one with $-\bar{e}$ - and one with $-\bar{e}$ -; and from these a mixed paradigm was made, $-\bar{e}$ - or $-\bar{o}$ - being taken according as the corresponding indicative form had $-\bar{e}$ - or $-\bar{o}$ -. If so, the conjunctive $\lambda'\pi\eta$ - $\tau\epsilon$ must be really the same as the aorist passive $(\hat{\epsilon})\lambda'\pi\eta$ - $\tau\epsilon$, Lat. fu \bar{a} -s the same as $-\bar{b}\bar{a}s$, tul \bar{a} -s the same as Gr. $(\dot{\epsilon}$ -) $\tau\lambda\bar{\alpha}$ - ς -. There was a closer connexion between $-\bar{e}$ - and $-\bar{o}$ -than either of them had with $-\bar{a}$ -, as is proved by such forms as $*g_2$ - \bar{e} -. Gr. $\zeta\bar{\eta}$: $*g_2$ - \bar{o} -. $\zeta\omega$ - ω , *bhs- \bar{e} -. Gr. $\psi\bar{\eta}$: *bhs- \bar{o} -. $\psi\omega$ - $g\dot{o}$ - ς (other examples in § 587).

It would probably be much easier to thread our way through this labyrinth if we knew which of the three sounds

is represented by the $-\bar{a}$ - of Aryan conjunctives. In the indicative forms, non-Aryan languages often give the clue, thus we derive Skr. $pr\dot{a}$ -si from * $pl\bar{e}$ -si because Greek has has $\pi\lambda\tilde{\eta}$ - τo and Latin - $pl\bar{e}$ -s, but $dr\dot{a}$ -ti we derive from *dr- \bar{a} -ti because of Greek \ddot{e} - $\delta \rho \bar{a}$ - τv .

Such of these forms which serve for the Conjunctive will be left for examination together when we come to the Conjunctive, §§ 918 ff. (cp. § 489 pp. 47 f.).

As has already been mentioned (§ 487 p. 41), I believe that this \bar{a} -suffix is the same as the feminine suffix $-\bar{a}$ -, compare Skr. perf. j_1 - $j_2\bar{a}u$ $j_2\bar{a}$ -sya-t Gr. Ion. $\beta\varepsilon$ - $\beta i\eta$ - $\tau\alpha\iota$ $\beta\iota\eta$ - $\sigma\alpha\tau\sigma$ with the fem. Skr. $j_2\bar{a}$ - j_1 - $j_2\bar{a}$ - j_2 - j_3 - j_4

Verbs made with these suffixes are often extended by -20-, as beside Skr. $sn-\dot{a}-tr$ 'washes, bathes' Lat. $n\bar{a}-s$ $n\bar{a}-mus$ we have Skr. $sn\bar{a}-ya-t\bar{e}$ Lat. $n\bar{o}$ for * $n\bar{a}-(i)\bar{o}$ O.Ir. 3^{rd} sing $sn\bar{a}id$, and it is impossible to draw a distinct line between the older inflexion and that with -io-. Thus we must make frequent comparisons with the 20- conjugation of Class XXVIII

In one other respect it is difficult, if not impossible, to draw a hard and fast line. The class of verbs to which grammarians mostly restrict the term Denominative are often inseparable from this tenth class and its 10-extension; as Lat plantō (for *plantō-(1)ō plantō-s etc. from plantō- 'plant' like nōnōs etc., Gr. Lesb. $\hat{\epsilon}$ -rtµō-µεν $\hat{\epsilon}$ -rtµō-νε from τīµō- 'honour like $\hat{\epsilon}$ -δρō-μεν $\hat{\epsilon}$ -δρō-τε, Armen. jana-mk like mna-m mna-mk. That these denominatives had originally only -io- (or

-ie) in all persons cannot be proven (cp. § 487 p. 42), and in view of the great number of forms like Lat. planta-s plantā-mus without -20- in the Idg. languages. it is very improbable.

Class X

Unreduplicated Root + - \bar{a} - $-\bar{e}$ - or $-\bar{o}$ - forming the Present Stem

§ 579 Root + -a-

Pr Idg. *dr-ā-ti 'runs' (cp. Skr dr-áva-ti dr-ama-ti etc., § 488 p. 47). Skr. drā-ti imper. drā-hi, Gr. č-δρα-ν έ-δρα-μεν. *tr-ā-ti (cp Skr. tar- 'press through, pass over'): Skr. trā-ti 'rescues, saves' (orig. 'lets go through, or gets happily out of') mid. trá-sva trá-dhvam (t.á-ya-tē), Lat in-trā-s -trā-mus (1st sig. -trō for *-trā-2ō) and trāns Umbr traf trahaf 'trans' (orig. nom. sing. of the participle, see Thielmann, Arch. Lat. Lex iv 248 ff., 358 ff) 1) sn-ā-ti 'washes, bathes' intr. (cp. Skr. sn-āu-ti 'trickles' partic sn-u-ta-s, (ir r-έω fut. ν-εύ-σομαι): Skr. sná-ti 3rd dual sna-tas (sna-ya-tē), Lat na-s na-mus (1st sing no), cp. (fr νάω 'I flow' να-μα *bhy-a- *bhuy-afrom beeve become, be Lat. -ba-s -ba-mus, O.Ir. 3rd sing bā ba (conj. and fut), Lith bùro 'was' bùro-me, variant *bhu-ē-*bhuy-ē-, see § 587 *sruy-ā- from srey- 'flow' Gr. Epidaur. έρρύα 'flowed', Lith. pa-srùvo 'flowed'; variant *sruy-ē- Gr. $\frac{1}{6}$ ρούη § 589. *g-ā-t *e-g-ā-t 'went' (cp. *g-em-, § 497 Rem. p. 57). Skr. \acute{a} - $g\bar{a}$ -t \acute{a} - $g\bar{a}$ -ma, Gr. $\acute{\epsilon}$ - $\beta\eta$ $\acute{\epsilon}$ - $\beta\eta$ - $\mu\epsilon\nu$ Sometimes verbs which originally belonged to Class I, and had gradation, were absorbed into this class and lost it see § 495 p. 55.

Examples of similar conjugation in later denominative verbs from ā-stems · 1st pl. Armen Jana-mk, Gr. Aeol rtuā-uev, Lat. plantā-mus, O.Ir. no chara-m, Lith. jústo-me.

It is naturally often doubtful whether an a-verb belongs to the Primitive or the Denominative class, to use the terms

¹⁾ intiāle extrāre were clearly regarded by the Romans as derived from intrā extrā But trāns makes it quite as probable that they are compounds of *trāre. F. D Allen, Am. Journ Phil I 143 ff., does not convince me.

in their received sense. For example, Lat. forō forās, O H.G. borōm borōs 'l bore', common ground-form *bhṛr-ā-, beside O.H.G. bora f. 'borer' (cp. § 769)

§ 580. Aryan. Besides those mentioned in § 579, there are few Aryan verbs which can fairly be supposed to have original -ā-, to judge from the cognate languages. Skr. $\dot{s}r$ -ā-ti (gramm.) beside $\dot{s}r\dot{a}$ -ya-ti 'cooks, roasts' from $\sqrt{\hbar}er$ - (Gr. * $\epsilon\rho\dot{a}\sigma$ -\sigma\alpha\alpha\sigma\tau\eta\cdots\alpha\sigma\eta\cdots\alpha\sigma\cdots\alpha\cdots\alpha\sigma\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\cdots\alpha\c

We subjoin a few more of the forms with $-\bar{a}$ - whose suffix may be either Idg. $-\bar{a}$ - or Idg. $-\bar{e}$ - or $-\bar{o}$ -. $ghr-\bar{a}$ -ti 'smells' (perf. ja- $ghr\bar{a}u$ partic $ghr\bar{a}$ -ta-s) beside ji-ghar-ti Class III (§ 540 p. 100); dr- \bar{a} -ti 'sleeps' (da- $dr\bar{a}u$ $dr\bar{a}$ -na-s) beside Gr. $\delta a\varrho$ - $\vartheta av\omega$ Lat. dor- $mi\bar{o}$ (cp. the Author, M U., I 43); dhm- \bar{a} -nt- 'blowing' (da- $dhm\bar{a}u$ $dhm\bar{a}$ -ta-s) beside dham-a-ti Class II a; hy-a-ti 'looks, seems, makes known' (ca- $hhy\bar{a}u$ $hhy\bar{a}$ -ta-s beside a-hhy-a-t Class II a (see footnote).

Remark. Denominatives from \bar{a} -stems of the later stratum in Aryan form the present in $-\bar{a}$ -ya- t_i , not $-\bar{a}$ - t_i , see § 766. Forms like $m\bar{a}l\bar{a}$ - t_i the is like a wreath $m\bar{a}l\bar{a}$ - t_i are an artificial product of a late period.

§ 581. Armenian. mna-m 'I remain, await' 1st pl. mna-mk (aor. mna-ci), from the root of Gr. μέν-ω 'I remain', and probably connected directly with Skr. mn-ā- Gr. μν-ā-(§ 580). kea-m 'I live' ground-form *gvi-ā-mi (Bartholomae, Stud. Idg. Spr, 11 134) or *gvūā-mi (cp. Skr. jīvā-tu-š 'life', beside Skr. jīva-ti 'lives' Lat. vīvō, which was derived from

¹⁾ Fick, Wtb. I * 32, connects $\sigma \tilde{a} u \alpha$ with Skr. khyā-ti, for which see below.

√ gez- by the suffix -uo-, but was regarded very early as a verb of Class II; cp § 488 p 47). orca-m 'I break wind, belch' for *oruc-a-m, cp. O.C.Sl. ryga-ja 'ructo'.

Denominatives with -ā- of the newer stratum are inflected just as these are; as jana-m 'I take pains, strive' 1st pl. jana-mk (jan 'pains, excitement, diligence'), olba-m 'I bewail' 1st pl. olba-mk (olb 'lament'). xroxta-m 'I am haughty, defiant' 1st pl. xroxta-mk (xroxt 'haughty, defiant').

Denominatives with $-\bar{a}$ - belonging to the newer stratum were conjugated in this Class in the Aeolic dialect; e. g. pl. $\tau t \mu \bar{a} - \mu \epsilon \nu \tau t \mu \bar{a} - \tau \epsilon$ (but att $\tau \bar{\iota} \mu \bar{\omega} \mu \epsilon \nu \tau \bar{\iota} \mu \bar{a} \tau \epsilon$). The 1st sing. in $-a \iota \mu \iota$ is a re-formation in place of $-\bar{a} - \mu \iota$, and $-o \iota \mu \iota$ instead of $-\omega - \mu \iota$. Cp. §§ 589, 775

Forms passing from Class I to Class X. $\ddot{\epsilon}$ - $\sigma\tau\eta$ - $\mu\epsilon\nu$ instead of $^*\dot{\epsilon}$ - $\sigma\tau\ddot{\alpha}$ - $\mu\epsilon\nu$, $\ddot{\epsilon}$ - $\varphi\vartheta\eta$ - $\mu\epsilon\nu$ instead of $^*\dot{\epsilon}$ - $\varphi\vartheta\ddot{\alpha}$ - $\mu\epsilon\nu$ (but the middle keeps $\varphi\vartheta\ddot{\alpha}$ -, as $\varphi\vartheta\ddot{\alpha}$ - $\mu\epsilon\nu$ 0- φ 0. See § 495 p. 55.

Remark. Hom. $\pi \lambda \tilde{\eta} \tau \tau \sigma$ instead of $*\pi \lambda \tilde{u} \tau \tau \sigma$ following $\pi \lambda \hat{\eta} u \eta \tau$ etc., so à $\eta \tau \tau u$, $\tilde{\epsilon} \mu \pi \lambda \eta \tau \tau \sigma$ instead of $*\tilde{\epsilon} \epsilon \tau \tau u$, $*-\pi \lambda \epsilon \tau \tau \sigma$. Similarly opt $\tilde{\epsilon} \mu -\pi \lambda \tilde{\eta} \tau \sigma$ and $\mu \epsilon \mu \tau \tilde{\eta} \mu \eta \tau$ extraur, see § 944. But some are regular, act. $\tilde{\epsilon} \epsilon \iota \sigma \iota$ device; (on $\tilde{\epsilon} \delta \varrho \tilde{u} \tau \tilde{\epsilon}_{\gamma} \tau \sigma$, see § 1020. 2) Compare I § 611 Rem. p 462.

§ 583. Italic. The 1st sing. pres. in *-ā-mi is lost; in its place Latin had always *-ā-t0, which became -ō. Lat. trans Umbr. traf trahaf, Lat. trars -tra-mus: Skr. tra-t1st sing. tr1st beside Skr. tra-t2, see § 579 p. 121. Lat.

fi-ā-s fi-ā-mus, cp O H.G. blāu 'I blow' for *bhl-ē- $\bar{\imath}\bar{o}$ and Gr. $q\lambda$ - $\dot{\imath}\omega$ 'I abound' Lat. n-ā-s n-ā-mus Skr. sn-ā-ti 'washes bathes', see § 579 p. 121. Ital. *fā- for *fu-ā- from \checkmark bheu-become, be', pret *-fā-m: Lat. $am\bar{a}$ -bā-s -bā-mus, Osc. fu-fans 'erant' (§ 899), cp. Lat. conj. fu-ā-s. O.Ir. bā ba etc (§ 579 p. 121). Lat. hi-ā-s hi-ā-mus, 1st sing. $hi\bar{o}$ = Lith $\dot{\imath}\dot{\iota}\dot{\iota}\dot{o}$ - $\dot{\jmath}\dot{u}$ 'open the mouth', cp Lat. $h\bar{\imath}$ -scō, O.H.G. gi- $n\bar{o}$ -m gei- $n\bar{o}$ -m 'I gape'. Lat. inquam for *en-sq-ā-m injunctive. \checkmark seq- 'say', cp m-qui-t m-qui-nt (Class XXVI § 717) Gr. $\ddot{\imath}$ m- σn - $\ddot{\imath}$ - -

d- \bar{a} - from $\sqrt{d\bar{o}}$ - 'give' is found not only as a conjunctive (Lat. ad- $d\bar{a}$ -s, Osc. da-dad 'reddat'), but as indicative too, Lat. $d\bar{a}s$ dat. The last two are doubtless injunctive forms (dat instead of * $d\bar{a}$ -d), and d- \bar{a} -s. ad- $d\bar{a}$ -s = $-b\bar{a}$ -s · $fu\bar{a}$ -s. $tul\bar{a}$ -s. Gr. ε - $\tau\lambda\bar{a}$ - ς .

era-m erā-s is to es-t what ea-m (used for conj.) is to i-t. The use of the injunctive *fu-ā- = Lat. -ba-m for the imperfect certainly had something to do with the use of the injunctive erā- as imperfect. Some scholars (the latest is Bartholomac, Stud. Idg. Spr ii 187 f.) connect eram with Ion. $\ddot{\epsilon}\eta\nu$ $\dot{\epsilon}\eta\sigma\vartheta\alpha$, $\dot{\eta}\eta\nu$ would be the augmented form; for another possible explanation see § 858. 2.

Other Verbs belonging to this class are: Lat. juvā-s (partic. -jūtu-s perf jūvī) for *dzugu-ā-s: Lith. džiùgo-s 'he broke out into rejoieing' (pres. 1st sing. džiungū-s); lav-ā-s (beside lav-1-s), ep. perf. lāvī; dom-ā-s cub-ā-s mic-ā-s ē-legāns (beside ē-ligere) sec-ā-s (Umbr. pru-sekatu 'prosecato') and others, cp. perf. domuī cubuī micuī secuī. Doubtless we should also place here certain stems which have -ā- all through the verb, as arā-s perf. arāvī partic. arātu-s, cp. Gr. ἀράω 'I plough' (Hom. 3rd pl. ἀρόωσι Heracl. ἀράσοντι, Sutterlin, Zur Gesch der Verba denom. im Altgr., 122), O.C.Sl. orā-'to plough' in the aor. ora-chū partic. pret. act. ora-vū inf. ora-ti.

In Latin, there are a number of verbs which have the a-flexion when compounded, but some other when not. Examples oc-cupāre: capiō, suspicārī: speciō, prōflīgāre: flīgō, com-

-pellare: pello, aspernari: sperno. This difference had probably something to do with a difference of meaning, the compound as contrasted with the simple verb often had a perfect (aorist) meaning. The a-formation gave an aoristic meaning, and occupare stands to capio, much in the same relation as Gr. uavnva to μαίνομαι, profligare to fligo as λιπήναι to λείπομαι. The indic. pres. occupa-t is then an agrist formation, like lic-et (Gr. ἐλίπη) beside linquō (§§ 590, 708), conj. ad-venās ē-venās (beside Osc. kúm-běned 'convenit') beside veniō, tag-i-t beside tangi-t, and the like. This \bar{a} -aorist seems to be as old as the ē-aorist: cp. Gr. Epidaur. ἐρρύα 'he flowed', Lith. pa-srùvo 'he flowed' kilo 'he raised himself'; perhaps to this class belongs the Armenian a-aorist, as cn-a-y 'genui, natus sum' (Bartholomae, Stud. Idg. Spr., II 130, cp. § 573). Compare further § 708 Rem.

In the whole range of Italic dialects, the later group of denominatives with $-\bar{a}$ - went hand in hand with the present flexion of this tenth Class. Lat. plantā-s $-\bar{a}$ -mus 1st sing. plantō like in-trā-s etc. Umbr. furfant 'februant' imper portatu 'portato', Osc. faamat 'habitat' sakarater 'sacratur' imper. deivatud 'iurato'. Compare §§ 738, 777.

§ 584. Keltic. Irish has only one monosyllabic present stem of the same kind as Idg. tr- \bar{a} -, to wit, * $bh\psi$ - \bar{a} -. This stem is certainly attested in conjunctive and future use (cp. Lat. fu-a-m), as 3^{rd} sing. $b\bar{a}$ ba = * $bh\psi$ - \bar{a} -t. Whether it acted also as the preterite copula (cp. Lat. -bam), is doubtful, because its 3^{rd} person singular appears after particles as -bu-bo (e. g robu robo), which looks like original * $bh\bar{u}$ -t (Gr. $\ddot{\epsilon}$ - $q\bar{\nu}$). Most likely the 1^{st} and 3^{rd} sing. ba and 3^{rd} pl. batir, which still have those forms even in Old Irish, should be derived from a preterite * $bh\psi$ - \bar{a} -.

Then there are a few dissyllable present stems, as O.Ir. scarā- 'sunder, part from' for *skrr-ā- (I § 298.3 p. 237), scarā-im scarā scarā-id scarmme scarthe scarā-it for *scarā-mi-ā-si etc., also no scaru for *scurā-2ō like Lat. juvō. And

again, the same inflexion is used with the later group of denominative verbs, as *com-alnaim* 'I fill up' (§ 778). Even more clearly than in Irish we see this \bar{a} -flexion in the British dialects; 3^{rd} sing. O.Brit. -ot (with $o = \bar{a}$), e. g. O.Bret. cospitat 'titubat' crihot 'vibrat'.

Remark. Remarkable forms of the verb -tau $-t\bar{o}$ 'I am' (= Idg * $st\bar{a}$ - $2\bar{o}$, Class XXVI § 706) are the 3^{rd} sing at- $t\bar{a}$ and the plural -tam -tad -tat, which may correspond to Lat sta-t and $st\bar{a}$ -mus $st\bar{a}$ -ts sta-nt That at- $t\bar{a}$ comes from * $-st\bar{a}$ (\underline{s})e-t can hardly be proved, and the unaccented -tam -tad -tat need not be shortened bye-forms of accented at-taam, at-at-at at-at-at-at, which may be secondary re-formates. Still I do not believe that we need assume, parallel to $st\bar{a}$ -, an original stem st- \bar{a} , i. e. an extension of the root by the \bar{a} -suffix of this tenth class; but I think that in Italic as in Keltic there was a tendency for verbs to pass from Class XXVI into this, caused by parallel present stems like t- \bar{a} -and tr- \bar{a} -2o-. Compare § 505 pp. 71 f, §§ 706, 716, 719.

§ 585. Germanic. No monosyllabic stems of the first stratum, without -io-, are found at all; unless indeed it be represented by O.H.G. tuo-m from $\sqrt{dh\bar{c}}$ - (see § 507 p. 74) But the said inflexion has many representatives amongst disyllabic stems (mostly denominatives of the later stratum), cp. Goth. $mit\bar{c}$ -s 'thou measurest' salb\bar{c}-s 'thou anointest', $mit\bar{c}$ -\bar{p} salb\bar{c}-\bar{p}, -\bar{c}-m -\bar{c}-\bar{p}, -\bar{c}-nd, O.H.G. bor\bar{c}-m -\bar{c}-s and so forth (ep. §§ 739, 781).

§ 586. Balto-Slavonic. Monosyllabic stems are declined in Class XXVIII; as Lith. ži-ō-ju 'hio' žiō-ji -j(a) -ja-me -ja-te, O.C.Sl. tr-a-ja 'I last, endure' tra-je-ši -je-tŭ -je-mŭ -je-te -jatŭ (cp. § 740) But imperatives like Lith. žiō-k = Lat. hiā (§ 957) should be classed here.

Dissyllabic stems without -io- spread very widely in Baltic. To this class belong a very numerous group of preterites in -au, as Lith. buvaū 'I was' buvaī bùvo bùvo-me bùvo-te: Lat. -b-ā-s; pa-srùvo 'flowed' · Gr. Epidaur. $\dot{\epsilon}_{00}v'\bar{a}$ (§ -582 p. 123), $d\dot{\epsilon}_{11}ug$ -aū-s 'I broke out into rejoicing' · Lat. $\jmath uv$ -ā-s (§ 583 p. 124), gij-aū 'I revived' (cp. Avest. $\jmath y\bar{a}ut$ - \dot{s} 'life' Gr. ζ_{ij} 'lives' for * g_{i} - \bar{e} - \dot{e} -, from $\sqrt{ge_{k}}$ -); kil-aũ 'I raised myself', vilk-aũ 'I dragged', snig-o 'it snowed'. With augment ej-aũ 'I went'

(§ 480 p. 28): Lat. $e\bar{a}$ - for *-ej- \bar{a} - as conjunctive. Also presents; as bij- $a\bar{u}$ -s 'I fear', lind-au 'I am stowed away somewhere'.

These forms had originally secondary personal endings, $-\bar{a}$ -m $-\bar{a}$ -s $-\bar{a}$ -t etc., like Lat -bam $b\bar{a}s$. But the 1st and 2nd sing were transformed, the ending of suk- \hat{u} suk- \hat{t} being added to $-\bar{a}$ -. See on this point § 991. 1.

In verbs like $bij-a\bar{u}-s$ lind-au, $-\bar{a}-$ was carried through the whole verb (fut. $bijo-si\bar{u}-s$ lindo-siu etc.). Thus they were related to the \bar{a} -preterite ($buv-a\bar{u}$ beside fut. $b\dot{u}-siu$, $d\dot{s}iug-a\bar{u}-s$ beside fut $d\dot{z}i\dot{u}k-si\dot{u}-s$), as Lat. $ar-\bar{a}-$ to $juv-\bar{a}-$ (§ 583 pp. 124 f.).

O.C.Sl has only one present of this sort, $im-a-m\ddot{\iota}$ 'I have' $im-a-\check{\imath}i$ $-a-t\check{\iota}i$ $-a-m\check{\iota}i$ -a-te; parallel stem $im-\check{e}-i$ in partic pret. act. $im\check{e}-v\check{\iota}i$ etc., cp Lith. pret. 3^{rd} sing. $\check{e}m-\check{e}$.

Amongst the later Lithuanian denominatives those in -au with inf -yti, as jűstau 'I gird' (jűstyti) from jűsta 'girdle', see § 782.4. Another group of later denominatives from stems in -ā- has -o-ju -o-ti; e g. dovanó-ju 'I present', inf. dovanó-ti, from dovanà, see §§ 769, 783.

§ 587. Root + $-\bar{e}$ - or $-\bar{o}$ -.

Pr. Idg. *ql-ē-ti from \(\sqrt{gel}\)- 'fall' (cp. Gr. βέλ-ος 'missile' βολ-ή 'throw') Skr gl-ā-ti 'falls off, loses strength' (gla-ya-ti), Gr. $\ddot{\varepsilon}-\beta\lambda\eta-\nu$ Treceived a blow, Ι struck', 1st pl. ε-βλη-μεν mid. ε-βλη-το, opt. βλείην βλείμεν. * $pl-\bar{e}-$ * $pl-\bar{o}-$ from $\sqrt{pel}-$ 'fill' (Goth fil-u 'much' etc.): Skr 2nd sing. hortative $pr\bar{a}$ -si aor a- $pr\bar{a}$ -t, Gr. $\pi\lambda\tilde{\eta}$ -to πλη-ντο (§ 582 Rem. p 123), Lat. im-plē-s -plē-mus -plē-tur (1st sing. pleo for *ple-2o), parallel stem *pll-e- in Lith. pýlė 'he shed' instead of *pile (§ 593); *pl-ō- in Lat. plōrāre Goth. flo-du-s 'flood', and doubtless in Gr. en-énlow 'I sailed over' pres. $\pi \lambda \omega' - \omega$ partic. $\pi \lambda \omega - \tau \dot{o} - \dot{s}$ *(s) $n - \bar{c} - \dot{s}$ (s) $n - \bar{c} - \dot{s}$ weave, spin, sew' ((s)n-ei- in O C.Sl. ni-ti 'thread'? cp. Per Persson. Stud. Lehr. Wurzelerw., 64): Gr. 3rd sing. E-vvn Herodian II 507 22 L ($v \in \omega$ from *s $n \bar{e} - v \bar{o}$), Lat $n \bar{e} - s$ $n \bar{e} - m v s$ (ep. O.H.G. $n\bar{a}u$ 'I sew' for *(s) $n\bar{e}-i\bar{o}$); $\dot{s}n-\bar{o}-in$ O.Ir $sn\bar{a}-the$ 'thread' O.H.G. snuo-r 'cord, band'; Skr sná-van- Avest, sna-vare

'band, sincw' may be derived from *sn-ē- on the strength of Gr. $\nu \varepsilon \tilde{\nu} \rho \sigma - \nu$ 'sinew' (for *(σ) $\nu \eta - F - \rho \sigma - \nu$). * $\hat{g} n - \bar{e} - *\hat{g} n - \bar{o} -$ 'learn, know' from $\sqrt{\hat{q}}$ en- (Avest. ā-zainti-š 'information' Lith. pa--žintì-s 'knowing, knowledge', Skr. 2nd sing. imper. jn-a Class II B): Skr. opt. mā-yā-t and mēyá-t (§ 940), Gr ε-γνω-ν ε-γνω-μεν opt. γνοῖ-μεν, cp. O.H.G. knāu for *ĝnē-iō. O.C.Sl. znajetŭ for 'gnō-ye-.1') *myn-ē- from \(\sqrt{men-} \text{ think'} \) (Gr. μέν-ος 'mind' etc.): Gr. ε-μάνη ε-μάνη-μεν, Lith. min-ė mìn-è-me, cp. Goth. 3rd sing. munáib for *mun-ē-zi-di (§§ 708, 739); also *mn-ā- § 580 p. 122. *i-ē- *i-ō- 'go' from √ei-'go' (Gr. ¿-u): Skr. yá-ti yā-más mid. yā-mahē, Goth. 2nd sing iddjē-s (§ 478 p. 26), cp. Goth. j-ē-r 'year' and Gr. ώ-ρο-ς 'year' ω-οα 'season' O.C Sl ja-rū 'spring'; Lith. jó-ju 'I ride' and Lat. ¡ā-nu-s jānua doubtless from +2-ā-, from the same √ez- (cp. Lat. conj. e-ā-s). ¹bhu-ē- *bhuu-ē- from √bheu-'become, be' (Skr. bháv-a-ti). Gr. έ-ανή έ-φνη-μεν, O.C.Sl. 2nd and 3rd sing. imperf. bě for *bhyē-s -t (beside běchů běchomů etc. like želěchů etc. beside želě, dělachů etc. beside děla and the like), the same stem in Lat. fe-tu-s; *bhu-o- perhaps in Gr. ωω-λεό-ς O.Icel. bō-l 'resting-place, position'; cp. *bhu-ā-*bhuu-ā- § 579 p. 121. *u-ē- *u-ō- 'to blow' (cp. the Author, M. U. 1 27 ff., Per Persson, op. cit., 91, 225): Skr vá-ti pl. vá-nti (vá-ya-ti), Gr. αη-σι mid. ἄη-ται, Lat ventu-s Goth. vind-s 'wind' for *u\(\bar{e}\)-nt-o- like Gr. \(\delta\)-evr- for *\(\delta\)-vt- (I \(\xi\) 612 p. 462, § 614 p 464), cp. Goth. vaia for *uē-vō O.C.Sl. vě-je-tŭ; *μō- in Gr. ἀω-το-ς 'down, piece of wool' (Goth. perf $vai-v\bar{o}$ is doubtless a re-formate following $sai-s\bar{o}$ from $\sqrt{s\bar{e}}$ sə-, see §§ 883, 884). bhs-ē- *bhs-ō- (cp. I § 552 p. 403) 'pound small, chew, grind up' beside Skr. bá-bhas-ti Class V (§ 556 p. 108): Skr. psá-ti, cp. Gr ψη for *ψη-μει; *bhs-ōin Gr. ψω-ω ψω-χω 'I grind or rub to powder' ψω-φό-ς 'scabby'. *liq-ē- from Vleiq- 'leave' (Gr: λείπ-ω etc.). Gr.

¹⁾ It is true that O.H.G. $l.n\bar{u}u$ is not an unexceptionable example for $*\hat{g}n-\bar{e}-$. It might be assumed that this present was formed in connexion with a perfect Goth. $*kai-kn\bar{v}$ and on the analogy of $*s\bar{e}-i\bar{v}$ (Goth. saia O.H.G. $s\bar{u}u$): $sai-s\bar{v}$ from $\bigvee s\bar{e}-(s\bar{e}-)$.

 $\dot{\varepsilon}$ - $\lambda l\pi$ - η - ν - η - $\mu \varepsilon \nu$, Lat. lnc-e-t.\(\begin{align*} \text{Lat. } \text{lac-\$\bar{e}\$-s -\$\bar{e}\$-mus, Lith su-skat-e 'he leapt up'.} \end{align*}

With dissyllable stems in $-\bar{e}$ -, in which the root remained a separate syllable, the \bar{e} -suffix does not appear in so many different parts of the verb as with monosyllabic stems. In a number of verbs, especially intransitive verbs, of the European languages, a firm connexion sprang up between present formations with the suffix -io- and forms with $-\bar{e}$ -, as Gr. $\mu a i \nu o \mu a i \nu a i \nu a i \nu a$. See § 708.

§ 588 Aryan. Almost all the Sanskrit forms which can with any kind of certainty be placed in this class have been mentioned in § 587 Beside yā-ti we have Avest. yāiti; beside vā-ti, Avest. vāiti 3rd pl. vā-nti.

In this class was conjugated Ar. $p\bar{a}$ - 'protect', whose $-\bar{a}$ -, in view of Gr. $\pi \omega \bar{\nu}$ 'herd' (II § 104 p. 315, § 105 Rem. p. 318) seems to look like Idg. $-\bar{o}$ -: 2^{nd} sing. Skr. $p\hat{a}$ -si, Avest. $p\bar{a}$ -hi, imper. 3^{rd} sing. Skr. $p\hat{a}$ -tu Avest. $p\bar{a}$ -tu O.Pers. $p\bar{a}$ -tu 2^{nd} sing. Skr. $p\bar{a}$ -ti O.Pers. $p\bar{a}$ -tu 2^{nd} sing. Skr. $p\bar{a}$ -ti O.Pers $p\bar{a}$ -dīy 2^{nd} pl. Skr. $p\bar{a}$ -ti Avest. $p\bar{a}$ -ta, opt. Avest. $p\bar{a}$ -yū- $p\bar{a}$. On $\pi\omega \bar{\nu}$ $\pi\omega - \mu \dot{\gamma} \nu$, compare now Per Persson, in the work so often cited, 118.

§ 589. Greek. Of monosyllabic stems may be further mentioned (cp. § 587)· $\varphi\varrho$ - η - 'bring' from \sqrt{bher} - $(\varphi \dot{e}\varrho$ - $\omega)$: $\dot{\epsilon}\varkappa$ - $\varphi\varrho\eta$ - $\tau \omega$ 'is let out' partic $\dot{\epsilon}\pi$ - $\epsilon \iota \sigma$ - $\varphi\varrho\epsilon \dot{\epsilon}\zeta$ infin. $\epsilon \dot{\epsilon}\sigma$ - $\varphi\varrho\tilde{\eta}\nu\omega\iota$ (forms like imper. $\varphi\varrho\dot{\epsilon}\zeta$ come by analogy of $\ddot{\eta}\mu\iota$ and the like, see the Author, Fleckeisen's Jahrb. 1880, 217 ff.). $\chi\varrho$ - η - 'wish, desire' beside Skr. $h\dot{\alpha}r$ -ya-ti 'desires': 2^{nd} sing. $\chi\varrho\tilde{\eta}$ - $\sigma\vartheta\alpha$, cp. $\chi\varrho\tilde{\eta}$ for * $\chi\varrho\eta$ - $\iota\xi\iota$ (Mekler, Beitr. zur Bildung des gr. Verb., pp. 23 f.). $\kappa\lambda$ - η - 'call' beside $\kappa\alpha\lambda\dot{\epsilon}\omega$: Cret. part. $\dot{\alpha}\nu$ - $\kappa\lambda\eta$ - $\mu\epsilon\nu\sigma$ - ς beside $\dot{\alpha}\nu\alpha$ - $\kappa\alpha\lambda\dot{\epsilon}\omega$ (Th. Baunack, Philologus xlix 593 f.), cp. $\dot{\omega}\mu\sigma$ - $\kappa\lambda\dot{\eta}$

¹⁾ Bersu (Die Gutturalen, p. 154) denies that licet and linquō are connected, because licet has c, and qu would be expected. I conjecture that there was once a form *licιō (Skr. ric-ya-tō Gr. λίσαωμεν § 707), which came regularly from *licu-yō (as farciō comes from *farcy-yō § 715). Hence licet, Compare § 708.

(Hom $\delta\mu\nu\lambda\lambda\dot{\epsilon}o\mu\epsilon\nu$). $\sigma\beta$ - η - 'quench' beside $\sigma\beta$ - $\epsilon\sigma$ - (§ 643) \sqrt{seg} - ϵ - $\sigma\beta$ - η - ν $\dot{\epsilon}$ - $\sigma\beta$ - η - $\mu\epsilon\nu$ We must also mention in this place, although it is true they are not all old formations, some forms of the 2^{rd} sing. aor. in $-9\eta_{\varsigma} = \text{Skr.}$ -thās (see below), as $\dot{\epsilon}$ - $\beta\lambda\dot{\eta}$ - η_{ς} beside $\ddot{\epsilon}$ - $\beta\lambda\eta$ - τo , $\dot{\epsilon}$ - $\nu\dot{\eta}$ - η_{ς} beside $\ddot{\epsilon}$ - $\nu\nu\eta$, see § 587 p. 127, $\dot{\epsilon}$ - $\varrho\varrho\dot{\eta}$ - η_{ς} beside $F\varrho$ - η - 'speak' $\dot{\varrho}\eta$ - $\tau\dot{o}$ - ν = Avest. $urv\bar{a}te$ -m 'determination, command' (I § 157 p. 141) from ν ν ν - ν - ν - ν (Gr ϵ - ν 00) Lat. ν 00- ν 10 $\dot{\nu}$ 10 $\dot{\nu}$ 20 beside ν 10- ν 20 beside ν 20- ν 30 beside ν 30- ν 40 beside ν 40- ν 50 beside ν 50- ν 60 call' $\dot{\nu}$ 00- ν 60 beside ν 60- ν 70 call' $\dot{\nu}$ 00- ν 70 beside ν 70- ν 90 beside ν 90- ν 90 beside ν 90 beside ν 90- ν 90 beside ν 9

Of dissyllabic stems we have already mentioned $\dot{\epsilon}$ - $\mu \dot{\alpha} \nu - \eta - \nu$, $\dot{\epsilon}$ - $\phi \dot{\nu}$ - $\eta - \nu$, and $\dot{\epsilon}$ - $\lambda i \pi - \eta - \nu$ in § 587. This $\bar{\epsilon}$ -formation, with intransitive meaning, became fertile (this is what the grammars call the "strong aorist"); a few further examples are $\hat{\xi}$ - $\delta u \rho - \eta - \nu$ 'I was flayed' \sqrt{der} -, $\hat{\xi}$ - $\rho \rho v' - \eta$ 'flowed' \sqrt{sreu} -, ἐ-τάρπ-η-ν έ-τράπ-η-ν 'I enjoyed myself, was glad' Vterp-, ŝ-κλάπ-η-ν 'I let myself be deceived, was deceived' √ qlep-, $\dot{\epsilon}$ - $\mu i \gamma$ - η - ν 'I mixed myself' $\sqrt{mex}\hat{k}$ -, $\dot{\epsilon}$ - $\zeta i \gamma$ - η - ν 'had myself yoked, was joined' \sqrt{jeug} , $\frac{1}{\epsilon}$ - $\sigma\acute{\alpha}\pi$ - η 'rotted' from $\sigma\acute{\eta}\pi$ - ω 'cause to rot', έξ-επλάγη-ν 'I was frightened' from pres. έν-πλήττω cp. Lith. ptāk-e 'he struck' (pres. plak-ù). There was a reason why this category should become very large. Medio-passive forms of the 2nd sing. in $-9\eta\varsigma$, as $\dot{\epsilon}-\delta\dot{\phi}-9\eta\varsigma = \text{Skr. }\dot{\alpha}-d\imath-th\bar{\alpha}s$, $\dot{\epsilon}$ -κτά-θης = Skr. ά-kšα-thās (Class I), $\dot{\epsilon}$ -βλ-ή-θης beside $\ddot{\epsilon}$ -βλ--η-το (Class X), $\dot{\epsilon}$ -σχ- $\dot{\epsilon}$ -θης beside $\ddot{\epsilon}$ -σχ- ϵ -το (Class II B); and forms from the s-aorists, as έρείσθης beside έρείσατο (έρείδ-ω) 'I support, press against'), $\dot{\epsilon}\mu\dot{\epsilon}\chi\partial\eta\varsigma=*\dot{\epsilon}-\mu\epsilon\iota\kappa$ - σ - $\partial\eta\varsigma$ beside $\ddot{\epsilon}$ μεικτο = * $\dot{\epsilon}$ -μεικ-σ-το μίγ-ν $\bar{\iota}$ -μι 'I mix'); 2) — these were all regarded as being on a par with $i\lambda i\pi \eta$ -c etc., and then, by analogy of $i\lambda i\pi \eta - \nu$ $i\lambda i\pi \eta$ etc. we have $i\delta i\theta \eta - \nu$ $\dot{\epsilon}\delta\delta\theta\eta$ and so forth, that is, from this grew the whole series of the "weak agrist passive". Compare O.Ir. 1st sing, -burt by analogy of 3rd sing. -bert, where -t is the middle personal

¹⁾ $\partial \varphi \phi \partial \eta$, $\partial \varphi \phi \partial \eta$, 1 e *e- ψv -e-thēs follows Class II B (§ 527 p 90), cp. Skr. d-khy-a-t beside khy- \bar{a} -ti, imper. $j\hat{n}$ -a beside $j\hat{n}$ - \bar{a} -sya-ti, etc

²⁾ Compare § 836, on ε-κορέσ-θης and § 840 on ε-κρεμάσ-θης.

ending -to (§ 506 pp. 72 f.), and Lith. 1st sing. eith by analogy of 3^{rd} sing. $e\bar{t}-t = Gr$. $\epsilon\bar{t}-\sigma_t$ (§ 686 Rem 2).

Dissyllabic stems with $-\bar{o}$, are rare in Attic (cp. $\hat{\epsilon}$ -γήρα-ν § 582 p. 123) · $\hat{\epsilon}$ άλω-ν for * $\hat{\eta}$ -hαλω-ν (§ 479 p. 27) 'fell a prisoner, was captured' 1st pl. $\hat{\epsilon}$ άλω-μεν partic. άλόντ-; $\hat{\epsilon}$ -βίω-ν 'I lived' 1st pl. $\hat{\epsilon}$ -βίω-μεν.

The Aeolic dialect inflects the whole group of newly formed denominatives in $-\epsilon\omega$ and $-\delta\omega$, and the Causatives in $-\epsilon\omega$ (Class XXXII) as though belonging to Class X, e. g. Lesb. φίλη-μι 'I love, am wont' from φίλο-ς, φόρη-μι 'I carry' (Class XXXII), στεφάνω-μι 'I crown' from στέφανο-ς (Att. φιλώ for $\varphi i \lambda \dot{\epsilon} \omega$, $\varphi o \varrho \tilde{\omega}$ for $\varphi o \varrho \dot{\epsilon} \omega$, $\sigma \tau \dot{\epsilon} \varphi \alpha \nu \tilde{\omega}$ for $\sigma \tau \dot{\epsilon} \varphi \alpha \nu \dot{\omega}$), 2^{nd} pl. φίλη-τε στεφάνω-τε, 3rd pl. φίλεισι στεφάνοισι for *-ενσι *-ονσι (I § 205 p. 172), mid. φίλη-μαι στεφάνω-μαι. This was a new formation entirely, which came naturally because other tenses than the present were alike in the two classes, for instance ἀήσεται: φιλήσεται, γνώ-σεται στεφανώ-σεται, and because of the old Aeolic inflexion of \bar{a} -stems (§ 578 p. 120), for verbs in $-\eta\mu\iota$, another factor in the change may have been reduplicated stems like ri-xη-μι Class XI (§ 594), and the singular indic. pres. of verbs in -ημι or -ωμι may have been influenced by $\tau i \partial \eta - \mu \iota \delta i \delta \omega - \mu \iota$ respectively. 1) However, it must not be forgotten that φιλέετε στεφανόομεν would regularly become φίλητε στεφάνωμεν in Aeolic.

590. Italic. Of stems originally monosyllabic I mention a few others (cp. § 587). $fl-\bar{e}-s$ $fl-\bar{e}-mus$, connected with O.H.G. $bl\bar{a}u$ 'I blow' Gr. $\varphi\lambda-\dot{\epsilon}\omega$ $\varphi\lambda-\dot{\epsilon}\omega$ 'I overflow, trickle' and doubtless with $fl-\bar{e}-s$. Compare also $spr-\bar{e}-vi$ $spr-\bar{e}-tu-s$

¹⁾ Compare especially 2nd 3rd sing. φέλη είλη like τίθης τίθη, variants φέλει; φέλει; and στεφάνοις στεφάνοι like δίδοις δίδοι. Similarly, we have τέμαις τέμαι like ἴσταις ὶσται. Then the diphthong passes to the 1st sing., giving στεφάνοιμι τέμαιμι (op. ἰσταιμι).

from $sper-n\bar{o}$; $qui-\bar{e}-sc\bar{o}$ $qui-\bar{e}-v\bar{\iota}$, connected with Avest. $\check{s}y\bar{e}\imath ti-\check{s}$ 'wellbeing, place of delight, home' (II § 100 p. 297) and Gr. $\tau \varepsilon - \tau i \eta - \mu a\iota$ 'I am frightened' (de Saussure, Mém. Soc. Ling., vii 86 f.) beside Goth. hvei-la 'while, time' O.C.Sl. $po-koj-\check{\imath}$ 'rest'; $(g)n-\bar{o}-sc\bar{o}$ $(g)n-\bar{o}-v\bar{\imath}$ beside Gr. $\check{\varepsilon}-\gamma v-\omega - v$ (§ 587 p. 128).

Dissyllabic stems, usually with intransitive meaning (cp. the Greek "passive agrist" in -n-v § 589 p. 130). lic-e-t, Osc. líkítud licitud 'hceto' · Gr. ε-λίπη, § 587 p. 129. vid-ē-s vid--ē-mus, cp. Lith. pa-vydé-ti 'mvidere' O.C.Sl. vid-ě-ti 'to see'; video for *uid-e-20 like Goth. vitái-p 'looks towards something, observes', notice Umbr. virseto 'visum'. sil-ē-s, with sileō cp. Goth. silái-p 'silet'. rub-ē-s, cp O.C.Sl. rud-ě-ti 'redden, blush'. fav-ē-s, cp. O C.Sl. gov-ĕ-tı 'religiose vereri, εὐλαβεῖσθαι, venerari, αἰδεῖσθαι' (see Ber. sachs. Ges. Wiss., 1889, p. 47); faveō like gověja. val-ē-s, cp. Lith. gal-ë-ti 'to be able' (not so Bezzenberger in his Beitr. XVI 256). tac-ē-s: O.H.G. dag-ē-s 'art silent'; tac-eō like Goth. pahár-p; observe Umbr. tašez tases tases 'tacitus' pl. tasetur 'taciti'. Umbr. habe 'habet' habetu habitu 'habeto': O.H.G. hab-ē-s (\sqrt{khap} - khab- or khabh- khab-). Further, Lat clu- \bar{e} -s \sqrt{kley} , torp- \bar{e} -s for *trp- \bar{e} - (I § 303 p. 241); cand- \bar{e} -s doubtless for *q\bar{n}d-\bar{e}- from \scales(s)qend- (Skr. \bar{s}cand-r\alpha- cand--rá-, cán-scad-a-t); liqu-ē-s and others; Osc. loufit 'libet, vel' (Bréal, Mém. Soc. Ling IV 145 f., 404 f.) beside Lat. lubet, closely connected with Goth. lubáin-s 'hope', and, as we shall see in § 708, with Skr. pres. libh-ya-ti, Umbr. trebeit 'versatur' from \sqrt{treb} - 'build', which doubtless comes from *treb-ē-ti rather than *treb-ī-ti 1st sing. *treb-iō (in Class XXVI, § 715). With nasal suffix, Lat. langu-ē-s from $\sqrt{sl\bar{e}g}$ - (§ 632). On this present in -eō compare § 708.

In the same way are inflected a late group of denominative verbs in $-e\bar{o}$, and the Causatives in $-e\bar{o}$ (Class XXXII), e. g. albeō albē-s etc. from albu-s, and moneō monē-s etc. See §§ 777, 802.

§ 591. Keltic. I know nothing that can be classed here. do-gniu 'I do, make, work' 3rd sing. gnuth, inflected just like

biu, which comes from *bhu-ijō (§ 719), is therefore from *gn-ijō not *gn-ē-ijō.

§ 592. Germanic Goth. iddja 'I went' iddjē-s (pl. iddjēdum following nasidēdum). Skr. á-yā-m, see § 478 p. 26, § 587 p. 128, § 886 Rem Goth. vind-s O.H.G. wint O.Icel vindr 'wind': Lat. ventu-s contains the participle *uē-nt-'blowing', see § 587 p. 128 Elsewhere, monosyllabic stems only have the 20-suffix (Class XXVIII), as Goth. vaia O.H.G. winu 'I blow' for *uē-2ō.

To this tenth class belong dissyllabic stems in -ē- as inflected in Old High German dag-ē-m 'I am silent' -ē-s -ē-t -ēm-ēs -ē-t -ē-nt-· Lat. tac-ē-s etc, habē-m: Lat. hab-ē-s, see § 590 p. 132. dol-ē-m 'I suffer, endure', cp Lith. tylė-ti 'to be still, silent' (long i not original), common ground-form *tyl-ē- from \(\subset \tel-\). leb-ē-m 'I live', cp O.C Sl. pri-lipē-ti 'hold or cleave to' Gr. ἀλιφῆναι from ἀλείψω 'anoint, smear' (for the derived meaning compare O Icel. lifa 'be left over, live'). On these O.H G. verbs in -ēm and their relation to Goth. verbs in -a--áis (as dagēm· paha) see § 708

§ 593. Balto-Slavonic. O C.Sl bě 'cras, erat' for *bhu-ē-s *bhu-ē-t, see § 587 p 128. Lith. ent- 'going' perhaps for * χ -ē-nt, beside Goth $\iota dd\jmath$ -ē-s Skr. χ -d-nt-, see § 511 p. 77.

Then comes the Lith. preterite in -e (3rd sing.), whose high antiquity in Baltic is vouched for by Pruss weddē = Lith. vēde 'he led'. pýle, mine, su-skate were mentioned in § 587, plāke in § 590 Compare further vìre from vér-du 'I cook, boil', mìre from mìr-sztu 'I die', gime from gem-ù 'I am born', gine from gen-ù 'I hunt, drive', tāpe from tamp-ù 'I become' (as to e in the root-syllable of vémé from vemuù 'I vomit', géfé from geniù 'I drink' and the like, see § 894). These forms had originally secondary endings, *-ē-m *-ē-s; the 1st and 2nd sing., however, were transformed, the endings of suk-ù suk-ù being added to -ē-, and then -ē-u -ē-i became regularly -iau -ei, as vedšiaū vedeī, viriaū vire

(Wiedemann, Lit. Praet., 32, 184) 1) Compare § 586 p. 126 on buvaũ buvaũ, and § 991.1

Lastly should be mentioned imperatives like *miné-k* 'think of' *pa-vydé-k* 'invide'; these answer to the Greek and Latin imperatives $\mu \dot{\alpha} \nu \eta - \vartheta \iota \ vid\bar{e}$ (§ 708).

Class XI.

Reduplicated Root + $-\bar{a}$ -, $-\bar{e}$ -, $-\bar{o}$ -, forming the Present Stem.

§ 594. Reduplicator in -i (compare Classes III and IV).

Reduplicated Root + - \bar{a} -. Pr. Idg. * g_i - g_i - g_i - t_i 'goes' (ep. § 497 Rem. p. 57, § 579 p. 121) Skr. $j_i g_{\bar{a}}$ - t_i (2^{nd} pl. $j_i g_{\bar{a}}$ - t_i (partic. $j_i g_i$ - t_i (cp. G. Meyer, Gr. Gr.² p. 431), partic. $\beta_i \beta_i \hat{a}_j$.

Gr. $\varkappa i\gamma - \varkappa \rho \bar{\alpha} - \mu u$ 'I mix' imper $\dot{\epsilon}\gamma - \iota L \rho \bar{\alpha}$, beside Skr. $\dot{s}r - \bar{a} - ti$ Class X (§ 580 p. 122), ep. below, on $\pi \iota \mu - \pi \lambda \eta - \mu u$. Gr. $\delta \iota - \zeta \eta - \mu u$ I seek, strive' for $\dot{s}\delta - \delta \iota - \bar{\alpha} - \mu u$ beside $\delta \iota - \zeta - \sigma - \mu u$, Class IV B (§ 549 p. 106) and beside Skr $\dot{a} - d\bar{\iota} - d\bar{\iota} - t$ Class III (§ 537 p. 97), $\dot{s}\delta \mu - \bar{\alpha} - u$ we infer from Aeol. $\zeta \dot{\alpha} \tau \eta \mu u$ (Att. $\zeta \eta \tau \dot{\iota} \omega$) and Dor. $\zeta \bar{\alpha} \tau s \dot{\nu} \omega$ from the partic. $\dot{s}d \dot{\iota} - \bar{\iota} - t \sigma - \iota$

Possibly Idg. -ā- is contained in Germ. *ti-tr-ō-mi O.H.G. zittarōm 'I tremble' O.Icel. titra 'I tremble, shake', from \(\nu\) der-'burst' (cp. Skr. \(dar\)- 'push apart, lose one's head, be frightened').

Reduplicated Root + - \bar{e} - Gr $-\pi i$ - $\pi \lambda \eta$ - $\mu \iota$ $\pi i \mu$ - $\pi \lambda \eta$ - $\mu \iota$ imper. Hom. $\hat{e}\mu$ - $\pi i \pi \lambda \eta \vartheta \iota$ partic. $-\pi \iota \pi \lambda \iota \iota \iota \iota$ (Hesiod, Hippocrates) beside $\pi \lambda$ - $\tilde{\eta}$ - τo Class X § 587 p. 127. $-\pi i$ - $\pi \varrho \eta$ - $\mu \iota$ $\pi \ell \mu$ - $\pi \varrho \eta$ - $\mu \iota$

¹⁾ I hold Wiedemann's explanation of -iau to be correct, nothwithstanding Streitberg to the contrary (Idg. Forsch, I 267). Streitberg has overlooked one fact. to wit, that the diphthong -zu in these words first appeared in Baltic, and is not so old as the pre-dialect period of Balto-Slavonic.

'I kmdle', V per- $i\lambda\eta\mu$ u 'I am gracious' imper. Hom. $i\lambda\eta\vartheta\iota$ for * $\sigma\iota$ - $\sigma\lambda\eta$ -, V sel-. $\varkappa\iota$ - $\chi\varrho\eta$ - $\sigma\iota$ 'lends, borrows' Dor. $\varkappa\iota\gamma$ - $\chi\varrho\eta$ - $\tau\iota$, beside $\chi\varrho$ - η and $\chi\varepsilon\varrho$ - $\nu\eta'$ s' 'needy, poor'. $\tau\iota$ - $\tau\varrho\eta$ - μ u 'I bore', V ter- $\tau\dot{\varepsilon}\varrho$ - ε - $\tau\varrho\sigma$ - ν , cp. O H.G. $d\iota\bar{u}u$ 'I turn' from the same stem tr- \bar{e} - (§ 739). The weak persons of these Greek verbs (and probably of $\varkappa\iota\gamma$ - $\varkappa\varrho\bar{u}$ - μ u too) usually follow Class III, as $-\pi i\pi\lambda u$ - $\mu\varepsilon\nu$ = Skr. pi-pr- $m\acute{a}s$, $i\lambda\alpha$ - $\mu\alpha\iota$ $\tau\acute{\iota}\tau\varrho\alpha$ - $\mu\alpha\iota$ etc. ($i\lambda\alpha$ - $\vartheta\iota$ beside $i\lambda\eta$ - $\vartheta\iota$, $\pi\iota$ - $\mu\alpha\lambda\dot{\alpha}\dot{c}$ beside $-\pi\iota\pi\lambda\varepsilon\dot{c}$), this was due to present tenses like $i\alpha\tau\eta\mu\iota$ $i\alpha\tau\alpha\mu\varepsilon\iota$. Sanskrit offers a parallel in forms of the perfect system like pa-pr- $\dot{\alpha}$ pa-pr- $v\acute{\alpha}$ s-(§ 850). See § 542 p. 102, § 621, where too is given the origin of the nasal in the reduplicator of $\pi\iota\mu$ - $\pi\lambda\eta\mu\iota$ $\iota\iota\gamma$ - $\varkappa\varrho\bar{\alpha}\mu\iota$ etc. (1)

Gr /-χ-η-μι 'I reach, find, catch up' 1st pl /-χη-μεν· partic κι-χή-μενο-ς. Origin uncertain

O.H.G. wi-wint 'whirlwind' beside wint (§ 592 p. 133) was perhaps reduplicated first as a substantive

§ 595. Fuller Reduplication (cp Class VII) Skr. dárr-drā-ti beside dr-á-ti 'runs', yāyā-ι ará-s 'walking or moving about' from a presumed *yā-yā-ti connected with y-á-ti 'goes'. Armen. mr-mi-a-m mr-mi-a-m 'inurmuro, fremo, rugio', Lat. 2nd sing mur-mur-ā-s, OHG mur-mur-ō-s murmulō-s 'murmurest', beside Gr. μορμέρω for *μορ-μυρ-μω Class XXVII (§ 730). Lat. 'tin-tinn-ā-s tin-tin-ā-s beside tin-tinn-iō Class XXVII (§ 731). Lat. ul-ul-ā-s, Lith. imper ul-ūl-ó-k

Is Thess inf. ἐσ-κιχρέμεν (Collitz, Samml no. 1557) an adformate of τιθέμεν, or did it come from an indic. *κίχρω (op προσσέμεν)?

indic. ul-ūl-ó-ju (cp. § 735) The Lat 1st sing., murmurō tintinnō ululō for -ā-jō (cp. Lith. ul-ūl-ó-ju) in Class XXVIII (§ 741)

D. CLASSES XII TO XVIII. NASAL PRESENT STEMS

§ 596. Specimen types of words which belong to this section are Skr. $mr-n\acute{a}-ti$ $r-n\acute{o}-ti$ $yun\acute{a}k-ti$ with the thematic $mr-n\acute{a}-ti$ $r-nv\acute{a}-ti$ $yu\~n\'{j}\acute{a}-ti$, and Skr. $krp-\acute{a}na-t\~e$.

A few remarks are necessary on these nasal accretions, which beyond all doubt are closely connected together.

- (1) Skr. m_l -ná-ti m_l -ná-ti m_l -ná-ti r-nvá-ti r-nvá-ti r-nv-ánti, r-nvá-ti r-nv-ánti, r-nvá-ti r-nv-ánti, r-nvá-ti r-nv-ánti, r-nvá-ti r-nv-ánti, r-nvá-ti r-nvá-ti
- (2) The suffix -neu--nu- is made out of -nā--na--na-(Skr mṛ-nā-mi Gr. μάρ-να-μαι Skr mṛ-n-ānti) by adding the suffix or determinative -eu--u- This -u- has been discussed, § 488 pp 44 ff.

We often find -u- and -nu- in the same root, as *str-u-(Goth stráu-ja) and *str-nu- (Skr. str-nō-ti Gr. $\sigma r \acute{o} \varrho - \nu \bar{\iota} - \mu \iota$), from \sqrt{ster} 'sternere', ' $\hbar l$ -u- (Skr $\dot{s}r$ - \dot{o} - $\dot{s}i$ $\dot{s}r$ -u-dhí) and * $\hbar l$ -nu- (Skr $\dot{s}r$ -nō-ti) from a $\sqrt{\ell}a^*l$ -, never found except with one of these extending suffixes; * $u_r l$ -u- (Gr. $\dot{\epsilon}\lambda$ - $\dot{\nu}\omega$ $\dot{\iota}\lambda$ - ν - $\nu \varrho o$ - ν Lat vol- $v\bar{o}$ in- $vol\bar{u}$ cru-m) and *ul-nu- *ul-nu- (Skr vl-nō-ti ul-no-ti) from \sqrt{ul} - 'turn, twist, wind', Skr. \dot{a} -dbh-ul-ta-s' undeceitful, pure, genuine' and dabh-nō-ti from dabh- 'deceive' *qs-u- (Gr. ξ - $\dot{\nu}\omega$) and *qs-nu- (Skr. $k\dot{\xi}$ -nuv- $an\dot{a}$ -s) from \sqrt{qes} - (II § 8 Rem. 2 p. 20); * $p\bar{\iota}$ -u- (Skr. $p\bar{\iota}$ -vas-) and * $p\iota$ -nu- (Skr. $p\bar{\iota}$ -nv-a-ti) from $p\bar{\iota}$ - 'swell, abound in'. The variant stems in Skr. $\dot{s}r$ - \dot{o} - $\dot{s}i$ and $\dot{s}r$ - $n\dot{o}$ - $\dot{s}i$ may be compared with those in Gr. $\vartheta\varrho \alpha \sigma$ -v- ε and Skr. $dhr\dot{s}$ -nu- \dot{s} (1st pl $dhr\dot{s}$ -nu- $m\dot{s}s$). Probably one of these parallel stems, say *qs-nu-, is a contamination of the

other two, *qs-n- (Gr. ξ -u'vw ξ -n'v-10-v) and *qs-u-, and *str-nuof *str-n- (Skr. str-n\dark -ti Lat ster-n\overline etc.) and *str-u-; \frac{1}{2}\) but
this must not be taken to imply that the contaminated suffix
-n-u- arose in just these roots and no others.

Remark. Some scholars, led by de Saussure, hold that *stineu-18 *steru- with an infix of inserted element -ne- That is all very well on paper, but under what principle of language known to us it can come passes my comprehension. They refer, of course, to yunak-ti, from Vjeug-*jug-, as a clear instance of inserted sounds. But I cannot admit that the nasal suffix has been inserted here any more than in the stem which I began with See (5) below, pp 139 f *s)

(3) After a root with final consonant ηn , en, and doubtless on are found as variants for the initial n of -na--no--ney--nyo-.

Compare Lat pōpulneu-s = pōpulnu-s + pōpuleu-s A large collection of such mixed forms containing formative suffixes of a similar sort, is given by Per Persson, Wurzelerw pp 153 f

²⁾ On Skr tanóti, which the Indians analysed as tan-ō-ti, see §§ 639, 640 kai ōti I still hold to be a later re-formate, although Per Persson, op. cit p. 149, opposes this view See § 640.

³⁾ Fick is keenest about these "infixes" Thus in one place he speaks of the "repetition of infixed s" in Greek acrists in -aux and Sanskrit acrists in -sišam (Gott Gel Anz, 1881, p 1429) Page 1460 infixion is the "oldest" and most powerful agent which causes word to grow out of word". Page 1462 "Almost always, where hitherto scholars have seen suffixes, that is, defining words added to the end of another, it is far better to speak of infixes". One question I should like to ask. Where did these infixed sounds come from, and what were they before they were infixed?

For -nā- -n(a) take the following: Avest. 1st pl. fry-an-mahī beside frī-nā-iti 'pleases, makes inclined', hv-an-mahī beside hu-nā-iti 'excites, produces'. For -no-. Skr. iš-ana-t let him set in motion' op iš-anyá-ti = Gr. laívw for *lo-av-lw (-nno-), Armen. lk-ane-m 'I leave' (-nno-), Gr. rō-á-av-w 'I honour, glorify' (-nno-), Goth. ga-vakna 'I awake' (-nno-, -eno-, or -ono-), Lith. kùp-inu 'I heap, hoard' (-nno-), gab-enù 'I bring' (-eno-), O.C.Sl. vrīg-na-ti 'to throw' (probably -ono-, see § 615 Rem)

For -ney- -nu- Skr vánanv-at- 'liking' for 'ynn-nybeside indic vano-ti for *un-neu-ti from \(\sqrt{uen-: Avest, 2^{nd} pl.} \) debe-naotā for *db-anau-ta (-anau- instead of -anu- from the singular) beside Skr. dabh-no-ti 'hurts'; Avest. partic. mid zar--anu-mana- beside opt. zar-anae-mā and Skr. hr-nī-té 'growls, For -nuo- Avest. xw-anva-inti 'they drive on' grumbles' .cw-ēnva-p (pr. Ar. *su-anua-) beside hu-nao-iti hu-nā-iti Avest. sp-ēnva-p 'proficiebat' doubtless the same as O.HG sp-innu 'I spin' for *sp-enuō beside spannu 'I stretch' for *spo-nuō and beside spanu 'I lure, attract' for *spa-nō (§ 654); O.H.G tr-innu 'I separate myself from' ground-form *dr-enuō beside Skr. dr--μά-tι Greek examples are apparently Hom. in-άνω for *iν--arfω beside iz-νέο-μαι and zιχάνω for *χι-χ-ανfω, whose ending doubtless comes from -nuō (see § 652), and \(\xi_{\epsilon\text{\$r}}\overline{Fo-g}\) \(\xi_{\epsilon\text{\$r\$}}\overline{Fo-g}\) ξένο-ς from the root of Lat. hos-ti-s and Goth. gas-t-s (cp. the Author, Idg. Forsch, 1 172 ff.).

Similar groups of suffixes, fuller and weaker, are found in other present classes -eno- -no- = -eso-: -so- (Class XX). -wno-:-no- = -120-: -20- (Class XXVI).

The only ones of these dissyllabic suffixes which were to any great extent productive were -no- -eno- (-ono-). These we place in a class by themselves (Class XIV).

(4) In classes where the *n*-suffix comes after the root syllable, it is not always as described in (3), just above. The root often has attached to it some kind of determinative Thus we see -ι- -ν̄- (cp. § 498 pp. 61 f), as in Skr. r-ι-nva-ti Gr. Lesb. ο˙ρ-ί-ννω beside Skr. r-nvá-ti Gr. ο˙ρ-ν̄-μι; Gr. πι-νύ-

- $\mu i \nu o - g$ for * $\pi F - \iota - \nu v$ - beside $\nu \eta - \pi \dot{\nu} - \tau \iota o - g$ Skr. $pu - n \dot{a} - t\iota$; Skr. $bhr - \iota - n \dot{a} - t\iota$ (Avest. $br \bar{o} i - pra - 'axe'$ O.C.Sl. $br i - t\iota$ 'shear, shave') beside Gr $\rho \dot{\alpha} \varrho - o - g$ Lat. $for - \bar{a}re$; Skr. $\dot{s}r - \bar{\iota} - n \dot{a} - t\iota$ beside $\dot{s}r - t \dot{a} - s$; Gr. Lesb $\varkappa \varrho - \iota - \nu \nu \omega$ (Lat. $dis - cr \bar{\iota} - men$) beside Lith. $skir - \imath \dot{\iota} \cdot s - es - (cp \S\S 656 ff.)$, as Skr. $\dot{i} - \dot{s} - n \dot{a} - t\iota$ $\dot{\iota} - \dot{s} \dot{a} - t \bar{e}$ beside $\iota - n \dot{o} - t\iota$; Gr. $\dot{s}' \nu \bar{\nu} \iota \iota \iota$ ($\dot{s} \nu \bar{\nu} \bar{\nu} \iota \iota$) Armen. z - genum common ground-form *u - es - n e u - u - u - u - u - u (§ 639). Other examples will be mentioned anon.

(5) Most obscure of all has hitherto remained the "nasal infix", the nasal element, that is, in such words as Skr. yunák-ti yunj-más and yunj-á-ti, and its relation to the nasal suffixes in the other Classes.

The strong form, Skr. yunaj- for example, has hitherto been found as a verb stem only in Aryan. Some other languages have been supposed to show traces of it, as Gr ~vvéw and Lat. conquinisco frümscor, which are said by some to be for *rvveo-w and *quenec-srō *früneg-scōr; but this in my opinion is the merest conjecture 1) If we must compare something from European languages, the most likely forms are the adjective Goth. manay-s OCSI. münogü 'multus' beside Skr. máha-tē 'is large, generous' maghá-m 'fullness, riches'.

Perhaps these nasal forms are merely a development of Class XII, by a change in the first instance of, say, *jug-n-més *jug-n-té (-n- the variant of -n--, cp. Avest. ver-n-tē and the like) to *jung-més *jung-té Then, by analogy of Skr. anák-ti and anj-más and other present forms with nasal in the root,2) we get the sing yunák-ti It should be remembered, however, that it is a prioi impossible to say whether a in

¹⁾ See Johansson, Deriv Verb Contr 108 f, Akademiske afhandlinger til prof Bugge, 24 ff.; W. Schulze, Quaest Hom. 15, 42, Fick, Vergl Wb. I 4 381, Kretschmer, Kuhn's Zeitschr XXXI 470 In discussing xvviw fxvoga no use can be made of O Corn. cussin and Mid Cymr cussan 'kiss', which are loan-words from the Germanic

²⁾ With anaj- op Goth. anak-s 'suddenly, at once' (Skr. άñjas 'quickly, suddenly'). Skr 2nd 3rd sing. pret. ānaţ 1st pl conj. anašāmahāi, vy-anaš-i 'penetrate' may be compared with Gr. δι-ηνεκ-ης (§ 569 p 113)

Skr. yunoj- comes from Idg -a-, -e-, or -o-. This assumed change of *jug-n- to *junog- must have come about in the parent language; and the singular persons may have been made in the same period. If the forms did grow as I suggest from the Class with $-n\bar{a}$ - $-n\bar{e}$ - -n-, it would at once become clear why of all the forms containg this suffix in any of its three grades, none is taken from a root with final explosive or fricative (§ 598) from these roots the parent language would then show (say) *junoq-taz = *jug-n-taz (Skr. yunok-tē), while others would have the nasal suffix in its proper place, and show the type of *yy-n-taz (Avest. ver*-n-tē).

Another view is set forth by Per Persson, Stud. Lehr. Wurz., 152 f. (cp too Windisch, Kuhn's Zeitschr. xxi 407) He thinks that in the oldest forms which set the type for the class with Nasal Infix, the root final was a determinative, and the nasal a suffix which was added to the root before the determinative was added. Then forms with the determinative and forms with the nasal were contaminated. Thus *limpō (Lith. limpù Skr. limpōmi) is a sort of combination of forms answering to Lat. li-nō and Lith. li-pù. There is nothing which makes this view impossible.

Yet another hypothesis, the latest, is offered by Osthoff. Anz. fur idg Sprach- and Alterthumskunde, I 83. He suggests that Skr. k_l nátmi- may he $\sqrt{k_l}$ - + present suffix -nat- (stronger form of -nt) - personal ending -mi; and by analogy rinc-más produced rinác-mi. But that there ever was a simple suffix Idg. -net- -nt- is, I hold, quite unproven; see § 685, Rem. 2

(6) Nasal Present Stems are often found as bases for Nouns. Examples are Skr νέ-na-ti 'longs' νδ-nά-s 'longing', Avest. peš-ana-ti 'fights' beside Skr. pṛt-ana-m 'battle', Gr. θηγ-άνω 'I sharpen' beside θηγ-ανο-ν 'whetstone', Skr. dhṛṣ-nō-ti 'is bold' dhṛṣ-nu-má-s beside dhṛṣ-nú-ṣ 'bold', Skr. pi-nva-ti 'makes to swell' beside -pn-nva-s 'making to swell', O H.G. bannu 'regions under ban, forbidden places' for *bhə-nuō beside ban, gen. bannes, 'command enforced by pains and penalties', cp. Gr. ξ-έν-Γο-ς p. 138. Compare § 487 pp. 40 f.

We shall now discuss the classes of nasal stems one by one. Of these we distinguish seven

Class XII.

Root + -nā- -no- -n- forming the Present Stem.

§ 597. The strong suffix was -nā-, the weak form before a sonant was -n-, before a consonant either -no- (Gr. μάρ-να--ται) or -n- (Avest. ver^e-n-tē).

Sanskrit, with -ni- before consonants (e. g. $mr-n\bar{\imath}-m\acute{a}s$), stands alone. $-n\bar{\imath}$ - displaces *-ni- = Idg. $-n\bar{\imath}$ - on the same principle as changes * $\dot{s}i-\dot{s}i-hi$ to $\dot{s}i-\dot{s}\bar{\imath}-hi$, so that we have $mr\bar{\imath}\bar{\imath}-m\acute{a}s: mr\bar{\imath}\acute{a}-mi$ like $\dot{s}i\dot{s}\bar{\imath}-hi:\dot{s}i\dot{s}\bar{\imath}-mi$. See § 498 pp. 61 f.

Remark Wiedemann's view (Lit. Pract. 49) that -ni- changed to $-n\bar{\imath}$ - by quantitative analogy of $-n\bar{\alpha}$ - I hold to be mistaken; and so also Bartholomae's, that m_1 - $m\dot{\alpha}$ -mi-mi-mi- $m\dot{\alpha}$ s contain a pr Idg ablaut, $-n\bar{\alpha}$ -being for $-n\bar{\alpha}$ 2- (Stud Idg. Spr, II 75 ff).

In Avestic, before sonants, not only -n- but -an-, seemingly representing Idg. -en-. fry-an- $mah\bar{\iota}$, see § 596.3 p. 138.

The Root Syllable has always, and always had, the weak form.

§ 598. Pr. Idg. All the forms which can be proved to be Indo-Germanic come from roots with final liquid, nasal, or vowel (cp. § 596.5 p. 139).

Skr. mṛ-nắ-mi 'I grind, crush' 3rd sing. mṛ-nắ-ti 1st pl. mṛ-nī-más 3rd pl. mṛ-n-ánti, Gr. μάρ-να-μαι 'I fight', partic. Coreyr. and Att. βαρ-νά-μενο-ς for *βρα-να- (I § 292 p. 233); μόρ-νά-μενο-ς in Hesych is either Aeolic for μαρ-να- (I § 292 p. 234) or all dialects of Greek for Idg. *mṛ-nə- (cp. Skr. mūr-nά-s). — With thematic vowel Skr. mṛ-ná-ti.

Gr. πορ-νά-μεν · πωλεῖν, πορ-νά-μεναι · πωλούμεναι (Hesych.) are as ambiguous as μορνάμενος, Att. πέρ-νη-μι 'I sell, transfer' with changed root-grade (ep. περάω), O.Ir. re-nım 'I give away, sell' (ep. § 604).

Skr. jā-ná-mi 'I learn, know' for 'ḡn-nā-; compare perhaps Lith. žìno 'he knows' for *ḡn-nā-t (whence žinaū žino-me etc. by analogy of $bij-a\tilde{u}-s$ and the like.\(^1\) — With thematic vowel Skr. $j\bar{a}-na-ti$ Avest. 2^{nd} pl. $z\bar{a}-na-t\bar{a}$, Goth partic. kunnand-s (indic. kann)

Skr. li-nā-mi 'I stick close to, cower, disappear' vi-lināmi 'melt, disintegrate, go to pieces', Gr. λί-να-μαι τρέπομαι Hesych., O.Ir. le-nim 'adhaereo' (cp. § 604), O.Icel. li-na 'I relax, grow soft'. — With thematic vowel Lat li-nō (cp. Gr. ἀλίνω 'ἀλείφω' for *άλι-νμω § 611).

Skr. krī-nā-mi 'I buy', O.Ir. cre-nim 'I buy' for *cri-na-mi (cp. O.Ir. crī-thid 'fond of buyıng'), cp. § 604.

Often a present stem is formed both in this twelfth class and in Class XVII, particularly in Aryan; e. g. Skr. kši-nā-ti and kši-nō-ti 'destroys'. Cp. § 605 Rem.

The likeness of the endings in the strong singular persons and those of the corresponding stems of Classes X and XI, in -ā-, caused a number of analogical changes. (1) -nā- passes into the weak persons, as O.H.G. gi-nō-mēs beside gi-nō-m, following zittarō-mēs (cp. § 594 p. 134) and salbō-mēs. (2) An extension with -zo- by analogy of the variation -ā-: -ā-zō- in Classes X and XI, as Gr. δαμνάω instead of δάμνημι, A.S hlinie 'I lean' instead of hli-nō-żō

§ 599. Aryan. Skr. $vr-n\bar{a}$ -ti 'chooses' mid. $vr-n\bar{\imath}$ -té, Avest. mid. ver^*-n -tē; — with thematic vowel Avest. 3^{rd} sing. pret. mid. $fraor^*nata$ = pr. Ar. *pra-vr-na-ta. Skr. $pr-n\bar{a}$ -ti 'fills'; 2) — with thematic vowel $pr-n\bar{a}$ -ti Avest. imper. $per^*-n\bar{a}$. Skr. $\dot{s}r-n\bar{a}$ -ti 'breaks up, crushes, grinds, splits up'; — with thematic vowel imper. $\dot{s}r-n\bar{a}$; cp. O.Ir. ara-chrinim 'difficiscor, I decay, break up' § 604. Ar. * $z\bar{a}$ - $z\bar{a}$ -1 to know' for * $z\bar{a}$ - $z\bar{a}$ - $z\bar{a}$ -1 know': Skr. $z\bar{a}$ - $z\bar{a}$ -1 sing. pret. $z\bar{a}$ - $z\bar{a}$ - $z\bar{a}$ -1 ith. $z\bar{a}$ - $z\bar{a}$ -1 skr. $z\bar{a}$ - $z\bar{a}$ -1 makes glad,

¹⁾ žīnō- may also be *ḡnn-ā- (Class X).

²⁾ One is tempted to identify this form with O.H.G. follom 'I fill'. This is probably at least a derivative from the adj. fol Goth. full-s, like O.Ir. com-alnaim from lan, see § 760.

makes inclined', Avest. $fr\bar{\imath}-n\bar{a}-\bar{p}$. Skr. $\jmath\imath-n\bar{a}-t\imath$ 'conquers, compels', \sqrt{ge} . Avest. injunct. $zi-n\bar{a}-\bar{p}$ 'draws away' O.Pers. $a-d\bar{\imath}-n\bar{a}$; — with thematic vowel O.Pers. $a-d\bar{\imath}-na-m$. Skr. $pu-n\bar{a}-t\imath$ 'purifies, clears', cp. Ir. $u-n\bar{a}-d$ 'to cleanse'? (Fick, Wtb. I\frac{1}{2} 483, according to Stokes). Skr. $dhu-n\bar{a}-t\imath$ moves to and fro, shakes' beside $dhu-n\bar{o}-t\imath$ $dh\bar{u}-n\bar{o}-t\imath$. Skr. $grbh-n\bar{a}-t\imath$ 'grasps', Avest. $ger^ew-n\bar{a}-it\imath$, — thematic Skr. $grh-na-t\imath$. Skr $badh-n\bar{a}-t\imath$ 'binds' for "bhpdh-, \sqrt{bhendh} -.

Remark Skr. mušnā-ti 'steals' is derived from the noun mūšmuš- 'mouse' (II § 160 p. 485). Similar words below in § 793

§ 600. Strong stem instead of weak. Skr. imper. 2^{nd} sing. $grbh-n\bar{a}-hi$ instead of $grbh-n\bar{\imath}-hi$, 2^{nd} pl. $pu-n\acute{a}-ta$ instead of $pu-n\bar{\imath}-t\acute{a}$. Compare Skr. $kr-n\acute{o}-tu$ instead of $kr-nu-t\acute{a}$ and the like, § 641.

There was naturally a close contact between thematic and non-thematic forms in Aryan, which made it easy for words to pass from one to the other. The 1st person singular and the 3rd plural present, with other forms, and the conjunctive mood, had regularly the same form in both: compare Skr. mṛnāmi mṛnānti from both mṛ-nā-ti and mṛ-nā-ti. Thematic stems are specially common in Avestic, compare 3rd sing. mid. ster*-na-tā opt. ster*-nae-ta beside Skr. stṛ-nā-ti 'strews', and 2nd sing. hu-na-hi beside hu-nā-iti 'begets'.

The Sanskrit 2^{nd} sing. imper. active, besides $-n\bar{\imath}-h\bar{\imath}$ ($-n\bar{a}-h\imath$), has the ending $-\bar{a}n\acute{a}$, found in classical Sanskrit with all roots ending in a consonant, as $grh-\bar{a}n\acute{a}$ badh- $\bar{a}n\acute{a}$. Two explanations of these are possible. (1) $-\bar{a}na$ may = Idg. -one, which may be a thematic imperative of Class XIV, where Slavonic has -ono- (see §§ 615, 624). Or (2), $-\bar{a}na$ may be $-\bar{a}-\bar{g}-+-na$, $-\bar{g}$ - being a weak form of the $n\bar{a}$ -suffix, and -na the same particle which we see with the 2^{nd} pl. in -ta-na (beside -ta). The second view seems better.

Remark Bartholomae now supports the view which analyses $-\bar{a}na$ into $-\bar{a}+na$, and identifies -na with -na in -ta-na -tha-na (Stud Idg. Spr, II 123), and cites by way of illustration the Avestic 2nd sing. imper bara- $n\bar{a}$, a variant for the usual $bara = \text{Skr. } bh\dot{a}ra$. But he explains $g_1^n\bar{a}$ -as derived from $g_1^n\bar{b}h\ddot{a}$, where I cannot follow him.

Exceptionally the 100t syllable has a strong grade. partic, mid. dp-n- $\bar{a}na$ -s like $\bar{a}p$ - $n\delta$ -m Class XVII, ep opt. aor. $ap\bar{e}yam$ and apas-apas-. But $\bar{a}p$ - may be preposition \bar{a} + ap-.

A few isolated forms in Sanskrit show a change from this class to -20-stems. partic. hgnā-yá-nt- hgnī-yá-māna-s beside a-hg-nā-t mid. hg-nī-tē. With forms like Gr. δαμνάω (§ 598 p. 142), hgnī-yá-nt- has no very close connexion

§ 601. Armenian. barna-m 'I raise' for *barj-na-m ground-form *bhṛḡh-nā-mi, cp. aor. barj-i. daina-m 'I return' for *darj-na-m, cp aor. darj-ay. bana-m 'I open' ground-form *bh¬nā-mi from √bhā- (p. 56 footnote), cp. aor. ba-c-i: Gr. φαίνω for *φα-νιω § 611, O.H.G. ba-nnu § 654. sta-na-m 'I possess, have in my power, buy', cp. aor. sta-c-ay: Gr. στά-νω 'I place' (G. Meyer, Gr. Gr.² p. 446) Lat. dē-stināre, O.C.Sl. sta-na 'I place myself'. lua-na-m 'I wash', cp. aor. lua-ç-i.

§ 602. Greek. $\mu\dot{\alpha}\rho$ - $\nu\alpha$ - $\mu\alpha$ ρ - $\nu\dot{\alpha}$ - $\mu\epsilon\nu$ ρ - ρ , $\pi\rho\rho$ - $\nu\dot{\alpha}$ - $\mu\epsilon\nu$ ρ - $\nu\eta$ - μ μ , $\lambda\dot{t}$ - $\nu\alpha$ - $\mu\alpha$ ν see § 598 p. 141 $\delta\dot{\alpha}\mu$ - $\nu\eta$ - μ ν I tame' beside $\delta\dot{\alpha}\mu\alpha$ - $\sigma\sigma\epsilon\nu$; for the root syllable compare $\star\dot{\alpha}\mu$ - $\nu\bar{\nu}$ and Skr. \dot{s} am- $-n\bar{t}$ - $t\bar{t}$ beside $\star\dot{\alpha}\mu\alpha$ - $\tau\rho$ - ρ \dot{s} am- $t\dot{\alpha}$ -s, $\ddot{\rho}\mu$ - $\nu\bar{\nu}$ - μ ν beside $\dot{\rho}\mu\dot{\rho}$ - $\tau\eta$ - ρ . $\delta\dot{\nu}$ - $\nu\alpha$ - $\mu\alpha$ ν I can' possibly connected with Lat. $d\bar{u}$ - $\tau\nu$ -s, but Gortyn. $\nu\dot{\nu}$ - $\nu\alpha$ - $\mu\alpha$ ν I can', probably belongs to some other root. $\dot{\nu}$

The ι of the root-syllabic is strange in the following stems. $\lambda'(\rho-\nu\eta-\mu\iota)$ 'I mix' beside aor. $\dot{\epsilon}/\dot{\epsilon}\rho\iota\sigma\alpha\iota$. $\pi\dot{\iota}\lambda-\nu\alpha-\mu\alpha\iota$ 'I draw near quickly' beside aor. $\dot{\epsilon}\pi\dot{\epsilon}\lambda\alpha\sigma\alpha$: cp. Lat. pellō for *pel-nō, O.Ir. adellaim 'I go to, visit' for $-(p)el-n\bar{\alpha}-$. $-(\rho)el-\nu\eta-\mu\iota$ 'I hang' (wrongly written $-(\rho)el\nu\eta\mu\nu$) beside aor. $\dot{\epsilon}\times\rho\dot{\epsilon}\mu\alpha\sigma\alpha$. $\dot{\epsilon}\rho\dot{\epsilon}\nu-\nu\alpha-\mu\alpha\iota$ 'I reach or stretch' beside $\dot{\epsilon}\rho\dot{\epsilon}\gamma\omega$. $\pi\dot{\epsilon}\tau-\nu\eta-\mu\iota$ 'I spread' beside aor. $\dot{\epsilon}\pi\dot{\epsilon}\tau\alpha\omega\alpha$; thematic $\dot{\epsilon}-\pi\iota\tau-\nu\rho-\nu$ $\pi\dot{\epsilon}\tau-\nu\omega$. $\sigma\varkappa\dot{\epsilon}-\nu\alpha-\mu\alpha\iota$ 'I spread or widen,

¹⁾ Can this be connected with reveo-r 'sinew, tension, strength'?

disperse' beside ἐσκέδασα Various explanations are given: see Osthoff, M. U II 20; Wackernagel, Kuhn's Zeitschr. xxix 126; Moulton, Am. Journ. Phil. X 284 f., and Class. Rev. III 45; Kretschmer, Kuhn's Zeitschr. xxxi 375 f.

With -10-flexion: δαμνάω, κιρνάω, δριγνάομαι, πιτνάω. Compare § 598 end, p. 142.

In δύ-να-μαι, the nasal was not confined to the present stem δυνατός έδυνησάμην έδυνήθην έδυνάσθην, like ἀγατός ἀγητός ἡγάσθη from ἄγα-μαι. Compare § 643, and τανύσσαι (from τα-νύ-μαι).

§ 603. Italic. (1) We find in Latin the non-thematic inflexion of Class XIII ster-nō (contrast Skr. str-nā-ti), li-nō (contrast Skr vi-linā-ti), pellō for *pel-nō (contrast Gr. πίλ-να-μαι), sper-nō (contrast O.H.G. spor-nō-m 'I tread, kick'), and no sound-law prevents our putting in this twelfth class ster-ni-mus -ni-tis, deriving them from *-na-mos *-na-tes (cp. § 505 p. 71, on red-dimus, and § 543 p. 103, on se-ri-mus)

(2) But some compounds are inflected as verbs in -are. con-sternare, beside () II G. stornem 'attonitus sum' (§ 605) Gr. $\pi \tau t \rho \omega$ 'I make shy, put in a fright'. ın-clīnāre: O.Sax. hli-nō-n 'I lean', cp Lett. sli-nu (beside sléiju) 'I lean on, support'. dē-stināre, cp Armen, sta-na-m 'I possess' Gr. στά--νω 'I place' and στα-νύω (§ 601 p. 144). So too com-pellare from pellere, aspernari from spernere It is assumed that a similarity in the endings $-n\bar{a}-s(i)$ $-n\bar{a}-t(i)$, in this class, and $-\bar{a}$ -s(i) $-\bar{a}$ -t(i) in Classes X and XI caused a current to set in the direction of the last two (cp. end of § 598). But this does not explain why only compounds were carried by it; and apparently we must not separate pellere: compellare, spernere: aspernārī from flīgere: proflīgāre, capere . occupāre and others. The -nā- in cōn-ster-nā-s must therefore be kept quite distinct from -nā- in Skr. šr-nā-mi Gr. δάμ-νη-μι See § 583 pp. 124 f.

§ 604 Keltic. O.Ir. re-num 'I give away, sell' (perf. -rur), le-num 'adhaereo' (perf. ro lil), cre-num 'I buy' (perf. -cuur) Mod.Cymr. prynaf, see § 598 p. 142. gle-num 'adhaereo'

(perf. ro guul) Mod Cymr. glynaf beside OHG. chli-nu 'I cleave, stick, smear' (Gr γλω-ύ-ς 'sticky dampness' O.HG. chleimen 'plasmare') OIr. be-nım 'I strike, cut' OBrit el-binam 'lanıo' Mod.Bret. benaff 'I cut', beside Lat. perfines 'perfringas' (Festus) O.Bret. bi-tat 'resicaret' O.C.SI bi-tı 'to strike'. The inflexion of these presents, as Thurneysen shows (Kuhn's Zeitschr. xxxi 87), points to pr Kelt. *-nā-mi -nā-si -nā-ti -nā-mesi etc, i. e the weak suffix -nā- = Idg -nə-had got into the singular

§ 605 Germanic Here, as in Latin, we have sometimes the thematic conjugation of Class XIII, and sometimes the conjugation of Classes X and XI, see § 598 end, p. 142.

O II († spor-nō-m 'I tread, kick' O Icel. spor-na 'knock against', thematic variant stem O.H G. spur-nu and -spirint conj -spirne (perf spur-num O.Icel. perf. spar-n spur-nom) like Lat. sper-nō. O.Sax. mor-nō-n 'I trouble myself, care', A.S. thematic murne. Explanation uncertain: O.H.G. conj. wolle beside Skr. vṛ-nō-té 'chooses' (Kluge, Paul-Braune's Beitr., viii 515). O.H.G. gi-nō-m (also gei-nō-m) A.S. zinie 'I gape'; with -no-, O.Icel. gō-n O.C.Sl. 3rd sing. 'zi-ne-tŭ, V ghez-. O Sax hli-nō-n A.S. hlinie 'I lean, support myself': Lat. in-clō-na-t. O.Icel li-na 'I soften': Skr. li-nō-ti etc., see § 598 p. 142. O.Icel. fō-na 'I rot, corrupt' (partic. fō-inn 'rotten'): thematic Lith. pō-nu 'I rot'.

We must add a group of West Germanic verbs in which -kk--pp--tt- are due to assimilation of the n of -nā- to an explosive root-final (I § 530 p 388, § 534 p. 391, § 541 p 396), as O.H.G. lecchōm 'I lick' ground-form *liĝh-nā-mi, zocchōm 'I pull hard, tug' ground-form *duk-nā-mi, Mid.H.G hopfe (Rhine-Frank. hoppe) 'I hop' ground-form *qup-nā-mi.

Remark Some forms of these verbs have not broken u and \imath in the root; as O.H G zucchōm, Mod H G zucke beside zocchōm, Mid H G ι upfe beside ropfe (ground-form ι ub- ι -), Mid H G stutze 'I push, strike' (ground-form ι studen-), Mod H G nucle (ground-form ι studen-). I suggest as a possible explanation that there may once have been bye-forms with the present-suffix ι ne ι - ι nu- ι , as ι 1st pl ι duk- ι nu- ι compare Goth. ι hunnum (ι fig- ι nu- ι nes) beside ι uf- ι hunnum

A third group of Germanic present stems is that exemplified by Goth. paha -áis. Goth. maúrnái-p O H.G mornēt beside O.Sax. mornēn A.S. murne O.H.G. hlinēm beside O.Sax hlinēn A.S. hlinie. O H G stornēm 'attonitus sum, inhio', beside Lat. cōn-sternāre § 603 p 145. The transformation in these verbs is due to their intransitive meaning, see § 781.3 The case is different with Goth uf-kunnái-p 'recognises', as we shall see in § 646

§ 606. Balto-Slavonic. The thematic type prevails; e. g. Lett. gû-nu 'I snatch' contrasted with Skr. ju-nā-ti 'sets in quick motion, urges', O C.Sl. zi-ne-tŭ 'yawns, gapes' contrasted with O.H.G. gi-nō-t.

Traces of -nā- are perhaps left in Lith. žino 'he knows' ground-form "ḡv̄-nā-t: Skr. jā-nā-ti, see § 598 p. 141; and in Lith. ly-nó-ja 'it rains slightly' inf. ly-nó-ti (Lett. lî-nā-t) beside lỹ-na 'it rains', kilnó-ju 'I lift this way and that' beside Lat. ex-cellō for *-celnō, lasz-nó-jo 'it drizzles, trickles a little'.

Remark. kilnóju may also be quite well explained as a derivative from kilna-s 'high'; and this makes it doubtful whether the "diminutive frequentatives" in -nóju ought not to be estinated quite differently and classed elsewhere. But here we must bear one point in mind — this I say with a view to Leskien (Ablaut der Wurzels im Lit, p 174) — to wit, that Baltic denominatives often put on the appearance of primary verbs. See § 798 Thus e g. lynó-ja may quite well be a primary form by analogy of which was formed kilnó-ju from kilna-s

Class XIII.

Root + -no- forming the Present Stem.

§ 607. Stems of this class seem to bear much the same general relation to Class XII as Skr. ti-šth-a-ti Lat si-st-i-t to Gr. I-orn-oi; see § 491 p. 50.

But certainly not all the stems of this class are stems of Class XII which have taken to thematic inflexion. Amongst them are many whose stem is found as a noun-stem, and was probably only a noun-stem at the first. Take, for example, Skr. vé-na-ti 'longs' beside vē-ná-s 'longing', pana-tē 'trafficks, barters, buys' beside pana-s 'wager, bargain, loan' Lith. pelna-s 'gain, profit' (I § 259 p. 211); Goth. fraihna O.Icel. fregn 'I ask' beside Skr. praśná-s 'question'. So too Class XIV (-no--eno--ono-), closely connected with this, is denominative in its origin.

Since it is impossible to distinguish verbs like Skr. mṛ-n-á-ti (beside mṛ-ná-ti mṛ-n-ánti) from those like Skr. vé-na-ti (from vē-ná-s), we shall treat them together.

Parallel variants such as Gr. βοίλομαι δήλομαι 'I wish' (*ḡ[-no-.*gel-no-), O.H.G. wallu 'I heave, toss': willu 'roll, wallow' (*ū[-no-·*uel-no-) recal similar pairs in Class II, Skr. kṛš-á-ti · kárš-a-ti (§ 513 pp. 78 f.), and in Class XXVI, Goth. vaúrk-ja: O.H.G. wirk-(i)u (§ 705).

§ 608. First we cite no-forms which occur in more than one language.

*str-no- from V ster- 'sternere': Avest. 3rd sing. mid. ster-na-tā, Lat. ster-nō (with the root-syllable in the strong grade), beside Skr. str-nā-ti (§ 600 p. 143). Lat. sper-nō, O.H.G. spur-nu 'I tread, step, kick', fir-spirni-t conj. '-spirne (see § 614), beside Skr. sphur-ά-ti 'quickens, throbs'. Lat. li-nō, Lith. l̄g-na 'it rains' (cp Gr. ἀλτνω for *ἀλι-νιω § 611), beside Skr. li-nā-ti O.Icel. li-na § 598 p. 142, § 603 p. 145. A.S. ʒī-ne O.Icel. gī-n 'I gape, yawn' O.C.Sl. zi-ne-tū 'gapes, yawns' beside

O.H.G $gi-n\bar{o}-m$, see § 605 p. 146. Goth. kei-na O.H.G. $ch\bar{v}-nu$ 'I bud', Lith. gy-nu (beside gypu) 'I revive, recover'. Lat. $fall\bar{o}$, O.H.G fallu, both with -ll- for -ln-, possibly connected with Lith. pu'lu 'I fall' ground-form $ph\bar{o}l\bar{o}$; according to another derivation, $fall\bar{o}$ is akin to Gr. Polego-S 'troubled, impure' Goth. dval-s 'foolish' A.S. dwellan 'check, wander'; if so, the ground-form of $fall\bar{o}$ must be $dul-n\bar{o}$

§ 609. Aryan To the forms cited in §§ 598 and 599, parallel to forms in Class XII, add the following · 2nd pl. gr-ná-ta beside gr-ná-ti 'calls, calls upon'; rána-ti 'indulges himself, pleases himself' instead of *raná-ti (cp § 516 p 82) ground-form *rm-né-ti beside ram-ná-ti, which must be explained like śam-nī-tē § 602 p 144 (cp ra-tá-s for *rm-ta-s); á-mi-na-nta beside mi-ná-ti 'lessens, hurts', math-na-dhvam beside math-ná-ti and mánth-a-ti 'twirls, moves, shakes'.

Skr. ghūrna-ti 'wavers' from ghūr-nu-s 'wavering'. véna-ti 'longs' from vē-ná-s 'longing' pana-tē 'trades' from paṇa-s 'wager' phanati 'leaps, hops, is in motion' from phaná-s 'snake's hood, nostril' (perhaps cognate with sphurá-ti 'quickens, throbs', and if so, with Lat. sper-nō O H.G. fir-spirnit, see § 608 p 148). Compare § 607 p. 148.

- § 610. Armenian. ar-ne-m'I make', aor. ar-ar-i § 571 p. 113. yar-ne-m'I raise myself, get up', cp Skr. r-nō-mi Gr. $\~o_{Q^{-\nu}\=o_{-}\nu\nu}$ Class XVII § 639 d-ne-m'I place', $\iv/dh\=o_{-}$. With the middle ro-extension (§ 711), li-ni-m'I become' (aor. part. lieal), tani-m'I lead' (aor. tar-ay)
- § 611. Greek $\pi r \acute{a} \varrho$ - $\nu \sigma$ - $\mu a \iota$ 'I sneeze' (Aristotle) beside $\pi r \acute{a} \varrho$ - $\nu \nu$ - $\mu a \iota$. $\pi \acute{t}$ - $\nu \omega$ 'I drink', beside imper. $\pi \widetilde{\iota}$ - $\vartheta \iota$ Aeol. $\pi \omega$ - $\iota \omega$ (cp. § 498 p 61) $\delta a \nu$ - $\nu \omega$ 'I bite' ground-form * $d \widetilde{n} k$ - $n \widetilde{o}$, ν denk- (I § 224 p 192) $\pi \iota \tau$ - $\nu \omega$ beside $\pi \iota \tau$ - $\nu \eta$ - $\mu \iota$, § 602 p 144. $\sigma \tau \acute{a}$ - $\nu \omega$ 'I place', cp Armen. sta-na-m Lat d \overline{e} -stin a r e O.C.Sl. sta-na and $\sigma \tau \alpha$ - $\nu \iota \omega$ § 601 p. 144, § 603 p. 145.

νάμ-νω 'I take pains, labour', cp Skr. fam-n \bar{z} - $t\bar{e}$ § 602 p. 144.

Dor βωίλεται Att βονίλεται 'I prefer, I wish' ground-form *qI-ne-, Dor. δήλεται Delph. δείλεται (Thess βείλλετει Boeot. βείλετη) ground-form *gel-ne-, see I § 204 p 170, § 428 b with the Remark p. 316. Hom Dor. τάμνω Att. τέμνω 'I cut', cp. aor. ταμ-εῖν. Lesb ἀπ-έλλω Dor. Γήλω Hom εἴλω 'I press' for *fελ-νο-.

As we find -n-10- (Gr. -airw) parallel to -nno- (Gr. -arw) - Class XIV, §§ 616 and 621, Class XXIX § 743 - so we have in Greek -n-zo- instead of -no-. Lesb. κλίννω Hom. Att. κλίνω 'I bend, incline' for *κλι-ν-ιω: Lat, in-clī-nā-re O Sax. hli-nō-n Lett sli-mu § 603 p 145. γρίννω κρΐνω Ί separate, choose out, decide', σίννομαι σίνομαι '1 rob' (cp. Kretschmer, Kuhn's Zeitschr. xxxi 420). ἀλένω 'ἀλείφω' (aor. ἀλίναι), beside Lat. li-nō etc., see § 598 p. 142, § 608 p. 148. οτρόνω 'I drive on' for *ô-τρν-ν-ιω from V tuer- tur- (Skr tvár-a-tē 'hastens' O.H.G. dwir-u 'I turn quickly round, move', Skr. turána-s 'hastening'); with tru-: tur- compare Skr. hru-nā-ti: /u-hur-a-s beside hvár-a-tē, Avest. cabru- Skr. catur- beside catvarand the like. quirw 'I make appear, make visible, show' for * $\phi \alpha - \nu - \iota \omega$: Armen. ba - na - m O.H.G. ba - nnu, see § 601 p. 144. χαίνω 'I gape' for *χα-ν-ιω with the aor. ε-χα-νο-ν, beside /ά--σνω χή-μη χώ-ρā: cp. Skr. hī-ná-s 'deserted, lacking' μ-hī-tē 'yields, departs' (§ 540 p. 101). By analogy of *ater-go there were made in pr. Greek the aorist *ἔκλινσα *έφαινσα (έκλ $\bar{\iota}$ να έφηνα) and the future *γ $\bar{\iota}$ ινε(σ)ω *φανε(σ)ω (κλινώ $\bar{\iota}$ (ανώ) from *xhvyw and *qavyw, and others in the same way.

Remark φαίνω shews that κλίνω comes from *κλι-νέω. Bartholomae's doubts are unfounded (Stud. Idg. Spr., 11 87 f).

The origin of the Att. ending $-\bar{v}v\omega$ is generally uncertain, as it may come from $-v\omega$, $-v_1\omega$, or $vF\omega$ (§ 655). In any case, pairs of variants such as $\beta\acute{v}v\omega$ $\delta\acute{v}v\omega$ $\delta\acute{v}v\omega$ beside $\beta\acute{v}\omega$ $\delta\acute{v}\omega$ $\delta\acute{v}\omega$ $\delta\acute{v}\omega$ produced $l\partial\acute{v}v\omega$ $do\tau\acute{v}v\omega$ beside $l\partial\acute{v}\omega$ $do\tau\acute{v}\omega$, and then the analogy went further, and we have $\dot{\eta}\delta\acute{v}v\omega$ $\tau\alpha\chi\acute{v}v\omega$ etc. Compare Lath. $kel\acute{a}unu$ § 615.

§ 612. Italic. ster-no sper-no li-no fallo see § 608 pp. 148 f.

Other verbs with a weak grade of root: $toll\bar{o}$ ground-form $tl-n\bar{o}$ \sqrt{tel} . $si-n\bar{o}$, origin obscure (cp. Osthoff, M U. iv 133 f., Perf 612) $d\bar{c}-g\bar{u}n\bar{o}$ for *gus- $n\bar{o}$, \sqrt{geys} -.

Other verbs with strong grade of root. pellō for *pel-nō (Umbr. ař-peltu 'admoveto'), beside Gr. πίλ-να-μαι, see § 602 p. 144 ex-cellō for *cel-nō, cp. Lith. kilnó-ju § 606 Rem. p. 147

tem-no may come from Idg. *tem- or *tm-.

Again $cer-n\bar{o}$, which is connected with Gr. $\rho\ell\nu\omega$ and Lith $skur-i\dot{u}$, may be explained in two ways. If it contains the unextended root, it is on a level with $pell\bar{o}$ etc. But it may have arisen in composition from $*crin\bar{o}$ (I § 33 p. 34), in which case it will be analysed $*cr-i-n\bar{o}$ and be more closely akin to Gr $*\rho\ell\nu\omega$.

Lastly, pandō is doubtful It is connected with Osc. patensins (Class XIV, § 622) If it comes from *pat-nō (vol II p 161 footnote. Bartholomae, Bezz Beitr xvii 119), a must be derived from σ on account of Gr πετάσσαι, and then the root had a weak grade But pandō may belong to Class XVI, see § 632

§ 613 Keltic Olr ser-nim 'sero' 3rd pl -sernat (cp. Windisch, Ir. Worterb, p. 770 b) Perhaps sennim (sennaim) 'I drive, hunt' beside OH.G swimmu for *suem-nō (§ 614 p. 152), cp Mod Cymr. chwyfaf 'I move, quiver' for *suem- (Thurneysen).

§ 614. Germanic. OHG. spur-nu 'I step, kick', and with strong-grade root syllable fir-spirm-t conj. -spirne. Lat. sper-nō, see § 608 p 148. AS mur-ne 'I trouble, grieve', cp. O.Sax. mor-nō-n, see § 605 p 146.1) OHG. wallu

¹⁾ Forms like OHG. 1st pl spurnamēs infin. spurnam partic fir-spurnam AS. spurnam murnam are without a-umlaut, by analogy doubtless of the 2nd and 3rd sing pres and the plural of the pret OHG spurnum etc, op. OHG. inf durfam beside durf durfum, and others But AS. has spurnam as well as spurnam Or had the West Germanic originally forms of Class XVII beside those with -no-? Compare spurnum with kunnu-m § 646

'I undulate, boil', ground-form *u\(\bar{l}-n\bar{v}\) and willu 'I roll' O.Icel. vell 'I undulate, seethe' ground-form *uel-no. O H.G. fallu 'I fall' see § 608 p 149. Goth. O H G. kun-nan 'to know' partic Goth. kun-na-nd-s O.H.G. kun-na-nt-1 (indic. kann § 646): Skr. jā-na-ti, see § 598 pp. 141 f. O.H.G. chli-nu 'I stick, smear'. O Ir. gle-nim, V glez-, see § 604 p. 146. A.S. zī-ne O.Icel. gī-n 'I gape, yawn' O.C.Sl zi-ne-tŭ, see § 605 p. 146, § 608 p 148, § 615 p 153. Goth. kei-na (partic kij-an-s) O.H.G. $ch\bar{\imath}$ -nu 'I bud' Lith gy-nu, see § 608 p. 149. O.H.G. swī-nu 'I disappear' (cp. Kretschmer, Kuhn's Zeitschr. xxxi 420), hrī-nu 'I touch, gam', grī-nu 'make a face, snarl', Goth, skei-na 'I appear', scī-nu O.H.G. backu Upper-G. pacchu 'I bake' pr Germ. *bakkō for ground-form *bhəg-nō (I § 214 p. 181, § 534 p 391), cp. O II.G. bahh-u 'I bake' Class II B Gr φώγ-ω 'I roast' Class II A § 532 p. 94 O.H G spa-nv 'I attract, charm, drive on' (pret. spuon), ground-form +spo-no. also spannu 'I stretch, widen, I am in eager excitement' ground-form *spo-nu-o Class XVIII (§ 654), beside Lat. spe-9 spa-tiu-m O.H.G spa-ti 'late'

Besides O.II.G. fir-spirint and willu, other words have root syllables of the strong grade O.II.G quillu 'I spring, well up', \(\script gel\)-, O.II.G. swillu O.Icel. svell 'I swell, heave', O.II.G scillu 'I resound, sound' O.Icel. skell 'I clatter', O.H.G. hillu 'I make a sound', O.II.G. gillu O.Icel. gell 'I yell, cry out'. O.H.G. sinnu 'I go, think' for *sind-n\overline cp. Goth. sandja 'I send', Mid H.G. zinne I' burn' for 'tind-n\overline cp. Goth. tandja 'I kindle'. I suggest that we class here verbs with -mm-, for -mn-, as O.H.G. sivimu 'I swim', cp O.Ir. sennim \(\script 613\). Goth. frah-na 'I ask' (perf. frah fr\(\overline{e}\)hum partic fraihans) O.Icel. freg-n (fr\(\overline{a}\) fr\(\overline{g}\)gum fregenn) A.S. friz-ne (fr\(\overline{e}\)a fruznon fruznen) with pr Germ. variation of \(\chi\) and \(\overline{e}\) (I \(\script \) 529, 530 pp. 384 ff.), which was levelled down in different ways by different dialects. cp. Skr. pra\(\overline{s}\)-n\(\overline{e}\)-s 'question' \(\script \prele-(\script 607\) p. 148).

§ 615. Balto-Slavonic. Here this class is more creative than anywhere else.

Lith gy-nu 'I revive, recover' Goth. kei-na, see § 608 p 149. Lith lỹ-na 'it rains' Lat. li-nō (ibid). O.C.Sl. zi-ne-tũ 'gapes, yawns' AS zī-ne (ibid) Lett sli-nu 'I lean upon, support' cp Gr Lesb. rl-rrw O.Sax. hli-nō-n Lat in-clīnāre (§ 603 p 145, § 611 p. 150); Lett. si-nu 'I bind' cp. Skr si-nā-ti 'binds, surrounds' V saī-, in the two Lettic verbs i doubtless comes from the infinitive (sli-t, si-t). Lith ry-nù 'I swallow, devour'; O.C.Sl. ri-ne-tũ 'knocks' rinetũ sẽ 'starts' (cp na-rojĩ 'impetus') Lith. ei-nù 'I go': a comparison with Lat. prōd-īnunt is unsafe (see § 1022). O.C.Sl. si-ne-tu 'shines', mi-ne-tũ 'goes by'.

Lith. $p\bar{u}$ -nu (beside $p\bar{u}v$ -ù) 'I make rotten' ep. O Icel $f\bar{u}$ -na 'I rot', § 605 p. 146. Lett $g\hat{u}$ -nu 'I snatch' Lith. $g\hat{a}u$ -nu 'I get' (- $\hat{a}u$ - from $g\hat{a}u$ - $t\iota$, no doubt) ep Skr. ju-n \hat{a} - $t\iota$ 'sets in quick motion, drives on, presses' Lith $kl\bar{u}$ -nu (beside $kl\bar{u}v$ - \hat{u}) 'I hook on to, remain hanging, $gru\bar{u}$ -n \hat{u} (beside $gru\bar{u}v$ - \hat{u}) 'I knock down', $z\bar{u}$ -n \hat{u} (beside $z\bar{u}\iota$ -u) 'I come to grief', Lett. $sch\hat{u}$ -nu (beside Lith $su\bar{u}\iota$ - \hat{u}) 'I sew' O.C.Sl. $pl\iota$ -ne- $t\bar{u}$ 'spews' for * $plj\bar{u}$ - *pljv- * $sp\bar{u}\bar{u}$ - (I § 60 p 47), and plju-ne- $t\bar{u}$ like Lith $spu\hat{u}$ -nu Lett splau-nu Lith au-nu Lett au-nu 'put covering on the feet' |eu-. Lith. $v\hat{u}u$ -nu Lett. $r\hat{u}u$ -nu 'pull, tear, snatch out' (beside Lith Lett $r\hat{u}u$ -ju) |e-v-v-, and others (see Bielenstein, Lett Spr. I 355).

The analogy of ráu-nu infin. rúu-ti etc produced Lith. denominative re-formations like keláunu instead of keláuju beside the inf. keláuti 'to travel' (from kēla-s kēle-s 'way'), kuraláunu instead of karaláuju beside infin karaláuti 'to be king' (from karāla-s 'king') Compare Gr 19 ύνω § 611 p 150.

Slavonic gives a large number of no-presents from verbs with other finals than -1 and -u, planetŭ 'blazes up' for *pol-ne-tŭ, po-me-ne-tŭ 'thinks upon', vrīg-ne-tŭ 'throws' (v uerg-), mlŭk-ne-tŭ 'grows dumb', za-klenetŭ 'shuts' for *-klep-ne-tŭ, bŭnetŭ 'awakes' for *bŭd-ne-tŭ, dvig-ne-tŭ 'moves', sŭch-ne-tŭ 'dries' (intr.). Also from one root in -ā sta-ne-tŭ 'places itself', akin to Pruss. stānintei, adverb of the pres participle, cp. Armen. sta-na-m Gr. sva-vw Lat. dē-stināre § 611 p. 149.

In Slavonic the no-suffix is not confined to the present stem; it appears elsewhere in the system of the verb, but then in the peculiar shape -na-. Examples are aor. mn-na-chū partic pres. mn-na-vū infin mn-na-tī sup. mn-na-tū from mn-na.-na- is regular only in the infinitive and supine (except sta-tī from sta-na).

Remark. The following I think is not improbably the history of -nq-. Slavonic once had verbs in *-onq (1st sing pres.), and their acrist ended in -on-sũ -qsu and their infinitive in -on-tũ -qtũ, parallel to Lith gyvenũ 'I dwell' (fut -ệ-siu infin. -én-ti) lũpinu 'I heap' (fut -ṭ-siu infin -in-ti-), see § 624 Now in the present, -no- levelled out -ono-, which was only used with consonantal roots, but -ono- remained everywhere except in the present. Hence a compromise an infinitive *vrũqati, for instance, would be transformed by analogy of vrũgna i rũgneši etc, and become vrũgnati. Afterwards -na- was extended to verbs from roots ending in a vowel, such as mi-na, and only sta-na kept clear of this change (infin sta-ti) Compare with this § 624 at end, and Wiedemann, Arch Slav Phil x 653 ff

Lithuanian has no present stems with the suffix -no- from roots with a final explosive or fricative; instead of these the language has forms of Class XVI, such as bundù as against būna in Old Church Slavonic But there are a few in Lettic, all of them however with an interior nasal, which in most cases certainly belongs to the present suffix and not to the root-brinu 'I wade' for *brid-nu *brend-nu beside Lith. brendù and bredù (bridaŭ bristi), rūnu 'I find' for *rūd-nu beside rūdu = Lith. randù (radaŭ rásti), nūf-nu 'mingo' for *menz-nu beside Lett mēžù (l/ meißh-), linu 'I crawl' for lid-nu beside lidu = Lett. lendù (lindaŭ līsti) The origin of this kind is obvious, the class with a nasal infix (Class XVI) has been contaminated with the -no-class, like O.C.Sl seg-na from √ seg- etc (§ 636), and like Gr. λιμπάνω from legg- etc (§ 631).

Class XIV.

Root + -nno- -eno- -ono- forming the Present Stem.

§ 616. It is quite clear that this class is derived from nouns; see § 487 p. 41, § 596.6 p. 140, and below. It is note-

worthy that the n-suffix is often extended by -20-; as Skr. išan-yά-ti beside (Ved.) išana-t, Gr. όλισθαίνω beside όλισθάνω, O.H.G giwahann(i)u 'I recount'. See §§ 618 and 743 This is the same formation as Skr. vithuryά-ti from vithurá-s 'staggering, shaking', Gr. αἰόλλω from αἰόλο-ς, see § 770.

Along with -nno- -eno- we find -nnā- -enā-, inflected in the same way as denominatives from a-stems. To illustrate, take. Skr. prtanā-yá-nt- 'fighting' beside Avest pešana-sti Skr. pṛtan-yá-ti beside Skr. pṛtana-m pṛtanā- 'fight', Skr. bhandanā-yá-ti 'shouts, cheers' beside bhandána-s 'shouting' bhandinā- 'shout', Gr. ἐρῖνανάω beside ἐρῦνάνω 'I hold back, bar, stem' (cp. θηγάνω 'I sharpen, whet' beside θήγανο-ν θηγάνη 'whetstone', and δαπανάω 'I spend' beside δάπανο-ς' 'extravagant' δαπάνη 'expense'), Lat runcināre (cp. runcina 'plane') coquinare carinare farcinare; O Icel. valna 'I awake' pret. vakna-đa, Goth. pret. ga-raknō-da beside pres ga-vakna; Lett. stiprinó-ju 'I strengthen' infin stiprinó-ti beside stiprinu (ınfin. stiprin-ti), gabenó-ju 'I bring together' (ınfin. gabenó-ti) beside gabenù (infin. gabén-ti); and besides, the Lith. group of preterites, of which examples are 1st pl. stiprino-me gabéno-me, must be added.

Seeing how clear is the denominative character of this fourteenth class, no doubt can be felt that all these verbs are derived from feminine stems. The nearest parallel is found in the verbs which will be discussed in § 769, Skr priyā-yá-tē Goth. friyō, O.Ir. com-alnaim O.H.G. follōm, and such like. That is to say, Skr. bhandanā-yá-tī stands to bhandánā 'shout' and bhandána-s 'shouting' exactly as O.H.G follō-m 'I fill' to follā 'fullness' and fol 'full', or as wuntōm 'I make wounded, I wound' to wunta 'a wound' and wunt 'wounded'.

Remark The student must not suppose that I refuse to see the parallelism between ἐρῦκανάω ἐρῦκάνω and πιτνάω πίτνω, O Icel. vakna: Goth. ga-rakna and O H G. ηιπῦ-m: O Icel gīn, Lith. stip ιπόμι: stiprinu and lyπόμα·lýna See the end of § 598, and §§ 602, 605, 606. The origin of the ā-flexion is different in the two sorts, but ā-flexion in the one may well have influenced the other in different languages inde-

pendently For instance, Greek verbs of the type of ἐξοῦκανάω may have been supported by the use of πιτνάω, or vice versu.

Skr bhandanā-yú-tē is not to be classed with hṛnā-yá-nt-, a quite isolated stem; we see this from a variant hṛnā-yá-māna-s (§ 600 p. 144) Such forms as *bhandanī-yú-ti do not exist

§ 618. I cite first forms which appear in more than one language. Here, as below with forms belonging to one language only (§§ 619 ff.), the extension with -20- must be cited too (§ 743).

Lat cruen-tu-s partic of a present 3rd sing. *cruin-t, Lith. krùvinu 'I make bloody' (partic krùvinta-s == cruentu-s) from krù-vina-s 'bloody'

Armen. aroganem 'I sprinkle', Lith srāvinu 'I make flow', common ground-form *srounnō, V sreu- (cp Bugge, Idg Forsch. I 451).

Skr injunctive išana-t 'let him set in motion, arouse, excite, quicken' and išan-yá-ti, Gr. $loir\omega$ 'quicken, hasten, warm' for $*l\sigma$ - αv - $l\omega$.

Goth af-lifna 'I remain over' (pret. $-n\bar{o}$ -da), Lith. lipinù 'I cause to adhere'.

Goth. áuhna 'I increase, grow' (pret. -nō-du), Lith. auginù 'I make grow, rear'.

Gr. αὐαίνω 'I make dry, wither' for *σανσ-αν-ιω, Lett saūsinu 'I make dry'. Compare Alban. θαή 'I dry, wither', for *saus-nzō according to G. Meyer (Alb. Wort. 85, Alb. Stud. III 43).

Gr. τεοσαίνω 'I make dry, dry up', Goth. ga-pairsna 'I grow dry, wither' (pret. -nō-da).

§ 619. Aryan Avest opt. 1st pl. zaranaemā and zaranye-tē (partic. zaranimna-) from zar- 'grow angry, ill', cp. partic. zarani-mana- Skr. hr-nī-té § 596.3 p. 138. Avest pešana-iti 'fights' beside Skr. prtana-m prtanā- Avest. pešana 'fight, battle' (cp. § 617 p. 155). Skr. krpána-tē 'he behaves pitifully, prays' beside krpaná-s 'pitiful, miserable' krpána-m 'misery'. išana-t 'let him set in motion' and išan-yá-ti: Gr. laívw, see § 618. Only with -10-: turan-yá-ti 'hastens, goes or makes

to go quickly' from turána-s 'hastening' (pres. tvár-a-tē 'hastens') ep. Gr. ἀτρένω § 611 p. 150; bhuran-yá-ti 'he is active' from bhurana-s 'active', and others. Compare Skr. μηταπα-yá-ti bhundanā-yá-ti § 617 p. 155.

There is nothing to decide whether this Aryan -anarepresentes Idg -nno- or -eno- (those who believe that Idg. o becomes a in open syllables in Aryan will say, or -ono-cither). išanyá-ti as compared with Gr laírw, so far as it goes, favours -nno-.

-eno- must be the suffix in Skr. bhána-ti 'sounds, calls out', if this be derived from $\checkmark bh\bar{a}$ -, and analysed bh-ánati; see p. 56 footnote. Perhaps the same suffix is used in some of those forms which are cited by Per Persson, Wurzelerweiterung pp. 70 ff, such as dhiana-ti 'sounds'.

§ 620. Armenian. In this language -ano- = Idg. -nno- is a very common present suffix. lk-anem 'I leave', aor. 3^{rd} sing. e-lik', \sqrt{leiq} -. gt-anem 'I find', aor. 3^{rd} sing. e-fiik'. kl-anem 'I swallow', aor. 3^{rd} sing. e-fiik'. kl-anem 'I swallow', aor. 3^{rd} sing e-kul. hat-anem 'I cut off'. tes-anem 'I see', \sqrt{derk} - (I § 263 p 214). liz-anem 'I lick' for * $l\bar{e}z$ -anem, \sqrt{leigh} -.

-anem, like Greek -avw, is found in some forms which have another present suffix already. As for instance harçanem 'I ask' beside aor. harci, stem *pr(k)-sko- (§ 672), like Gr. alvocavw beside all-oxw, and very near akin to harcanem is Avest. per sanyett 'asks', if its -s- = Skr. -ch- (cp. Skr. prachuna-m 'an asking') and not Idg. -k- (cp. Goth. fraihna).

-anım (cp. § 711) is a variant of -anem as Gr. -airω of -arω, e. g. mer-anı-m 'I die' (aor. mer-ay) like Gr. μαρ-airω 'I make wither, decay', mac-anı-m 'I cleave to, hang on to, curdle', zerc-anı-m 'I free or save myself, run away'.

§ 621. Greek In this language too -avo- = Idg. -yno- is very common.

ἀλφ-άνω 'I earn'. κεδ-άνω 'I honour, exalt'. κευθ-άνω 'I hide'. θηγ-άνω 'I whet'. ληθ-άνω 'I escape notice'.

πιμπλάνω πιμπράνω, as compared with πί-πλη-μι πί-πρη-μι were made on the analogy of λιμπάνω, and this served to keep safe the nasal in πίμπλημι πίμπρημι πίγκραμι πίγκραμι πίγχρημι (§ 542 p. 102, § 594 pp. 134 f.). Perhaps there was once a form *πλα-νω, parallel to Skr. pγ-μά-tι, which on the analogy of πί-πλη-μι πί-πλα-μεν was transformed to *πιπλανω (cp. the reduplicated τε-τρ-αίνω, p. 159), and then came under the influence of verbs like λιμπάνω. The Greeks themselves saw a close connexion between the ending -άνω and a nasal in the first syllable of the word which had it, if this syllable contained a short vowel + explosive, we can see this from the transformation of Att. *πιχάνω (for *πι-χαν-νω, Hom. πιχάνω) into πιγχάνω (§ 652).

With -ανάω (see § 617 p. 155) · ἐρῖκανάω beside ἐρυνάνω 'I hold back, bar, stem', δηκανάομαι 'I welcome' beside δηκινύμενος (§ 639), ἰσχόναω beside ἰσχάνω, and others.

A large number have -aivw. δλισθαίνω beside δλισθάνω 'I slip'. μ ελαίνω 'I darken' (beside μ ελάνω? see the commentators on Iliad 12 64), and others (cp. § 776.6 b).

Amongst these verbs in -αίνω are those whose root no longer forms a separate syllable, some of which are certainly old (cp. Lett. tv-in-ti tr-in-ti § 624). ξ-αίνω 'I scratch, comb' (ξ-άνιο-ν 'comb for carding wool') beside ξ-ύω and ξ-έω ξ-έσ-σαι (Class XX, § 661) from ν qes- (II § 8 Rem. 2 p. 20). ἐκ-φλ-αίνω 'I bubble up' beside φλ-ύω Lat. fl-ā-s O.H.G. bl-ā-u

(§ 583 p 124) δρ-αίνω 'I do, intend to do' (όλιγο-δρανέων faint, weak' § 801), beside $\delta g - \tilde{\omega} = \delta g - \tilde{\alpha} - \mu \alpha$ (§ 737). 'I besprinkle' for *σρ-αν-ιω (ὁανίς -ίδος 'drop') beside ὑ-έ(F)ει 'flows' from V ser- 'run, flow' (§ 488 p. 47) cp. ξ-αίνω beside ξ-νω; ἐρράδ-αται ὁάσσατε (*sr-d-) belong to Class XXV (§ 695).1) χο-αίνω 'I touch the surface gently, stroke, soil' beside χο-άω 'I seize, touch' χο-ανίω 'touch superficially, scratch' χρ-ίω 'I anomt'. γραίνειν ' ἐσθίειν Hesych., beside γράω, which seems to be akin to Skr. gr-asa-ti (§ 659). 'I make, complete' (V ger- Skr. kx-no-ti), this we should probably place here. The alternative is to analyse it *roa- $-\nu$ - μ , from $\sim qr$ -n-, and place it in § 611 (pp 149 f.), but αρ-όνο-ς makes this the more likely place (see II § 67 with the Rem., p. 112). τε-τρ-αίνω 'I bore' (τι-τραίνω is also found, see Veitch Greek Verbs s. v. τετραίνω). Lith tr-inù 'I rub', \(\sqrt{ter-}\)

Connected with noun stems in -avo- (§ 487 pp. 40 f., § 596. 6 p. 140) δλισθάνω δλισθαίνω δλίσθανο-ς 'slippery, smooth'. $θηγάνω · θηγανο-ν · θηγανη 'whetstone'. μελάνω μελαίνω · μελανο- (μελαν-) 'black'. φασγάνεται' ξίφει ἀναιζεῖται Hesych: φάσγανο-ν 'cutting instrument, or sword'. κυαίνων 'ἔγκνος ὧν Hesych: Samian κυανο- in Κυανοψιών (the Author, Gr. Gr.² p. 32 footnote 1). Compare λευκαίνω with Skr. <math>r\bar{o}can\acute{a}$ -s 'light, shining', ἀλφάνω with Skr arhana-m arhanā 'tribute of respect'.

§ 622. Italic. Lat. cruen-tu-s beside Lath krùvinu, see § 618 p. 156. Osc patensíns 'aperirent' for *patenesēnt cp. Lat. panderent (§§ 632, and 837.2).

Latin verbs in -ināre (§ 617 p. 155) coquināre beside coquere, cārināre beside cārere etc.

§ 623 Germanic. In this class fall Inchoatives formed with an n-suffix (for the term inchoatives as applied to them,

¹⁾ By this correct vol. I § 488 p 360, § 492 p 363, § 639 p 479.

see Egge, Amer. Journ. Phil., vii 38 ff.), as Goth ga-vaknan O.Icel. vakna A.S. wæcnan 'awake'. Since in these and many other words n is not assimilated to the preceding consonant, it follows that there must have been a vowel between than which has suffered syncope (cp. I § 214 p. 181, Kaufmann, P-B. Beitr. XII 504 ff.). But whether this vowel was a, i, or u, and the suffix accordingly Idg -ono-, -eno-, or -uno-, remains a question. Furthermore, amongst form like Goth distairna 'I tear to pieces, crush to pieces', there may be forms with Idg. -no- (cp. Skr. dīr-ná-s O H G. zor-n, II § 66 p 141), which would then have to be placed in Class XIII.

The old unextended inflexion was regular Gothic only for the present; e g. ga-vakna -is - $i\bar{p}$ etc Elsewhere Gothic has - $n\bar{o}$ -, as - $vakn\bar{o}da$ Old Icelandic carries - $n\bar{o}$ - all through the verb, as vakna - $na\bar{d}a$ In Old High German, on account of a certain change which will be set forth in § 781.3, most of the words in question are absorbed into the \bar{e} -conjugation (3rd weak conj.), as $wesan\bar{e}m$.

In addition to the words already mentioned — Goth. aflyna, áuk-na (O Icel. aukna), ga-paúrsna (O.Icel. porna) — the following may be named. Goth. ga-staúrkna 'I become stiff, dry up' O Icel storkna O H.G gi-storchanēm (beside Lith streg-iu 'I stiffen') Goth. -brukna intr. 'I break, break to pieces' (beside biika 'I break'). Goth. ga-batna O.Icel. batna 'I improve myself', O.H.G trunkanēm 'I get drunk'. Beside Goth us-lūkna 'I open' (intr.) appears us-lūkn-s 'open' (adj.).

These inchoatives are sometimes derived from an adjective, in which case they run in parallel lines with the factitive group in (Goth.) -jan, Goth. fullnan O.Icel. fullna 'get full' beside Goth. fulljan O.Icel. fylla 'make full, fill' from Goth. full-s O Icel. full-r 'full' (ground-form *pl-no-s), Goth. ga-quunan 'become alive' beside ga-quijan 'make alive, quicken' from qui-s (gen. qivis) 'alive', Goth mikilnan 'grow big' beside mikiljan 'make big' from mikil-s 'big', cp. Lith. linksminu from linksma-s and similar forms, § 624.

O.H.G. gi-wahannen 'mention' pret. gi-wuog, A.S. wæcnan 'awaken' pret $u\bar{o}c$, like Gr. ἀλιταίνω (aor ήλιτο-ν).

§ 624. Balto-Slavonic. Baltic has -ina = Idg. -ino-, and -ena- = Idg. -eno-.

Lith krùvmu 'I make bloody' fut. krùv\(\bar{\chi}\)-su partic krùvin-ta-s = Lat. cruen-tu-s, augmù 'I make grow', sa\(\bar{\chi}\)sinu 'I make dry', see § 618 p. 156. kùpmu 'I heap up' from kùpina-s 'heaped up'. trùpmu 'I crumble, break into little bits' from trupin\(\bar{\chi}\)-se 'crumb'. t\(\bar{\chi}\)kinu 'I make run (on a grindstone), polish' from t\(\bar{\chi}\)kina-s running' (O.C.Sl. te\(\bar{\chi}\)in\(\bar{\chi}\)). b\(\did\theta\)iniu 'I awake'. lipinù 'I make stick'. The form of the root is noticeable in tr-in\(\chi\) 'I rub' infin tr-\(\hat{\chi}\)-ti from \(\sigma\) ter- (Lat. \(\texi\)), with which compare Gr. \(\tass{\chi}\) \(\texi\) cy and \(\texi\) t\(\sigma\) swell out' instead of *\(\texi\)to-inu, infin. \(\texi\)-ti-ti, beside Lat \(\texi\)-me\(\bar{\chi}\), cp. Gr. \(\xi\)-aiv\(\omega\), and its like, § 621 pp. 158 f.

This extraordinarily fertile suffix was used to derive verbs with a factitive meaning from adjectives too (as in Gothic, fullnan etc., § 623); e. g. linksminu 'I make glad, comfort' from linksma-s 'joyful', vēninu 'I unite' from véna-s 'one', tvirtinu 'I make fast' from tvirta-s 'fast'; cp. Pruss. swintina 'he hallows' from swints 'holy'.

From verbs like pú-d-inu vél-d-inu svìl-d-inu was extracted a suffix -dinu, which was largely used. See §§ 700 and 701.

Only Lithuania and Prussia have -ina- (-in-) with non-present stems. For Prussian, compare infin. waidin-t 'to show' partic. pret. act. waidinn-ons from the pres. 3rd sing waidinna; swintin-t-s 'hallowed' from 3rd sing. pres. swintina. Lettic has for these parts of the verb -inā-, as áudsinu 'I bring up, raise, rear' infin. áudsinát in contrast with Lith. auginù auginti (cp. Goth. lisna lisnāda). Lith. has also a few words with -inoju -inoti, as stiprinóju 'I strengthen' stiprinóti beside stiprinu stiprinti (Lett. stiprinu stiprinát), linksminóju 'I make glad' linksminóti (also accented linksminoju) beside linksminu.

Rarer than -ına- ıs -ena-: Lith. gyvenù 'I dwell' gyvénti (cp. Goth. ga-qıuna, § 623 p 160) and graudenù 'I remind, admonish'; gabenu 'I bring', also gabenóju gabenóti.

That Slavonic once possessed verbs in *-onq infin *-on-ti *-qtī may be assumed, as we have seen in § 615 Rem. p. 154, from such forms as vrīg-nq-ti. With this -ono- compare zv-onū 'sound' beside zv-ĭnĕti 'sound', containing the suffix -uno- (beside zov-q zv-a-ti 'to call', II § 67 p. 154); further, Gr. αὐονή 'dryness' ανονον ξύλον ξηρόν (Hesych, MS. ανόνος) beside αὐαίνω 'I dry up' (beside Lith. saūsin-ti O.C.Sl. sūchnq-ti).

Class XV.

Root + Nasal Suffix forming the Present Stem.

§ 625. Here fall such present stems as Skr. yunáj-mi pl. yuñj-más. This class has hitherto not been certainly proved to belong to any branch but Aryan. Its origin and relation to the other nasal classes has been discussed in § 596.5 p. 139.

§ 626. Aryan. Vleig- 'linguere'. Skr rinák-ti Avest. ırınaxti (I § 260 p. 212), Skr. 1st pl. 1inc-más 3rd pl. rinc-ántı pret. 1st pers. sing. á-rmac-am 2nd and 3rd sing. á-rmak. conj. rinác-a-t, opt. rinc-yá-t; — thematic Lat. lingu-ō Pruss. po--linka 'remains' Skr. bhinád-mi 'I split', imper. bhin(d)dhí, V bheid-, — thematic Prakrit bhind-a-di Lat. find-ō pináš-mi 'I pound, crush' 3rd pl piš-ánti (cp. I footnote), injunctive 2nd and 3rd sing pinák, v peis-, - thematic Skr. a-mš-a-t Lat. pīns-ō Avest. cinah-mi 'I give information', cp. 3rd sing. coiš-t 'he informed'. Avest cinas-ti 'he instructs' 1st pl. mid. conj. cinap-ā-maiāē Skr. runádh-mi 'I stop, stem' 3rd sing. act runáddhi mid run(d)dhé; — thematic rundh-a-ti. vrnáj-mi 'I twist together' 3rd sing. mid. vrnk-té, vuerg-, cp. Gr. ģέμβομαι § 631. trnédhi 'shatters' instead of *trnódhi (for *trnaž-dhi), 3rd pl. trh-ánti (see I § 404.2 p. 298); — thematic trh-a-ti Avest. weak form merenk- merenc- from marc-'destroy'. 3rd pl. act. merenc-inti mid. merenc-aite 2nd pl. mid. merenge-duye, opt. 3rd sing. meraš-yā-b, cp. I § 448 pp. 332 f., § 473.4 p. 350, II p vIII, I § 200 Rem. p. 168, Bartholomae, Kuhn's Zeitschr. xxix 483; — thematic Avest. merenc-a-itē.

Remark. On Skr. hinás-ti 3rd pl. hís-anti see § 667.

Strong stem instead of weak: Skr. 2nd pl. *yunák-ta* mstead of *yunk-tá*.

Class XVI.

Root + Nasal Infix + Thematic Vowel forming the Present Stem.

§ 627. This class stands to the preceding in the same relation as Class II B to Class I, etc., see § 491 p. 50.

As the nasal often spreads from the present to the other parts of the verb, and then to nouns it is often doubtful, where a Root does not contain i, u, a liquid or a nasal, whether the nasal which we see is not really part of the root itself It is an infix in Lat. pre-hendo -hendo -hendo -hensu-s Gr. χείσομαι 'I will seize' (for χενδ+σ-) $\ddot{\epsilon}$ -χαδ-ο-ν (χηδ-) χανδάνω Alban. gendem 'I am found' Lett gidu 'I understand, conjecture' (for *gendu), which is proved by Lat. praeda (for *prae-hedā) For Skr spanda-tē 'throbs' spandaya-ti spanda-s 'a throbbing' pam-špadá-s 'throbbing' (spad- = *spnd-) Gr. σιρενδόνη 'sling' σηαδασμός 'throbbing, eagerness, impatience' (*σφηδ-)1) the same is proved by Gr. σφεδ-ανό-ς 'hasty, wild' σφοδ-φό-ς 'powerful'. But it sometimes happens that there are no kindred words which can decide the matter again, to make the ground more slippery under our feet, roots whose nasal we have a right to say belongs to the root itself, make forms without any nasal by analogy. Thus Skr. mamáth-a māthaya-tı instead of mamanth-a manthaya-ti from mathná-ti mátha-ti, where math- comes from 'mnth- (§ 516 p. 82, § 852); Gr. δήξομαι instead of *δεγξομαι from δάν-νω ε-δανο-ν, where $\delta \alpha \lambda$ - comes from * $d\hat{n}\hat{k}$ - (I § 224 p. 191).

§ 628. \sqrt{lexp} : Skr. lxmp- \acute{a} -ti 'smears', Lith. lxmp-it cling, hold'. $\sqrt{pex}\acute{k}$ -. Skr. $px\acute{s}$ - \acute{a} -ti 'adorns, decks, arms',

¹⁾ Connect Lat. pendo pependi, pondus?

Lat. ping-ō. V neid-. Skr. vind-á-ti 'finds', O.Ir. ro-finnadar 'gets to know' (see § 633), cp Armen. giut 'gain, profit' for *wind- (Hubschmann, Arm. Stud. 1 26, 63, 75, Bugge, Idg. Forsch. 1 443), Gr. lvδ-άλλομαι 'I show myself, appear'. Vsegseig- 'trickle down' Skr. sinc-á-ti 'pours out, wets', Goth. sigg-a 'I sink' (part. sagg following band etc., I § 67 Rem. 1 p. 57), Lett. siku 'I become exhausted, dry up, fall' (of water) for *sink-u, cp. Mid.H G. sthte 'shallow' from *sing-to-. / kueztkueid- 'shine' (Skr. śvit-aná-s Goth. hveit-s) · Skr. śvind-a-tē 'is clear, or white' (gramm), Lith. szvint-ù 'I become clear'. Skr. a-piš-a-t 'I crushed' (beside pi-náš-ti, § 626), Lat. pīns-ō, cp. Gr. πτίσσω πτίττω instead of prehistoric *πτινσ-ιω (§ 631). Skr. opt. chind-ē-ta beside chi-nád-mi 'I cut off, tear to pieces' (Class XV), Lat. scind-o, cp. Gr. σχινδ-αλμό-ς 'piece of wood split off, splinter'. Prakr. bhind-a-di beside Skr. bhinad-mi 'I split' (§ 626), Lat find-o. V sneigh-. Lat ningu-i-t, Lith sning-a 'it snows'. Vleig · Lat. lingu-ō, Pruss. po-linka 'remains' (Skr. rmák-ti § 626), cp. Gr. λιμπ-άνω § 631. Lat. string-ō, Lath. string-u 'I remain hanging' (pret. strig-au), beside Lat. striga, Goth strik-s 'stroke, line' O.H G. strīhhu 'I draw a line, pass along'; O.C.Sl. strig-q 'I shave, shear' for *string- (I § 229 4 p. 195) or for *streig-? Lat dī-stingu-v, Goth. stigg-a 'I strike, push' O.Icel. stokk 'I leap, push', beside Lat. în-stīgō Skr. tējutē 'is sharp, goads on', cp. Lith sténgu § 637. Lat. mingō V meigh-, cp. Lett. mischu for *minziu § 635. Skr lump-á-ti 'breaks to pieces', Lat rump-ō, V reup-. Skr. lunc-a-ti 'pulls, plucks' (gramm.. perf lu-lunc-ur is found), Lath. runk-ù 'I grow wrinkled', V reug- reug- (Skr. luk- 'a falling off, disappearance', Lat. rūg-a, Lith. raūka-s 'wrinkle'), cp. Lat. runc-āre munc-a-ti 'lets go, frees, gets free, runs away', Lat. E-mungo, Lett. múku 'I make off, flee' for *munk-u, V meug- meug-. Skr. yunj-a-ti (beside yunák-ti § 625), Lat. jung-ō V jeug-, ep. Lith. jùng-iu 'I yoke to'. Skr. bhung-a-ti 'makes to eat or enjoy' (beside bhunák-ti Class XV), Lat. fung-or. Avest. Lunj--a-iti 'lays down, frees, saves itself', cp. Gr. πεφύγγων φυγγάνω § 631. Lith. bund-ù 'I wake up', cp. Gr. πυνθ-άνομαι § 631.

V qert- 'cut'· Skr kint-á-ti 'cuts, splits', Lith krint-ìi 'I fall off, drop' (of leaves, fruit and so forth), Idg 'qrnt-é-ti, cp. I § 285 Rem p. 228 O Ir. in-grennim 'I pursue' i. e. *ghrendō? (cp. § 633), O C.Sl. gręd-ą 'I come', originally *ghry-dh-ō V ghredh-, cp Goth gridi- f. 'step, grade' Lat. gradior for *ghrdh-10- (§ 717) V reŷ- 'stretch, extend'· Skr. xîy-á-ti (beside 3rd pl. mid zîy-atē Class XV), cp. Lith partic. \(\bar{\gamma}\)-si-r\ellipzes 's 'having stretched oneself' infin isz-si-r\ellipzet zi' 'to stretch out' r\bar{\gamma}\)zau-s 'I stretch' derived from a stem *rin\(\bar{\gamma}\)- = Skr. xîy-(from ri\(\bar{\gamma}\)- = zj- were derived r\ellipzet zi\(\bar{\gamma}\)s 'I inflate myself' and r\alpha\(\bar{\gamma}\)- zi stretch myself', cp. below, Goth \$peiha p\(\dal{\gamma}\)h).

Formed from such roots with r we find in several languages present stems with vocalism of the strong grade. These must be regarded as new formations. Examples are: Skr. śrambh-a-tē 'entrusts', Gr & μ & μ o- μ 'I turn myself round', Mid.Ir. dringim 'I ascend', O.H G spring-u 'I leap', Lith. drēs-ù 'I am brave', details will be found under the separate headings.

V plāq- plag- Lat plang- \bar{o} , Lett plāhu 'I become flat, fall flat down' for *plank-u, cp Gr. πλάζω 'I strike, knock aside, lead astray' (έπλαγξα πλαγττό-ς) for *πλαγγ-ζω § 631. Lat clang- \bar{o} , cp. Gr τλαγγ-άτω and τλάζω for *τλαγγ-ζω § 631 (pf. τέτλαγγω), O Icel hlakka 'I cry out' (-kk- for -nk-), beside Gr. πλωζω 'I cluck, caw' for *τλωγ-ζω.

Roots ending in a consonant, without liquid, nasal, i, or u (type peq-'coquere') show an e-vowel Goth. peiha O.H.G. dīhu 'I thrive' for *pinχ-ō, carlier *penχ-ō (cp. O Sax. partic thungan and causative thengiu 'I complete'), from which we have the re-formates páih dēh etc (I § 67 Rem. 2 p 57), Lith. tenkù 'I last out, have enough' infin. tèh-ti, compare O Ir. tocad Mod Cymr. tynghed 'luck, happiness' (first for 'tonheto-, cp the Latinised name Tunccetace, inscr. in Wales), which also point to a nasal present stem Alban. ýind-em 'I am found', Lat. pre-hendō, Lett. gidu 'I understand, conjecture' for *gend-u V ghed-, cp. Gr. χανδάνω χείσομω § 631.

Several languages give 10-inflexion to this type (Class XXIX). Examples Gr. πτίσσω πτίττω instead of *πτίνσ-μω, πλάζω for

*πλαγγ-ιω; Lat. vinc-ιō, sanc-ιō (cp sacer); Lith jùng-iu, Lett. mi/chu (beside mi/nu) 'mingo' for *minz-lu See § 744.

§ 629. Aryan. Skr. vind-á-ti Avest und-a-iti 'finds'. Vueid-; Skr. sinc-á-ti Avest. hinc-a-iti pours out, Vseig-; Skr. krnt-á-ti Avest. ker nt-a-iti 'cuts', see § 628 where other examples are given. We may also mention the following: Skr. śiś-a-ti 'leaves over' beside śinás-ti; und-a-ti 'moistens, wets' beside unát-ti; umbh-a-ti 'holds together, holds in custody' beside 2nd sing. unap; trmp-ú-ti 'is satisfied' V terp-; brh-a-ti 'strengthens' V bhergh-, srnth-a-ti from srath- 'to become loose or soft'; Avest, merenc-a-ite from marc- 'destroy' beside 2nd pl. mid. mer ng d-duyē (§ 626). Sometimes in Sanskrit the accent is changed to the accent of Class II A, as sumbh-a-ti and sumbh-á-ti 'adorns' (beside śóbh-a-tē), partic. mid. tún)-a--māna-s (3rd pl tur)-átē Class XV, tuj-yá-tē 'is struck, knocked'), díh-a-ti beside drh-á-ti 'strengthens' (beside díh-ya-ti), příc-a-ti mingles' (beside prinkt-ti and pi-prg-dhi) With secondary strong grade vocalism (cp. § 628 p. 165). Skr. **sranth-a-te (gramm) beside *šrnth-a-ti*, *šrambh-a-tē* 'entrusts (cp. ni-šrmbhá-s), anu-ranjati 'cleaves truly to, loves' (cp raga-s 'colour, passion, love', Gr. ὁέζω ὁέγμα ὁογεύς), Avest. 3rd sing. pret. morend-a-p for *marend-a-b (I § 94.3 p. 89) from murd- 'kill' (or does $-ar = -\bar{r}$ -?), of the same sort may be Skr. $v\'{e}nd-a-t\bar{e}$ 'praises, honours' beside vád-a-tı ud-yá-tē.

Roots of the type peq- (§ 628 p. 165). Skr. spand-a-tē 'throbs', beside Gr. $\sigma \varphi \varepsilon \delta$ -avó-ç, § 627 p. 163. stambh-a-tē 'strengthens itself, stands fast, supports itself', beside Lith steb-iû'-s 'I wonder' steb-iû'-s 'I keep myself back' stāba-s 'apoplexy'. Sometimes the nasal is only found in non-present forms. Thus from \sqrt{seg} - 'fasten, hang' (Skr. sajjatē for *sa-zj-a- § 562 p. 110, Lith. segù): Skr. perf. sa-saūj-a aor. a-saūj-i partic. -saūk-tavya-s; from Ar. dabh- or dhabh-1)

¹⁾ The desiderative forms dhipsati dhipsati are late re-formates instead of Ved. dipsati, certainly not instead of pr. Ar. dhabh. Compare dhak, p. 171.

to hurt, deceive' (cp. Skr. \acute{a} -dbh-u-ta-s § 596. 2, p. 136, desid. Skr. $d\acute{i}psa$ -ti Avest $diw \check{z}a$ - $idy \bar{u}i$ § 667, Skr. perf. da- $d \check{u}bh$ -a, $-d \bar{u}bha$ -s 'hurting', Avest. caus. $d \bar{u}baye$ -iti). Skr. perf da- $d \check{u}mbh$ -a caus. $dambh \acute{u}ya$ -ti dambh-a-s 'deceit'. In such instances, one of two explanations is possible (1) Either a nasal present which was the origin of these nasal forms has perished. With sanj-compare O C.Sl. seg-na § 636, dambh- may be illustrated by Gr $\check{a}\tau\acute{e}\mu \beta \omega$ 'I hurt, deceive', if the root is dhebh-, and if this Greek word is a contamination of $\Im e(\mu) \beta$ - and $\tau e(\mu) q$ -. (2) Or the nasal came from other words, thus $dad \acute{u}mbha$, beside $dabhn \acute{o}ti$, was formed on the analogy of $tast \acute{u}mbhu$ $stabhn \acute{o}ti$, and similar pairs.

§ 630. Armenian. Present stems of this kind I know none; but ep. giut 'profit, gain', which seems akin to *uind-6 (§ 628 p. 164).

§ 631. Greek Only a few examples of the unextended stem can be found λινδέσθαι αμιλλᾶσθαι beside λίζονσι παίζονσιν Hesych for *λινδ-μω?), connected by Fick with λοίδορο-ς and Lat loido-s lūdu-s. σφίγγ-ω 'I tie, fasten', compared with Armen pirk, for *sphig-10-s, by Bugge (Idg. Forsch. I 453). With secondary strong-grade vowel (cp. § 628 p. 165) ἀξμβομαι 'I turn round, revolve' (ἀσμβο-ς 'bull-roarer, wheel') containing Idg *μχρος- from ν μετς- Skr. νγπάκ-ti 'twists together' infin. νγῆγ-άsē, Mid H.G runke A S. wrincle 'wrinkle' O.H.G. rench(i)u 'I turn, pull backwards and forwards in turning'. Root of the type peq- (§ 628 p. 165) στέμβω 'I shake, misuse, handle roughly' beside στόβο-ς στοβέω στοβάζω.

Passing over to Class XXIX (§ 628 p 165). πτίσσω πτίττω 'I crush, bruse' instead of "πτινσ-μω (the Author, Gr. Gr.² p. 61): Škr. α-ριδ-α-τ etc., see § 628 p 164. πλάζω 'I strike, knock down' for *πλαγγ-μω Lat plang-ō etc., see § 628 p. 165. κλάζω 'I sound, cry out' for 'λλαγγ-μω Lat clang-ō etc., see ibid. Perhaps also σείμπτω 'I throw hard at something' for *σκιμπ-μω, beside Skr λδιρ-ά-τι 'throws, slings'.

Where no present formation has survived · ἴμνιας · ζεύξας Θετταλοί Hesych, beside Lat. vinc-ιο̄ Skr vi-vyak-ti 'embraces, surrounds' 3rd dual vi-vik-tá-s, cp γιμβάνοι · ζεύγανα (Hesych) 1. e. Γιμβάναι (like τύμπανο-ν).

§ 632. Italic. Lat. ningu-i-t Umbr. ninctu 'ninguito', Lat. dī-stinguō Umbr an-stintu 'distinguito', Lat. ping-ō, pīns-ō, scind-ō, find-ō, linqu-ō, string-ō, ming-ō, rump-ō, ē-mungō, jung-ō, fung-ōr, see § 628 p. 164 Lat. vinc-ō perf vīc-ī, Osc vincter 'convincitur', cp Goth veih-a 'I fight' Class II A O.H.G. upar-uihit Class II B, Vueiq- § 532 p. 94 Lat. fing-ō beside fic-tu-s fig-ulu-s, V dheigh-· O.Ir dengaim 'I oppress' (so Thurneysen) ling-ō beside ling-urriō, V leigh-. tund-ō beside tu-tud-ī. pung-ō beside pu-pug-ī ac-cumbō beside -cubuī cubāre

Lat. frang-ō for *bhrng-ō beside frag-ili-s, Goth. brika 'I break', √bhreg- (cp. Osthoff, M.U. v p. 111).

Lat. pang- \bar{o} beside pe-pig- \bar{i} Gr. $\pi \dot{\eta} \gamma$ -vi- μi I fix', $\sqrt{p}\bar{a}\hat{k}$ - $p\bar{a}\bar{g}$ -; akin are doubtless Goth. $f\bar{a}ha$ O.H.G. $f\bar{a}hu$ 'I grasp, seize' (cp. Skr $p\dot{a}\bar{s}a$ - 'cord, line') for pr. Germ. * $fan\chi$ - \bar{o} , with partic. O.H.G. gr-fangan. tang- \bar{o} beside te-tig- \bar{i} in-teger (Umbr. antakres 'integris'), con-tagu-m. plang- \bar{o} beside

plāg-a Lett plāku, see § 628 p 165 lamb-ō, beside O.H.G. laffu 'I lick' perf luof, \sqrt{lab} — Perhaps also pandō beside pateō and beside Osc. patensíns 'aperirent', which comes from *patynō or 'patenō (§ 622 p. 159); cp. § 612 p. 151,1) and of-fendō, see § 696

pre-hendō. Alban ģend-em etc., V ghed-, see § 628 p. 165. The fertility of this type in Latin is made clear by fund-ō beside Goth. giuta 'I pour' for *ghey-dō Class XXV § 690. Cp. Goth. standa and the like, § 634 at end

Passing into Class XXIX (§ 628 p. 165). vinc-iō, beside Skr. vi-vyak-ti vi-vik-tás, see § 631 p. 168 sanc-iō beside sac-er.

langu-eō (langu-ēscō) perf langu-ī (beside laxu-s O.H.G. slach 'slack, lazy' and Gr $\lambda \dot{\eta} \gamma \omega$ 'I cease', $\sqrt{sl\bar{e}g}$ -), following Class X, § 590 p 132.

§ 633. Keltic. O'II dengaim 'I oppress' from *dhinghō (3rd pl. pass. conj. for-diassatar 3rd sing. perf. dedaig) Lat. fingō, see § 632 () Ir slucim 'I swallow, gulp' (secondary-10-flexion) Mod.Cymr. llyncaf llyngaf 'devoro' from *slunkō, V sla*uk- sla*ug-, Gr aryzaíra and aryyároma 'I sob'

O.Ir. in-grennim 'I pursue' with strong-grade vowel in the root: O.C.Sl. gręd-a, see § 628 p 165, but compare the Remark. So also Mid Ir dringim 'I ascend' = O.Ir. *dreng(a)im (drēimim 'clambering' subst.), akin to Skr darh-'make fast' pres. dih-á-ti dih-a-ti (cp Lith. lipù 'I mount up with my feet, climb' beside limpù 'I remain clinging', O.H.G. chlimbu 'I climb' beside chlību 'I cling')

O Ir com-boing 'confringit' (perf 3rd sing -bury), ep. Skr. bhanák-ti perf. ba-bhanj-a Armen bek-anem tong(a)ım 'I swear' beside co-tach 'compact'. in-dlung 'I split' beside in-dlach 'split' subst.

¹⁾ Bartholomae (Stud Idg Spr, II 96 f) derives pangō pandō ē-mungō from *pank-nō *pant-nō *munk-nō (cp. O C.Sl. kiç(t)-na and the like, § 636). This view seems to me unjustifiable until the general principles which govern the interchange of tennes and mediae when root-finals in Indo-Germanic have been made out (I § 469 7 p 346).

O.Ir ro-finnadar 'gets to know' is related to Skr. vind-á-ti § 628 p. 164, and seems to have adopted ā-flexion; but compare the Remark, below.

Remark Thurneysen writes to me. "Grenn- and finna- appear in Old Irish always with nn and never with nd I heatate between two explanations. (1) Either nd very early became nn before the accent (the prefix which accented is always ind-, is either inn- or in- when pretonic); or (2) the nasal stood originally after the dental finna- = *vid-nā- or *vi-n-d-nā-, grenn- = *gred-n- (*grid-n-°) or *gre-n-d-n- I am still searching for evidence to decide the matter " With *vindnā- *grendn-compare Lett brīnu for *brendnu, O C Sl. segna § 615 p. 154, § 636.

§ 634 Germanic. Except standa. stop, all Germanic stems of this class run the nasal right through the verb.

Goth sigq-a O.H.G. sinh-u 'I sink', Goth. stigq-a 'I strike', see § 628 p. 164 Goth. fra-slinda O H G. slint-u 'I swallow' (re-formed, O.H G slint 'throat') cp. Mid.H G. slīte A S slīte 'I slide, slip', Lith. slid-ù-s 'slippery, smooth' Lett. slaid-s 'steep'.') O Icel. slepp 'I make slide' pr Germ. *slimpō (pret. slapp): cp. O H.G. slīfu 'I slide, sink', V sleib-. O.H.G. climbu 'I climb, clamber, ascend'. cp. O.Icel. klīf 'I climb' pret. kleif, O.H.G. chlību 'I cling, hold' V gleip- (gleip- and leip- are p-extensions of V glei- and lei-, cp. § 797). Mod.H G. blinke 'I gliter' a weak verb, but originally doubtless strong (re-formate O H.G. blanch 'bright'). cp O.H.G. blīhhu 'I gleam', Lith. blyksztù 'I turn pale' blaiksztýti-s 'to clear up'. From O.Sax mengian (Goth *maggjan) 'to mingle' we must apparently infer 'mingan 'to mingle' akin to Skr. miś-rá- 'mixt'; see § 805 (Kluge in his Etym. Dict explains differently).

¹⁾ Osthoff compares fra-slinda with Gr. λαι-μό-ς λαι-τμα (Zeitschr deutsch. Phil, xxiv 215, Anz fur idg. Spr, 1 82). According to this etymology, we should start with a stem sli-t- (op. τ in λαιτμα) which took a nasal infix. Compare below, in this section, on standa (p. 172).

A.S wrinze 'I turn, press' (cp. Goth. vruggō f. 'knot, noose'): cp. O.H.G wurg(i)u 'I throttle, choke' Lith. verĕ-iù 'I tie together, enclose', vuergh- (I § 285 Rem. p. 228). O.H.G. scrint-u 'I burst, blow up, split, rend' (O.H.G. scrinta 'split, tear, rent'). cp. Lith skérdĕiu 'I burst, blow up, split', partice su-skirdēs 'blown up, burst open', vsqerdh- (i. e. sqer+dh-, § 689). Mid H.G. schrimpfe 'I become wrinkled, shrivel'. Pruss. sen-skrempūsnan acc. 'wrinkle, fold' (p, as elsewhere, wrongly written for b), cp O.Icel skorp-r 'shrivelled, dry' skorp-na 'I dry up' intr. Russ. skorblyj 'shrivelled', v sqerb-. Mid.H.G. sprinza O Icel sprett 'I leap, burst, blow up' doubtless akin to O.C. Sl pred-aja 'I leap, tremble', v (s)perd- (i. e. (s)per+d- § 700). O H.G. sling-u 'I move, twist, swing to and fro, crawl' (cp. slango 'snake'), doubtless with Lith. slenhù 'I crawl' akin to Lat. sulcu-s 'furrow, snake's trail'

Root type peq- (§ 628 p. 165) Goth. peiha O.II.G. $d\bar{\imath}hu$ 'I thrive' pr. Germ. * pen_{ℓ} - $\bar{\imath}$. Lith tenk- $\hat{\imath}$ \sqrt{teq} -, see § 628 p 165. Goth. finpa O.II.G find-u 'I find', as we may conjecture, from \sqrt{pet} - Gr. $\pi t \pi \tau \omega$ (for the meaning cp. $\ell \mu \pi \epsilon \sigma \epsilon \bar{\imath} \tau$). A.S. πe -tinge 'I hold on to, press' cp. πe -tengan 'to make fast, add, join to' O.Icel tengja 'tie or fasten together', beside Skr. dagh- 'reach up to, touch' \sqrt{degh} - (Skr. 2^{nd} and 3^{rd} sing. dhak is an ad-formate of roots which had both initial and final media aspirata): O.C.Sl. $deg\bar{u}$ 'line, string' ne- $dag\bar{u}$ 'weakness, sickness'.

Goth. fāh-a O.H.G. fāh-u 'I seize' pr. Germ. *fany.ō, connected possibly with Lat. pang-ō, \$\nu pā\hat{l}-\ pā\hat{g}-\, see \\$ 632 p. 165. Compare O Icel. banga weak verb 'I strike, knock' Mod.H.G. Swiss bang(e) 'I give a knock' (Mid H.G bengel 'cudgel'), beside O.H.G. bāgu 'I fight, strive', O.Ir bāgum 'I strive', \$\nu bhēgh-\ bhōgh-\ bhōgh-

Secondary 20-flexion (§ 628 p. 165) must be assumed for O.H.G. winch(i)u 'I move sideways, fluctuate, nod, beckon' (pret. in Mid.H.G., pret. and part. in Mod.H.G. also strong—wanc, gewunken), if it, along with the Lith ving-i-s m. 'deviation, bend' ving-ù-s 'crooked, bent (compare véngiu 'I avoid, do not want to do something' inf. vénkti), is related

to O.H G. wīhhu 'I shrink, yield' Gr. oğyuğu for *ò-fiy- 'I open' (make yield') But these comparisons are doubtful (cp. Fick, Wtb., 14 541, 547 f., G. Meyer, Et Wort der alb Spr., 463 Per Persson, Stud. Lehr Wurzelerw, 174 f.)

Nasal present stems from roots extended by -t-; see § 685. Goth. standa 'I stand' pret. stop O.H G. stantu pret. -stuot (generally with intrusive nasal, stuont) for *stando ground-form *sto-n-tó from Vstā-. Goth. vinda O II.G wintu 'I wind, turn, wrap, enfold' (pret. vand want), beside Goth. ya-vuda 'I tie up' O.H.G. witu 'I tie, bind' from yel-Skr. vī-tá-s 'folded, enclosed' Lith. vel-ù 'I twist a cord' (cp § 790). O.H.G. swintu 'I vanish, disappear' A.S. swinde beside O.H G suī-nu § 614 p. 152 Compare above, O.H G scrintu from sqer+dh- p. 171. Mid.H.G sprinze from sper+d- (ibid.), Lat. fundō from glei+p- (above, p. 170), O.C.Sl. tręsą I shake, shatter' from tr+es- and Skr dhvasa-ti 'disperses, disappears' intr. from dhu+es- (Classes XIX and XX, cp. Per Persson, Wurzelerweiterung, p. 83)

§ 635 Balto-Slavonic. In Baltic, this present formation is very productive.

Lith. limp-ù 'I cling, hold' (pret. lip-aŭ), Lett. sîh-u 'I sink down, fall', Lith sziint-ù 'I grow clear', sniñg-a 'it snows', Pruss. po-linka 'remains', Lith. string-u 'I remain hanging', runk-ù 'I grow winkled', Lett. mûk-u 'I make off, flee', Lith. bund-ù 'I wake up' see § 628 p 164. Lith. stimp-ù 'I grow stiff' (pret. stip-aŭ), tunk-ù 'I grow fat' (tuh-aŭ), džiung-ù 'I become glad' (džiug-aŭ)

Lith. krint-ù 'I fall off' (krit-aũ)· Skr. kṛnt-á-ti, V qert-, see § 628 p. 165. drimb-ù 'I drop in thick drops' (drib-aū). beside dreb-iù 'I let fall in thick drops' Gr τρέφ-ε-ται 'curdles' V dhrebh-. trink-ù 'I go wrong, do not come off' (trik-aũ) beside trāk-a-s 'foolish fellow' trak-ù-s 'foolish, mad' Gr. ἀ-τρετης 'uninjured, exact, true'. splint-ù 'I spread' intr. (split-aũ), beside splecziù 'I spread', trans

Roots of the type peq- (§ 628 p. 165). Lith. tenk-ù 'I suffice in some respect, have enough of something' (tek-aū): Goth.

petha for pr. Germ *peroχ-ō, see § 628 p. 165. Lett. gidu 'I take in, conjecture', see § 628 p. 165. Lith. gend-ù 'I become damaged, split in two' (ged-aū).

Lett. plåku 'I become flat, fall flat down' for *plank-u: Lat. plang-\(\bar{o}\), see § 628 p. 16\(\bar{o}\). Lith. kank-\(\bar{u}\) 'I hold out, suffice' (kak-a\(\bar{u}\)).

An indication of the fertility of this type in Lithuanian is the forming of present stems of the kind from nouns (cp. § 793); e. g. rentù 'I get thinner' (retaŭ) from rēta-s 'thin, not close', lempù 'I pamper myself' (lepaŭ) from lepù-s 'pampered'.

Secondary 10-flexion (cp. § 628, p. 165) is found only where the nasal spread beyond the present system. Lith. jùng-iu 'I yoke, put to' (inf jùnk-ti) beside Skr. yuñj-a-ti Lat. jung-ō, Lett. mi/chu 'mingo' for "minz-iu (inf. mi/t) beside Lat. ming-ō, § 628 p. 164. Lett. kamp-ju 'I seize, grasp' (inf. hampt), beside Lat. cap-iō.

Under the same conditions we have stems adopting toconjugation (§ 686), where the meaning is intransitive. Lith junkstu (Lett. júkstu for 'junkstu) 'I grow used' (junkau jùnkti) beside Lett. júhu for (j)unk-u, akin to O.C.Sl. uča 'I instruct' Skr. uc-ya-ti 'finds pleasure in' ókas- n. 'pleasure, place of pleasure, home', cp. O C.Sl. vyk-na and Goth. bi-ūhts, which likewise seem to have been nasalised (§ 636). Lith. stinkstu 'I curdle, congeal, grow stiff' (stingau stinkti) beside Gr. oreifion 'I tread something hard' στιβαρό-ς 'firm, pressed, solid' (cp. Lith. sténgiu § 637). sklīstù 'I flow apart' (sklindaŭ sklīsti) beside sklid-ına-s 'full to overflowing' skleidžiù 'I spread', a pret. 3rd sing. sklldu (sklldō) is also found, pointing to a present Lett. stringstu 'I grow tight, dry up' (stringu stringt) beside Lith. string-u 'I remain hanging' (strigau) and streg-ıu 'I crystallıse, ' stiffen' (cp § 628 p. 164). Lith. drīstù 'I grow bold' (drīsaū drīsti), v dhers-. linkstù 'I bend' (linkaŭ liňkti) beside Gr. λεκ-άνη 'pan, fan' λοξό-ς 'crooked'; also Lat. lanx with nasal (for *lpoq-?). The model for these presents is seen in blista 'it darkens' beside blind-o V bhlendh-, tistù 'I stretch myself out' beside tīs-aū stem ten-s-, and the like

This formation is much rarer in Slavonic than it O C.Sl. strig-a 'I shear, slave' for *string-? see is m Baltic § 628 p. 164. gred-a 'I come' (inf. gresti) for ghrndh- or *ahrendh-: O Ir. in-grennim, see § 628 p 165 sed-a 'I sit' (inf. sešti), V sed-, cp. Pruss. sindats syndens 'sitting' beside sīdans sīdons = Lett. sédās leg-a 'I he' (mf. lešti), V legh-. tresa 'I shake, shatter' inf. tres-ti from tr-es-, unless it comes from *trem-so- (cp. Lith trimù 'I tremble' Lat. tremō), see § 657. As regards gred-a leka 'I bend' pred-a 'I spin' compare § 637

Sometimes extended by -10- (§ 628 p. 165). žeždą 'I desire, thirst' for *žed-1a (mf. žedatı) beside Lith. pa-si-gendù 'I miss' and geidžiù 'I long for'. glęždą 'I look, gaze' for *ględ-ua (inf. ględeti) beside Mid.II G. glinze 'I shine' O H.G. glīzu 'I glitter'. See § 637. With nasal confined to the present system. ob-reštą 'I find' for *-ret-ia, inf. -rešti aor -reti (for the etymology of this verb see § 687).

There is another extension, with -no-. vyk-nq 'I grow used' doubtless derived from *vyka = Lett júku for *(j)unk-u, beside učą 'I teach' (§ 635 p. 173). seg-ną 'I long for' beside Lith seg-ù 'I fasten', cp. Skr. sa-sanj-a § 629 p 166. krena 'deflecto' for *kręt-na (cp. kratiti 'to twist, turn'), beside Skr ki nát-ti 'turns the thread, spins' hártana-m. sek-na 'I sink' beside Lett. síku 'I sink, fall' for *sink-u, V seig- (§ 628 p. 164). reg-na 'hisco' beside Lat. ringor (inf ring-ī) ric-tu-s. Compare § 637

Side by side with Lith. drimbù (ground-form *dhrmbh-ō) and the like stand forms with e in the root syllable (cp. § 628 p. 165). $dr\bar{e}s$ - \hat{u} 'I am bold' (pret. $dr\bar{u}s$ - $a\tilde{u}$) beside drīs-tù v dhers- § 635 p. 173. brendù (dialectic brindu for brendu) 'I wade' beside bredù (brid-aŭ) O.C.Sl. bred-q. lenk-iù 'I bend' (lenkiaŭ lenkti) beside link-stù v leg- § 635 p. 173. tréndu 'I am devoured by moths or worms' inf. trendé-ti, with tride beside Skr. trnatti tard-a-ti § 692. We may assume that $dr\bar{\epsilon}s-\hat{u}$ for * $drins-\hat{u}$ was coined to supplement $dr\bar{\epsilon}s-a\bar{u}$ on the analogy of $renk-\hat{u}$. $rinka\bar{u}$, $kert\hat{u}$ $kirta\bar{u}$ etc.; $lenk-i\hat{u}$ appears beside $linkst\hat{u}$ on the analogy of $gr\bar{\epsilon}z-\hat{u}$ 'I turn, twist' beside $gr\bar{\epsilon}szt\hat{u}$ 'I turn myself' etc. Slavonic verbs with ϵ , $gr\bar{\epsilon}d-a$ $l\bar{\epsilon}k-a$, and * $kr\bar{\epsilon}t-a$ which appears to be implied by $kr\bar{\epsilon}-na$, may quite well correspond to Lith. $drinb-\hat{u}$ or to Lith. $dr\bar{\epsilon}s-\hat{u}$.

Baltic en Slav e is found in present stems from roots with 1-vowels both extended and unextended. Lith senhù 'I fall, sink' (of water) O.C Sl. sek-na 'I sink down' beside Lett. siku for *sınk-u Skr. sınc-á-tı 1/ seig- (§ 628 p 164). Lith. spréndžiu 'I grasp with the hand' (sprésti) O C Sl. preda 'I spin' (presti) beside Lith, sprindi-s m 'span' Lett spraid-s 'place where one stands in a narrow compass' debes-spraisli-s 'vault of heaven' O.H.G spreiten 'stretch out, separate, part asunder'. Lith. pa--si-gendù 'I miss' O.C Sl žęždą 'I desire, thirst' for *žęd-ją beside Lith. geidžiù 'I desirc' Goth. gáidv n. 'lack' O.H.G. gīt 'eagerness, greed, avarice'. Lith. sténg-iu 'I apply my strength to something' beside stìnkstù 'I congeal, get stiff' Gr. στείβω (§ 635 p. 173). Lith $m\bar{e}z-\dot{u}^2$) 'mingo' ($m\bar{e}z\bar{u}$ $m\bar{e}z\bar{u}$) Lett. mif-nu for *menz-no beside Lett. mifchu for *minz-10 (§ 635 p. 173) Lat ming-ō Lith. miže f. 'cunnus' miž-iu-s 'penis', V mezgh-. O C.Sl glęždą (inf ględěti) and ględają (inf. ględati) 'I look, gaze' beside Mid H.G. glinze 'I shine, glitter' (pret. new formation glanz) O.H.G. glizu O.Sax. glitu 'I glitter' / ghlezd-. O.C.Sl. regna 'hisco' (raqu' 'jest', subst) beside Lat ringor ric-tu-s. If the Baltic forms stood alone, the explanation would be easy; we might say that the analogy of renk-. runketc. produced senk- menž- beside sınk- mınž-; compare what is said above on dresù But this explanation does not suit

¹⁾ The fact that we find kre/- and not cre/- is not sufficient to prove that the ground-form of kre/- is the weak grade *qrnt- Such a form must have become Slav. *hrint-, as *dhrns- becomes Lith. drins-, and *qrnt- becomes Lith krint- (I § 285 p 227) There never was a form *kirnt-, nor yet *qrn/-, which Bartholomae suggests as the ground-form of kre/- (Stud. Idg Spr., II 97)

²⁾ Dialectic minžu = *menžu (vol. I § 285 Rem, p 227, is wrong)

the Slavonic forms, because in Slavonic, before consonants, Idg. in become 7, but Idg v becomes ξ (I § 219 4 p 186).

Remark Wiedemann's view (Arch Slav Phil v 652 f, Lit Pract. 58, 168 f) - that Idg. in and un before consonants become slav. e and a. except in final syllables - can hardly be maintained in this connexion, because we have 1sto = Lett. inkstas, lyko = Lith. linka-s Pruss lunka-n and smill-e (see below) Nor is Streitberg's attempt satisfactory (Idg Forsch., I 283 f) Perhaps the problem may be solved thus We may suppose that originally in and un always became \bar{i} and \bar{u} , but that later, when in and un were again produced in any way before consonants, these became e and q. We may suppose that sink- first became *sik-, and afterwards, as the principle of Class XVI still remained active, the nasal crept into the stem anew, compare (say) Gr Att. έννυμι for * Γεσνύμι, which took the place of pr. Gr. * ferrūμι (= Ion είνοιι) for orig * feg-νυ-μι (I § 565 p 422). Similarly bada may come from *bhū-dhō or *bhū-dō, and may have got its nasal only at a late stage of proethnic Slavonic, though it may equally well be derived from *bhu-ā-dhō or -dō attracted into the nasal class, or from *bhyon-dhō or -dō regarded as an extension of a form *bhu-ono (cp § 701) Furthermore, for the 3rd pl smrid-etii beside smrid-1-mu etc we may assume that the old ending *-int(u) (cp. part. smrid-et- Lith smird- -int-) first lost its nasal, and then recovered it by analogy of imati etc.

The etymologies brought up by Wiedemann in his article in the Archiv by way of support to his view are all too uncertain to base any theory upon. O C SI nazda 'compulsion, foice, necessity' I connect with Skr. nādh- nāth- 'to be opprest, in need of help'; tapā 'blunt, dull', with stemp- stemb- in O H G. stumpf, Lith. stambà-s 'coarse' stamba-s 'stump', -dagā 'force, strength' is to be connected with degā 'cord, strap, bridle' (Miklosich, Et Wort., p 49 a), and with O.H G. gi-zengi 'reaching to, touching close' and Skr dagh- 'to reach' (§ 634 p 171).

Class XVII.

The Root + -ney- -nu- forming the Present Stem.

§ 638. -ney- is the strong form of the suffix; -nu-, -ny-and -nuy- the weak forms. -nuy- follows a root with final consonant, cp. 3^{rd} pl. Skr. as-nuv-anti Gr. $a\gamma$ -vi- $\bar{a}\sigma_i$ as contrasted with Skr. ci-nv-anti, I § 153 p. 138.

Beside -neu- nu-, Aryan has -anau- -anu-. See § 596.3, pages 137 f.

The Root Syllable had originally the weak grade, except in Skr. dāś-nō-ti Gr. δηκ-νύ-μενο-ς.

§ 639. Pr. Idg. *r-ne μ - * \bar{r} -ne μ -, \sqrt{er} -: Skr. r-nó-mi 'I excite, set moving' 1^{st} pl. r-nu-más 3^{rd} pl. r-nv-ánti mid. 3^{rd} sing. r-nu-té, conj. r-náv-a-t, opt. r-nu-yá-t; Gr. ŏ ϱ - $v\bar{\nu}$ - μ 'I excite, disturb, startle' 1^{st} pl. $\acute{\varrho}$ -vv- μ ev ($\acute{\varrho}$ - ϱ - \bar{r} -). — With thematic vowel: Skr. r-nv-á-t ι .

*r-neu-: Skr. r-nō-mi 'I fall in with something, reach, attam', Armen. ar-nu-m 'I take', Gr. ἄρ-νν-μωι 'I attain, earn'. Perhaps identical with the previous verb. ἄρ-νν-μωι as regards the grade of its root vowel would stand to ὅρ-νῦ-μι as τι-νύ-μενωι to τί-νν-ντωι, and Skr. str-nō-mi to Gr. στόρ-νῦ-μι (see below').

*str-neu- *str-neu-, V ster- 'sternere': Skr. str-nt-mi, Gr. στόρ-νῦ-μι.

*pstr-neu-, \slash pster- 'sneeze': Gr. $\pi \tau \alpha \rho$ - $\nu \nu$ - $\tau \alpha \iota$, cp. Lat: thematic ster-nu- \bar{o} (stern $\bar{u}t\bar{u}re$).

* $t\eta$ -ney-, V ten- 'stretch, lengthen': Skr. ta- $n\acute{o}$ -mi Gr. $\tau \acute{a}$ -vv- $\tau \alpha i$.

*sn-neu-, V sen- 'reach a goal, attain, end, complete'. Skr. sa-nó-mi, Gr. \acute{a} - $v\bar{v}$ - $\mu \iota$ $\acute{\eta}$ -vv- τo (the regular spir. asp. appears in \acute{a} - $v\acute{v}$ - ω and elsewhere). — Thematic: Gr. \acute{a} v ω \acute{a} v ω for * \acute{a} -vF- ω .

*mi-neu-, \sqrt{mei} - 'lessen': Skr. mi-nó-mi, cp. Gr. μ i-vú- $\Im \omega$ (§ 694), Lat. mi-nu-ō.

Skr. kši-n $\dot{\sigma}$ -mi 'I destroy', cp. Gr. $\varphi \vartheta_i$ - $\nu \dot{\nu}$ - $\vartheta \omega$ (§ 694), thematic $\varphi \vartheta \dot{\tau} \nu \omega$ $\varphi \vartheta \dot{\tau} \nu \omega$ for $*\varphi \vartheta_i$ - $\nu \mathcal{F}$ - ω .

*ghi-new-, V ghez-: Skr hi-nó-mi 'I set in motion, drive on', cp. thematic Skr. hí-nv-a-ti, Goth. du-ginna 'I begin'. This comparison I regard as more likely than Bugge's (P.-B. Beitr., XII 405 f). This scholar, followed by several others, has compared the Germanic verb with O.C.Sl. na-čīna (cp. Fick, Wort. I 4 382).

*dhu-ney- 'dhū-ney-, V dhey- · Skr. dhu-nō-mi dhū-nō-mi 'I shake, shatter', cp. Gr. θύνω and θυνέω 'I move wildly, storm' (§ 652).

*dhys-neu-, V dhers- 'be bold, dare': Skr. dhys-nó-mu 3rd pl. dhys-nuv-ánti, O.Sax. 1st pl. *durnum (inferred from the later sing. darn conj. dürne) = Goth. *daúrz-nu-m (§ 646).

* $d\bar{e}\hat{k}$ -neų-, V $de\hat{k}$ - (Skr. $da\dot{s}as$ - $y\acute{a}$ -ti 'shows honour, is gracious or pleasant', Gr. Hom. $\delta\eta$ - $\delta\dot{\epsilon}\chi$ - $\alpha\tau\alpha\iota$ $\delta\dot{\epsilon}\varkappa$ - σ - $\mu\alpha\iota$ § 560 p. 110, Lat. decus): Skr. $d\bar{a}\dot{s}$ - $n\acute{\sigma}$ - $m\iota$ 'I pay homage to', Gr. Hom $\delta\eta\varkappa$ - $\nu\acute{\nu}$ - $\mu\varepsilon\nu\sigma$ - ε 'paying homage, greeting' (so read, with J. Wackernagel, in II. 9.196, Od. 4.59). The same grade of vowel as in Skr. $d\bar{a}\dot{s}$ -ti $d\bar{a}\dot{s}$ - $v\acute{a}s$ - Hom. $\delta\eta\varkappa\alpha\nu\acute{\sigma}\omega\nu\tau\sigma$, and other words.

*ues-neu-, stem *u-es- 'put on a garment' (§ 656) · Armen. z-genu-m 'I dress', Gr. ϵ iv $\bar{\nu}$ - μ i (ϵ v $\bar{\nu}$).

We often see the same root forming a present both in this class and in Class XII, as Goth. 1st pl. kun-nu-m and Skr. $j\bar{a}-n\hat{a}-mi$ \sqrt{gen} , Avest. sr_1-na_0-iti and O.Sax. $hli-n\bar{o}-n$, Skr. $st_7-n\hat{o}-mi$ and $st_7-n\hat{a}-mi$, $mi-n\hat{o}-mi$ and $mi-n\hat{a}-mi$.

¹⁾ For $k\bar{u}$ -, see I § 288, p 230.

²⁾ For Skr. $kar\bar{v}$ -ti kuru-tha J. Wackernagel offers a very likely conjecture (Kuhn's Litteraturblatt, III 55 f.). He suggests that $k_T n\bar{v}$ - $k_T nu$ - became in vulgar speech $kan\bar{v}$ -kunu-, and these became $kar\bar{v}$ -kuru- by analogy of the other forms of the verb, which all had r.

(§ 940). Skr. i- $n\acute{o}$ -ti 'subdues, forces' Avest. i-nao-iti, doubtless akin to Gr. $a\acute{i}$ -vv- $\iota \iota u$ 'I grasp, take', — thematic Skr. i-nv-a-ti. Avest. sr-nao-iti 'bends, directs somewhere', \sqrt{kle} :. Skr. su- $n\acute{o}$ -ti 'presses out', 3^{rd} sing. \acute{a} -su-nu-ta Avest. hu- $n\bar{u}$ -ta; — thematic Avest. imper. mid. hu-nv-a-nu-ha (= Skr. *su-nv-a-sva). Skr. $dh_v \check{s}$ - $n\acute{o}$ -ti 'dares', \vee dhers-, § 639 p. 178. Skr. $a\dot{s}$ - $n\acute{o}$ -ti 'reaches' Avest. $a\check{s}$ -nao-ti, ground-form * $\hat{\imath}_i k$ -neu-ti, opt. Skr. $a\dot{s}$ -nu- $y\acute{a}$ -t Avest. $a\check{s}$ -nu- $y\bar{a}$ -t. Skr. $\dot{s}ak$ - $n\acute{o}$ -mi 'I can'.

In Skr. kš-nāŭ-ti 'whets' partic. kš-nuv-āná-s from v qes-(II § 8 Rem. 2 p. 20), the root has ceased to be a separate syllable; compare perhaps Lat. novā-cula, first for *s-neu-ā-(Kretschmer, Kuhn's Zeitschr. xxxi 419, 470). āu instead of ā arose as in ūrṇāu-ti (beside ūr-ņō-ti) by analogy of such a present as stāŭ-ti, see § 494 p. 55. The diphthong was regarded as part of the root proper, hence kšnu-tá- (Avest. hu-xšnu-ta- 'well sharpened') kšṇō-tra- and ūrnu-tya- -ūrṇavana-(similar forms in Greek, see § 643 p. 183).

§ 641. Strong suffix instead of weak; Skr. 2nd pl. á-kṛṇō-ta kṛṇō-ta instead of á-kṛṇu-ta kṛṇu-tá, hinō-ta hinō-tam instead of hinu-tá hinu-tám, Avest. 2nd pl. srmao-ta (O.Pers. 3rd pl. a-kūnav-a a-kūnav-atā I regard as thematic, see § 649). Compare Skr. grbhnā-hi instead of gṛbhnī-hi, and like forms § 600 p. 143. Vice versa, Avest. 2rd sing. kerēnūi-ši contrasted with Skr. kṛṇō-ši.

The strong stem occurs along with the weak in thematic conjugation; e. g. Avest. 2nd sing. pret. act. ker^e-nav-ō. On this matter, refer to §§ 648 and 649.

In the 1st plural and dual, -nu- may drop its -u- before the personal ending, unless the root ends in a consonant; kṛnmás kṛnvás kṛnmáhē kṛṇváhē beside kṛnu-más etc. sunmás beside sunu-más etc. (but only aś-nu-más aś-nu-vás etc.). The first trace of this new developement is one example in Veda, kṛnmahē. It is possible enough that kṛnvánti: aśnuvánti suggested kṛnvás (instead of kṛṇuvás) beside aśnuvás; or that kṛnuvás became kṛṇvás naturally (cp. Wackernagel, Kuhn's Litteraturbl. III 56), which

produced krnmás by analogy. If krnvás did arise by regular change, the variant kynuvás must have been restored on the analogy of krnumás, as krnmas was coined on the analogy of krnvás. However, some influence must have been exerted by the relation of kurmás kurvás kurmáhē kurváhē to kuruthá kuruthás kurudhvé. kurmás is as early as the Rig-Veda, and *hurumás *kuruvás never seem to have existed at all. I would suggest that the forms with kur- are due to the analogy of the opt. aor. kuryá-t mid *kurī-tá- (cp. vurī-ta murīy-a); and it would be all the easier to understand how the stems hur- and kuru- = krnu- (p. 178 footnote 2) came to be confused, if the imperative kuru represents not only orig. krnu, but a form *qrr- + the particle u (cp. the particle -na in Avest. 2^{nd} sing. imper. $bara-n\bar{a}$ § 600 Rem. p. 143). Compare the references given to explain kurmás in § 498 p. 57.

Remark. Moulton (Am Journ Phil, x 288) thinks that -n- in forms such as $k\gamma$ -n-mds is the weak form of $-n\bar{a}$ - (Class XII), and compares Avest. ver^e -n- $t\bar{e}$. But if only he could point to a Sanskrit example of -n-instead of $-n\bar{e}$ - in Class XII!

 2^{nd} sing. Ved. $\frac{\dot{s}_{f}-nv-\iota-\dot{s}\dot{e}}{i}$ (beside $\frac{\dot{s}_{r}-n\dot{o}-ti}{i}$ 'hears') is an ad-formate of 3^{rd} pl. $\frac{\dot{s}_{f}-nv-\iota-r\dot{e}}{i}$, cp. $\frac{jaj\dot{n}-\iota-\dot{s}\bar{e}}{i}$ beside $\frac{jaj\dot{n}-\iota-r\dot{e}}{i}$ (§ 574 p. 115).

On the strong root of Skr āp-nó-mi, see § 600 p. 144; for that of Skr. daś-nó-mi, § 639 p. 178.

Reduplicated. Avest. 3rd sing. mid. *as-aš-nu-tā* beside aš-nao-iti § 640 (Bartholomae, Kuhn's Zeitschr. xxix 309).

§ 642. Armenian. Verbs in -nu-m (sing. -nu-m -nu-s -nu pl. -nu-mk -nuk -nu-n).

ai-nu-m 'I take' (aor. ai-i): Skr. γ -nō-mi etc., see § 639 p. 177. jer-nu-m 'I warm myself, get warm, glow' (cp. jer-m 'warm' = Gr. ϑ - ε ϱ - μ o- ε): Skr. $gh\gamma$ -nō-mi (gramm.). l-nu-m 'I fill', ground-form * $pl\bar{e}$ -nu-, cp. Lat. $pl\bar{e}$ -nu-s. ait-nu-m 'I swell', cp. Gr. oldáw 'I swell'. tak-nu-m 'I hide myself', cp. Gr. $n\tau$ η oow 'I bow, bend'.

z-genum 'I dress myself' (z- is a prefix) for *ges-nu- (I § 561 p. 417). Gr. $\varepsilon \bar{\nu} \nu \bar{\nu} \mu$ ($\bar{\nu} \nu \bar{\nu} \mu$), see § 639 p. 178.

Besides the forms mentioned in § 639 — $\ddot{o}\rho - \nu \bar{\iota} - \mu \iota$, $\dot{\alpha}\rho - \nu \nu - \mu \alpha \iota$, στόρ-ν \bar{v} -μι, πτάρ-νv-μαι, τά-νv-μαι, ά-ν $\bar{\iota}$ -μι, τι-νv-μεναι τ $\bar{\iota}$ -νv-νται - there are yet others with weak-grade vowels in the root syllable. $\theta'' a_0 - \nu \nu - \mu a \iota$ in Hesychius $(-a_0 - \mu - \nu)$ and $\theta' a_0 - \nu \nu - \mu a \iota$ $(-00- = -\bar{r}-)$ 'I leap, cover (of animals)' (I § 306 p. 241). πt -νν-μαι 'I move myself'. Cret. 3rd sing. $\pi \iota$ - δr -ν $\bar{\nu}$ - $\tau \iota$ = Att. επι-δείκνται (on πι-, see the Author, Gr. Gr.² p. 219) √ desk-. οἴγν \bar{v} μι 'I open' Hom. $\vec{\omega}$ -(F)iγ-νν-ντο beside Lesb. inf. \vec{o} -εiγ-ην, originally 'I make yield', beside O.H.G. wihhu 'I yield, give way'. μίγ- $r\bar{v}$ - μ 'I mix' beside fut. $\mu\epsilon$ ίξω, \sqrt{me} ιλ-me \underline{i} θ-. ομόργ- $r\bar{\iota}$ - μ ι 'I wipe' for *m̄ḡg-, V merḡ-. ἄχ-νυ-μαι 'I am grieved, troubled', beside Goth. un-agands 'not fearing' og 'I fear'. An old form with strong root (third strong grade) is Hom. δηκ-νύ-μενο-ς 'doing honour to, reverencing, greeting', see § 639 p. 178. Greek new formations with a strong root-form are ὀφέγ-νι-μι 'I reach, stretch out \sqrt{reg} , δείκ-νυ-μι 'I show' beside Cret. π_{l} -δίκ-ν \bar{v} -τι, ζεύγ-ν \bar{v} -μι 'I bmd' \sqrt{j} eμg-, π ήγ-ν \bar{v} -μι 'I fix' \sqrt{p} ā \hat{k} pāĝ- and others. Ion. δέκ-νυ-μι 'I show', coming, as we may conjecture, from a 1/dek-, but in use finally confused with δείκ-νυ-μι (cp. Fick, Wtb. I4 66). όμ-νυ-μι 'I swear' beside ομο- (ομο-σσαι ομο-τη-ς), ολλυ-μι 'I destroy' for *ολ-νυ-μι (I § 204 p. 170) beside $\delta\lambda\varepsilon$ - ($\delta\lambda\dot{\varepsilon}$ - $\sigma\sigma\alpha\imath$), like $\delta\dot{\alpha}\mu$ - $\nu\eta$ - μ i beside $\delta\alpha\mu\alpha$ -, $\kappa\dot{\alpha}\mu$ - $\nu\omega$ beside $\kappa\alpha\mu\alpha$ - (§ 602 p. 144).

The place of (Ion.) είννμι 'I clothe' for *f-εσ-νν-μι = Armen. z-genu-m (§ 639 p. 178) was in Attıc taken by a new form ενννμι; see I § 565 pp. 422 f. The following are forms of the same kind: σβένννμι 'I quench, stop' for earlier ζείννμι i. e. zβείννμι (Hesych) ') from a stem *zg-es-V seg-, cp. aor. Hom. σβέσ-σαι; ββείνννμιαι (gramm.) beside ββ-είω 'pedo' aor. ββ-είσαι for *ββ-εσ-, earlier *βzδ-εσ-, V pezd- 'pedere' (cp. § 661). Further, ζω΄νννμι 'I gird' '2) beside ζωσ-τηρ Idg. j-σs- (§ 656). On the model of these were made xορείνννμιι 'I satisfy', πετάνννμιι 'I spread', φω΄νννμιι 'I strengthen', στρο΄ννννμιι 'I strew, spread' and others; and the analogy of ημφί-εσα -εσμιι: αμφι-ένννμι gave rise to τορένννμι beside ενόρεσα πεκόρεσμιι, etc.

A present " $\pi l \cdot r \bar{\imath} - \mu$ is represented by $\pi \iota \nu \nu \mu \dot{\nu} \nu r$ ourse $\dot{\eta} \nu$ Hesych., compare $\pi \iota \cdot \nu \nu \cdot \tau \dot{o} \cdot \varsigma$ 'enlightened, sensible' $\pi \iota \nu \dot{\nu} \sigma \sigma \omega$ $\pi \dot{\iota} \nu \nu \sigma \iota \cdot \varsigma$. This, along with $\nu \eta - \pi \dot{\nu} \cdot \tau \iota \sigma \cdot \varsigma$ 'senseless, under age, minor' and $\nu \dot{\eta} \pi \iota \sigma \cdot \varsigma$ (same meaning) for " $\nu \eta - \pi J \cdot \iota \sigma \cdot \varsigma$ (I § 166 p. 147), is akin to Skr. $pu - n\dot{a} - t\dot{i}$ 'purifies, clears up' (for the accent cp. Goth. hug - s 'understanding, reason' beside Skr. $\dot{s} \dot{\mu} \dot{c} \dot{\iota} - \dot{s}$ 'pure', § 907). But $\pi \iota \nu \nu \cdot$ does not come from " $\pi \nu \cdot \nu \nu \cdot$ (I § 48 p. 41); the ground-form was " $pu - \iota - nu - \iota$, having the same determinative $\bar{\imath}$ as we see in Ital. " $pu - \bar{\iota} - \iota \dot{\sigma} - s$ (Osc. piíhiúí Lat. pu - s, see Bartholomae, Stud. Idg. Spr. ii 185) Skr. $pa - \bar{\iota} - \dot{\iota} \dot{\sigma} - \tau$, and in Gr. $\pi \dot{\nu} \dot{\iota} \varrho$ Umbr. pir O H G. fuir 'fire'. It follows that " $\pi \dot{\iota} \nu \bar{\nu} \mu \iota$: Skr. $pu - n\dot{a} - m = Skr$. $r - \iota - n\nu a - t\dot{\iota}$ Gr. $\dot{\iota} \dot{\varrho} \dot{\iota} \nu \dot{\nu} \nu \dot{\iota} \nu \dot{\iota}$ (cp. § 596. 4 p. 138).

¹⁾ Hesychius has ζείναμεν οβέννυμεν which is emended to ζείνυμεν This emendation is not necessary. There may quite well have been parallel forms, one in Class XII and one in Class XVII, as so often happens in Sanskrit. Then the form ζείνυμι in the text should be marked with an asterisk.

²⁾ It is quite possible that Att. ὑπο-ζωνύνα[ι] C I A. 1 77 9 (second half of the 5th cent B.C.) may represent the regular form (cp. ἐζωμένος, Meisterhans, Gr.², p. 148).

On thematic forms in $-\nu F - \omega$ see § 652. As regards those in $-\nu \dot{\nu} \omega$, as $\tau \alpha \nu \dot{\nu} \omega$ $\dot{\sigma} \mu \nu \dot{\nu} \omega$ $\sigma \tau \rho \omega \nu \nu \dot{\omega}$, found in the Homeric dialect and in Attic more and more often from the 4th century B. C. onwards, it is doubtful whether they represent pr Idg. verbs in $-nuu - \bar{o}$, which may have been used side by side with $-nu - \bar{o}$ as in the 3rd pl. Skr. $a\dot{s} - nuv - \dot{a}nti$ Gr. $\ddot{\alpha} \gamma - \nu v - \bar{\alpha} \sigma i$ beside Skr. $ci - nv - \dot{a}nti$ They may equally well be a new formation peculiar to Greek.

For μι-νύ-θω φθι-νύ-θω, see § 694

§ 644 Italic Only thematic forms occur in this branch; see § 649. An undoubted relic of -ney- is nov-a-cula, if it is to be connected with Skr kš-nāú-ti (§ 640 p. 179).

Remark Job (Mém Soc. Ling vi 353 f) offers a very doublous suggestion, that in Latin present stems in nu-came directly from those in -no-; he says *tol-nu-mus *tol-nu-tis lead at once to *tolnimus *tolnitis (tollimus tollitis), whence by complementary analogy tollō

- § 645. Keltic: Not one of the original forms is preserved. On O.Ir. ro-chluinur 'I hear' (beside Avest srunaoiti), see § 604 p. 146.
- § 646. Germanic. The plural of certain verbs is of this class. Goth. OH.G. kun-nu-m 'we learn, know' from *gn-nu-

-mes (cp. p. 86 footnote 2) as contrasted with Skr. jā-nī-más, Class XII; the parallel weak form Goth. uf-kunna 3rd sing. -kunnái-þ is a new formation from kann kunnum on the analogy of vita vitái-p to váit vitum Low Germ. darn 'I dare' conj. durne gives ground for assuming an O.Sax. *durnum Goth. *daúrz--nu-m (I § 582 p. 434) = Skr. $dhr \xi$ -nu-más. O H.G. unnum 'we grant' ground-form *p-nu-mes (cp. O.Icel. of-un-d 'ill-will' beside Goth. ans-t-s O.H.G. ans-t uns-t 'favour, grace' II § 100 p. 303), from the same root as Gr προσ-ηνής 'inclined' ἀπ-ηνής 'disinclined'. As these plurals appeared to be of the same kind as the preterite-present, they were conjugated in the same way. Thus arose, by analogy of the singular, Goth kann O.H.G. kan, Low Germ. darn O II.G. an. The same principle is neatly used by Kluge (Paul's Grundr. 1 377) to explain O.H.G. durfum 'we must', which he regards as a nu-form for *purpum with -p- for -pp- Idg. -pn- (I \S 530 p. 388) = Skr. trp-nu-más; the student should compare de Saussure, Mém. Soc. Ling vii 83 ff. Some further uncertain traces of nu-flexion in Germanic are given in § 605 Rem. p 147, and p. 151 footnote 1.

Otherwise the Germanic branch prefers thematic conjugation (Class XVIII), as Goth. du-ginna (§ 654).

§ 647. Balto-Slavonic. For the remains of the present suffix -nu- in Slavonic see § 649 p 185.

Class XVIII.

Root + -new-o- or -nw-o- forming the Present Stem

§ 648. Side by side with -nuo- we meet with -enuo- and -nuo-; see § 596 pp. 137 f.

This class, which is based upon Class XVII, falls into two divisions like Class II. O.Pers. $a-k\bar{u}-nav-a-t\bar{a}$ stands to Skr. $\dot{a}-kr-nv-a-ta$ as Gr. $\dot{\bar{e}}-nv\epsilon(f)-\epsilon$ to $\ddot{a}\mu-nvv-\epsilon$. And just as Skr. ay-a- is at once indicative ($\dot{a}y-a-t\bar{\epsilon}$, cp. Lat. $\epsilon\bar{o}$), and conjunctive to an indic. of Class I ($\dot{a}y-a-t$ $\dot{a}y-a-ti$ conj. of $\dot{\epsilon}-ti$), so Ar. kr-

-nau-a- is also conjunctive to an indic. of Class XVII (Skr. kr-náv-a-t conj. of kr-nó-ti). Here, as before, there was originally no distinction between the original form of the two moods.

§ 649. Class XVIII A. Suffix -ney-o-.

Aryan. Avest. 2nd sing. pret. act. kere-nav-ō imper. kere-nav-a, O.Pers. pret. 3rd sing. act. a-kū-nav-a 3rd pl. mid. a-kū-nav-atā (i. e. -a-ntā), cp. indic. Skr kz-nō-m 'I make'; conj. Skr. kz-náv-ā-t kz-nav-ā-tha Avest. kere-nav-ā-p O.Pers. 2nd sing. kū-nav-ā-hy. O Pers. 3rd sing. imper. var-nav-a-tām conj. var-nav-ā-tiy beside Avest. vere-nv-a-tē 'believes' (B). Compare the conj Skr. aš-nav-ā-tha Avest. aš-nav-ā-p beside Skr. aš-nō-mi 'I reach', Avest sri-nav-ā-hi beside sri-nao-mi 'I bend, guide in some direction'.

Greek. It has been usual to class here forms like $\Im \bar{v} - \nu \epsilon' \omega$ 'I move wildly, storm' beside Skr. $dh\bar{u} - n\bar{o} - t\iota$, $\nu \bar{\iota} - \nu \epsilon' \omega$ 'I move from its place' beside $\varkappa \dot{\iota} - \nu \nu - \mu \omega \iota$, $-\nu \epsilon \omega$ being taken to be for *- $\nu \epsilon F - \omega$ But since in all the verbs in question the future, aorist etc. have never $-\nu \epsilon \nu - \iota$, as one might expect from $\pi \lambda \dot{\epsilon} \omega$ $\ddot{\epsilon} \pi \lambda \epsilon \nu \sigma \omega$ and $\nu \dot{\epsilon} \omega$ $\ddot{\epsilon} \nu \epsilon \nu \sigma \omega$, but $-\eta$ - always, and since Lesbian makes the present of them end in $-\eta \mu u$ (imper. $\nu \dot{t} \nu \eta$ like $\varphi (\lambda \eta)$, this explanation is at least improbable. I derive $-\epsilon \omega$ from $\epsilon \iota \omega$ in every case. See § 801.

Italic. Lat. mnuō and sternuō, which are connected with Skr. mi-nō-m Gr. μι-ri-θω and Gr. πτάρ-νν-μω (§ 639 p. 177), can by rule be derived from *-neu-ō (I § 172.1 p. 152). But Osc. menvum 'minuere' makes it at least likely that minuō comes from *minuō as tenuis from *tenui-s (I § 170 p. 149). The perfect minuō sternuō and the participle minūtu-s are adformates of statuō statūtu-s: statuō.

Slavonic. O.C.Sl. mi-nują beside mi-ną I go past, pass by, flow by, and partic. pret. pass. kos-novenu 'touched' from pres. kos-ną, point to an older present inflexion -novą -noveši etc. (-nov- for -neu-, I § 68 p. 59). Compare Wiedemann, Arch. slav. Phil., x 653.

§ 650. Class XVIII B: Suffix -ny-o-

Pr. Idg. Skr. ci-nv-a-ti, Gr Hom. τίνω Att. τίνω for *τι-ν-ω-ω beside Skr ci-nō-mi Gr. infin. τι-νύ-μεναι 3rd pl. τί-νν-νται, § 639 p. 177. Skr. hi-nv-a-ti Goth. du-ginna beside Skr. hi-nō-mi, § 639 p. 177. *r-i-nu-e-ti with root determinative -i- (§ 596. 4 p. 138); Skr. ri-nv-a-ti 'makes run, flow', Gr. Hom. δρίνω Lesb. δρίννω 'I set in motion' for *δρι-ν-ω-ω (the initial has perhaps been influenced by a word from the same root, δρ-ν-ω-μ, ground-form *-τ-nu-, to which it stands related as Hom ἀγίνω to Cret. ἀγνέω, see §§ 652 and 801), Goth. ri-nna 'I overflow' pr. Germ. *ri-nu-ō (cp. however for the Germanic word § 654 p. 188).

With -enu-o- for the suffix (§ 596.3 pp. 137 f.), *sp-enu-e-ti from √ spē- spə- 'bring onwards, stretch' (Lat. spēs spatium etc.): Avest. spēnva-þ 'proficiebat' = pr. Ar. *spanua-t, O.H.G. spinnu 'I spin' (cp O.II.G. spannu = *spə-nu-ō § 654).

§ 651. Aryan. Skr. y-nvá-ti ci-nva-ti hí-nva-ti á-ky-nva-ta í-nva-ti ri-nva-ti, Avest. ver-nva-ti hu-nva-nuha see §§ 639, 640, 641, and 650. Skr. pí-nva-ti 'swells, makes abound' beside partic. mid. pi-nv-āná-s Avest. fra-pinao-iti 'swells, spreads' (intr.). Skr. jí-nva-ti 'sets in motion, pushes on, hastens' beside pi-nó-mi. Skr. imper mid. du-nva-sva beside du-nó-mi 'I burn'.

Sometimes Sanskrit, like Germanic, has a verb which carries the suffix of the present through the whole verbal system; as pinva-ti: pipinva pinvayati, jinvati · jinvišya-ti jinvi-tá-s.

Observe the different accent of 3rd pl. hinva-nti, and hinv--anti in Class XVII.

Containing the suffix -envo-. Avest. spēnva-p 'proficiebat': O.H G. spinnu, see § 650; Avest. xwanva-inti 'they drive on' xwēnva-p pr. Ar. *sy-anya-, beside hu-næo-iti hu-nā-iti.

§ 652. Greek. On the treatment of $-\nu F$ - in the following words, see I § 166 p. 146. $\tilde{\alpha}\nu\omega$ $\tilde{\alpha}\nu\omega$ for $*\dot{\alpha}-\nu F\omega$, $\tau t\nu\omega$ $\tau t\nu\omega$ for $\tau t-\nu F\omega$, $\varphi \vartheta t\nu\omega$ $\varphi \vartheta t\nu\omega$ for $*\varphi \vartheta t-\nu F\omega$, $\vartheta \varrho t\nu\omega$ $\vartheta \varrho t\nu\omega$ for $*\dot{\varphi}\varrho t-\nu F\omega$, see §§ 639, 650. $\varphi \vartheta \dot{\alpha}\nu\omega$ $\varphi \vartheta \dot{\alpha}\nu\omega$ 'I anticipate' for

*φθα-νΕω, beside φθά-μενο-ς. δίνω Lesb. δίννω 'I eddy' for *&ī-vfw, beside Skr. dī-ya-ti 'flies' Lett. déi-ju di-t 'to dance', cp. δίνο-ς δίνη Lesb. δίννα for *δι-ν Fo-ς δι-ν Fa. Hom. ἀγίνω 'I lead, bring' beside άγω Cret. ἀγνέω has the same rootdeterminative as dotvo (on this determinative, which is contained in Skr. áj-āi-š, see § 498 p. 61); and therefore $\dot{a}\gamma\dot{t}\nu\omega$ too must be derived from *- $\nu F\omega$, on the bye-form άγινέω, see § 801. With ορ-ίνω άγ-ίνω άγινέω compare the Hesychian glosses εξίνεν επεσβέννυεν and εξίνει επεσβέννυεν, which point to *zq-t- as variant stem to *zq-es- (§ 643 p. 182). Whether Homer's θύνω 'I move wildly, storm', represent orig. *dhū-nuō or *dhū-nō -n-uō, Class XIII (cp. Skr. dhū-nō-tı dhu--nō-ti dhu-nā-ti) cannot be decided; in the former case 9vvo-c 'fury, impetus' should be compared with siro-s for *dī-nuo-s (see above); for θῖνέω δῖνέω see § 801.

Hom. πιγάνω Att. πιγγάνω 'I reach, overtake' for *-αν Fω beside λί-χη-μι (§ 594 p. 135). λιγχάνω has the first syllable nasalised because, after F had gone, the analogy of verbs like Θιγγάνω could act upon it (§ 621 p. 158, § 631 p. 168). Hom. ἐκάνω 'I arrive, reach' for τίναν Fω, bye-form ἐκνέομαι (§ 801). Both of these present stems may be regarded as ad-formates of *φθαν Fω (φθάνω φθάνω), because they all had something of the same meaning: on the analogy of φθήσομαι to φθάνω, γιζάνω was formed working backwards from κιγήσομαι, and afterwards ή άνω. But there was another suffix -nuō before Greek became a separate language; and this would become regularly pr. Gr. -avfw (the Author, Gr. Gr. 2 § 21. 3 p. 41), see § 596. 3 p. 138.

The suffix is -enuo- in Corcyr. \(\xi - \epsilon v Fo - \xi \), whence Lesb. ξέννο-ς Ion. ξείνο-ς Att. ξένο-ς (I § 166 p. 146), since this word seems to have the same root as Lat. hos-ti-s and Goth. gas-t-s; see § 596. 3 and 6, pp. 138 and 140

§ 653. Italic. Lat mi-nu-ō, Osc. menvum 'minvere', see § 649 p. 185.

§ 654. Germanic. Goth. du-ginna O.H.G. bi-ginnu 'I begin', see § 639 p. 177, § 650 p. 186. Goth. af-linna 'I go away, cease', OHG. bi-linnu 'I cease', beside Skr. vi-lināti 'goes to pieces, dissolves, melts' etc. § 598 p. 142. Goth. vi-nna 'I suffer, feel pain, worry', O.H.G. gi-winnu 'I reach something with trouble, win' (cp. O.H.G. winna 'strife'), beside Skr. vē-ti 'presses on in hostile fashion, conquers, seeks eagerly, tries to win'. All these verbs came under the influence of such others as Goth. binda, hence forms like du-ginna -gann -gunnum -gunnans

O.H.G. ba-nnu 'l order, command on pain and penalty, summon' (cp O.H.G. ban, gen. bannes 'command enforced by pains and penalties' A.S. bann 'ban, banns, proclamation'), ground-form 'bho-nuō, \$\sqrt{bha}\$- bho-, cp. Armen. ba-na-m \ 601 p. 144. Gr qainu for *\quantua-\nu_\cup \ 611 p. 150. O.H.G. spa-nnu 'I stretch, widen, spread, I am anxious and excited', ground-form *\spo-nu-\overline{\sigma}\$, \$\sqrt{sp\overline{\sigma}}\$- sp\overline{\sigma}\$-, cp. O.H.G. spa-nu 'I entice, charm' (\ 614 p. 152) and O.H.G. sp-innu (see below). The preterites bian spian follow hialt. haltu and such like forms.

Containing the suffix -enuo- (§ 596 3 p. 138). O.H.G. sp-nnu 'I spin'. Avest. $sp\bar{e}nva-D$, see § 650 p. 186; a variant form is $spannu == *spa-nu\bar{o}$, for which see just above. O.H.G. tr-nnu 'I separate from, part, depart from' groundform 'dr-enu \bar{o} , \sqrt{dei} - 'split' (Skr. dr-n \bar{a} -ti).

The existence of the two variants -nuo- and -enuo- in Germanic raises a question as to how Goth. rinna 'I run' and binna O.H.G. brinnu are to be disposed of Instead of deriving rinna from 'r-i-nuō, and identifying it with Skr. rinva-ti (§ 650 p. 186), we may assume *r-enuō for its original form, which would bring it closer to Skr. r-nv-á-ti. brinna may come from *bhr-enuō, as it is akin to Lat. fer-mentu-m ferveō O.Ir. ber-baim 'I cook, boil', but it may be for *bhr-i-nuō with an i-determinative, cp. O.Icel. br-ī-me 'fire' A.S. br-ī-w O H G. br-ī-o 'broth'. The first derivation, from *r-enuō *bhr-enuō, is supported by Goth. r-un-s 'a run, course' A.S. br-yne 'fire, conflagration'.

E CLASSES XIX TO XXI.

PRESENT STEMS WITH -s-.1)

§ 655. A large number of verb classes have an s suffixed to the root. These are both thematic and non-thematic. (1) Non-Thematic Stems. Skr. dvé-š-ti 'hates' (cp. Avest. dvae-ba 'terror' Gr. Hom. δέ-δδι-μεν or δέ-δΕι-μεν 'we fear'), Skr. aor. 1st pl. á-ta-s-mahi (v ten- 'stretch'), Skr. v-ás-tē 'dresses' (\sqrt{eu} -, Lat. ex- $u\bar{o}$), Gr. $\eta'\delta\epsilon\alpha$ i. e. η' - $f\epsilon\iota\delta$ - $\epsilon\sigma$ - α Idg. *es-m, Skr. á-vēd-iš-am. (2) Thematic Stems: O.H.G. din-su 'I pull, tear', Skr. á-ta-ta-sa-t 'he tore, set in motion by force' $(\sqrt{ten-})$, Skr. desid. μ - $g\bar{q}$ -sa-ti $(\sqrt{gem-go'})$, Skr. tr-asa-ti'trembles' (cp. tar-alá-s 'trembling, moving to and fro' Lat. tr-emō), Skr. desid. jí-gam-iša-ti (V gem-). From these develope extensions of the -s- suffix, which themselves run through large groups: -s-yo- -os-jo-, fut, Skr. tq-syá-tē gam--išyá-ti; -s-ko-, Lat. (g) $n\bar{o}$ -sc \bar{o} Gr. γ ι- γ νώ-σκω (cp. Skr. desid. ji-jhā-sa-tē); and others more isolated, as Armen. z-genum Gr. Elvūm (Evvūm) for *u-es-neu- (§ 639 p. 178, § 643 p. 182).

It cannot be definitely proved that in all these forms s has really the same origin. But the negative cannot even be made probable. The clearest indication of the identity of s in the aorist with s in verbs of Classes XIX and XX is given by Skr. á-kr-š-i as compared with kr-š-ē, ák-š-i compared with ak-ša-tē, á-mrk-ša-t compared with mrk-ša-ti, see §§ 656, 659; compare too Lat. vīs-ī beside pres. vīsō (§ 662), Lat. aux-ī Lith. 1st and 2nd pl. injunct. (fut) áuks-me -te beside Gr. av & (§ 657). It should further be noticed that a close connexion is often formed with the noun suffix -es-, as in Skr. bhy-ása-ti

¹⁾ Compare Per Persson's new work (Wurzelerweiterung, etc) pp. 77 ff., where the suffix or determinative s in assumed for other forms besides those which will here be cited Amongst these are some in which we have regarded the s as part of the root itself; e g Skr. várša-ti 'it rains', which he derives from the root of Skr. vár: 'water, wetness'.

'is afraid' and bhī-s-aya-tē, used as causal of bi-bhé-ti, beside bhy-ás- bhiy-ás- 'fear' instr. bhīš-á (§ 658), in Skr. úk-ša-ti 'grows strong' Gr. av 5m beside Skr. 6j-as- 'strength' (§ 657), and in Skr. indic. á-jāi-š-am beside inf. ji-š-é, indic. rūj-as-ē beside infin. rnj-ás-ē, Gr εδειξα beside infin. δείξαι, conj. ferrem beside inf. ferre, conj. agerem beside inf. agere (§ 824). We must not forget that no clear line can be drawn between primary s-verbs and verbs derived from s-nouns, any more than between primary verbs with -n- and nouns having the same suffix: e. g. Gr. έ-σβ-εσ-ται ε-ξ-εσ-ται σβ-εσ-τό-ς ξ-εσ-τό-ς stand to τε-τέλεσ-ται ήδεσ-ται αίδ-εσ-τό-ς α-κήδεσ-το-ς related in the some way as $\pi \dot{\epsilon} - \pi \lambda - \eta - \tau \alpha i$ Dor. $\dot{\alpha} - \pi \lambda - \bar{\alpha} - \tau \sigma - \varsigma$ to $\tau \dot{\epsilon} - \tau \dot{t} \mu \eta - \tau \alpha i$ τιμη-τό-ς.

In this section we take count only of present stems with s final, and those which have a thematic vowel after the s. The compound suffix -s-ko- fills Classes XXII and XXIII; and -s-io- (the future suffix) will be found in the io-class, §§ 747 ff. Stems like *y-es-ney- (εινυμι) are discussed under the heading -ney-, in §§ 639, 642, and 643.

Since the s-aorist in its common form adds the personal endings directly to s, its proper place is here, in Class XIX. It may, hewever, if preferred, be treated separately in the traditional way, for the reasons given above in § 485, pp. 38 f. See §§ 810 ff.

Class XIX.

Root + -s-, -es-, or -ss- forming the Present Stem.

§ 656. Very few additional forms belong to this class besides the preterites which will be discussed in §§ 810 ff.; such, I mean, as Skr. ά-tą-s-mahi Gr. ηδ-ε-ω Skr. ά-vēd-iš-am. Some of them carry the s-element right through the verb system

Skr. dvé-š-ți 'hates' 3rd pl. dvi-š-ánti, Avest. debiš-enti, beside Avest. dvae-pa 'terror' Gr. Sfer 'to fear'; — thematic, Skr. dvi-ša-tı. Skr. 3rd pl. ά-tvi-š-ur 'they were excited, amazed' beside Avest. pwyant- 'terrifying' pwyā- 'terror'; — thematic, Skr. ά-tvi-ša-ta, Gr. partic. σιών for *σι-σων pres. σείω instead of *σει-σω (cp. σέ-σεισ-ται etc.), see § 657.

Skr. v-ás- $t\bar{e}$ 'dresses, clothes himself' Avest. vas- $t\bar{e}$, Gr. ℓ ní- $\epsilon\sigma$ - $\tau\alpha\iota$ 2nd sing. $\epsilon\sigma$ - $\sigma\alpha\iota$ from $\sqrt{e}u$ - Lat. ex- $u\bar{o}$ Lith. au- $n\dot{u}$.

Avest. y- $\bar{a}s$ -ti 'gırds' Lıth. \jmath - \bar{u} 's-m 'I gırd' (Att. $\zeta \omega r v \bar{v} \mu u$ instead of * $\zeta \omega \sigma$ - $v \bar{\iota}$ - μ , § 643 p. 182), Idg. * \jmath - $\bar{a}s$ -ti, beside Skr. y- $\bar{a}u$ -ti 'bellows, howls' beside r- $\bar{a}u$ -ti 'r-uv \hat{a} -ti.

Here come a certain number of Vedic middle forms with -s- in the present, those which Grassmann has called "double stems": 1^{st} and 3^{rd} sing. $-s-\bar{e}$ partic. $-s-\bar{a}na-$. 1^{st} sing. $kr-\bar{s}-\bar{e}$ from $k\acute{a}r-ti$ 'makes'. 1^{st} sing. $hr-\bar{s}-\bar{e}$ from $hi-n\acute{o}-ti$ 'drives on' partic. $hiy-\bar{a}n\acute{a}-s$. 1^{st} and 3^{rd} sing. $stu-\bar{s}-\bar{e}$ from $st\bar{a}\acute{u}-ti$ 'praises' mid. $stu-t\bar{e}$. 1^{st} sing. $arcas-\bar{e}$ from $\acute{a}rca-ti$ 'praises'. 1^{st} sing. $yajas-\bar{e}$ from $y\acute{a}ja-ti$ 'honours, offers'. 1^{st} sing. $y\~{n}jas-\bar{e}$ partic. $x\~{n}jas-\bar{a}n\acute{a}-s$ from $y\~{n}j\acute{a}-ti$, $vr\~{e}j$ 'stretch, reach' (Class XVI § 628 p. 165). 1^{st} sing. $pu-n\bar{t}-\bar{s}-\bar{e}$ from $pu-n\acute{a}-ti$ 'purifies' mid. $pu-n\bar{t}-t\bar{e}$. 1^{st} sing. $g\={a}-yi-\bar{s}-\bar{e}$ from $g\acute{a}-ya-ti$ 'sings'. A similar Avestic form is 1^{st} sing. $r\~{a}nhanh-\bar{o}i$ from $r\bar{a}s$ - 'to grant'.

Class XX.

Root + -so- or -eso- forming the Present Stem.

§ 657. The s-suffix mostly runs through all parts of the verb.

 cp. Lith. bal-sa-s 'voice, tone'. From \(\square tuez \)- (Avest. \(\bar{pwyant} \)-): Skr. tvē-ša-ti 'is in violent motion, is amazed' (not actually found), pret. ά-tvn-š-ata, Gr. σείω 'I shake, shatter, agitate, molest' for *σει-σω (cp. Solmsen, Kuhn's Zeitschr. xxix 98), σιών for *σι-σων; cp. Skr. á-tvn-š-ur § 656. From γ preu-(Lat. pruīna): Skr. plō-ša-ti 'burns, singes', O.H.G. friu-su 'I freeze, am cold', cp. Lat. prūr-ιō. From \sqrt{leq} - (Gr. άλ--αλχ-εῖν 'ward off') · Skr. rák-ša-tı 'guards, saves', Gr. ἀλέξω 'I ward off, help'. Connected with Skr. vājáya-ti 'strengthens' ójas- 'strength, power, might' Lat. augeō: Skr. úk-ša-tı 'grows strong, increases' partic. uk-šá-māna-s (perf. vavákša) Avest. vax-ša-iti 'makes grow', Gr. ἀ(F)έξω αΰξω 'I make grow, increase', cp. Lat. aux-iliu-m, 1) Gall. Uxello-dūnu-m 'High-town' O.Ir. ōs uas 'above' (I § 517 p. 377), O.H.G. wah-su Goth. vah-s-ja 'I grow' (pret. vōhs), Lith. áuksz-ta-s 'high'.2) Gr. εψω 'I boil', which, along with Armen. epem 'I boil' (I § 561 p. 417), we may assign to the root of ξπω I see about, make right, arrange' (Il. 11. 776 ἀμφὶ βοὸς ξπετον τρέα) Skr. sáp-a-ti 'makes a fuss about, carries on, sees about something'.

From \sqrt{ter} (Skr. tar-alá-s 'moving to and fro, trembling' Gr. $\tau \varrho$ - $\dot{\epsilon}\mu\omega$ Lat. tr- $em\bar{\varrho}$ § 488 p. 45): Skr. tr-ása-ti 'trembles' (also tar-ása-ti § 659), Gr. $\tau \varrho$ - $\dot{\epsilon}(\sigma)\omega$ 'I tremble, flee', O.C.Sl. tresą 'I shake, shatter' perhaps a re-formate instead of *tresą (§ 636 p. 174), with -s-, Lat. terre $\bar{\varrho}$ for *ter-s- (cp. Gr. $\check{\epsilon}\tau \varepsilon \varrho \sigma \varepsilon \nu$ · $\check{\epsilon}\varphi \dot{\varrho} \rho \eta \sigma \varepsilon \nu$ Hesych.). Compare Skr. gr-asa-ti hr-asa-ti bhy-ása-ti Avest. v-anha- $t\bar{\varrho}$ § 659, Gr. $\dot{\epsilon}$ - $\dot{\epsilon}(\sigma)\omega$ $\beta \delta$ - $\dot{\epsilon}(\sigma)\omega$ § 661, Lat. qu-ero-r § 662.

¹⁾ According to Bréal's convincing explanation, Umbr. orer ose 'his (donis) macte' will fall in this place too. ose = pr. Ital. *aukse may be a vocative, which would make it necessary to start from an adj. *aukso-s meaning 'auctus'; it may also be an imperative like Gr. auts (cp. Lat. auxim) The first view is supported by Lat. macte, a vocative (F. D. Allen, Am. Journ. Phil, I 135 ff.). Pauli's explanation of ose (Alt. Stud. v 123) does not seem right to me.

²⁾ On the relation between ueg- aug- aueg-, see Per Persson, Wurz., 228.

§ 658. In § 655 it was pointed out that these s-suffixes are probably connected with the noun suffixes -es- -s- (§§ 131 ff) A few more examples of this may be given:

Skr tánas- Lat tenor. Skr. ta-sa-ti Skr. úk-ša-ti Gr. αὔξω: Skr σjas-. Skr. śrσ-ša-māna-s O.C.Sl. slu-chŭ (§ 659). Skr. śrávas- Gr. λέ(F)ος Skr. bhű-ša-ti (§ 659). Skr bhavas- bhúvas-. Skr dáh-ša-ti (§ 659) Skr. dašas-ya-ti Lat. decus. Skr. sák-ša-nt- (§ 659) Skr. sáhas-. O Pers. patiy--axšavy (§ 659), Skr. th-ša-tē (§ 667). O.C Sl. oko gen. očes-e. Avest. vax-ša-itē (§ 659): Skr. vácas-. Armen. luci (§ 660): Skr. -rōcas- rōciš- ruciš-ya-s. Lat. vīsō (§ 662): Skr. vēdas-Gr. słóog fiofog ioo-g for fivo-fo-g (p. XIII). O.Icel. inf. hrjosa (§ 664): Skr. kravíš- Gr. γοέ(F)ας. Compare also Skr. bhartsa-ti (beside bhartsaya-ti) 'attacks sharply, rates, scolds', akm to Lat. fer-10, Lith. bar-12 'I scold', and so doubtless derived from some such stem as *bhar-tas- (cp sro-tas- 'stream') or *bhar-dhas- (cp. rá-dhas- 'grace, gift'). The nouns -tasadakšá- sakša- vax-ša- which are connected with tasa-ti dákša-ti sákša-nt- vaxša-ıtē were therefore related to tánas-*dášas- (dašas-ya-tı) sáhas- vácas- ın the same way as vat-sá- to Gr Fέτος, Skr. šīr-šá- to šíras-, hō-šá- to havíš-, and so forth (II § 132 p. 190).

Skr. bhása-ti (§ 659): bhás- Lat. fas.

Skr. hr-asa-ti (§ 659): háras-. Skr. yaj-as-ē (§ 656): Skr. yajás-. These are like bhy-ása-ti beside bhyás- bhiyás-(already mentioned in § 655, page 190)

 šró-ši), ep O.Ir. cluas 'ear' (I § 516 p. 377) O.Sax. hlus-t 'hearing' O.C Sl. sluchu 'hearing, faculty of hearing'. Skr. ghó--ša-ta 'cries out, proclaims aloud' (ghôša-s 'confused noise, roar of a storm, cry of woe'), beside Goth. gáu-non 'to cry for woe'. Skr. bhú-ša-tı 'applies himself to, takes trouble about', V bheu-(Skr. bháva-ti). Skr. sūrh-ša-ti 'is anxious about something, takes thought for it, or account of it, beside Goth. saurg-a 'care', which must be connected with O Ir. serc 'love' or with Lith. sérg-u 'I protect'. Skr mrak-ša-ti mrk-ša-ti 'rubs, strokes', beside márš-ti 3rd pl. mrj-ánti. Skr. akša-tē ground-form * $\hat{y}\hat{k}$ -se-taz beside $a\dot{s}$ -n \dot{o} -ti 'reaches' (§ 640 p. 179); from the same root, nák-ša-ti 'reaches' beside náš-a-ti Lith nesz-ù; with these must also be connected Goth. bi-niuhs-ja 'I search out nuhs-ein-s 'visitation, affliction', which come from *nux-s-Idg. *nk-s- (cp. q1-naúhan 'to suffice'). Skr mók-ša-tē 'gets free from something' (redupl mú-muk-ša-ti § 667), beside muc-á-ti munc-á-ti. Skr. bhak-ša-ti 'enjoys, eats, devours', Avest. bax--ša-iti 'divides, receives for share', beside Skr. bháj-a-ti. Skr. dák-ša-ti 'acts so as to suit or satisfy somebody' mid. 'plunges, dips, ducks, is dexterous' (dahšá-s 'dexterous') beside dašas-ya-ti 'is at one's service, shows respect'. Skr. lak-ša-tē 'marks', from lag- 'fasten on' Skr. sák-ša-nt- 'overpowering', from sah- 'to overpower'. Skr. injunct. ap-sa-nta 'they sought to get', beside ap-no-ti (§ 600 p. 144), cp the reduplicated tpsa-ti (§ 667). O Pers. patiy-axšaiy 'I inspect', beside Skr. (ik-š-1 'eye' O C.Sl oko (gen očes-e) 'eye', cp. the reduplicated Skr. ik-ša-tē (§ 667) and the Gr. imper. aor ὄψεσθε. Avest. vax-ša-ıtē 'speaks', from vac- 'speak' Avest tax-ša-ıtı 'makes run' beside tac-a-iti 'runs' Skr. ták-a-ti. Avest. sax-ša--iti 'learns', beside sācaye-iti 'teaches' Skr. šak-nō-ti 'is able', cp. the reduplicated Skr šihša-tē Avest a-sixša-nt- (§ 667).

The preterite type belonging to this class is productive in Sanskrit, where, with roots which made final $k\check{s}$ when s was added to them, it was used for the aorist; specially frequent when the root had χ , ι , or ι . Examples: \acute{a} - $m\gamma k$ - $\check{s}a$ -t cp. above, $m\gamma k$ - $\check{s}a$ -t from $m\alpha rj$ -, \acute{a} - $s\gamma \gamma k$ - $\check{s}a$ -t from $sp\alpha r\check{s}$ - 'touch', \acute{a} - $v\gamma k$ - $\check{s}a$ -t

from varh- 'tear, tear out', á-dik-ša-t from dis- 'show', á-lik-ša-t from lih- 'lick', á-dhuk-šat and á-duk-šat (the latter an ad-formate of the type úduhat, cp. Gr. Ĕπεισα instead of τέφεισα following πείθω etc., I § 496 p. 364) from duh- 'mılk'. The forms dhukšá-n dhukšá-nta, and others like them, are remarkable as having the accent upon the thematic vowel. The aor. \acute{a} - $m_{l}k$ - $\acute{s}a$ -t it related to the pres. mrk-ša-ti not otherwise than the aor. á-kr-š-i to the pres. kr-š-ē (§ 656 p. 191). O.Pers. my-apišam 'I wrote', with $\check{s} = k\bar{s}$, √ peik- (I § 401 p. 297), seems to belong to the same class; as no other persons are preserved, it is possible to assume that this is non-thematic, but the root-vowel is in favour of believing it to be thematic. The agrist use in all these forms is due to the weak grade of root syllable, just as with á-sic-a-t and the like (§ 513 pp 78 f). But the imperfect meaning was not excluded either with this type without s or with the s-preterite which we are now dealing with ádhukša-t is imperfect as well as agrist (Whitney, Am. Journ. Phil. vi 281). On this agrist type in general see § 833.

Skr. $bh\acute{a}sa-ti$ 'appears, shines', beside $bh\acute{a}-ti$. Skr. $\imath \acute{a}sa-t\bar{v}$ 'bestows, affords', Avest 1st sing. $\imath \acute{a}sh\bar{p}$ beside Skr. $\imath \bar{a}-t\bar{e}$. Skr $h\acute{a}sa-t\bar{v}$ 'runs in a match', from $h\bar{a}$ - 'go' ud $h\bar{a}$ - 'to start up'. $\imath \ddot{a}sa-ti$ 'roars, bellows' beside $\imath \acute{a}ya-ti$, as regards $\imath \ddot{a}sa-ti$ compare further § 656 p 191.

Skr. tr-ása- $t\iota$ 'trembles', also tar-ása- $t\iota$ (partic. tarásan $t\bar{\iota}$ Rig-V.): Gr. $\tau_{\mathcal{Q}}$ - $\dot{\epsilon}(\sigma)\omega$, see § 657 p 192. Skr. gr-asa-ti 'swallows, devours', beside $g\iota r$ -á- $t\iota$ (Class II, § 523 p. 86) \sqrt{ger} -, akin to Gr $\gamma_{\mathcal{Q}}\dot{\alpha}\omega$ 'esse', perhaps for "gr- $s\bar{o}$? Skr. hr-asa- $t\iota$ 'takes away, diminishes, grows less', beside $h\dot{\alpha}r$ -a- $t\iota$ 'takes, takes away'. Skr. bhy-ása- $t\iota$ 'fears' (caus. $bh\bar{\iota}$ - $s\bar{\iota}$) beside $b\iota$ - $bh\dot{\bar{e}}$ - $t\iota$, cp. § 655 p. 190. Avest. v-anha- $\iota t\bar{\iota}$ beside v-as- $t\bar{\iota}$ 'dresses' § 656 p. 191. We should doubtless add vasa- $t\bar{\iota}$ 'bellows' beside $r\bar{\alpha}$ sa- $t\iota$ and $r\bar{\alpha}u$ - $t\bar{\iota}$, see § 656 p. 191.

§ 660. Armenian. Besides epem 'I boil' (see § 657 p. 192) may be named the aor. luçi 'I kindled' for *leuk-so-(pres. luçanem), Vleuq- 'lucere', cp. Skr. ruk-šá-s 'shining',

Lat. illūstri-s for *in-louc-s-tri-, AS līxan līyan 'shine' = Goth. *liuhs-ja-n (cp. II § 66 p. 140).

τρ-έ(σ)ω 'I tremble, flee': Skr. tr-ása- $t\iota$, see § 657 p. 192. ξ-έ(σ)ω 'I shave, smooth' beside ξ- ι νω from \sqrt{ges} - O C.Sl. čes-ati 'to comb, curry' Lith. kas- ι νμ 'to scratch' (cp. II § 8 Rem. 2 p. 20). β δ-έ(σ)ω 'pedo' for * β zδ-εσω from \sqrt{pezd} -Slov. $pezd\bar{e}$ -ti 'pedere' (I § 594 p. 450).

That some of the trisyllabic presents in $-\varepsilon \omega$ making aorist in $-\varepsilon \sigma \sigma \alpha$ etc., such as $\varkappa \alpha \lambda \dot{\varepsilon} \omega$ ($\varkappa \dot{\alpha} \lambda \dot{\varepsilon} \sigma \sigma \alpha$) $\dot{\alpha} \dot{\lambda} \dot{\varepsilon} \omega$ ($\dot{\alpha} \lambda \dot{\varepsilon} \sigma \sigma \alpha \nu$) $\sigma \tau \dot{\varepsilon} \dot{\nu} \dot{\varepsilon} \omega$ ($\sigma \tau \dot{\varepsilon} \dot{\rho} \dot{\varepsilon} \sigma \alpha \dot{\omega}$), had originally the ending $-\varepsilon \sigma \omega$ (cp. Skr. $tar \dot{\alpha} \dot{s} a - t \iota$ § 659 p. 195, $arcas - \bar{\varepsilon}$ § 656 p. 191), is not improbable; $\varkappa \alpha \lambda \dot{\varepsilon} (\sigma) \omega : \varkappa \dot{\alpha} \dot{\lambda} \dot{\varepsilon} \sigma \sigma \alpha = \tau \dot{\varphi} \dot{\varepsilon} (\sigma) \omega : \tau \dot{\varphi} \dot{\varepsilon} \sigma \sigma \alpha$. Compare § 842.

In Greek this -s- is not only found with ἐδειξα and like aorists, but elsewhere too it is a favourite tense suffix. Compare ἐ-σνεδά-σ-θην ἐ-σκέδα-σ-σα, κε-κέρα-σ-ται ἐ-κέρα-σ-σα, ὁμ-ώμο-σ-ται ὤμο-σ-σα, ξυ-σ-τό-ς ἐ-ξύ-σ-θην, εἴρυ-σ-ται ἔρυ-σ-τά-ς ἔρυ-σ-σα. No clear distinction can be made between "Primary" and "Denominative" verbs (cp. τε-τέλεσ-ται beside τέλος, αἰδεσ-τό-ς beside αἰδώς, ἐ-γελάσ-θην beside γέλως, ἐ-μεθύσ-θην beside Skr. mádhuš-), because s in these verbal stems is the same as s in the stems of the cognate nouns, as has already once been said (§ 655 pp. 189 f.).

§ 662. Italic Lat. $v\bar{\imath}s\bar{s}$ (perf $\imath\bar{\imath}s\bar{\imath}$), near kin to Goth. $ga\text{-}ve\imaths\bar{s}$ 'I look after some one, I visit', doubtless for * $\mu e \mu d + s\bar{s}$ (not * $\mu\bar{\imath}d+t\bar{v}$, Class XXIV, as Osthoff will have it, Morph. Unt. iv 77), op Skr. vi-vit-sa-ti § 667. $quaes\bar{v}$ (perf $quaes\bar{\imath}v\bar{\imath}$) for * $qua\bar{\imath}s\text{-}s\bar{o}$, beside $quaer\bar{-s}$. $ui\text{-}cess\bar{s}$ $ar\text{-}cess\bar{s}$ (perf. $-cess\bar{\imath}v\bar{\imath}$) from $c\bar{e}d\bar{-s}$ $cess\bar{\imath}$. $ac\text{-}cers\bar{s}$ for * $-cers\text{-}s\bar{o}$ doubtless connected with $curr\bar{s}$ for * $cors\bar{-s}$ $k_i s\bar{-s}$ ")

queror ques-tu-s) for qu-esv(-r) beside Gr κω-νύω 'I bewail, cry, shriek' Mid H G. hiuweln 'to howl, lament, cry' O.H.G. hūwila hiuwila 'owl'. Compare § 657 p. 192

- § 663 Keltic. No s-presents seem to occur The forms which Windisch (Wtb., p. 593 b) assign to a first person gessim 'I beg' are more probably conjunctive of the s-aorist of guidim (§ 826). On seiss 'placed itself, sat' and 'sits', see § 833.
- § 664. Germanic O.H.G. billu '1 bellow', Goth. at-pinsa 'I draw towards me' O.H.G. dinsu 'I pull, tear', O.H.G. friusu 'I freeze', see § 657 p. 191 Goth fra-liusa O.H.G. vir-liusu 'I lose' (vir-lius-t 'lose'), beside Goth. lū-n-s f. 'ransom' Gr. λύ-ω Lat. so-lvō etc O.Icel. hrys 'I shudder' inf. hryōsa, from V qrey- Skr krū-rá-s 'coarse, horrible, gruesome, bloody', cp. Gr. νου-σ-ταίνω 'I cause to freeze' Lat cru-s-ta and Osc. krustatar ('cruentetur' according to Bucheler). O.H.G. wīsu 'I avoid, eschew, shun' beside Lat. vītō, doubtless for *μeyt-sō (*μīt-sō), not for *μeit+tō (*μīt+tō) Class XXIV.

Goth. uf- $bl\bar{e}sa$ 'I inflate, blow out' O H.G $bl\bar{e}su$ 'I blow', beside O.H.G $bl\bar{e}u$ 1 e * $bhl\bar{e}$ - $2\bar{o}$, cp. Mid II G. bluo-s-t A.S. $bl\bar{o}$ -s-tma beside Germ * $bl\bar{o}$ - $2\bar{o}$ 'I bloom' and Lat $fl\bar{o}s$ $fl\bar{o}re\bar{o}$.

§ 665. Balto-Slavonic. Lith. $t \notin s-i u$ 'I lengthen' containing $t \notin s-u = Skr$. $t \notin s-u$ etc., see § 657 p. 191. Lith t res-i u 'I am in heat', said of bitches, derived from t r-es-e-t i = Skr. t r-a sa-t i 'trembles' etc., see § 657 p. 192;

¹⁾ If Germ *_russa- 'horse' (O Sax. O Icel hross) is connected with curro, it stands to ac-cerso as Skr nyk-šá-s 'comb, currycomb' to mrak-ša-ti.

add Slav. $treset\bar{u}$ 'shakes, shatters' with a nasal infix, unless it is really * $trem + s\bar{o}$ - (cp Lith. trumu Lat. $trem\bar{o}$), see § 636 p. 174.

The same s is sometimes found also with transformed and derivative verbs, and in nouns; as O.C Sl. q-cha-ti 'to smell' (cp. Lat. (h)ālō for *an-s-lo-, I § 208 pp. 175 f., § 588 Rem. 2 p. 444), ja-cha-ti 'vehi' (cp. ja-da 'vehor' § 701), Lith. bal-sa-s 'voice, sound, tone' (cp. § 657 p. 192), O.C.Sl. slu-chu 'hearing, faculty of hearing' (cp. § 659 p. 194), O C.Sl. gla-su 'sound, voice' (I § 585 p. 441).

Class XXI.

Root + -so- -sso-, with reduplication ending in $-\overline{i}$ (- \overline{u}) forming the Present Stem.

§ 666. This class is represented by the Aryan Desideratives, many of which have little or nothing of the desiderative in their meaning (e. g. Skr. $ik\bar{s}a-t\bar{e}$ 'sees' from $\nu \circ oq-$, from which a desiderative stem $\bar{\iota}c-ik\bar{s}-i\bar{s}a-1$ is made anew), and by an Irish future series. The Homeric future $\delta\iota\delta\omega-\sigma\omega$ and Attic conjunctive agrist and future $\delta\iota\delta\omega+\sigma\omega$ can hardly have a direct connexion with these formations.

Very rare indeed are non-thematic forms with reduplication, such as Skr. partic. mid. di- $dhi\bar{s}$ - $\bar{u}na$ -s beside di- $dhi\bar{s}a$ -ti from V $dh\bar{e}$ - 'set, lay'.

§ 667. Aryan. The Desiderative type is very prolific in Sanskrit.

 Skr di-d_Tk-ša-tē. \(\sigma\) ueid- 'sce, know' Skr. vi-vit-sa-ti, cp. Lat. vīsō \(\sigma\) 662 p. 197. \(\sigma\) meuq- 'loose, set free' Skr mi-muk-ša-ti, cp. mōk-ša-tē \(\sigma\) 659 p. 194 \(\sigma\) dhegh- 'burn' Skr. di-dhak-ša-ti. bādh- 'press' Skr. bī-bhat-sa-tē. \(\sigma\) dō- 'give' Skr. di-t-sa-ti di-dā-sa-nt- \(\sigma\) dhē- 'place, lay' Skr. dhi-t-sa-ti di-dhi-ša-ti. From gnē- gnō- 'noscere' \(\sigma\) gen- (\(\sigma\) 587 p 128) Skr. ji-yāā-su-te Avest. zī-šnāwhemna- (as regards -šn-see I \(\sigma\) 403 p. 298).

On the reduplication of Skr. thša-tē (unreduplicated O.Pers. patry-axšary 'l inspect'), tpsa-ti 'tries to reach' (unreduplicated apsa-nta), trtsa-ti 'wishes to advance or promote', see § 473 p. 17 Ved tyakša-ti 'wishes to honour' may be regarded as regular for 'yi-yahša-, since ii- doubtless became i- as iii- became ii- (I § 157 p 141); the forms yi-yakša-ti yi-yasa-ti are reformates following si-sankša-ti etc, just as beside the regular iir-āná-s we find the re-formate vur-ī-ta.1) The form in-akša-ti 'seeks to gain' is peculiar, cf. perf. ān-úṣ-a.

Roots beginning and ending in a consonant, and containing no i, ii, liquid, or masal, drop the initial consonant after the reduplicator if the root does not form a syllable by itself (cp. Lat discō for *di-tc-scō § 678). Skr šíkšatē 'learns' Avest. a-sixšant- 'not learning' for pr Ar *ši-šk-ša- beside Skr. šak-nō-ti 'is able'; for the loss of the sibilant cp. aor. vṛkši for *vṛšk-ši and the fut. vrakšyá-nt- for *vrask-šya-nt-(beside vṛšcá-ti 'tears to pieces' pra-vrask-a-s 'slice, cut' O.C.Sl. vraska 'wrinkle'). Similarly dípsa-ti dhīpsa-ti Avest. diwža-idyāi beside Skr dábh-a-ti 'injures', Skr. bhíkša-tē 'begs' beside Skr. bháj-a-ti, lípsa-tē līpsa-tē beside labh-a-tē 'seizes, grasps' and others of the same sort. Some of these forms are certainly irregular. Instead of Skr. pitsa-ti, for example (from pat- 'fly, fall') we should expect *pipsa-ti, to judge from Avest. nafšu for *naptsu (I § 471 p 348)

On the analogy of the forms here mentioned arose Skr.

¹⁾ The i- of i-yakša-ti is different from that of i-yája, see § 851.

hisa-ti 'injures, hurts' from han- (ghen-), whose 3^{rd} pl hisanti caused the coming of a sing hinás-ti following Class XV (the 3^{rd} sing his-tē is perhaps like didhis-āna-s § 660), and further perf. n-his-a etc.

Instead of -sa- after roots with final consonant, the Sanskrit has often -iša- (-əso-) V qel- 'to move' cr-cariša-ti (beside crcarṣ̃a-ti) V gen- 'gignere' yi-janišu-tē V meld- 'crush' mr-mardiša-ti vr-vrdiša-ti beside rivitsa-ti (see above) bi-bādhiša-tē beside bī-bhatša-tē (see above)

The productive power of this desiderative type in Sanskrit is especially clear in forms like ti-tarpayiša-ti pi-pāyayiša-ti from the causals $tarp\acute{a}ya-ti$ (from $trp-n\acute{o}-ti$ 'satisfies itself') $p\bar{a}-y\acute{a}ya-ti$ (from $p\bar{a}-ti$ 'drinks').

The desiderative formation was itself often the foundation for a comprehensive verb structure; thus from bhikša-tē were formed perf. bi-bhikšē fut. bhikš-išya-tē caus. bhikš-aya-ti, and from mī-mā-sa-tē were formed aor. á-mīmās-išţa pass mīmās-yá-tē.

§ 668. Keltic O.Ir. nō-gigius 'I will pray or ask' for *gi-get-sō beside gess- from -guidiu, § 663 p 197. fo-lilus-[s]a from fo-long- 'bear, endure'. Compare Zimmer, Kuhn's Zeitschr. xxx 128

F. CLASSES XXII AND XXIII.

PRESENT STEMS WITH -sko-

§ 669. The -s- of -sko- I regard as the same element which we have discussed under Classes XIX—XXI, and -s-ko- I believe to be an extension like -s-io-. Compare *meik-sk- Lat. misceō and *meik-s- Skr. mēkšaya-tı perf. mi-mikšé from \(\sigma \text{meik} \) - 'mix', Lat. dis-pescō for *-perc-scō and Skr. pyk-š- (see Grassmann, Wtb., s. v.); Gr. δι-δά(κ)-σκω 'I teach' and Avest. dax-ša-t 'he taught'; Skr. y-chá-ti reaches, hits, attains', and y-šá-ti ár-ša-ti 'moves quickly'

Avest yā-sa-iti 'goes, goes on' and O C Sl. 1a-cha-ti 'vehi'; Mid.II & lū-sche 'I lurk, watch for' (O II G. *hlū-skē-n)1) and O.H.G lū-s-trē-n 'I listen, obey' hlo-sē-n 'I attend, listen to' Skr. śró-ša-ti śú-śrū-ša-tē from Vhley- 'hear', Armen ba-cı 'I opened' Gr φά-σ·ω 'I make known, say' and Skr. bhása-tı, Gr. γυιώ-σκιω γι-γυιώ-σκιω Lat (q)nō-scō and Lat. qnō-ri-tur 'cognitum sive compertum est' (Stolz, Lat. Gr. 2 p. 375) Skr. jiina-sa-te from ane- ano- 'learn', and others In view of these, we may derive Lat mix-tu-s mis-tu-s beside misceo, dis-pes--tu-s beside dis-pesco, pos-tulo Osc. pes-tlu-m 'templum' beside poscō poposcī and doubtless Skr prš-tá-s práš-tum beside prchá-ti papracha from stems with no other extending suffix but -s-, *megh-s- and so forth, and we need not regard Avest. ter sa-iti 'is afraid' Lith triszu 'I tremble, shudder' as being *tr-s + sko- (cp. Skr. tr-ása-ti etc., § 657 p. 192), but must regard it as *tr-s-ko- The compound suffix -esko- in O.Pers. a-r-asa-m 'I came, arrived at beside Skr 2-chá-ti, in Avest iš-asa-iti 'wishes' beside Skr. ichá-ti, in Gr ἀρίσκο 'I please' φεύγεσιο-ν 'I fled' corresponds to -eso- in Skr tr-ása-ti tar-ása-ti and others (§ 655 p. 189, § 657 p. 192, § 659 p. 195)

-h- or -kh- (see below), without -s- preceding, seems often to occur in Greek words. The parallel diminutive suffixes Boeot. -ιχο-ς and Att. -ισκο-ς, and a comparison of $\pi\tau\omega$ -ξ $\pi\tau\omega$ -ν-ός, $\pi\tau\omega$ -χό-ς ($\pi\tau\omega$ όσω), with $\pi\tau\omega$ -σκ-άζω²), and of γλί-χο-ιωι 'I stick, adhere' with γλί-σχ-ρο-ς, justifies our assuming -kho- to be the suffix of γλί-χο-ιωι, of νή-χω 'I swim', of $\sigma\mu$ ή-χω 'I rub, stroke, wipe off', and $\sigma\mu$ ώ-χω 'I rub or grind to powder', for ψ ή-χω 'I stroke, curry' and ψ ώ-χω 'I grind to powder', for τ ού-χω 'I rub away, wear out', and for σ τεν-άχω 'I groan' (cp. π ελάθω and such like words, § 694) In the

Connected, as it would seem, with Armen lsem 'I hear' for *klu-sko-. See Hubschmann, Arm. Stud i 33, Bartholomae, Stud. Idg. Spr., ii 41

Compare Bugge, Kuhn's Zeitschr XXXII 39 f, on Armen. tak-nu-m
 iI hide myself', which is in any case a cognate word.

parallel group come verbs in -σσω such as πτή-σσω εγρή-σσω ἀνειρώ-σσω; see § 763 Rem.

It appears that -sko- and -skho- were used as variants in the parent language. Sanskrit has only -skho- (unless perhaps -sko- is the suffix of \imath_f \$\sigma_c\delta_{-ti}\$ 'tears to pieces'), but both of them seen to occur in Armenian and Greek. Armenian has -sko- in lsem 'I hear' (see p. 201 footnote). -skho- in harcanem; Greek has -sko- in β \delta'-\sigma_\epsilon\$, and -skho- perhaps in π \delta \sigma_\epsilon\$ (see § 673), γ \lambda'\sigma_\epsilon_\epsilon\$ (cp. γ \lambda'-\sigma_\epsilon_\epsilon\$ and -skho- perhaps in π \delta \sigma_\epsilon\$ (see § 673), γ \lambda'\sigma_\epsilon_\epsilon\$ (cp. γ \lambda'-\sigma_\epsilon_\epsilon\$ (appears that -skho- perhaps in \sigma_\delta \sigma_\epsilon\$).

The k-sound was sometimes palatal and sometimes velar in the original language. -sh(h)o- is pointed to by Avest teresa-iti, Lith triszu, Armen lsem harcanem; and -sq(h)o- by Skr.
mūrkhá-s (beside mūrcha-ti) Avest. pereska (beside peresa-iti, cp Bartholomae, Stud. idg. Spr. ii 49 f), Armen. aλačem,
Lith. jėszhó-ti OCSl. iska-ti, Lith treszkù OC.Sl. trěsků troska; cp. Lith. tilska 'it lightens' beside Skr. tvíš- 'beam,
light' Avest. pwis-ra- 'sparkling'. The variation of guttural in
-ko- and -qo- has already been touched upon in our discussion
of Noun Morphology, II § 90 pp. 274 f. Compare however
vol. I § 414 pp. 303 f, § 587 Rem 2 p. 442, and Bartholomae,
op. cit. 48 f.

On the difficult question of the original shape of the sh-suffix we have a new paper by Zubatý, in Kuhn's Zeitschr., xxx 9 ff.

Class XXII.

Root + -sko- -esho- forming the Present Stem.

§ 670. Pr. Idg. In the following sections, I write the original forms always with -sko-, without distinguishing the variants -sko- -sqo- -skho- -sqho- (see § 669).

Roots that are capable of vowel gradation generally have the weak grade before -sho-.

√ ter- 'move to and fro, tremble' (§ 657 p. 192). *tr-ske-ti: Avest. ter'sa-iti O.Pers. tarsa-tiy 'is frightened', Lith. triszu

'I tremble, shudder', cp. § 669 p. 201. \sqrt{gem} - 'go' *gm-she-ti: Skr. gácha-ti, Gr. imper. βάσκε. \sqrt{preh} - 'precari' *prk-ske-ti: Skr. prchá-ti, Armen. aor. harci, Lat. poscō for *porc-scō, cp. O.H.G. forsca 'question'. \sqrt{ay} - 'desire, wish': Skr. ichá-ti, Umbr. eiscurent 'poposcerint, arcessierint', O.C.Sl. iską 'I seek, try', cp. Skr. ichá 'a desire, wish' Armen. aic 'attempt' O.H.G. eisca 'a demand, request' Lith. jeszhó-ti 'seek, try' \sqrt{es} - 'bc' Gr. έσκε 'was', O.Lat. escō. \sqrt{bha} - 'show, make appear' (p. 56 footnote): Armen. ba-ci 'I opened', Gr. qa-σκω 'I make known, say, affirm'

From * $gn-\bar{e}-gn-\bar{e}$ 'noscere' \sqrt{gen} (§ 587 p. 128): O.Pers. $x\bar{s}n\bar{a}-s\bar{a}-tiy$ conj. 'noscat' (I § 403 p. 298), Gr. Epir. $\gamma\nu\iota\iota\iota'\sigma\nu\omega$ (cp. Att. $\gamma\iota-\gamma\nu\iota\iota'\sigma\nu\omega$), Lat. $gn\bar{o}sc\bar{o}$ $n\bar{o}sc\bar{o}$.

Of -esko- there no example in more than one language.

Aryan Skr. 2-chá-ti ar-cha-ti hits, reaches, § 671. injures' (pluperf ānarcha-t § 854) Ver- Avest. tere-sa-iti O.Pers. tarsa-tiy 'is afraid': Lith triszu, see § 670 mūrcha-ti 'congeals, stiffens' (perf. mumūrcha etc), beside partic. mūrtá-s Skr hūr-cha-ti 'slides, glides, falls' (caus. hūrchaya-ti), probably from hvar- 'lead astray, disturb' (2nd sing mid. n-hūr-thās). Skr. gá-cha-ti Avest jasa-iti (j- instead of g-, see I § 451 Rem p. 334). Gr. βά-σ/ε, V gem- 'go', see § 670; Skr. yá-cha-ti beside yam-a-ti 'holds, directs', Avest. yasaiti 1) and yāsaitē (the latter for *[m]-); as regards the change of accent in gácha-ti yácha-ti (instead of *gachá-ti *yachá-ti) see I § 672 p. 537, IV § 516 p. 82. Skr vāncha-ti 'wishes' (pass. vānch-ya-tē etc), which should regularly be *vā-cha-ti, ground-form *uw-ske-ti (cp. desid. vi-va-sa-ti),2) V uen- Skr. vána-ti, ep. O.H.G. wun-sc m. 'wish' (II § 90 p. 276). Skr. yú-cha-ti 'keeps afar, wards off' (with irregular accent, which should be

¹⁾ Connected perhaps with O.Pers 3^{rd} sing. mid. $ayasat\bar{a}$, see Bartholomae, Bezz. Beitr. xiv 246 f.

²⁾ The same analogical intrusive nasal in \jmath_1 -gh \bar{q} -sa-ti, see § 667 p. 198.

compared with that of girami beside girami, and its like, § 516 p. 82) beside yu-yō-ti. Avest šu-sa-iti šū-sa-iti goes, hastens, rushes' ground-form *qıŭ-she-tı beside Skr. cyáv-a-tē (cp. I § 448 p. 333, § 473 4 p. 350). Skr. prchá-ti (perf papracha and so forth) Avest. peresanti 'asks' O Pers imper parsā. Lat poscō, see § 670. Avest neref-sa-uti 'wanes, decreases' (of the moon). Skr. 1chá-ti Avest 1saiti 'desires, wishes', Vais-, see § 670. Skr uchá-ti Avest. usaiti 'shines, flashes up' from Ar. uas-'shine', op Lith aŭszo 'it dawned' where $sz = s\hat{h}$ Avest. xwafsa--iti; \sqrt{suep} - sup- 'sleep'; tafsa-iti \sqrt{tep} - 'to warm', cp. Lat. tepēsco, for the fs in these two present stems cp. Bartholomae, Bezz. Beitr. XIII 74 f. Avest yāsa-iti 'goes, begins' beside Skr. yá-ti O.Pers. xšnāsā-try conj 'noscat'. Gr. γνώ-σνω etc., see § 670. Avest. xwīsaiti 'sweats' for "xuītsa- (I § 473 2 p 349) from $\sqrt{sye_2d}$ - may be one of the same class of forms, or it may contain -so- like vax-ša-iti, § 659, p. 194.

-esko- (§ 669 pp. 200 f.) only in Iranian. O.Pers. a-r-asa-m I came, reached conj. ni-rasātiy beside Skr. τ -chá-ti \sqrt{er} -. Avest. iš-asa-iti 'wishes' beside isa-iti Skr. ichá-ti $\sqrt{a_1s}$ -; cp. acc. išas:-m 'a wish' Avest $h\bar{\iota}$ s-asa-iti 'has authority over, arranges, understands', \sqrt{ar} . sa_1 s-.

§ 672. Armenian. Here it seems that Idg. *-shh(o)- has become -c-, -sh(o)- has become -s-, and -sq(o)- or -sqh(o)- has become -c- (cp. § 669 p. 201).

(1.) -c- in a orist and present both harci 'I asked' pres. harcane-m (§ 620 p. 157) · Skr. prchi-ti etc, see § 670 p. 203; it seems to me questionable whether Bugge is right in connecting anci 'I went' (pres ancane-m) with Skr gácha-ti (Kuhn's Zeitschr xxxii 33) Again, compounded aorists with -c-, or -ac- -eac-. ba-ci 'I opened' (pers. ba-na-m § 601 p. 144): Gr. φ á- σ ioi, see § 670 p 203. mna-ci 'remained, awaited' (pres. mna-m § 581 p. 122), stem' mnā- from \vee men-: cp. Gr μ i- μ v η - σ ioi. l-ci 'I filled' 3^{rd} sing. e-l-c (pres. l-ni-m § 642 p. 180), stem l-= * $pl\bar{e}$ - from \sqrt{pel} -. ke-ci 'I lived' (pres. kea-m § 581 p. 122) from ν gel-: similarly Gr. ava- $-\beta$ uó σ io μ a 'I revive'. The aorist in -aci, as gtaci 'I knew'

(pres. gitem), and -eci (3rd sing. -ear), as lizeci 'I licked' (pres. lizem) seem to be of the same character as Lat. verbs in -āscō -ēscō -īscō and Greek in -αστω -εστω.

But it must be admitted that an explanation is to seek why this present suffix came to be used with the acrist, and as an acrist suffix became productive. Something of the same sort happened in Greek with the to-suffix; for harci: harcane- $m = \dot{\epsilon} - \beta \lambda \alpha \sigma - \tau o - \nu$. $\beta \lambda \alpha \sigma \tau - \dot{\alpha} \nu \omega$, see § 682. It would follow that first harci as compared with harcanem got the acrist use; and afterwards baçi and others like it were used in the same way. But the problem must remain unsolved so long as the history of the Idg. s-acrist in Armenian has not been traced.

- (2). lsem 'I hear' doubtless for *klu-sko- cp. Mid.H.G. lüsche 'I lurk, listen, play eavesdropper', § 669 p. 201.
- (3) -ç- for -sq- or -sqh- in present stems with -ace-m, as aλacem 'I beg, pray', and in other compound suffixes (Hubschmann, Arm. Stud. 1 94).

§ 673. Greek. $\beta \acute{\alpha}$ - $\sigma \kappa \varepsilon$ $\beta \acute{\alpha}$ - $\sigma \kappa \varepsilon$ 'go thou, go ye': Skr. $g \acute{\alpha}$ -cha-ti, \sqrt{gem} -, see § 670 p. 203. $\pi \varrho o$ - $\beta \lambda \acute{\omega} \sigma \kappa \omega$ 'I come forth' for * m_{ℓ}^{\dagger} - $sk\bar{o}$. $\acute{\alpha} \nu \alpha$ - $\beta \varrho \acute{\omega} \sigma \kappa \omega \nu$ ' $\kappa \alpha \tau \varepsilon \sigma \vartheta i \omega \nu$ (Hesych) for * $g \bar{g}$ - $sk\bar{o}$ (cp $\beta \iota \beta \varrho \acute{\omega} \sigma \iota \omega$ § 678), $\vartheta \varrho \acute{\omega}$ - $\sigma \kappa \omega$ 'I leap' for pr. Gr. * $th \bar{g}$ - $sk\bar{o}$; cp. Skr. $h \bar{u} r cha$ -ti $m \bar{u} r cha$ -ti § 671 p. 203. $\lambda \acute{\alpha} \sigma \iota \omega$ 'I make a sound, cry out' for * $\lambda \alpha \kappa$ - $\sigma \nu \omega$, beside $\acute{\varepsilon}$ - $\lambda \alpha \kappa$ - $\sigma \nu \omega$ 'I make like, consider like' for * $f \iota \kappa$ - $\sigma \kappa \omega$, also redupl. $\acute{\varepsilon}$ - $\acute{\iota} \sigma \kappa \omega$ § 678, beside $\acute{\varepsilon} \circ \iota \kappa \alpha$, $\sqrt{u} e i k$ -. $u \iota \sigma \gamma \omega$ 'I mix' instead of * $u \iota \sigma \kappa \omega$ for * $u \iota \kappa \omega$ - $u \iota \omega$ -

φά-σκω 'I make known, assert, say': Armen. ba-ci, \sqrt{bha} , see § 670 p. 203. χά-σκω 'I gape, yawn', beside $\tilde{ε}-χαν-ο-ν$ χή-μη, see § 611 p. 150. βό-σκω 'I feed, pasture' beside βω-τωρ.

Epir γν-ώ-σνω (Att γι-γνώ-σνω) 'I get to know, learn': O.Pers. $x \sin \bar{a} - s \bar{n} - t i y$ etc., see § 670 p. 203. ἡή-σκο-μωι 'I say' stem $y r \bar{e}$ -, $\sqrt{y} e r$ -. $\theta \varrho$ -ή-σκω νοῶ, $\theta \varrho$ ά-σκειν ἀναμιμνήσκειν Hesych., cp. Curtius Gr Etym ⁵ 257. In $\theta v \eta$ -σνω Dor. $\theta v \varrho$ -σκω 'I die' there is doubtless not really an \bar{a} -suffix, as it may come from $\nu g h e n$ - by way of $\theta v \varrho$ -σκω (Osthoff, op. cit. 366 f.).

Att. θρώσεω, θρήσεω Aeol θναίσεω Ion. χοηίσεομαι have altered slightly in form by analogy of -ισεω (εύρ-ίσεω etc.), from which they get ι; the same may be said of Att μιμνήσεω Aeol. μιαναίσεω (§ 678).

αρέστω 'I please' νορέστω 'I satisfy'. γηράστω 'I grow old'. γενειάστω 'I grow a beard'. μεθύστω 'I make drunk'.

Ionic iterative preterite φεύγεσκον from φεύγω 'I flee', ξοίζεσκον from ξοίζω 'I strive', βοσεσσόμην from βοσκω 'I pasture', εἴπεσκον from εἶπον 'I said', αὐδήσασκον beside αὔδησα 'I spoke, said', φάνεσκον beside ἐφάνην 'I appeared'. As a possible course of the developement I suggest the following. The first step was, on the analogy of φη-μὶ. φά-σκω φά-σκον to form τσιαστον from τστημι; again ἤοεσα: ἀρέσνω ἄρεσκον produced ναλεσκόμην beside ἐκάλεσα, and γενειάζω. γενειάσκω γενείασκον gave rise to ἐξπταστον from ἑῖπτάζω, and so forth. Each of these has its direct analogue; the next step was to form similar iterative preterites from stems which offered no such analogue among forms with -σκο-.

The origin of -iono in forms like $\varepsilon v \varrho i \sigma r \omega$ 'I find' $a \lambda i \sigma z o \mu \omega$ 'I am caught' is not quite clear, compare the reduplicated $a \varrho - a \varrho - i \sigma r \omega$ 'I join'. I now offer a new conjecture, and give up that which was suggested in vol. II § 90 p. 275. My present view is that ι is the same in this suffix as in $\partial \varrho i - \nu r \omega$ $\partial \varrho i v \omega$ $\partial \varphi i v \omega$ (§§ 650, 652 p. 186), that is to say, it is the "root determinative" -i-. Then we analyse $\partial \varrho a \varrho i \sigma r \omega$ as $\partial \varrho - a \varrho i - \sigma r \omega$, and connect it directly with $\partial \varrho - \partial \mu i - g v \gamma - \varrho - \tau \sigma - g \omega$ O.H.G. $r - \overline{\imath} - m$ 'row, series, number'. See further in § 841, on $\partial i \sigma \partial \omega$ 'I breathe', for * $\partial r - v - \sigma - \partial \omega$, and others of the same kind.

§ 674. Italic. Lat hi-scō (beside hiā-scō), beside hi-ā-re O.H.G. $gi-n\bar{o}-m$ O Icel. $g\bar{\iota}-n$ (§ 605 p 146, § 608 p. 147). glī-scō, beside Skr jráy-a-ti (I § 402 p 297). scī-scō, beside sciō. nāscor for *gnā-scō(r), ground-form * $\hat{g}\bar{v}$ -scō, $\sqrt{\hat{g}}$ en-(I § 253 p. 206). poscō for *porc-scō Skr prchá-ti etc., see § 670 p 203. com-pesco dis-pesco for *perc-sco or *parc-sco, Osc com-parascuster 'consultus erit' beside O Lat. comperce 'compesce' (Paul. D) Osc. kú]m-parakineis 'consilu' or 'convocatae contions', doubtless connected with Skr purc- 'mix, blend, unite, give in fullness' (sam-parc- 'communicare quid cum quo').1) misceō is doubtless derived from *miscō (§ 802) Gr. µloyw, see § 673 p. 205. Umbr escurent 'poposcerint, arcessierint': Skr. ichá-ti etc., see § 670 p 203. vescor for *vē-ēscōr i. e. ēd+scō(r), √ed-, cp. vēscu-s and ēsca (II § 90 pp. 275 f., G. Meyer in the Lit. Centralbl. 1890, col. 1513). pō-scō 'I drink' Cic Verr. II 1.66 (Stowasser, Wiener Stud. XII 326 f.), cp. $p\bar{o}$ -sca. $p\bar{a}$ -sc \bar{o} , perf $p\bar{a}$ - $v\bar{\iota}$.

In pos-tulāre Osc. pes-tlúm 'templum' Umbr. pes-klum 'supplicationem, sacrum' (-klo- for -tlo-, I § 367 p 278),2) dis-pes-tu-s, mix-tu-s mis-tu-s, and pās-tu-s, the group -st- need not be derived from -sk-t-. Compare O.H.G. lū-s-trē-n as compared with Mid II.G. lū-sche etc., § 669 p. 201. This guides us in our view of Umbr. persnimu imper. 'supplicato', derived from an abstract *persni- (§ 777) made with the suffix -m- (II § 95 p. 286)

gn- $\bar{s}c\bar{o}$ $n\bar{o}$ - $sc\bar{o}$, pf. $(g)n\bar{o}$ - $v\bar{\imath}$: O.Pers. $x\bar{s}n\bar{a}$ - $s\bar{a}$ -tiy etc., see § 670 p. 203. cr- \bar{e} - $sc\bar{o}$, pf. $cr\bar{e}$ - $v\bar{\imath}$. qui- \bar{e} - $sc\bar{o}$, pf. $qui\bar{e}$ - $v\bar{\imath}$, cp. Avest. $\bar{s}y\bar{e}$ -iti- \bar{s} O.Pers $\bar{s}iy\bar{a}$ -ti- \bar{s} II § 100 p 297. vi- \bar{e} - $sc\bar{o}$, part. $vi\bar{e}$ -tu-s, cp. Skr. $jy\bar{a}$ - $n\hat{\imath}$ - \bar{s} 'frailty, frailness, weakness of old age' (not so Per Persson, Stud. Lehr. Wurzelerw., 79).

¹⁾ $dis\text{-}pesc\bar{v}$ was merely coined to express the opposite of $com\text{-}pesc\bar{v}$, as $dis\text{-}jung\bar{v}$ as the opposite of $con\text{-}jung\bar{v}$ Compare the Author, Idg. Forsch i 175. — Is Osc. parak- for prak- prak- prak- or for prak- prak-? See a new treatment by Buck, Der Vocalismus der osk. Spr., 140

²⁾ Umbr.-Osc. perk- is a contamination of pork- and prek- (Lat. po(r)sco and precars)

rub-ē-scō beside rub-ē-s O.C.Sl. $r\bar{u}d$ -ė-ti, con-tic-ē-scō beside tac-ē-s O II \oplus dag-ē-s, and others, see § 590 p. 132. hi-ā-scō beside hi-ā-s hi-ā-ti-s Lith. $\check{z}i$ - δ - $\jmath u$ 'I open my mouth', cp. $h\bar{\imath}$ -scō above.

A large number of new forms, the Inchoative or Inceptive Verbs, were produced by the analogy of scī-scō: sciō, rubē-scō: rubeo, hiā-sco · hio and sımılar parallel stems from one root. Examples of these are obdormīscō from dormiō, flāvēscō from flaveo, amasco from amo. By degrees the endings -īsco -ēsco -āscō grew quite independent of the character of the stem to which they were affixed, and we get such forms as conticisco The inceptive meaning was probably not due to anything in the suffix -sco-, but arose from the fact that certain verbs which had it, crēsco ad-olēsco to wit, of necessity implied an inceptive meaning. These verbs suggested a distinction, which was carried on into others, and the inceptive type arose; hence caelum rubēscit was distinguished from caelum rubet, and so forth. In late Latin these verbs had a causal meaning, e.g. innotēscō 'I become known', later 'I make known' On this see Sittl, Arch. Lat. Lexicogr., 1 516 ff.

Remark. It is very doubtful whether the Italic branch had forms with Idg. $-esh\bar{o}$ or forms like Gr $e\bar{v}\varrho i\sigma\kappa\omega$ See Sittl, op. cit., pp. 490 ff, Osthoff, Perf 157, 257 f.

§ 675. Keltic. Only a few present stems have -sko-. O.lr. nascim 'I bind' perf. ro nenasc-sa, beside nasc 'ring' O.H.G. nuscia 'clasp, buckle, brooch', \(\sigma nedh-\), ground-form *\(pdh+sko-\) (see Osthoff, M. U. v p. vi). faiscim (which has adopted zo-flexion) Mod.Cymr. gwasgaf 'I press, squeeze', possibly akin to Skr. vāh-a-tē 'presses, squeezes'. With ā-flexion con-mescatur 'miscentur' (inf. do mescad), beside Gr. μίσγω \(\sigma meil\(\hat{k}-\), § 673 p. 205.

§ 676. Germanic. Only a few present stems have -sko-. O.H.G. ir-lisku 'I am extinguished', originally probably 'I lay

myself down', ground-form "legh+sko, beside Goth. ligu 'I lie'.') Mid.H.G. krische 'I shriek' pr. Germ. *hrīt-skō, beside Mid.H.G. krīze 'I shriek'. O.H.G. wascu 'I wash' probably pr. Germ. *uat-skō, beside Skr. unád-mi 'I wet' Goth. vatō O Ir usce 'water'. Less certain is Goth. priska OHG. driscu 'I thresh, thrash', which is compared sometimes with Lith. treszkù 'I crackle, crack, crash' O.C.Sl. trěshŭ 'noise, crash' troska 'thunder-clap', and sometimes with Gr. τρέβω 'I rub' (Idg. *trzgō according to Thurneysen, Kuhn's Zeitschr. xxx 352). If we connect priska with Lat. tero (Benfey, Gr. Wurzel-lex., u 263), it might be derived from *tr-esko and compared with O.Pers a-r-asa-m Gr. ἀρ-έ-σκω etc. (§ 669 p. 201). Lastly, it seems we must place here Goth. ga-vrisqa 'I bear fruit, τελεσφορώ, which Diefenbach connects with AS. wrīdan to grow' and Skr. vardh- 'to grow' (Vergl. Worterb. der Got. Spr., I 241).

Many present stems with -sko- have weak inflexion, and apparently were derived from sko-nouns OH.G. wunsc(i)u I wish' from wunsc 'a wish' Skr. vāūcha-ti, see § 671 p. 203. OH.G zusc(i)u Mid.II G. zusche 'exuro, oburo', beside Skr. du-nō-ti 'burns'. Mid II.G. lūsche 'I lurk, play eavesdropper' beside O.H.G' lū-s-trē-n' I listen, obey', \(\sigma \tilde{k}leu\)- 'hear' (cp § 669 p. 201). O.H.G. forscō-n' I ask' beside forsca 'enquiry, question': Skr. prchá-ti etc., see § 670 p. 203. O.H.G. eiscō-n' I ask, demand' beside eisca 'request, demand'. Skr. ichá-ti etc., see § 670 p. 203. Mid.II G. rūsche 'I rush, roar', beside A.S hrūte 'I rush, roar, snore'. Mod H.G. haschen 'to snatch' = Goth. *haf-skōn from haf- 'capere'. Very uncertain is the comparison of Goth. and-hruska 'I investigate, attempt, essay' 3rd sing -hruskái-p with Lat. scrūtārī; see I § 527 p. 383, and Fick, Bezz. Beitr vii 95 (Thurneysen, Kuhn's Zeitschr xxx 352 f.).

§ 677. Balto-Slavonic. Here too this class of present stems has quite fallen into the background. We find sometimes

¹⁾ According to Osthoff (Wiener Stud. x 174) for *les-skō, akin to Mid.H.G. er-leswen 'to grow weak'.

Lith. -s2- O.C.Sl. -s- = Idg. -sk-, and sometimes Lith. -sk-(-s2k-) O C.Sl -sk- = Idg. -q-, see § 669 pp. 201 f.

Lith. tilska 'flickers, lightens', cp. Avest. pwisra- 'gleaming, shining'. Lith treszkù 'I crackle', cp. § 676. O C.Sl. iską 'I try': Skr. ichá-ti etc. see § 670 p 203, cp. Lith. jeszkaŭ 'I try' inf. jeszkó-ti (like O.H.G. ciscōn) and O C.Sl. ištą 'I try' for *īsk-ją (I § 147 pp. 133 f.).

In addition, compare Lith añszo 'it dawned' (pres. añsz-ta), beside Skr. uchá-ti, § 671 p. 204; gaiszañ 'I loitered, tarried' (pres. gaisz-tù), beside Lat haereō, driskañ 'I am torn in pieces' possibly from the \sqrt{der} - whence nu-dirta-s 'flayed' Gr. δέρω.

It is impossible to decide whether the sibilant in Lith. su-miszaū 'I meddled, mixed myself with, got into confusion' (pres. su-misztù), maiszý-ti O.C.Sl. měsi-ti 'to mix') from \sqrt{meik} -) represents Idg. -k- or -k-s- (cp. Skr. $m\bar{e}k$ šaya-ti) or -k-sk- (cp. Lat. misce \bar{o} etc.)

Class XXIII

Reduplicated Root + -sho- forming the Present Stem.

§ 678. This type is demonstrable only in Greek and Italic Gr. διδάσκω Ί teach' for *δι-δακ-σχω cp. perf. δε-δίδαχ-α δε-δίδαχ'-μαι, Lat. discō for *di-tc-scō cp perf. didic-ī, cp. Avest. dax-ša-t 'I taught' § 669 p 201. In discō the root syllable is treated exactly as it is in Sanskrit desideratives of the type šίλδαtē, sec § 667 p 199. For the α of διδάσκω cp. Bartholomac, Bezz. Beitr. xvii 121.

Lat. discō is isolated in Italic; but Greek gives a number of reduplicated forms besides διδάστω.

With *i* as the reduplicating vowel 'τι-τύσκομαι 'I make, prepare' (τε-τύσκετο Hesych.) for *τι-τυλ-στο-, beside τύκ-ο-ς 'hammer, pick' Skr. tôk-man-'shoot, sprout'. βι-βρώ-στω 'I eat, swallow', cp βρώ-σπω for *ḡ-scō § 673 p. 205. γι-γνώ-σπω 'nosco', cp. Εpir. γνώ-σπω § 673 p. 206. μι-μνή-σπω 'I remind,

mention' beside Armen. mna-ci § 672 p. 204. δι-δρά-σκω Ion. δι-δρή-σκω 'I run'. On the iota of Att. μιμνήσνω Aeol. μιμναίσνω see § 673 p. 206.

Reduplicated with ϵ : $\tau \epsilon - \tau i \sigma r \epsilon \tau o$ beside $\tau i - \tau i \sigma r o \mu a \iota$, see above. $\epsilon - l \sigma \kappa \omega$ 'I make like' for * $F \epsilon - F \iota(r) - \sigma \kappa \omega$ beside $l \sigma \kappa \omega$ § 673 p. 205. $\delta \epsilon - \delta l - \sigma r o \mu a \iota$ 'I fear, am terrified' from $\sqrt{d \mu e i - \ell}$ (cp. Osthoff, Perf. 388 ff).

αο-αο-ίστω 'I join', like εύο-ίστω § 673 p. 206.

G. CLASS XXIV.

ROOT + -to- (-t-) FORMING THE PRESENT STEM.

§ 679. The suffix -to- in verbs is often just as clearly the same as the noun suffix (II §§ 79 ff. pp. 218 ff.) as we found to be the case with -no-, -so-, and -sko-. Compare Gr. $\ddot{\varepsilon}$ - $\beta\lambda\alpha\sigma$ - τ 0- ν with $\beta\lambda\alpha\sigma$ - τ 0- ζ 0 $\beta\lambda\alpha\sigma$ - τ 7

Non-thematic forms are very rare, and only Aryan, so that I cannot set apart a class for this group alone. Skr dyu-t-āná-s beside dyō-ta-tē 'shines', á-cē-t-ı ci-t-āna-s beside cē-ta-tr 'takes notice of, observes', yá-t-āna-s ya-t-āná-s beside yá-ta-te 'joins itself, strives'. Compare the nouns dyá-t- ci-t-ya-t-, which belong to the same kind as ri-t- hrú-t- II § 123 p. 391; the connexion of the noun suffixes -t- and -to- is obvious.

-to- is confined to the present stem only in Greek, Italic, and Baltic, and there not always.

§ 680. Pr. Idg 1) *sp(h)\(\bar{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde{t}\tilde

¹⁾ In Per Persson's work on Wurzelerweiterung, pp. 28 ff., the determinative t is assumed for many instances not here given; amongst others, for those in which we have held that t is part of the root proper e g. Skr λαντα-τι 'cuts' Lith. ker từ 'I hew, cut', which are derived from the root of Gr *είρω, and Skr vártα-τē 'vertitur' Lat. vertō, which are derived from the root of Lat. ver-mi-s.

Mid.H.G. spelte 'lance splinter'). From V qei- (Skr. ci-nô-ti 'ranges side by side, puts in layers, directs one's notice towards') · Skr. ce-ta-ti 'takes note of, observes', O.C.Sl. ci-te-tu 'counts, reads, honours', cp Skr. ci-t-una-s § 679. Lat. plec-to 'I twist, twine' beside plico, O.H.G. flih-tu 'I twist' (cp. Goth. flah-ta 'a braid, twist'), cp. Gr. πλεκ-τό-ς 'woven, twisted' πλεκ-τή 'rope, net'; the stem plek- which runs through these is itself an extension of a \(\nu pa^*l\)-, see below. From \(\nu pe\hat{k}\)-(Gr. πέν-ω 'I comb' Lith pesz-ù 'I pluck off, tear off, pull out'): Gr. πέκτω (and πεντέω § 801) 'I comb, shear, pluck, pull', Lat. pec-tō 'I comb, hackle, hack the ground with a mattock', O.H.G. fih-tu 'I fight, do battle' (fehta 'a fight').1) O.H.G. bristu O.Icel brest 'I break, tear, burst' is very nearly akin to the O.Ir. weak verb brissim 'I break' (-ss- for -st-, I § 516 p. 376), and both must be connected either with Gr. $\pi i \rho \vartheta \omega$ or with Goth. brika (cp. Stokes, Mém. Soc. Ling., v 419 ff., Per Persson, Wurzelerweiterung 19, 38, and 45); whether brissim originally belonged to the first conjugation and then passed into the third, or whether it was originally denominative, is a doubtful point.

In a few words, -e- is interposed between the root and -to-; ep Gr. -σχ-ε-το-ς έρπ-ε-το-ν Skr darś-α-tά-s and the like, II § 79 p. 199; further, Gr. ά(f)-ε-τ-μα ở(f)-ε-τ-μό-ν from *μ-ē- *μ-ō- 'blow'. *m-e-tō (beside Gr ἀμάω 'I mow, gather' ἄν-τλο-ν 'bilge-water', O.H G. mā-t 'math, mowing', Skr. άm-α-tra-m 'vessel, jug'): Lat. metō (messuō messum), O.C.Sl. mete-tū 'turns, verrit' (inf. mesti, sū-metī 'dung, manure, ordure'), ep. Mod.Cymr. Mod.Bret. medī 'to reap' Mid.Ir. methel 'a party of reapers' O.Corn. midīl 'messor'. O C Sl. pl-e-te-tū 'twines,

¹⁾ For the meaning 'fight' compare OHG. roufen 'pull, pluck', reflex 'wrestle, fight, cut one's way'. Kluge's view, given in his Dictionary, that filitu is connected with Lat. pūg-nus pūg-nāre, that from the pl pret fultum, which was regarded as a similar form to fluhtum, "fultu was changed to filitu by analogy of flihtu, does not convince my judgement On the contrary, I regard fultum as an adformate of fluhtum. On OHG. fūst, cited by Kluge, see II § 101 p. 306, III § 164 p. 3.

plaits, braids' (inf. plesti) beside Goth. fal-pa 'I fold' ground-form *p\(\bar{l}\)-t\(\overline{o}\), beside Gr. δί-παλ-το-ς Skr. puta-m 'a fold' and Gr. α-πλό-ς (III § 182 p 50), from the same root as plek-Lat. plic\(\overline{o}\) plect\(\overline{o}\) (see above). If this view of plet\(\overline{a}\) is not accepted we must take refuge in the explanation suggested in vol. I § 545 p. 399. For it is impossible, in my opinion, to derive plet\(\overline{a}\) from *plekt\(\overline{a}\), notwithstanding the arguments of Jagić and Miklosich to the contrary (Jagić, Arch. slav. Phil. x 196, and Miklosich, Festgruss an Bohtlingk, 88); compare Kluge, Etym. Wort. 5 s. v. falten, and Wiedemann, Lit Prat. 193.

§ 681. Aryan Skr. sphuta-tı, cé-ta-tı, see § 680. naţa-tı 'dances, plays' Ved. nr-tá-māna-s (compare nrtya-ti), beside nar-má-s nar-man- n. 'joke, sport'. kuta-tr 'curls, twists itself', akin to Lat. cur-vo-s. yá-ta-tē 'unites with, strives', beside ya--tá-s part. of yam-a-ti, cp. yátāna-s § 679 p 211. 'shmes' á-dyu-ta-t, from dyu- dw-, cp. dyutāná-s § 679 p. 211. vēš-ta-tē 'wraps itself up, clothes or shrouds itself' (vēštaya-ti vištitá-s) beside veš-ta-s 'band, cord, covering', which doubtless has nothing to do with vis- 'enter', but is connected with Lith. výs-ta-s 'woman's bodice, stays' výstau 'I swaddle or swathe' a child, from uez- 'to wind' céš-ta-ti 'is in motion' (perf. cicëšta) beside cēš-ta-m 'motion'. lőš-ta-tē 'heaps up' beside lōš-tá-s lōš-tu-š 'clod or lump of earth'; if the same root is contained in another -to-form, Lith. lúsz-tu 'I break' intr. (pret. lúž-an), — compare Skr lēš-tu-š 'clod' from riš- liš-'tear, break off' - lostate must be a derivative from the noun, or at least must have modified its meaning in association with (cp. § 794, on Skr. mānáya-tı).

§ 682. Greek. There are numerous forms in $-\pi - \tau \omega$, and a few which have $-\tau \omega$ preceded by some other sound than π . We begin with the latter. $\pi \dot{\epsilon} \nu - \tau \omega$ has been mentioned already, § 680 p. 212. $\ddot{\epsilon} \mu o \rho \tau \dot{\epsilon} \nu - \tau \dot{\omega}$ Hesych, cp. $\mu o \rho - \tau \dot{\epsilon} - \varsigma$ 'mortal'. $\varphi \dot{\alpha} \rho \tau - \tau o - \mu \alpha \iota$ beside $\varphi \rho \dot{\alpha} \sigma \sigma o \mu \alpha \iota$ (= * $\varphi \rho \alpha \tau - \iota o - \mu \alpha \iota$) 'I shut myself in, fortify myself'. $\ddot{\epsilon} - \beta \lambda \alpha \sigma - \tau o - \nu$, pres. $\beta \lambda \alpha \sigma - \tau \dot{\alpha} \nu \omega$ I spring up, arise' ($\beta \lambda \alpha \sigma - \tau \dot{\epsilon} - \varsigma$ 'shoot, bud'), orig. probably 'I get high' (used

of buds and shoots), beside $\beta\lambda\omega\vartheta$ - $\varrho\delta$ - ς 'springing high, grown high' (I § 306 p. 242), $\eta\mu\alpha\varrho$ - τ 0- ν Lesb. inf. $\dot{\alpha}\mu\beta\varrho\delta\tau\eta\nu$ (for * $\dot{\alpha}\mu\beta\varrho\alpha\tau\eta\nu$, I § 292 p. 233), pres. $\dot{\alpha}\mu\alpha\varrho\tau\dot{\alpha}\nu\omega$ 'I miss, err', probably from $\dot{\alpha}$ - $\mu\alpha\varrho$ - τ 0- $\dot{\nu}$ - $\mu\beta\varrho\alpha$ - τ 0- 'having no share' (from the root of $\mu\dot{\varepsilon}\varrho$ - ϱ 0- ϱ 0, cp. $\dot{\alpha}\mu\alpha\varrho\varepsilon\dot{\tau}\nu$ ' $\dot{\alpha}\mu\alpha\varrho\tau\dot{\alpha}\nu\varepsilon\nu\nu$ Hesych. (Curtius, Verb II 2 10 ff., and the Author, Sprachwiss. Abhandl. 160); on the present stems $\beta\lambda\alpha\sigma\tau\dot{\alpha}\nu\omega$ $\dot{\alpha}\mu\alpha\varrho\tau\dot{\alpha}\nu\omega$ see § 621 p. 158. Att. $\dot{\alpha}\nu\dot{\nu}\tau\omega$ beside $\dot{\alpha}$ - $\nu\dot{\nu}\omega$ $\ddot{\alpha}$ - $\nu\ddot{\nu}$ - $\mu\nu$ 'I complete' (§ 639 p. 177) and partic. $\dot{\alpha}\nu$ - $\dot{\eta}\nu\nu$ - τ 0- ς 'that cannot be completed', and similarly Att. $\dot{\alpha}\varrho\dot{\nu}\tau\omega$ beside $\dot{\alpha}\varrho\dot{\nu}\omega$ 'I create'. 1)

Of the numerous Verbs in $-n-\tau\omega$ (Curtius mentions 48 of them), as $\tau \dot{\nu} \pi - \tau \omega$ 'I strike' $\sigma \kappa \dot{\alpha} \pi - \tau \omega$ 'I dig' $\pi \dot{\epsilon} \pi - \tau \omega$ 'coquo', those whose root originally ended in a velar have the first claim to a place in our group, such stems are $\pi \dot{\epsilon} \pi \tau \omega$ from \sqrt{peq} , $\beta \lambda \dot{\alpha} \pi \tau \omega$ beside Skr. marc. However, it is possible to see the suffix $-\iota o$ - (Class XXVI) in every single one; and indeed the denominatives $\chi \alpha \lambda \dot{\epsilon} \pi \tau \omega$ (from $\chi \alpha \lambda \epsilon \pi \dot{o} - \varsigma$) and $\dot{\alpha} \sigma \tau \rho \dot{\alpha} \pi \tau \omega$ (from $\dot{\alpha} \sigma \tau \rho \alpha \pi \eta$) in all probability come from $\ddot{\tau}_{\chi} \alpha \lambda \epsilon \pi - \iota \omega$ and $\ddot{\tau} \dot{\alpha} \sigma \tau \rho \alpha \pi - \iota \omega$ (I § 131 p. 119).

Remark. I see no cogent reason for denying that $\pi_{\underline{i}}$ may become πτ (cp Kretschmer, Kuhn's Zeitschr xxxi 436 f) All that can be said against deriving $\tau \dot{v} \pi - \tau \omega$ (cp $\tau \dot{v} \pi - o - c$) from $\tau v \pi - t \omega$ is that it may just as well contain the present suffix -to- But we cannot derive from forms in -iω those whose root ended in φ, as reύπτω, which comes from the root of $x\rho \dot{\nu} \varphi \alpha$, nor those whose root ended in q or q, as $\pi \dot{\epsilon} \pi \tau \omega$ beside older πέσσω (1/ peq-), νίπτομαι beside older νίζω (1/ neig-) Still, such forms as κρύπτω can easily be due to the analogy of τύπτω, the point of contact between the stems being κρύψω τύψω etc (cp. new forms like σφάττω instead of σφάζω, following φράττω, § 714); and thus again, in view of πέψω etc., we have no proof that πέπτω νίπτομαι and all the rest are not simply adformates of τύπτω. It is also quite possible (in spite of Kretschmer's arguments, as cited, p. 437) that Hom ἐνίπτω beside ἐνίσσω (ἐνίσσω?), and beside ἦνίπαπον ἐνεντπον, was also an adformate of τύπτω, although in this worb there is no svtyw (for svtyw in Il 2 137 etc. is not from this stem), and this as far as it goes is in favour of a stem with orig -70-.

§ 683. Italic. Lat. plec-tō, pec-tō, me-tō, see § 680 p. 212. ottor ūtor (cp. Osc. úittiuf 'usio, usus', Pelig. otsa

¹⁾ τίπτω does not come in this group; see § 552, page 107.

abl 'usa, consumpta') perhaps akm to Gr ol-το-ς 'fate, lot' from V e_l-'go' (Danielsson, Pauli's Alt. Stud. III 198 f.). flec-tō perhaps from the root of falx. plec-to-r 'I am struck, punished', either to be set beside plāga plangō, in which case we must assume that it came from *plactor when used in compounds, without an accent (cp. plicō, I § 65 Rem. 2 p 53), or akm to Lith plész-iu 'I tear, snatch' (cp. Gr. δέρω 'I flay' and 'cudgel'), in which case it must be pronounced plēctor nectō belongs to $\sqrt{neilli-}$ 'bind', and in its ending probably imitated plectō; see Ber. sachs Ges. der Wiss., 1890, p. 236 foot-note 2. With plexu-s i. e. *plect+to-, and ūsus i. e. *o_l-t+to-, we naturally compare fassu-s i. e *fa-t+to-, from fa-teor Gr.-φα-το-ς 'said'. Uncertain. Osc. krustatar conj 'cruentetur' according to Bucheler, akm to Gr. Δρυσ-τ-αίνω, § 664 p. 197.

§ 684. Keltic It is doubtful whether brissim 'I break' originally belongs to this class, see § 680 p. 212

Remark The so-called t-preterite, which came out of the 3^{rd} sing. mid in -to, does not belong to this class. See § 516, page 82

§ 685 Germanic O.H.G. spal-tu, flih-tu, fih-tu, bris-tu, Goth. falpa O.II G faltu see § 680 pp. 212 f. Goth. ga-vida 'I bind up' O.II G. with 'I bind' doubtless for 'ui-to, cp. O.II.G. willow [Eng. withy] Skr. vī--tá-s 'enfolded, enveloped' Lith. vej-ù 'I twist a string', as the present got into the company of giba -gita and suchlike, there were formed Goth. ga-vap O.II G. wat; cp. below, Goth winda. O II.G. līdu 'I suffer' (O II G. leid O.Icel leid-r 'painful, paining, hated') probably orig (pr Germ) "lī-þō and connected with O H.G lewes 'alas' (stem 'laj-wa-). Goth hal-da 'I protect, guard' O H.G. haltu 'I hold, guard' ground-form *h\bar{l}-t\delta, cp. Gr. βου-κόλο-ς 'cowherd'. Goth. fra-gilda 'I repay' O H.G. giltu 'I pay back, give equivalent, offer, pr. Germ. *zel-po (if we follow the indications given by O.Swed gialla as compared with O.Icel. gjalda, we must accent the root), akin to Gr. ω-φελο-ν δ-φλεῖν, √ghel-. Goth. us-alpan-s 'obsolete' and O.Icel. aldenn 'grown old' point to al-pa- as the verbal stem, cp. O.H.G al-t 'old', beside Goth. a-la 'I grow up'. The ending of a few onomatopoeic verbs, as Goth. kriusta 'I crunch' (krust-s 'a crunching'), O.Icel. gnest 'I crack', seems to be of the same sort as that of O.H.G. bristu O.Icel brest (O.H.G. braston 'to crack, crackle'), compare the Mid.H.G. weak verb krīsten 'groan with pain or exertion' beside krīzen Mid.Dutch crīten 'groan, shriek' (-st- is not for -tt-).

Remark 1. OH.G uīsu 'I shun', which is connected with Lat. $v\bar{u}\bar{v}$, and which Kluge assign to this class (Paul-Braune's Beitr. ix 152), seems more likely to be of the so-class See § 664 p 197

Extended by an *i*-suffix: Goth. fairh-tja O.H.G. furtht(i)u 'I fear' (pret. forah-ta), whence the adj., originally participle, fairh-t-s O II.G foraht 'afeared, afraid'.

The suffixal ending -ntō is common in Germanic: Goth. standa OHG. stantu 'I stand' \sqrt{sta} -, Goth. vinda OHG. wintu 'I wind or twist' $\sqrt{ue_2}$ -, OHG swintu 'I disappear' beside O.H.G. swī-nu. The forms pret stōp and pres. gavida make it probable that the nasal is due to the analogy of Class XVI For the word swintu, but for no others, we have some ground for assuming that a no-present (Class XIII) has been extended by -to-. See § 634 p. 172, and compare Lith suncziù § 686, OC.Sl ob-rešta § 687.

Remark 2 Osthoff's view is that the Idg had a simple suffix -net--nt-, which is preserved in the above named Germanic words and in others. This to my mind carries no conviction with it (See, for Osthoff's arguments, Zeitschr deutsch. Phil, XXIV 215 ff, and Anzeiger für idg. Spr und Altertumskunde, i 83.)

§ 686.¹) Balto-Slavonic. In Lithuanian (and Lettic) are numerous present stems in -stu and -sztu with intransitive and inchoative meaning -stu arose in roots or stems ending in a

¹⁾ The Lithuanian and Lettic verbs in -tu are very neatly explained by Johansson (Kuhn's Zeitschr xxxii 507 ff.) as derived from middle forms of the 3rd sing. in -s-to; e g 3rd sing rlmsta for *rm-s-to, ep Skr s-aor á-iq-s-ta, perhaps also forms with no s, as virsta = *urt+to, ep. Skr á-vrt-ian. When the injunctive ilmsta virsta had come to be looked on as parallel to béga sùka (see § 999. 2), the forms rlmstu vii stù were coined on the analogy of bégu sukù, and so forth.

dental explosive or s, and -sztu in roots with final palatal explosive. virs-tu 'I fall down', pret virt-au. blveta 'evening draws on', pret. blind-o. girs-tu 'I get to hear' pret. gird-au. ges-tu 'I am quenched, go out', pret. ges-au ') tvertu 'I stretch, lengthen myself', pret. tvertu (cp. tvertu § 657 p. 191, § 665 p. 197). lusz-tu 'I break' intr., pret luveru -sztu may also come from -stu by the influence of preceding r, as in mirsztu 'I forget' pret. mirsz-au, beside Skr mars- (I § 587.1 p 442).

Verbs in -stu were the starting point for many new formations, as kit-stu 'I raise myself', pret kit-aũ; styr-stù 'I stiffen', pret. styr-aũ, pa-ží-stu 'I know', pret. pa-žinaũ, rúk-stu 'I grow sour, ferment', pret. rúg-au; džiú-stu 'I grow dry, wither', pret džiúv-au inf. džiú-ti New forms in -sztu; mìr-sztu 'I die', pret. mir-iaũ, cp. Gr š-μοg-τεν § 682 p. 213.

Often the stems which serve as groundwork for these words already have present formative suffixes; e. g. tv_l -stu 'I swell out' (pret. tv_l -aũ) derived from 'tv- u_l , see § 624 p. 161; junk-stu 'I grow accustomed' (pret. junkau) from *junku akin to Skr. uc-ya-ti, v_l -s-tu 'I increase, grow larger' from * v_l - u_l

Denominatives too were formed in this class. gelstù 'I grow yellow' pret. geltaŭ from gelta-s 'yellow', karstù 'I grow bitter' pret. kartaŭ from kartù-s 'bitter', brankstù 'I grow dear' pret. brangaŭ from brangù-s 'dear', žūstu 'I fish' pret. žuvaŭ from žuv-l-s 'a fish'. Compare § 793.

Remark 1 Bezzenberger (Beitr IX 336) and Wiedemann (Lit. Prat., 60) deny that the Lithuanian to-present series is connected with those of the other Idg languages. It certainly is queer that only one Lith to-present has cognates in other languages, namely mirsztu 'I die', which comes from the same root as Gr $\tilde{\epsilon}_{-\mu\rho\rho\tau\tilde{\epsilon}-\nu}$; and this comparison is a very precarious foundation for any theory.

¹⁾ Parallel stem, dial gistu. The i in this and similar forms (see Wiedemann, Lit Prät, 8) I regard as a re-formation on the analogy of Lith roots such as gris- glib- (beside gres- gleb-) with $ri\ li=r\ l$. Similarly O.C.SI $t\bar{i}ci$ etc following $r\bar{i}ci$, § 534 p. 96.

suncziù 'I send' (inf siùsti) doubtless instead of 'siuntu like jùng-iu instead of 'jing-u etc., and if this word be connected with Skr sáv-a-ti suv-ú-ti 'sets in motion, drives, sends' (Wiedemann, Lit. Prat, 84) we should have in *su-n-tō a present like Goth. ii-n-da § 685 p. 216

Remark 2 The 3rd sing ei-t(i) 'goes' lekt-(i) 'iemains' mêk-t(i) 'sleeps' sés-t(i) 'sits' (§ 511, pp 76 f), gave lise to the dialectic forms Lith eith eith eith eith eith lekth lekth mekth séstu, and so forth, and similarly, in Lettic, 1st pl ham follows l-t 'goes' (Bezzenberger in his Beitr ix 334 ff). This re-formation, which has an exact parallel in Keltic (§ 506 p. 72), was in some degree due to the to-present stems -t(i) and -t(u) were regarded as the same in structure

§ 687. O C Sl. $\check{c}\check{i}$ -ta, m-e-ta, pl-e-ta, see § 680 p. 212. rasta 'I grow' inf. rasti (rastii 'growth', rastii 'usury, interest') for *rād + ta, cp. rodii 'birth'. Mention should also be made of ob-rětii 'I found', if this is to be connected with rėja 'I knock', to this the present -ręšta (§ 636 p. 174) would have just the same kind of relation as Goth. sta-n-da to $st\bar{o}\bar{p}$ (§ 685 p. 216).

II. CLASS XXV.

Root + -dho- and -do- forming the Present Stem.

§ 688. Although under certain circumstances dh could become d in the parent language (I § 469.8 p.), that is not the reason why I class -dho- and -do- together now. It is not that I regard them as being always variants of the same suffix; but simply because in some languages dh and d ran together and became indistinguishable, which makes it often quite impossible to say which of the two is used with a given form.

The dh-suffix which we see in forms like Gr. $\beta \varrho t - \vartheta \omega$ $\pi b - \vartheta \omega$ $\pi \lambda \eta' - \vartheta \omega$ $\varphi \lambda \varepsilon \gamma \varepsilon' - \vartheta \omega$ has often been derived from $\sqrt{dh\bar{e}}$ 'place, do' (Skr. $d\dot{a}dh\bar{a}$ - $t\iota$ etc.), this being deduced from other compounds of this root, both old and new, about which there can be no doubt, as "sue- $dh\bar{e}$ - *su\varepsilon - dh\varepsilon - 'make one's own' in Skr. sva- $dh\dot{e}$ 'custom, wont' Gr. ε' - ϑ - $\omega \nu$ 'consultus' ε' - ϑ - ϑ - ϑ - ϑ -

-oş tio-9-a, Skr. śrád-dadhāmı 'I believe, trust' Lat $cr\bar{e}d\bar{o}$ O Ir. cretim (II § 4 p. 9, § 160 1 p. 479), Avest. $yao\check{z}$ -dānti $yuo\check{z}$ -daātūli 'makes something right, purifies' from $yao\check{s}$ = Skr. $y\check{o}\check{s}$ 'weal, luck, happiness' This may indeed be the real origin of all such stems. The consonant which began the second part of the compound stem became practically the 'root-ending' in $\beta \varrho t \vartheta \omega$ $\beta \dot{\epsilon} \beta \varrho \bar{\iota} \vartheta \alpha$, very much in the same way as the p in $g\bar{o}p$ -a-ti ju- $g\bar{o}p$ -a $g\bar{o}p$ -sya-ti etc. from $g\bar{o}$ - $p\check{a}$ - $g\bar{o}$ -p-a-.

Just so the suffix -d- may sometimes be the $\sqrt{d\bar{v}}$ -, which in addition to its meaning 'give' had other meanings like those of $dh\bar{e}$ - (Osthoff, Perf. p 237), cp. I § 404 pp 298 f., on Skr. $mrd\acute{a}$ -tr pr. Ar ' $mr\check{z}$ -da-tr.

The thematic stems in -o- (-dho-, -do-) were originally not the only ones which contained these additional suffixes. But although not the only stems, thematic stems were commonest of all in this connexion, and without doubt this was generally true in the original language. We shall have occasion to point this out when we find other stems parallel to those in -o-.

§ 689. Pr. Idg -dho-.¹) \(\square\) uel- 'to wish, rule' (Lat. vel-le O.Ir. flaith 'lordship') · Goth. val-da 'I have power, rule', O C Sl. vla-da 'I have power, rule' (for *vol-da), both for u\(\bar{\chi}\)-dh-, cp. Lith. val-d-a\(\bar{\chi}\), parallel stem Lith. vel-du 'I rule' pa-véldu 'I inherit' (Pruss. weld\(\bar{\chi}\) nair pl. 'heritages'). From *sqer-dh-, beside Lith. sh\(\bar{\chi}\)-ti 'to sever, part' O II.G scrintu 'I burst, am shattered' by transfer to Class XVI (§ 634 p 171), Lith. sk\(\bar{\chi}\) d\(\bar{\chi}\) u 'I burst, or blow up', which is derived from a form *sher-du (§ 765). From the root of Skr yu- 'to mix, stir, disturb': Skr y\(\bar{\chi}\)-dha-ti 'gets in motion' (y\(\bar{\chi}\))h-ya-t\(\bar{\chi}\).

¹⁾ Per Persson, in his Wurzelerio, pages 35 ff, sees the determinative dh and d in many instances besides those for which they are here assumed. Some of these are words in which dh or d is taken in this book to be part of the root proper; e. g. Skr gfdh-ya-ti, which he derives from the root of O.H.G. yer 'desiring', and Gr. $\mu \epsilon \delta \omega$ Goth mita, which he derives from ν mē- 'measure'. For a new discussion of forms with determinative d see Johansson, Idg. Forsch II 42 ff, and 46 ff.

2nd sing. yōt-si), Lith μι-dù 'I move trembling', μιπdù 'I get into a trembling movement, into uproar' (pret judaŭ inf. jùsti) by transfer to Class XVI (§ 635 p 172), compare Gr. νομίν-η 'battle' i. e *νθ+σμῖν- (II § 115 p. 359), Lat. juba jubeō (Bugge, Bezz. Beitr. xiv 58 f.).¹) From rē- (Lat. reor rē-rī): Skr ά-rā-dha-t 'brought to a happy conclusion, set right' (rādh-ya-tē rādh-nō-ti), Goth ga-rēda 'I consider, I bestir myself' ur-rēda 'I give judgement, decide' O.H.G. rātu 'I advise, think of, conjecture, prepare carefully', cp. O.C.Sl. raditi 'to consider, care for'. From the same root as Lith. kló-ju 'I spread abroad': A.S. hla-de 'I load, cover with portable things' (ground-form 'qlə-dhō), O C.Sl kla-da 'I invite, lay down' (cp. Kluge, Etym Wort s. v laden).

Two other forms, which others with less reason regard as reduplicated, will also come in here. Skr partic. dódhat- 'shaking, violent, storming' (dúdh-i-š 'violent') and Gr. θύσσομαι (for *θυθ-ζο-μαι) 'I shake or stir myself', both connected with Skr. dhū- 'to shake'.

§ 690. Pr. Idg. $-d\bar{o}$. $\sqrt{(s)qer}$ - (Gr. $\sigma \kappa a i \rho \omega$ 'I leap, jump, dance'): Skr $k \bar{u}r$ -da-ti 'jumps, leaps', cp. Gr. $\kappa \rho a \delta$ - $a \omega$ 'I swing, brandish' $r i \rho o \delta$ - $a \xi$ a kind of dance, Mid.H.G. scherze schirze (weak verb) 'I jump in a lively way'. \sqrt{mel} - (Lat. $mol \bar{o}$, Skr. $ml \bar{a}$ -ti 'grows soft, slackens' O.Ir. $ml \bar{a} i t h$ 'soft, slack', see § 580 p. 122). Skr. vi-mrada-ti 'softens', A.S. mel-te 'I melt, grow soft' (Goth. ga-maltein-s 'loosening, solution'), cp. Skr. mradi- ξ 'soft' compar $mr \dot{a} d \bar{i} y a s$ -, Gr. $\dot{a} \mu a \lambda \dot{a} \dot{b} \dot{v} \omega$ 'I soften, weaken' $\beta \lambda a \delta$ - $\alpha \rho \dot{o}$ - ζ 'slack, loose, loosened', Lat. molli-s for *mold-vi-s-, Skr. mrad-= *ml-e-d-with the same intermediate vowel e which is seen in Gr. $\ddot{\epsilon}$ - σ_{χ} - ϵ - ϑ -v- φ 694 Lat. m-e- $t \bar{o}$ § 680 p. 212; from the same root we have a stem *mel-dh-Skr. mardha-ti 'slackens, gets lazy or sluggish' Gr. $\mu a \lambda \vartheta a \kappa \dot{o}$ - φ 'soft, tender' (beside $\mu a \lambda a v \dot{o}$ - φ) $\mu \dot{a} \lambda \vartheta \omega v$ (gen. $-\omega v$ - $\alpha \varphi$) 'weakling'

Another, but hardly better explanation of jubeo may be seen in Bezzenberger's Beitrage, xvi 216 (Froehde).

O.Sax. mildi 'mild, gracious, gentle', so that it is impossible to decide whether -dh- or -d- is contained in O Ir. meldach 'acceptus, gratus', Lith. meldžiù 'I beg', O.C.Sl. mladŭ 'tender'. Connected with Lat. sāl sal-is. Lat. sallō for *sal-dō (I § 369 p. 280), Goth. sal-ta 'I salt'. V ghey- 'pour' (Gr. χέω χύ-τρᾱ): Lat. fundō (perf. fūdī) conjugated in Class XVI (§ 632 p. 169),1) Goth. giuta O II G. giuzu 'I pour'. \(\sqrt{pleu-} \) 'float, swim' (Gr. $\pi \lambda \dot{\epsilon}(F)\omega$). O.H.G. fliuzu O.Icel. flijt 'I flow', Lith. płaudžiu 'I wash, purify' (inf. plausti), pludžiu 'I chatter' (inf. plusti), plusti 'I begin to swim, get swimming' (pret. plúdau), cp. O.Ir. do-lod-sa 'ivi' 3rd sing. do-luid § 697. V sprey- (Lett. sprau-ju-s 'I rise, spring up', of seed): Mid.H.G. spriuze AS. sprūte 'I sprout' (A.S. spreôt 'stalk, shaft' O H.G. spruza 'prop, pillar' O H.G. sprozzo 'sprout'), Lith. spráudžiu 'I push forcibly into a narrow space, press' (inf. spráusti) sprústu 'I push my way out of a holdfast or fix, get out' (pret. sprúdau). With Lat clāv-i-s: clau-dō, compare O.Fris. slūte (for *sklūt-) 'I close' (OHG. sliuzu is doubtless *slūzu transformed by analogy).

Following the same lines of reasoning, I derive Skr. $sv\acute{a}da-t\bar{e}$ Gr. $\mathring{\eta}\delta\epsilon-\tau\alpha\iota$ from * $su\ddot{a}-de-t\alpha\iota$ 'enjoys with gusto', and Skr. $sv\acute{a}da-ti$ Gr. $\acute{\epsilon}\delta\alpha\nu\acute{o}-\varsigma$ 'suavis' from ' $su-e-de-t\iota$ (cp. Skr. mr-a-da-ti above); these forms are obviously akin, and I can see no other way of bringing them together.

§ 691. Aryan. (1) -dho- Skr yō-dha-tı, á-rā-dha-t, dō-dhat-, see § 689. Skr á-hru-dha-t 'got angry' (krúdh-ya-tı), Avest. xrao-da-tī 'is anxious', $\bigvee qrey$ - Skr. $kr\bar{u}$ -rá-s 'coarse, rough, terrible, gruesome'. Avest a-rao-đa-p 'flowed' (raođaye-iti) from srey- Skr. sráv-a-ti (r- = *sr-, cp. O.Pers. rauta- I § 558.3 p. 414), cp. Skr. v-srúh- 'stream, body of water' (-h- = -dh-, I § 480 p. 354), Gr ϕv - θ - ϕ -c. Skr. $sr\acute{e}$ -dha-ti 'he goes wrong', beside a-sremán- 'without error, faultless'. Skr. $s\acute{e}$ dha-ti 'gets to the goal, puts in order' may be derived from $\bigvee s\bar{e}$ - (Skr. $s\ddot{e}$ - 'to bring to an end, conclude' vy-ava-sāmi

¹⁾ For f in $fund\bar{o}$, see Buck, Am. Journ. Phil. XI 215 f.

a-sā-t, Lat. sē-ru-s, O.Ir. sī-r 'lasting long or for ever' Umbr. sevom Osc. sivom 'omnino' = 'sē-uo-m).

§ 692. (2.) -do- Skr. kūr-da-ti, mr-a-da-ti, svá-da-t2 sv-á-da-ti, see § 690 p. 220 Skr. tar-da-ti (gramm.) pierces, splits, opens' (tynát-ti), akin to tár-a-ti 'traverses', cp. Lith. tréndu 'I am caten of worms or moths' § 637 p. 174 and tride 'diarrhoea' pra-trýstu 'I fall ill of diarrhoea' (pret. -trýdau).1) Skr. khú-da-ti 'bites to pieces, chews' beside khún--a-ti 'digs, grubs'. Skr. mi dá-ti 'is gracious, pardons' for *mrž-da-,2) cp. Avest. mer'ždika- n. 'grace, pardon', either from the root of merg- 'wipe off' Skr. mrya-ti 'wipes off, purifies of guilt', or from that of Skr mis-ya-tē 'forgets' Lith. mirsz-ti 'to forget' (cp. Lith. už-mirsz-dinu -mirždinu 'I cause to forget'). Skr. īda-tē 'honours, praises, prays to' (tt-tē) for *iž-da-tai, either connected with yáj-a-ti 'honours, reverences, offers' partic iš-tá-s Gr. ay-10-5 'honourable, sacred', or with Lat. aes-tumare Goth. áis-tan weak verb 'to revere, observe, have regard for' O.H.G. ēr-a 'honour'; it should be remarked that the Gothic verb may be derived from Idg. *azz-d- or from Idg. *azs-t-, either one or the other. Avest. xraož-da-iti 'hardens' (xružd-ra- 'hard') beside Gr zovo-ralvw 'I make to freeze', in which s is itself an extension (§ 664 p. 197), perhaps from the same 100t, Skr. krūdaya-ti 'makes thick' krōdá-s 'breast, boar'. Lastly, we are doubtless right to add Skr. hēda-māna-s hīda-māna-s 'being angry with some one, hostile' Avest. zōržda- 'ugly, disagreable, αλοχρός'.3)

§ 693. 3. -dho- or -do-, uncertain which. To this place belong Avestic verbs. syaz-da-iti 'gives place, disappears', cp.

y in -trýstu is not original. By analogy of i-roots were formed trédžiu 'I have diarrhoea' traudinů 'I excite diarrhoea'.

²⁾ More exactly mqdi-is, answering to lidhi- for *liždhi- (I § 404 pp 298 f.) The long q is certain from the metre; see Benfey, Vedica and Verwandtes, pp 1 ff, Oldenberg, Die Hymnen des Rig-Veda, I 477.

³⁾ The unextended root is not really contained in Lith pa-zeida 'insult, wound' (cp. Zubat', Bezz. Beitr. xvii 327); this is against the known laws, see I § 476 p 351 f, and Burg in Kuhn's Zeitschr. xxix 363.

snždye-nti sīždye-nti 'drives away', seems to be akin to Skr. šiš- 'to be over, left behind' (śinás-ti śēś-aya-ti) vūnž-da-iti 'hurls, throws against something', perhaps connected with O C.Sl vich-rū 'whirlwind' Russ. vichatī 'shatter, agitate'.') avanuhab-da-itē 'falls asleep', from Ar. suap- 'to sleep' (I § 159 pp. 141 f.). snā-đa-itī 'washes', beside Skr. snā-tī.

§ 694. Greek (1) -dho. $\hat{\epsilon}$ - $\delta \rho \alpha$ - ϑo - ν $\hat{\epsilon}$ - $\delta a \rho$ - ϑo - ν 'I slept' (pres. $\delta a \rho$ - ϑ - $\dot{\alpha} \nu \omega$ § 621 p 158), beside Lat. dor- $m \bar{\nu}$ Skr. dr- \bar{u} -ti. Hom opt. $\beta \epsilon$ - $\beta \rho \omega' \vartheta o$ - ς 'comedas' (Od 4.35) from $\beta \iota$ - $\beta \rho \omega'$ - $\sigma \nu \omega \nu'$ ger-: cp. Lith. gir-d-inu gér-d-inu I give to drink' (ger-iu 'I drink'). $\dot{\eta}\lambda \nu$ - ϑo - ν 'I came', beside $\alpha \rho o \sigma$ - $\dot{\eta}\lambda \nu$ - τo - ς perf. 2^{nd} pl. $\dot{\epsilon}\lambda\dot{\eta}\lambda\nu$ - $\tau \epsilon$. $\dot{\epsilon}\rho \dot{\epsilon}\chi$ - $\vartheta \omega$ 'I pull to and fro, tear, hurl', doubtless akin to O.H.G. ruc 'jerk, jolt, sudden change of place'. $\dot{\epsilon}\sigma \vartheta \omega$ 'esse' ($\dot{\epsilon}\sigma \vartheta$ - $\dot{\iota}\omega$ §§ 713, 765) beside $\dot{\epsilon}\delta$ - ω " $\dot{\alpha}\chi$ - ϑo - $\dot{\mu}\omega$ 'I am galled or wearied by burdens', beside $\dot{\alpha}\chi$ - $\nu \nu$ - $\mu \omega$. " $\alpha \lambda \dot{\eta}$ - $\vartheta \omega$ 'I am full', beside $\alpha \iota \mu$ - $\alpha \lambda \eta$ - $\mu \iota$. $\alpha \nu \dot{\eta}$ - $\vartheta \omega$ 'I shave, rub, scratch', beside $\alpha \dot{\nu}$ (§ 737). $\alpha \dot{\nu}$ - $\vartheta \omega$ 'I make rot' (perf $\alpha \dot{\epsilon}\alpha \dot{\nu}$ $\vartheta \omega$), beside $\alpha \dot{\nu}$ o- ν 'pus' Lith. $\alpha \dot{\nu}$ - $\alpha \dot{\nu}$ - $\alpha \dot{\nu}$ 'I make rot' (perf $\alpha \dot{\nu}$ - $\alpha \dot{\nu}$), beside $\alpha \dot{\nu}$ - $\alpha \dot{\nu}$ 'I make rot' Lett. $\alpha \dot{\nu}$ - $\alpha \dot{\nu}$ - $\alpha \dot{\nu}$ 'I make rot'. $\alpha \dot{\nu}$ - $\alpha \dot{\nu}$ 'I weigh, press hard upon' (perf. $\alpha \dot{\nu}$ - $\alpha \dot{\nu}$), beside $\alpha \dot{\nu}$ - $\alpha \dot{$

έ-σχ-ε-θο-ν 'I held', beside ε-σχ-ε-ς \sqrt{segh} -. νατα-βλ-έ-θει καταπίνει Hesych., beside O Ir. gelid 'consumit' O H.G chela 'throat' φλεγ-έ-θω 'I burn', beside φλέγ-ω. νεμ-έ-θο-μαι 'I pasture', beside νέμ-ο-μαι. τελ-έ-θω 'I am', beside τέλλω.

 $-\alpha-\vartheta\omega == *-\vartheta-dh\bar{o}$ $\pi \varepsilon \lambda-\dot{\alpha}-\vartheta\omega$ 'I draw near', beside $\pi \dot{\varepsilon}\lambda \alpha-\varsigma$ $\pi \varepsilon \lambda \dot{\alpha}-\sigma\sigma\alpha\iota$. $\delta\iota\omega x-\dot{\alpha}-\vartheta\omega$ 'I pursue', beside $\delta\iota\dot{\omega} x-\omega$. $\dot{\alpha}\iota\bar{\upsilon}\nu\dot{\alpha}-\vartheta\omega$ 'I ward off', beside $\dot{\alpha}\iota\dot{\upsilon}\nu\omega$. $\iota\iota\varepsilon \tau-\dot{\alpha}-\vartheta\iota$ 'I go after, pursue', beside $\iota\iota\dot{\omega}$ 'I go'. Here perhaps should come $\iota\iota\varepsilon$ 'Dor. $\iota\dot{\alpha}\vartheta\circ\iota\iota\omega$ (perf. $\iota\dot{\varepsilon}\iota\eta\vartheta\alpha$ $\iota\dot{\alpha}$ ' $\iota\dot{\alpha}$ 'I enjoy, am pleased', for $\iota\dot{\alpha}$ ' $\iota\dot{\alpha}$ ' 'Porche $\iota\dot{\alpha}$ ' 'I take pleasure' for $\iota\dot{\alpha}$ ' ' $\iota\dot{\alpha}$ ' and $\iota\dot{\alpha}$ ' ' $\iota\dot{\alpha}$ ' 'Porche ' $\iota\dot{\alpha}$ ' 'Lat. $\iota\dot{\alpha}$ ' 'Lat. $\iota\dot{\alpha}$ ' 'Lat. $\iota\dot{\alpha}$ ' 'Survey 'Survey' (I § 612 p. 462), — observe that $\iota\dot{\alpha}$ ' ' $\iota\dot{\alpha}$ ' ' $\iota\dot{\alpha}$ ' 'Dorship 'Survey' seems to imitate $\iota\dot{\alpha}$ ' 'Survey' which would show

¹⁾ Still more uncertain is Bartholomae's comparison of the word with Skr. vīdu- in vīdu-pātman- (Bezz. Beitr. XIII 87).

it to have been formed at some time when there was a present *gavide \bar{v} still in use; as regards the ending $-\epsilon \omega$ $-\epsilon \bar{o}$, see § 801.

 μ ι-νύ-θω 'minuo' beside Skr. mι-ηδ-mi, φ θι-νύ-θω 'I destroy' beside φ θίνω φ θίνω for * φ θι-νf-ω Skr. kξι-ηδ-mi, see § 639 p. 177, § 652 p. 186.

 $\beta \alpha \varrho v' - \Im \omega$ 'I am weighted' beside $\beta \alpha \varrho v' + \omega \beta \alpha \varrho v' - \varepsilon$, cp. end of § 611.

§ 695. (2.) -do-. $\varepsilon\lambda$ -do- $\mu\mu$ Hom. $\dot{\varepsilon}\dot{\varepsilon}\dot{\lambda}\dot{\delta}o\mu$ i Y wish, desire' for * $F_{\varepsilon}\lambda$ - δo -, beside Lat. vel-le; cp. Goth. val-da O.C.Sl. vla-da Lith. vel-du with -dho- § 689 p. 219. ε - $\varphi\lambda a$ - δo -v 'I popped, burst', beside Skr. phal-a-ti 'bursts' or beside $\varphi\lambda$ - $aiv\omega$ § 621 p. 158. $\dot{\varepsilon}$ - $\varphi\lambda \iota$ - $\delta \varepsilon$ -v $\dot{\delta}\iota\dot{\epsilon}\varrho\varrho\varepsilon\varepsilon\nu$ Hesych. $(\varphi\lambda\iota\dot{\delta}-\dot{a}v\varepsilon\iota$ Hesych, $\varphi\lambda\iota\dot{\delta}\dot{\eta}$ 'superfluity, abundance') beside $\partial\lambda\dot{\iota}a\varsigma$ (Curtius, Gr. Etym. 301). $\tau\dot{\varepsilon}\nu\dot{\delta}\omega$ 'I gnaw', doubtless for " $\varepsilon\varepsilon\mu$ - $\delta\omega$ and connected with $\tau\dot{\varepsilon}\mu$ - $\nu\omega$; cp. Lat. $tonde\bar{o}$.

-δ- 1s very common in other formations, both in verbs and nouns. We may mention further $\nu\rho\alpha$ -δ-αω ν άρ-δ-αξ and ἀμαλ-δ-όνω βλα-δ-αρό-ς § 690 p. 220. Other examples. ν λα-δ-άσω σεῖσωι Hesych., beside ἀπο- ν λάς ν λῆ-ρο-ς 'lot' (a chip or piece of wood, or other substance, broken off). Lat. per-cellō for *-cel-d-ō § 696. ε-ροά-δ-ατω, ὁάσσωτε for *ὁάδ+σα-τε, beside ὁαίνω 'I sprinkle' § 621 p 159. ν ε- ν λιδ-ότ-α ἀνθοῦντα Hesych, ν λιδή 'softness, luxuriance, wantonness', δια- ν εχλοιδώς διαφοέων ὑπὸ τονψῆς, from ν λίω 'I am soft, effeminate'. ν ει-δ-άω 'I smile' φιλο- ν μειδής, akin to Skr. smάy-α-tē cp Lett. smaι-da 'a smile' smi-diná-t smi-diná-t 'to make laugh'. ν λύ΄-ω 'I flood' for * ν λν-δ- ν μω, ν λύ-δ-ων 'wave': Goth. ν λιῦ-t- ν -s 'pure, clean', connected with O.Lat. cluere 'purgare' and cloāca. εν-φλυ΄-ω 'I break out' (of a sore or abscess) for * ν 4ν-δ- ν μω, beside ἐν-φλυ΄ω

§ 696. Italic. (1) -dh- in Lat. μ -b- $e\bar{o}$, see § 689 p. 220, and probably gaude \bar{o} for * $g\bar{a}vide\bar{o}$, see § 694 p. 223.

(2.) -d- in sallō for *sal-dō, fundō fūdō, clau-dō, see § 690 p. 221. per-cellō for *-cel-dō from the same root as $cl\bar{a}d$ -ēs (I § 306 p. 243), and connected with Gr. $\lambda\lambda\alpha$ - δ - $\lambda\lambda\bar{a}$ -, see § 695.

- $c\bar{u}$ - $d\bar{o}$, once also *cau- $d\bar{o}$ (Conway, Verner's Law in Italy, p. 72), connected with Lith. $k\acute{a}u$ -ju 'I strike, forge, fight' O.C.Sl. kov-a 'I forge'.
- (3.) -dho- or -do- (doubtful). frendō beside fremō (cf. Osthoff, M. U. v 94 f.), perhaps for *fremdō. caedō, according to Holthausen, P.-B. Beitr. xī 554 f., connected with Mid Dutch here 'hammering block' heren 'to strike, ram, stamp' Mid.H G. here f. 'mallet, wooden hammer'. Other possible forms are tendō from √ten-, see § 564 p 111, and dē-fendō of-fendō, which may be connected with Gr. θείνω, and come from √ghen- (is fēnu-m 'hay' for *fen-sno- or *fend+sno-, meaning 'something cut'?) 1)
- § 697. Keltic. -d- is perhaps the suffix of do-lod-sa 'ivi' beside luath luad 'quick, fleeting', beside O.H.G. fliuz-u § 690 p. 221 (so Zimmer, Kuhn's Zeitschr xxx 215 f.).
- § 698. Germanic. (1.) -dho. Goth. val-da O.H.G. waltu 'I rule, hold sway', O.H.G scrintu 'I burst, blow up', Goth. ga-rēda 'I reflect upon, meditate' O.H.G rā-tu 'I advise', A.S. hla-de 'I load', see § 689 p. 220. O Icel bregā 'I set moving quickly, I swing' A.S. brezde 'I swing, throb' O.H.G. brittu 'I swing, throb' (for -tt- see Braune, Ahd. Gr.² § 164 Anm. 2 p. 135) doubtless for *bhreg--dhō, beside O.C.Sl. brīz-ŭ 'quick' brīz-ati 'to run quickly', in Kluge's view of the treatment of pr. Idg. med. asp. + tenus (Paul-Braune's Beitr. ix 152 f., Paul's Grundr. I 327), another possible ground-form would be *bhregh+to (Class XXIV).
- § 699. (2.) -do-. Mid.H G. scherze 'I jump quickly about', A.S. mel-te 'I grow soft', Goth. sal-ta O.H.G. salzu 'I salt', Goth. gru-ta O.H.G. giuzu 'I pour', O.H.G. fluu-zu 'I flow', Mid.H.G. spriu-ze A.S. sprū-te 'I sprout', O Fris. slū-te O.H.G.
- 1) If -fendō should be connected with Skr. bādha-tē 'compels, oppresses', the latter must be kept distinct from Skr. vadh- Avest. vad- (Gr. ωθέω).
 -fendō, which may have once been *-fandō, would then belong to Class XVI § 632 Yet another explanation is given by Fick, Wtb. 1 463, who compares O.Icel. detta 'to fall down'. Conway, Class. Review v 297, explains tendo -fendō as being for *ten-2ō *ghen-2ō = Gr. τείνω θείνω.

shuzu 'I shut', see § 690 pp. 220 f O Sax wrītu O.H.G. 17gu 'I tear, wound, write', cp. Gr. $\dot{\varrho}\bar{\iota}$ - $\nu\eta$ 'file, rasp' $\dot{\varrho}\bar{\iota}$ - $\nu\dot{\varrho}$ - $\dot{\iota}$ 'hide still on the body' (but déque from déque) O.Icel vel-t 'I roll' trans. O.H.G. walzu 'I roll, turn myself', the latter for *u\bar{l}-d\bar{o}, beside Lith. vél-ti 'to full, mill' Lett we'l-t 'to roll, full, mill', compare Lith. vél-d-inu 'I have something fulled or milled'. -ta 'I die slowly away', O.H.G. swilzu 'I am devoured by fire, I spend myself in contu, pine away', O Icel. svelt 'I hunger', beside AS swelan 'to smoulder, burn slowly and glow'. cp. Lith. svil-d-ınu 'I get something singed'. O.H.G sciu-zu O.Icel. skūt 'I shoot'. Lith. szau-d-y-kle 'shuttle' száu-d-au 'I shoot or move again and again' száu-d-inu (causal of the last) Lett. schau-d-e--kli-s 'spoolor bobbin' schau-d-r-s 'hasty, hot', beside Lith. száu-ju 'I shoot' O.II.G. glī-zu O Sax. glītu 'I gleam, shine', akin to O Sax. glī-mo 'a gleam or sheen, a brightness'. O.H.G. wā-zu 'I blow' ground-form *uē-dō, connected with O.II.G. wā-u 'I blow' Skr. vá-ti cp. Lith. ve-d-inù 'I expose to the air, I air'. According Fick Wtb. 14 539 f., O.H.G. lazu Goth. leta 'I let', with which we have connected Gr. ληδεΐν (§ 521 p. 85), would come froma *\subseter lē*-.

- § 700. Balto-Slavonic. When Balto-Slavonic -do- comes from Idg -dh-o, and when from Idg. -do-, can only be made out by help of the cognate languages.
- (1.) -dho-. Lith. vel-du 'I rule' O.C.Sl vla-da 'I rule, hold sway', Lith skérdžiu 'I burst' instead of earlier *sker-du, Lith. ju-dù 'I move trembling' jundù 'I begin to move all a-tremble'. O.C.Sl. ra-d-str 'to meditate or reflect upon', see § 689 p. 219. Lith. gìr-d-inu gér-d-inu gìr-d-au 'I give to drink', pú-d-inu pú-d-au 'I cause to rot' Lett. pa-púde 'fallow land', see § 694 p 223. With Lith. 7-stó-d-in-ti 'to give admittance to' Lett stá-d-í-t 'to set, place, plant' stá-d-s 'a plant' we may compare Gr. στα-9-εφό-ς 'standing firmly' στα-9-μό-ς 'standing place'. O.C Sl. 1-dq 'I go' (inf. i-ti) may be closely connected with Gr. $i-9-\mu\alpha$ 'course, way, step'.
- (2.) -do-. Lith. plau-d-žiu 'I wash, purify' plu-d-žiu 'I chatter' plústu 'I begin to swim' pláu-d-in-ti 'I cause to be

rınsed' Lett. plú-d-iná-t 'I make overflow', Lıth. spráu-d-ĕnu 'I compel' sprústu 'I rush out of a narrow place', see § 690 p. 221. Lett. smaı-da 'a smile' smi-d-ıná-t 'to make laugh', see § 695 p. 224. Lith. vél-d-inu 'I cause to be milled or fulled', svil-dinu 'I cause to be singed', szau-d-ỹ-kle 'shuttle' Lett. schau-d-r-s 'hot, hasty', Lith. ve-d-inù 'I air', see § 699 p. 226.

Some of these distinctions between orig. -dh- and -d-, made by help of other languages, are naturally very little to be trusted. As -d-ina- was a very fertile suffix in both Lettic and Lithuanian, there need be no very real connexion between such endings as those of svil-dinu and Goth. svil-ta.

§ 701. (3.) In many instances it is quite impossible to distinguish between orig. -dho- and -do-.

On the doubtful points in the explanation of Lith. mel-d-žiù 'I beg' O.C.Sl. mla-dŭ 'tender', see § 690, p 220.

Lith. vér-du 'I boil' pret. vir-iaū inf. vìr-ti. mér-d-žiu and mér-d-mi 'I lie a-dying' (inf. mér-d-e-ti), from mir-ti 'to die' (Lat. morbu-s for *mor-dho-s?). Lett. e'r/chu 'I separate' for *er-d-2u (pret. e'rdu inf. e'rst), beside Lith. yr-ù 'I separate, myself, set myself free'. Lith. skél-du and skél-d-žiu 'I split, burst' intrans. (inf. skél-d-ē-ti), skél-d-in-ti 'to make or cause to be split', from skelù, i. e. *skel-qù 'I split' (inf. skél-ti).¹) Lith grimstù 'I sink' pret. grimzdaŭ inf. grimsti, beside Lett gri'mstu grimu gri'mt, points to a pres. *grem-du or *grim-du; and Lett. gi'nstu 'I perish' pret. gi'ndu inf. gi'n-t to a present *gin-du. Lith. sru-d-žiu 'I make bloody' (inf. srusti) beside pa-srùv-o 3rd sing. 'flowed'. Lith. gé-du 'I sing' and gé-d-mi (3rd sing. gésti), ep. gaïda-s 'singer' gaidỹ-s 'cock', akin to Skr. gáya-ti 'sings' gē-šnú-š gē-šna-s 'singer' (cp. Per Persson, op. cit., 117, 197).

From the series containing -dho- and -do- were formed a large class of Lith.-Lett. Causals and Frequentatives, ending in (Lith.) -d-inu inf. -d-inu, and in (Lith.) -d-au inf. -d-y-ti. Many

¹⁾ Per Persson (Wurzelerweiterung, 38) connects sheldeti with Gr. $\kappa ladd\sigma a_i$, Lat. $per\text{-}cell\bar{o}$ (§ 695 p 224) If so, its d would come from Idg. d.

of these howe been cited already With -d-mu compare Gr. $\delta a \varrho$ - ϑ - $\dot{a} \nu \omega$ beside $\ddot{\epsilon}$ - $\delta a \varrho$ - ϑ - ϑ - υ (§ 694 p. 223), $\varphi \lambda \iota$ - ϑ - $\dot{a} \nu \varepsilon \iota$ beside $\dot{\epsilon}$ - $\varphi \lambda \iota$ - $\vartheta \varepsilon$ - υ (§ 695 p. 224). The verbs in -d-au -d-y- $t\iota$, with frequentative meaning, often show a root syllable of the second strong grade (see § 790), as $sk\acute{a}l$ - $dyt\iota$ 'to split again and again' from $sk\acute{e}l$ -du 'I split myself' $sk\acute{e}l$ -dinu 'I cause to be split'.

To the same dental group belongs the partic. II. pres. act. in -dama-s, here the m-suffix is the same as in vēža-ma-s fut. vèszi-ma-s etc. (II § 72 p. 166), and had the original middle meaning. Therefore the form skél-dama-s, for example, which is now attached to the verb skelù, originally belonged to skél-du skél-d-žiu just as skél-dinu did.

O.C.Sl. ja-dą 'I ride, vehor' 1) beside inf. ja-ch-a-ti (§ 665 p. 198). 2) bądą 'fio' may be derived from \sqrt{bheu} -, by assuming *bhu-ā-dhō *bhu-ā-dō (cp. Lat. -bam for *bhu-ā-m) or *bhū-dhō *bhū-dō, which got a nasal in Class XVI (§ 637 Rem., p. 176), or even if we suppose that a present *boną for *bhu-onō (Class XIV, § 624 p. 162) was extended by -dhō or -dō (cp. Lith. kaītin-drinu 'to cause to be heated' derived from kaīt-inu 'I heat').

I. CLASSES XXVI TO XXXI.

PRESENT STEMS WITH -20-.

§ 702. This suffix appears in the forms -10--ie- or -iio-iie-. Examples of -10- are Skr. hár-ya-ti, Gr. χαίρω for
*χαρ-1ω, Goth. ναὐτκ-ja, Lith. spir-iù sé-ju O.C.Sl. sě-ja. Of
-iio-: Skr. mr-iyá-tē Gr. ἐσθ-ίω, Lat. suf-fio (for *dhu-iiō)
farc-iō, O.Ir. b-iu (for *bhu-iiō), A.S. beó (also for *bhu-iiō).
We are reminded of -no-:-nio- (§ 596 p. 138); and the same double forms reappear in the noun-suffix -io- (I § 117 pp. 109 f., § 120 pp. 111 ff., II § 63 pp. 122 ff., III § 194 p. 74)

¹⁾ For the initial, cp. Zubatý, Archiv für slav. Phil., xm 623.

The derivation of Ved yāda-māna-s yādura-s from yā- 'go' (Grassmann, Worth., s. v. yād) is extremely doubtful.

which must be the same suffix as this of the verbs (compare such stems as Skr. $p\bar{u}$ -ya-ti 'stinks' $p\bar{u}$ -ya-m 'ill-smelling discharge, matter', § 487 pp. 41 f.)

Another point in common between the two suffixes is this. In some forms of the verb-system we find a weak grade, -i-, or -ī-. Examples are. -i-, Lat. 2nd sing. cap-i-s¹) from cap-iō, O.H G 2nd sing. hev-i-s from heffu (= Goth. haf-ja), Lith. 2nd pl. tik-i-te from tik-iù; examples of -ī-, Lat 2nd sing. farc-ī-s from farc-iō, O.C Sl. 2nd sing vel-i-ši from vel-ja.²) This -ī- is not found in the present system of Aryan or Greek, and it is more than chance that these very languages have discarded the weak forms of the same sort from their declension of noun stems with -io-.

Details as to the Indicative Present will now be given.

Aryan and Greek as a rule have only -20- and -2e- interchanged, as in the other thematic classes. E. g. Skr. hár-ya-mi hár-ya-si hár-ya-ti etc, like bhár-a-mi bhár-a-si bhár-a-ti; ³) Gr. χαίρω χαίρεις χαίρει etc. like φέριο φέρεις, and so forth.

Latin keeps only -10- and -1-; e g. cap-10 -1-s -i-t -i-mus -1-tis -11-nt, farc-10 -1-s -1-t (for -1-t), parallel to farcīs is Umbr. heris vis'.

In Keltic the inflexions are not all quite clear. With -20- we have nothing but the 1st sing. (O.Ir. -lēciu) for certain; and -ī- can be shown in one or two persons (besides the isolated forms Mod Cymr imper bit bint, see § 719); thus no doubt can be felt that there once existed a series of forms with -20- ·-i-. We see -i- or -ī- in 2nd sing. imper O.Ir. lēic, 3nd pl. O.Cymr. scannhegint 'levant' nertheint 'they strengthen' (= O.Ir *nertaigit), cp. 3nd sing istlimit 'he makes known'

¹⁾ The view that cap-i-t comes from *cap-ie-ti (I § 135 p. 122) must be given up.

²⁾ Goth. vaúrkers (1st sing. vaúrkja) can hardly be compared with such forms as Lat. farcīs OCSI veliši; it is formed on the analogy of fra-varders = Skr. vartaya-si and the like (§ 781 2)

³⁾ Forms like Avest *irišinti* as contrasted with Skr. 18-ya-nti prove nothing for Idg. -1- in Avestic See Bartholomae, Handb. § 95 a Anm. 1 p. 41, and § 290 p. 126.

(O.Ir. sluindid) Mid.Cymr chwureid 'plays'. Also O.Ir. 3rd pl. -lēcet may be *-īnt- (-*īnto), and the 1st pl. -lēcem may be *-īmo(s); the 3rd sing. -lēci may be derived from *-ī-t or *-rie-t. The 1st sing. lēicim is a re-formate, like O.C.Sl. bimī Serv. hvalim (cp. scaraim carain).

The same variation, -10- -1- (see above), is seen in Germanic. But here not only the 1st sing, and 3rd pl have -20-, but the 1st pl. as well (O.H.G heffe-mēs Goth. hafja-m). We should therefore assume as the proethnic scheme in this branch, -10 -1-21 -1-di -1a-m -1-di -1a-ndi. The Gothic forms haf-11-s haf-ij-p are in all probability instead of *haf-i-s *haf-i-p, on the analogy of hafja hafjam hafjand on the one hand, and satja satjis etc. on other; this view is supported by liga ligis etc. found instead of *lig-ja *lig-1-s (cp. O.H.G. liggu ligis). 1) Thus it cannot be shewn that Germanic once had the same inflexion as Aryan and Greek.

This variation is found again in Balto-Slavonic, Lith. lėž-iù lėž-i lėž-ia lėž-ia-me lėž-ia-te like suhù sukl sùka sùku-me sùka-te, O.C.Sl. bor-ja bor-je-ši bor-je-tu bor-je-mu bor-je-te bor-jatu like bera bere-ši bere-tu bere-mu etc. Also the variation t, and here Lith has regularly -t- while Slavonic has regularly t, Lith. smird-žiu smird-i smird-i-me smird-i-te O C.Sl. smržda smržd-i-ši smržd-i-tu smržd-i-mu smržd-i-te smržd-etu (§ 637 Rem. p. 176).

Lastly, in Armenian -i- (= Idg -i- or -ī-) runs through all the persons, as xaus-i-m 'loquor' -i-s -i pl. -i-mk -ik -i-n.

In view of these facts it is likely that the parent speech had a twofold inflexion. Some of the 20-presents had -20-:-2e-analogous to the variation between -0-.-e-, and others had -20-:-\(\tilde{t}\)-. The latter was found, if we may trust the evidence of the Balto-Slavonic group, in such \(\tilde{t}\)0-verbs as had an \(\tilde{e}\)-stem as well as a \(\tilde{t}\)0-stem, as O.C.Sl. \(minja\) \(min\(\tilde{e}\)-ti; and if this be

¹⁾ The same levelling in late Old High German, ligu instead of liggu following ligis, bitu instead of bittu (Goth. bidja) following bitis (cp. Goth. us-bida).

so, $-\underline{\iota}o^{-} \cdot -\overline{\iota}$ must be assumed for Greek stems like $\mu a i \nu o - \mu a \iota$ (aor $\overline{\iota}\mu a' \nu \eta \nu$), cp. §§ 708, 727. As regards the question, which persons took $-\underline{\iota}o^{-}$ and which took $-\overline{\iota}-$, two points may be considered certain. (1) The 1st sing. had $-\underline{\iota}\bar{o}$ or $-\underline{\iota}\bar{\iota}\bar{o}$, and the 3rd pl. $-\underline{\iota}o^{-}nt(\imath)$ or $-\underline{\iota}o^{-}nt(\imath)$ (2) $-\overline{\iota}-$ was used with the 2nd and 3rd sing. and the 2nd pl, as also in the 2nd sing. imperative (Lat. cape for *capi, farc $\bar{\iota}$, O Ir. $l\bar{e}\iota c$, O.H.G. $lig\iota$) The 1st plural seems to have had $-\underline{\iota}o^{-}$. Further details may be sought below.

§ 703. There is none of the formative suffixes of the present stem which is added so often as -10- to stems which have some other suffix already Compare Skr. sn-ā-ya-tē Lat. $n\bar{o}$ (for *snā-(μ) \bar{o}) beside Skr. sn-ā-ti Lat n-ā-s, Skr. jn-ā-yá-tē O.H.G. kn-āu (ground-form *gn-ē-tō) O C.Sl. zn-a--je-t \tilde{u} (ground-form * $\hat{g}n$ - \bar{o} -je-t(u)) beside Gr. $\dot{\epsilon}$ - γv - ω -v, Lat. $tace\bar{o}$ (for $*tac-\bar{e}-\underline{\imath}\bar{o}$) Goth. $pah\acute{a}\imath-\bar{p}$ (for $*tah-\bar{e}-\underline{\imath}e-t\imath$) beside Lat. tac-ē-s O.H.G. dag-ē-s (Class X §§ 578 ff); Lesb κλίννω (for **λλι-ν-ιω) beside O Sax. hli-nō-n etc (Classes XII, XIII § 611); Skr. iš-an-yá-ti, Gr. iaivo (for *i(o)-uv-100) beside Skr iš-anu-t, Gr. ολισθ-αίνω beside ολισθ-άνω, Ο Η.G. qi-wah-annu beside Goth af-lif-na (Class XIV §§ 616 ff), Greek πτίσσω (instead of *πτινσ-μω) Lat. pins-ιο beside Lat pins-ο, Lith jùng-iu beside Lat. jung-ō (Class XVI §§ 627 ff), Skr i-š-ya-ti beside i-ša-ti, Goth. vah-s-ja beside Avest vax-ša-iti, Lith tē-s-iù beside Skr. ta-sa-tı Goth -pın-a, Skr tr-as-ya-tı Lith. tr-es-iù beside Skr ti-ása-ti Gr το-έ(σ)ω (Class XX §§ 657 ff), with which is associated the future of which we have examples in Skr. da-s--yá-ti and Lith. dů'-s-iii (§§ 747 ff), OCSl. išta (for *īsk-ia) beside iskų (Class XXIII § 677), O C Sl. ob-rešta beside -rē-tū? (Class XXIV § 687), Skr yú-dh-ya-tē beside yō-dha-ti Lith. ju-dù, Skr. rá-dh-ya-tē beside á-rā-dha-t, Gr. ἐσ-θ-ίω beside spráu-d-žiu beside Mid.H.G. sprie-ze, Lith. skél-d-žiu beside skél-du (Class XXV §§ 688 ff.).

¹⁾ I consider Lat. funt to represent the old inflexion, and not Osc. filet fi[ii] et. The Oscan form took the ending of verbs in -mi, as did consazet. Op. § 1022.

As a secondary suffix -io- originally bore the chief accent, which is usually kept in Sanskrit; $j\hat{n}\cdot\hat{a}-y\hat{a}-ti$ tr $\bar{a}-y\hat{a}-t\bar{e}$ grbh $\bar{a}-y\hat{a}-ti$ (§§ 734, 736); $i\dot{s}-an-y\hat{a}-ti$; fut $d\bar{a}-s-y\hat{a}-ti$. Thus too the intensive Skr. $d\bar{e}-di\dot{s}-y\hat{a}-t\bar{e}$ is a secondary form as contrasted with $d\dot{e}-di\dot{s}-t\bar{e}$.

This puts in the right light the present formation of later denominatives, which generally have -10-, and that too with its original chief accent; e.g. Skr namas-yá-ti arāti-yá-ti pṛtanā--yá-ti gōpā-yá-ti Gr τελέω for *τελεσ-μω etc. We thus see that denominatives had originally no special set of inflexions; their present system was the same as that of the Primary classes. Forms like 1st pl. Armen. jana-mk Gr. Aeol. τίμα-μεν Lat. plantā-mus O Ir no chara-m Goth salbō-m Lith yử sto-me were originally on the same level as Skr dr-ā-mas Gr. έ-δρ-α-μεν Lat in-trā-mus, and presents like Skr jīva-ti Lat. vīvi-t O C.Sl žive-tũ (from jī-vá-s etc.) were the same in principle as Skr. ά/a-ti Lat aqı-t. And to these such μο-forms as Skr. pṛtanā-yú-ti dēva-yú-ti Gr τīμάω φιλέω bore the same relation as Skr. trā-yá-tē to trắ-tē (trấ-sia), dēdiṣ-yá-tē to dḗdiṣ-tē etc

§ 704. So involved and so intricate are these questions, that it is practically impossible to present the history of the verbal 20-suffix in such a way that it shall be clear in every point, and all the needs of the student be met at once Such an attempt would make it necessary to treat the same material again and again from different sides; and for this we have not the space. Be it then expressly understood that the classification here given has been made with a view to giving a general grip of the subject, and many important principles have not been made so prominent as might be wished

We classify Present Stems + secondary suffix -20- (§ 703) according to the original stems; and we count as separate Present Classes (viz. nos XXVII to XXX) those in which the 20-suffix, together with the particular kind of stem it may be attacht to, has become a type for forms of some particular

kind. This is not the case with the -20- extension of present stems in -sko-, -to-, or -dho- -do-; wherefore the said stems are only mentioned in an excursus (§§ 762 ff).

Class XXVI.

Root + -10- -210- forming the Present Stem

§ 705. This Class falls into two divisions, in one of which the root-syllable, and in the other the thematic vowel carries the word accent. The root-syllable when accented has a strong grade of vowel (1st strong grade in the e-series), when unaccented is weak (A) Accent on Root-Syllable: *\(\vec{g}h\'et{e}r-\'et{e}o-\) (Skr h\'ar-ya-ti Umbr. fut heriest); (B) Accent on Thematic Vowel *\(\vec{g}h\'et{r}-\'et{2}o-\) (Gr \(\chia\'et{a}\)(\omega) Further examples of (A) are Skr. t\'an-ya-ti = Gr \(\sigma\'et{e}\)(\omega\'et{e}\), p\'ac-ya-t\'eta, m\'ad-ya-ti (also Goth. hafja O.H.G. heffu 'I lift' pr Germ. *\(\chia\'eta-\'eta-\'eta} = \text{Lat } cap-i\vec{o}?\); and of (B), Skr. mr-i\(\vec{y}\'eta-\'eta} \) d_i\(\vec{s}-\'y\'eta-t\'eta} \) tud-y\(\vec{a}-t\'eta} \(\vec{s}-\'y\'eta-ti\) (on the obliteration of this orig difference of accent in Sanskrit, see § 710). A similar double series is seen in Class II, as Skr k\'ar\'eta-a-ti and k\'eta-\'eta-ti\, and in Class XIII, as O.H.G. willu and wallu (§ 513 pp. 78 f., § 607 p. 148)

§ 706. Proethnic Idg. -- Type A, *ghér-lo-

γ gher-· Skr. hár-ya-tı 'takes pleasure in, desires', Umbr. heris 'vis' heriest fut. 'volet' Osc. heriiad 'velit' (like fakiiad 'faciat'); cp Gr. χαίρω 'I rejoice', type B. νμει- 'hide, cover'· Lat. ορ-(ν)ενιδ αρ-(ν)ενιδ (ν dropt after the labial as in piu-s for *pu-\(\bar{v}\)ο-s, suf-f\(\bar{v}\)ο -b\(\bar{o}\) -bam, see I \(\sigma\) 170 pp 149 f.),') Lith. \(\bar{u}\)\(\bar{e}\)-veriu 'I close, shut' \(\bar{a}t\)-veriu 'I open' (cp Osc. veru 'portam' Umbr verof-e 'in portam' and Lith. va\(\bar{v}\)-tai pl 'door') \(\bar{v}\) stenten-· Gr. στείνω (beside στένω) 'I groan' Aeol. τέννει στένει, βρίγεται Hesych., O.G.Sl. sten-ρ\(\alpha\) 'I groan, lament' (inf. stena-ti); the Skr. tán-ya-ti 'groans, roars' (cp. stanayıtnı'- beside tanayitnı'- 'roaring', thundering') may come from *ten-20- or

¹⁾ Another but less probable derivation of these Latin verbs is given in vol. I § 499 p 366.

*tn-10-. \(\square\text{uer}\hat{q}\)- 'work' · Gr. ερδω for ' Εργ-ζω (the Author, Gr. Gr. 2 § 59 p. 71), O.II.G. uurk-(i)u; parallel stem Idg *urg--16-, see § 707 V leug- 'lucere' Gr. λεύσσω 'I see' for *λευχ--ιω, Lith táuk-m 'I wait, wait for'. V req- 'colour, dye': Skr. rai-ya-ti 'grows coloured, reddens', Gr. ρέζω 'I colour' for *oey-10. V ghedh-: Avest. juidyetti 'prays' O Pers. jadīyamīy 'I pray', Gr θέσσεσθαι αἰτεῖν, ίνετεύειν (Hesych) for θεθ-με-ripens' pass. pac-yά-tē (see § 710), Gr. πέσσω 'I cook, soften' for *πεκ*-μω. V spek- 'spy, sce'· Skr. páš-ya-ti Avest. spas-√1ag- 'honour'. Avest. pass -yė-iti, Lat. spec-iō cōn-spiciō part. yezinna- (= Skr. yajyamāna-), Gr. mid. azouai for * $\dot{\alpha}\gamma$ -10-; cp. Skr. pass. ij-ya- $t\bar{e}$, type B. V $pl\bar{a}q$ -· Gr $\pi\lambda\dot{\gamma}\sigma\sigma\omega$ 'I strike, smite', O C Sl. plača 'I cry, lament' for *plāk-ja. Gr xow T caw for *xowy-zw, Lat. crōc-zō, Lith krok-iù krog-iù 'I rattle in the throat, grunt' Lett krázu 'I snore, croak, groan' (for $*kr\bar{u}k-\underline{u}$) 1) $\bigvee s\rho\bar{e}$ - (spo-, Lat. spa-tuu-m): Skr. sphā-ya-tē 'grows, increases' (not actually found), Lith. spë-ju 'I have leisure, room, space' O.C.Sl. spë-jq 'I have V sē- (sə-, Lat. sa-tu-s) successful issue'. Goth. sara O C.Sl. $s\check{e}$ -/q 'I sow' $\sqrt{d\bar{v}}$ - ($d\bar{v}$ -, Lat. du-tu-s) 'give'. Skr. mid. \bar{a} -dāya-māna-s, O C.Sl. da-ja, variant stem Skr. pass d \bar{i} -yá-tē, type B. V stā- (stə-, Lat sta-tiō) 'stare'. Avest. ā-stāyā 'I place myself' O.Pers. niy-aštāya 'he commanded', Lat. stō for *stā-1ō Umbr. stahu 'sto', O Ir. -tau -tō 'I am' 2nd sing -tai, Lith stó--ju-s 'I place myself, take my place' O.C.Sl. sta-ja 'I place myself'; following type B we have the parallel stems Skr. pass. sthī-ya-tē, O C.Sl. sto-ja 'I stand', and probably O.H.G. stēt (§ 708); cp. § 505 p. 71, § 584 Rem. p. 126.
√bhā- (bha-, Gr. $q\alpha-\mu \hat{\epsilon}\nu$) 'cause to appear, make public, make known': Lat. for for * $f\bar{a}$ -(χ) \bar{o} -r, Lith. $b\acute{o}$ - γu 'I ask after, consider' O.C.Sl. ba-ja 'fabulor'; still, these verbs may he derived from *bh-a-io

¹⁾ Why, Idg. $\bar{\sigma}$ in Lith.-Lett. becomes sometimes \bar{u} and sometimes \bar{u} (Lith. $\bar{\sigma}$) is unknown.

(cp. Skr. pass $bh\bar{a}$ -ya- $t\bar{e}$, not found in our texts), and their structure be the same as *tr- \bar{a} - $\bar{z}\bar{o}$ (§ 735), compare § 495 p. 55.

§ 707. Type B *ĝhṛ-ẓó-.

V mer- 'die' *mr-110- and 'mr-10- Skr. mr-144-te Avest. mere-ye-ut, Lat. mor-10r (I § 120 p. 112), cp. below *bhy-120-*bhu-20-. V der- 'tear, flay. Skr. dīr-yá-tē for *dī-je-, Lith. dir-iù; type A, Gr. δείοω Lesb. δέοοω. V sper-: Gr. σπαίρω 'I pant, struggle', Lith. spir-iù 'I strike with my foot, kick'. V sqel-. Gr. σνάλλω 'I scrape, hack' for *σκαλ-ζω, Lith skilù (for *skil-zù) 'I strike a light, kindle'. / men- 'think of, meditate': Gr. μαίνομαι 'I am wild, enravished, mad', O.Ir. do mumur 'I think or believe' (for *man-io- *mn-io-), O C.Sl. min-ja 'I think'; to either (A) or (B) may belong Skr. mánya-tē 'thinks' Avest 1st sing man-ya O.Pers. 2nd sing. conj. maniyāhy (I § 125 p 116). V ghen-: Skr han-yá-tē 'is struck' instead of *ghan-yá-tē (I § 454 Rem. p 335), O.C Sl. žīn-ja 'I cut off, reap', of type A from this root we have Gr 9 slvw. V gem- 'go'. Skr. -gam-yá-tē, Gr. βαίνω, Lat ven-ιō (I § 204 p. 170, § 208 p. 174), ventō might also if we wished be classed as an example of type A. V bhey- 'become, be' *bhu-120- and *bhu-120- (so above we had *mr-110- and *mr-10-): Gr. * $\varphi(F)$ -l ω implied by $\varphi \tilde{\imath} - \tau v$ (§ 713), Lat. $f \bar{\imath} \bar{o}$ instead of * $f(\underline{u})$ - $\imath \bar{v}$ with $\bar{\imath}$ following $f \bar{\imath} s$ etc. (§ 717), O.Ir. b- $\imath u$, A.S. b- $e \acute{o}$ (cp. § 722),1) Skr. pass. -bhū-yu-tē, Gr. Lesb. φνίω (on Ion. Att. $\phi \dot{v}\omega \phi \dot{v}\omega$ see § 523 p. 87, § 527 Rem. 2 pp. 90 f), from the same root come Lat. fī-lui-s and Alban. bin 'I bud' (see G. Meyer, Alban Stud. III 33, who however, as I think wrongly, assumes bhī- as a variant 'root' as well as bhū-) / dheu- 'shake, stir

¹⁾ A different explanation of these verbs is given by Bartholomae, Stud. idg. Spr, II 189 ff, where we see *bhuīzō *bhuīzɔ *bhuūz 18rd pl *bhuūzonts given as the proethnic forms. This does not agree either with the t of A.S. and O.H.G. bis (§ 722), nor with the t of Lith. bi-ti -bi-me eto (§ 727); obviously the relation of Lith. -bi-me and O.C.Sl. bi-mū is the same as that of smirdi-me and smrīdi-mū.

up': Lat suf-fiō for *-fu-iō, Skr pass. dhū-yá-tē 'is shaken', Gr Lesb 9viw 'I storm, roar' (9tim 9tim like otim gim, see above), O.Icel. $d\bar{y}$ 'I shake' (inf $d\bar{y}$ -ja). $\sqrt{qe_{\bar{x}}}$ -: Skr. $c\bar{\imath}$ -ya- $t\bar{e}$ is tried, respected, connected probably with Gr. 7tw I pay (parallel form τίω, cp. § 527 Rem. 2 pp. 90 f.), Arcad, τείω either for *\tau_{\ell_1 \in \ell_2} (A), or more probably an ad-formate of τείσω ἐτεισα. Skr. kšī-yá-tē 'is destroyed' kšt-ya-tē 'exhausts itself, disappears', from the same root is probably Gr. Hom. qθίω 'I am destroyed'. Skr. pi-ya-tı 'abuses, thinks little of', partic Goth figands OHG. fient (foe'). 'work'· Avest. 1e1 ez-ye-1t1, Gr. ὁέζω instead of *Fράζω *Fραγ-10 (I § 299 p 238), Goth vaúrk-ja; Gr. ἔοδω O.H G. wirk(i)u are of type A, § 706 p. 234. \bigvee gherd- (Lith. gerdu-s 'cry, message, news', Pruss. po-gerdaut 'to say') Gr. φούζω 'I give to understand, announce', Lith. gird-žiù 'I apprehend, hear', ground-form 'ahrd-10 \square ahredh- (Goth gridi- 'step, grade'): Skr. qfdh-ya-ti 'steps swiftly towards something', Lat. grad-io-r (cp. Osthoff, M. U. v p. III) V leig- 'linquere'· Skr. ric-ya-tē and pass. ric-yá-tē, Gr. λίσσωμεν ἐάσσωμεν Hesych.; cp. p 129 with the footnote about Latin licet. Skr. chid-yá-tē 'is cut off', Gr. σχίζω 'I split' for *σχιδ-ζω. Skr. kup-ya-tı 'gets ın motion, gets excited', Lat. cup-iō, O.C.Sl. kyplją 'I flow in waves, boil' for *kyp-ją. Gr. *φύζω 'I flee', implied by Hom. πεφυζότες (Curt. Verb 12 327), Lat. fug-iō. Skr. śúż-ya-ti 'dries up, withers' (tr), OCSI sŭšą 'I dry' (mtr.) for *sŭch-ia (mf sŭcha-ti), of type A we have Lath. saus-iù 'I dry' (intr.).

Gr. $r \sigma \sigma \sigma \delta \omega$ 'I patch' for $r \sigma \tau \sigma \tau \sigma \tau \sigma \tau \omega$, Goth. s u - j a 'I sew', Lett. s c h u - j a O.C.Sl. $s u \neq j a$ for $r \sigma \tau \omega$ 'I sew' (I § 60 p. 47, § 131 p. 118, § 143 p. 128, § 147 p. 132), Skr. $s \tau \sigma \tau \omega$ 'I spit, spew' for $r \sigma \tau \omega$ (I § 131 p. 119), O.Icel. $s \tau \sigma \omega$ 'I spit, spew' (unf. $s \tau \sigma \tau \omega$) for $r \sigma \tau \omega$ (I § 131 p. 119), O.Icel. $s \tau \sigma \omega$ 'I spit, spew' (unf. $s \tau \sigma \tau \omega$) for $r \sigma \tau \omega$ (Skr. $s \tau \sigma \tau \omega$) for $r \sigma \tau \omega$ (Skr. $s \tau \sigma \tau \omega$), instead of $r \sigma \tau \omega$), instead of $r \sigma \tau \omega$ (s came from forms like $r \sigma \tau \omega$), instead of $r \sigma \tau \omega$ (s came from forms like $r \sigma \tau \omega$). Bartholomae,

Ar. Forsch. III 34); 1) of type A, Lith. spiáu-ju O.C.Sl plju-ja (I § 147 p 132); Goth. speiva is either for *spīņō parallel to Skr. šthīv-a-ti, or for *spieu-ō parallel to Lith. spiáu-ju (so Streitberg, Idg. Forsch. I 513 f.).

Remark. On these roots with the variants $2\bar{u}$ and $\bar{\imath}y$, see Bartholomae $loc.\ cit$, Kretschmer in Kuhn's Ztschr xxxi 386, Per Persson's Wurzelerweiterung 154 ff. As regards the variants *szū-zō and *szū-zō, *spzū-zō and *szū-zō, it seems most likely that the ending -īy-zō is due to the analogy of those forms where -īy- preceded some sonant; to take an example, Skr. *thīvya-ti being modelled after the fashion of *thīva-ti *thīvita-s, and sīvya-ti following sīvaya-ti sīvana-m; so also dīvya-ti (beside dyū-tá-s) follows -dīvan- dīvana-m etc. (cp Osthoff, M. U. IV 317), vice versa, Lith. siūv-ù instead of *sīy-ō is due to the analogy of siú-ti etc.

V dhē- (dhə-, cp. Lat. ad-fa-tim) 'suck' *dhə-iō: Skr. dhā-ya-ti 'sucks' (I § 109 p. 161), Goth. da-ddja 'I suckle' (I § 142 p. 127), O.C.Sl. do-γa 'I suckle', parallel forms of type A are O.H.G. tāu 'I suckle' Lett. dé-yu 'I suck' common ground-form *dhē-iō, cp. Skr. dhā-yú-š 'thırsty'. V dē- (də-) 'bind': Skr. d-ya-tı, Gr. δέω for *δε-Lω instead of *δα-Lω, as δε-τό-Lς for *δα-το-L = Skr. dι-tá-s. V stā- (stə-) 'stare': Skr. pass. sthī-ya-tē instead of *stha-ya-tē (§ 498 p. 61), O.C.Sl. sto-ງa 'I stand', probably also O.H.G. stēt (§ 708 p. 240); parallel L-forms, Avest. L-stā-yā etc., § 706 p. 234.

With some roots ending in a vowel, the 2 of the present stem, being regarded as the root-final, was allowed to spread through other tenses. Side by side with Skr. d-yά-ti 'divides' (fut. dā-sya-ti etc.) is the bye-form dά-ya-tē, i. e. *dɔ-ye-(I § 109 a. p. 101), whence by analogy dayı-ta-s day-aya-ti; so too we notice chu-ya-ti chayı-tvā chāy-aya-ti beside ch-ya-ti 'cuts up' (partic. chā-ta-s) The pr Greek form which answered to dá-ya-tē, to wit, *δα-μω, regarded as made up thus *δαμ-ω, served as the starting point for δαί-σω δαι-τρό-ς δαί-νō-μι, and from these again we get δαί-ομαι, which became associated in

¹⁾ Why Sanskrit has -t-, and not -p- like the rest, is unknown. This may be one of those pairs of doublets, such as Skr. skambh- and stambh- 'support', which cannot be regularly derived from a single original form.

one group with δάσσομαι δάσσασθαι. δα-ί-ο-μαι may be compared with the Lith $gu-i-j\hat{u}$ 'I hunt' from $gu-j\hat{u}$ ($guja\tilde{u}$) = Lett qu-ju (bye-forms Lett gû-nu Lith. gáu-nu, § 615 p. 153) sprang gul-suu gul-ti, from these again come the presents qui-jù and qui-nù Similarly we find Lith. part. pret séj-ēs jój-ēs from sé-ju jó-ju (séjau jójau). The principle here exemplified throws light on such forms as Skr. dhē-nú-š 'milking' beside Skr. dhá-ya-ti O.H.G tāu. Compare Per Persson's further remarks on this matter, Wurzelerweiterung pp. 115 ff.

Pairs of forms like Skr. $d-y\acute{a}-ti:d\acute{a}-ya-t\bar{e}$ recal the two forms of the 1e-optative, seen for example in Idg *dh-1e-t and *dhə-ie-t, § 939.

§ 708. A special class of verbs comprises those which have -ē- as parallel suffix to -20-. Sometimes the -ē- is found only outside the present stem; sometimes both -ē- and -10- are found in the present, in which case -ē-jo- occasionally takes the place of -ē-. The -20- in Balto-Slavonic has regularly the ablaut -ž-; and I have already conjectured (§ 702 p. 230) that this ablaut is proethnic in this very class.

-10- in the present with -e- outside the present stem is seen in Greek and Balto-Slavonic. Take as examples: Gr. μαίνομαι, ε-μάνη-ν μεμανη-ώς μεμάνη-μαι μανή-σομαι, O.C.Sl. minją, minė minė-vu minė-chu (Lith. mine minė-siu, on the pres. menù see below). χαίρω, έ-χάρη-ν λεχαρη-ώς κεχαρή-σω. ναίω (*κα-Γιω) ε-κάη-ν. Lith. smìrdžiu smirdě-ti O.C Sl. smrīžda smrīdē-ti 'to stink'. In Slavonic, beside govlja govē-ti 'venerari, vereri' (: Lat. favēre) we see also govēja, a later re-formate.

In Germanic we have the much discussed class of which one is Gothic haban 'to have' (the 3rd Weak Conjugation).1)

¹⁾ See Sievers, P.-B. Beitr. viii 90 ff.; Mahlow, Lang. Voc. A, E, O, pp. 12 f., 19 ff., and 148 f.; Kögel in P-B. B ix 504 ff.; Bremer, ibid. XI 46 ff.; Kluge, in Paul's Grundriss I 379 f; Streitberg, Germ Comp auf -oz-, in the University Calendar of Freiburg in Switzerland, 1890,

Its connexion with the Balt.-Slav zo: ē-class is shown by such forms as O.II G. dolēm. Lith. tylěti, O.H.G. lebēm. O.C.Sl. -līpēti (Gr. ἀλιφῆ-ναι), Goth. muna munáis: Lith. mině-ti O.C.Sl. mǐně-ti (Gr. μανῆ-ναι), Goth. vita vitáis: Lith. pa-vyděti O.C.Sl vidě-ti zo-structure is seen in forms like O.Sax. 1st sing. hebbiu libbiu pl hebbiad libbiad A.S. hæbbe libbe, libbiu = O.C.Sl. -līplją. Then we find -ē- in such as O.H.G. habē-m habē-s etc., and -ē- + -zo- in Goth. 2nd sing habái-s 3rd sing. 2nd pl. -ái-p (I § 142 p. 126).

Besides these, we find in Germanic other forms which an impartial critic cannot but regard as forms of our Class II; such, for example, are Goth. 1st sing. haba 1st pl habam 3rd pl. haband, O.H.G. habu A.S hafu 1) It is true that the West-Germanic forms could easily be explained as due to the analogy of other verbal forms; but the Gothic ones are incomprehensible if so regarded 2) Now in Balto-Slavonic and Greek, forms of Class II are found associated with e-forms, as Lith. menù minëti as contrasted with OCSI minja minëti, O.C.Sl. part. vidomü beside vidimü from viděti, Gr. έθέλω έθελήσω (§ 727) — compare Umbr neiřhabas 'ne adhibeant' beside habe 'habet' habetu 'habeto' Another explanation is therefore possible, and to my mind more likely to be true. It is possible that in Germanic as well, some of the verbs in question had this form of the present stem, and that this o-type was made the rule for all verbs in Gothic. case, the relation of Goth. haba (OHG. habu) and O.Sax.

pp. 15 f., 18 ff., and 32; Sievers, in Paul Braune and Sievers' Beitr. xvi 257 ff; Bartholomae, Stud. idg Spr II 143 ff Hirt, Idg. Forsch I 204; Streitberg, Zur Germ Sprachgeschichte, pp. 73 ff

¹⁾ The 2nd and 3rd sing O.H.G. hebis hebit may be examples either of o-flexion or of 10-flexion. It is quite certain that hebita and ge-hebit are the latter.

²⁾ O.H.G. habu A.S. hafu may be instead of (O.Sax.) hebbiu, as O.H.G. ligu instead of ligg(i)u following ligis etc. On the other hand, we have no right at all to put Goth. haba on the same level as liga instead of *ligga following ligis etc.

hebbin might be compared with O.C.Sl. vidomü and vidimü, or with Lith. 3rd sing. smìrda and smìrdi. There is yet another possibility. With Streitberg, we may derive hab-and from *-ēndi,¹) and assume that haba habam were formed on the analogy of baira bairam. bairand. There is nothing at all to be said for Hirt's conjecture that 1st sing haba comes from *-ē-m, with secondary personal ending

That pr. Germanic also knew the inflexion with $-\bar{e}-+-io$ -seems to follow from O.H.G $r\bar{e}r\bar{e}m$ 'I bellow, bleat, roar', this word is akin to Lith. $r\bar{e}-ju$, and points to pr. Germ. * $ra_2-r\bar{e}-io$ (§ 741). Compare further § 548 p. 105, on Goth. rei-ra 'I tremble, quake' 2^{nd} sing. rei-rai-s, which is connected with Skr. $l\bar{e}-lay-a-ti$.

In this group falls also O.H.G. stēm stām 'I stand', which varies between \bar{a} and \bar{e} in all its persons. This must be due to an original series in which some persons had only \bar{e} and others only \bar{a} . \bar{a} comes from pr. Germ. \bar{e} , but \bar{e} , as the A.S. and O.Fris. ā shows, comes from pr. Germ. ai. The verb is intimately connected with O.C.Sl. stoja stoja-ti (for *stojě-ti), in whose present stem stoji- (2nd sing. stoji-ši etc.) = Idg. sto--zī-, the z is as regular as in ladz-ji Lith. mõ-ji-s and the like (vol II p. 122 footnote 2); compare Skr. pass. sthī-ya-tē instead of *stha-ya-tē (§ 707 p. 237, § 709). The *stojě- of the infinitive stem cannot be original, because this suffix -ēwhich we are now treating was added to the Root (in its weak grade), not to the present stem *stoje- is then doubtless a contamination of *st-e- and *sto-jī- (similarly la-ja la-ja-ti to bark, give tongue' as constrasted with orig. Lith. 16-ju 16-ti, and Gr χαιρήσω έχαίρησα as contrasted with χαίρω, instead of *χαρ-ιω, έχάρην, χαρησούμαι, and κεχάρημαι). The two stems, *stə-zo- and *st-ē-, are combined in the West Germanic present scheme, which before levelling ran something like stām stēs stēt stāmēs stēt stānt (see Bremer, as cited, p. 43), 1. e. *st-ē-mi

¹⁾ In view of vind-s for *uē-nto-s, Streitberg assumes that ē becomes a only in syllables not bearing the chief accent (p. 18).

*sta-u-zi etc stām stāmēs stānt run parallel to habēm habēmēs habēnt, and stēs stēt to hevis herit (1st sing. heffu).

The verb $g\bar{a}m$ $g\bar{e}m$ 'I go' is the exact counterpart of $st\bar{a}m$ $st\bar{e}m$ in every respect. As to the origin of this verb many different theories have been set forth. If our explanation of $st\bar{a}m$ $st\bar{e}m$ is right, it is advisable to link $g\bar{a}m$ $g\bar{e}m$ with Skr. $ja-h\bar{a}-ti$ 'deserts, gives up' pl. ja-hi-mas aor. $a-h\bar{a}-t$, $ji-h\bar{i}-t\bar{e}$ 'goes, yields', in which case we must assume the stems $*\hat{g}ha-2o-*\hat{g}ha-2\bar{i}-$ and $*\hat{g}h-\bar{e}-$. The latter stem reappears in Gr. $xi-y-\eta-\mu u$ $zi-\chi-\eta-\mu uv$, if this verb belongs to the same root (§ 594 p. 135).

In Latin, the whole present scheme has e-, and the 1st sing., but this person only, has -10- in addition video for *-ē-1ō, 2nd sing. vidē-s etc. Lith. pa-výdžiu -vydé-ti Goth. vita vitái-þ. Compare further rubeō: O.C.Sl. ruždą rudě-ti, and valeo: Lith galù galëti, and so forth, § 590 p. 132 likewise had at one time forms with -20- (and without -ē-) in this group of verbs; this we see from Osc stait 'stat' stahint These imply a stem * $sta-\bar{e}-1$), 'stant' Umbr. stahitu 'stato' which must be regarded as for *stay-ē- and compared with O.C.Sl stoja-ti; that is, it is a contamination of *sto-20- and *st- \bar{e} -. Again, the c of licet beside linguo may perhaps justify our assuming an earlier *liciō for *licy-zō (Skr. ricya-tē Gr. λίσσωμεν), see p. 129 footnote. The o-present Umbr. -habas 'habeas' beside habe 'habet' has been spoken of already (pages 239 f.).

What conclusion is to be drawn from a comparison of the Greek and Balto-Slavonic with Germanic and Italic? It is natural to suppose that the two former divide -20- and -ē-amongst their forms more nearly as the original language did; an I that the latter came to have ē-forms in their present on account of their final confusion of Imperfect-Present with Aorist-Present, and the loss of the augmented preterite as an independent tense. Lat vidē-s vidē-tis may be called injunctive,

¹⁾ For the proof that Osc i must be orig. \bar{c} , and not orig. \bar{i} , I have to thank my pupil G. Bronisch.

and compared immediately with Lith. mine mine-te $(\hat{\epsilon})\mu\dot{\alpha}\nu\eta - \epsilon$, $(\hat{\epsilon})\mu\dot{\alpha}\nu\eta - \tau\epsilon$, the imperative $vid\bar{c}$ may be compared immediately with mine-k, which stood to mine just as du'-k to Skr á-dā-t; and the only difference between O.H.G. habēm habes etc., or Lat, videt vident, and these Lithuanian and Greek preterites is that they have the primary personal endings. Compare too Lat. tagit beside tangit, and others of the kind (§ 583 p 125), compare too dat with preterite sense (Veg. Acn. 1 79, 1x 266, x1 172) like -bat (§ 505 p 71 with footnote 2) This state of things was partly due to the analogy of e-verbs with non-syllabic root; these carried the e-suffix right through the verb, for example, Lat. -pleo for *pl-e-lo -plēs (Skr prá-si á-prā-t Gr. πλη-το), Goth vaia for *μ-ē-ļō (O.C.Sl. vě-1a, Skr vá-tr Gr äη-σι) If in these the present and preterite both had originally \bar{e} , the connexion of the two would be very close when the preterite ceased to form a distinct category, it would then be quite natural for e-verbs with syllabic root to run the ē right through the present, and, given Lat. vidērem (cp O C Sl. viděchů Lith pa-vidésiu Gr Dor lδησω, § 813) and Lat vidē-bam vidē-bo, to form a present video vides etc on the analogy of -pleo beside -plerem ple--bam -b \bar{o} , or suppose we say, quite natural for existing injunctive forms such as vidēs vidētis to be treated as if they were the same in character as -ples -pletis, and used for the present, soon to be followed up by video videt etc. which filled the gaps in the system. This levelling and filling up of the gaps was completed in Latin by the beginning of the historical period, but in Germanic it never was completed at all. In Germanic all monosyllabic \bar{e} -stems, except two which crystallised. were absorbed by the 10- conjugation (§ 592); so the action of this principle can be clearly seen only with forms which contain $-\bar{e}-+$ -20-, as Goth. vitáis vitái \bar{p} The reason why Gothic chose to replace *vitura *vitaiam *vitaiand by vita vitain vitand to complete the tense lay in the number of syllables in these words

Thus O.Sax. libbiu libda is a verb like Goth. vaurkja

vairhta (§ 722) The reason why we find in parallel use O.H.G. lebēt and Goth libár \bar{p} etc. is simply that in these languages there once was a non-present stem *lip-ē-, but no such \bar{e} -stem was ever connected with vairhjan

We need not be surprised that it was io-stems that became joined with \bar{e} -stems in one verbal system. Both these suffixes have at all periods been used by preference in making forms with intransitive meaning. Observe how io is so used in the Aryan ya-passive (§ 710), and \bar{e} in the Greek agrist passive with η (§ 589 p. 130).

Lastly, I must foreguard against a misconception. In contrasting io as a present suffix with ē in non-present stems, I must not be understood to mean that all non-present forms originally had -ē-. We have in Greek γέκανμαι καντό-ς beside καίω · ἐγάην καήσομαι, μανοῦμαι μέμηνα beside μαίνομαι: ἐμάνην μεμάνημαι; so in Latin, ντιστ ντισ-s beside νισεο, habun habitu-s beside habeō, in Germanic pret O.Sax. habda O.H.G. hapta O.Icel. hafāa partic hafār beside O.Sax. hebbur O.H.G. habēm etc. How this ē managed to spread in non-present stems (as καήσομαι beside γαίσω, μεμανηώς beside μέμηνα, O.H.G. habēta beside hapta), is a question which need not concern us here.

Remark In § 583, page 125, we assumed an \bar{a} -aorist beside the \bar{e} -aorist, and explained $-\bar{a}$ - in Lat occupare on the same principle as $-\bar{e}$ -in vidēre. It is particularly easy to see resemblance between vidēre and arāre. arō arās, arārem OCSI orją orachi = videō vidēs, vidērem·OCSI viždą vidēchi

§ 709. Aryan Type A. -ye-iti 'gocs, gets somewhere' ∨ ped- Skr mád-ya-ti 'enjoys itself, carouses' beside 2nd sing mát-si Class I

Type B Skr. mr- $iy\acute{a}$ - $t\ddot{e}$ Avest mr^e -ye-it (it is uncertain how we should read the O Pers 3rd sing. pret. whether as a mariyatā = Idg 'e-mr- $iy\acute{e}$ -to or as a mriyatā = Idg. 'e-mr- $iy\acute{e}$ -to, see I § 289 p. 231), Skr. $d\bar{i}r$ - $y\acute{a}$ - $t\bar{e}$, han- $y\acute{a}$ - $t\bar{e}$, -gam- $y\acute{a}$ - $t\bar{e}$, $-bh\bar{u}$ -ya- $t\bar{e}$, $dh\bar{u}$ - $y\acute{a}$ - $t\bar{e}$, $c\bar{i}$ -ya- $t\bar{e}$, $k\check{s}\bar{i}$ - $y\acute{a}$ - $t\bar{e}$ $k\check{s}\acute{t}$ -ya- $t\bar{e}$, $p\acute{t}$ -ya-ti, Avest. ver^ez -ye-it, Skr $g\acute{t}$ dh-ya-ti, ric- $y\acute{a}$ - $t\bar{e}$ ric-ya- $t\bar{e}$, chid- $y\acute{a}$ - $t\bar{e}$, kup-ya-ti, $s\acute{u}$ s̄-ya-ti, $s\acute{t}v$ -ya-ti, $s\acute{t}h\bar{v}$ -ya-ti, $dh\acute{a}$ -ya-ti, dya-ti 'binds', $sth\bar{v}$ -ya- $t\bar{e}$, d- $y\acute{a}$ -ti 'divides' $d\acute{u}$ -ya- $t\bar{e}$, see § 707 pp. 235 ff.

Other, forms which have not the passive meaning. Skr jîr-ya-ti jūr-ya-ti 'falls into decay' beside jār-a-ti Class II A and jūr-ā-ti Class II B dām-yu-ti 'tames, conquers' for *d\overline{n}-\verline{t}e^{-\verline{t}}. tām-ya-ti 'grows stupefied, faint' for *t\overline{n}-\verline{e}-\verline{t}i m\verline{r}-ya-t\verline{e}' grows less'. p\verline{u}-ya-ti 'stinks' \verline{j}-ya-ti 'rushes on' \(h\verline{s}-ya-ti 'is \) excited, or happy'. Avest pe\verline{s}\verline{e}\verline{t}i they fight' pr Ar. *p\verline{t}-\verline{i}a-nti (I \verline{s} 260 p. 212). Skr \(d\verline{u}\text{i}\text{u}-ya-ti 'tries to hurt'. \) Avest part. \(d\verline{u}\text{i}\text{u}\text{i}\text{n}\text{g}, \) deceiving' O Pers. \(ad\verline{u}\verline{u}\text{v}\text{u}\text{s}-ye-iti 'shows, teaches'. Skr. \(\verline{s}-ya-ti '\text{whets}, \) Avest \(s-ye-iti '\text{cuts}, \) \(\verline{\lambda}\verline{\lambda}\text{v}\lambda\verline{\lambda}\text{v}\lambda\verline{\lambda}\text{v}\lambda\verline{\lambda}\text{v}\lambda\verline{\lambda}\text{v}\lambda\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lambda}\text{v}\verline{\lam

§ 710. As a general rule, passive forms in Sanskrit accent -20-, and non-passive forms the root. But this difference in accent had originally nothing to do with active or passive. It depended upon the grade of the root, strong or weak as the case might be. A few forms which are not passive still accent the suffix, as \$\frac{s}{2}\phi-ti\) mr-iy\(\delta-t\bar{e}\), which is a relic of the former state of things. The retraction of accent in \$dh\(\delta-ya-ti\) (earlier \$^{\frac{s}{2}}dh^{\frac{s}{2}}-\frac{ti}{e}\) d\(\delta-ya-t\bar{e}\) (instead of \$^{\frac{s}{2}}-\frac{ti}{e}\) d\(\delta-ya-t\bar{e}\) (instead of \$^{\frac{s}{2}}-\frac{ti}{e}\) by the evidence of Avest \$\text{pe\symmetry}einti, \sqrt{709}\$ (I \sqrt{260} pp. 212 f.), may be compared with the retraction in \$d\(\delta-ya-ti\) g\(\delta-cha-ti\) and the like (\sqrt{516} p 82)

The reason why the Middle of this particular present class became a Passive system in Aryan, is that the greater number of the verbs in it were intransitive; so in Greek a passive system grew out of an intransitive, I mean the passive agrist in $-\eta \nu$, § 589 pp 129 f But not all the forms of the group can be called passive. To $mr-vy\acute{a}-t\bar{e}$ 'dies', for instance, the term cannot be applied, nor can it to all agrists in $-\eta \nu$, $\xi \rho \rho v \dot{\gamma}$ 'flowed' for example

So constant a mark of the passive did an accentuated -yá-become, that the intransitive $p\acute{a}c-ya-t\bar{e}$ ric-ya-tē were turned into passives by accenting them $pac-y\acute{a}-t\bar{e}$ ric-yá-tē, and the language even tolerated $smar-y\acute{a}-t\bar{e}$, despite its strong root (cp. $h\acute{a}r-ya-t\acute{i}$).

In Sanskrit, as in the two Iranian languages, passive forms occur with active personal endings, as well as middle; e. g. Skr. epic drś-ya-ti 'is seen' (Holtzmann, Gramm. aus dem MBh., 25 f.), Avest. xwar-ye-iti 'is eaten'. It is impossible to understand the forms till we know their accentuation.

Remark It is sometimes said that the intractive dáhyati 'burns up' as compared with the pass. dahyátē 'is burnt', since both practically mean the same thing, was the origin of the active forms with passive meaning, dršyati and the like. This we could only venture to say if we knew for certain that the word was accented dršyati.

§ 711. Armenian. Verbs in -im, which originally had middle or passive meaning. xausim 'loquor', erevim 'I appear'. This i-suffix was put to the same use as -yi- in Sanskrit, for making the passive conjugation. Each active verb in -em became middle or passive by the simple change of e to i. This often resulted in i being added to stems which had already some other present sign e. g. arni-m 'I am made, I become' from ar-ne-m 'I make' The endings -anim and -anem are used side by side, as in Greek -aivw beside -aivw, thus mer-ani-m 'I die' (aor. mer-ay) like Gr. µaqaivw 'I wear away, destroy'

Remark. $\pi \lambda \epsilon i \omega$ $\chi \epsilon i \omega$ and the like, found in the text of Homer and Hesiod (Curtius, Verb I² 304 f), can be explained $\pi \lambda \epsilon f_{-k}\omega$ (Lith. $pld\dot{u}$ -ju) and so forth. But there is practically no objection to regarding them, as many scholars do, as corruptions for Aeolic forms of Class II, $\pi \lambda \epsilon \dot{v}\omega = \pi \lambda \epsilon f_{-\omega}$.

§ 718. Τype B. χαίρω, σπαίρω, σκάλλω, μαίνομαι, βαίνω, θνίω, τίω, $q \vartheta$ ίω, *ἑάζω I do', φράζω, λίσδωμεν, σχίζω, πεφυζότες, κασσύω, πτύω, δέω, δαίω 'I divide', see §§ 706 f. pp. 233 ff. $φ \vartheta$ αίρω, αἴρω, κταίνω, see § 712. βάλλω 'I throw' for *βαλ-μ *gl-iō, μ gel-. καίνω 'I kill' probably for *καμ-μω, compare καμόντες 'the dead' (then εκανον got μ from the present). Skr.

śam-ya-tı 'becomes still, is extinguisht' for *km-le-tı (xaivi) differently explained by Kretschmer, Kuhn's Zeitschr. xxxI 428, 432, Fick, 14 43) πτύρω 'I make shy', cp Lat. con--ster-nā-re, σύρω 'I drag' cp σαίρω 'I sweep' (with ri), σεύλλω 'I tear to pieces, towse, worry' op Lith. skelû (*skel-jû) 'I split', the v of this form needs explanation. Sim I beseech, fly, fear' doubtless for *\$\displant{\text{to}} \cdot \text{Skr} \ d\ti-ya-ti \text{flies}, \text{ of type } \text{\text{\$A\$}, \text{ Lett.}} dér-ju 'I dance' (inf. di-t); the forms diere dierai and such like were associated with "ere "era, and this caused the formation of dr-discar disual and others by analogy of the parts of Inju. $\varphi \rho \alpha \sigma \sigma \omega$ 'I enclose' for * $\varphi \rho \alpha z - i \omega$ Lat $f \alpha r c - i \bar{\sigma}$ with $\alpha r = \bar{r}$, connected with frequences μάσσω 'I press, knead' ground-form *mrag-io \(\sigma \) meng-, op the forms, belonging to Class XXXII, O C Sl męćą (2nd sing. męči-śi) 'I soften' (inf męči-ti) Lith. minhau 'I knead' inf minky-ti). σεάζω 'I limp' ground-form *saraq-iō, akın to Skr khánj-a-ti 'limps'. riçw 'I wash' groundform *nig-jō Skr. pass nij-ya-tē στίζω 'I prick, pierce' for *στιγ-ιω: O H.G stirch(i)u 'I stitch' (§ 722). λίσσομαι 'I pray' for $\lambda \iota \tau - \iota \sigma - \mu \alpha \iota$, ep $\lambda \iota \tau - \dot{\epsilon} - \sigma \vartheta \alpha \iota$, Class II B $\sim r \dot{\iota} \zeta \omega$ '1 scratch, prick, stir up' for *xvið-101, beside O lcel. hnīt 'I knock against, hurt with a knock Class II A. δονόσοω 'I dig' for *δον/-ιω: Lith rauk-iù 'I wrinkle', (A). απο-μύττω 'I blow my nose' for *μυκ-μω: Skr. pass. muc-yá-tē 'is set free', Lith mauk-ιὰ 'I scratch slightly, touch softly', type A

The theory that $\delta\zeta\omega$ 'I swell', for $*\delta\partial_{-l}\omega$, does not belong to type A, is doubtful, in spite of an appeal to Lith. &'d-&iu 'I smell'; it is also uncertain to which section belongs $\delta\sigma\sigma\sigma\omega\omega$ 'I see', for $*\sigma q$ - 2σ - (cp I § 319 p. 258). It is risky to connect $\delta\sigma\sigma\omega\omega\omega$ with Goth. ah-ja 'I believe, surmise'.

Forms with Idg -120-. $t\delta$ - $l\omega$ 'I sweat' is usually connected directly with Skr svid-ya-ti O.H.G. sivizzu If that is so, $\xi\xi$ - $t\delta t\sigma \omega$ is due to the analogy of denominatives in -1-20- and $t\delta t\omega$ (Aristoph.) is a reformate like $sovt\omega$ (§ 775) $t\delta \sigma \theta$ - $t\omega$ beside $t\delta \sigma \theta \omega$ 'esse' for *td + $td \sigma$, cp. § 694 p 22.3, § 765. A form * $t\omega$ = Idg. * $td \omega$ - $t\omega$ follows from $t\omega$ - $t\omega$ 'sprout, shoot, scion' $t\omega$ - $t\omega$ - $t\omega$ 'begetter', which must have been derived from it

as though the verbal stem were q₁- (§ 707 p. 235); a similar origin must be supposed for Lat. fī-tu-m cupī-tu-s and others (§§ 715 ff.).

§ 714. The identity of ending in σφάξω εσφαξα (σφαγ'slay') and forms like φράξω εσφαξα (σφαγ- 'enclose') produced σφάττω as a bye-form to σφάζω, by analogy with φράττω Vice versa, we have βράζω in late Greek instead of βράττω (βρατ- 'seethe, bluster, roar') by analogy of such words as φράζω (φραδ- 'give to understand'), because almost all the forms of verbs in -τ-, -9-, and -δ- are alike except in the present stem, έβρασ(σ)α like εφρασ(σ)α, and so forth. See Mucke, De Consonarum in Greca lingua geminatione, i (1883) pp. 17 ff.. Osthoff, Perfect 296 ff. and 322 f.

As regards the relation of μαίνομαι to διάνην μειιάνημαι μεμανηώς μανήσομαι, or of χαίρω to δχάψην λεχαψηώς λεχαφήσω. see § 708 pp 238 ff

§ 715. Italic In Latin, post-consonantal -zō became -zō, just as *medzu-s became medzu-s (I § 135 p 122), thus morror for *morzō(r) 'mrzō. In Oscan, -zo- is seen in heritad 'velit', and other words.

Lat. in-ciēns for *-cu-le- (as sociu-s for *socu-lo-s, vol. 1 loc. cit.) beside qu-e \bar{o} = Skr. $\dot{s}v$ - $\dot{a}y\bar{a}mi$ (§ 790). So also $farci\bar{o}$ for *farcu- $l\bar{o}$ beside frequ- $\bar{e}ns$

Why we have now -1- and now -1-, as in cap-1-s farc-1-s, no rule has so far been discovered to show. Often enough the same verb has both quantities, as mori-mur and mori-mur, so that we find in Latin both the peculiarities which we saw divided between Baltic and Slavonic (Lith. smirdi-me O.C. Sl. smridi-mü). In Umbrian and Oscan all the recorded forms have -1-— doubtless an accident. Umbr. heris hereitu heritu beside heriest 'volet' cp Skr. hár-ya-ti, ān-ovihimu 'induimino' (uhi == 1) beside Lith. aviù 'I wear something on my feet' (1st pl. āvi-me).

As the present stems of which Lat. farcio is one were inflected just like denominatives in -i-20- (§ 777), it cannot be

wondered at that the analogy of these denominatives caused non-present forms with $-\bar{\iota}$ to be coined, such as $farc\bar{\iota}$ tus beside fartu-s from $farc\bar{\iota}\bar{\sigma}$; cp. § 713 on Gr. $\bar{\iota}\xi$ - $\bar{\iota}\delta\bar{\iota}\sigma u$ and $q\bar{\iota}$ - τv .

In the lists which follow below, \imath or $\overline{\imath}$ is added in brackets to show the quantity of the weak-grade vowel in the 2^{nd} singular etc.; and it is stated whether $\overline{\imath}$ is ever found outside the present stem

Type A Lat ap-(v)eriō op-(v)eriō (ī, aper-uī § 716. aper-tu-s operī-mentu-m). Lith. ùž-veriu, see § 706 p. 233 fer-iō (ī, feriī feri-tūru-s). Lith. bar-iù 'I scold' O C Sl. bor-ja 'I fight' and probably O.Icel ber 'I strike' (inf berja) from the ground-form *bhī-zō, type B. Ital. her-zo- her-zo- her-z- in Umbr. heris heriest hereitu Osc. heriiad, see § 706 p. 233, Lat spec-iō (i, spec-tu-s) Skr páś-ya-ti, see § 706 Umbr. an-outhimu 'indumino' Lith ap-iù 'I wear р. 234 something on my feet (1st pl av-1-me inf ai é-ti) and Lett. au-ju 'I put something on my feet' (1st pl áu-ja-m inf áu-t) O C Sl (ob-)u-ja, same meaning (1st pl -u-je-m \ddot{u} inf -u-ti) Lat. pav-i \bar{o} (ī, pavī-vī pavī-tus) Lith. piáu-ju 'l cut, mow, slay' (piū-tì-s 'slice, harvest') haur-iō (ī, haus-tu-s haurī-tu-s). jac-iō (i, jac-tu-s) $cr\bar{o}c-i\bar{o}$ (\bar{i} , subst $cr\bar{o}c\bar{i}-tu-s$), see § 706 p. 234.

To the same group must belong Lat. noli nolite, from a lost verb *velio, ep OCSl velja velč-ti 'to command', OHG.

1st sing. willu 'I wish' Goth viljan viljands, see § 505 p 69.

stō (Idg. *stā- $\underline{\imath}$ ō) came under the influence of presents like in-trō for *-tr- \overline{a} - $\underline{\imath}$ ō, hence stās etc See § 584 Rem. p. 126 A similar explanation may be given of for fātur, see § 495 p. 56 and § 706 p. 234

§ 717. Type B Lat mor-ior (i or \(\bar{\epsilon}\), mor-tuo-s mori-tūru-s), Avest mer*-ye-iti, see § 707 p 235 or-ior (i or \(\bar{\epsilon}\), or-tu-s ori-tūrus), ground-form *\(\gamma\)-io-, akin to Skr. \(\gamma\)-nó-mi § 639 p. 177. par-i\(\bar{\epsilon}\) (i, peper\(\bar{\epsilon}\) par-tu-s pari-tūru-s, par\(\bar{\epsilon}\)-tet for *\(\bar{\epsilon}\)-\(\bar{\epsilon}\) (I § 306 p. 242), re-peri\(\bar{\epsilon}\) 'I bring to light again, find'

(ī, -pertu-s) Lith. per-iù (1st pl per-i-me) type A. fīō fī-s fiere fierī (fī-tu-m, cp Gr. $\varphi \tilde{i}$ - $\tau v \S 713$ p. 247). O.Ir. b- ιu etc. Idg. *bhy-1 $z\bar{o}$, see § 707 p. 235; f- $t\bar{o}$ f-tunt (instead of *f- $t\bar{o}$ *f-unt) took ī from fīs etc., a peculiarity which is explained by the unique character of this verb — it is the only one in which the suffix -iō carried the chief accent; Osc. firet 'fiunt' with the ending -ent instead of -ont (p. 231 footnote). suf-hō $(\bar{\iota}, -f\bar{\iota}-v\bar{\iota} -f\bar{\iota}-tu-s)$ ground-form *-dh ψ - $\iota\iota\bar{\varrho}$ cp. Skr. dh $\bar{\iota}$ - $u\acute{a}$ - $t\bar{e}$ etc. see § 707 p. 236. *in-ciēns* for *-cu-ie-, cp. Gr. έγ-κύω 'I am pregnant' and Lat qu-eo (§ 715 p. 248), probably -ciens. -xv'a = $f\bar{\imath}\bar{\varrho}$ (pr Ital * $f\mu$ - $\imath_{\bar{\imath}}\bar{\varrho}$). $\varphi\dot{\imath}\omega$ Lesb $\varphi\dot{\imath}\omega$ chēns, from $\sqrt{\hat{k}}$ lei-'-clinare' (Leo Meyer, Bezz Beitr. v 182 f), probably for *cli-ie- cp. Skr. pass śit-ya-tē grad-ior (i, gressu-s; aggredior with i or i) Skr gfdh-ya-ti, see § 707 p. 236. (i, -lectu-s) for */k-, beside O II G locchon 'to entice' (Osthoff, M. U. v p. III). farc-iō (ī, fartu-s farcī-tu-s) cuperet cupiret cupi-vi cupi-tu-s). Skr. kup-ya-ti etc., see § 707 p. 236. fug-ιο (ι, fūgī fugι-tūru-s). Gr. πεφυζότες, see § 707 p. 236 *in-quiō* in-quiunt (i) for *sq-ijō, cp. in--qu-a-m (Class X § 583 p. 124) Gr. ενι-σπ-ε 'said', \sqrt{seq} -.

suō (sū-tu-s) and spuō (spū-tu-s) probably for $*s\bar{u}$ -(2)ō *spū-(1)ō as neō for 'nē-(1)ō Gr ruooto $\pi\tau$ tw etc., see § 707 p. 236.

§ 719. Keltic. It is difficult to understand the Keltic inflexions, because the Third Conjugation in Irish has absorbed all Denominatives in $-2\bar{\rho}$ -e- $2\bar{\rho}$ and $-2-2\bar{\rho}$, and all Causals in $-2\bar{\rho}$. General remarks on the 20-conjugations in § 702 pp. 229 f.

An account of the confusion in Irish between the First and Third Conjugations is given in § 520 p. 84.

Type A O.Ir. $-l\bar{e}cnu$ 'I leave, let' for *leiku-i\(\bar{o}\) (I § 436 Rem. p 325). Skr. ric-ya-t\(\bar{e}\) etc, type B, see § 707 p. 236. midnur 'I give judgement or opinion', beside Gr. μ e'do μ au 'I meditate upon'. -cnu 'I see' for *ces- $2\bar{o}$

-tau -tō 'I am' for *stā-yō. Avest. ā-stā-yā etc., see § 706 p. 234. For the inflexion of this present stem see § 584 Rem. p. 126

Type B. O Ir. do muniur '1 think, believe' for *man-20-Idg *mn-20- Gr. μαίνομαι etc., see § 707 p. 235. -gainedar 'is born' from \sqrt{gen} - ep Gr γείνομαι, type A biu 'I am' for *bhu-uō Lat. fiō etc., see § 707 p. 235; the stem *bhu-ī-must be contained in Mid.Cymr imper. 3rd sing bit 3rd pl. bint (but Mod.Cymr. bydd- for *bij-), while -ue- -io- is the suffix in Ir. 3rd sing. biid bīth bīd 3rd pl. biit bīt and 1st pl. -biam 3rd pl. -biat -gniu 'I make 'for *gn-uō \sqrt{gen} - 'gignere', goes like biu.

Belonging to either (A) or (B): Mid.Ir. airim 'I plough': Goth. ar-ja Lith ar-iù

§ 720. Germanic On the 20-suffix here, see § 702 p. 230. There was a confusion between some persons of the present in this class and those of Denominatives in -e-2ō or -i-2ō, and Causals in -e2ō. This caused a general commingling of the forms, reaching to non-present stems; the course of which it is very difficult to trace

Verner's Law (I § 529 pp 384 ff) proves that some verbs were accented on the root in proethnic Germanic: Goth haf-ja O.H.G heff(i)u Goth. $ska\bar{p}$ -ja (pret $sk\bar{o}\bar{p}$), beside O.H.G. int-seff(i)u See § 705 p. 233 In $ska\bar{p}$ -ja the accent seems to have been shifted, 'as in Skr. fj-ya-ti etc. (§ 710 p. 245); for Gr. a- $ox\eta \vartheta \eta g$ 'scatheless', which must be connected with $ska\bar{p}$ -ja (pret. $sk\bar{o}\bar{p}$), points to a $\bigvee sk\bar{a}th$ -. That Germanic inherited forms with an accented suffix, type B (cp. mr- $iy\acute{a}$ - $t\bar{c}$ tud- $y\acute{a}$ - $t\bar{c}$) seems to follow from O.Sax. thiggian A.S. $\bar{d}iczean$

'to receive, assume' from \sqrt{teq} (Lith. $t \geq k - t n$ 'to reach') and A.S. friczean 'to experience' from \sqrt{prek} (Lat. precari).

On present stems with -20- as byc-forms of the \bar{e} -present, such as O.Sax hebbiu beside O.H.G $hab\bar{e}$ -m (Goth. haba habai-s), see § 708 pp 238 ff.

§ 721. Type A. O II G wirk(i)u 'l work' (pret. worktu worahta). Gr ἔρδω, see § 706 p 234, parallel B-stems O II G. wurk(i)u Goth vainkja O.II G liggh(i)u 'I he' (pret. lag), O.Icel ligg (inf liggia) from / legh-; Goth liga instead of "ligia follows ligis etc., as in later O.H.G we get liqu instead of ligg(i)u following ligis etc (§ 702 p. 230). O.H.G sizzu 'I sit' (pret. suz), O.Icel sit (inf sitja): compare probably πιέζω 'I press' (lit. 'I sit upon') for "πι-σεδ-ιω (cp. Skr. pass. pīdyatē for *pi-zd-je-), perhaps also Elouai (see § 563 p. 111); Goth. sita like liga Goth. ya-hvatja 'I incite' (part, hvassa 'whetted, sharp') O H G. wezzu 'I whet, sharpen' (pret. wazta), boside Skr. cud- (pres. códa-ti) 'to inflame, Goth hlah-ja 'I laugh' (prep hlōh). Goth. sara incite'. OHG sāu 'I sow', pr Germ * $s\bar{e}$ - $y\bar{o}$ Lith sé-ju, see § 706 OHG. tāu 'I suckle' ground-form *dhē-zō beside Goth. da-ddja (B), sec § 707 p. 237

§ 722. Type B. O Icel. ber 'I strike' (inf berja, pret barāa) pr. Germ. *bar-ṣō ground-form *bhṣ̄-ṣō Lith. bar-iù, see § 716 p 249 (foth. hul-ja (pret. hulida) O.H.G hull()u (pret. hulia) 'I cover, hide' ground-form *kŀ-ṣō, beside O.H.G hilu 'I conceal'. O.Icel symja 'to swim' beside svima, pret. svam, pr. Germ *s(u)um-ṣa-. A.S. beó 'I am' ground-form *bh(u)-iṣō, 2nd and 3rd sing bis biā 3rd pl. beóā (part. beónde), O II G 2nd sing bis bist (for its 1st sing. we have bim, see § 507 pp 73 f.) Lat. fīō etc., see § 707 p 235. O Icel dū'I shake' (inf dū-ja, pret dū-āa) Skr. 'dhū-yá-tē etc, see § 707 p 236. O.Icel. lū'I destroy, shatter, crush' (inf. lū-ja, pret. lū-āa) Gr. λύω (cp. § 527 Rem. 2 pp. 90 f.). Goth. vaūrk-ja (pret. vaūnhta) O.II G. wurk(i)u (pret worhta) 'I work' beside O H G wirk(i)u, type A Avest ver*z-ye-vī etc., see § 707 p. 236,

Goth. paurseip mik 'I thirst', lit. 'it thirsts me' (pret. paúrsida). Skr tŕš-ya-ti 'thirsts' O H.G gurt-(i)u 'I gird' (pret. gurta), beside Goth, gairda Class II A. O.H.G. wurg(i)u 'I throttle' (pret wurcta). Lett wirschu 'I jerk' (inf wirst). parallel we have Lett. werschu (we'rschu and werschu) 'I turn, twist' Lith. verž-iù 'I tie', type A Goth. pugk-ja 'I think' (pret. būh-ta), parallel bagk-ja, which may answer to Lat tongeo, see § 894 Goth. bug-ja 'I buy' (pret. baúhta). Goth. bidja O.H.G bitt(i)u 'I beg, pray', ground-form *bhidh-zō V bheidh-, whose pret. is bab bat following words like sat (I § 67 Rem. 3 p 57), Goth us-bida O.H G bitu a re-formate like ligu, see § 702 p 230 O II G. int-rihhit 'revelat', later (part. int-rigan) O.H G. sticch(i)u 'I embroider. (part. hi-stichit) Gr στίζω, see § 713 p stitch' O.H G swizzu 'I sweat' (pret. swizta) · Skr. svid-ya-ti 'sweats': the suffix -120- is perhaps seen in Gr to-la (§ 713 p. 247). Goth skab-ja 'I hurt' (pret $sk\bar{o}\bar{b}$), op Gr. \vec{a} - $\sigma_{an}\theta_{nj}c$ 'unscathed', OHG ita-ruch(i)u 'rumino': Lith. rúg-iu § 720 p 251. 'I gulp, belch' O.II G. scutt(i)u 'I shake, shatter' (pret scutta): cp. Lat quat-iō -cutiō

Goth. siu-ja 'I sew' Gr. $ra\sigma\sigma b\omega$ etc., O.Icel. $sp\bar{y}$ 'I spew' (pret $sp\bar{z}\bar{o}$ and $sp\bar{u}\bar{d}a$) Gr. $\pi\tau t\omega$ etc. See § 707 p 236. Goth. da-ddja 'I give suck' Skr $dh\omega$ -ya-ti etc., see § 707 p. 237

§ 723. We are often in doubt whether forms belong to (A) or (B) Goth. huf-ja () II († heff(i)u 'I lift up' (pret. hōf, hub) Lat cap-iō O H.G. int-seff(i)u 'I mark' (pret. -suab): Lat. sap-iō. Goth. ar-ja O.II († er-iu 'I plough' (pret. O H.G. iar ier) Mid.Ir. an im Lith ar-iù O C Sl. or-ja 'I plough'. O.II.(† swen-iu 'I swen' (pret swuor)

In quite a large number of the above named verbs with weak preterites it is doubtful whether the original ending of the present ought not rather to be assumed as $-\ell_{LO}$ (Class XXXII). Thus, for example, (4oth hul_{JU} may be derived from $*kll-\ell_{LO}$, with the same weak root-syllable as is found in Skr. $tur\acute{a}ya-ti$ and elsewhere (§ 790).

§ 724. Balto-Slavonic. We first deal with forms of which the type is seen in Lith. lėž-iù lėž-ia-me O.C.Sl. bor-ją bor-je-mũ Next, the type Lith smìrd-žiù smìrd-i-me O.C.Sl. smrždą smržd-i-mũ (see § 702 pp. 230 f.). These are combined with a different formation in the infinitive stem, for which reason we add the infinitive in each case

§ 725 1. Forms with -10- -2e- running right though.

Type A. Lith ùž-veriu 'I close, shut' (-ver-ti). Lat. op--(v)eriō, see § 706 p 233. ger-iù 'I drink' (gér-ti). kelù (*kel-2ù) 'I lift, raise' (kél-ti). želù (*žel-2ù) 'I grow green' (žél-ti). O.C Sl. mel-ja 'I grind' (mlěti for *mel-tī). stel-ja 'I stretch out, spread' (stīla-ti). sten-ja 'I sigh' (stena-ti): Gr. στείνια, see § 706 p 233. vem-iù 'I vomit' (vém-ti)

Lith płán-ju 'I wash, lave, rinse' (płán-ti), O.C Sl. plu-ja 'I swim, sail on board ship' (plu-ti, parallel plovą plu-ti), groundform "pleu-zō Lett án-ju (án-t) O C Sl. (ob-)n-ją (-u-ti) 'put on covering to the feet' (Lith. aunù instead of older *an-ju), ground-form *eu-zō, cp. Lith intrans av-iù av-é-ti § 727. Lith szán-ja 'I shoot' (szán-ti), O C.Sl su-ją 'I throw, sling' (sov-a-ti), ground-form *skey-zō

Lett. léi-ju (li-t) Lith. lé-ju (lé-ti) 'I pour' for *lei-lō, compare perhaps with O.C SI li-ją 'I pour'. Lett. sléi-ju (sli-t) Lith szlei-jù (szlē-ti) 'I lean against, support', cp. Lith. szlei-vi-s szlei-va-s 'bandy-legged', ν llei-. Lett. sméi-ju 'I laugh' (smi-t), ν smei-. Lith lé-ju szle-jù, possibly for the regular *lei-ju *szlei-ju by analogy of lé-ti lé-tu etc, cp. I § 68 Rem. 2 p. 61.1) O.C.SI. li-ją may be placed under Type B (§ 726) along with Lith. ly-jù 'I rain' pa-szly-ju 'stumble'. Parallel are liją and lėją, also smėją sę 'I laugh' zėją 'hio'. These latter forms, analysed as lėj-ą smėj-ą zėj-ą, belong with sěk-ą 'I hew, cut' to Class II A (cp Gr. μήδομαι etc § 514 p. 81), and

¹⁾ Unsatisfactory as this hypothesis seems, I think it better than the one set forth by Hirt in Idg. Forsch i 33 ff

we must connect with them the Lettic preterites léj-u sméj-u sléj-u.1).

Lith. vercziù 'I turn' (vers-ti). verk-iù 'I cry' (verk-ti) szelp-iù 'I help, support' (szelp-ti). sreb-iù 'I sip, lap' srep-ti, also sreb-iù (by levelling with srebiaŭ srepti) and srob-iù (srop-ti). O.C.Sl. čreplją 'I make, create' for *kerp-ją (črepa-ti). plěžą 'I crawl' for *pelz-ją (plěza-ti)

Lith blend-žiű-s 'I grow dark', said of the sun (pret. blendžiaŭ-s)

Lith. láuk-u 'I wait for, expect' (láuk-ti) Gr λεύσσω, see § 706 p. 234 rauk-ιὰ 'I wrinkle' raūk-ti √ reuq-, ep. Gr. ὀρύσσω (B) § 713 p 247. mauk-ιὰ 'I rub smooth' (maūk-ti) √ meuq-, ep. Skr muc-yá-tē etc., see § 713 p. 247 praus-ιὰ 'I wash my face' (praūs-ti), ep. Skr vi-prušya-ti 'spurts out, trickles'.

Lath $le\check{z}-\iota u$ $(l\tilde{c}sz-t\iota)$ O.C.Sl. $l\imath\check{z}q$ $(l\imath za-t\iota)$ 'I lack', ground-form $*le\imath\check{g}h-\imath\check{o}$, cp. Skr par. $l\imath h-ya-t\bar{e}$, (B) Lath $pesz-\iota u$ $(pesz-t\iota)$ O.C.Sl. $p\imath\check{s}q$ $(p\check{s}sa-t\iota p\imath sa-t\iota)$ 'I write', ground-form $*pe\imath\check{k}-\imath\check{o}$, cp. Skr $p\imath\acute{s}-y\acute{a}-t\bar{e}$ 'is made ready, fitted up', (B). Lath $\check{z}ed-\check{z}\imath u$ 'I form, shape' $(\check{z}est\iota)$, O.C.Sl $z\imath\check{z}da$ 'I form, build' $(z\check{\iota}du-ti)$

Lett. ded/u 'I burn' trans. for *deg-u (deg-t) Skr. $dah-ya-t\iota$, pass. $dah-y\acute{a}-t\ddot{e}$, $\checkmark dhegh$ - O C Sl. $\check{c}e\check{s}a$ 'I strip off, comb' ($\check{c}esa-t\iota$), $\checkmark qes$ -.

Lith $r\acute{e}\check{z}$ - $\iota\iota\iota$ '1 cut, tear' $(r\acute{e}sz$ -ti), O.C.Sl. $r\acute{e}\check{z}\check{a}$ 'I cut' $(r\acute{e}za$ - $t\iota)$ Lith. jeg- $\imath\iota\iota$ 'I have power, I can' $(j\acute{e}k$ -ti), beside Gr. $\acute{\eta}\not{\beta}\eta$. Lith. $\acute{u}'d$ - $\check{z}\iota\iota\iota$ 'I smell' $(\acute{u}'st\iota)$, cp Gr. $\breve{o}\zeta\omega$ § 713 p. 247. O.C.Sl. $pla\check{c}\check{a}$ 'I cry, lament' (plaka- $t\iota)$ Gr. $\pi \lambda \acute{\eta}\sigma\sigma\omega$, see § 706 p. 234 Lith krok- $\imath\iota\iota$ krog- $\imath\iota$ 'I give the death rattle, grunt' $(kr\~ok$ -ti). Gr. $\iota g\iota\iota$ ι ct., see § 706 p. 234.

Lith. $sp\acute{e}-ju$ 'I have lensure or space' ($sp\acute{e}-ti$), O.C Sl. $sp\acute{e}-ja$ 'I succeed' ($sp\acute{e}-ti$): Skr. $sph\bar{a}-ya-t\bar{e}$, see § 706 p 234 Lith. $s\acute{e}-ju$ ($s\acute{e}-ti$) O C Sl $s\acute{e}-ja$ ($s\acute{e}-ti$) 'I sow' Goth. saia, see § 706 p. 234 Lett. $d\acute{e}-ju$ 'I lay eggs' ($d\acute{e}-t$), O C Sl $d\acute{e}-ja$ 'I lay,

¹⁾ Zubatý's derivation of zėją trom zzū-zą (Lith. zib-ju) is wild in the extreme (Archiv slav. Phil xiii 623)

set, place' (dě-ti). Skr 3rd sing mid a-dhā-ya-ta 'he placed for himself' Lith stó-jû-s 'I place myself, take my stand' (stó-ti-s), OC.Sl sta-ja 'I place myself' (inf sta-ja-ti). Avest. ā-stā-yā etc, see § 706 p 234

Lith spráu-ju (spiáu-ti) O.C.Sl plju-jų (pljžva-ti) 'I vomit', cp. Gr. $\pi r \dot{v} \omega$ etc., (B); sec § 707 p. 236. O C.Sl. žu-jų 'I chew', a bye-form of ž \dot{v} -ų, Class II B, § 534 p. 95.

§ 726. Type B. Lith dir-iù 'I flay' (dir-ti) Skr. dīr-yū-tē, see § 707 p. 235 spir-iù 'I kiek' (spìr-ti): Gr. σπαίοω, see ibid skir-iù 'I part, cut' (skir-ti) $\sqrt{sqer-gir-iu}$ 'I praise' (gir-ti), beside gēr-as 'good'. Lith bar-iù 'I scold' beside bar-ù (bār-ti), O C Sl bor-ja 'I fight' (brati for *bor-tī), ground-form *bh\(\bar\bar\ellip\) O C C C lcel ber 'I strike' (inf berja) for pr. Germ. *bar-iō, which probably comes from a form *bh\(\bar\ellip\)-zō; on the other hand, we have Lat fer-iō following type A (§ 716 p 249) Lith. skilù (*skil-z\ellip) 'I strike fire, kindle' (skil-ti). Gr. σκάλλω, see § 707 p. 235. Lith. kalù (*kal-z\ellip) 'I strike, forge' beside kal-\ellip (k\ellip l-ti), O C.Sl. kol-ja 'I slaughter' (klati for *kol-tī), ground-form *q\(\bar\ellip\)-zō.

O.C Sl žĩn-ją 'I cut off, reap' (žę-ti): Skr $han-y\acute{a}-t\vec{e}$, see § 707 p 235.

O.C. Sl. ry-ja 'I grub up, dig' (ry-ti) beside $r\bar{u}v-a$ 'I tear out', Class II B, O.H.G ruu-ti 'land made fruitful by digging', Lith. $r\bar{a}u-ju$ 'I pull out of the earth, pull up' $(r\bar{a}u-ti)$, (A). Lith. $ly-j\hat{u}$ 'I ruin' $(l\hat{y}-ti)$ with which O.C.Sl. li-ja is perhaps connected; parallel Lith. $l\hat{e}-ju$, (A), § 725 p 254. Lith. $gy-j\hat{u}$ 'I get well, revive' $(g\hat{y}-ti)$.

Lith. rúg-iu 'I gulp, belch' (rúk-ti). O.H.G. ita-i uch(i)u 'rumino'. grúd-žiu 'I stamp' (grús-ti). O.C.Sl. sŭŝą 'I dry' for *such-ia (sŭcha-ti): Skr. śúś-ya-ti, see § 707 p. 236. lŭžą 'I lie' for *lŭg-ia (lŭga-ti). pĭšą 'I strike, rub' (pĭcha-ti): Skr. piṣ-yá-tē 'is broken or crushed to bits'.

Lett. schu-ju for *siu-iu (pret. schuw-u mf. schû-t), O.C.Sl. šiją for *siū-ią (ši-ti) 'I sew'. Gr. νασσύω etc., see § 707 p. 236.

§ 727 (2) Forms with -io-.-ī-. There is no evidence that -io- was originally dissyllabic. This cannot be inferred from the Lithuanian av-iù srav-iù (1st pl. āv-i-me srāv-i-me) as contrasted with płáu-ju (1st pl. płáu-ja-me); these may have been influenced by persons with the stem av-i- srav-i- The weak grade is regularly -ī- in Lithuanian (compare future with -s-i-, § 761) and in Slavonic regularly -ī-. It appears also in the 3rd plural and the participle, Lith smirdint- O.C.Sl. smrīdet-, while here the original form was most likely -io-, on O.C.Sl. smrīd-et- for -int-, see § 637 Rem. p. 176

Idg *bhu-i10- *bhu-i-f- from √bheu- 'become, be' (§ 707 p. 235) has many descendants in Balto-Slavonic. Lith. 3rd sing. bi-ti bi-t 'erat' (erant)', which is irregular in having a primary personal ending; plural 1st pers. suktum-bime 2nd -bite dual 1st -biva 2nd -bita, old injunctives, first used with preterite meaning, now in clauses expressing a wish.1) With the pr. Lith. present *bijù is closely parallel the Lettic preterite biju 'eram' bija bija pl. bijám biját, which is related to Lat. fram (instead of *fiam) as Lith. buvañ to Lat. fuam Along with these goes the Slavonic conditional (impossible condition), originally a preterite injunctive formation, made up with bi-mi bi bi bi-mu,2) the 1st sing has got a primary personal ending, like Lith 3rd sing biti For the 2nd pl. they used biste, a form of the s-aorist; to fill up gaps, the 1st pl bichomu and 3rd pl bišę were coined by analogy (cp O.C Sl. běchomů from bě § 587 p 128, and Lat fitum Gr. gitv). For 3rd pl was used ba (beside biše), also injunctive in origin, Class II B (§ 523 p 87).

Remark The view of these forms set forth by Wiedemann, Lit Prat 136 ff, is untenable OCSI bi-mi cannot be separated from Lith-bi-me, and to regard this Lith form as an optative with orig -i- is

The 2nd sing -bei admits of several explanations. It probably is akin to O C Sl. 2nd and 3rd sing. be Gr. ²ρψη - ²ρψη (§ 587 pp. 127 ff)

²⁾ In the same way were used the aorist forms bychii by by bychomii etc

Brugmann, Elements Il

opposed to phonetic law as completely as the assumption that Lith $d\hat{u}'sim(e)$ 'dabimus' is optative of the s- acrist (op § 761)

With the remaining Balto-Slavonic verbs of this class we find regularly an infinitive stem in -ē, as Lith. smirdė-ti O C.Sl. smrīdě-ti beside smirdžiu smrīdāq (cp O.C.Sl. bě běchů běachů beside bi-mů, like smrīdě smrīděchů smrīděachů beside smrĭdi-mů). This, as we saw in § 708 pp 238 ff, has a parallel in Greek, for instance, μαίνομαι: ἐμάνην μεμανηιώς μεμάνημαι μανήσομαι = O.C.Sl mǐnja mǐně mǐněvů mǐněchů (Lith. mìne minésiu) In Italic and Germanic, there are only some parallel 20-presents, as Lat. nölī O II G willu Goth. viljun· O.C.Sl. velją, O Sax. pl libbiad partic. libbiandi: O C Sl -lǐplją Here we usually find presents in ē, as Lat valeō. Lith. galù, O.II.G. lebēm. O C Sl -lǐplją

Lith tylù (i e. *tyl-2ù) tylë-ti 'to be still' (long ī-sound not original): O H.G. dolē-m 'I suffer, endure', \(\sqrt{tel-} \) 'carry, bear' O.C.Sl minja mině-tr 'to think' Skr mán-ya-tē, Gr. μαίνομαι, O.Ir do mumur Goth muna 'I bethink me, think of, wish' 2nd sing munáis, see § 707 p. 235 Lith qirdžiù qirdě-ti 'I apprehend, hear'. Gr φράζω, see § 707 p. 236 O C.Sl. drīžą držža-ti 'contain, possess' Skr. drh-ya-ti 'makes fast' O.C.S1. -liplyq -lipė-ti 'to ching to'. Skr. pass. lip-ya-tē 'is smeared or anointed', O Sax. libbia O.H.G. lebē-m 'I live' (the O.Icel lifa to be over, remain, live' helps to make clear how one meaning came out of the other) Lith. pa-výdžiu -vyděti 'invidere' OCSI. vižila vidě-ti 'to see' Skr. vid-yá-tē 'is known, recognised, found', Lat video, Goth vita 'to look at a thing, 2nd sing. vitái-s. O C.Sl būžda būdě-ti 'to wake, observe' Skr. búdh-ya-tē 'awakes, perceivēs' pass. budh-yá-tē. watch' O C.Sl ruždą rudė-ti 'to blush': Lat. rubeo. O.C.Sl. kyplja kypě-ti 'to boil, seethe' Skr kup-ya-ti, Lat. cupiō, see § 707 p 236. O.C Sl. stoją stoja-ti 'to stand': Skr. pass. sthī-ya-tē instead of sthu-ya-te, O.H G 2nd sing. stes for *sta-21-21, see § 706 p. 234, § 708 p 240

O.C.Sl. yovlją gově-ti 'venerari, vereri', pres. also gověją:

Lat faveo. Lith galù (i e gal-zu) galé-ti 'to be able': Lat. valeo (otherwise Bezzenberger, in his Beitr xvi 256).

O.C.Sl. velją velė-ti 'to command'. Lat. $n\bar{o}l\bar{i}$, O.H.G. villu 'I wish' Goth. viljan 'to wish', see § 505 p. 69, § 716 p. 249. Lith. avrù arë-ti 'to be shod': Umbr an-ovihimu \sqrt{eu} -, see § 716 p. 249

Lastly it should be mentioned that in Balto-Slavonic the non-present ē-forms are found along with other than io-present stems. e. g. Lith. menù miněti 'to think of', gélbu gélběti 'to help', gedù geděti 'to lament, mourn', bundù buděti 'to watch', sédmi seděti 'to sit, O.C.Sl. part. pres. gorat- beside goret-burning' from inf. yorěti, partic. vidomů 'ορώμενος' beside vidimů from inf viděti. The same thing is seen in Greek, as εθέλω. εθελήσω, νέμω: νενέμημαι etc. (Curt. Verb. I² 384 ff.), and doubtless in Germanic, as Goth. haba habam haband may well belong to Class II (§ 708 pp. 239 f.).

Class XXVII.

Reduplicated Root + -10- -120- forming the Present Stem.

§ 728 (A). Pr. Idg. There was a 10-Class with complete reduplication, closely connected with Classes VII and VIII. As regards the type of the reduplicating syllable see §§ 465—467, 470, and 474. Compare, for instance, Skr. dē-diś-yá-tē beside dé-diš-te, varī-vrt-yá-tē beside várī-vart-ti. Probably the mode of conjugation with -10- was occasioned by that of Class VII; cp § 703 pp. 231 f.

Skr. $v\bar{e}$ -vij- $y\acute{a}$ - $t\bar{e}$ 'makes for, rushes against anything' and Gr. $\ddot{\alpha}\tau\tau\omega$ Hom $\dot{\alpha}'i\sigma\sigma\omega$ 'I rush towards' for * $F\alpha i$ -Fix- $\iota\omega$, apparently from $\sqrt{\mu\alpha^{*}}_{2}q$ - $\mu\alpha^{*}_{2}q$ - (§ 465 p 12)

§ 729. Aryan. Only a few examples in Vedic, but later this type of Intensive spread very widely car-cūr-yá-tē from car- 'to move'. nan-nam-yá-tē from nam- 'to bow, incline'.

 $n\bar{e}-n\bar{i}-y\acute{a}-t\bar{e}$ from $n\bar{i}$ - 'to lead'. $c\bar{o}-\check{s}k\bar{u}-y\acute{a}-t\bar{e}$ from sku- 'to cover'. $mar-m\gamma j-y\acute{a}-t\bar{e}$ $mar\bar{i}-m\gamma j-ya-t\bar{e}$ from marj- 'to sweep off, wipe away'. $kani-krad-y\acute{a}-t\bar{e}$ from krand- 'to roar'. $v\bar{e}-vi\check{s}-ya-t\bar{e}$ from $vi\check{s}$ - 'to be active' $n\bar{o}-nud-ya-t\bar{e}$ from nud- 'to knock away' $c\bar{a}-ka\dot{s}-ya-t\bar{e}$ from $k\bar{a}\dot{s}$ - 'to appear'. In Avestic there seems to be only one example, $r\bar{a}-ri\check{s}-ye-iti$ 'hurts, wounds', ep. Skr. $ri\check{s}-ya-ti$ 'injures'.

§ 730. Greek. ἄττω for *fαι-fιν-fω, see § 728 p. 259. γαρ-γαίρω (for *-γαρ-fω) 'I swarm'; μαρ-μαίρω 'I shimmer, glitter'. With πορ-φέρω 'I well up, heave, change colour' μορ-μέρω 'I roar, murmur' ep. πτέρω § 713 p 247. παμ-φοίνω (\checkmark bhā-) shows a nasal suffix like qαίνω for *qα-ν-fω, parallel Hom. παμqανόωσα. On παι-φάσσω, παι-πάλλω, ποι-qύσσω and the like, see § 465 Rem p. 12.

§ 731. Italic. Lat tin-tinnio ($\bar{\imath}$) beside $tinni\bar{o}$. $gin-gri\bar{o}$ ($\bar{\imath}$) beside $garri\bar{o}$ (cp. § 466 p. 13)

Of Keltic forms may be placed here the isolated Midlr der-drethur 'sounds, cries out' with the s-preterite derdrestur (§ 465 p. 12)

§ 732. Slavonic. O.C.Sl ylagolją 'I speak' for *yolgol-ją, 2nd sing. -je-ši etc. (glagola-ti), with the same reduplication as glagolū 'word' mrū-mūi-ją 'I gnaw', 2nd sing -je-ši etc. (mrū-mūra-ti).

§ 733 (B) It is rare in the ldg. languages to find the io-suffix with presents reduplicated in any other way, and in no language has this class become a large one. All the examples appear to be new formations Skr. pass. dad-yá-tē 'datur' (beside dī-yá-tē) by analogy of dádā-mi dad-más, cp. partic. dat-ta-s, § 541 p. 102 Skr pass nind-ya-tē 'is scolded or blamed', if ninda-ti is to be analysed 'ni-nil-e-ti', see § 550 p. 106. Avest yaeš-ye-iti 'seethes, boils', which looks like a contamination of Skr. yēša-ti i e *½a-iš-ati (§ 562 p. 110) and yás-ya-ti. Gr. Att. δειδίττομαι Hom. δειδίσσομαι i e. δεδΓίσ-σομαι 'I frighten, or am frightened' for 'δε-δΓιν-10-μαι, beside

δέ-δοι/α (cp Johansson, Beitr gr. Spr, 80 f). νίσομαι 'I go back, 1eturn' for *νι-νσ-ιο-μαι from √ nes- seems to presuppose *nι-nes-mι, which is represented by the Skr. 3rd pl mid. n(s-αtē (§ 539 p. 99). λιλαίομαι 'I desire, long for' for *λι-λασ-ιο-μαι, cp. Skr lušati for *la-lša-ti § 562 p. 110. τιταίνω 'I put to, yoke' ground-form *tι-tη-ιō, cp Lat tendō, if this is for *te-tn-ō (§ 564 p. 111). O Ir. -αιτισσινί 'I remain standing' for *(parι)-sistiō(r) (I § 109 e p. 103, § 516 p. 377), beside Gr. γ-στη-μι Skr. ti-šth-α-ti Lat sι-st-ō § 539 p. 100. O.C.Sl. deždą 'I lay' for *de-d-ią 2nd sing deždeši etc. (inf. dĕ-ti) beside Lith. dè(d)-mι ded-ù § 546 pp. 103 f.

A peculiar reduplication is shown by certain Greek verbs. $\pi\alpha$ - $\varphi\lambda\dot{\alpha}\zeta\omega$ 'I bubble' beside $\varphi\lambda\dot{\epsilon}\partial\omega\nu$ 'gossip', $\kappa\alpha$ - $\chi\lambda\dot{\alpha}\zeta\omega$ 'I gurgle', $\beta\alpha$ - $\beta\rho\dot{\alpha}\zeta\omega$ 'I chirp'. They are Intensives or Iteratives to the verbs named in § 730.

Class XXVIII

Root + $-\bar{a}$ -, $-\bar{e}$ -, $-\bar{o}$ -, + -2o- forming the Present Stem.

§ 734. The forms now to be noticed are closely connected with Classes X and XI (§§ 578 ff.), under which heads much has already been said of the 20-stems.

I believe that the original accentuation of this class is preserved in those Sanskrit verbs which have dissyllabic stems before -ya-, such as $grbh\bar{a}-y\acute{a}-t\imath$, and by Sanskrit passives like $tr\bar{a}-y\acute{a}-t\bar{e}$ (§ 703 p. 232). $tr\acute{a}-ya-t\bar{e}$ has followed the lead of $p\acute{a}c-ya-t\bar{e}$ etc., and $tr\bar{a}-y\acute{a}-t\bar{e}$. $tr\acute{a}-ya-t\bar{e}=ric-y\acute{a}-t\bar{e}$ ríc-ya-tē (§ 710 p. 245).

§ 735. Unreduplicated Forms

Pr. 1 dg. * $tr\bar{a}$ - ιo -: Skr. $tr\bar{a}$ -ya- $t\bar{e}$ 'protects, saves' pass. $tr\bar{a}$ -va- $t\bar{e}$, Lat. ιn - $tr\bar{o}$ for * $-tr\bar{a}$ - ιo , with which is doubtless connected OCSI tra-ja 'I last, endure' (inf traju-ti). Skr. sn-a-va- $t\bar{e}$ 'bathes himself', Lat. $n\bar{o}$ for *sn-a- ιo . Lat. $hi\bar{o}$ for

*hrā-zō, Lith žió-ju 'I open my mouth' (inf. žió-ti), cp. Lat. hī-scō O II G. gi-nō-m gei-nō-m 'I gape' Compare § 579. Lat. aro for *ara-zō, Gr. ảoáw 'I plough' pr. Gr. *ảoā-(1)w (§ 583 p. 124, § 775) With these primary verbs should be classed several very wide-spread onomatopoetic or imitative verbs, as Gr. ίλάω -ω 'I roar' Lith uló-ju 'I call, shout for joy, cheer' (also reduplicated ulūló-ju = Lat. ululō) Gr. ogzáouai -ωμαι 'I bray, hee-haw' Lat. uncō, Gr. μενάομαι -ωμαι 'mugio' Umbr. mugatu 'mugito, muttito'.

*sn-ē-io-· Gr. νη 'spins' for *σνη-ιει (Mekler, Beitr. zur Bild. des gr Verb, p. 18), Lat neō, O H.G. nāu 'I sew'. * $gn-\bar{e}$ -20- * $gn-\bar{o}$ -20- Skr. pass $\hat{m}aya-t\bar{e}$ 'noscitur' (- \bar{e} - or - \bar{o} -2), O.H.G. knāu 'I know' (-ē-, but cp. p 128 footnote), OCSl. zna-ja 'I know' (-ō-, inf zna-ti) Lat fl-eō, O II G blāu 'I blow' pr Germ. *bl-ē-uō, perhaps too O C.Sl bl-ĕ-ya 'I bleat' (inf. blěja-ti) Skr. v-á-ya-ti 'blows', Goth. v-aia O.H.G. w-āu 'I blow', O.C.Sl. v-ě-ja 'I blow' (inf. věja-ti). Lat taceō for *tac-ē-iō, Goth puháip for *pahē-u-di Lat. fav-eō, O (Sl. gov-ěja 'veneror, vereor' (§ 590 p 132) Compare §§ 587, 708.

§ 736. Aryan. Skr tr-á-ya-tē 'protects' pass. trā-yú-tē, Avest. prā-ye-iti 'protects': Lat -trō, see § 735. Skr. śr-á--ya-ti 'boils, cooks', cp. Gr κέ-νοά-ται Pass mn-ā-ya-tē 'commemoratur', cp. Gr Dor μέ-μνα-ται. Pass. ml-ά-ya-tı 'grows soft', cp Gr. Dor. $\beta\lambda$ - $\dot{\alpha}$ - ξ . $py-\dot{\alpha}-ya-t\ddot{e}$ 'swells' beside $p\dot{\alpha}y-a-tr$ pī-pāy-a pī-py-ā-ná-s y-ā-ya-tē pass 'itur', ep Goth jē-r and Lith. $j\acute{o}$ -ju khy- \bar{a} -ya- $t\bar{e}$ pass. 'is seen', cp aor. \acute{a} -khy-a-t. $\dot{s}y$ - \dot{a} --ya-ti 'curdles, congeals', cp. part \$\bar{s}\bar{t}\delta-s\end{are}\$ Compare \$\bar{S}\$ 580 and 588.

Also verbs in -ā-yá-ti in which the root formed a complete syllable. The speaker imagined these to be parallel with prtanā--yá-ti manā-yá-ti and the like (§§ 617, 769) — there really was no difference in character, if we are right in identifying the verb-suffix -a- with the feminine suffix - and therefore kept the old accent without changing it as in traya-te. grbhā-yú-tı 'seizes' O Pers a-garbāya-m, Skr damā-yá-tı 'overpowers' (cp Lat domāre), Skr. tuda-yá-ti 'pushes', prušā-yá-ti 'spurts out'.

§ 787. Greek. * $\delta \nu \bar{a}$ - $\nu \omega$ 'I do' $\delta \nu \bar{a}$ $\delta \nu \bar{a}$, beside Lith daraā 'I do', cp. $\delta \rho$ - $ai\nu \omega$ § 621 p. 159. * $\pi \bar{a}$ - $i \omega$ 'I bring into effect, carry out' for ' $\hbar \nu \bar{a}$ - $i \bar{\nu}$ (II § 117 p. 371) El. imper $i \pi$ - $i \pi$

 $\chi \rho - \eta - \iota \omega$ 'I give an oracle' $\chi \rho \bar{\omega} \chi \rho \bar{\eta}$, partic $\chi \rho \dot{\eta} \omega r$ Od 8. 79. Dor * $f\lambda - \eta - \iota \omega$ 'I wish, desire' (beside Lat vel - le) $\lambda r\bar{\omega} \lambda \bar{\eta}$ El opt $\lambda \eta \dot{\omega} r\bar{\omega} r$, the Gort $\lambda \dot{\eta} \dot{\omega}$ (e.g. 3^{rd} pl. conj $\lambda \dot{\eta} \dot{\omega} \nu r\bar{\omega}$) for * $\lambda \dot{\eta} \dot{\omega} \omega$ is formed like $\chi \rho \dot{\eta} \dot{\epsilon} \rho \iota \omega r$ was this derived from $\tau \dot{\sigma} \chi \rho \bar{\eta} \dot{\omega} s$, or was it a formation like Skr. causal $py\bar{a} - y - \dot{u}ya - tr^{\rho}$ (cp. § 801). * $rv - \eta - \iota \omega$ 'I rub, scratch' (cp. $rv - \dot{\nu} \omega$) $rv \bar{\omega} v r \dot{\eta} = (\tau - \iota \omega)$ 'I live' for * $\chi \dot{\nu} - \eta - \iota \omega$ 'I rub, scratch' (cp. $rv - \dot{\nu} \omega$) $rv \bar{\omega} v r \dot{\eta} = (\tau - \iota \omega)$ 'I live' for * $\chi \dot{\nu} - \eta - \iota \omega$ 'I rub, scratch' (cp. $rv - \dot{\nu} \omega$) $rv \bar{\omega} v r \dot{\eta} = (\tau - \iota \omega)$ 'I live' for * $\chi \dot{\nu} - \eta - \iota \omega$ (cp. § 496 p. 56), with $-\bar{\sigma} - \chi \dot{\omega} - \omega$ Gort. $\partial \dot{\omega} \omega \omega c \dot{\omega} \dot{\omega} \omega r \tau$ etc.), like O C Sl z n a j a beside () H G z n a u c (§ 735) $z u - \eta - \iota \omega$ 'I grind or crush to pieces' (Skr. $z - \dot{u} - \dot{u} c$) $v - \dot{u} c u c$ $v - \dot{u} c$

§ 738 Italic In Latin only the 1st sing press has the 10-suffix, the other persons being formed after Class X. This was perhaps due in part to the early loss of the personal ending -mi in Italic, whence it became possible for volō to take its place in the same scheme as vult, eō beside it.

-ā-zō in-trō nō hiō see §§ 735, 736. fl-ō, pl. fl-ā-mus Also juv-ō lav-ō and suchlike Sec § 583 p. 124

-ē-jō pleō neō fleō vieō, also taceō scateō videō sileō faveō valeō habeo etc See §§ 587, 590, 708

§ 739. Germanic Monosyllabic stems in -i- and $-\bar{o}$ -almost wholly gave up the unthematic inflexion, and took that with $-\underline{to}$ - (§ 592 p 133) OHG $n\bar{a}u$ 'I sew' $kn\bar{a}u$ 'I know' Goth vaia OHG $w\bar{a}u$ 'I blow', see § 735. OHG $dr\bar{a}u$ 'I turn, twist', *tr- \bar{e} - from \sqrt{ter} -, ep Gr $\tau \varphi - \bar{\eta} - \mu a$ 'hole' $\tau \not \in \rho - \bar{\epsilon} - \tau \varphi o - \nu$ 'borer' There may be Idg $-\bar{o} - \underline{\iota} \bar{o}$

in O.H.G bluou bluouu O.Sax blōiu 'I bloom', cp. Lat. $fl-\bar{o}-s$ (gen $fl-\bar{o}-r-is$); it must remain uncertain whether we have $-\bar{o}-i\bar{o}$ or $-\bar{a}-i\bar{o}$ as the ending in O.H.G. gluouu gluouu 'I glow' (\sqrt{ghel}).

Dissyllabic stems in $-\bar{e}$ - and $-\bar{a}$ - have both non-thematic and zo-flexion

Dissyllabic ē-stems in (tothic show lo-flexion in forms containing ái, such as paháis paháip (the 1st sing is puha 'I am silent') for ~-ē-li-zi -ē-li-āi Lat tuceō Compare also Goth. vitáip 'looks at, regards'. Lat. videō, siláip 'is silent' Lat. sileō, habáip 'has': Lat habeō Compare § 592 p 133, § 708 pp. 238 ff On the spread of this ē-flexion to nasal present stems, see § 605 pp 146 f.. § 623 p 160, on the tormation of ē-verbs from nouns, § 781 3

Dissyllabic a-stems were inflected just like the later stratum of a-denominatives (as Goth fairinon from fairino) The 20-extension is clearly seen only in Anglo-Frisian, as A.S. 1st sing -ie pl -iad for pr. Germ. -ō-ia- see § 781 1 Examples of "primary" verbs are. Goth mito I mete, measure OH.G mezzom I moderate, Goth bi-láigo I lick all over (cp. Lith. laižaū 'l lick' inf laižý-ti), O.H.G. fehōm 'I adorn' OH.G mahhōm I make'. ('ompare § 579 p. 121, § 585 p. 126.

§ 740 Balto-Slavonic

-a-zo-. Lith. žió-ju O.C SI tru-ją see § 735 Lith jó-ju 'I ride' (jó-ti), see § 587 p 128. Probably also Lith gró-ju (gró-ti) O C SI gra-ją (graja-ti) 'I croak', Lith. kłó-ju 'spiedd out' (kłó-ti), and others Some of the Lithuanian "Iteratives" are in place here, as lindo-ju beside lindau 'I put in' (lindo-ti), rýmo-ju beside rýmau 'I sit supported on something' (rýmo-ti), svyró-yu 'I move to and fio' (svyró-ti), ctc. So in O.C SI, Iteratives such as sŭn-čdują 'comedo' (-čda-ti), raz-vrīzają 'I open' (-vrīza-ti), sŭ-birają 'I gather' (-bira-ti). Compare §§ 586, 783.

-ē-jo-. O.C.Sl. blě-ją vě-ją see § 735. grè-ją 'I warm'

(grěja-ti). gové-ją 'veneror, vereor' (gově-ti). Lat faveō, see § 735. Lithuanian "Diminutives" (Iteratives), as byrě-ju 'I scatter a little' or 'I am a little scattered' (byrě-ti), kylě-ju 'I lift a little' (kylě-ti), lukě-ju 'I wait a little' (luké-ti) Compare §§ 593, 784.

 $-\bar{o}$ -jo-possibly in O.C.Sl. zna-ja, § 735, and perhaps in a few, none can say which, of O.C.Sl verbs in -a-ja (Idg. $-\bar{a}$ -and $-\bar{o}$ - ran together in Slavonie)

§ 741. Reduplicated Forms

The Reduplicated forms with ā-suffix mentioned in § 595 have some of them the μο-extension Lat 1st sing ululō, Lith ulūlō-ρu 'I call, shout for joy' (cp ulō-ρu Gr. ελάω § 735 p. 262). Lat 1st sing murmurō, cp O H.G. murmurōm murmulōm. Lat 1st sing tintinnō tintinō beside tintinn-ιō (Class XXVII)

A later (ireek form is $\varkappa v\gamma - \iota \rho \tilde{\alpha}$ $\varkappa \iota \rho \nu \tilde{\alpha}$ (Hesych) beside $\varkappa i \gamma - \nu \rho \tilde{\alpha} - \mu u$, see § 594 p 135.

O.H.G. $r\bar{e}r\bar{e}m$ A.S. $r\bar{a}rie$, connected with Lith $r\bar{e}-\jmath u$ $r\bar{e}-t \bar{e}$ 'I cry out loud', comes from a pr Germ * $ra\jmath - r\bar{e}-\jmath \bar{e}$, see § 708 p. 240. \bar{e} in $r\bar{e}$ - was a suffix, as may be seen from Lett. $r\hat{a}-\jmath u$ 'I scold' and other words (Per Persson, Wurzelerw pp 91, 196)

Class XXIX

Nasal Stems + -20- for the Present Stem

- § 742. The formations here to be treated are connected with Classes XII to XVIII, and fall into three groups those connected with (A) Classes XII to XIV, (B) Classes XV and XVI, and (C) Classes XVII and XVIII.
- § 743. (A) -n-io- is fairly common only in Greek. Lesb. γλίννω Hom. Att κλίνω 'I bend' for *κλιν-μ-ω, beside O.Sax. hlmō-n etc. κρίνω 'I separate, choose out, distinguish' for *γρι-ν-μω. σένομωι 'I plunder' for *σι-ν-μο-μωι. ὀ-τρύνω

'I urge on' for * \dot{o} - $\tau \dot{o}v$ - $r_{-l}w$ qu'ivm 'I show, make visible' for * $q\alpha$ - $r_{-l}m$, beside Armen. $b\alpha$ - $n\alpha$ -m 'I open' (*bha- $n\alpha$ -m), \sqrt{bha} -. $\chi alvw$ 'I gape' for * $\chi \alpha$ - $r_{-l}w$ See § 601 p. 144, § 611 p. 150. Lat. li-n- $i\bar{v}$ (li-n- \bar{r} -mus) beside li- $n\bar{v}$. Skr. vi- $l\bar{v}$ n $\bar{a}mi$ 'I dissolve, disintegrate' (intr.), see § 598 p 142 O Ir. $\alpha r\alpha$ -chri-nm 'difficiscor, I go to pieces' beside Skr $\dot{s}r$ - $n\dot{a}$ -ti, see § 604 p. 146. O H.G. spennu (= Goth *spanya) 'I attract, charm' beside $sp\alpha$ -nu 1. e *spa- $n\bar{v}$ $\sqrt{sp\bar{e}}$ -, see § 614 p. 152.

-n-20- was used even in pr. Idg, and is especially common in Sanskrit and Greek Idg. 18-η-2ō· Skr. 15-an-yá-ti 'sets in motion, excites' (ir. laivin 'I quicken' beside Skr. 15-ana-t, Skr. tur-an-yá-ti 'hastens', bhun-an-yá-ti 'is brisk' Gr. αι'αίνω I make dry' beside Lith saŭs-inu, όλισθαίνω 'I slip' beside όλισθαίνω, τεφσ-αίνω 'I make dry, αναίνων εγνυος ἀν, ελ-qλ-αίνω 'I bubble or gush out', δη-αιτώ 'I do', νη-αίνω 'I complete', ξ-αίνω 'I scratch' and many more, -αινώ became a very productive suffix Armen. -αινώ, as mer-αινω 'I die', like Gr. μαρ-αίνω. O.H G gi-wahannen 'to recount' (pret gi-wuoŋ), A.S. wæcnan 'awake' (pret wōc) See §§ 618—621, § 623 pp 156 ff, § 711 p 246

§ 744. (B) Present Stems with "Nasal Infix' become very common in Greek and Baltic. In explanation of the examples given below see §§ 628, 629, 631, 632, 634—637, pp 164 ff.

Gr. πτίσσω πτίιτω '1 bray, pound' instead of older *πτινσ-μω, Lat. pīns-iō (pīns-ī-mus), beside Skr mnáš-ti á-pįš-a-t

Skr. pass vand-ya-tē beside vandu-tē 'praises, honours' compare váda-ti ud-yá-tē, not a very old form.

Gr λίζουσι παίζουσιν probably for *λινδ- $\iota \omega$; σκίμπ- $\iota \omega$ 'I throw violently at' perhaps for *σκιμπ- $\iota \omega$, beside Skr kšip- λύζω 'I sob' for *λυγγ- $\iota \omega$, ep. λύγξ λυγγάνομια λυγκαίνω, $\sqrt{s'a'}$ μk- sia^*ug -. πλάζω 'I strike, knock away' for *πλαγγ- $\iota \omega$ 'I shout, cry' for * ι λαγγ- $\iota \omega$ 'I shout, cry' for * ι λαγγ- $\iota \omega$

Lat. $vinc\cdot i\bar{o}$ (\bar{i}) beside Skr vi-vyak-ti 'embraces, surrounds' 3^{rd} dual $vi-vik-t\acute{a}s$ $sinc\cdot i\bar{o}$ (\bar{i}) beside sacer.

Lett. mi/chu 'mingo' for *minz-ju. Lith. jùng-iu 'I yoke, put to'. skùnd-žiu 'I weep, bewail myself' beside pra-skundù (pret. -skudaŭ) 'I begin to smart'. sunk-iù 'I strain, filter, let something run through' beside Lett. swak-s 'resin'. Lett. kamp-ju 'I grasp, grip' beside Lat. cap-iō Lith. lenk-iù 'I bend' \(\sim \left{leq}\)-. sténg-iu 'I put my strength to' beside Gr. στ./βω. O C Sl. žeždą 'I covet' (inf žę-du-ti) beside Lith geid-žiù. glęždą 'I look' (ględě-ti) beside O H.G glīzu ob-ręštą 'I find' (-rešti)

§ 745. (C) Rare forms, undoubtedly late, are all that meet us in this section. O.C.Sl. mi-nu-ja, 'I go over' beside mi-na, see § 649 p 185

Class XXX

Root + s-Suffix $+ -x_0$ - (the -s- x_0 - Future).

§ 746. Two groups of forms, with Present and Future meaning respectively

(A) With Present meaning fairly common nowhere but in Sanskrit, and for the must part clearly later extensions of the s-Present As regards the examples here following, see §§ 656 and 657, pp 190 ff.

Skr. tras-ya-ti beside tr-ása-ti 'trembles', Lith. tres-nì 'I am in rut' used of bitches (inf trēsti) Skr pluš-ya-tē pass. of plō-ša-ti 'burns, singes', Lat prū-r-iō (prūrīre). Avest. uxš-ye-itī beside vax-ša-iti 'makes grow', Goth. vahs-ja 'I grow' (pret vōhs).

Skr śliż-ya-ti 'hangs on to, sticks to' pass. śliż-yá-tē, Avest. sraeż-ye-iti (same meaning) beside Skr śrē-ša-ti á-śli--ša-t. Skr íš-ya-ti Avest iš-ye-iti 'sets in motion' beside Skr i-ša-tē. Skr tviż-ya-ti 'is excited, distracted' beside 3rd pl. á-tvi-š-ur ghuš-ya-ti 'crics out, announces loudly' pass. ghuš-yá-tē beside yhō-ša-ti. Pass rahš-ya-tē beside rák-ša-ti 'guards, saves' Pass gras-ya-tē beside gr-asa-ti 'devours'.

Lith. $t\bar{e}s$ - $\imath\hat{u}$ 'I stretch' beside Skr. ta-sa- $t\imath$ etc.

§ 747. (B) With Future Meaning.¹) Even as early as the proethnic period -s-20- (or -98-20-) must have already become a simple suffix for expressing the future. This group of forms grew out of Classes XIX and XX, particularly forms with the strong-grade of root syllable; compare Skr. tasyá-tē and ta-sa-ti (Goth -ħin-si-ħ) á-ta-s-mahi, śrōšyá-ti Gr rhei-σύμεθα in Hesychius) and śi-ō-ša-māna-s, vakšyá-ti and Avest. vax-ša-itē (ν μεq- 'speak'), sakšya-ti (Gr ξω) and sáh-ša-nt-ν seğh- (ξξ 657 ff), very rarely from forms with root-syllables in a weak grade, as Avest būšye-iti (pr. Ar. doubtless *bhūśza-ti, cp Skr sū-šya-nt- ξ 748) Lith. bú-siu (Gr φύ-σω) beside Skr bhū-ša-ti (ξ 659 p 194) Sanskrit forms with -išya-were derived from the iš-aorist, compare vēdišyá-ti with the aorist stem vēdiš- in á-vēdiš-am.

The oldest meaning of the sio-future was probably that of Wish, which weakened to a mere future Compare the desiderative meaning of Skr forms like ti-stīr-ša-tē (§ 667 pp. 198 ff), and the future meaning of such others as O In. no-gigius § 668 p 200.

1) Hadley, On the formation of Indo-European Futures, 1859, in his Essays, pp 184 ff. [G Meyer] Th Benfey, Uber die Entstehung und die Formen des idg. Wackernagel Griech xregiova, Idg Forsch II 151 ff explanation of xxsquowou and the similar Hometic future forms I concur with Wackernagel, see § 757 Rem. p 277). Janson, De Graeci sermonis paulopost-futuri forma atque usu, Rastenburg 1844. --J. Schmidt, Über das Futurum im Aksl., Kuhn-Schleicher's Beitr. iv 239 ff

Only in Aryan and in Balto-Slavonic is the sio-future certain. In such forms as Gr. deiso it cannot be proved that after s an p has been lost, and they may be regarded as conjunctives of the s-norist, delto fut, being the same as $\delta \epsilon i \xi \omega$ conj of $\epsilon \delta \epsilon i \xi \alpha$, and as Lat. $d\bar{\imath} x \bar{o}$ beside Special attention should be given to Epic forms like imper olos oloses beside fut. olow, imper. o ψεσθε beside fut. ő wouai, which make strongly for this view (see § 833). On the other hand, I know of nothing to prevent fut. deigo being derived from *\delta_in-\sigma_im (Skr. dekšyāmi) The same doubt is suggested by futures of the type of τενέω τενώ (cp. Skr. tanišyāmi), which as conj aor may be compared with eidew είδω from ήδεα (§ 836) 1) We may conjecture that in Greek the Idg. forms with -sio- and the conj. agrist had run together; as, in Lithuanian, beside du'siame du'sime du'siate du'site, the future answering to Skr dāsyámas dāsyátha, we find used in the same way the Aorist Injunctive forms du'sme du'ste. Compare the Author, M. U III 58 ff.; G Meyer, Gr. Gr.² 473 f.: Johansson, Deriv Verb Contr 203 ff.

Spite of this uncertainty, the Greek future may be treated here along with the Aryan and Balto-Slavonic sec-future.

Remark I know of no evidence to support Ascoli's assumption (Sprachw Briefe. 65 ff), that $-n\epsilon\omega$ in the Doric future comes regularly from *- $n\epsilon\omega$ = Skr. -syāna Lith. -sau

§ 748. Pr. Idg We have two endings to distinguish, -sio- and -sio- (-esio-).

(A) -sio The regular form of the root, as has been said in the preceding section, was strong grade (with e in the e-series). Thus the matter remained in Aryan; cp. $d\bar{e}k\check{s}ya-ti$ beside pres. $di\check{s}a-ti$ $di\check{s}-ya-ti$. Thus it often is in Lithuanian, as $re\tilde{m}-siu$ from \sqrt{rem} , versiu from \sqrt{uert} . But in Lithuanian the form fell under the influence of the infinitive

It is striking that Homer uses no such form as τενείω ἐλαίω parallel
to τελειω for *τελεσ-χω, λιλαιομαι for *λιλασ-χο-μαι.

stem, and we have liksu following likti, instead of *leiksiu (pres lėkmi, lekù), and beside rem-siu (rem-ti) a variant rim-siu, inf rim-ti (pres. rimstù), beside vei siu (veñ sti) a variant viñ siu, inf. viñ sti (pres. virstù). In Greek, the vocalism of the future always agrees with the s-aorist, and this was mostly regulated by the present. τέρινω like ετεριμα from τέριω, γράνιω like εγραιμα from γράφω, γλύψω like έγλυνια from γλύνω, ὀμόνεω like ωμορξα from ὀμόργνν-μι Exceptions τείσω like ετεισα, but pres. τίνω (for *τι-ν ν ω), μείξω like εμειξα, but pres. μίγ-ν ν μι.

√rem- 'rest' Skr. 1 q-sya-tē 'he will rest', Lith. rem-su 'I will support' (rem-ti) rim-siu 'I will grow calm (in mind)' (rìm-ti). \(\sqrt{men-}\) 'think': Skr mq-sya-tē, Lith m\(\ti\)-siu (mi\(\ti\)-ti, pres men-ù). $\sqrt{qe_i}$ - 'pay a penalty' etc.. Skr $c\bar{e}$ -šyá-ti Gr τεί-σω (τεῖσω, pres τίνω) γ pleu- 'swim, rinse, wash'. Skr $pl\bar{v}$ -šya-ti, Gr. $\pi\lambda\varepsilon\dot{v}$ - $\sigma\sigma$ - $\mu\alpha$ i ($\pi\lambda\varepsilon\tilde{v}\sigma\alpha$ i), Lith $pl\acute{a}u$ -sm(płáu-ti). Vuert- 'vertere': Skr. vart-syá-ti, Lith. versin 'I shall turn' (versti) virsiu 'I shall fall down' (virsti) Vuerg-'to work, be active' Avest. part. mid varesya-mna-, Gr κρξω (ερξαι). V serp- 'crawl': Skr. srap-sya-ti sarp-sya-ti Gr ξοψω √ terp- 'give joy'. Skr. trap-sya-ti tarp-sya-ti (the (i'owai) latter in the Grammarians), Gr τέρψω (τέρψω). $\sqrt{der k}$ 'see'. Skr drak-šyá- $t\imath$, Gr δέρξομω (ἐδερξάμην). \sqrt{qert} -'cut, strike sharply' Skr. kart-sya-ti (instead of *cart-, cp karta-tı § 522 p 85), Lith. kırsıu (kırstı, pres kertù) V legg- 'leave' Skr rēk-šya-tē, Gr λείψιο (λεῖψαι), Lith. lk--siu (llh-ti, pres. leki) \(\sigma\) ueid- 'know, sec' \(\sigma\) Skr. v\(\bar{e}t\)-sya-ti, Gr. εἴσομαι (εἴσασθαι), Lith. 182-výsiu (-výsti). V deik-'show'. Skr dēk-šya-tı, Gr. δείξω (δείξαι). V bheudh- 'awake, observe'· Skr. bhōt-sya-tı, Gr. πεύσομαι, Lith bùsiu (bùsti) V jeug- 'ungere' Skr yōk-šya-tı, Gr ζεύξω (ζεῦξαι), Lith. jùnk--siu like junk-ti following the present jungiu 'coquere': Skr pak-šya-ti, Gr. πέψω V dhegh- 'burn' Skr. dhah-šyá-tı, Lith. dèk-sıu (dèk-tı) V seq- 'to be with, follow'. Avest. hax-šye-iti, Gr. εψομαι, Lith. sèk-siu (sèk-ti) Ved- 'eat': Skr at-sya-tı, Lith. ésiu (ésti) V says- 'grow

dry' Skr. $\dot{s}\bar{o}k\dot{s}ya-t\iota$ (pres. $\dot{s}\dot{u}\dot{s}-ya-t\iota$, see I § 557.4 p. 413), Lith $sa\ddot{u}s\iota\iota\iota$ ($sa\ddot{u}s-t\iota$) \lor $dh\ddot{e}$ -'place, lay' Skr $dh\ddot{u}$ - $sya-t\iota$, (†r. $\vartheta\dot{\eta}$ - $\sigma\omega$, Lith $d\ddot{e}$ - $s\iota\iota\iota$ ($d\ddot{e}$ -ti). \lor $d\bar{o}$ -'give'. Skr. $d\bar{a}$ -sya-ti, (†r. $\delta\dot{\omega}$ - $\sigma\omega$, Lith $d\ddot{u}$ - $s\iota\iota$ ($d\ddot{u}$ - $t\iota$) \lor $st\ddot{a}$ -'stand': Skr. $sth\ddot{u}$ -sya- $t\iota$, Gr. $\sigma r\dot{\alpha}$ - $\sigma\omega$ $\sigma r\dot{\eta}$ - $\sigma\omega$ ($\sigma r\ddot{\eta}\sigma a\iota$), Lith $st\dot{o}$ - $s\iota\iota$ ($st\dot{o}$ - $t\iota$).

V bhey- 'become': Avest. bū-šye-tr, (ἐr. φt-σω (φῦσαι), Lith. bú-siu OCSl. *byšą (only in partic. byšąšteje byšęšteje 'τὸ μέλλου'). Analogously, Skr sਧ-šya-nt- beside sō-šyá-ti Avest hao-šye-tr from V sey- 'drive on, quicken, enliven' (cp perf. Skr sasúva like babhúva). Compare § 747 pp. 268 f.

- § 749. (B) $-\partial s_{\ell}o^{-}$ ($-es_{\ell}o^{-}$) Skr. $-i\check{s}ya^{-}$ for $-\partial s_{\ell}o^{-}$. But (ir $-\varepsilon o^{-}$ comes from $-es_{\ell}o^{-}$, unless (more probably) $-\varepsilon o^{-}$ is for $-es_{\ell}o^{-}$, and belongs to the conjunctive aorist (see § 747) 1) The Sanskrit $-i\check{s}ya^{-}$ could be added to any root ending in a consonant; but Gr. $-\varepsilon o^{-}$ was the regular future suffix only with roots in a liquid or a nasal. So we have Skr $k\check{s}ari\check{s}ya^{-}ti$ it will flow, dissolve' (gramm) answering to Greek $q \vartheta \varepsilon \varrho \varepsilon \omega$ $q \vartheta \varepsilon \varrho \widetilde{\omega}$ if shall destroy' (Hom. $q \vartheta \acute{\varepsilon} \varrho \sigma \omega$), Skr. $ham\check{s}ya^{-}ti$ 'he will strike, kill' to Gr. $\vartheta \varepsilon v \acute{\varepsilon} \omega$ $-\widetilde{\omega}$ 'I shall strike' ($\bigvee ghen^{-}$), Skr. $tanv\check{s}ya^{-}ti$ (gramm.) 'he will stretch' to Gr $\tau \varepsilon v \acute{\varepsilon} \omega$ $-\widetilde{\omega}$ 'I shall stretch', Skr. $h\check{s}anv\check{s}ya^{-}ti$ 'he will hurt' (gramm) to Gr. $\pi \varepsilon v \acute{\varepsilon} \omega$ $-\widetilde{\omega}$ 'I shall kill'. A few Greek examples have $-\alpha o^{-}$ with $-\alpha^{-} = -\vartheta^{-}$, as $\varkappa \varrho \varepsilon \mu \acute{\omega} \omega$ $-\widetilde{\omega}$ 'I shall hang', op $\varkappa \varrho \acute{\varepsilon} \mu \check{\omega} \mu \omega$, $\nu \varrho \varepsilon \mu \acute{\omega} \vartheta \varrho \breve{\omega}$ 'hanging basket'. Compare §§ 834 ff
- § 750. Futures with -sio- have also been formed, from the proof period onwards, from stems consisting of V + Determinative We may mention
- (1) Stems with $-\bar{a}$ $-\bar{e}$ -, or $-\bar{o}$ (Class X). *dr- \bar{a} 'run': Skr. dr- \bar{a} -sya-ti (gramm), Gr. $\delta \varrho \hat{\alpha}$ -so- $\mu \alpha \iota$. *mn- \bar{a} think of, remember': Skr. $mn\bar{a}$ -sya-ti (gramm.), Gr. $\mu \nu \hat{\alpha}$ -sw $\mu \nu \hat{\eta}$ -sw. * $g\bar{a}$ 'go': Skr $g\bar{a}$ -sya-tē (gramm.), Gr. $\beta \hat{\alpha}$ -so- $\mu \alpha \iota$ $\beta \hat{\eta}$ -so- $\mu \alpha \iota$.

¹⁾ I now follow Bartholomae (Bezz Beitr xvII 109 ff) in holding that -ε- which follows the root in τενέω γενετως and like words is Idg. -ε-, not -2- (I § 110 pp 103 ff.)

- * ψ - \bar{e} 'blow'· Skr. $v\bar{a}$ -syu-ti, Gr. $\dot{a}\eta$ - σ 0- μ aı. * $g\bar{n}$ - \bar{o} 'noscere': Skr. $j\bar{n}\bar{a}$ -sya-ti, G1. $\gamma\nu\omega$ - σ 0- μ au * μ 1- \bar{e} * μ 2- \bar{e} 'see, know': Gr. Dor $i\partial\eta$ - $\sigma\bar{\omega}$ Lith. pa-vydesiu ('invidebo'), Gr. $\epsilon i\partial\eta$ - $\sigma\omega$ Lith. veizde-siu * $m\eta n$ - \bar{e} 'think': Gr. μ a $\nu\eta$ - σ 0- μ aı, Lith. mine-siu. Compare §§ 578 ff.
- (2) Stems with s-elements (Class XIX and XX) tr-es'tremble' Skr. tras-išyá-ti, Gr τρέσ(σ)ω, Lith. trēsiu for *tres-siu (pres tresiù). Skr. ēš-išya-ti beside ē-ša-ti 'seeks, desires';

 šlēkšya-ti beside šli-š-ya-ti 'clings to' á-šli-ša-t, dakš-išya-tē

 beside dák-ša-ti 'suits, accommodates', akš-išya-tī beside ak-ša-tē
 'reaches'. With Skr. akšišya-tī, bhāsišya-tē (gramm.) compare
 the aorist forms ákšišur ábhāsišta § 839. Gr. σείσω for *σεισ-ω
 (perf. σέ-σεισται) from σείω (*tuez-s-) 'I shake', ξέσ(σ)ω from ξέω
 (*qs-es-) 'I scrape, smooth', Lith tēsiu for *tes-siu beside
 tē-s-iù 'I stretch' Compare §§ 655 ff.
- (3) Stems with dh- and d-elements (Class XXV). Skr yōt--sya-ti beside yō-dha-ti 'gets into motion', Lith jùsiu beside jundù 'I begin to tremble', *zeu-dh-Skr rāt-sya-tı beside rā-dh-ya-tē 'carries out successfully', mrad-išya-ti beside vi--mrada-ti 'softens' (mr-ada-) Gr. λλάσ(σ)ω from λα-δ- 'break But it is doubtful whether $\pi \lambda \dot{\eta} \sigma \omega$ 'I will fill' is $*\pi \lambda \dot{\eta} \vartheta - \sigma \omega$ off" (cp πλή-θω πέπλησται πληστέο-ς) οι πλή-σω (cp πλήτο πέπληνται), whether ελεύσομαι 'I will come' is *ελευθ-σομοι (cp ηλυ-θο-ν ελευστέο-ν) or ελεί-σομαι (cp ελήλυ-τε προσ-ήλυτο-ς), whether $\pi \dot{v} \sigma \omega$ 'I will make rot' is $*\pi \dot{v} \vartheta - \sigma \omega$ (cp. $\pi \dot{v} - \vartheta \omega$) or $\pi \dot{v} - \sigma \omega$ (cp. Lith. There is the same doubt in Lith. futures like plausing from plau-d-žiu 'I wash' (Idg. 'pleu-d-), spráusiu from spráu-d--žiu 'I subdue' (Idg *spreu-d-) qésiu from gé-du 'I sing' As we know not in what period of Lithuanian these verbal classes arose, we are not compelled to assume that plausiu, say, comes from a supposed form plantsio The fact may be that plau-siu is really future to plau-ju, and then, on the analogy of geulžiù geisiu geisti, and others of this kind, plausiu was involuntarily associated with plaudžiu plausti as its future. Compare §§ 688 ff.

F'orms with other present-signs sometimes make a s20-future in different languages; as Skr. indhišyati Gr. λλάγξω Lith. jùnksiu See below, §§ 752 ff.

§ 751. The indicative with -sio- seems to have had in proethnic speech a participle attached, but no more (Skr. da-syá-nt-, Gr δώ-σων, Lith dial. då'sus for *dåsiās, O.C.Sl. byšāšteje). In Sanskrit grew up a conj with Ar -ā-, and an augmented preterite, and Greek developed an opt. with -z-. Sec §§ 753, 759.

§ 752. Aryan. -s20- and -s20-, but the latter is only to be found in Sanskrit (-išyu-). There is no example of a future in Old Persian; this is probably due to chance. In Sanskrit and Avestic this future was a living and productive type. It is used, true enough, less often in Vedic than later; but then in Vedic injunctive and conjunctive forms were used with future meaning.

To the exx cited in §§ 748—750 may be added. Skr. vakšyá-ti Avest. vaxšye-itē beside Avest. vák-ti 'speaks', Skr. Skr janišyá-ti Avest partic. zahya-mna- beside Skr. ján-a-ti 'begets'; Skr bhantsyu-ti bandhišya-ti beside badh-ná-ti 'binds'; vōcišya-tē beside rôc-a-tē 'shines'.

In Sanskrit we meet with specimens of this future made from presents of any kind (cp § 750) mārkšya-tē (beside mrakšya-tē) from márš-ti Class I and márja-ti Class II 'wipes' sīdišya-ti (beside satsya-ti) (cp. § 494 p 55, § 514 p. 81). from stda-ti Class IV 'sits' (§ 550 p 106) dadišya-të (beside dā-syá-ti) from dá-dā-ti Class V dá-d-a-ti Class VI 'gives': jahišya-ti (beside hā-sya-ti) from jú-hā-ti ja-h-a-ti 'leaves, jāgarišyá-ti from jā-gar-ti Class V 'wakes' (§ 560 pp. 109 f.) undhišya-ti from inddhé Class XV 'burns' Vaidh-. aśnuvišya-ti from aś-nó-ti Class XVII 'attains', /invišya-ti from n-no-ti Class XVII n-nva-ti Class XVIII sets in motion, tıtıkšišya-tē from the desid. tí-tık-şa-tē Class XXI khyāyıšya-tē from pass. khy-ā-ya-tē from tij- 'to be sharp'. Class XXVIII 'is seen'.

Rather commoner in the later language is the future of denominatives in -yá-ti, Class XXXI, as gōpāyišyá-ti from gōpā-yá-ti 'guards' (gōpá-s 'guardian'), and of present stems in -áya-ti (Causatives), Class XXXII, such as vyayišya-tē from vy-áya-ti 'enwraps, covers', dhārayišya-ti from dhār-áya-ti 'holds'.

§ 753. Sanskrit has an augmented preterite from the future stem, meaning on the point of, as ábharišya-t 'he was just going to take away, wished to take'. But this form usually stands as a conditional, and so Conditional it is called.

There are a few scattered instances (in the Maha-Bharata) of Injunctive forms, implying wish, as 2nd pl mid. bhavišya-dhvam

Similarly there are scattered Conjunctives , as Ved. 2^{nd} sing. $karišy\acute{a}$ -s

§ 754 Greek It is not quite certain that the Greek σ -future has any immediate connexion with the Aryan and Balto-Slavonic sign-type, as we have seen already (§ 747 p. 269).

With - $\sigma\sigma$ - (§ 748) and - $\varepsilon\sigma$ - - σ - (§ 749), we find a third suffix, - $\sigma\varepsilon\sigma$ -.

§ 755 (I) -60-, a productive suffix in Ionic-Attic and elsewhere. Examples in §\$ 748 and 750

There is an apparent anomaly in keeping σ after sonants in the future $\sigma\tau\dot{\eta}$ - $\sigma\omega$, as in the aorist $\ddot{\epsilon}\sigma\tau\eta\sigma\omega$. This is most simply explained as being due to the analogy of $\delta\epsilon\dot{\delta}\xi\omega$ $\ddot{\epsilon}\delta\epsilon\dot{\delta}\xi\omega$ etc., consonantal stems. Compare I § 564 p. 421.

Stems in Liquid or Nasal generally conform to Type II (§ 757), but roots in ϱ have $-\sigma\omega$ as well in the language of Homer and poets of the epic school $\varphi\vartheta\dot{\epsilon}\varrho\sigma\omega$ (pres $\varphi\vartheta\dot{\epsilon}\dot{\varrho}\omega\omega$ 'I destroy') beside $\varphi\vartheta\varepsilon\dot{\varrho}\omega$ $-\epsilon\tilde{\omega}$

Remaik Why is it that beside a fut φθέρσω there is no fut *φθεροω as might be expected from finding **ειτα side by side with **εκροαω* This is explained without difficulty if we suppose **εκρα to be analogical, and due to **εκερα **εκρα and the like (I § 563 Rem 2 p 419), for there were no such futures as **εκερω for **εκερα Wackernagel's view of **εκερα (Kuhn's Zeitschr XXIX 127 ff) is not convincing, to my mind

Wackernagel would anyhow have to meet the question whether, if $_{\varphi}\theta \neq _{\varphi}\sigma \omega$ really comes from $*_{\varphi}\theta \neq _{\varphi}\sigma \omega$, it must not have kept $_{-\varphi}\sigma -$ under all circumstances, wherever the accent lay, cp. if $\sigma \omega \omega$ for $*_{i}$ is $\sigma \leq _{\varphi}\omega \omega$ contrasted with $\varepsilon \approx _{\varphi}\varepsilon \omega \omega$ for $*_{\varphi}\varepsilon \approx _{\varphi}\varepsilon \omega \omega$ (The Author, Gr G1.2 p 61)

- § 756. - $\sigma\sigma$ forms futures from all sorts and kinds of stems, present, aorist, and perfect. Often there are parallel σ -aorists.
- (1) Hom. διδώ-σω (beside δώ-σω) from δί-δω-μι 'I give', Class III. διδάξω from δι-δάσνω, Class XXIII (aor. ἐδίδαξα). Hom. ἀίδω Att ἄξω from ἀίσσω 'I rush', ποι-φύξω from ποι-φύσσω 'I pant, puff', ποι-πνύσω from ποι-πντω 'I snort, pant, puff', Class XXVII (aor ἡιξα ἢξα etc)
- (2) λάγξω (εκλαγξα) beside κλάζω 'I cry, shout' for *κλαγγ-μω, Class XXIX, and κλαγγάνω, Class XIV (§ 621 p 158, § 628 p. 165, § 744 p 266) Ion. λαμψομαι beside Att. λήψομαι from λαμβάνω 'I take', Class XIV (§ 621 p. 158). σφίγξω εσφιγξα) from σφίγγω 'I tie, bind', Class XVI (§ 631 p 167).
- (3) From the Denominative presents κηφέσσω 'I announce' ἀφπάζω 'I carry off' σαλπίζω 'I trumpet μειλίσσω 'I soothe, pacify' τελίω -ῶ 'I complete' we have the futures κηφύξω άφπάξω σαλπίγξω μειλίξω τελίσ(σ)ω (aor. ἐνήφυξα etc.), on the analogy of τφάξω πφάσσω, σφάξω σφάζω and the like (cp θανμανῶ ἀγγελῶ § 757) What made it all the easier for these futures to arise, was that there existed in pre-Greek times denominative participles like κηφῦν-τό-ς (ἀ-κήφυπτο-ς), which seemed parallel to πφᾶκ-τό-ς σφαν-τό-ς (II § 79 pp. 224 f)
- (4) The combination $-\eta$ -so- was an especial favourite (§ 750 1 p 271) First, a class of futures from the stem of the aor pass. In $-\eta$ - ν . $\mu\alpha\nu$ - $\dot{\eta}$ -source beside $\dot{\epsilon}$ - $\mu\dot{\alpha}\nu$ - η - ν 'I grew mad' (\sqrt{men} -), like Lith min- $\dot{\epsilon}$ -sue beside min- ϵ . $\sigma\beta$ - η -source beside ϵ - $\sigma\beta$ - η - ν 'I was quenched' (\sqrt{seg} -) $\dot{\varrho}\nu$ - $\dot{\eta}$ -source beside $\dot{\epsilon}$ - $\mu\dot{\gamma}$ - η - ν 'I flowed' ($s\nu$ - μ - μ) μ - ν - η -source beside $\dot{\epsilon}$ - $\mu\dot{\gamma}$ - η - ν 'I mixed myself' ($\sqrt{mei}\dot{k}$ $mei\dot{g}$ -). With the same type, $\delta\sigma\dot{\eta}$ -source beside $\dot{\epsilon}$ - $\delta\dot{\sigma}$ - θ - η s = $\dot{\sigma}$ - $d\iota$ - $th\bar{a}$ s See § 589 pp 129 f In Doric, this intr-pass future has an active ending η - $\alpha\nu\eta\sigma\epsilon\dot{\tau}$ $\sigma\nu\nu\alpha\chi\theta$ $\eta\sigma\sigma\dot{\nu}$ - $\tau\nu$ ($-\sigma\epsilon\sigma$ instead of $-\sigma\sigma$ -, § 758) Further. $-\eta$ - $\sigma\sigma$ occurs in forms like $\sigma\chi$ - $\dot{\eta}$ - $\sigma\omega$ (beside

εξω) from stem of ε-σγ-ο-ν 'I held' (cp. εσχηκα), μελ-ή-σει from μέλει 'It is a cair' (cp ἐμέλησε μεμέληνε), ἐθελ-ή-σω from ἐθέλω 'I wish' (ἐθέλησα ἢθέληκα), ενδ-ή-σω from ενδω 'I sleep' (cp καθ-ενδησαι); of the same kind are Lith drebέ-siu from drebù 'I tremble', teké-siu from tekù 'I run, flow' The same type of future is seen in stems marked as present or aorist, where it retains the special tense mark, as καθ-ιζήσομαι from ζζω 'I set' for *si-zd-ō (cp -ιζησαι ζζηνα), βονλήσομαι from βονλομαι 'I wish' ground-form *gl-no- \$ 611 p. 150 (cp. βεβούλημαι) βοσνήσω from βό-σκω 'I pasture, feed', τνητήσω from τύπ-τω 'I strike' (cp. ἐννητησα), χυιφήσω from χαίρω 'I rejoice' for *χαρ-μω (cp ἐναίνησα), όζήσω from ὅζω 'I smell' for *οδ-μω (cp ιζήσα), πεπιθήσω from πε-πιθ-εῖν 'to persuade', πεφιθήσομαι from πε-φιδ-έ-σθαι 'to spare'

- (5) The original identity of flexion in the groups typified by *τ̄μᾱ-μω (from τ̄μᾱ 'honour') and 'δρᾱ-μω (δρῶ 'I do') compare Aeol ἐτ̄μᾱ-μεν like εδρᾱ-μεν 'we ran' made the later set of denominatives run parallel to verbs of Classes X and XXVIII in other tenses besides the present. Hence τ̄μᾱσω φιλήσω μισθώσω like δράσω νήσω γνώσωμα, similarly Lith dovanó-siu from dovanó-ju 'I present' (dovanὰ 'gift') like ἔιό-siu from ἔιό-ju, and jůkử-siu (jůkử-ju 'I jest' from jūkα-s 'jest'), in correspondence with (fr μισθώ-σω Following out the analogy further we get νοτί-σω from νονίω 'I make dusty' (κόνι-ς 'dust') δανρί-σω from δανρύω 'I ery' (δάνοι 'a tear'), so also Lith dalý-siu from daly-jù 'I share, divide' (dalì-s 'a part'). Compare § 773
- (6) Futures in -σω from perfect forms έστηξω from έστηγα Ί stand λελείψεται from λέλειπται 'is left over' μεμνήσεται from μίμνηται remembers' Ποπ. νεχαρήσω from πεχαρηώς glad'.

§ 757 (II) -en- -an- -no- -vo-

-eo- (becomes -10- in Doi , I § (.4 p. 51) is the ordinary future suffix in liquid or nasal stems, as $\varphi \vartheta \varepsilon \varrho \dot{\varepsilon} \omega - \tilde{\omega}$ (beside Hom $\varphi \vartheta \dot{\varepsilon} \varrho \sigma \omega$), $\varepsilon \varepsilon r \dot{\varepsilon} \omega - \tilde{\omega}$, see § 740 p. 271.

Hence -εο- spread to the future of stems which had a nasal formative suffix in the present, as φανέω -ῶ from φαίνω

Where -ao- and -oo- appear, the first vowel belongs to other forms besides the future, and so too once or twice -ε- im -εo-. νοειάω -ῶ from νοέμα-μωι Ί hang νοεμά-σσαι νοεμά-σσαι νοεμά-σσαι δμούμαι δμούμαι from δμό-σσωι 'swear' ὁμώμο-τωι ἀπ-ώμο-το-ς ολέω όλῶ from δλέ-σσωι 'to destroy' ὁλώλε-να όλε-τήρ.

An exceptional group contains the Attic and Ionic future in $-i\epsilon\omega$ - $ii\bar{\omega}$ from a present in $-i\bar{\epsilon}\omega$, as $ii\omega$ from $ii\omega$ from $ii\omega$ if bring, for which * $ii\omega$ might be looked for, to judge from $ii\omega$. We may conjecture that the type was once actually * $ii\omega$, and that * $ii\omega$ became $ii\omega$ $ii\omega$ as the effect of the constant use of $ii\omega$ $ii\omega$ is an intruder also in $ii\omega$ $ii\omega$

Remark There is some doubt whether -ιέω instead of *-ίω be as old as Homer, no argument can be based on the traditional accent of κομιῶ ἀειχιῶ χτεριοῦσι, and ἀγλαιεῖσθαι may be a mistake for ἀγλαίεσθαι. These are the only Homeric specimens of the type

§ 758. (III) -050- (Doric Future).2) Whether -00-

We can hardly regard ἀμφι-έω as being *-f-εσ-ω, and a conj. to Skr. νάν-ίξ Gr. ἐπι-εσται.

²⁾ For the Dorio Future, see now Solmsen, Kuhn's Zeitschr. XXXII 546 ff.

Skr. -sya-, or whether it is the conj of the s-aorist, $-\sigma\epsilon\sigma$ - is $-\sigma\sigma$ - transformed under the influence of $-\epsilon\sigma$ -.

-σεο- is the ordinary Doric suffix answering to Attic -σο-; as $\pi \varrho \vec{\alpha} \dot{\xi} \dot{\epsilon} \omega$ -ίω $\beta \varrho \vec{\alpha} \dot{\theta} \eta \sigma \dot{\epsilon} \omega$ -ία, but Att $\pi \varrho \dot{\alpha} \dot{\xi} \dot{\omega}$ βοηθήσω. A few instances of it occur in Ion -Att, as $\varphi \epsilon \nu \dot{\xi} \varrho \tilde{\nu} \mu \omega$ beside $q \epsilon \dot{\nu} \dot{\xi} \varrho \mu \omega$ (ep. the Author, Gr. Gr. 2 p. 170 footnote 1)

§ 759. Greek, besides the indic., partic, and inf future, ($\delta\epsilon l \xi \omega \delta\epsilon l \xi \omega \nu \delta\epsilon l \xi \epsilon \nu$) had only the optative, as $\delta\epsilon l \xi \omega \mu$, which is quite a new formation (see the Author, Gr. Gr. 2 p 188)

§ 760. Balto-Slavonic. Only -sio-, and nothing which answers to Skr. -išya- and Gi. -to- -ao-, and so forth. In Lithuanian the future in -siu lived on, and still lives and forms a type, but in Slavonic it died before historic times began, all but the sole form OCSI. byšąšteje (§ 748 p. 271).

§ 761 The Lith fut -siu is inflected differently in different dialects. The 1st pl is sometimes differently in different dialects. The 1st pl is sometimes differently in like vercia-m(e) § 725 pp 254 ff (cp. partic. dial differently in lightages, and O.C.Sl byšąšteje), sometimes it is differentle) — in High Lithuanian, for instance — like āvi-m(e) § 727 pp 257 ff.¹) The other forms which occur, pl differentle differently in differently differently in differently in differently differentl

Examples of Lith fut. are given in \$ 748 pp 269 f

Where marks of the present are retained in the future, they are retained in the other forms from the Infinitive Stem.

Future from Present Stem with inserted nasal. jūnksiu from jūng-iu 'I put in the yoke', shūsiu from skūndžiu 'I weep, bewail myself', lenksiu from lenkiù 'I bend', § 744 p 267. Compare Gr. λάζξω etc § 756.2 p. 275

From Present in -inu -enu. saŭst-sin from saŭsinu 'I make dry', gyvé-siu from gyvenù 'I dwell', see § 624 p. 161. Compare Gr. adavā § 757 p. 277.

¹⁾ J Schmidt's assumption (Neutra, pp 423 ff) that dissime is an optative, is wrong Idg -7- would remain long in Lithuanian.

The combination -e-sin. miné-sin from menù I think of pret mine, ep Gr. naví-σομαι ε-μάνη-ν drebë-sin from drebù 'I tremble' stenë-sin from stenù 'I groan'. penë-sin from penù 'I nourish, fatten'. avë-sin from aviù 'I have something on my feet' Compare § 756 4 p 275

Later Stratum of Denominatives dovanó-siu from dovanó-ju 'I give' (dovanà 'a gift'), pāsaho-siu from pāsaho-ju 'I recount, tell' (pā-suha 'tale'), like žió-siu from žió-ju 'I open my mouth' (§ 740 p. 264), cp. (ir τīuά-σω. jūhū'-siu from jūhū'-ju 'I sport, jest' (jūha-s 'jest'), jūdū-siu from jūdū-ju 'I have a black sheen', analogous to Gr μισθώ-σω. dalý-su from daly-jū 'I share, divide' (dalī-s 'a share, part'), szirdy-suū-s from szirdy-jū-s 'I take to heart' (szirdī-s 'heart'), like (†r /ovt-σω. Compare § 756 5 p 276, § 773. heláu-siu from heláu-ju 'I travel' (hēla-s kčle-s 'way').

Appendix to Classes XXVII-XXX.

Extension of Present Stems in -sho-, -to-, and -dho- -doby the Suffix -10-

§ 762. The reason why this extension of the -sko-class (XXII), the -to-class (XXIV) and the -dho- and -do-class (XXV) is relegated to an Appendix, and they are not allowed a class each to themselves, has been explained in § 704 p 239.

§ 763. io-extension of sko-stems (§§ 669 ff)

Sanskrit can show only a few passive forms with -ya-(cp. §§ 709 and 710, pp 243 ff), in stems where -sko- has lost its character as a present-forming suffix prch-yá-tē from prchá-ti 'asks', vānch-ya-tē from vāncha-ti 'wishes' (§ 671 p. 203). Possibly vršr-yá-tē, from vršcá-ti 'tears to pieces', is another, see § 669 p. 202

Lith dresk-iù 'I tear' trans, beside driskaŭ. OC.Sl. ištą for *īsk-ją beside iską 'I seck' (\$ 677 p. 210).

Remark Gr $\tau \epsilon \dot{\omega} \sigma \omega$ 'I cower, cringe', in view of $\pi \tau \omega \nu \alpha \dot{\omega}$, may be derived from * $\tau \tau \omega \sigma x - \mu \omega$ However, $\pi \tau \dot{\omega} - \dot{\omega} - \dot{\omega} - \dot{\omega}$ and $\pi \tau \dot{\omega} - \dot{\chi} \dot{\omega} - \dot{\omega}$ make it more natural to suppose that it comes from * $\tau \tau \omega - \dot{\chi} - \dot{\omega} \omega$ or * $\tau \tau \omega - \dot{\chi} - \dot{\omega} \omega$.

Cp πτήσσω 'I frighten' for *πτα-α-ιω, εγρήσσω 'I wake for *εγρη-α-ιω or -χ-ιω, and verbs in -ωσσω such as διειρώσσω (διείρωες) υπιώσσω λατερώσσω. The x- and χ-suffixes in these words were probably the same as -ko- in -ω-ko-; see § 669 p 201

§ 764. -to-stems extended by -20- (§§ 679 ff.)

Skr. nft-ya-ti 'dances, plays' pass. nft-ya- $t\bar{e}$ beside nf-ti- $m\bar{a}$ -na-s, pass yat-ya- $t\bar{e}$ beside $y\dot{a}$ -ta- $t\bar{e}$ 'joins itself, strives' (§ 681 p. 213)

Lith suncziù 'I send', perhaps from *su-n-to- (§ 686 p. 218) OCSl ob-rešta 'I find' perhaps from *rē-to- (§ 687 p. 218).

Remark Gr $de\dot{\nu}_{\sigma\sigma\omega}$ (only Hdt vi 119) seems to be not an extension of Att $de\dot{\nu}_{\tau\sigma}$ 'I pour, I draw water' (§ 682 p 214), but an analogical form, suggested by $de\dot{\nu}_{\sigma}$, on the type of $de\dot{\nu}_{\sigma\sigma}$ de $\dot{\nu}_{\sigma}$ 'I pour, draw water'

§ 765 -dho- and -do- stems extended by -10- (§§ 688 ff)

(1) -dh-10-. Skr. yú-dh-ya-tē 'gets in motion, fights', rá-dh-ya-tē 'carries to a successful end' pass. rādh-ya-tē (§ 689 p. 220), kiú-dh-ya-ti 'scorns', sā-dh-ya-ti 'comes to its goal' (§ 691 p. 221)

(§ 689 p 220), ἐσθ-ίω 'I eat' (§ 694 p. 223, § 713 p. 247)
Lith shér-d-žm 'I burst, blow up' (§ 689 p. 219).

(2) $-d-\mu o$. Only passives in Sanskrit; as $mrd-y\acute{a}-t\bar{e}$ from $mr-d-n\bar{a}-mi$ '1 grind to pieces, crush' vi-mi udati 'softens' (§ 690 p 220), $kh\bar{a}d-ya-t\bar{e}$ from $kh\acute{a}-da-ti$ 'bites up, chews', $\bar{\iota}d-ya-t\bar{e}$ from $\bar{\iota}da-t\bar{e}$ 'honours, praises' (§ 692 p 222).

(fr. λλίζω 'I flood' for *λλι-δ-μω, ἐν-φλυζω 'I spurt out' for *φλυ-δ-μω (§ 695 p. 224)

Lith. plan-d-žiu 'I wash, cleanse', spráu-d-žiu 'I compel, press down (§ 690 p. 221, § 700 p. 227).

(3) Doubtful: -dh-10- or -d-10-. Avest. siž-d-ye-iti 'drives away' (§ 69.3 p 223). Lith. mér-d-žiu 'I lie a dying', skél-d-žiu 'I split or burst', sru-d-žiu 'I make bloody', Lett. e'r/chu 'I separate' for *erd-1-u (§ 701 p 227).

Class XXXI.

Later Group of Denominatives with Present-Suffix -20-

§ 766 We here discuss present stems like Skr dēva-yú-ti 'he worships the gods' from $d\bar{e}v\dot{a}$ - 'god, Gr $\varphi\iota\lambda\dot{\epsilon}$ -(ι) ω 'I treat as a friend' from $\varphi\iota\lambda\delta-\varsigma$ ($\varphi\iota\lambda\dot{\epsilon}$ -) 'friend', Skr namas-yá-ti he offers worship or respect' from námas- 'respect', Gr. $\tau\iota\lambda\dot{\epsilon}(\sigma-\iota)\omega$ 'I end' from $\tau'\lambda\delta_{\sigma'}$ 'end' ($\tau\dot{\epsilon}\lambda\dot{\epsilon}\sigma$ -) This is a productive type in almost all languages of our group, and beyond all doubt is as old as the parent language.

As I have pointed out (§ 487 p. 43, § 703 p 232), no hard and fast line can be drawn between the verbs which call Denominative and what they call grammars usually When denominative verbs were formed in Primary Verbs the parent language, no new and peculiar mode of conjugation was invented for them They ran in old grooves, the present stem preferring as its type stems with the secondary suffix -20-It was only by degrees that inflexional peculiarities sprang up, chiefly because -10- coalesced with the final of the preceding noun-stem, and thus made new suffixes But the peculiar denominative endings often came again to be the same as those of primary verbs by the action of the laws of language.

So great are the changes worked by analogy, that it is rather rare to find a denominative agreeing with the Idg. type in more than one or two languages. Thus, Lat. oper-ā-rī (Umbr osatu 'operato' Osc úpsannam 'operandam') and nōmin-ā-re do not correspond with Skr. apas-yá-ti and Gr òromaíra, which do represent the Idg. inflexion, because, in Latin, denominatives of s- and n-stems had been attracted into the ā-class in pre-historic times.

§ 768 (1) Consonant Stems

Skr. rajas-yá-ti 'turns to dust' (m older Sanskrit only rajas-yá-s 'dusty'), Goth rigiz-ja 'I darken myself', common ground-form reges-zé-ti, from rájas n 'dust' riqis n (gen. nazis, see II § 132 p 420) 'darkness' Skr apas-yú-ti 'is active' from apas n 'work' apas- 'active', numas-ya-ti Avest. nemai-ye-iti 'bows, reveres, worships' from námus nemo n. 'reverence' Skr. avas-yú-ti 'secks help' from ávas n 'help'. Gr Hom. teleio telio Att -o 'i end' for *teleo-jo (aor. teleo--σαι) from τέλος η 'end', Hom ανείομαι ανέομαι 'I heal' (aor. asέσ-σασθαι from a.o. n 'healing' Lat fulgur-iō from fulgur (). H G refs(i)u 'I blame, scold, chasten', op Skr. rapás- 'bodily hurt' — Avest xrvīš-ye-iti i e rruvīš-ye-iti 'sheds blood' from a stem *x1(u)viš-, ground-form 'gruyss-, closely akin to Skr hravíš- 'raw bloody flesh' (π γελάω 'I laugh' for *γελασ-ιω from stem γελασ- (nom γ'λως) 'laughter' ground-form *geləs-(II § 134 p 425)

(ir δνοιαίνοι (toth namn-ja I name' from δνοια namō n. 'name', the former for *-my-iō, the latter for *-my-iō (ep Idg. *my-iō- and *mr-ijō-, 'bhu-iō- and *bhu-ijō- § 707 p. 235). All the following have Idg -y-iō-. Skr izšan-yā-ti 'is in heat or passion' from ižšan- 'male, brahman-yā-ti 'is pious' from brühman- i 'piety' brahmān- 'pious person, one who prays'; Avest. vyāxmanye-iti 'deliberates, thinks over' from vyāxman in assembly, consultation' Gr τενταίνω 'I carpenter, make' from τίντων 'carpenter, workman'; σπερμαίνω 'I give forth seed' from σπίσαια 'seed' (toth glitmin-ja 'I shine' from *glitmin-(cp ().] (if glizemo) 'brightness'.

Skr. vadhar-yá-ti 'shoots, lets off a missile' from vádhai n. 'shot'. Gr τειμαίου 'I mark, fix' from τέιμυς n. 'mark, boundary' We may perhaps assign to this section Latin desideratives like scrīpturiō from scrīptor, ēsuriō from ēsor, -turiō for *-tor-iō *-tr-2ō 1)

¹⁾ This explanation follows Thurneysen, Uber Herkunft und Bildung der lat. Verba, p 66 A different view is that of Kretschmer, Kuhn's

G1 βλίτιω 'I cut the honey-combs' (fut. βλίσω) from μέλιτη. 'honey'. Lat dent-iō from dēns Goth veitvōd-ja 'I certify' from veitvōd- 'witness' Skr. ιšudh-yá-tι 'begs, prays' Avest. ιšud-ye-ιτι 'confesses guilt' from Avest išud- 'a cry by which one acknowledges sin'. Gr κορι'σσω 'I helm, arm' for *κοριθ-μω from κόρις -νθ-ος 'helmet'. Lat custōd-iō from custōs -ōd-is.

(fr. λιθάζω 'I stone' from λιθάς -άδ-ος 'stone', μιγάζομαι I mingle with' from μιγάς -άδ-ος 'mixed, motley' In Germanic, 'verbs in -atjan answer to this Greek denominative group, but the noun stems from which they came had disappeared before the historic period Goth. lauhutja O.H.G. lougazzu lohazzu 'I shine' (cp. Gr. λεινάς), Goth svōqatju 'I sigh' kaupatja 'I box the ears' (pret kaupasta), O.H.G. blerchezzu 'I lighten' (cp. II § 128 p. 409)

To the denominatives formed from cons stems have always belonged to-participles, as (ir ἀνεσ-τό-ς Lat. sceles-tu-s, Gr. βανμα-τό-ς (Skr śróma-ta-m O II (i hlimmun-t Lat cōgnōmen-tu-m), Skr ún-ap-ta-s etc See II § 79 pp 224 f, § 82 p 249.

§ 769. (2) \bar{a} -stems Idg $-\bar{a}$ - $i\delta$ -

In a great many languages there are found other forms without -10-, as 1st pl Armen Jana-mk Gr Aeol $\tau t\mu \bar{a}$ - $\mu s r$ Lat plantā-mus () ir no chara-m Goth salbō-m Lith j k sto-me. These kept close with the old primary ā-verbs of Class X. In principle, the two groups are really the same

Gr $\delta g \acute{a} \omega - \tilde{\omega}$ '1 see', O.H G $bi-nai\bar{o}m$ 'I observe, am ware' beside Gr. *Fogā in qoovgā 'outlook, protection' O.H.G. wara 'care, protection' Lat $for\bar{o}$ -ā-s etc., O.H.G. borōm 'I bore' from O.H.G. borā 'borer' (ground-form 'bhrr-ā-), but cp. § 579 p. 122 Skr $prtan\bar{a}$ -yá-ti 'fights' from $prtan\bar{a}$ 'fight', $man\bar{a}$ -yá-ti 'is attached' from $man\acute{a}$ 'attachment'. Gr $\tau\bar{\iota}\mu\acute{a}\omega$ - $\tilde{\omega}$ '1 honour' from $\tau\bar{\iota}\mu\acute{a}$ (- η) 'honour', $\eta\acute{g}\acute{a}\omega$ - $\tilde{\omega}$ 'pubesco' from $\eta\acute{g}\bar{a}$ (- η) 'ripeness', $\delta gu\acute{a}\omega$ - $\tilde{\omega}$ '1 drive or urge' from $\delta gu\acute{a}$ (- η) 'movement' Lat. $plant\bar{o}$ -ā-s etc from planta, $c\bar{u}$ rō from $c\bar{u}$ ra,

Zeitschr xxxi 464 he starts with an adj like *scrīptu-ro- (op. Att. oitv--gó-, from oitó-c nitío: II § 74 p. 184).

lacrimō from lacrima. ().Ir. rannaim 'I divide' from rann f. 'part', īccaim 'I heal' from īcc f. 'health' Goth. salbō O II.G. salbōm AS sealfie 'I salve, anoint' from O.II G. salba AS. sealf 'salve, outment', Goth. karō 'I take trouble, care a bout O.II († charōm 'I bewail, lament' A.S. cearie 'I care' from Goth kara 'care' () II G. chara 'woe, sorrow, lament' AS. cearu caru 'care', O H.G. klagōm 'I lament' from klagā 'lament'. Lith. lankó-ju 'I bend to and fro, try to make malleable' beside lankà 'valley' (-lankā 'a dip or bend', O C.SI lakā-jā 'I trick, deceive' from lakā 'bending. bosom, rascality, deceit'; Lith. dovanó-ju 'I give' from dovanà 'gift' byló-ju 'I speak' from bylà 'speech'. pāsako-ju I recount' from pā-sahā 'tale'; O C Sl. kotora-ja se 'I fight' from kotora 'fight', vonja-ja 'I smell' from vonja 'a smell'

Very common are a-verbs derived from o-stems, principally with transitive meaning, - 'to show oneself so and so, to make so and so' Ski priyā-yá-tē 'he makes friends with' Goth frijo I treat kindly' O C.Sl prija-ją I am kind to, stand by some one' from Skr priyá-s dear, friend' Goth *frijaın frija-pvu love' Lat novō (-ā-s) OH (+ niuwōm I renew beside Lat novo-s 1) O Ir. com-alnam ().II.G. follom 'I fill' from O Ir lan (Idg 'pl-no-s) O.II.G. fol (Idg. *pl-no-s) 'full'. Lat gusto, O.H G costom AS costie 'I try, taste' beside Skr. niš-ta-s 'beloved' etc., V ĝeus- Skr tilvilāná-tē 'shows himself rich' from tiliila-s rich', i athirāyá-ti hurries up' from rathirá-s hasty', stāyá-ti keeps the sule' from stá-m order', sumnāyá-ti shows goodwill' from sumná-s well-wishing' sumná-m goodwill', Avest vāđāye-iti strikes' from iāda- m blow'. Gr φοιβάω I cleanse' from goïpo-c clean', ἀτιαάω I treat as dishonoured' from α-τίμο-ς 'dishonoured' μωμάσμαι I scorn' from μιδιιο-ς 'scorn', έδνάoμια I portion' from εδνο-ν 'clower'. Lat. cavō from cavo-s, firmō from firmu-s, sano from sanu-s, as mo from pl. arma, cumulo from cumulu-s, damno from damnu-m. O.Ir marbaim I kill' from marb

¹⁾ Gr. rei w 'I turn up fallow land' probably has its place elsewhere. See Sutterlin, Zur Gesch. der verba denom im Altgr., I 21 f.

'dead', derbaim I prove' from derb 'certain', forcennaim I end' from cenn for-cenn 'end', biathaim I nourish' from biath 'nourishment', ep. Gall. Γαισάτοι pl pilati' beside Gall.-Lat gaesu-m 'spear' Goth. vaírbo O.H.G werdom 'I value, treasure' from vaírb-s werd adj worth', Goth. ga-vundō OH.G. wuntōm 'I make wounded, wound' from vund-s wunt 'wound', Goth ga-leiko 'I compare, make like' from ga-leih-s like', O.H.G. ebanom I make even' from eban even', Goth bi-ráubo I rob, plunder' O.H.G. roubom I rob' from O.H.G. roub robbery', O.H.G. zeihhonom I mark, draw from zeihhan mark. Lith. kuno-ju 'I lift to and fro' from kilna-s 'high' (unless it be preferred to class this verb in § 606 p. 147), mirksnio-ju I wink, twinkle' from mirksni-s (gen. mirksnio) 'glance, a single movement of the eyelid', Lett at-jáunáju I make young, renew' from jáun-s young', qualá-ju I honour', from gud-s 'honour' apschugáju 'I enclose' from schug-s 'hedge, fence', O.C.Sl déla-ja I do, make' from delo 'work', pri-vesluja 'adveho' from veslo 'oar, rudder'. The beginnings of this series of derivatives from a-verbs from noun stems in -a- goes back to the procthuic stage; at that time there were often subst abstr with -a- alongside of o-adjectives and o-substantives Thus the O II & follow may be derived, if we please, not from fol but from Germ *fullo- = Avest. per nā-'fulness', which appears in Goth, fullo OH.G folla 'fulness'; or Lat offensare may be derived from subst. offensa and not from oftensu-s (cp II § 158 pp. 473 ff) These and like verbs were from the first closely associated with the o-stems belonging to these \bar{a} -nouns; and thus it became possible afterwards to derive verbs in -a-zō straight from o-stems. The ending -azō found favour for another reason too, namely, that there was from the earliest period another group of verbs in -āiō, originally denominative too, but with this character long since lost. I mean verbs of Classes X and XXVIII, like Lat. hi-o Lith, ξ_i - δ -ju, Gr $\dot{v}\lambda$ - $\dot{\alpha}\omega$ Lith ul- δ -ju (Lat $ulul\bar{o}$), Lat juv- \bar{o} mic-o, O.Ir. scaraim, Goth mit-o O.H G mezzom, Lith. lind--o-ju O.C Sl. raz-vržz-a-ja (§§ 579 ff. pp. 121 ff., §§ 734 ff. pp. 261 ff.).

As well as these present stems in -ā-μō, most languages have non-present stems with -ā- just like those formed from ā-verbs in Classes X and XXVIII. The latter are the type, the former copied from them. The commonest are verbal nouns, always more or less closely connected with the verb system, with the suffixes -to- -ti- -no- and so forth, e.g. Gr. τ̄μη-τό-ς τ̄μη-σι-ς from τ̄μόω, Lat plantā-tu-s plantā-tiō from plantō, O Ir carthe 'loved' from caraim, cēssad 'suffering' from cēssaim, Goth lāpō-p̄-s 'mvited' lāpō-n 'to invite' lāpō-n-s 'invitation' from lāpō, Lith dovanó-tu-s 'given' dovanó-ti 'to give' from dovanó-μι. O C'Sl laka-nā 'deceived' lāka-tī to deceive' from laka-ja. Then we have certain tenses, as (ii. τ̄μη-σω. Lat plantā-rem, Lith. dovanó-siu ().('Sl. lāka-chā. Compare § 756 5, p. 276, § 761 p. 279, § 822 6.

- § 770 (3) From o-stems there were two ways of deriving the present stem. One of them, doubtless the older, suppresses the final vowel of the noun stem. This we have already seen in Classes XIV and XXIX, exemplified by Skr. turan-yá-ti from turána-s, Gr. δλισθαίνω from δλίσθανο-ς (§§ 616 ff. pp. 154 ff, § 743 pp. 265 f.) This is just how to-adjectives are generally derived from noun stems in -o-, as Skr áśv-iya-s Gr 『ππ-io-ς from áśva-s 『ππο-ς (II § 63 p 126, and Rem. 3 p 132) The second, and commoner, formation ends in -e-tó- (ep. voc in -e, loc. in -e-t and so forth, II § 59 p. 108) This recals Skr. hiranyá-ya-s 'golden' from híranya-m 'gold', and Lut aureu-s (auru-m), if it is to be explained *aure-zo- (ep. II § 63 p 128) ¹)
- (a) With Aryan present stems in -an-2a-ti are associated but few from other o-stems Skr. adhvar-yá-ti 'performs an offering' from adhvará-s 'offering', vithuryá-ti 'staggers, reels' from vithurá-s 'tottering', reeling', rathahāmya-ti 'asks for a car' from ratha-kāma- 'desirous of having a car', Avest vāstrye-iti 'feeds' from vāstre-m 'meadow, field, fodder', avāstrye-itē

¹⁾ It is noteworthy how well the isolated Ved. varēyá-ti 'he woos (vará-s 'wooer') agrees with the above mentioned adj. in -ēya-, pāúrušēya-s from púruša-s and the like

'is idle' from avitstra- 'idle'. In Greek -airo was a fertile type (see § 776 6 b), and many other nouns in -o- took this formation in the present, as \$1900000 'I hate' from \$2900-3 'hated, hostile' (1 § 293 p 234), άγγελλω 'I announce' from αγγελο-, 'messenger', αιόλλω 'I move quickly backwards and forwards' from αλόλο-ς 'quickly moving', καμπύλλω 'I crease, bend' from γαυπύλο-ς 'bent', απινύσσω 'I am unintelligent' from *ά-πίνυτο-ς (πινυτό-ς 'intelligent'), μειλίσσω 'I soften, mollify' from nείλιγο-ς 'soft', γαλέπτω 'I crush, overpower' (c) § 682 with the Rem p. 214) The same kind of denominatives occurs in First those which contain abstract noins in -e-toand the like (II § 79 p 236), as trepeštą 'I tremble' 2nd sing trepešteši inf. trepetati from trepetii 'a trembling', blekošta 'I bleat' ınf. blekotati beside Czech blekot 'a yelping or barkıng', rüpüšta 'I growl' inf ruputati from ruputu 'a growling', skrižištą 'I rattle, gnash the teeth' mf. shrižituti from skrižiti 'a gnashing with the teeth', and others of this sort (the noun may also be a tā-stem, as kleveštą 'I calumniate' inf klevetati from kleveta 'calumny') Besides these I place here the present in -uia for *-ou-19, as besugg 'I am mad' 2nd sing -ujest inf -ovati from běsovů 'mad, devilish', and that from běsů 'demon', for further details see § 782 3 We cannot tell whether Idg. presents like Skr. turun-yá-tr and Gr oliovalnim, to which trepešta and besuga are parallel, survived down to Slavonic. At all events these present forms have nothing exceptional about them, as the Slavonic had a great number of primitive verbs ın -ją with inf. -a-ti, such as ližą lizati 'to liek' gyblją gybati 'to destroy, lose', and some of these put on the look of denominatives, as glagolya glagolati to speak' (cp. § 732 p. 260) did because of the kindred noun-stem glagoli word, and dusa duchati 'to breathe, blow' because of the noun duchă 'breath'. So it would be possible to believe that it is only on this analogy that trepeštą was formed from trepetii, and besujų from besovii

Whether the other Idg. languages had such denominatives is doubtful. In Armenian we meet with denominatives in -im, as taram-i-m 'l fade' beside an-taram 'unfading'. This group

is a new formation, on the lines of Class XXVI, § 711 p. 246, as Lat. custōdī-s fīnī-s follow verbs primitive like furc-ī-s (§ 777) But the contained stems in -½ō need not be compared with Skr turan-yá-ti, they may have arisen out of denominatives from z-stems. Similarly Lat catuliō (beside catulu-s) blandior (beside blandu-s) īnsāniō (beside īn-sānu-s) may be ad-formates of presents in -z-zō; and Germanic presents such as Goth. hráinja 'I cleanse (hráin-s 'clean') láusja 'I loose' (láus 'loose') may be either this or derived from -ezō (see b, below).

Skr vasna-yá-ti 'haggles' Gr. ωνέομαι 'I buy' from vasná-s -m wvo-c 'price' (for *Fwo-vo-, cp Solmsen, Kuhn's Zeitschr. xxix 81 f, for O.C.Sl. věno, see II § 66 p. 149). Lat seneō, Lith sené-ju 'I grow old' (-eju instead of *-eju, see below) beside Lith sena-s 'old'. Skr. amtra-vá-ti 'is hostile' from á-mitra-s 'foe', kulāya-yá-ti 'wraps itself up' from kuláya-m 'covering', Avest. vāša-ye-iti 'draws the chariot' from vāša- m. 'chariot', aša-ye-iti 'is pious' from ašu- 'pious' (cp. Skr. rtáya-ti with different accent, see §§ 793, 798), O Pers a-śāraya-m 'I protected, watched' from *sā-ra- (Skr. tr-ā-), not actually found Gr. ψιλέω -ω 'I treat as a friend' from φίλο-ς 'dear, friend', τοιρανέω 'I rule' from κοίρανο-ς 'ruler', νοστέω 'I return home' from νόστο-, 'homeward way', εὐφημέω 'I use words of good omen' from ev-qnuo-s 'of good omen' Lat. claudeo from claudu-s, albeo from albu-s, flaved from flavo-s, nigred from niger. Irish perhaps scorim scuirim 'I unharness' from scor 'enclosure for unharnessed animals' Probably forms in -e-10 = pr. Germ -uō are at the bottom of Germanic stems like Goth rigner it lains from rign rain, háurnja I blow on the horn' from haurn 'horn', Goth. lausja O II G. los(1)u 'I loose' from láus los 'loose', the last verb, like all transitive denominatives taken from adjectives in Germanic, can be counted to Class XXXII, see § 806 Balto-Slavonic has -e-10- instead of -e-10- (§ 782 2) Lith gådé-jå-s 'I am greedy' from qåda-s greed', heré-ju 'I grow in stalks, like a bush' from hera-s 'stalk', kéte-ju 'I get hard' from kéta-s hard'; 1) O.C.SI. razumě-

¹⁾ Kurschat, apparently with less correctness, këteju.

-ją '1 understand' from raz-umŭ 'understanding, reason', cēlē-ją 'I get well' from cēlū 'well, whole', o-žestočają 'I harden myself' for *o-žestokěją (I § 76 p. 66), from žestoků 'hard'.

Remark Greek verbs in $-\delta\omega$ have their parallel in Lith. verbs with $-\omega ju$. I conjecture that these endings are special upgrowths in these languages (§§ 778, 776.4, 782 2) Of course if Idg o in open syllables became Aryan \bar{a} , there is a possibility that Ar $-\bar{a}ya-ti$ in some words comes from *-o-ye-ti

- § 771 (4) i-stems, Idg. -12ό- Gr. μητΐο-μαι 'I devise, contrive' Lat. mētior 'I measure, sentence', 1) from μη-τι-ς 'counsel, resolve, cleverness' Skr. mā-ti-š 'measure, correct Skr. arātī-yá-ti 'brews mischief for some one' from árāti-š 'ill luck', janž-yá-ti 'asks for a wife' from ján-š 'wife', kavī-yá-tē 'acts like a wise man, is wise' from kaví-š 'wise man, seer' (on -Tyáti, see § 774). Gr. xovtw 'I make dusty' from κόνι-ς 'dust', δηρίσμαι 'I strive' from δηρι-ς 'contention', μηνΐω 'I grow angry' from μῆνι-ς 'wrath'. Lat finio from fīni-s, febriō from febri-s, crīniō from crīni-s, grandiō from grandı-s, lēniō from lēni-s O Ir. fo-dālım 'I divide up' (3rd sing. fo-dāli) from dāil 'part' Goth dáilja O H.G teil(i)u 'I divide' from Goth dáil-s stem dáili- 'part'; Goth. vēnja O H.G. wān(i)u 'I imagine, hope' beside Goth. vēn-s (stem vēni-) 'delusion, hope', Goth. dulpja 'I observe a feast' from dulp-s (stem dulpi-) 'feast', anamahtja 'I offer force to' from ana--maht-s (stem -mahti-) 'force'. Lith daly-jù 'I divide' from dali-s 'part', szirdy-ju-s 'I take to heart' (szırdi-s 'heart'); as regards -y-ju, instead of -i-ju, see § 782.2.
- § 772. (5) From u-stems, Idg. -u-ió-. Skr. gātu-yá-tı 'goes an errand' from gātú-š 'errand', vasŭ-yá-tı 'desires goods' from vásu 'goods', šatrŭ-yá-ti 'appears as a foe from šátru-š 'foe', ŋū-yú-tı 'is straight' from ŋú-š 'straight' (on -ū-yú-tı see § 774); Avest. anhu-ye-itı 'makes oneself master of' from unhu-š 'lord, master' Gr φīτι'ω 'I beget, produce' from φῖτι

A different account of mētior is given by Johansson, Beitr. zur Gr. Spr, 129

§ 773. We have now given the main lines of this denominative formation in Indo-Germanic

Now we have seen in § 769 p. 286, that \bar{a} -verbs of this formation very early yield to the analogy of \bar{a} -verbs of Classes X and XXVIII so far as to make such forms as Gr $\tau \bar{\iota} \mu \eta - \tau \dot{o} - c \bar{\iota} \tau \dot{\iota} \mu \eta - \sigma a$. Next, corresponding non-present stems with $-\bar{e}$ -, $-\bar{\iota}$ -, or $-\bar{u}$ - associated themselves with the presents in $-e - \dot{\iota} \bar{o}$ and $-u - \dot{\iota} \bar{o}$; to which were soon added verbs with $-\bar{o}$ - outside the present and with $-o - \dot{\iota} o$ - or $-\bar{o} - \dot{\iota} o$ - in the present, formed from o-nouns. In the case of Denominatives with $-\bar{e}$ - and $-\bar{o}$ -, the type was aided by \bar{e} - and \bar{o} - verbs of Classes X and XXVIII as well These non-present formations are all found in several branches of Indo-Germanic As far as our knowledge of the relations of the languages to one another now goes, it is hardly possible to say how many such forms are proethnic and how many are later

Gt. $\varphi i\lambda \eta$ -τό-c έ $\varphi i\lambda \eta$ -σω $\varphi i\lambda \eta$ -σω from $\varphi i\lambda \epsilon \omega$ ($\varphi i\lambda o$ -c), compare $v\eta$ -τό-c ε $v\eta$ -σω $v\eta$ -σω, $\mu \epsilon \lambda \eta$ -τέο-v ε $\mu \epsilon \lambda \eta$ -σε etc. (cp § 587 pp. 127 f, § 589 pp 129 ff., §§ 735 and 737 pp. 261 ff., § 756. 4 p 275). Lat claudē-rem (conj of s-aorist) from claudēo (claudu-s), compare $n\bar{e}$ -rem - $pl\bar{e}$ -rem, $vid\bar{e}$ -rem tacē-rem (§ 587 pp 127 f., § 590 p. 132, § 708 pp 238 ff., §§ 735 and 738 pp. 261 ff.) Lith $q\bar{u}d\dot{e}$ -ti-s $g\bar{u}d\dot{e}$ -si\(\vartheta\)-s from $g\bar{u}d\dot{e}$ -j\(\vartheta\)-s ($q\bar{u}da$ -s), O C.SI $c\bar{e}l\bar{e}$ -ti $c\bar{e}l\bar{e}$ -ch\(\vartheta\) from $c\bar{e}l\bar{e}$ -j\(\vartheta\)-s ($c\bar{e}l\bar{u}$), compare Lith. byr\(\varepsilon\)-s byr\(\varepsilon\)-s (s 740 p. 265). Gr a-dg-g-s-co-g-exov\(\vartheta\)-s Lat f\(\vartheta\)-s-tu-s-fin\(\vartheta\)-s-tu-s-fin\(\vartheta\)-s-tu dal\(\vartheta\)-s-tu (s-dal\(\vartheta\)-s-tu dal\(\vartheta\)-s-tu dal\(\vartheta\)-s-tu-s-fin\(\vartheta\)-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-s-tu-

-ō- is commonest within the verb infinite; as Gr. μισθω-

-τό- ς from $μισθό-<math>\varsigma$, Lat $aegr\bar{o}$ -tu-s from aeger (stem aegro-), Lith. $rag\mathring{u}$ -ta-s O.C.Sl. roga-t \check{u} 'horned' from $r\tilde{a}ga$ -s $rog\check{u}$ 'horn', being forms like Gr. $\tau\bar{\iota}\mu\eta$ - $\tau\dot{o}$ - ς from $\tau\bar{\iota}\mu\dot{\eta}$, Lat $barb\bar{a}$ -tu-s from barba. Perhaps it was just verbal nouns of this kind which in Greek were the starting point for $\dot{\epsilon}\mu\dot{\iota}\sigma\vartheta\omega$ - $\sigma\alpha$ $\mu\iota\sigma\vartheta\dot{\omega}$ - $\sigma\omega$ $\mu\iota\sigma\vartheta\dot{\omega}$, ep. $\dot{\epsilon}\tau\dot{\iota}\mu\eta$ - $\sigma\alpha$ $\tau\iota\mu\dot{\eta}$ - $\sigma\omega$ $\tau\bar{\iota}\mu\dot{\alpha}\omega$, so in Lithuanian, $\jmath\dot{u}k\dot{u}$ -su $\jmath\dot{u}k\dot{u}$ - $\jmath\dot{u}$ like $dovan\acute{o}$ -su $dovan\acute{o}$ -ju. Compare § 770 Rem. p. 289

The shapes taken by present 10-stems in different languages will concern us in §§ 774 ff

The meaning originally conveyed by this denominative group was that the subject of the verb stood in some kind of relation to the noun it came from. What this relation was had to be gathered from the meaning of the noun and of the context. But it often happens that we find in historical periods some special sense attaching itself to a special denominative ending (-ājō -ejō etc.). In Sanskrit, for example, -īyā-ti implied desire, in Latin, -ō -ā-s -a-t were factitive, and -eō -ē-s -e-t This special meaning always started with some intransitive. particular verbs, where it came from the essential meaning of the noun these verbs were derived from. Then other verbs followed the same pattern. To conform to the pattern, the stem of the ground-noun is often quite neglected, thus we have Skr. putruá-ti from putrá-s on the model of janiyá-ti (from $j\acute{a}n\imath-\check{s}$). As we saw in § 769 pp. 284 f., it is the ending $-\bar{a}-\imath\bar{o}$ which seems first to have trespassed beyond its own domain.

As a result of this specialising of endings to some particular sense, the same noun often served as base for several denominatives with different meanings, as Gr. ἐστιάω 'I receive at the hearth, entertain' and ἐστιόω 'I make into a hearth, found a house' both from ἐστία, ἀσθενέω 'I am weak' and ἀσθενόω 'I make weak', from ἀσθενής, Lat clāreō 'I am clear' and clārō (-ā-s) 'I make clear' from clāru-s

Remark. Considering how close was the tie between noun and derivative verb, it is not to be wondered at that such verbs often caused the creation of nouns which looked as though the verbs were derived from them ("noms postverbaux"). So, on the analogy of lacrimāre · lacrima, rixārī · rixa we have Lat. pūgna coined to match pūgnāre, which was

derived from pūqnu-s. in Greek, similarly, we have τίκη 'victory' growing out of νινάω 'I bring down, conquer' (II § 86 p 256) There are many certain examples of this retrospective tendency in modern languages, as Ital. and Span. liga Fr lique from liqūre, Mod H G. wach from wachen. See Bréal, Mém. Soc Ling iv 82 f, Osthoff, M U. iv 224.

§ 774. Aryan. The original forms leave the old groove but rarely.

We shall treat below (§ 793) of the shifting of denominatives in -a-yá-ti to the track of Class XXXII, which gives rise to such a form as Skr. mantrá-ya-tē.

Instead of Idg -1-16- and -1-26-, we find in Vedic -1-yá-1-yá- and -1-yá- -1-yá-; see §§ 771, 772 It is not clear whether the analogy of primary verbs like $n\bar{\imath}-y\acute{a}-t\bar{\imath}$ $\dot{s}r\bar{\imath}-y\acute{a}-t\bar{\imath}$ is at work (§ 709 pp. 243 f), or if the $\bar{\imath}$ and $\bar{\imath}$ came from feminine stems in -1- and -1- (II § 109 pp. 383 f.), it might be held that jani-yá-ti belongs to jáni-š, janī-yá-ti to the byeform jánī, kandū-ya-ti 'scratches' to the fem. kandū- and not to the masc. kandu-. Perhaps both these forces acting together caused the vowel to become long.

The wider use of $-\bar{a}-y\dot{a}-t\dot{i}$, which began in pre-Aryan times (§ 769 pp. 284 f.), went further; and in later Sanskrit it took a special turn, and the middle voice was used to mean that the subject represented the noun which the form came from, as $\dot{s}akrac\bar{a}p\bar{a}ya-t\bar{e}$ 'represents a rainbow, is like it' from $\dot{s}akrac\bar{a}pa-m$ 'rainbow' Note for the typical form of the contained noun, Ved $dhiy-\bar{a}ya-t\bar{e}$ 'is pious' $dhiy-\bar{a}y\dot{a}-nt$ - 'attentive' from $dh\dot{t}$ - f. 'devotion, piety', similarly $jm-\bar{a}y\dot{a}-nt$ - 'struggling earthwards' from $k\dot{s}\dot{a}m$ - f. 'earth' (II § 160 p 482), unless it be from $jm\dot{a}n$ - $\dot{a}jma$ - 'a way' ('way-making, carving a path').

-t-yá-ti also was productive On the model of durgrbhī-ya-tē 'is hard to grasp' (dur-grbhī-s' hard to grasp'), kavī-yá-tē 'is wise (kavī-s' wise'), tavīsī-yá-tē 'is strong' (távīsī f 'strength') sprang up others, as adhvarīyá-ti 'is present at the offering' from adhvará-s 'offering', pitrīyá-ti 'is fatherly' (gramm) from pitár- 'father' On the model of junī-yá-ti 'asks for a wife' (jánī-š 'wife') we have putrīyá-ti 'wishes for a son' from putrá-s 'son', māsīyá-ti 'desires meat' from māsā-m 'meat'.

Thirdly, -s-yú- (from s-stems) once or twice leaves its proper sphere. mānavasyá-ti 'acts after the manner of men' from mānavá-s 'human' follows the type svapas-yá-tē 'acts nicely' from sv-apas- 'acting nicely'. urušyá-ti 'seeks the distance' from urú n 'the distance' follows such verbs as taruš-yá-ti 'fights' (from táruš- n. 'fight')

Lastly, the ending -arya-ti grew into a type; beginning with vadharyá-ti 'lets fly a shot or missile', beside vádhar- and vadhá-s 'missile', it spiead to rátha-s 'a chariot', and formed ratharyá-ti 'he drives in a chariot'.

Remark I may mention here another word, Skr. Śrudhīyá-ti 'obeys'. This is derived from the imper Śru-dhi 'listen', which must have crystallised into something hardly more than a particle; the form is then like Gr. $ai-ai\zeta\omega$ from ai, Mod H G beyahe 'I say yes' verneine 'I say no' from ja and nein, Lat neyō from some form like *ne-gi = Lith ne-gi ne-gu, contained also in neg-ōtium neg-ligō

§ 774. Armenian With to-suffix only denominatives like taram-1-m, § 770 pp. 288 f

Without 20-suffix. Jana-m and the like, see § 581 p. 123. Still unexplained are denom. in e-m, as gorce-m 'I work' from gorc 'work', sire-m 'I love' from sēr 'love', čue-m 'I break up, depart' from ču 'a breaking up, departure'. As Jana-m answers to Aeol $\tau t \mu \bar{\alpha} - \mu u$, one would be inclined to place gorce-m parallel to $qi\lambda \eta - \mu u$. But 2 would be expected as representing Idg. \bar{c} . 1)

§ 775. Greek. The original ending $-\bar{\alpha}\omega = \text{Idg. } -\bar{\alpha}-2\bar{\sigma}$ became $-\bar{\alpha}\omega$, not by rule, but by analogy of $-\epsilon\omega - \omega\omega - \omega\omega$.

In several dialects we see -ηω -ωω -τω -τω instead of the other quantity, as Lesh. ἀδικήει, Boeot. δαμιώοντες Delph. στεμανωέτω Hom. ὑπνώοντες, Hom. κονίοντες ἐρητύοντο. Similarly -āω, as Hom μενοινή ησι and ἡβάοιμι or (with Ion. η) ἡβήοιμι, which seems to have been the form originally used where the text has ἡβώοιμι. This ā is certainly not long because

¹⁾ Hübschmann points out to me the possibility that the analogy of, say, ber ('poed', latio' etc.)· berem (= Gr. φερω) may have produced gorcem in connexion with gorc Cp. the denom. Skr mārga-ti Gr. σέρμε-το etc., § 487 p. 41.

the vowel was long originally (see above), nor did the other endings lengthen their first vowel by analogy of an a so preserved, the long vowel in all of them came from the future, aorist, and other parts which had it, so that $\dot{\eta}\beta\dot{\alpha}\omega$ follows $\dot{\eta}\beta\dot{\alpha}$ - $\sigma\omega$, $\dot{\alpha}\delta\iota\kappa\dot{\eta}\omega$ follows $\dot{\alpha}\delta\iota\kappa\dot{\eta}$ - $\sigma\omega$. 1) At the same time, some power must be ascribed to the influence of present stems such as χρήων (§ 737 p. 263) and θύω (\$ 707 p. 236); for the other parts of these had the same endings as the denominatives which now concern as (χρή-σομαι like φιλή-σω, θύ-σω like δακρύ-σω etc). To hastily reject this element in the matter would be all the more foolish, because it is clear as day that Primitive verbs have had influence over Denominatives in the futures ὀνομανέω -ω beside ἀρπάξω, and τελέω instead of τελέσσω (§ 757 p. 277) As regards verbs in $-i\omega$ and $-i\omega$, we have also to consider that the contained nouns often had $-\bar{\iota}$ -c and $-\bar{\upsilon}$ -s (cp. $i\sigma\chi\bar{\upsilon}\omega$ from $i\sigma\chi\bar{\upsilon}$ -c); this may have had something to do with it, and analogy may have finished the work How far this influence acted must remain unsettled while we have no exact statistics of $-i\omega$ $-v\omega$ and $-\bar{\iota}\omega$ $-\bar{v}\omega$.

Remark γελώω ίλεωω ξίγωω are to be kept distinct from δαιιώοντες etc because they come from -ωσ-ζω γελώω from γελωσ- (nom γέλως), the strong form of γελωσ-, whence γελώω (§ 768 p. 282) ίδεωω from ίδεως. ξίγωω from a word parallel to Lat. rigor These verbs in -ωσ-ζω are in all probability upgrowths of the separate period, when the languages were developing singly, in this they resemble the Latin group exemplified by fulgur-iō from fulgur (O Lat fulgus), and stand in contrast to the really old forms Gr τελείω τελέω for *τελεσ-ζω (§ 768 p. 282).

The origin of the ending in διψη πεινή for -ηει is not clear; op. Hom. διψάων, Ion. (Archil.) διψέων, Pind. διψή Compare Wackernagel, Philol. Anz. 1887, p 238, W Schulze, Kuhn's Zeitschr. XXIX 269 f.

On the non-thematic present inflexion $-\bar{\alpha}-\mu\iota$ ($-\alpha\iota\mu\iota$) $-\eta-\mu\iota$ $-\omega-\mu\iota$ following Class X (instead of $-\alpha\omega$ $-\epsilon\omega$ $-\omega$) in Aeolic and Arcadian, see § 582 p. 123, § 589 p 131 The type $-\bar{\alpha}-\mu\iota$ in our $\bar{\alpha}$ -denominatives came from the pre-Greek stage; and in Greek itself its analogy produced $-\eta-\mu\iota$ and $-\omega-\mu\iota$

Cp γενω instead of *γέω following γεν-αω and the rest; the Author,
 Gr. Gr. p 31. Lithuanian cp. pres demi 3rd sing. dest. instead of demi desti following de-siu de-ti etc (§ 546 p. 104)

- § 776. Before turning to trace the way by which the various denominative endings became general types in Greek, we would quote some words of Sutterlin's He says, "In the every-day language of inscriptions, analogy did not run riot as it did amongst the poets and orators, who were often forced to adopt new words and terms, and depended partly on these for effect" (Zur Gesch. der Verba denom. im Altgr., 15)
- (1) The type $-\alpha \omega$, which could be made from o-nouns even in pre-Greek times (§ 769 pp. 284 f.), did not spread so far as it might in forming factitives, because it was met by a countercurrent, the -οω class (4) Thus veoler 'I renew' may have caused * $\nu \varepsilon F \bar{\alpha}$ - $\mu \omega = \text{Lat. nov} \bar{o} \text{ O H.G. niuw} \bar{o} m$ to drop out of use (cp p. 284 footnote). But in other directions -αω was fertile; it served to denote disease or diseased appetite, the production of sounds, mechanical operations, and the like λεπράω 'I have an eruption on the skin' (from λέπρα 'eruption') and similar words give rise to ύδεράω 'I have dropsy' from νόξοο-ς 'dropsy'; δφθαλμιάω 'I have diseased eyes' (from δφθαλ--μία 'disease of the eyes') gives νόξεριώω from ὕδερο-ς (beside ύδεράω), όδοντιάω 'I cut teeth' from όδούς 'a tooth', βοάω 'I call, cry' from βοή 'cry' produces γοάω from γόος 'lament'; whilst νωνάω 'I twist like a top' from κῶνο-ς 'top', στιχάονται 'they arrange themselves in rows' from στίχοι and στίχες 'rows', σπαργανάω 'I wrap in swaddling clothes' from σπάργανο-ν 'swaddling clothes' follow τεχνάω 'I work skilfully' from τέχνη 'skill', μηχανάω 'I set to work' from μηχανή 'tool, means', and so -ιάω became another kind of desiderative suffix στοατηγιάω 'I strive to become a general' (στρατηγία) and others like it gave rise to such forms as apportiam T strive to become archon' from ἄρχων, μαθητιάω 'I wish to be a pupil' from uaθ nτή-c; and the last-named verb served as a model for βτν-ητιάω 'volo coire' from βτνέω 'coeo'.

Remark In certain Greek dialects $-\epsilon\omega$ is often found where we expect $-\alpha\omega$; it is not always possible to suppose that these are due to the analogy of verbs in $-\epsilon\omega$ from o-stems. Such are $i,\beta\dot{\epsilon}\omega$ beside $i,\beta\dot{\epsilon}\omega$, $\delta\alpha\pi\alpha\nu\epsilon\omega$ beside $\delta\alpha\pi\alpha\nu\dot{\epsilon}\omega$ J. Schmidt, in his work on the Neuters (pp 326 ff.), puts forward a view that in pr Greek $\alpha\sigma$ $\alpha\omega$ became regularly $\epsilon\sigma$ $\epsilon\omega$; that

thus $\epsilon_0 \ \epsilon_{\omega}$ and α_{ϵ} stood side by side in sets of verb-forms, $\hat{i}\beta\dot{\epsilon}\omega \ \hat{i}\beta\dot{\alpha}\epsilon\dot{\epsilon}$; etc., and that there was levelling in two directions, (1) $\hat{i}\beta\dot{\alpha}\omega \ \hat{i}\beta\dot{\alpha}o\mu\epsilon$, etc following $\hat{i}_i\beta\dot{\epsilon}e_i$, $-\acute{e}\epsilon_i$, (2) $\hat{i}_i\beta\dot{\epsilon}\epsilon_i$, $-\epsilon\epsilon_i$ following $\hat{i}_i\beta\dot{\epsilon}\omega -\epsilon o\mu\epsilon$

- (2) Many are the meanings given by verbs in -εω which are formed from uncompounded o-stems, they stand in all sorts of different relations to the contained stem. Here are a few κοιρανέω 'I am ruler' from νοίρανο-ς 'ruler', ολεέω 'I dwell' from olno-s' dwelling, house', αριθμέω 'I count' from αριθμό-ς number, μος θέω 'I toil' from μός θο-ς 'labour' This type was not very fertile in analogical imitations, though we have ήγεμονέω 'I lead' (ήγεμών) modelled upon κοιμανέω. But when these verbs were taken from compound stems, the case was different These meant mostly to be or to act as something, and the type spread to an extraordinary extent. Examples of strictly correct forms olvoxolo 'I am wine-pourer' from olvo-xon-s, dnμιουργέω 'I am a craftsman, artisan' from δημιουργό-ς, άδυνατεω 'I am unable, weak' from α-δυνατό-ς, by analogy — μισθοδοτέω 'I am wage-giver' from μισθο-δότη-ς, ἀφρονέω 'I am senseless' from $\dot{\alpha}q\rho\omega\nu$ It is true some of these verbs have meanings both transitive and intransitive, but this depends on the meaning of the ground-word; this ταλαιπωσέω means 'I plague' or 'I am plagued' because rala/-nwoo-g means either suffering misery or inflicting it
- (3) With -εω-verbs derived from o-stems, another group originally ending in -εσ-ξω ran together. Only in Homer is there a difference in form; there we have -εω, from -εσξω, and the intermediate -εω, side by side. τελείω and τελέω (I § 131 p 118) The coincidence of these two classes in the present caused analogy to act in other parts of the verb system. Even in Homer are found such forms as ἀνθῆσωι from ἀνθέω 'I bloom' for *ἀνθεσ-ξω (ἄνθος n 'bloom') on the analogy of φιλῆσωι from φιλέω, and τετειχῆσθωι 'to be armed' from τενίχεω pl 'arms'. Then came a number of verbs in -εω fut. -ησω from compound εσ-stems, as ἀπειθέω 'I am disobedient' from ἀ-πειθής 'disobedient', εὐθωρσέω 'I am of good courage' from εὐ-θωρσής 'courageous', a step due partly to the fondness

which the Greeks showed for verbal derivatives in -em from compound o-stems (for which see above, 2)

(4) The group of verbs in $-\omega$, also from o-stems, is probably a purely Greek development, on parallel lines to $-\varepsilon\omega = \mathrm{Idg} - e - 2\bar{\sigma}$ (see § 773 pp. 290 f). At first probably there were forms of the verb infinite only, as those with the ending $-\omega - \tau o - \varsigma$; these soon produced all the rest $-\omega - \bar{\alpha} \sigma \omega$ etc may have been the type for $-\omega - \omega \sigma \omega$ there is a likeness between $\partial \varrho \gamma \chi \dot{\omega}$ I furnish with battlements or eaves $\partial \varrho \chi \dot{\omega} \dot{\omega}$ I furnish with a fetter with a wreath $\partial u \dot{\omega} \dot{\omega}$ and $\partial u \dot{\omega} \dot{\omega}$ I furnish with a fetter $\partial u \dot{\omega} \dot{\omega}$ I provide with honour $\partial u \dot{\omega} \dot{\omega}$ (stepávous) stepávo $\partial u \dot{\omega}$ and $\partial u \dot{\omega}$ ($\partial u \dot{\omega} \dot{\omega}$) $\partial u \dot{\omega} \dot{\omega}$ (stepávous) stepávo $\partial u \dot{\omega}$ and $\partial u \dot{\omega}$ ($\partial u \dot{\omega} \dot{\omega}$) $\partial u \dot{\omega} \dot{\omega}$

A favourite meaning for $-\omega$ is factitive; as $\sigma \varphi \lambda \delta \omega$ 'I make a cripple' $(\sigma \iota \varphi \lambda \delta - \varsigma)$, $\iota \varepsilon \delta \omega$ 'I make new' $(\iota \varepsilon \delta - \varsigma)$, $\iota \delta \delta \omega$ 'I make equal' $(\iota \delta \sigma - \varsigma)$. This function it seems to have taken from pre-Greek $-\delta \chi \bar{\sigma}$; compare $\iota \varepsilon \delta \omega$ with Lat $nov\bar{\sigma} re$ O H.G. $n\iota uw\bar{\sigma} n$ (p. 295); and in this sense $-\omega$ became enormously productive sa $\dot{\varphi} \alpha \kappa \delta \omega$ 'I make into rags, tear to rags' from $\dot{\varphi} \alpha \lambda \sigma s$ n. 'rag',') $\dot{\nu} \gamma \iota \delta \omega$ 'I make well' from $\dot{\nu} \gamma \iota r s$ 'well', $\dot{\sigma} \varrho \nu \bar{\iota} \bar{\sigma} \delta \omega$ 'I turn into a bird' from $\dot{\sigma} \varrho \nu \bar{\iota} s$ 'bird', $\pi \lambda \alpha \tau \delta \omega$ 'I make broad' from $\pi \lambda \alpha \tau \dot{\iota} s$ 'broad', $\gamma \varepsilon \varphi \nu \varrho \delta \omega$ 'I make into a bridge' from $\gamma \dot{\varepsilon} \varphi \nu \varrho \delta \omega$ 'bridge'.

The ending $-\epsilon \nu \omega$ soon became a type for expressing one's usual calling or occupation: as $oi\nu o\chi o\epsilon \dot{\nu}\omega$ 'I am cup-bearer' from $oi\nu o\chi o\circ -\varsigma$, $\mu\alpha\nu \tau\epsilon \dot{\nu}\circ \mu\alpha \iota$ 'I am a seer' from $\mu\dot{\alpha}\nu\tau\iota -\varsigma$, $9\eta\rho\epsilon\dot{\nu}\omega$ 'I am a hunter' from $9\dot{\eta}\varrho\dot{\alpha}$ 'hunt', $\beta o\nu \lambda\dot{\epsilon}\dot{\nu}\omega$ 'I am a counsellor, advise' from $\beta o\nu \lambda\dot{\eta}$ 'counsel' Thus $-\epsilon \nu\omega$ is partically synonymous with $-\epsilon\omega$, we have $oi\nu o\chi o\dot{\epsilon}\omega$ and $-\chi o\epsilon\dot{\nu}\omega$, and $\kappa o\iota\varrho\alpha\nu\dot{\epsilon}\omega$ bears the same kind of sense (see 2, p. 296)

One dare hardly derive this ifrom *ξακου-τω, although this would have an analogue in Lat fulgur-iō (see § 775 p 294)

- (6) Amongst the many endings of verbs derived from substantives with consonantal stems, three are particularly fertile -αζω, -ιζω, and -αινω
- (a) $-\alpha\zeta\omega$, for $-u\delta_{-1}\omega$, answers sometimes to a Germanic class in ((4oth) $-\alpha t/\alpha$ (§ 768 p. 283), and sometimes $-\alpha\zeta\omega$ comes from $-*\eta d\chi\bar{o}$, as in $\pi \epsilon \mu \pi \alpha\zeta o \mu \alpha \omega$ (II § 123 p. 390, III § 169 pp. 13 f.)

Following μιγάζω 'I mix', intr in middle (μιγάς 'mixt') were coined ἡσυχάζω 'I pacify, keep quiet' from ἥσυχο-ς 'quiet', δοκιμάζω 'I test' from δόκιμο-ς 'tested, genuine, correct'. Following ἀφροδισιάζω 'I give myself up to sensuality' (ἀφροδισιάς), γενειάζω 'I grow a beard' (γενειάς) were formed στασιάζω 'I am in tumult' from στάσι-ς 'tumult', ἀνιάζω 'I feel pain or trouble' from ἀνία 'pain, trouble', ἐπιχωριάζω 'I am at home' from ἐπιχώριο-ς 'at home'

-ιζω for -ιδ-χω as ἐλπίζω 'I hope' from ἐλπίς -ίδ-ος 'hope', φμοντίζω 'I think' from φροντίς 'care', ληίζομαι 'I rob, harry, carry off' from ληίς 'booty', ἐρίζω 'I strive' from ἐρις 'strife'. On this model, αἰνίζομαι 'I praise' from αἶνο-ς 'praise', δειπνίζω I entertain' from δεῖπνο-ν 'meal', καναχίζω 'I roar, rush' from καναχή 'rush, roar', ὀνειδίζω 'I abuse, blame' from ὄνειδος n. 'disgrace', ἀκοντίζω 'I cast a javelin' from ἄκων 'javelin', αίματίζω 'I stain with blood' from αἷμα 'blood', μακαρίζω 'I bless' from μάκαρ 'blest', ἀεικίζω 'I insult, torment' from ἀεικής 'shameful'.

In a few words -αζω and -ιζω come from -αγ-ζω and -ιγ-ζω; as ἀρπάζω 'I seize, carry off' (fut. άρπάξω) from ἄρπαξ 'greedy, piratical', and μαστίζω 'I whip' from μάστιξ 'a whip'. This concidence of -γ-ζω and -δ-ζω in the present caused analogy to act in two directions. (1) άρπάσω ἤρπασα beside άρπάξω ἤρπαξα following the dental stems, and (2) Dor δοκιμαξέω ἤριξα instead of *δοκιμασέω ήρισα following guttural stems The latter kind were very common in Doric '

(b) Verbs in -αινω come from two sources. Some are derived from nominal n-stems, as τεκταίνω 'I carpenter' from τέκτων 'carpenter', εύφραίνω 'I make glad' from εύφρων 'glad', ποιμαίνω 'I tend' from ποιμήν 'herdsman', σπερμαίνω 'I give

forth seed' from σπέρμα 'seed', κῦμαίνω 'I undulate' from κῦμα 'billow' (§ 768 p 282). The others are extended no-stems; as laivω 'I quicken, make live' beside Skr. iṣana-t, αἰαίνω 'I dry' beside Lith saũsinu (§ 621 pp 158 f., § 743 p. 266) As the -αινω group spread, either of the two kinds might serve as a type-form. Thus in making factitives from adj. o-stems, a large class, like θερμαίνω 'I warm' from θερμό-ς 'warm', λειαίνω 'I smooth', from λεῖο-c 'smooth', λευκαίνω 'I whiten' from λευνό-ς 'white', the model might be either αὐαίνω, which was popularly derived from αὖο-ς 'dry', or εὐφραίνω 'I gladden' (εὖφρων) and πῖαίνω 'I fatten' (πΐων)

§ 777. Italic Denominatives from consonantal nounstems, as Lat cantur-iō, dent-iō, comped-iō, custōd-iō, fulgur-iō, in the present ran on parallel lines with primitives such as farc-iō -ī-s (§ 702 p. 229, § 715 p 248), and with denominatives from i-stems like fīniō (-ī-s) for -i-jō; with the latter this is true of the non-present stem, as custōdīvī -ī-tus like fīnīvī -ītu-s The association seems to have gone thus far in proetlinic Italic, for we have Osc. καπιδιτομ, i. e kapid-ī-to-m 'ollarium' (same stem as Lat capis -id-is); compare Umbr. statīta 'statūta' from *statī- Gr. στάσι-ς. Old participials such as Lat. sceles-tu-s līber-tu-s (Il § 79 pp 231 f., IV § 768 p. 283) had fallen out of the verbal system, thus becoming adjectives, before the beginnings of Latin

The whole class of denominatives from consonantal nounstems was dying out in Latin Only those which ended in -turio were a group of any size (see § 778 1)

Of the forms used for the present in $scr\bar{\imath}ptur-i\bar{\imath}$ - $\bar{\imath}$ -s etc., the only ones which are a regular outgrowth of the Indo-Germanic are the 1st sing. $-i\bar{\imath}$ and the 3rd pl. -iunt. The others cannot be derived either from -ie-s -ie-ti -io-mos -ie-tes nor from -ie-s etc. to judge from the voc. filie (beside fil $\bar{\imath}$, III § 201 p 83), we should expect as an imper. * $scr\bar{\imath}pturie$. As a fact, these denominatives dropt their $-i\bar{\imath}$ -ie-s and so forth simply because in Italic primary verbs conjugating -ie-s -ie-s

-1e-ti exchanged it for -1 \bar{o} - \bar{t} -s - \bar{t} -ti (§ 702 pp 228 ff.) So scrīptur-1 \bar{o} took its type from suf-fi \bar{o} farc-1 \bar{o} etc (§§ 716 f. pp. 249 f), in the same way as Greek moulded the future $\Im \varepsilon \rho \mu \alpha r \bar{o}$ $\dot{\alpha} \gamma \gamma \varepsilon \lambda \bar{o}$ upon the primary class (§ 757 p. 277).

What is seen in scrīptur-iō, is seen in other verbs with -iō, as fīniō from fīni-s Here, as before, only -iō and -iunt are regular. Here too the new forms sprang up in proethnic Italic; evidence for which is found in Umbr. persnihi-mu persnih-mu persnih-mu persnih-mu 'precator' from a noun-stem *persni-(§ 674 p. 207)

Again verbs in $-\bar{a}-\underline{\imath}\bar{o}$, $-e-\underline{\imath}\bar{o}$, and $-u-\underline{\imath}\bar{o}$ run parallel to the primary classes .

plantō, for *-a-lō, has the lo-suffix only in the 1st sing., elsewhere unthematic -a-s-a-t etc., like nō nā-s etc., and luvō -a-s etc. This agrees with Umbr furfant furfal 'februant' anstiplatu 'instipulator' Osc faamat 'habitat' and others, beside 1st sing Umbr subocau 'adoro' for -a(l)ō (cp stahu 'sto', and § 980); so the Latin type may be regarded as proethnic in Italy. See § 583 pp 123 ff, § 738 p. 263

So also with claudeo, for *-e-zo, the zo-suffix is found only ın the 1st sing claudeo -ē-s etc. like pleo pl-ē-s etc., video -ē-s etc (§ 590 pp 131 f., § 738 p 263). And the same is true of Causals, moneo -ē-s and so forth (§ 788) remarks may be made First, claudeo and moneo orig. had -ĕzō, while pleō videō had orig. -ēzō (cp 1 § 612 p 402). Secondly, claudes mones -et -etis may be derived without violence from -e(z)es -e(z)eti -e(z)etes, as easily as Lesb. φίλητε may be derived from φιλέ(ε)ετε (§ 589 p 131). To judge from Lat. tres, pontes Umbr puntes for -e(2)es (I § 134 p. 121), ee became ē in pre-Italic times. It is possible that this contraction in persons containing the suffix -ze- may have paved the way for the confluence of verbs in -e-16 and -é-10 with those in -ē- It must also be carefully remembered that Latin had no e-forms answering to plantavi plantatu-s finivi finitu-s, as it had no similar e-forms even in verbs with -e-io, such as video.

Remark. An exception is dēnseō 'I thicken', which has dēnsētu-s, a bye-form of dēnsāte (same meaning). It would appear that there was once nothing but this participle dēnsētu-s, and that the whole system dēnsē-mus etc., sprang up by analogy of dēnsā-mus to dēnsā-tu-s. This would explain why dēnseō, unlike albeō claudeō etc, had a factitive meaning

statuō -uis -uit etc may be directly compared with Skr. gātu-yāmi -yá-si etc, Gr. φῖτύοι -εις etc.; on the other hand the inflexion is the same as in suō suis suit etc. (§ 717 p. 250)

- § 778. Particular endings becoming a type in Italic:
- (1) The ending -turiō, occurring words like scriptur-iō from scriptor (§ 768 p. 282), was made by the usual misunderstanding into a type. Hence came a number of new forms, with the sense of will, wish, intention, often where there was no connected noun in -tor, as parturiō tacituriō, sullāturiō (from Sulla). In late Latin these words lost their distinctive meaning, and parturiō, for example, meant the same as pariō 1)
- (2) The ending $-i\bar{o} = -i-j\bar{o}$, found in many Latin verbs from both subst. and adj. stems, gained no such distinctive meaning as did $-\bar{o}$ ($-\bar{a}re$) and $-e\bar{o}$. Add to the exx. given in § 771 p. 289 the following: parti\(\bar{o}\) and -ior 'I divide, share' from pars (stem parti-), circumr\(\bar{e}ti\bar{o}\) 'I ensnare' from r\(\bar{e}te\), in\(\bar{a}mi\bar{o}\) 'I empty' from in\(\bar{a}mi-s\), molli\(\bar{o}\) 'I soften' from molli-s None the less did $-i\bar{o}$ spread by analogy: catuli\(\bar{o}\) from catulu-s, equi\(\bar{o}\) from equo-s, which with nuptu\(\bar{v}re\) remind us in form and sense of the Skr desiderative class putr\(\bar{e}yd-ti\) (§ 774 p 292); blandior from blandu-s, rauci\(\bar{o}\) from raucu-s, saevi\(\bar{o}\) from saevo-s, largior from largu-s, \(\bar{u}mi\bar{o}\) from \(\bar{u}nu-s\), poeni\(\bar{o}\) p\(\bar{u}ni\bar{o}\) from poena, aborti\(\bar{o}\) fiom abortu-s, singulti\(\bar{o}\) from singultu-s

 It is possible that some of the verbs like catuli\(\bar{o}\) blandior are the same formation as Skr. udhvary\(\dal{o}-t\) (fr. \(\dal{a}\gamma\gamma\bar{e}\lam{d}\lam{o}\) see § 770 pp 286 f.
- (3) Verbs in $-\bar{a}$ - $2\bar{o}$ (Lat. $-\bar{o}$), some of which, from o-stems, belong to pre-Italic times (§ 769 pp 284 f.), became very numerous in Italic

Many such, derived from a-substantives, meant 'to

¹⁾ Johansson (P ·B Beitr x 223) thinks that Goth. aihtiōn 'to beg for' is a desiderative like these He connects it with áih 'I possess', and thinks the orig. meaning was 'I want to possess'

occupy oneself with, to practise, use, produce' that which the original stem denoted Lat. cūrō Umbr. kuraia 'curet' Pelign. coisatens 'curaverunt' (Lat cūra), Lat. multō Osc. moltaum 'multare' (Lat multa), Lat Insidior (Insidiae), praedor (praeda), lacrımo (lacrıma), maculo (macula), fortuno (fortuna) verbs in -āiō were made from other substantive stems. Examples Lat termino from terminu-s termen, Umbr termnas 'terminatu-s' ()sc teremnattens 'terminaverunt'; Lat. loco from locu-s, Pelign locatin(s) 'locaverunt', Lat dono from donu-m, Osc d | uunated 'donavit', Lat. vinculo from vinculu-m, Umbr. previslatu imper 'praevinculato, praepedito vinculis': Lat. numero from numeru-s, pagno from pagnu-s (cp § 773 Rem, p 291), spolior from spoliu-m, consilior from consiliu-m, rēgno from rēgnu-m, fluctuo from fluctu-s, tumultuo from tumultu-s, contionor from contio, nomino from nomen, examino from examen, colord from color, fulguro from fulgur, onerd from onus, scelerō from scelus, pulverō from pulvi-s, laudō from laus, hiemo from hiems, Osc deivaid 'iuret' deivast 'iurabit' from deivo- 'deus'

A few more exx may be given of verbs in $-\bar{a}_{k}\bar{o}$ derived from adjectival stems, like Lat $nov\bar{o}$ (pp. 284 f). Lat. $pr\bar{v}v\bar{o}$ from $pr\bar{v}vo-s$. Osc prevatud 'privato, reo' (for the meaning, ep. Bréal, Dict etym. Lat. 2281, Mém. Soc Ling iv 394 f.), Lat $pr\bar{o}$ from piu-s, Umbr pihatu 'piato' prupehast 'ante piabit'; Lat. $prob\bar{o}$ from probu-s, Osc. prufattens 'probaverunt'. Hence by analogy Lat $prav\bar{o}$ from pravi-s, probaverunt'. Hence by analogy Lat $prav\bar{o}$ from pravi-s, probaverunt'. Osc. sakarater 'sacratur, sacrificatur' from pravi-s ('sacrum') pravi-s0.

A mass of Lat verbs in $-t\bar{a}_{\ell}\bar{o}$ are based upon to- Participles, usually they have an intensive or frequentative meaning. The following seem to have existed in pre-Italic times: Lat. gusto = O H.G costom from Idg *gus-tó-, see § 769 p. 284, Lat ito Umbr etaians 'itent' etato 'itate' = Gr lin-téov El part. perf. act. lin-av-irāxióo; Lat. puto 'I deck, prune, clean, reckon, think' beside O.C Sl. pytaja 'scrutor, quaero, indago' (Osthoff, M U v 86 f) Formed in Latin on the same

principle hortor occultō adjūtō cantō versō tractō dīctō gesto pōtō, domitō crepitō habitō The ending -itō was abstracted from words which happened to have it, and became a type; hence vocitō from vocō (vocātu-s), volitō from volō (volātu-m), agitō from agō, scīscitō from scī-scō, vīsitō from vīsō (Class XX. § 662 p. 197); and, by a combination of -itō with -tō, arose intensives or frequentatives to the second power, as ititō from i-tō, dīctitō from dīc-tō, cursitō from cursō

The reason why this class derived from the to-participle increased to such a size, was that from the pre-Italic stage onwards, the neuter or the feminine of these participles was used as an abstract noun as commentu-m 'idea' (hence commentor), repulsa 'defeat' (hence repulsō), offēnsa 'blow' (hence offēnsō). See II § 158 pp. 473 ff., IV § 769 p. 285

-igāre also became a fertile denominative suffix in Latin; nāmgō rēmiyō jūrigō jūrigō mītigō Cp. Leo Meyer, Bezz Beitr. vi 130 ff.

(4) The $-e\bar{o} = -e-2\bar{o}$, of intrans. verbs like claudeo (§ 770 p. 288), hardly touched any but o-stems, but an example of it elsewhere is molleo from molli-s

Observe that the same distinction of transitive and intransitive, which we see in the denominatives clarare and clarare, is seen in primary verbs with those endings, as liquare and liquare.

Remark. fateor seems to be another denominative in $e\bar{o}$ Of this verb, Oscan has the inf fatfum $(i=\bar{e})$ The contained stem is *fa-to-s, answering to Gr. $\varphi ar o'$ -; 'said' (\bar{a} - $\varphi ar o'$ -;), and meaning 'having declared something, open, confessing'; and the word doubtless borrowed its deponent inflexion from $f\bar{a}r\bar{r}$ (§ 495 p 56) At first its construction was fateor $d\bar{e}$ aliqu \bar{a} $r\bar{e}$, and the accusative constr. came later. The partic fessu-s follows su \bar{a} su-s from su \bar{a} de \bar{e} , and the like

§ 779. Keltic. The only distinct class of this kind in Irish contains the ā-denominatives, as rannaim from the ā-stem rann (§ 769 p. 284) and marbaim from the o-stem marb (p. 284) Somewhat as in Latin, the 1st sing only is extended by -20-, and all the rest lacks it 1st sing no charu for *carā-jō

(conjunct inflexion) like Lat plantō, 3rd sing. no chara O.Bret. cospitio-t like Lat. planta-t Compare § 584 p. 125.

no-presents from consonantal stems (like Skr. apas-yá-ti) there are none Mid Ir ath-rīgaim 'I dethrone' is an ā-verb (inf aith-rīgaid) from rī 'king' (stem rīg-).

There are none either of the type of Skr. gātu-yá-ts (§ 772 p 289)

In the Keltic 3rd conjugation, Idg. denominatives in -e-2ō (say scorim scurrim, § 770 p 288), those in -1-2ō (say fo-dālim § 771 p 289), and causals in -e½ō (§ 803) have all run together. Then this new composite denominative type spreads by analogy. 3rd sing. ad-rīmi 'counts' from rīm f 'number' (stem *rīmā-), bāgim ar-bāgim 'I strive, brag' from bāg f 'strife' (stem *bāgā-)

§ 780. A denominative ending with -ag- became widespread in Irish and British dialects e. g. O.Ir. sāraigim or -sāraigiur Mod. Cymr. sarhāf (= O Cymr. *sarhāgam) 'I injure, offend' from sār 'offence', O Ir. suidigim 'I place' from suide 'place', Mid.Ir. intamlaigim 'I compare' from intamail 'likeness, imitation', O Cymr. scamnhegirt 'levant' Some have wished to connect this suffix with the nominal suffix -aco- (II § 89 p. 273), led to this view by cumachtaigim 'I make myself master of' from cumachtach 'powerful', but nothing clear is known about its origin

Remark "The British dialects point to -āy-, and before the ă Cymr. has an h, which I believe to indicate that the orig. sound was s (1 e. -sāy-) But of this s there is no trace at all in Irish Leaving this out of count, we might imagine some formation like Lat rēmiyāre pūrgāre, only with i-flexion in Keltic." Thurneysen

§ 781 Germanic (1) Here, as in Keltic, the most prominent group consists of ā-verbs, with inf. Goth O.H.G. -ōn () Icel. -a A.S -ian, called in Germanic grammars the Second Weak Conjugation. -ā-jo-, with -jo-extension, is clear only in Anglo-Frisian, A.S. 1st sing in -ie, pl. in -iad, as sealfie sealfiad, where i must originally have been a long and also dull vowel, so that Germ -ō-ja- is quite out of the question. Without -jo-: O.H.G. salbōm -ōs -ōt -ōmēs -ōt -ōnt Goth. salbōs -ōp -ōm -ōp

- $\bar{o}nd$ The 1st sing. Goth salb \bar{v} is doubtless not for *- \bar{a} -m with secondary personal ending (neither is hab-a for *- \bar{e} -m, see § 708 p. 239), but a new formation following baira beside bairam and haba beside habam. Compare § 739 p. 264

Examples of ā-verbs derived from ā-nouns are given in § 769 p 284. Others are Goth. fairinō 'I accuse, blame' O H G firmōm 'scelero' A.S. fireme 'I sin' from Goth fairina 'accusation' O.H.G firma 'scelus' A S. firen 'sin', Goth. idreigō 'I repent' from idreiga 'repentance', O.H.G. ahtōm (A.S eahtie) 'I notice' from ahta 'notice', O.H.G. gremizzōm 'I look grim, am gloomy' from gremizza 'dark look, gloom, despondency'. The ending -inō-(2a-), beginning in West Germ. verbs like O H G. firinōm, redinōm ('I set forth, recount', from redina 'account, description') became an independent suffix and went further: e. g. O H G wīz-inōm 'I punish' A.S. wītnie, O.H.G. fest-inōm 'I affirm, make fast, promise' A S fæstnie, O.H.G. heb-inōm 'I entertain as a guest', and others

For a-verbs from o-nouns, such as Goth. vairpo OH.G. werdom, see § 769 p. 284

a-verbs from s-stems (these joined the o-declension very early in Germanic, see II § 132 pp. 419 f) Goth. hatizō 'I hate' from hatis 'hatred', () II G sigirōm 'I conquer' beside Goth. sigis 'victory', O.II.G. egisōm 'I am terrified' beside Goth. agis 'fear', like Lat. onerāre scelerāre (§ 778 p. 302) -isō-(la-) became a new independent suffix. Goth valv-isō 'I roll, revolve', O H G. rīch-isōm 'I rule' A S rīcsie, O H.G līch-isōm 'comparo, simulo' hēr-isōm 'I rule' (also hērrisōm by analogy of hērro 'lord, ruler', which was originally a comparative), A.S. bledsie 'I bless' and others.

ā-verbs from n-stems Goth. fráujinō 'I am lord, I rule' from fráuja (gen fráujns) 'lord', gudjinō 'I am a priest, fill priestly office' from gudja 'priest', which gave the type for reik-mō 'I rule over' (reik-s 'ruler') skalk-mō 'I am a servant, am useful' (skalk-s 'servant) hōr-mō 'I commit adultery' (hōr-s 'adulterer')

Many more new endings with the a-suffix, like these just Brugmann, Elements IV 20

mentioned, are found in West Germanic. The favourites are -arō-, -alō-, and -akō-

(2) Even in the prehistoric stages of Germanic three classes of verbs, with endings originally different, came to have the same ending, those with consonantal stems, with the ending -16 (-126), those from o-stems, with the ending -e-26 (whence or Germ -1-10), and those ending in -1-10 Compare Goth. rigizja glitmunja veitvodja lauhatja O.H.G. lougazzu lohazzu and others § 768 p 283, Goth. rigneib etc § 770 p 288, and Goth dáilga O H.G. teil(i)u, Goth vēnja O H G. wān(i)u etc. § 771 p 289 1) Besides, the causals in -éjō (pr. Germ. -izō), as Goth fra-vardza = Idg. *zuortézō, fell into this conjugation, which is called the First Weak Conjugation in Germanic grammar. It should be mentioned that in Germanic, as in other Idg languages, many verbs derived from nouns are properly classed among Causals; for example, Goth. háilja O.Sax. heliu O.H.G heil(1)u 'I heal' from hail-s hel heil 'whole' (§§ 793, 806).

But the confluence of the various pre-(termanic conjugations was not always due to regular sound-change. For instance, Goth glitmunes lanhates (both only inferred) took the place of *glitmun-yi-p 'lanhat-yi-p on the analogy of such forms as rignes for *rigni-li-d(i) Goth vairkes (1st sing. vairk) a Idg *urg-lō) is a new form, instead of *vairkip, following fra-vardes etc (p 229 footnote). On the other hand, O.H.G dent bests (1st sing denn(i)u beszz(i)u ground-form *tonésō bhoulésō) follow hevit — Lat capit

There is often wavering between the first weak conjugation and the second, the \bar{a} -verbs—Sometimes there were originally variant forms with different structure; e.g. O.H.G. follow 'I fill' was a pre-Germ verb in $-\bar{a}$ - $\bar{\mu}\bar{o}$ (§ 769 p. 284), whilst full(i)n (both full)a 'I fill' is a causal, similarly we have O.H.G. tarōm 'I hurt, injure' from tara 'hurt, injury' beside the causal

¹⁾ Whother *-u-zō leads regularly to Goth -ja, and say tagrja 'I cry' comes from pr Germ *tagru-zō, ufarassja 'I exist in abundance' for *ufarassu-zō, is doubtful

term (same meaning). How far these verbs altered their inflexion in later times, and for what reasons, are questions which need further investigation (cp. for instance O.Sax. fullon beside fulliu).

(3) Verbs in Goth -a (2nd sing. -áis) OH.G. -ēm, as Goth. paha O.H.G. dagēm 'taceo' (Third Weak Conj.), as we have seen in § 587 p. 129, § 592 p. 133, § 708 pp. 238 ff, did not originally belong to what we have called the later stratum of denominatives However, we do find in Germanic quite a number of later denominatives in this conjugation, as Goth. arma 'I feel pity' fasta O.H.G. fastēm 'I fast'; and one is tempted to class those verbs along with Latin denominatives such as claudeo, which were just in the same way associated in conjugation with taceo video and the like (§ 777 p. 300). Howbeit, this is inadmissible. Because by far the greater number of the verbs in this class were intransitive (as are paha dagem), it happened that their ending became a sign of intransitive meaning, and as the orig. inceptive verbs with an n-suffix (as Goth. ga-vakna 'to awake') suggested inceptive n-verbs formed from nouns (as Goth. fullna 'I get full' mikilna 'I grow large', § 623 p 160), just so paha dagēm were the model for fasta fastēm and many others. Since there was a primary verb Goth. saúrga O H.G sorgēm 'I care' side by side with the subst. Goth saurga O.H G sorga 'care', which seemed to be derived from that substantive (§ 659 pp. 193 f.), so the subst. (O II G.) fasta 'a fast' suggested the above named verb Goth. fasta O.II.G. fastem; and furthermore the verb wernem 'I perplex or torment myself' was made to complement werna 'perplexity, pang', wartem 'I watch, wait' was formed from the subst. warta 'watch, spying, waiting', wahtem 'I keep watch' from wahta 'watch'. In O.H G. the process goes a step further, and verbs like these are derived from adjectives, e.g. O.H.G. fūlēm 'I cause to rot' from fūl 'rotten', altēm 'I grow old' from alt 'old'. ('ompare some other verbs, belonging to Class XIV, such as O II G wesanem 'I dry up, wither away' (O Icel. visna), trunkanëm 'I get drunk' (A S. druncme), which, by adopting e-flexion, gained a second sign of their intransitiveinceptive meaning (§ 623 p. 160), and further Goth. main na O.H.G. mornem instead of *mainno *mornom (§ 605 p 147).

There are many and various waverings between $-\bar{e}$ - and $-\bar{a}$ -flexion, as O H G. $\bar{e}r\bar{e}m$ and $\bar{e}r\bar{o}m$ 'I honour', which need further investigation

§ 782 Balto-Slavonic

(1) Here it is no longer possible to distinguish beyond a doubt verbs derived from consonantal noun-stems and containing the suffix -20-, of the type of Skr. rajas-yá-ti (§ 768 p. 282). Instead of these, we find in cases where the forms are clear, verbs conjugated in other denominative classes, as Lith. akmenyjå-s 'I turn to stone' from akmå 'stone' (stem akmen-), O.C.Sl znamenaja 'I mark, term' from zname 'mark' (stem znamen-).

Remark Perhaps the Lith.-Lettic verbs Kurschat calls "Punctiva" — those ending in (Lith) -tereti -teleti, as kiësterê-ti 'I rough-hew a little' — are to be connected with Slavonic nomina agentis in -tel- (Idg. -ter-), as žritel-i 'offerer' (II § 122 p 389) Then comes the question whether the Lith present formation kiëster-iu szvilptelu (1 e -el-2u) represents or not the type of Skr rajas-yá-ti. The conjugation in the dialects is sometimes -terejau -telejau, -tereti -teleti, and sometimes -teriau -telau, -terti -telti (Leskien-Brugmann, Lit Volksl und Märchen, 313 f), the latter like lükuriau lükurti beside lükuriu 'I wait quietly'.

(2) Beside the endings Lith -o-jū OCSl -a-ja = Idg.
-ā-zō, as Lith lankō-ju OCSl laka-ja (§ 769 p. 284), we meet with Lith. -e-ju O.C.Sl -ĕ-ja instead of Idg -e-zō, e. g. Lith gūdē-jū-s OCSl. razumō-ja (§ 770 p. 288), and Lith -y-ju instead of Idg. -i-zō, as daly-jù (§ 771 p. 289). In these formations the long -ē- and -ī- are to be explained on the same principle as the long vowels in the Greek dialectic forms aduxim xorīw and so forth (§ 775 p. 293) they have been imported from the non-present stems, thus gūdē-jū-s follows -ĕ-siu -ĕ-ti-s, razumē-ja follows -ĕ-chū -ĕ-ti, and daly-jù follows -ŷ-siu -ŷ-ti, and so forth. At the same time, something is due to such present forms as Lith byrē-ju OCSl govē-ja, in which verbs the non-present forms had the same endings as have the present stems now in question (e. g. byrē-ti like gūdē-ti-s, govē-ti like ruzumē-ti); see § 735 p. 262, § 740 pp. 264 f.

Similarly sprang up the present in -û-ju, as jûkû-ju, by analogy of -û-ta-s (§ 773 p 291), due to the same principle as the Boeotian δāμικόοντες (§ 775 p 293). This happened first in Baltic, or at any rate in the procthnic stage of Balto-Slavonic. The preterite of these verbs is odd, it ends in -avau (jûkavaû), while we should expect *-û-jau, the latter ending appears in Lettic as -ûju, the shape it would naturally take there I assume, with Wiedemann (Lit. Prat., 198), that -avau is due to the analogy of verbs in -au-ti (pres. -au-ju pret. -avau, see below, 3).

In Slavonic, where Idg $\bar{\sigma}$ and \bar{a} ran together, verbs of the same kind as Lith $j\vec{u}k\vec{u}'ju$ may be buried in the class which has the termination -aja. This is all the more likely because such forms as $rogat\vec{u}$ and $rag\vec{u}'ta$ -s cannot be well separated (§ 773 p 291).

(3) The denominative type exemplified by such forms as Skr adhvar-yά-ti (from adhva-rά-s) and (fr ἀγγέλλω (from ἄγγελο-ς) is represented, firstly, by Slavonic presents like trepeštą 2nd sing -ešteši (from trepetŭ) Sce § 770 p. 287

Secondly, Inthuanian denominatives in -auju (inf. -au-ti, pret. -avau), and those in Slavonic ending in -u-ja (inf. -ova-ti), have to be examined, e g Lith rehau-ju 'I make a noise' O.C.Sl dlugu-ja 'I owe'. They come from the most diverse noun-stems, but it is impossible to tell offhand with what stems the class began If they are derived from u-stems (dlugovati from dlugu 'debt' gen dlugu, sladovati 'to be sweet' beside sladu-ku Lith saldu-s), they must be connected with Idg verbs in *-u-10 (§ 772 p. 289). But if so, one cannot understand why the stem-final -u- should have been exchanged in the verb for the strong grade -ey- or -oy- (pr Balto-Slav -oymay be either, see I § 68 p 59). I therefore think it far more likely that the contained nouns had stems in -e-uo- -e-uā-(cp. Skr. kēśa-vá-s 'longhaired' from kéśa-s 'hair', etc., see II § 64 pp. 133 ff). This view is supported by Slav. besovati 'to be frenzied' beside běsovů 'devilish, mad' from běsů 'demon',

kraljevati 'to be king' beside kraljevii 'royal' from kralji 'king', vračevati 'to be a physician, to heal' beside vračevii 'pertaining to a physician' from vrači 'physician', vinovati 'to accuse' beside vinovinii 'guilty of something' from vina 'cause, guilt' (vinovinii presupposes *vinovii), and many more; Lith substantives in -ava -java are collected by Leskien, Die Bildung der Nomina im Lit, 199 ff. In Lettic (and Prussian too) the verbs in -auti do not appear at all; and partly for that reason, partly because the large majority of Lith. verbs in -auti are Slavonic in origin, it is at least not improbable that this au-conjugation has been borrowed bodily from the Slavonic. However, the borrowing must have taken place very carly, when Slav ū was still ou.

Genuine Baltic examples of the type of Skr. adhvar-yá-ti would therefore be impossible to find

(4) Side by side with the ending -ō-ju, Baltic has another present inflexion with -a- and without -20-. This occurs, firstly, in the 2nd sing imper always without exception; e.g. dovanó-k, which is to be compared with Lat. plantā etc (§ 957) Secondly, in Frequentatives and Causals with -un (inf -y-ti), some of which were certainly derived from nouns, e g Lith justau 'I gird (frequently)' from justa 'girdle', pelnau 'I earn' from pełna-s 'earnings', vétau 'I fan, winnow' beside Skr. vá-ta-s Gr. an-rn (II § 79 p. 223). The forms justo justo-me justo-te answer to Lat. planta-t -ā-mas -ā-tis Lesb. τίμα-μεν Ο.Ir. no chara-m Goth. salbō-m etc., but the 1st and 2nd sing justau ງພໍ່stat show the same analogical change as do the primary forms bijaū-s 'I fear' buvaū 'I was', see § 586 p. 127. This Lith present class, as the non-present forms show (inf. justy-ti pret jüscziau), stands in very close connexion with the Idg. verbs in -620 (Class XXXII), and we must discuss it again ın §\$ 789 and 807

The orig ā-flexion without -10- is also seen in Pruss. waitia 'he speaks' 1st pl waitiā-mai (inf. waitiā-t) beside O C.Sl. vēšta-12 'I speak, advise' (inf vēšta-ti), beside Pruss. caria-woyti-s karige-wayte 'address to the army, review' O C.Sl. vēšte n. advice'

(5) Slavonic has no distinct present class to correspond to the Lith present class -y-/u (daly-jù, no 2, p 308) which represents the Idg verbs in -i-jō These verbs in -i-jō in this branch of Idg. were merged in the class of Causals etc. with -i-ti (Class XXXII), e g goštā 'l entertain, receive hospitably' 2nd sing gosti-ši inf gosti-ti from gosti 'guest', čīštā 'I honour' from čīstī 'honour', mīstā 'I take vengeance' from mīstī 'vengeance', branjā 'I strive' from branī 'strīfe', myšlā 'I think' from myslī 'thought' The Idg endings -ėjō and -i-jō in Slavonic were sure to run together after -ejbecame -īj- (I § 68 p. 60), and in both classes the endings -ja -iši -itū etc. have undoubtedly taken -ī- from the infinitive. We shall see in § 789 p. 322 how very probable it is that -ī- first got into the Causals, and afterwards spread to i-denominatives.

§ 783. Certain endings of the denominative verbs become types.

(1) Verbs in (Lith.) -ō-ju (() CSl) -a-ja from ā- and from o-steins; as Lith lanko-ju () CSl laka-ją from lankā laka and Lith. kilnó-ju from kilna-s, mirksnio-ju from mirksni-s, () C.Sl prija-ją beside Ski priyá-s, are cited in § 769 pp. 284 f

Other Baltic examples are Lith. htipo-ju 'I continue kneeling' from htipa 'kneeling, curtsey', dárgano-ju 'it is rainy weather', from dárgana 'rainy weather', Lett jaudá-ju 'I have power, I can' from jauda 'power', suhhá-ju 'I comb' from suhhas pl. 'comb', scháulá-ju 'I flutter', from schául-s 'fluttering', wájá-ju 'I weaken' from wáj-sch 'weak', jōká-ju 'I jest' from jōk-s 'jest', Lith. való-ju (i e *valjó-ju) 'I compel' from valà (i e. *valjà) 'will', vadžió-ju 'I lead about' from vādžios pl 'leading-string, leash', gyló-ju 'I prick repeatedly' from yylý-s 'sting', vynió-ju 'I wrap up' beside kukla-vyný-s 'necktie', also derived from -zē-stems, as Lith. pámio-ju 'I confuse, entangle' from páme 'a confusion, entanglement, hindrance', ránhio-ju 'I keep picking up' (berries, for example) from ranhe 'a gleaning or gathering'. The predominant meaning of Lith. verbs in -oju is 'to do, to

be occupied with' the thing denoted by the noun whence the verb comes, as dovanó-ju 'I make a present to some one', and it is easy to see that where there was any verb of this sort and a primary verb containing the same stem, the former might get some kind of frequentative meaning by way of Thus lanko-ju 'I busy myself with bending' means practically 'I bend to and fro' to make pliant or supple, whilst lenkù means simply 'I bend' We shall soon meet this same Frequentative class in Slavonic, and we may therefore with some probability infer that it belongs to the proethnic period of Balto-Slavonic But I would suggest that the type is still older, and was not produced at that time out of the later stratum of denominatives, for there is no objection to comparing forms like Lith Indo-ju OCSI sun-ědaja with Lat. juvaie Goth. miton etc., and placing them in the older denominative stratum See §§ 734 ff pp 261 ff.

The ending -1011, both with and without some part of the foregoing stem adhering to it, became an independent suffix Alone · lankioju beside lanko-ju, brádžio-ju 'I wade about' from bradà 'a wadıng' (but Lett, has braddaju) lándžioju 'I crawl about' beside i-landa 'place to ciawl into' (but Lett has lodaju), lakióju 'I fly about' from lakù 'place to fly in and out of, entrance to a bechive, sakioju 'I follow, sagioju 'I attach, fix, sew on' -loju (1 e *-liōju) parszlóju 'I woo, am a suitor on behalf of some one' from pursly-s 'suitor, wooer' (perszù pirsti 'to woo, to be suitor'), mirkloju 'I blink' from mirkly-s 'blinkei' (mérkiu mérkti 'I close my eyelids') and others; by analogy of these žirg-lóju 'I go stiaddling about' (žergiù 'I step, stride'). tep-loju 'I smear or grease over' (tepù 'I smear'), met-loju 'I throw about' (metù 'I throw' metau 'I throw about'). -czioju -szczioju badmirszczióju 'I almost starve, suffer hunger' from budmirte 'starvation', and others, which set the type for such forms as mirk-czióju mirk-szczióju 'I blink', trúk-czioju trúk--szczioju 'I throb repeatedly', ráisz-czioju 'I keep tying' -urioju -uloju (with parallel endings -uriûju -ulûju by § 785) for frequentatives: vỹburioju 'I wag my tail, fawn upon' from vybury-s 'one who wags the tail', krūtuloju 'I stir myself a little' from krūtuli-s 'a stirring of oneself, levy, milita', grōmuloju 'I chew the cud' from gromuly-s 'cud', etc; by this analogy kyb-urioju 'I kick or struggle a little', vōb-uloju 'I chew something tough'. -aloju is used in the same way, in this ending -urioju -uloju (§ 785) ') sárgaloju 'I am sickly' cp sargal-inga-s 'sickly', darbaloju 'I keep on working, I work vigorously', isz-vartaloju 'I tumble down' and many more, Lett. pirkaláju 'I buy by retail' beside Lith pirkula-s 'wares', cp. Lith svambalůju 'I dangle' from svambala-s 'that which dangles, plummet'.

Other Slavonic examples (observe that some of the Slav verbs in -a-ti may possibly answer to Lith. verbs in -ů-ti, see § 782 2 p 309) () C Sl. 1gra-ja 'I play' from 1gra 'game', sŭ-vraska-ja 'I am wrinkled' from vraska 'wrinkle', klerata-ja 'I calumniate' (beside klerešta, sec § 770 p. 287) from kleveta 'slander', gněva-ja se 'I am angry' from gněvů 'anger', kašī/ a-ja 'I cough' from kašītī 'cough' As in Baltic, these verbs were distinguished by a secondary frequentative meaning from parallel primary verbs They were associated with the group of frequentatives derived from verbs, whose beginnings go back to the older denominative a-series; thus -ěda-ja was associated with ja(d)-mī 'esse', -črīpa-ja with črīpa 'I make', -gněta-ja with gneta 'I press', čita-ja 'I read' with cita 'I count, reckon'; some of these could also be conjugated in the present like glagolją (glagola-ti) tiepeštą (tiepeta-ti), etc (§ 770 p. 287), as na-ričą 'I name' (inf na-rica-ti) beside na-reka As some of these frequentatives had originally a strong grade of root-vowel, it became a rule for new forms of the same model, that if the primary verb had the vowels e, o, \tilde{a} , or \tilde{u} , the frequentative had \tilde{e} , a, i, or y (see the comparisons in Leskien's Handbuch, pp 14 f)

¹⁾ The distinction between o and ii is in many Lith writings so incompletely kept, that it is often impossible to say whether an ending be $-o\mu$ or $-i\mu$

In vowel-stems, -vaja is found as a frequentative suffix; e. g. o-ba-vają 'incanto' beside ba-ją 'fabulor', o-de-vają 'I clothe' beside de-ja dežda 'I lav', m-vaja 'I drink' beside pr-ja 'I drink', o-kleveta-vają beside kleveta-ją kleveštą 'I slander', razumě-vają beside razumě-ją 'I understand'. The origin of -vaia was the noun-suffix -uo- -ud-. pwa-ja from pi-vo 'a draught', vũ-luu-1a 'I pour m' (beside bi-ja 'I pour') from *li-vu Mod Slov liv 'funnel' na-liv 'shower of rain' Russ na--livă 'the time when the corn grows full' pro-livă 'strait, channel', na-sěva-ja 'I sow' a field (beside sě-ja 'I sow') from Russ. sě-vů sowing, seed time Other similar nouns having v-suffixes may be regarded as derivatives with the suffixes -ŭkŭ -ŭka cp () C Sl pri-dč-v-ŭhŭ 'cognomen' Mod Slav o-dč-v-ka 'dress' beside -děvara. Russ do-bi-v-ka 'a complete driving in' (of stakes) beside 1 az-bivają 'I knock to bits, destroy' (bi-ją 'I strike'), Mod Slov, po-mi-v-ek 'rinsing pail beside u-myvaja 'I wash' (my-1a 'I wash') But the v of davaja 'I give' and of stavają 'consisto' may be taken as original, even if it is not to be put in just the same category as the u-suffix of the aforementioned forms, op Lith dovanà, Skr davánē and O C Sl stava stavů po-stavů stavlja = Goth stoja, Lith stoià Since piva-ti dava-ti were regarded as intimately connected with pi-ti and du-ti, the ending -vati became itself a type, and hence we have -znava-ti beside zna-ti 'knows', -klevetava-ti beside klevata-ti, and so on The endings -vaja -vati were very convenient for making frequentatives from verbs with a vowel stem-final, hence their frequency

Remark Fiequentatives of delivative verbs, as o-klevetavati razumėvati reličavati, must be regarded, because of their meaning, as an imitation of primary Frequentatives, and must not be derived from nouns in -avū and -ėvū (such as veličavū 'giandiloquent')

§ 784 (2) Verbs from o-nouns in (Lith) -e-ju (OCSI.) -ē-ja, as Lith gūdė-jū-s from gūdu-s. OCSI razumē-ja from razumū, are cited in § 770 pp 288 f

Other Baltie examples are. Lith. szykszté-ju 'I am covetous' from szýkszta-s 'covetous', Lett. labbé-ju 'I better

myself' from lab-s 'good', práté-ju 'I subtilize, play the wiseacre' from prát-s 'reason', galé-ju 'I finish' from gu'l-s 'end', mistré--ju 'I mix, mingle' from mistr-s 'hotch-potch' In Lithuanian these verbs mean 'to be or practise' anything. They are formed from other stems besides those in -o-, as Lith žygé-ju 'I go an errand' from žygi-s 'errand, course', malonēju 'I much wish to have' from malonù-s 'gracious', seiléju 'I slaver, drivel' from séile 'slaver', Lett bridéju 'I delay' from bridi-s 'while, period', auréju 'I blow the hunting horn' from aure 'hunting horn'. They are linked with the older group of Verbs in -éju, as hylé-ju (§ 740 p 265), in the same way as verbs like dovanóju are linked with those like lindoju (§ 783 p. 312).

In Lithuanian the ending -ineju was converted into a new type for Frequentatives. First came verbs like tekiné-ju 'I run about a little' from těkina-s 'running', dilbiné-ju 'I glower, glare from beneath my brows' from dilbina-s 'one who glowers'. The next step was smil-inéju 'I keep cating dainties, picking and tasting', lind-inéju 'I crawl about', vag-inéju 'I filch' and others. Verbs already frequentative often add-inéju, and thus form a frequentative of the second power, so to say, thus we have laist-inéju from láistau láistyti 'to pour repeatedly', itself frequentative of lé-ti 'to pour', žarg-inéju from žaryaŭ žargifu 'to straddle or stretch the legs repeatedly', freq of žeřk-ti 'to spread the legs'; ep pilst-aloju 'to pour, shed or drop repeatedly' from pilstau pilstyti freq of pil-ti 'to pour, shed' (§ 783 p. 313)

Other examples from Slavonic, where almost all verbs in -ėją are intransitive and most of them mean to get into some condition: o-slabė-ją 'I get weak' from slabū 'weak', o-malė-ją 'to get little' from malū 'little', buja-ją 'I get daft' from bujī 'daft', obū-ništa-ją 'I get poor' from ništī 'poor', o-krilē-ją 'I wing myself' from krilo 'wing'; vūz-mą-žajų 'I make a man of myself, take courage' from mąžī 'man' These too can be formed from other besides o-stems, as želėją 'I wish' from želja 'wish, longing'.

-lėją as an independent suffix. On the analogy of

o-mudilě-ja o-mudlě-ja 'I am slow, linger', from mudilu mudlu 'slow, lingering', and like forms, we find prokazilěja 'I make evil plots' from prokaza 'evil plot', mažilěja 'I become a man' from maži 'man', pečatilěja pečatlěja 'I seal' from pečati 'seal'.

§ 785. (3) The Lith. suffix -å-ju (§ 773 p. 291. § 782. 2 p 309), which began with o-stems, has the same function as -o-ju For further examples take the following Lith melå-ju Lett. melå-ju 'I lie' from Lith melaī Lett meli pl 'lies', Lith. żalå-ju Lett falå-ju 'I grow green' from Lith. žāla-s žale-s Lett. fa'l'-sch 'green', Lith. balnå'-ju 'l saddle' from balna-s 'a saddle', dagå'-ju 'I harvest' from dägu-s 'harvest', púlå-ju 'I fester' from púlei (púl-jai) 'matter, pus'. Derived from other than o-stems äszaråju Lett assaråju 'I pour out tears' from aszarà assara 'tear', Lith vagå'ju Lett waggåju 'I draw furrows' from vagà wagga 'furrow', Lith. dejå'ju 'I lament' from dejà 'a lament', prāvardžiāju 'I furnish with a surname' from pravardē 'surname'.

In the Lith, frequentative endings -urioju uloju and -uloju (§ 783 p 312), particularly in the last, there are variants -iūju and -ioju, here -ioju must be regarded in general as the older ending. Examples are žiburiūju 'I flare, flicker' from žibur ȳ-s 'light, torch', shliduruūju 'I shide, swim', tyvulūju 'I spread widely', svambalūju 'I dangle' from svambala-s 'that which dangles, plummet', margalūju 'I shine with varied hues', svaigalūju 'I reel'.

We have already remarked (§ 782 2 p 309), that the Lith verbs in $-u_{ju}$ may possibly have their counterparts in Slavonic, where the class $-u_{ju}$ may contain some of then.

§ 786. (4) Lith verbs in -yju from i-stems have been cited in § 771 p 289, to Lith. szirdy-jù-s answers Lett si'rdi-jù-s 'I take to heari'. Here are some further examples. Lith rūdy-jù 'I rust' from rūdi-s 'rust', kirmy-jù 'I am eaten of worms' from kirmi-s 'a worm', which was orig. an i-stem although inflected as a stem in -10- (II § 97 p. 289), Lett. áusi-jù-s I listen' from áus-s (Lith. ausi-s) 'ear'. From

other stems Lith. rómyju Lett râmíju 'I castrate' (properly 'I tame') from 10ma-s romù-s râm-s 'calm, tame, gentle', Lith. vaidyyù-s 'I quarrel' from vaida-s 'a quarrel', giñczyjù-s 'I strive' from giñczia-s 'strife', gaidryje-s 'clears up' (of the weather) from gaidrù-s 'cloudless, bright', krūvyju 'I heap' from krūvà 'a heap', Lett. gůdíju 'I make myself decorous or agreeable' from gůd-s 'demeanour, honour' (stem gůda-), skáustínu 'I tighten, wedge tight' from skáust-s 'wedge' (stem skáusta-), meddíju 'I hunt something' from mesch (Lith mēdi-s-džio) 'forest'.

Remark Since there were Lith denominatives in -inu, as links--minu (§ 624 p 161), whose future -\(\bar{i}\)sin became identical with that of the verbs we are now discussing, verbs in -inu and verbs in -ynu were mixed up together Compare Leskien-Brugmann, Lit Volksl. und Marchen, pp 314 f No special examination has been made to find out the local distribution of this confusion, or how far it went

On Slavonic verbs in -jq from ≀-stems, see § 782.5 p 311, § 789 p. 322.

§ 787. (5) The Slavonic ending -ują (inf. -ovati) we have already traced to its beginning with the stems in -ovă (§ 782.3 p 309) As an independent suffix it became very common, especially to denote condition, possession of a dignity, and the like. Examples · mirīnują 'I am peaceful, keep the peace' from mirīnă 'peaceful', prīvują 'I am first' from prīvă 'first', vojują 'I am a warrior, I make war' (inf. vojevati) from vojī 'warrior', săvěděteljują 'I am witness' from săvědětelī 'witness', săvědětelīstvują 'I give evidence' from săvědětelīstvo 'evidence', obědują 'I take a meal' from obědů 'meal', imenują 'I name' from une 'name'.

Remark In the same way this ending was fertile in Lithuanian, where it took the shape of -angu (see § 782 3 p. 309) On the model of karaláugu = O.C.Sl. kraláują 'I am king' we have veszpatáuju 'I rule', kaj áugu 'I make war', and others

K. CLASS XXXII

ROOT + -620- FORMING THE PRESENT STEM

§ 788. The Verbs which here come under our consideration are those which are called Causal in Sanskrit grammars, because in Sanskrit their prevailing meaning is causal.

The Skr accentuation -áya- must be regarded as original. Germanic also shows evidence that the accent lay after the root syllable, compare Goth. fra-vardja with d, but vairpa with p (I § 530 p 383), and Goth. marzja 'I vex' O Sax. merriu 'I stop, hinder, disturb' with pr Germ. z for s (I §§ 581 f. p. 434).

In all languages except Sanskrit, -é10- ran together with other present suffixes without possibility of distinction Sanskrit this ending was differentiated by its accent from that of derivatives from o-nouns. vēd-áya-ti 'gives to understand, informs' is contrasted with vasna-yá-ti from vasná-s (§ 770 p. 288), on the later confusion of these two classes, see § 793. In Greek both are alike, and φορέ-ω 'I carry about with me, I wear' looks just the same as φιλέ-ω 'I treat as a friend' from φίλο-ς (§ 770 p 288, § 776.2 p. 296), how it came to pass that the two classes agreed in the verb infinite as well, where we should expect * oilsovers in contrast to φορέοντες, has been explained in § 527 Rem. 1 p. 89 In Latin there is no distinction either, but mon-eo (-e-s) is just like claude-ō (-ē-s) from claudu-s, and like videō for *vidē-1ō 2nd sing. vidē-s (§ 738 p. 263, § 777 p. 300). In Irish, there was a confluence of -éiō (ad-surdim 'I prolong, postpone'), -e-iō (scorim scurrm 'I unharness' § 770 p 288), -1-16 (fo-dālım 'I divide up § 771 p. 289), and -20 (-lec-11 'I let, allow', § 719 p. 251). The same is true of Germanic Goth. fra-vardja 'I bring to nothing, destroy' = Skr. vart-áyāmi like haúinja 'I blow the horn' (-e-ió) from haúrna-, like dulþja 'I keep a feast' (-1-16) from dulþi-, hke glitmun-ja 'I shine' from *glitmun- (§ 768 p 282), and like vairk-ja 'I work' (§§ 720 ff pp. 251 ff), compare § 781. 2 pp. 306 f. Slavonic examples buždą 'I wake' budi-ši (Skr.

bōdháya-tı) like goštą 'I entertain' gosti-ši from the i-stem gostī (§ 782.5 p. 311) and like būždą 'I am awake, watch' būdi-ši = Skr būdh-yāmı (§ 702 p. 230, § 727 pp. 257 ff.)

Lith. has -au, a wide departure from the original form vartaū 'I turn, keep on turning about', 3rd sing. varto, contrasted with O.C.Sl vraštą vrati-tū Skr. vart-áyāmi Goth. fravard-ja, cp. bijaū-s § 586 p. 217 and jū'stau § 782.4 p. 310

To the same class, as we shall see in § 790, belong some verbs with a weak grade of root, and one of these is Idg *4-640. Skr v-4yām 'I weave', Lith. v-ejù O.C.Sl. v-ija 'I wind or twist' In this verb, and in this only, the original Idg. inflexion has been kept in Balto-Slavonic

I therefore regard as original the inflexion -eiō -eie-si -eze-ti etc, with -ezo- and -eze- interchanging, as may be clearly seen in Aryan and Greek. What we see in Germanic may also be the same, with for the most part only regular changes, only we must regard such forms as O H.O 2nd sing denus legis (1st sing. dennu 'I stretch' leggu 'I lay' = Goth panya lagga) as being ad-formates of hevis ligis etc. (§ 781 2 p 306) In Latin, the only form directly representing the Idg is the 1st person singular in -eō, but perhaps the persons with -eje-, which must have become -ein proethnic Italic, are also preserved in monës etc. monēmus monent, like claudēmus claudent, must be adformates of tace-inus tacent See on this matter § 777 p. 300. Lith vartaŭ and OCSI vrašta will be explained in the next few paragraphs

§ 789. The distinction between the 10-verbs which we have placed in Classes XXVI—XXXI, and verbs with -610-, is that in the former the 20-element was confined to the present from the proethnic stage onwards; whilst in the latter the perf part pass and the forms closely connected with it show after the root a certain element which seems to be etymologically akin to the present formative suffix. This element is -1- or -1-. Sanskrit and Germanic as a rule have -1-, e. g. Skr. varti-tá-s Goth. fra-vardi-p-s, and so in the Lat. moni-tu-s qu-i-tum.

-ī- is regular in Balto-Slavonic, as Lith. vartý-ti (vartý-siu) O.C.Sl. vrati-ti (vrati-chŭ). -ī- is also seen in the following. Gr (f)-ī-τέα 'willow' (beside (f)-i-τν-g 'felloe'), Lat. v-ī-ti-s, O.H.G. w-ī-da 'willow' (beside w-i-d 'cord of twisted withes'), Lith. v-ý-ti-s 'cane, switch' O C.Sl v-i-tī 'res in modum funis torta', which along with inf. Lith v-ý-ti O C Sl. v-i-ti are connected with Idg *u-é½ō (see § 788 p. 319) Skr. grbh-ī-tá-s (a-grah-ī-š-ta grah-ī-šya-ti) beside grbh-áya-nt-, háv-ī-tavē beside hv-áya-ti, mṛ d-ī-ká-m 'pity, compassion' beside mṛd-áya-ti. Lat. noc-ī-vo-s is doubtless related to noceō as O.C.Sl chodivū is to chodi-ti, or lyubivū to lyubi-ti (cp II § 64 Rem 2 p 136, and pp 137 f).¹)

From these facts it follows that we have in this verbal class what may be called a Root-Determinative -i-, parallel to the determinative -u-, thus Skr v-áya-ti· Gr. (f)-i-\tau-v-g O II G. w-i-d = Skr. sr-áva-ti· sr-u-tá-s (see § 488 pp. 46 f.). The only difference is that whilst -u- was restricted to some few examples (compare however § 596 2 pp. 136 f. for what is said on the present suffix -nu-), the -i- was fertile even in proethnic Idg itself If this view of the -\(\text{e}\tau-\text{e}\tau-\text{e}\text{class} is correct, the class must be very closely connected with present forms like Skr. am-\(\text{i}-ti\) (§§ 572 ff. pp 114 ff) Skr. v-áya-ti: am-\(\text{i}-ti\) = sr-áva-ti tar-u-t\(\text{e}\text{ (§ 596 2 pp 136 f.)}

Now are -é½o- and -t- connected in any way with the -½o-suffix of Classes XXVI—XXXI? It is an obvious conjecture that there may be the same relation between -e½o- and -½o- as between -e½o- and -½o- (v-áya-tı hár-ya-ti = sr-áva-tı. bhár-va-tı, see § 488 p. 47), or -eno- and -no-, or between -eso- and -so- (-esko- and -sko-) 1 do not venture either to assert or to deny this, but seeing how uncertain the matter is, I think it best not to group the -é½o-class with the -½o-classes.

¹⁾ Cp Skr á-mī-vā 'paın' beside amī-tı beside which we have Avest amayatā- 'pain', which form Bartholomae uses to postulate an Avest pre-. *amaye-ıtı (Stud Idg Spr., II 178)

We now return to the Balto-Slavonic present exemplified by vartau vraštą.

The simplest explanation of the Slavonic present inflexion is that -ī- has come in from the infinitive stem. vrati-ši vrati-tū then follow vrati-ti, a process which has an exact parallel in the change of *gostījā -lyeši etc. to goštā gosti-ši by analogy of gosti-tī gosti-chū (§ 782 5 p 311)

Remark Another explanation of the origin of this Slavonic present type is possible. Sanskrit has a mid optative e.g. $v\bar{e}day-\bar{i}-ta$ beside $v\bar{e}d\dot{a}ya-t\bar{e}$, injunctive $dhvanay-\bar{i}-t$ (op $\dot{a}-brav-\bar{i}-t$), and participle $v\bar{e}day-\bar{i}na$ -s. See § 574 pp 115 f, § 951. The indicative to $v\bar{e}day-\bar{i}-ta$ would be *(a-) $v\bar{e}d\bar{e}-ta$, and Bartholomae conjectures that certain forms usually regarded as oz-optative may be this very indicative (Stud Idg. Spr, ii 127). This would make it possible to derive 3^{rd} sing. $vrati-t\bar{u}$ from *voitez-t(i). I should give more weight to this explanation were it not for a very strong suspicion that these Aryan forms are due to analogy, and are not proethnic at all.

The Lith, inflexion -au -yti is found in Lettic too (-u -it) and also in Prussian (billā 'speaks' inf billī-t billī-twei), it therefore is proething in Baltic. Its origin is a confusion of the old inflexion of our class with both the earlier and the later group of a-denominatives, that is to say, with verbs like bijaŭ-s (§ 586 p. 127) and verbs like justau (§ 782.4 p. 310). But why was it this confusion went so far that the a-flexion drove the eio-flexion quite out of the present, but yet -a did not drive -ī- out of the infinitive? (contrast byaū-s byó-ti-s) I explain this by supposing that Baltic once possest verbs like Lat cubare sonare, which had the a-suffix in the present only. O.C.Sl. ima-mi 'I have' likewise shows a-flexion only in the present (inf. imě-ti). The Lith. present stems containing Ide. -o- in the root syllable, such as vartō- = *uortā-(Vuert-), seem to have a parallel in Lat domā- (domō domās) OH.(f. zamā-' (zamām zamās) = Idg. *domā- from √ dem-, since this is best explained as a contamination of *dnımā- (Skr. damā-yá-ti) and *domézo- (Goth. tamza OHG. luižaŭ 'I lick' (luižý-ti) is the equivalent of Goth. $zemm(\iota)u$). bi-láigō 'I lick over'.

The question next arises when -ā- got the better of -e2o-, as the Baltic shews it did at some time or other. I am inclined to place the change in the prooffinic period of Balto-Slavonic. What inflexion came just before the type actually found in Slavonic, iraštą vratiši and so forth, is not at all clear. It may very well have been one answering to the Lath, that is 3rd sing. *vortā-tī 1st pl. *vortā-mū, cp ima-tū ima-mū, and on this supposition it is easier to explain the actually found 7-forms, than if we suppose the Slavonic to have passed direct from *vortīje-tī to *iortī-tī But then we must also assume that *gostīja ^-iješi = Idg *-i-ió *-i-ié-si (§ 782 5 p 311) changed to goštā gostiši only on the analogy of iraštā vratiši. For the Baltie i-denominatives like Lath daly-jù sziīdy-jů-s prove that these forms sprang up within the Slavonic area

A complete leveling of the Causal conjugation with the i-Denominative is not unknown in Baltic. Here the i-denominative takes the lead. I find only a few examples in Lith., as paisyju -yti instead of paisaŭ -ifti 'to knock the beard off the barley, thresh' (cp Skr. pēšáya-ti). There are more in Lettic, e. g rūfiju rūfit 'to stretch' instead of Lith. rūžau rūžyti, pe'lnīju pe'lnīt 'to earn' instead of Lith pelnaū pelnīti

§ 790. In égo-verbs with roots of the e-series, the rootsyllable has and originally had generally the 2^{nd} strong grade, o; as Gr. $q \circ p \acute{e} \omega$ beside $q \acute{e} p \acute{e} \omega \omega$, Lat moneo from \sqrt{men} , Goth, satja beside sita, Lith vartifit O C.SI vratiti for *rortītī from \sqrt{uert} . This is why Aryan has \bar{a} in open syllables, as Skr. bhāraya-ti Avest bārayeiti from \sqrt{bher} , if the hypothesis set forth in vol 1 § 78 p. 69 is correct 1)

The European languages make it improbable that there were in the very oldest times any forms with the root-grade e. Aryan forms with -a-, as Skr jaráya-ti from \sqrt{ger} , janáya-ti from \sqrt{ger} , may be explained by the admixture

¹⁾ No explanation of a in bhāruya-ti which is in the least degree satisfactory has hitherto been put forward by those who deny this. The European forms adduced as parallel by Bechtel (Die Hauptprobleme der idg Lautl, 169 f) prove nothing at all Compare § 843, Rem.

with denominatives derived from o-stems which will be described in § 793. on this supposition, jaráya-ti and janáya-ti would belong to the nouns jára- and jána- just as much as mantráya-ti belongs to the noun mántra-. Or they may be explained in another way In Aryan, the éjo- formation was often made from the connected primary verb instead of being built up on the root (see § 796), so that pātáya-ti would stand to patáya-ti (beside páta-ti) as kartaya-ti to krntaya-ti (beside krntá-ti).

On the other hand, é10-verbs with a weak grade of root have been found from the procthnic period onwards. They are commonest in Aryan, e. g. Skr. qrbháya-ti. The following are proethnic Idg · Skr v-áya-tı 'weaves' Lith v-ejù v-iją v-vją 'I wind, turn, wrap', beside Gr. t-τέα Lat v-7-ti-s O.H.G. w-ī-da Lith v-y-ti-s v-y-ti O C.Sl. v-i-ti v-i-ti and Gr. \ddot{i} - τv - ς O.II G. u-i-d (§ 789 p. 320); root without determinative in Skr v-tu-m u-tá-s perf. 3rd pl. ũv-úr pass. <u>u-ya-tē</u>, extended by <u>u</u> in v-á-tavē and others (Whitney, Skr. Roots, pp. 157 f.) 1) Skr. śv-áyu-tı 'swells, thrives, is strong' beside Gr rv-éw 'I am pregnant', Lat qu-eō, with supine qu-i-tum (the resemblance of eo itum made the conjugation of queo run like eo - quimus quibo etc); the same root in Skr. Lat. m-ciens for *-cy-jens (§ 715 p. 248, § 717 p. 250), and with \bar{a} -extension in Skr $\dot{s}v$ - \bar{a} -trai-s Gr. El. $\dot{\epsilon}\pi$ - ϵv - $\pi\dot{\eta}\tau\omega$ and others (§ 737 p. 263) Skr. dhun-aya-tē 'roars' (beside dhvan--a-ti 'makes a sound') O.Sax. dunin Mid.H.(† dune O.Icel. dyn 'I roar, rumble, groan'. Of the same kind are Skr hv-áya-ti 'calls' Avest. zh-aye-iti zuv-aye-iti beside Skr háv-a-të perf. ju-háv-a aor. á-hv-a-t á-huv-a-t, Lat. (1-eō beside ac-ciō ci-tu-s Gr xi-w xi-vv-ua; () II. (+ zunt(i)u 'I kindle' with Goth tandja 'I kindle' beside Mid.II.G. zniden (strong verb) 'to burn, glow' Uncertain Gr uλ-έω' I overflow beside έχ-φλαίνω Lat fl-c-re;

¹⁾ From this yc_{ℓ} - y_{ℓ} -, y_{ℓ} -, which had become a root again before the end of proethnic Idg., a present was again formed by means of $-\dot{e}_{\ell}o$ -; Skr. vy- $\dot{a}ya$ -ti 'winds up, wiaps up, covers, hides', Lat vi- $e\sigma$

Goth. ga-nsja I cause from a nest originally 'I make to come forward': O.C.Sl. brija (brija) brite 'to shear, shave' beside Skr. bhur-ij- 6r. qu'q-o-ç. and others.

§ 791. In all branches of our group, the verbal class now being discussed has two distinct meanings, both of which must be regarded as holding for the original language. Each of them serves to contrast a verb with a simple verb from the same stem.

First there is the Causal sense: the subject of the éjoverb sets some one in motion, impels him to do something; in fact, makes him do the action of the simple allied verb. Skr. bodháya-te O.C.Sl. bade-tň 'wakes up. makes wake' beside bódha-ti bade-tň 'is awake'. Ski. taršáya-te 'makes languish, thirst' beside třšya-ti 'languishes, thirsts'. Lat. torreō 'I dry up. make dry' O.H.G. derrei)u (same meaning) beside Goth. paúe see-punk 'I am athirst'. Gr. qoşoo 'I make to flee, scare away' beside qépouai 'I flee'. Lat. moneō 'I make some one think, remind' beside meminī. Goth satja 'I make sit, I place' (Skr. sādáya-ti) beside sata 'I sn' 1)

Secondly, they express a meaning which may be called Intensive, Iterative, or Frequentative. This is often weak and clusive, and in many cases was certainly extinct at the time when we find the verb actually used. Skr. vi-vāhayatī beside vi-vahatī 'leads away (a biide), leads her home' Avest. vāđaye-itī 'leads home', O C.Sl. voždą vodi-tī freq of veda 'I lead', \quad yedh-. Gr. (f)nyžopiai pass 'I am taken backwards and forwards. I am carried', Goth. vagja 'I move' beside ga-viga 'I move, O.C'Sl voža vozitī freq. of veza 'I carry, convey', \quad yeğh-. Skr. mardaya-tī beside mṛdna-tī morda-tī 'presses, crushes, Lat mordeō beside perf. momordā = Skr. mamarda. Skr. ā-tānayatī 'stretches, makes stiff' beside ā-tanōtī 'stretches, pulls up' a pic c'

¹⁾ Sometimes these verbs are causal to the Passive of the simple verb; as Goth. ya-turhya 'I cause to be seen' fru-atya 'I divide for food, cause to be eaten' O.H.G ezzu 'I cause to be grazed upon, use for pasture' (also 'I let eat, give a taste').

of weaving, Goth. -panja 'I lengthen, stretch'. Skr. pēšaya-ti beside pináš-ti 'treads or crushes to atoms' Lith paisý-ti 'to knock (barley, in order to free it from the beard)' O.Ir. for--tugim 'I cover, hide', O.H.G decch(i)u 'I cover' beside Lat. tego. Skr. dharáya-ti, beside dharati (very rare), 'holds fast, keeps', nodaya-ti 'drives on' beside nudá-ti 'knocks, strikes away, pulls', rājya kārayatı and karōtı 'ıs kıng, uses lordship'. Gr. 40060 'I carry about with me, wear' beside \$\phi \in \varepsilon \text{u} \text{ carry',} ποτέομαι 'I fly about, flutter' beside πέτομαι 'I fly', στροφέω 'I turn round and round excitedly' beside στρέφω 'I twist, turn', τροπέω beside τρέπω 'I turn', οχέω 'I hold fast' beside εχω 'I hold, have' Lat. lūceō (m O Lat also causal 'to make shine'), haereo, tondeo, and others Goth uf-rakja 'I reach up' beside Gr doirm 'I reach out', Goth. pragja 'I run' beside Gr τοέχω 'I run', O.Sax kennu 'I beget' beside Skr. jána-ti begets' The Intensive or Frequentative meaning is clearest in Balto-Slavonic. cp. further Lith ganj-ti 'to keep (animals), pasture them' O.C'Sl gom-to 'to drive' freq of ženą gna-to to drive, hunt', V ghen- 'strike, kill', Lith grāžý-ti freq. of grēžiù grę̃szti 'to turn, twist, bore', O C.Sl vlači-ti freq. to vlėką vlėšti 'to pull, drag along'

I shall not go into the question of the relation between these two original uses. An attempt to explain it is made by Gaedicke, Der Acc im Veda, pp. 276 f

§ 792. Considering the very real and living connexion which existed between the ego-present and the primary present stems, e. g. Skr. bodháya-ti and bódha-ti, vāráya-ti and vinó-ti, it is easy to understand why ejo-forms were often built up on a complete present stem, not on the root. Thus Skr. jīráya-ti O.C.Sl. živi-ti beside ji-vāmi ži-va (inf ži-ti) I live' (§ 488 p. 47), Skr. dhūnaya-ti beside dhū-ná-ti dhū-nó-ti 'shakes, shatters' (cp. Gr. Φινέω § 801), hintaya-ti with kartaya-ti beside kıntá-ti 'cuts', Lat. mısceō beside a form *mıscō for *mic-sco v mezk-, O.H G. scern(i)u beside sci-nu 'I shine'. Other examples will be given below.

\$ 793. There are often nouns which most closely resemble these verbs both in form and meaning. The result of this was that éjo-verbs were formed from nouns direct. If, for instance, people derived Skr. vāj-áya-ti hastens, conquers, spurs on, makes something use its power (= Goth. us-val/a 'I wake up') from idja-s 'speed, power' - which was really mevitable, as there was no such parallel stem as *inja-ti - it was easy to form mantráya-tē 'advises' from mán-tra-s 'advice'. It was, as has been observed in \$ 487 p. 43 the action of the same principle which produced in Gothic fullnan from full-, 'full' by analogy of af-lifnon auknan, in Lithuanian linksmin-ti from linksma-s 'glad' by analogy of krittin-ti kupin-ti, renth from rēta-s 'thin' following tenkù tèkti, gelstù gelsti from gelta-s 'vellow' following virstii vireti mireztii mirezti (§ 623 p. 160, § 624 p. 161, § 635 p 173, \$ 686 p 217) Compare further Skr. muš-ud-ti 'steals' from mūš- 'a mouse' § 599 Rem p. 143.

These ézo-denominatives are commonest in Germanic and Balto-Slavonic, and one or two of these new formations occur in both branches: Goth fullyan OC.Sl plum-ti 'to fill' from full-s plum 'full' (*pl-no-s), Goth. hódjan OCSl. céli-ti 'to heal' from hád-s célű 'whole, healthy'. But it is quite possible that these two developements are independent.

§ 794. Pr. Idg. Examples with monosyllabic root, as Skr v-áya-ti Lith. v-ejù O.C.Sl. v-ĭja, Skr. śv-áya-ti Lat. qu-eō, have already been cited in § 790 p 323

As regards the following examples, which shew a strong grade of root, it is to be remembered that this formation was always an active living type in Aryan, (termanic, and Balto-Slavonic, so that it is not unlikely that all these languages hit upon the particular forms independently. I therefore give by preference such examples as are found in Greek or Italic as well, where the type was less prolific.

*bhor-éχō \$\sqrt{bher}\$-. Skr. sam-bhāraya-ti 'causes to be gathered', Gr. φορέω 'I carry about, wear'. *tor-έχō \$\sqrt{ter}\$-: Skr. tāráya-ti 'gets carried over, transports, furthers', Gr. τορέω

I make to pierce, shout loudly'. *uol-éiō \(\sigma\) uel- Skr. pru--vāraya-ti 'appeases, offers, offers for sale', (foth valja 'I choose', O ('Sl voli-ti 'to wish, to prefer' 'mon-éiō \(men-\) Skr. mānáya-ti 'honours, shows honour' 1) Avest. manaye-iti 'causes to believe, regards' (for q ep I § 200 pp. 168 f), Lat moneo (O H.G. manem manem 'I imagine' with different inflexion), Inth isz-maný-ti 'to understand'. zton-éiō √ tenā-tānaya-ti 'stretches, stiffens' sa-tānaya-ti 'gets carried out, brings to conclusion', Goth uf-panja 'I stretch, lengthen out'. *qιου-έιο γ queu- (Hom ι-σσενε) Skr cyāváya-ti sets in motion, moves from its place', (ir σο(f)έω in εσσοημένον τεθορυβημένον, ωομημένον Hesych (I § 489 p 360) 2) *poμ-έιδ √ peι- (Skr. páy-a-tē) Skr. pāyáya-tē 'gives to drink', O.C Sl. popi-ti to give to drink' (1st sing. poρη) *tors-έχο \$\sqrt{ters-}\$ to be dry, thirsty': Skr. taršáya-ti 'makes to thirst or pine', Lat torreo, OH.G. derr(i)u (pr. Germ * $furzi(i)\bar{v}$) 'I make dry, cause to wither'. *mord-évō V merd- Skr mardaya-ti 'presses, oppresses, crushes', vort-éiō √ vert- Ski, vartaya-ti 'sets encling, Lat mordeo rolls, causes to take a certain bent or direction', Goth. fra--cardya 'I bring to nought, destroy, make away with', Lith vartif-tr OCSL vrali-ti freq. 'to turn, twist'. V hreth- Skr. śrāthaya-ti (śratháya-ti) loosens, frees', O H G. rett(1)u (Goth *hradja) 'I tear away, 1escue' *bhlog-égō √ bhleg-. Skr. bhrajaya-ti 'causes to gleam or shine',3) OHG blecch(i)u (Goth *blakju) 'I make visible, show'. *logh-éző V legh- Goth lagja 'I lay', O.C.Sl. loži-ti 'to lay'. month-érō √menth-: Skr. manthaya-ti causes to be stirred

¹⁾ The meaning of this verb was influenced by the subst māna-s mana-m 'opinion, high opinion, esteem, honour', in the same way as H G blenden (O.H.G blenten 'to daze, darken, blind' = O C Sl. blqdnti 'to wander' Mod Slov bluditi 'lead astray, deceive') by the adj blind, whose factitive the verb is now used for, though originally the factitive was Goth. -blindjan A S blindan Compare § 681 p 213 on Skr. lošia-tē.

²⁾ Parallel verb $\sigma oo \tilde{v} \mu a \iota = \sigma o \acute{o} o \mu a \iota$, a denominative, see W Schulze in Kuhn's Zeitschi XXIX 264 f.

³⁾ This may also be formed from the pres bhrája-të = Idg. *bhlēge-tar (§ 494 p. 55), by analogy.

O.C Sl. mati-ti 'to bring into perplexity'. *tong-éiō √ teng-: Lat. tongeō, Goth. pagkja 'I think over, think about', but cp § 804. *nok-ézō v nek- · Skr. nāšaya-tı 'causes to disappear, destroys', Lat noceo 1) *long-ézo v leng-. Skr. rōcáya-ti 'causes to shine, lights up', Lat lūc-eō 'I shine, am bright and O Lat 'I make shine' *loubh-égō V leubh- Ski. lobháya-ti 'excites some one's desire, attracts' Goth. us-láubju 'I allow', OCSI *lyubi-ti* 'to love' *ĝous-ézō √ ĝeusjōšáya-tē 'likes, takes pleasure in, approves', Goth káusja 'I taste, try' *suop-érō \squares suep- Skr svāpáya-ti 'sends to sleep', O.H & mt-suebb(i)u 'I send to sleep' O. [cel svef 'I pacify, quiet' *uogh-ézō \(\square\) uegh- Skr vāhaya-ti 'conveys, makes (a carriage or horses) go, drives, (ir. oxioo 'I convey, make ride' pass 'I am carried about, am carried, I ride on', Goth ga-vagia 'I move', O C Sl. vozi-ti 'to carry (in a vehicle), vchere' *uoid-éiō \(\sigma\) ueid- Skr i\(\bar{e}\)daya-t\(\bar{e}\) 'gives to know, informs', O II G weiz(i)u 'I give to know, I show' *bhoud-éjō √ bheid-. Skr. bhēdaya-ti 'splits, divides', O.H.G beiz(i)u 'I make to bite, I bait' pot-éjō v pet- Skr. pātáya-ti 'makes to fly or fall', Gi nortouar 'I fly, flutter'. √ dhegh-. Skr. dāhaya-ti 'causes to be burnt', Lat foveō 'I warm, keep warm, cherish, take care of 2) *bhoq-érō \$\sqrt{bheq}\$-Skr bhājáya-tı 'dı ives away', ') Gr. φοβέω 'I make to flee, scare or hunt away'. *tjog-éjő v tjeg- Skr tyājaya-ti 'bids leave alone', Gr. σοβέω 'I drive off quickly, scare away'. 'sod-éjō √ sed-. Skr sādáya-tı 'gets seated, sits', O.Ir. ad-suidim 'I prolong, postpone' (Thurneysen, Kuhn's Zeitschr. xxxi 97), Goth satja 'I seat, place'. *od-éjō \ ed- Skr ādaya-ti 'causes to eat, feeds, fattens', Goth fra-atja 'I divide up for a meal' O.H G. ezz(i)u 'to make cat, give to eat, feed'. *pak-éiō

¹⁾ The construction nocēre alient is doubtless due to the analogy of obesse officere etc

²⁾ Compare fome, 'kindling, tinder' (for *formes) with Lett dagli-s'tinder'

³⁾ Skr bhaj- 18 contaminated of two distinct roots, that of gayeir (Fick, Wtb I4 87) and that of gefoure Lith. beyn (1d. 1b. 490).

V pāk-: Skr. pāśáya-ti 'binds', O H.G fuog(i)u O Sax. fōgiu'I make fit, join, bind together'. Skr. hrādaya-ti 'causes to
make a sound' (hrāda-tē 'sounds'), O.H G gruoz(i)u O.Sax.
grōtiu 'I address, speak to', if another, Goth grēta 'I wail
out', is of this kin, then we must assume Idg. *ghrōdeiō.
Goth af-dau-ps 'exhausted' pres. *dōja for *dōujō in the first
instance (I § 179 p 156), O C Sl davi-ti 'to strangle'. —

In the following, -éxō was not added immediately to the root, see § 792 p. 325.

*tons-έιō from the stem ten-s- Skr tasaya-tı 'pulls about, tugs, tears, shakes', Lith tāsý-tı 'to drag about', cp Skr. tasa-tı Lith tēs-ιὰ § 657 p. 191. *wos-έιō from stem w-es-· Skr. vāsáya-tı 'causes to put on, clothes with something', Goth ga-vasıa O II G. ueruu 'I clothe'; cp Skr v-ás-tē Gr. ἐπί-εσ-τω § 656 p. 191.

*rōdh-ézō stem rē-dh- Skr. rādhaya-tı 'brings about', O.Ir. no rāidiu 'I speak', (toth rōdja 'I speak', O.C.Sl radi-ti 'to consider, care for', cp Skr árādha-t Goth. ur-rēda § 689 p 220 *zoudh-ézō *zudh-ézō stem zeu-dh-'to stir, set in motion' Skr yōdháya-ti 'involves some one in wai, fights against', Lat zubeō properly 'I set in motion' (cp. Lith. zūdinu 'I move, cheer up, exhort'); cp. Skr. yōdha-ti etc., loc. cit, the O Lat. zoubeō is only once found (S. C de Bacch., 27), and ou was perhaps only caused by the spelling of zousiset which precedes 1)

Goth $st\bar{o}ja$ 'I direct' for * $st\bar{o}u\bar{u}\bar{o}$ (I § 179 p. 156), O.C.SI. stavlja 'I place, stay, stem' with Goth. stava 'court of law' (see ibid.) O C SI. $stav\bar{u}$ 'compages' $po-stav\bar{u}$ 'loom-frame, or web' stava 'joint, limb' Lith. $stov\bar{u}$ 'place' from $\sqrt{st\bar{a}}$ - 'stand'; to argue from Gr $\sigma \tau \bar{v}\omega$ $\sigma \tau \bar{v}$ - $\lambda o-\varsigma$ Skr $sth\bar{u}$ - $l\acute{a}$ -s, we had best assume $st\bar{u}$ - $st\bar{a}u$ - (cp. § 488 pp. 44 ff.)

The causal Skr. jīváya-ti 'makes living, lets live' O.C.Sl. življa '1 make alive' is probably derived from the present

¹⁾ If joubeo is a genuine form, it may be a variant of jubeo like Skr. Šocáya-tı beside šucáya-tı.

jt-va-ti ži-ve-tŭ 'lives' (§ 792 p 325), whilst Goth. ga-qiuja 'I make alive' is a denominative causal from qui-s 'living' (§ 793 p 326, § 806).

§ 795. Aryan. A pass part in -i-tú- formed from all verbs with strong grade of 100t syllable; see § 789 pp. 319 f.

Skr. dhāráya-ti Avest dāraye-iti 'holds fast, carries, supports, strengthens, preserves', O Pers. dārayāmīy 'I hold, possess', V dher- Skr. vār úya-ti Avest. vāraye-iti 'holds back, keeps off, hunders' Goth varju 'I hinder, protect, defend', Vuer-. Skr nāmaya-ti namaya-ti Avest nāmaye-ti 'makes bend, bends' (tr), \(\square nem-. \) Skr. **srāváya-ti **sraváya-ti Avest sravaye-iti 'causes to hear, recites, informs', V kleu-. Skr. cāyaya-ti cayaya-ti 'ranges together, collects', \(\sqrt{gez} \)-. Skr. nāyaya-ti 'causes to be carried away' Skr vardháya-ti Avest. vardaye-iti 'causes to grow, increases, furthers' Skr. bandhaya-ti 'causes to be bound, chains', Avest. bandaye-iti 'binds', V bhendh- Skr. rahiya-ti Avest. renjaye-iti 'expedites, despatches', V lengh- (I § 199 p 167) Skr. jambháya-ti Avest. zembaye-iti 'grinds to powder, destroys', V gembh-. Skr. rōcúya-ti 'causes to shine, illuminates', Avest raocaye-iti 'lights up, illummates' Lat lūceō, see § 794 p 328. Skr. rēcaya-ti 'makes empty, lets free, deserts', Avest raecaye--iti 'deserts', V leig-. Skr sādáya-ti 'places', Avest. ni-šādaye--iti 'causes to sit down, brings under, subdues' O.Pers. niy--ašādaya-m 'I made sit down, arranged' (for š in the O Pers. cp. 1 § 556 p 410): (60th. satja, § 794 p 328. Skr. bhāyaya--ti 'causes fear to, frightens', V bhaz-

Many Skr. forms are proved by their root syllable to be re-formates. E. g aryaya-ti (as also δr)a-ti and suchlike), from \sqrt{reg} 'to stretch oneself' (rigistha-s, (fr. $d\varrho \varepsilon r\omega$), is a transformate of f)ya-ti following $ardh\acute{a}$ ya-ti : rdhya-tē rdhn \acute{o} -ti etc $t\bar{o}$ laya-ti 'lifts, weighs' formed from tul-(tulaya-ti etc) = ldg. tll- (1 § 287 p. 229, § 290 p. 232), follows $b\bar{o}$ dh\acute{a}ya-ti . budh- and the like

Forms with weak grade of root Skr. v-áya-ti 'weaves': Lith. v-ejù, see § 790 p. 323. śv-áya-ti 'swells, thrives, is

strong'. Gr. xv-ém Lat. qu-eō, see ibid. Skr. hv-áya-ti Avest. zb-aye-iti zur-aye-iti 'calls' Skr. dhun-ayu-tē 'roars'. O.Sax. duniu, see ibid tul-aya-ti beside tōl-aya-ti, see just above. grbh-áya-ti 'grasps'. śuc-áya-ti 'shines, beams' pīd-uya-ti 'presses' for *pi-zd-eie-ti ('makes sit down') from V sed-, see I § 591 p. 447 Avest. urūpaye-iti 'does harm'. Add doubtless Skr chad-úya-ti beside chandayu-ti from the pres. chant-ti 'appears'.

§ 796. Many new forms from Primary Present Stems (see § 792 p 325):

Skr. *īráya-ti* 'sets a-going, excites, arouses' beside *īr-tē* Idg. **īţ-tai*, *pūráya-ti* 'fills' beside *pūr-dhí* Idg. **pţ-dhi*, Class I § 497 p. 57

A group of fairly common forms, such as Skr. patáya-ti Avest. pataye-iti beside Skr. pātáya-ti, have been derived from forms of Class II A, as has been already said (§ 790 pp. 322 f). The following may be connected with stems of Class II B. Skr. qūhaya-ti Avest. quzaye-iti (but not O.Pers gaudayāhy 2nd sing conj.), cp Skr gūha-ti 'hides' Avest mid. guza-tē; Skr. turáya-ti '() (beside tāráya-ti), cp turá-ti 'gets through, makes oneself master of . But this view is not the only one possible, since the ézo-verbs themselves could have a weak grade of root syllable (§ 790 p. 323, § 795 p. 330).

Avest. tttāraye-iti 'seeks to overcome, or strike down' beside Skr. ti-tar-ti Avest. ti-tar-a-p Classes III, IV, § 540 p. 100, § 548 p. 105.

Skr. sajjaya-ti 'fastens on' beside $sajja-t\bar{e}$ for *sa-zj-a-Class VI § 562 p. 110.

Causal of the Intensive class. Skr. dādhāraya-ti 'causes to hold fast' from dā-dhar-ti, jāgaráya-ti 'awakes, enlivens' from jā-gar-ti, Class V § 560 p. 109. Skr. dandašuyi-tvā gerund 'having caused to be severely bitten' beside dán-daś--āna-s partic., from daś- 'to bite', varīvarjáya-nt- 'turning

¹⁾ O.Pers. atarayāma may be the same formation (I § 290 p 232).

backwards and forwards' beside várī-igg-at- partic., from varj-'to turn, twist' Class VII \$ 568 p. 113.

Skr. prīnaya-tı 'gladdens, delights, makes inclined' from prī-nā-ti, dhūnaya-tı 'moves to and fro, shakes' from dhu-nā-ti, Class XII § 5'99 pp 142 f, dhūnaya-tı is perhaps identical with Gr Φυνέω, § 801

Skr. išanaya-nta from išana-t Class XIV, and išanyá-ti Class XIX (\$ 619 pp. 156 f., \$ 743 p. 266), cp Gr. όλιγο-δρανεων beside δραίνω § 801.

From Present Stems of Classes XV and XVI, §§ 625 ff. pp. 162 ff Skr. kṛntaya-ti (beside kartaya-ti) Avest. kerentaye-iti 'cuts, splits' from Skr. kṛntá-ti Avest kerenta-iti Skr. rundhaya-ti 'stems, holds back, torments' (beside rōdhaya-ti) from runaddhi rundh-a-ti Skr. sundhaya-ti 'cleanses' (beside sōdhaya-ti) from sunaddhi sundh-a-ti Skr. limpaya-ti 'besmears, anoints' (beside lōpaya-ti) from limp-á-ti Skr. bṛhaya-ti 'strengthens' (beside barhaya-ti) from bị h-a-ti Skr. dṛhaya-ti makes fast, fixes firmly' from dị h-a-ti. Avest bunjaye-iti 'cleanses' from bunj-a-ti

O.Pers. 3^{rd} pl. $a-k\bar{u}$ -nav-ayat \bar{u} 'they made' beside $a-k\bar{u}$ -nav-am 3^{rd} sing $u-k\bar{u}$ -nav-a, Classes XVII and XVIII, § 640 p. 178, § 649 p. 185.

Skr pinvaya-ti 'makes swell or abound' from pi-nva-ti, Class XVIII § 651 p. 186

From unreduplicated Presents, Classes XIX and XX, § 656 pp 190 f Skr. vāsāya-ti tasaya-ti, see § 794 p. 329. Skr. vākšaya-ti ukšaya-ti Avest. varšaye-iti 'makes grow' from Skr. ik-ša-ti Avest. vax-ša-iti. Skr bhīsāya-tē 'frightens, overawes' (beside bhāyaya-ti) from bhy-āsa-ti § 659 p. 195. Avest. auvy-āxšayeinti 'they inspected' beside O.Pers. patiy-axšaiy 'l inspect' § 659 p. 194.

From reduplicated s-Presents (Desideratives), Class XXI §§ 666 f pp 198 ff Skr cikīršaya-ti from ci-kīr-ša-ti 'wishes to make, begins, purposes', šikšaya-ti from šikša-tē 'learns' for *ši-šk-ša-taž.

prachaya-tı (gramm.) from prchá-tı 'asks' ground-form

*pr(k)-ske-ti, ichaya-ti (beside ēšaya-ti) from ichá-ti 'desires', Class XXII §§ 670 f. pp. 202 f.

 $mrd\acute{a}ya$ -ti 'is gracious' from $mrd\acute{a}$ -ti for * $mr\check{z}$ -da-ti Class XXV § 692 p 222.

chāyaya-tı from cha-ya-tı 'cuts up', Class XXVI § 707 p. 237. pyāyáya-tı from pyá-ya-tē 'swells', Class XXVIII § 736 p. 262

§ 797. Near kin to the éxo-forms cited in the preceding paragraphs, are the Skr. groups ending in -payati and -apayati, as sthā-payati and sn-apaya-ti

In these endings, as in gley-p- and ley-p- (§ 634 pp 170 f.), -p- must be counted one of the Root-Determinatives which have been discussed in § 488 pp 44 ff ¹) In principle, these do not differ from ordinary present suffixes.

(1) -payatı. The following may be considered as the forms which originated this type in Sanskiit $sth\bar{a}paya-ti$ causal of ti-šth-a-ti 'stands', cp Lith. stapy-ti-s 'to stand still' O H G. stab 'staff' $stab\bar{e}m$ 'I get stiff', \checkmark $st\bar{a}-st\bar{s}-d\bar{a}payu-t\bar{e}$ causal of $d\bar{a}-ti$ 'divides, gives a share', cp Gr. $b\bar{a}n-t\bar{w}$ 'I divide up, tear in pieces' $b\bar{a}n-a\bar{v}\eta$ 'expenditure' Lat daps, \checkmark $d\bar{a}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{e}-d\bar{$

Then again smāpaya-ti beside smāy-aya-ti from smi- 'to smile', māpaya-ti instead of *māy-aya-ti from mi- 'minuere', adhy-āpaya-ti beside praty-ayaya-ti from i- 'to go'. There were two causes for this set of forms. Firstly, the participles came in contact, smi-ta-s smi-tvā seeming to be parallel with e. g sthi-tá-s sthi-tvā, secondly, pāy-áya-ti 'gives to drink'

¹⁾ Compare now Per Persson's Winzelerweiterung pp. 49 ff In this work p is taken to be a root determinative in many words where we have regarded it as part of the root proper, as in Skr súr pa-ti Lat serpō, which the writer derives from the root of Skr súr-a-ti 'moves, flows'.

(beside pā-tá- páy-a-tē) was compared with pā-paya-ti gives to drink' (from $p\bar{a}$ -ti), and $g\bar{a}y$ -aya-ti 'makes sing' (beside $g\bar{\imath}$ - $t\acute{a}$ - $-g\bar{e}-\check{s}na$ -) compared with $g\bar{a}-paya-ti$ 'makes sing' (beside $g\bar{a}-ti$ gā-sya-ti) Then a further step was taken, and the resemblance of sthi-tá-s to raidhi-tá-s dīkši-tá-s produced cardhāpaya-ti from vardháya-ti helps, arouses, causes a pleasant excitement, dikšā-paya-ti from dikšaya-ti 'consecrates', and again we have have on the analogy of these bhunjāpaya-ti from bhojaya-ti 'gives to eat' (pres bhunák-ti), and others

(2) gl-apaya-ti 'brings to decay, rums, exhausts' (beside glā-paya-ti glā-ti glā-ya-ti) beside opt glapē-t (Whitney, Skr Roots p 41), (τι βλ-έπω 'I look, sec' (cp. βαλεῖν όμματα or ὅσσε εἴς τι οτ πρός τι),1) V gel- sn-apáya-tı 'washes, bathes' (beside snā-páya-tr snā-tr snā-yu-tē) compared with Lat Nep--tūnu-s śr-apáyu-tı 'boils, roasts, burns' (beside śrá-ya-tı śrā-tá-s) is connected with su-śrápa-s 'easy to cook', jn-apaya--ti 'instructs' (beside jnā-paya-ti jnā-sya-ti) beside jnap-tá-s 'instructed' jûap-ti-š 'attainment of knowledge'. ml-apaya-ti beside mlā-páya-ti 'makes languid, takes away the elasticity'.

Remark Other forms with -ep- are Gr A-en-tw Lat cl-epo Goth hl-ifa 'I steal' beside O Ii celim O H.G. lulu 'I hide', Gr δg-έπω 'I break off, cut off, pluck' δρεπανο-ν 'sickle' beside δέρ-ω 'I flay', Lat. ti-ep-idu-s, OC.Sl tr-epe-tü 'to tremble' beside Skr tai-ald-s 'trembling'. Compare the Author, Morph Unt 1 40, 48, 49, Per Persson, Wurzelerw 50 ff.

§ 798. A Denominative éjo-formation like Skr. mantráya--tē (§ 793 p. 326) can only be definitely maintained for Sanskrit; we know nothing of the Old Iranian accent, and therefore cannot say whether Avest. frayraraye-iti 'wakes up' would answer to a Skr. *grārāya-tı or *grārayá-tı. Other examples from Sanskrit are rtáya-nt- 'behaving in due form and order' from r-tá-m 'order, rite', artháya-tē allows oneself to be persuaded' from in-tha-m 'goal, business'; pālúya-ti 'watches, protects' from pa-lá-s 'guardian' is used in Sanskrit as causal

¹⁾ plipagor seems to be a transformate of ylipagor, which comes from another root, on the analogy of \$26πω.

of $p\acute{a}$ - $t\imath$, and $gh\ddot{a}taya$ - $t\imath$ 'causes to be killed, kills' (nor. a- $\gamma \bar{\nu}ghata$ -t) from $gh\ddot{a}$ -ta-s 'blow, killing' as causal of $h\acute{a}n$ - $t\imath$.

It may be mentioned that when a root-final k-sound is not changed to c before -aya-, this proves the form to be denominative, for we have seen in vol. I § 445 p 331 that a k-sound must become c before $-e_io$ - in procthnic Aryan, as it does in $r\bar{v}c\dot{a}ya$ -ti We know therefore that $mry\dot{a}ya$ - $t\bar{e}$ 'sets on the trail of a quarry' is derived from $mry\dot{a}$ -s 'wild animal, game', $tark\dot{a}ya$ -ti 'conjectures' from tarka-s 'guess', and so with others

§ 799. In Sanskrit, the present in -áya-ti served as the foundation for a desiderative formation in -ayıša-ti, as lu-lōbhayıša-ti from lōbháya-ti.

The passive is formed with $-y\acute{a}-t\bar{c}$, -aya- being dropt, e. g $bh\bar{a}j$ - $y\acute{a}$ - $t\bar{c}$ from $bh\bar{a}jaya$ -ti. How this passive originated is not at all clear. It may be supposed that it had no special connexion properly with the $\acute{e}\underline{c}o$ -present, any more than had the aorist of Class IV (§ 548 p 105)

§ 800. Armenian There are no clear traces of this $\ell \mu o$ -group, which appears to have been absorbed into the class of verbs ending with -em For instance, lizem 'I lick' may answer equally well to Skr $l\bar{c}h\dot{a}ya$ -ti or to $({\rm fr} \lambda \epsilon i \chi \omega)$. Compare § 774° p. 293, on gorcem etc

§ 801 Greek. Here this έχο-class ran into one group with the denominative present in -e-ξό, such as φιλέω from φίλο-c Hence arose φορήσω ἐφόρησα etc., following φιλήσω ἐφίλησα (§ 773 p 290) Hence again, in the present itself, Lesb. ποθήω like ἀδικήει (§ 775 p. 293), and φόρημι like φίλημι (§ 589 p 131)

I arrange the forms about to be cited according as they had one or other of the two original functions of this class (§ 791 p. 324).

Causal (or Factitive). τορέω, (Γ)οχέω, φοβέω, σοβέω, see § 794 pp. 326 ff.

Intensive (or Iterative). φορέω, σοέω (ἐσσοημένον Hesych.), ποτέομαι, see ibid ολέω 'I hold fast, hold out, hold for *σοχεω

beside exa. Skr. ut-sahayu-ti helps some one to endure, strengthens, gives heart'. ποθέω 'I desire' beside θέσσεσθαι Avest, jaidye-iti \(ahedk-\) (\(\frac{706}{9}, 234 \): O Ir. no guidiu 'I pray' first for *godu στροφέω 'I turn round and round' beside στοέφω τροπέω 'I turn, twist' beside τρέπω. 'I swallow' beside Lith sreb-iù \squares srebh-: Lat sorbe\(\overline{o}\) seems to be an égo-form with weak grade of root, like jubeo Skr grbháya--ti, and others (§ 790 p. 323). βρομέω 'I hum, buzz' beside σνοπέω 'I watch, look at, ponder' beside σχέπτομαι. βρέμω. So perhaps ôg/énuar 'I hop, spring, jump, tremble, quake' beside ερχομαν 'I go', in that case the word will be akin to Skr. rghāyá--ti 'quakes, throbs' & Few 'I push' cp Skr vadhaya-ti 'strikes down' Avest. vāđāye-iti 'knocks back'; ωθέω will be equivalent to Skr badhaya-ti 'subdues', if in this word b is for v- (cp. p 225 footnote 1).

However, another possibility must not be forgotten. to wit, that before the time in question some few denominative causals, of the type of Skr. mantraya-ti (§ 793 p. 326, § 798 pp 334 f.) may have been formed.

-t ω is not uncommon after present formative suffixes (cp. § 792 p. 325). So far as one can see, the new verb meant much the same as the old unextended verb.

ελλέω 'I press' beside εἴλω for †fελ-νω (§ 611 p. 150). Ion. inser. conj βουλέωνται beside βούλομαι 'I wish' for βολ-νο-(§ 611 p. 150) πιτ-νέω 'I fall' beside πίτ-νω, whose preterite επιτνον became agrist by contrast with πιτνέω (see Curtius, Verb² 1 268, ii 12); ι in the root syllable instead of ε (\sqrt{pet} -)

as in $\imath i \rho - \nu \eta - \mu \iota$ etc., § 602 p. 144. $\delta \alpha \mu \nu \epsilon i \cdot \delta \alpha \mu \dot{\alpha} \zeta \epsilon \iota$ (Hesych.) beside $\delta \dot{\alpha} \mu - \nu \eta - \mu \iota$. $i \varkappa \nu \dot{\epsilon} o \mu \alpha \iota$ 'I arrive' beside Hom. $i \varkappa \dot{\alpha} \nu \iota \omega$ for * $i \nu - \alpha \nu F \omega$ § 652 p. 187. $o i \chi - \nu \dot{\epsilon} \omega$ 'I go, go away, I am off'. C'ret $\dot{\alpha} \gamma - \nu \iota' \omega$ 'I lead, bring'.

ολιγο-δοανέω 'I am famt, weak' beside δο-αίνω (§ 621 p. 159) like Skr. iš-an-aya-nta beside iš-an-yá-ti (§ 796 p. 332)

With Skr pr-nv-aya-ti § 796 p. 332 may be compared the following. $\dot{\alpha}_{i}$ \bar{i} \bar{i}

πεκτέω beside πέκτω 'I comb', § 680 p 212

γηθέω beside γήθομαι 'I am glad' seems to fall here along with Lat gaudeō for *gāvideō, § 694 p 223 μινυθέω (Hippocr) beside μινύ-θω 'minuo'

μεζέω (Hippoer.) beside μεζω 'I suck' χρηέομαι (Chalc. χρηείσθω Boeot. χρειτῖσθη) and Gort ληίω (for *ληέω) beside χρησμαι 'λήω perhaps like Skr pyāy-áya-ti beside pyá-ya-tē 'swells', see § 737 p. 263

These forms in -εω are also found in association with present stems which have no special characteristic, as λλκέω beside έλεω 'I pull'.

Now comes the question — are all these forms with -εω to be brought into close connexion with the Idg. -έμō, and did they originally have an Intensive or Frequentative meaning? We saw in § 578 p 119, § 756.4 p. 275, that from the very earliest period non-present forms with an ē-suffix occur side by side with present forms which have no ē-suffix; as μελήσει Βευμμπαη, Elements IV

ξμέλησε μεμέληνε beside μέλει, τυπτήσω beside τύπτω. It is therefore possible, that at first the only forms used were, say, έλεω ξλεήσω, πέντω πεντησω, and that it was only their ē-forms which brought these stems in contact with the εω-class, and produced ξλεέω πεντέω

§ 802 Italic On the Latin present inflexion see § 788 pp. 318 f The part pass ends sometimes in -i-tus, see § 789 p. 319.

We have already mentioned moneo, torreo, mordeo, tongeo, noceo, luceo, foveo and jubeo joubeo, see § 794 pp. 326 ff.

Besides these there are but few words which can with any certainty be called éjō-formations—spondeō, beside (fr. σπένδω I pour a libation offer it', mid. I make a solemn compact' doceō, beside discō for *di-ti-scō (\$ 678 p 210), perhaps from the same root as decet, and identical with (fr doréω (cp Fick, Wtb I 4 66, 452)—roveō, although there are doubts as to its origin (cp I \$ 428 c p 316. Fick, Wtb I 408. Osthoff, Morph Unt. v 82)—tondeō, beside Gr révòω 'I bite' for *reu-òω (\$ 695 p 224)—haereō (toth us-gáisja 'I frighten' properly 'I make stiff, or congeal'. Umbrian has tursitu tus etu 'terreto' tursiandu 'terreantur' from a pres *torséiō, beside Lat terreō (tr επεφσεν ἐφόβησεν (He-ych), all from \$\square\$ ter-s-, see \$ 657 p 192

The root syllable has a weak grade in Lat qu- $e\bar{o}$, identical with Skr $\dot{s}\iota$ - $\dot{a}ya$ - $t\iota$, $\epsilon\iota$ - $e\bar{o}$, see § 790 p 323 sorbe \bar{o} beside Gr $\dot{\phi}$ o $q\dot{\epsilon}\omega$, see § 801 p 336, \jmath ube \bar{o} , parallel stem joube \bar{o} once found, see § 794 p 329

We should also add, it seems, the following. misceō, see § 792 p 325; augeō, ep Lith. ángu 'l grow', suādeō 'l make a thing acceptable to some one'. ep. (ir ήδομαι § 690 p 221.

Remark It is haidly possible to prove that the co-formation became denominative in Latin as it did in Germanic and Balto-Slavonic, dēnseō 'I make thick' beside dēnsu-s is certainly not to be explained like Goth. /ulljan beside full-s, and other such, tempting though it be to draw this parallel. See § 777 Rem. p. 301.

§ 803. Keltic Only a few examples which are anything like certain

We have already cited the following: O.Ir. for-tugim 'I cover over' O.H G. decch(i)u 'I cover', \$\sqrt{teg-}\$ \\$ 791 p 325; ad-suidim 'I prolong. postpone' Goth satja 'I place', \$\sqrt{sed-}\$ \\$ 794 p 328, no rāidiu 'I speak, say' Goth rōdja (same meaning), ibid, no guidiu 'I pray' Gr. ποθέω 'I desire, crave for', \$\sqrt{ghedh-}\$, \$801 p. 337 Further examples do-luigim 'I let off, forgive' perhaps connected with legaim 'I fail, perish, go to pieces' (Thurneysen, Rev Celt vi 316). luadim im-luadim 'I set in motion' beside do-lod 'I went' no-m-māidim 'I boast, exult' beside miad 'pride, honour' guirim gorim 'I heat, warm' from \$\sqrt{gher-}\$.

§ 804 Germanic On the confusion of this type with other present classes see § 781 2 p. 306. The present inflexion in Gothic may be regarded as regularly growing out of the original one (I § 142 p. 125 f.), but in O.H.G. such forms as $2^{\text{nd}} \text{ sing}$ denis $(1^{\text{st}} \text{ sing} \text{ denis}(i)u = \text{Goth. panja})$ beins $(1^{\text{st}} \text{ sing} \text{ denis}(i)u = \text{Goth. hafja})$, Class XXVI. The partic pass in pr Germanic ended in -idá-, as Goth. fravoradips stem -vardida-, nasips stem nasida- O.H.G. gi-nerit, see § 789 p. 319

The class was productive, from proethnic Germanic onwards, in the Causal or Factitive use, where the primary verb has some simple meaning. Only a few examples, as O.H.G decch(i)u 'I hide', still keep the Idg. Intensive or Frequentative meaning (§ 791 p. 324), but this meaning very early became so weak, that soon no difference was felt between the original verb and the secondary verb in -ézo-, for which reason the former was generally dropt altogether out of use.

Goth varja ().H.G weru 'I hinder, guard': Skr vāráya-ti, see § 795 p 330 O.H.G zeru ().Sax teru 'I destroy, tear to pieces': Skr. dāraya-ti 'makes burst, splits'. Goth. valja () H.G. well(i)u 'I choose' Skr. pra-vāraya-ti, see § 794 p. 327.

Goth. uf-panju 'I stretch out' O.H († denn(i)u 'I stretch'. Skr. ā-tānaya-tr, see § 794 p 327. ().H G. wenn(i)u O Icel ven (inf venju) I accustom' Skr. sa-vānaya-ti 'makes inclined, accustoms to', V yen- 'to like' O H (i flouw(i)u 'I rinse' (2nd sing flewis, cp. Braune () II († Gr 2 pp. 84, 253) Skr. plāvaya-ti 'floods, pours over', Serv plovi-ti 'to make flooded', V pleu- 'flow, swim' (foth fra-vardja 'I bring to nought, destroy, disfigure', O.H.G. wert(i)u '1 destroy'. Skr vartaya-ti etc., see § 794 p. 327 Goth marzja 'I hurt, vex', O.H G merr(i)u 'I hold back, hinder, disturb, mislead' (orig 'cause any one to make an oversight'). Skr maršaya-ti 'looks after, carries off, lets alone' (mfšya-ti 'forgets, neglects, bears patiently'), \(\square mer s - \) 'forget, take no notice of' O II.(† derr(i)u 'I make dry, wither up'. Skr taršáya-ti etc., see § 79+ p. 327 Goth. ga-tarhja 'I mark out, blame'. Skr daršáya-tı 'shows', V derĥ- 'see' Goth. uf-rak)a 'I reach up', () II (i recch(i)u 'I reach, stretch out' from $\sqrt{re\hat{q}}$ - (Gr σρέγω). Ο Η († (h)rett(i)u 'I tear away. rescue': Skr. śrāthaya-tı, see § 794 p 327 Goth. Þrayja 'I run', beside Gr. τοέχω 'I run' (fut Βοέξομαι) from $\sqrt{threkh^{-1}}$ O.H G. blecch(i)u 'I make visible, show' Skr bhrājaya-ti, see § 794 p 327 Goth lag/a O.H (4. legg(s)u 'I lay'. O.C.Sl. loži-ti, see § 794 p 327 Goth. pagkja O.II.G. dench'i)u 'I ponder, think' Lat tongeo, see § 794 p 328; the irregular pret. Pāhtu dāhtu partic *Pāht-s gi-dāht (variant gi-denhit) for an becoming \bar{a} see I § 214 p 181 — alose on the analogy of the corresponding preterite of hugkia dunch(i)u (Goth. huhta etc.), which verb we have placed in Class XXVI (§ 722 p. 252), it is true pagkja may also be placed in this class, as it may come from *172g-10, which would have a grade of root shown apparently in Osc tangin-om 'sententiam' (not so Baitholomae, Bezz Beitr avii 123) () II.(† blent(i)u 'I darken, blind'. O C.Sl. bladi-ti 'to go astray', orig transitive like

¹⁾ We must believe that the root is thickh-, not threigh- (I § 553 p. 406), because of O.Icel. $\vec{p}_i \vec{x} ll$ for * $\vec{p}_i \vec{a}_{\chi^{-i}la^{-}}$ Then the Gothic verb, like $f_i a_{-i} ard_j a$ and marzja, shows in its root-final the regular voiced consonant

Mod Sloven. bluditi 'to lead astray, deceive' (Miklosich, Vgl. Gr. 11 437), V bhlendh-, cp. p. 327 footnote (1), Goth, us--láubja O.II G. ir-loub(i)u 'I allow' Skr. lōbháya-ti etc., see § 794 p. 328 Goth káusja 'l taste, try' Skr. jōšáya-tē, see § 794 p. 328. Goth ráuma OHG rouf(i)u 1 pick, pluck, tear out' Skr. ropaya-ti 'makes a tear, breaks off', Vreupreub- (I § 343 p 270, § 469 7 p 345). Goth dráusja 'I make fall, throw', OH.(+. tror(i)u 'I make trickle, shed', beside Goth driusa 'I fall' O II G int-swebb(i)u 'I lull to sleep'. Skr svāpáyati, see § 794 p 328 (toth ga-vagya O.H.G. wegg(i)u 'I move' Skr vāhaya-ti etc., see § 794 p. 328. Goth us-vakja 'I wake up', () H (f. wecch(i)u 'I wake'. Ski. vajáya-ti 'excites, drives on', vueg- O.H.G. weiz(i)u weiz(i)u 'I give to know, show' Skr vēdaya-ti, see § 794 p 328, O H. (+ berz(1)u berz(1)u 'I cause to bite, corrode, bait'. Skr. bhëdaya-ti, see § 794 p. 328; originally ueiz(i)u ueizis etc., beiz(i)u beizis etc., whence by levelling in both directions weiz(1)u weizis and weiz(i)u weizis, beiz(i)u beizis and beiz(i)u herzis etc (cp. floz(i)u floz(i)u § 805). (toth láisju () II.G. lēr(i)u 'I teach', V leis- 'learn' Goth satja OHG sezz(2)u 'I set, place' Skr. sādáya-tı, sec § 794 p 328 () II (t. heng(i)u 'I cause to hang, hang' beside O.H.G hahu 'I hang' for *hawhu (hiang qi-hangan) Goth ut-hlohja I make some one laugh', O Icel inf hlogia, beside Goth. hlahja 'I laugh' (pret. hloh) O.H.G. fuog(1)u O Sax fogiu 'I make fit, join, tie up': Skr pāśáya-ti, see § 794 p. 329. O.H.G gruoz(i)u gruoz(i)u O Sax. grotiu 'I address, speak to Skr. hrādaya-ti, see § 794 р 329.

§ 805. Where the égo-verb, and the primary verb from which it was formed, had come to have a different articulation in the final consonant of the root, through the action of Verner's Law (1 §§ 529 f p. 384 f. § 581 p. 434), the final of the ézo-verb was very often in Gothic levelled back to match that of the other. Of the examples cited in § 804, the following show this change: Goth, -turhia instead of *-targia following a lost *tairha, háusia mstead of *káuzja following kiusa, dráusja instead of *dráuzja = O.H.G $tr\bar{o}r(i)u$ following drusa, $l\acute{a}sja$ instead of * $l\acute{a}nzja$ = O.H.G. $l\bar{e}r(i)u$ following $l\acute{a}is$ 'knows', $-hl\bar{o}hja$ instead of * $-hl\bar{o}gja$ = O.Icel $hl\bar{o}ge$ following hlahja

The following *éjo*-forms arose from present stems with some characteristic suffix (see § 792 p. 325).

O.H.G hlein(i)u 'I cause to lean' trans of hli-nē-m O.Sax. hli-nō-n, Class XII, § 605 p 146

OHG scen(i)u 'I make visible, show' beside scīnu; swein(i)u 'I make disappear, diminish' beside swī-nu 'I disappear', bi-swell(i)u 'I make swell, dam up' beside swillu, scell(i)u 'I cause to sound, dash in pieces' beside scillu Class XIII, § 614 pp 151 f

Goth sagq/a O II G sench(i)u 'I make sink, push under' beside sigqa, O.Sax thengiu 'I complete' beside $th\overline{\imath}hu$ 'I thrive' for pr. Germ. * $\overline{p}en\chi\overline{o}$, O H G. meng(i)u O.Sax mengiu 'I mingle, mix' beside a pr Germ * $ming\overline{o}$, O H.G spreng(i)u 'I make burst, I burst' beside springu Class XVI § 628 pp 164 ff, § 634 pp. 170 ff With these were associated eio-formations made from presents with a t-suffix and a nasal infix Goth. vandya O.H.G went(i)u 'I turn' from $vinda \sqrt{vei}$, O H G swent(i)u 'I make disappear, I annihilate' from swintu beside $sw\overline{\imath}-nu$, see § 634 p 172, § 685 p 216

Goth. kannja 'I make know, inform', O.II G. ir-chenn(i)u 'I make know, understand', beside hann hun-nu-m, Class XVII § 646 p. 183

Goth. ur-runnya 'I make arise' O.H.G. renn(i)u 'I make run, or make run quickly', beside Goth runna, Goth yu-brannja 'I cause to be burnt up, I burn up', O.H.G. brenn(i)u 'I make burn, I burn' beside brinna. Class XVIII, § 654 pp 187 f

(toth. qa-vasja OHG. weriu 'I clothe' (Goth -vasja instead of *-vazja, see p. 342) Skr. vāsáya-ti, from y-es- (Class XIX) V ey-, see § 794 p. 329.

O.H.G. $fr\bar{o}r(i)u$ 'I make freeze' beside friu-su, Class XX § 664 p. 197.

OHG. *ir-lesk(i)u* Teause to be quenched, I quench' beside *ir-lisku*, Class XXII, § 676 p. 208

Goth. $r\bar{o}dja$ 'I speak, say' beside $-r\bar{e}-da$ Skr. $r\bar{a}dhaya-ti$ etc., see § 794 p 329. OHG. $fl\bar{o}z(i)u$ $fl\bar{o}z(i)u$ Mid.HG vlætze vlæze 'I make flow, cause to swim off, to float (trans.)' (cp weiz(i)u weiz(i)u § 804 p 341) beside flui-zu. Glass XXV § 699 p 225

§ 806. Denominative ℓ_{l0} -verbs (see § 793 p 326) are common. We have already given some examples found both in Germanic and in Balto-Slavonic (loc ϵit), to wit, Goth ℓull_{l0} (0.11 G ℓull_{l0}) 1 fill from ℓull_{l0} full's and Goth ℓuul_{l0} (11.G ℓull_{l0}) 1 fill from ℓull_{l0} whole, healthy. Other examples are Goth ℓuul_{l0} (1 H G ℓull_{l0}) 1 G ℓull_{l0} 1 make high, raise aloft from ℓull_{l0} (distinguish this from O.II G ℓull_{l0}), see § 804 p 340), Goth ℓull_{l0} 1 make high; from ℓull_{l0} 1 make strong, strengthen from ℓull_{l0} 1 make fast, forthy from ℓull_{l0} 1 make ℓull_{l0} 1 make fast.

If Germanic did not inherit égo-denominatives from pre-Germanic times, we have to turn for an explanation of their existence in this branch to those instances, where, connected with an old primary causal, there is some adjective having the same grade of root-syllable, as Goth gram/a OHG gremm(i)u to provoke, make angry' OHG gram Oleel gram-r'angry, provoked', Goth hnáwja 'I lower, degrade' OHG (h)neig(i)u 'I bend, incline, sink' tractioth. hnáw-s'low, humble', OHG gu-fuog(i)u 'I make to fit, I join' ga-fuogi fitting, suiting'. Once these verbs came to be regarded as derived from the adjectives in question, it is easy enough at once to explain new forms like fullja

§ 807 Bulto-Slavonic. The original present system, -e₁ō -e₂esi and so forth, is still represented by the Lith v-e_jù () ('Sl v-ija r-ija 'I wind, turn, twist', as we have already seen in § 788 p :19. How the place of this series was usurped by Lith. -au -ai . , O.C.Sl. -ja -iši . . has been explained in § 789 pp. 321 f.

This type was very fertile in Balto-Slavonic, and we meet with both the original meanings, — the Causal, and the Intensive or Frequentative (§ 791 p 324).

We may mention as further examples Lith vartau vartý-ti O.C.Sl vraštą vrati-ti, OCSl volją voli-ti, poją popi-ti, ložą loži-ti, mašta mati-ti, ljublja ljubi-ti, voža vozi-ti, davlja davi-ti, Lith isz-manaŭ -maný-ti § 794 pp 326 ff., Serv. plovi-m plovi-ti, OCSI blažda bladi-ti § 804 pp. 339 f. Others are OCSI morją mori-ti 'to kill' (causal) Skr. mūráya-ti 'makes die, kills', vomer- Lith. daraŭ darý-ti 'to make' beside deriù 'I bargain hire, am of use' (cp Leskien, Der Ablaut der Wurzels im Lit, 99), 1 dei- Lith. ganañ ganý-ti 'to tend (cattle), to pasture' OCSI gonja goni-ti 'to drive' (freq), V ghen- 'strike' Lith. ramaŭ ramý-ti 'to soften, calm' (causal) Skr rāmaya-ti brings to a standstill', V rem-Lith žargaũ-s žargý-ti-s 'to stretch the legs apart' (freq) beside žergiù 'I stretch my legs Lith praszaŭ praszý-ti 'I ask, pray', OCSI moša prosi-ti 'to ask, pray', / preĥ-Lith. láužau láužy-ti 'to break' trans (freq) beside láuszti 'to break' trans OCSl. bužda budi-ti 'to wake' (causal) Ski bodháya-ti 'causes to awakes, wakes, makes aware', V bheudh-Lith snaigo snaigý-ti 'to snow' (freq) beside snik-ti 'to snow', V sneigh- Lith szvaitañ szraitý-ti () ('Sl sieštą světi-ti 'to make clear, light up' (causal), V kueyt- () (Sl běžda bědi-ti 'to compel' (foth bindja I compel', 1/ bheidh- Lith. maiszaŭ maiszý-ti O C.Sl měša měsi-ti 'to mix', i mejk-; the verb mav just as well be derived from *mozkézō, *mozk-s-ézō (Skr mēkšaya--te cp Classes XIX and XX, §§ 656 ff pp. 190 ff.), or *moil- $-s\hat{k}-\dot{\epsilon}\underline{\iota}\bar{o}$ (cp. Lat. misceo, see § 792 p 325). Lith, sakaũ saký- $t\iota$ 'to say', ().C Sl. sočą soči-ti 'to point out' O H.G. segg(i)u 'I say', V seq- (Gr. ένι-σπε Lat. īn-sece) Lith kusaū kasý-ti 'to scratch' (freq), V ges- (O.C.Sl. česu-ti) O.C.Sl. toplia topi-ti 'to warm, beat' (causal). Skr. tapáya-ti 'warms', V tep-. O C.SI točą toči-ti 'to make run, make flow, pour' (causal): Avest. tācaye-iti 'makes flow', V teq-.

§ 808. New formation from Primary presents, in which a present root-extension of the éxo-form has been handed down (§ 792 pp 325 f.)

Class XVI §§ 635 ff, pp 172 ff — Lith rāžau rāžy-ti to reach' (freq.) beside isz-si-rēszti 'to reach out, extend, resist', V reg- (Gr δοέγω). Lith grándau grándy-ti 'to shave, scrape' (freq.) beside gréndu grésti 'to iub, scoui', doubtless connected with () Icel krota 'to dig in, dig down' () H († chrazzōn 'to scratch'. () C SI lača lači-ti 'to separate' beside leka 'to bend', V leq-. O C SI lazata krati-ti 'to turn, twist' (freq) beside kre(t)-na 'deflecto', V qert-. O.C SI izŭ-sača -sači-ti 'to make exhausted, dry up' Pol. w-saczy-ć 'to make trickle in' (causal) beside () C SI seh-na 'I dry up', V seig- () C SI traša ti asi-ti 'to shatter (freq) beside tresa 'I shatter', perhaps derived from tr-es- (Class XX, § 636 p 174, § 657 p 192)

Class XX, §§ 657 ff, pp 191 ff — Lath tāṣaŭ tāṣý-ti 'I pull or tear about' (freq) beside tē-s-iù, vren- (§ 794 p 329) Compare too the above mentioned () ('Sl trasi-ti.

Class XXII, §§ 670 ff, pp 202 ff — Lith diaskaŭ draský-ti 'to teai about' (freq.) beside dreshiù '1 tear' driskaŭ '1 am torn' Compare § 807 p 344, on Lith maiszý-ti OCSI. městi

Class XXV, §§ 688 ff pp 218 ff — () (Sl ražda radi-ti 'to consider, care for': Skr rādhaya-ti etc., stem *iē-dh- (\$ 794 p. 329). Lith. valilaŭ valilý-ti 'to rule', beside reldu 'I rule', stem nel-dh-; skardan skardy-ti 'to shred, cut about' (causal) beside skérdžiu 'I burst', stem sger-dh-, girdau 'I give to drink' (causal) beside geriù 'I drink', stem ger-dh-, púdau 'I cause to rot' (causal) beside vāv-ù 'I rot', stem pā-dhspráudy-ti (freq.) beside spráudžiu 'I push forcibly into an interstice', stein spreu-d-, száudau száudy-ti (freg) beside With -dh- or -d-, uncertain száu-14 'I shoot', stem skeu-dwhich · maldaŭ maldý-ti 'to beg' (freq.) beside mel-džiù 'I beg', skáldau skáldy-ti 'to split (freq.) beside skelii (*skel-iù) 'I split', both trans. (skél-du and skél-džiu 'I split' intrans.). Starting from verbs of this kind, the ending -dau -dy-ti became independent, like -dinu -din-ti, and was the type for others · spán-dau 'I kick'

(freq) beside spir-iù, gý-dau 'I heal' (causal) beside gy-jù 'I get well' (cp Leskien, Der Ablaut der Wurzels im Lit, 182 ff)

Lastly, we may mention once again O C.Sl. življą živi-ti 'to make alive' (causal), beside ži-vą 'l live', see § 794 p. 329.

§ 809 Denominative verbs in Lith -y-ti O C Sl. -i-ti (see § 793 p. 326) are common Examples found in both Germanic and Slavonic are O C Sl plămi-ti 'to fill' and celi-ti 'to heal', mentioned above (loc vit).

Lith. denominatives such as justau justy-ti, a class which is mixed up with the ā-denominatives, have been cited already § 782 4 p 310. Some more Slavonic exx may be mentioned prailing pravi-ti 'to make right, direct' beside pravū 'right', oštrją ostri-ti 'to pomt, sharpen' beside ostrū 'pointed, sharp', divlją divi-ti se 'to wonder' beside divo 'wonder', dělją děli-ti 'to divide' beside dělū 'part', darja dari-ti 'to present' beside darū 'a present', měnją měri-ti 'to measure' beside měra 'measure', kramolją 'I disturb, confuse' beside kramola 'disquiet, noise, uproar'. It must also be mentioned that the Idg denominatives from i-stems, ending in -i-jō, have run into this Class see § 782.5 p 311.

THE s-AORISTS 1)

§ 810. We saw in § 485 p 38 f, and § 655 p 190, that thematic and non-thematic s-Proterites belonged to our Present

associated closely with these, such as Skr. á-yā-s-iš-am Gr. $\delta \varepsilon i \xi_{\varepsilon i} \alpha \nu$ for $\delta \varepsilon i \nu$ - $\sigma - \varepsilon (\sigma)$ -ia ν Lat $d \bar{\tau} c$ -s-i s-t i s. Another subdivision includes the forms with -s-s-, as (r-s-i s-i s-

A STEMS IN -S- AND -SO-

I Non-Thematic s-stems

 \S 811 Roots of the e-series appear in three vowel grades; and the original Idg. division of these grades was as follows

The Indic. Act Sing had the \(\bar{e}\)-grade as O.C.SI v\(\bar{e}\)s-\(\bar{u}^1\) Skr. \(\delta\)-v\(\bar{e}\)k\(\bar{s}\)-am from \(\sigma\) ue\(\bar{g}\)h\(-\). whether \(\bar{e}\) in Lat. \(\bar{v}\)\(\bar{e}\)x\(-\)i\(-\)i\(\bar{e}\) and the whole of the Indic Middle, had the weak root as Skr \(\delta\)-vit-s-i (ir. \(\bar{i}\)\sigma\-ar\ from \(\sigma\)' ue\(\bar{i}\)d\(-\). The Conjunctive had the e-grade. as Skr. \(\bar{p}\)\(\delta\)k\(\bar{s}\)-a-t (ir \(\bar{n}\)\(\delta\)\(\bar{e}\)\(\bar{e}\)-in from \(\sigma\) peq-, Avest \(\var{e}\)\(\bar{s}\)-a-t\(\bar{e}\) \(\frac{G}{\ar}\)-in from \(\sigma\) peq-, Avest \(\var{e}\)\(\bar{s}\)-a-t\(\bar{e}\) \(\frac{G}{\ar}\)-in from \(\sigma\) men-. With this ablaut compare Skr. indic \(\sta\)\(\delta\)\(\delta\)-i-t\(\delta\) (\(\bar{s}\)\(494\) p 55)

The Conjunctive stem of this s-aorist is identical with the Indicative stem of the XXth Present (lass, e. g Skr. tqsa-t(i)) and indic $tqsa-ti = (toth \ \textit{finsa}\$, Lat (fut) $d\bar{\imath}x\bar{\imath}$ and indic pret. $d\bar{\imath}xi-t$ $d\bar{\imath}xi-mus$, so too the conj Skr $\acute{a}y-a-t$ and indic. $\acute{a}y-a-t\bar{e} = \text{Lat. } e\bar{\imath}$ (§ 489 p. 47, § 493 pp. 51 f.)

§ 812. Pr ldg Skr kšar- (fr ηθερ- 'cause to run off, make disappear' (cp Kretschiner, Kuhn's Zeitschr. xxxi 431) ά-kšārš-am 2nd and 3rd sing ά-kšār, (fr. έφθειρα (εφθερσα Lycophron) / der- 'split, flay'. Skr conj dárš-a-t(i), (fr έθειρα. √ bher- 'carry' Ski á-bhārš-am, (fr. εφερσεν' ἐνύησεν

Vuey- 'speak' Avest conj. vaxš-a-b V ped- 'go': mid. ú-puts-i. | bhag-'enjoy' Skr á-bhākš-am 2nd and 3rd sing. á-bhāk mid. á-bhukš-i conj. bhakš-a-t(i), Avest. 3rd sing mid. baxš-ta. / dhē- 'place' and dē- 'give' Skr. á-dhās-am á-dhiš-i á-diṣ-ı dās-a-t(ı), Avest. 2nd sıng opt. mıd dāh-ī-ša Lat. con-derem etc., see § 812 p. 350 $\sqrt{k\bar{o}}$ - 'sharpen, cut'.

Avest 2^{nd} pl. $s\bar{a}z-d\bar{u}m$ Skr. $h\bar{a}$ - 'go, yield' ($j\acute{a}$ - $h\bar{a}$ -tr ja-hi-mas): \acute{a} - $h\bar{a}s$ -am 3^{rd} sing. \acute{a} - $h\bar{a}s$ 1^{tt} pl. \acute{a} - $h\bar{a}s$ -ma

§ 815. There are many deviations in Sanskrit and Avestic 1) from the original distribution of these three vowel grades, as set forth in § 811.

The weak stem (as Skr. ta-s- from 1/ten-) is hardly found outside its original sphere, but no longer in the plural and dual indic. act, only in the Indic Middle and the Optative: e. g Skr. á-dhiš-i dhiš-īya á-gas-mahi mas-īya, Avest. a-mēh-maidī diš-yā-þ Irregular Skr. 2nd sing conj. mid. dfkš-a-sē instead of *drakš-a-sē.

In Sanskrit the \bar{a} -grade (as $t\bar{q}$ -s-) spread from the Sing. indic. act to the Plural and Dual, e. g áchāntsur ájāišma ábhāršţām following the sing. áchāntsam etc., cp. ádhāma instead of *á-dh-ma following á-dhā-m (§ 495 p. 55), spar-tam instead of spr-tam (§ 499 p. 62), and the like But beyond this line Sanskrit has very few other examples of \bar{a} ; one is mid á-yās-i. In the Gatha dialect \bar{a} is quite restricted to its original sphere But in later Avestic it has crept into $n\bar{a}$ - \bar{a} -ma, if this be the optative to an indic *nā \bar{a} -em (O C.Sl. $n\bar{e}$ s- \bar{u}), cp. Bartholomae, Stud idg. Spr, II 166

The a-grade (as Skr ta-s-) spread from the Conjunctive, where it is still the usual form in Sanskrit and Avestic, through the whole Indicative and Optative moods, and in particular it occurs with the weak stem, e g indic 3rd sing Skr. á-mas-ta Avest. mas-tā opt. Skr mas-ī-máhi (variant, Avest Gath. a-mēh-maidī Skr. mas-īya) following the conj. Skr más-a-tē, Skr. 1st pl. jēš-mu (beside á-jāiš-ma), Avest Gath 2nd pl. praoš-tā, 3rd pl. vēngh-en, within the orig sphere of the ā-grade, Skr á-ras-am á-yōkš-am.

§ 816. In Sanskrit, the 2^{nd} and 3^{rd} sing. indic. act. became identical by regular change $(\acute{a}\jmath \bar{a}\imath\dot{s}=^*a-\jmath \bar{a}\imath\dot{s}-\dot{s}$ and $^*a-\jmath \bar{a}\imath\dot{s}-t)$, and if a consonant preceded the acrist sign, the acrist sign was dropt as well as the personal ending $(\acute{a}r\bar{a}\imath k=^*a-r\bar{a}\imath k\dot{s}-\dot{s}$ and

¹⁾ Here we have to disregard Old Persian, from lack of material Brugmann, Elements IV 23

*a-rāikš-t), and sometimes this was done even to the root-final $(\acute{a}-ch\ddot{a}n)={}^*a-ch\ddot{a}nts-s$ and ${}^1a-ch\ddot{a}nts-t)$. The inconvenience thus caused served to root the forms with $-s-\bar{\imath}-\dot{s}-s-\bar{\imath}-t$ firmly in later Vedic, and these are the only ones used in classical Sanskrit (except $bh\bar{a}i\dot{s}$ in the phrase $m\bar{a}$ $bh\bar{a}i\dot{s}$ 'fear not'), e. g $\acute{a}-j\bar{a}i\dot{s}-\bar{\imath}-\dot{s}-\bar{\imath}-t$. These endings were borrowed from the $si\dot{s}$ -aorist (§ 839) For instance, $\acute{a}y\bar{a}s\bar{\imath}-\dot{s}$ $\acute{a}y\bar{a}s\bar{\imath}-t$ belonged originally to the series $\acute{a}y\bar{a}s\dot{\imath}-am$ $\acute{a}y\bar{a}s\dot{\imath}-am$ etc., next displaced 2^{nd} and 3^{rd} sing $\acute{a}y\bar{a}s$ (which belonged to the 1^{st} sing $\acute{a}y\bar{a}s-am$), and the relation between $\acute{a}y\bar{a}s\bar{\imath}-\dot{s}-t$ and $\acute{a}y\bar{a}s-am$ produced $\acute{a}j\bar{a}i\dot{s}-\dot{s}-t$ beside $\acute{a}jh\bar{a}r\dot{s}-am$, and so forth

A few times the 2^{nd} sing in $-\bar{a}i\dot{s}$ (for $-\bar{a}i\dot{s}-\dot{s}$) produced a 3^{rd} sing in $-\bar{a}i-t$, as ánāit by complementary analogy from ánāis ($n\bar{i}$ - 'to lead') 1). As this formation touched only roots with an i-vowel, it may be that the type was set by preterites like áj- $\bar{a}i-t$ beside áj- $\bar{a}i-\dot{s}$ from aj- 'agere' (§ 572 p 114)

The Sanskrit grammars class under the s-aorist some forms of the 2nd and 3rd sing which more properly belong to our Present Class I; such are á-kythās and á-kyta, which by their structure belong not to á-kyš-i á-kyš-mahi but to á-kr-i á-kr-ata. The reason of this confusion was that in a certain number of consonantal roots the 2nd and 3rd sing, of both these series had become indistinguishable, e.g. áchitthās áchitta in the systems of á-chid-i (á-chēd-i) and á-chits-i both (cp. 2nd pl. áchāntta for *a-chānts-ta, 1 § 557 3 p 413). Compare also the 2nd pl ámugdhram from muc- 'to let go', which may belong equally well to the aorist stem muc- (precative muc-īšţa) or to the aorist stem mukš- (3rd pl. mukš-ata)

§ 817. s-aorists from Roots with characteristic, or from Present Stems.

Forms with the suffixes $-\bar{a}$ -, $-\bar{e}$ - $-\bar{o}$ - have been cited in

¹⁾ Analogous termations outside the s-aerist are collected by Joh Schmidt in Kuhn's Zeitschr XXVI 408 Compare further 1st sing achinam (Maha-Bh) beside 3rd sing a-chinat = *a-chinat-t from chid- 'to out off'

§ 813 p 351; add to those Skr \acute{a} -yās-am conj. yās-a-t(i) from y-ā- 'to go', \acute{a} -dhyās-am from dhy-ā- to think'.

With the suffix $-\bar{\iota}$ - $\bar{a}i$ - (§ 498 pp. 61 f.); Skr. \acute{a} -grabh- $\bar{\iota}$ - $-\check{s}$ -am \acute{a} -grah- $\bar{a}i$ - \check{s} -am beside \acute{a} -grabh- $\bar{\iota}$ -t \acute{a} -grh- $\bar{\iota}$ -tām from grabh- 'to seize' (§ 574 p. 116)

Skr. á-yurðkš-mahr from yuj-, see § 813 p. 351. Skr. á-stamps-am beside stambha-tē 'fortifies or strenghthens itself', V stebh-, see § 629 p. 166

3rd sing *a-hū-nau-š* 'he made' *a-durš-nau-š* O.Pers 'he durst' come from nu- presents (§ 640 p 178) And doubtless 3rd sing -ais he went 3rd pl. -aisa arose m Persian itself in association with the present stem ag-(imperf. -ay-am), and is therefore not an orig. s-aorist as might be supposed from Skr. 3rd sing. mid. adhy-āišta (gramm.). The origin of these new forms lies perhaps in certain pairs of imperfect forms; 2nd sing *ais 3rd sing. *ai, 2nd sing *ai anaus 3rd sing *ahūnau running parallel to 2nd sing *abara 3rd sing. abara, 2nd sing *adadā 3rd sing adadā, and the like If there were connected agrist forms such as 2nd and 3rd sing. *a-nāiš = Skr ú-nāiš, the above 2nd sing. in -š might easily be looked upon as an s-preterite, which its use for both 2nd and 3rd sing. After that, -āiš would be complemented by suggested. 3rd pl -aiša.

§ 818. Armenian So far no s-preterites have been found ('ompare the remarks on the c-aorist, § 672 p 204.

§ 819. Greek First, a few examples shall be added to those given in §§ 812 and 813. Hom. ἔ-λερσ-α Att. ἐ-λειφ-α from κείρω '1 shave' fut λερῶ. Hom. ἕ-λελσ-α from κέλλω 'I move, drive' ἔ-στειλ-α (έστελσεν in Hesych.) from στέλλω 'I order, arrange'. έ-πηλ-α for *ἐ-παλσ-α mid πάλτο from πάλλω '1 shake, brandish'. On the relation of Lesb έφθερρα Att. ἔφθειρα Dor. έφθηρα to Hom. ένερσα, and of Lesb. ἔστειλα Att. έστειλα Dor. έστηλα to Hom. ἔνεισα, and such like, see I § 563 3 p. 419, Wackernagel, Kuhn's Zeitschr xxix 127 ff., the Author, (ἐr. Gr.² p. 63 έμεινα Lesb. ἔμεννα Dor. έμηνα for *ἐ-μενσ-α from μένω 'I remain'. So ἔντεινα from ντείνω

'I kill', evelua from reals 'I divide' e-revo-a from ri'(f)-w 'I swim' Skr. mid. ά-snōš-ţa (giamm). ε-πνευσ-α from $\pi r \dot{\epsilon}(F)$ - ω 'I blow, breathe'. $\epsilon - \pi \epsilon \rho \sigma - \alpha$ from $\pi \dot{\epsilon} \rho \vartheta \omega$ 'I sack, destroy' έ-τοεψ-α from τοέπω 'I turn' Lat. torsī for *torcs-ī from torqu-eō &-youn-a from youn-m 'I write', V gerphέ-ψοασ-α from φούζω 'I give to understand, show' for *φοαδ-χω: Lith. 1st and 2nd pl. injunct. (fut) girs-me -te from girstù 'I apprehend', V gherd-. βοάξαι συλλαβείν (Hesych) beside aor. Boazeir. Skr á-mrākš-ī-t á-mārkš-ī-t from mršá-ti 'touches, grasps' (§ 527 p 90) ε-σπεισ-α Cret έ-σπενσ-α from σπένδω 'I offer, pour' ε-πεισ-α from πείθω 'I persuade', V bheidh-; επεισι instead of *εμεισα like Skr. á-dukša-t instead of á-dhukša-t, which is also found (§ 659 p. 195) έ-γεισ-α from γείω 'I give to taste', V ĝeus- είσ-a from εύω 'I burn'. Lat ussī from $\bar{u}r-\bar{o}$, V eys-. $\dot{\epsilon}$ -y\(\delta}vv\) -\(\alpha\) from $\gamma \lambda \dot{v}' \phi w$ 'I incise, engrave'. $\ddot{\epsilon}$ -ζεσ-σα εζεσα from $\zeta \epsilon(\sigma)$ -ω 'I boil, bubble' $\theta \dot{\epsilon}$ σσαντο for *9 sto- from Féoglo9al 'to beseech', V ghedh- (§ 706 p. 234). ε-δεξ-άμην δέκτο for *δενσ-το from δέχημαι 'I receive'. ε-λαι σ-α from κλαίω 'I weep' for */λαξ-μω ησ-άμην ασ-μενο-ς from ηθομαι 'I rejoice' Lat. suās-ī from suād-eō έ-πηξ-α πῆντο for *πηνσ-το from πίχνιμι 'I fix' V pāk- pāg- ε-δησ-α from δί-δη-μα 'I bind', \/ dē-

The Conjunctive in Homer and elsewhere still shows the thematic vowel, as riino-μεν, instead of which we have later τείσω-μεν (§§ 914, 923) We have already seen (§ 747 p. 269)

that the indic. fut. in $-\sigma\omega$ was in all probability partly the conjunctive of the s-aorist, compare further in § 833

The optative in $-\sigma\alpha\mu$ is a re-formation on the analogy of the optative in $-\sigma\mu$, see § 944 On forms like $\partial \mu \in \mathcal{E}_{\mu}$, see § 836.

The Participle Active shows in all its cases -σαντ-; see II § 126 pp. 399 f, and IV § 1099.6.

In forms like $\sigma r \eta \omega \approx \delta \eta \omega \approx \xi \mu r \eta \sigma \omega \approx \xi \tau t \mu \eta \sigma \omega \approx \xi \mu i \sigma \theta \omega \sigma \omega$ (§§ 819, 822), σ seems to have been due to the analogy of consonantal stems, as $\varepsilon r \varepsilon \rho \nu \omega \approx \varepsilon r \dot{\eta} \rho \tau \xi \omega$ (ep. I § 564 p. 420), just as $\sigma r \dot{\eta} \sigma \omega = \tau \tau \dot{\eta} \sigma \omega = \tau$

Remark El. $\dot{\epsilon}noi\eta a$ has not kept unaltered the Idg sounds. It is far more likely that a disappeared in Elean itself, in the same way the change of a to h in Lac. $\dot{\epsilon}risa\dot{\epsilon}$ and Argive $\dot{\epsilon}noif-\dot{\eta}\dot{\epsilon}$ belonged to these dialects separately

The question might be asked whether the σ of $\vec{\epsilon}_{\mu\nu\eta\sigma\alpha}$ $\vec{\epsilon}_{\mu\nu\eta\sigma\alpha}$ may not have returned to them unweakened at some time when the forms $*\vec{\epsilon}_{-\mu\nu\sigma\sigma}(-c)$ $*\vec{\epsilon}_{-\mu\nu\sigma\sigma}(-c)$ $*\vec{\epsilon}_{-\mu\nu\sigma\sigma}(-c)$ $*\vec{\epsilon}_{-\mu\nu\sigma\sigma}(-c)$ $*\vec{\epsilon}_{-\mu\nu\sigma\sigma}(-c)$ $*\vec{\epsilon}_{-\mu\nu\sigma\sigma}(-c)$ existed, just as $\vec{\epsilon}_{\sigma\sigma}$ (beside Boeot. $\pi\alpha_{\ell}$ — $\vec{\epsilon}_{\sigma\sigma}$) got back its σ by analogy of $\vec{\epsilon}_{\sigma\sigma}$ $\vec{\epsilon}_{\sigma\sigma}$ $\vec{\epsilon}_{\sigma\sigma}$ I put the counter question, why we have $\vec{\epsilon}_{\sigma\sigma}$, not $\vec{\epsilon}_{\sigma\sigma}$ It cannot be made probable that this es-formation was found in the singular only — if so, the state of things would differ widely from the s-additional contents.

§ 821. The pr ldg. differences in root-gradation (§ 811 p. 348) were largely levelled out in Greek.

Often the vocalism of the whole acrist was decided by the Present, and we saw in § 748 p. 270, that where this

dependence upon the present stem is seen, the σ-future always goes along with the acrist Compare έγραψα έγλυψα ιδμορξα έστιξα έσχισα έπηλα (for *ἐπαλσα) with γράφω γλύφω ομόργνῦμι στίζω σχίζω πάλλω, but ἔτερψα ἔδειρα (for *ἐδερσα) ἐστειξα ἔφθειρα (ἔφθερσα) ἔστειλα (ἔστελσα) beside τέρπω δέρω στείχω φθείρω στέλλω. Thus there is no ground for believing that, say, ἐσχισάμην inherited from the parent language its grade σχισ-(cp. Skr. áchitsi), or that the conj. δείρω inherited *δερσ-(cp. Skr. dárš-a-t).

The vocalism is independent of the present in exerca beside τίνω, or ἔδειξα beside Cret -δίννῖτι (Att δείννῦσι), amongst other The ε of these forms was carried right through the aorist system However, it need not come exclusively from the Conjunctive; n may have been shortened to s in the indic. έδειξα έτεισα, and in ελευξα επλευσα έχερσα etc., by the rule laid down in vol I § 611 p 461 In this case Exerga would be equivalent to Skr áyāukšam This shortening cannot have taken place in the 1st sing Eusiva Evequa for pr. Gr. * $\dot{\epsilon}$ - $\mu \epsilon r \sigma$ - α * $\dot{\epsilon}$ - $r \epsilon \mu \sigma$ - α , as is proved by Lesb $\mu \tilde{\eta} r r$ - σc Att. μην-ός (see loc cit) But it may have come about in the 2^{nd} and 3^{rd} sing , at a time when these took the forms "i-unvo(-5) and ε-μηνσ(-τ), etc On this view, the old vowel gradation must have been kept, or undergone nothing but regular change, in the conj act. and mid. deigo deigouau and in the sing. indic. act ἐδειξα; while there has been analogical influence in the plural and dual indic act., and in the whole of the indic. middle, εδείξαμεν etc, εδειξάμην etc.

Survivals of the original weak grade are ἴσαν, ησαν for *ή Γισαν 1) beside ἐεισάμην, Hom. ἔστασαν beside ἔστησα, ἄσμενο-ς beside ήσάμην ήσασθαι (Lat. suāsī).

¹⁾ On $\iota \sigma a \sigma \iota$ Dor 1^{at} sing. $\iota \sigma a \mu \iota$ etc., which are due to the analogy of $\iota \sigma a \nu$, see § 863

- § 822 Many σ -aorists come from roots with characteristic, or from present stems of different kinds (usually these have a similar σ -future associated with them).
- (2) With a Nasal Suffix. ἔνλῖνα, ἔφηνα for ἔ-νλινσ-α, *έ-φανσ-α, from κλίνω 'I bind' for κλι-ν-μω, φαίνω 'I cause to appear' for *φα-ν-μω εξηνω for *έ-ξανσ-α from ξαίνω 'I seratch, comb' for ⁴ξ-αν-μω. ἔφηνα from ύφ-αίνω 'I weave' (on the σ of πρῶνα see the Author, (ir (ir ² 58 p 71, Solmsen, Kuhn's Zeitschr xxix 66 f). For these presents in -ν-μω and -αν-μω see under Class XXIX § 743 pp 265 f. The aorists were formed on the analogy of ἔντεινα from ντείνω, ἔπηλα from πάλλω, and so forth (§ 611 p 150). The futures of these are κλινῶ ψυνῶ ἔψανῶ, § 757 p. 276 f.

Remark $\alpha \ddot{\nu}\eta \nu \alpha$ for $f(z)-\alpha \alpha \nu \sigma -\alpha \nu -\alpha \alpha$ should be compared with the Lith 1st and 2nd pl injunct (fut) $s\alpha \ddot{\nu}s-\ddot{\nu}-s-me$ -te. But these forms are not equivalent For $*s\alpha \dot{\nu}s-\dot{\nu}-s-$, which may be the ground-form of the Lith. aorist stem, would become $\alpha \ddot{\nu}-\alpha \sigma-1$ in Greek. The Greek aorist was built upon the present, at a time when $-\eta-\dot{\nu}$ had become $-\alpha r-\dot{\nu}$ (- $\alpha r \omega$)

- (3) With Nasal in the root (ep § 813 p 351 f) επλαγξα from πλάζω 'I strike, beat' for *πλαγγ-μω Class XXIX Lat. plānx-ī ἐνλαγξα (fut κλάγξω) from κλάζω 'I make a sound, cry' for *κλαγγ-μω Class XXIX and beside κλαγγ-ώνω Class XIV. ἔσφιγξα (fut. σφίγξω) from σφίγγω 'I bind, tie' Class XVI See § 621 p 158, § 628 p. 166, § 631 p 167, § 744 p 266.
- (4) Later group of Denominatives Following έττεινα ετείνω, έπηλα πάλλω, έστειλα στέλλω, επληξα πλήσσω, εσφαζω σφάζω were formed ἀνόμηνα from ἀνομαίνω 'l name', ἐτεττηνάμην from εκτταίνομαι 'l carpenter' (ἐσήμανα beside ἐσήμηνα like ὑμανα, see above), ἤγγειλα from ἀγγέλλω 'l announce', ἐνήςτξα from

κηρύσσω 'I proclaim', ἥρπαξα from ἀρπάζω 'I seize', ἐσάλπιγξα from σαλπίζω 'I sound the trumpet' (for *σαλπιγγ-μω), ἐτέλεσσα Att. ἐτέλεσα from τελέω -ω 'I finish' (for *τελεσ-μω). The futures are ὀνομανῶ τεντανοῦμαι ἀγγελῶ like ντενῶ etc., but νηρύξω ἀρπάξω σαλπίγξω τελέσσω like πλήξω etc. Compare § 756.3 p. 275.

Many analogical changes took place in the aorist forms from presents in $-\zeta \omega$, because these represent both $-\delta - \mu \omega$ and $-\gamma - \mu \omega$; e. g. $\eta \varrho \pi \alpha \sigma \omega$ instead of $\eta \varrho \pi \alpha \xi \alpha$ following $i \delta i r \alpha \sigma \omega$ ($\delta i r \alpha \xi \omega$), and $i \delta i r \alpha \delta \omega$ instead of $i \delta \delta i r \alpha \sigma \omega$ following $\eta \varrho \pi \alpha \xi \omega$. The ending $-\xi \alpha$ became very common for δ -verbs in Doric and the N.-W. Greek dialects. The σ -future followed suit.

- (5) σ-aorists from stems having the suffixes -ā-, -ē- or ō go back to the pre-Greek period. To those cited in § 813 p. 351, add the following ξμνησα. Dor ξμνᾶσα from mn-ā- ν men- 'think, mean', ξβησα Dor. 'βᾶσα from g-ā- 'to go' (§ 497 Rem p. 57), ἐζησα εζωσα from gi-ē- gi-ō- ν gei- 'live', ἔχοησα from χο-η- 'to give an oracle'. Amongst dissyllable aorist stems with these suffixes, those in -η-σ- take a prominent place, as ἐμέλησε from μέλει 'it is a care', ἐθέλησα from θέλω 'I wish', ἐθέησα Hom Acol. ἐδεύησα from δέω Hom. Acol δεύω 'I lack, need', with which were associated forms made from present stems with some characteristic, as ναθιζήσας from τω 'I place' for *si-zd-ō, ἐνύπτησα from νύπ-νω 'I strike', ἐχαίφησα from χαίρω 'I rejoice' for *χαρ-ιω, ως ησα from ὅζω 'I smell' for *όθ-ιω. With these go similar futures, as μνήσω βήσομαι μελήσει, see § 750.1 p. 271, § 756.1 p. 275
- (6) Along with the forms mentioned under (5) go the aorists of later denominatives, as ἐττμασα lon ἐτταησα, ἐφίλησα, ἐμίσθωσα, ἐδάκουσα, ἐλόντσα See § 756 5 p 276, § 773 p. 290, § 813 p. 351
 - § 823. Italic. Three Italic categories fall here
- (1) Forms of the perf. indic. ending in -s-ī (to the building up of which a great many things have gone, see § 367). We have already mentioned dēmpsī prompsī serpsī

torsī mulsī vīsī dīxī ussī vēxī cōxī -rēxī -lēxī plēxī suāsī jousī jussī, jūnxī ē-mūnxī plānxī; §§ 812, 813 Other examples are manst from maned tempst from temno. mixt (mtx1?) and mīnxī from mingō / meigh- 'to stale' (ir ώμιξα (ī ²), Lith. 1st and 2nd pl. injunct (fut) misz-me -te scripsi from scribo. dī-vīsī from dī-vidō frīvī from frīgō ep. Skr á-bhrāhš-am á-bhārkš-am (gramm.) from bhrjjú-ti (cp § 524 p. 87). from dūcō. clepsī from clepō Gr ελεψα from λέπ-τω 'I steal'. pēxī from pec-tō. Gr ἐπεξάμην from πεκ-τέω 'I comb' con-spēxī from -spicio. ges-sī from gero for *geso from augeo. Lith, 1st and 2nd pl injunct (fut) auks-me -te from áugu 'I increase' haesī for *haes-sī from haereō internal nasal (cp jūnxī etc., above) O Lat *nīmxī-t* from ningui-t V sneigh- 'snow' cp Gr. ένειψε (ἔντψε) from distinguo. cp. Gr socisa from oriza I prick, pierce'. sānxī from sanciō beside sacei.

In the paradigm of $d\bar{\imath} \bar{\imath} \bar{\imath}$ there is not one form which can be held with any safety to be regularly derived from one of the unthematic forms of the pr Idg s-aorist. We cannot connect the 1st sing with Skr mid k_{I} - \bar{s} - \bar{e} beside \dot{a} - k_{I} - \bar{s} - \dot{i} (§ 6.56 p. 191), because of its past meaning. It is as impossible to prove that -imus in $d\bar{\imath}x$ -imus represents a proethnic *-mimos, as it is to prove that -imus in \bar{e} - \bar{e}

I would suggest that before the s-aoust had been drawn into any close connexion with perfect forms like tu-tud-i and with aousts like fid-i-t, some thematic forms had intermingled themselves amongst the non-thematic forms of the s-aoust, just as happened in other branches of Indo-Germanic (§ 833). I regard as thematic aoust forms, originally with secondary personal ending, dixi-t and dixi-mus (cp. Skr. á-dikša-t

d-dikṣā-ma, Gr. \(\varepsilon\)-\(\varepsilon\)-t fidi-mus, then between pret visi-t visi-mus and present visi-t visi-mus there was the same relation as between pret. srandi-t and pres. scandi-t (the preterite forms originally had a secondary personal suffix). If aorists of this kind came to have the same syntactical value as perfect forms such as totondit totondimus, then dix-\(\varepsilon\) fid-\(\varepsilon\) might be made on the model of totond-\(\varepsilon\). To this group were attracted v\(\varepsilon\)distis v\(\varepsilon\)distis, which really belong to the is-aorist (possibly v\(\varepsilon\)derunt also, see \(\varepsilon\) 1023), and on the model of them sprang up d\(\varepsilon\)rists d\(\varepsilon\)xiti d\(\varepsilon\)verunt (\(\varepsilon\) 841)

§ 824. (2) The Conjunctive with -e- -o-, and the Optative with $-\tau$ -.

Lat $d\bar{\imath}x\bar{o}$ $d\bar{\imath}xim$ (ir $\delta\epsilon l\dot{\xi}m$. axim cp (ir $\bar{a}\xi\epsilon\bar{\imath}\epsilon$ § 833. empsim, $in-\epsilon\bar{e}nsim$, $caps\bar{o}$ $\epsilon apsim$, ob-jexim, $fax\bar{o}$ faxitur faxim, $oc-c\bar{\imath}sim$, ausim Conj $d\bar{\imath}x\bar{o}$ beside indic. pres. $v\bar{\imath}s\bar{o}$ indic. pret. $d\bar{\imath}xi-t$ $d\bar{\imath}xi-mus$, like Skr conj. $t\acute{a}sa-t(i)$ beside indic pres. $t\acute{a}sa-ti$ pret $(\acute{a}-)tqsa-t$, see § 833

The Umbr.-Osc. s-future is also a similar conjunctive (on the disappearance of the conj. vowel, see I § 633 p. 474, § 655.5 p 503 and the remarks on the ending -e-d of the 3rd sing perf in § 867 7 below) Umbr fust fust Osc. fust 'ent' Umbr. 3rd pl. furent cp. (fr. équoa etc., § 812 p 350. Umbr. pru-pehast 'ante piabit'. Osc deivast 'urabit', censazet 'censebunt' ('oinpare the future with -es-, Umbr. ferest Osc pert-emest § 837 The ending of the 3rd pl Umbr. -ent() stands for *-onti, see § 1022 at the end

(3) Conjunctive with -ē- (§ 926 b) Osc. fusid 'foret', cp § 812 p. 350 Lat essem, cp. (fr fut. έσσομω. Lat ferrem vellem essem con-derem (√ dhē-) darem stārem, see § 812 pp. 348 f. With the root-suffixes -ā-, -ē- in-trūrem hārem hārem nārem arārem juvārem, -plērem nērem flērem vidērem tacērem, then denominatives as plantārem claudērem fīnīrem. See § 813 p. 351 Pelign. upsaseter 'operarentur' or 'operarentur'.

Compare the forms with -es- Lat. agerem viverem, Osc. patensins for *patenesēnt § 837.

This ē-conjunctive from the s- and es-aorist was very closely connected in Latin with the Infinitive in -se for *-s-i (loc sing.); e. g esse ferre in-trāre -plēre plantāre claudēre fīnīre. The same sort of thing occurs in Aryan and Greek; as Skr. inf μ-š-ē beside indic. ά-jāiš-am (mid. *ά-μιξ-ι), inf. τῆμ-άs-ē beside indic. τῆμ-αs-ē part. τῆμαs-āná-s, Avest. inf. ā nāš-ē ('to make away with') beside nāš-ī-ma (§ 815), Gr. δεῖξαι μνῆσαι τῖμῆσαι rονῖσαι beside ἐδειξα etc. The infinitives belong to nominal s-stems (II § 132 pp. 414, 416, 418, § 162 pp 489 f), and are a proof of the etymological sameness of the s-suffix in the verb and in the noun, see § 655 p. 189, § 834.

§ 825. As regards the relation of the vocalism in the root-syllable of the Italic s-forms to that of the parent language (§ 811 p. 348), all is obscure

The vocalism has been influenced by non-aorist forms in many words, e. g mulsī beside mulgeō mulctum, torsī beside torqueō tortum, compared with tersī beside tergeō (tergō) tersum. Sometimes the aorist goes along with the to-participle, and is different from the present, ussī ustu-s, but ūrō; dī-vīsī dī-vīsu-s, but -vidō, howbeit, mīsī is different from missu-s

Whether \bar{e} in $-l\bar{e}x\bar{\imath}$ $t\bar{e}x\bar{\imath}$ $v\bar{e}x\bar{\imath}$ $r\bar{e}x\bar{\imath}$ in the Idg. \bar{e} of O.C.Sl. těchři Skr. ádhākšam, is doubtful in the extreme. It appears to have been imported from forms like $l\bar{e}g-\bar{\imath}$ beside partic. $l\bar{e}c-tu-s$, and suchlike. $cox\bar{\imath}$ (for *quex $\bar{\imath}$) like Gr. $i\pi s\psi \alpha$, cp. partic. coctu-s (for *quectu-s).

As regards forms like $serps\bar{\iota}\ d\bar{\imath}x\bar{\iota}$ (for $de\bar{\imath}x$ -) it must be remembered that \bar{e} may have been shortened to e as set forth in vol. I \S 612 p. 462, serps- for $*s\bar{e}rps$ - and so on.

§ 826 Keltie In Irish the only indic, forms we have are the 2nd and 3rd sing, but without augment, and therefore really injunctive. The 2nd sing is only used as a conjunctive (or hortative), the 3rd sing, both as conj. and future. Examples: 2nd sing. comēir 'raise thyself' for *cóm-ecs-recs-s beside

con-ērqim 'I raise myself' Gr. ωρεξα. 2nd sing. tair 'veni' for *tó-air-incs-s, 3rd sing. tair 'venit' for *-incs-t, co-tī 'donec veniat' for *-t(o) incs-t beside -icim cp Skr. pret mid. άkš-i beside pres. άkša-tē from aś-nó-ti 'reaches' (§ 659 p. 194). for-tē 'subveniat, iuvet' for *-steics-t beside tiagum 'I step, go' (for-tiagum 'I come to the help'), \sqrt{steigh} . Gr ĕ-στείς-α; perhaps by contamination of -tē with the conjunctive tēis (see below) arose -tēi, which is used as equivalent to -tē do-n-fē 'let him lead us' for *-vets-t') beside fedim 'I bring, lead': Lith vèsme etc, see § 812 p. 350

In all persons the Conjunctive is used with conj. meaning, and more rarely as a future. Examples: — from tragim: sing 1st pres -tias 2nd -tēis 3rd (abs.) tēis tēs, pl 1st -tiasam 2nd -tēsid 3rd -tiasat. On account of the relation between absolute and conjunct inflexion in the present, arose the new forms sing 1st tiasu 2nd tēisi, pl 1st tēisme 2nd tēsit. Other instances no tes 'effugiam' from techim 'I flee'. O C.Sl. tēch-tē from tehā 'I run, flee' at-resat 'surgent' from at-reig 'raises itself', cp. comēir above, co n-dārbais 'ut demonstres' from du-ad-bat 'demonstrat' (pass -badar) ma fris-tōssam 'si abiuraverimus' from tongaim 'iuro'

Again, the so-called t-preterite comes in here, as far as it was derived from the 3rd sing mid of the s-aorist in *-s-to, say do-bert 'he brought' for *-ber-s-to, celt 'celavit' for 'cel-s-to, ro-anacht 'he protected' for *anek-s-to. See § 506 p. 72 f

§ 827. Germanic A survival of the s-aorist is conjectured in O.H.G scri-r-un 'they cried' opt. scri-r-i (part. pret. gi-scriran) beside pret. sing. srei 'he cried' pres. inf. scrian 'to cry', -r- = pr Germ -z-, see I § 581 p. 434. Later on, this r- formation got into the verb spinoan 'to spew', the participle being changed from ge-spinoen to ge-spiron (but, vice versa, O.H.G. 3rd pl. er-scriwun follows spinoun). See

¹⁾ The long vowel in -/ē is not due to Compensatory Lengthening, but to the fact that monosyllables bearing the chief accent, and ending in a vowel, were all lengthened in Irish (III § 440.2 p 373).

Joh. Schmidt, Kuhn's Zeitschr. xxv 599 f.; Kluge, Paul's Grundr. 1 375. But this view of *scrirum* is very questionable; see G. Holz, Urgerm geschloss. ē, pp 47 f.; and Zarncke in P.-B Beitr. XV 350 ff.

A few s-aorist forms have perhaps contributed to the system of the weak preterite, as Goth. vissa O.H.G. wissa 'he knew', whose plurals wissum wissum may be compared with Gr. lour. Compare § 907

§ 828. Balto-Slavonic

In Lithuanian, we find the 1st and 2nd plural and the 1st and 2nd dual injunctive used with future meaning have run into one paradigm with the future in -sm (§ 761 p 278), and in certain dialects appear side by side with the future in -sime -site and -siva -sita As the Lith future could be used hortatively in the 1st and 2nd persons, there is the less reason for surprise at this commixture of the injunctive with the future in -sio- In addition, the 3rd sing in -s appears to belong to our s-aorist, at least partly. If, for example, we assume that -s comes from -st, it is easy to understand the vowel shortening in bûs (1st sing búsiu) rls (1st sing. rýsiu) gaus (1st sing. gausiu) and the like, of which more is said in I § 664.3 p. 523. Then we may compare the use of the future in general statements as kas voks neprulops the thief never grows rich' with the similar use of the injunctive in Greek (§ 909. 1). And further, this view of the 3rd singular is favoured by the Prussian forms, used exclusively as conjunctive, bousar (bouser bouse) 'be he, be they', and the like, which cannot be separated from Lith. su-gausai beside su-gaus etc., whose -ai moreover is the same affix as we see in tasai beside tas 'the, that' (§ 999) This would be making *būs for *bū-s-t proethnic Baltic.

O ('SI s-aorist forms of this group are the 2nd and 3rd sing, plur, and dual; as sing 10 10, pl 10ste 10s0, dual 10sta 10ste, but the 1st persons are thematic (10sũ 10somi 10somi); see § 833.

Of s-forms preserved in both branches we have mentioned in § 812 qis-me -te from genù 'I hunt, drive' O C.Sl po-že from

žin-ją 'I cut, harvest', Lith ins-me from imù 'I take' O.C.Sl. jes-ŭ from ma 'I take', Lith. pláus-me from pláu-ju 'I rinse' () C'Sl pluch-ŭ from plov-q 'I swim, sail', Lith pa--busme from pa-bundu 'I awake' ().C.Sl. bljusu from bljuda 'I guard, protect, take care', Lith. vèsz-me from vežù 'I drive' (trans.) ().CSl. vės-ŭ from vezą 'I drive' (trans.), Lith vès-me from vedù 'I lead' ().C.Sl. věs-ŭ from ved-a 'I lead', Lith dèks-me from deg-ù 'I burn' (trans. and ıntr) OCSI žachŭ from žey-ų 'I burn' (trans.), Lith. és-me from éd-mi éd-u 'I eat' () ('Sl jas-ŭ from jami 'esse', Lith, dés-me from de-d-ù 'I lav' () ('Sl dèch-ŭ from dè-ja 'I lay'. Lith, spës-me from spé-pu 'I have leisure' O.C.Sl. spěch-ŭ from spě-ją 'I get on, have success', Lith. dů's-me from då'du 'I give' OCSl. dach-ŭ from dami 'I give', Lith stós-me from stó-ju 'I tread' () C.Sl stach-ŭ from sta-na 'I place myself', Lith bús-me trom bú-ti 'to be' O.C.Sl. bych-ŭ from by-ti 'to be', Lith gýs-me from gy-jù 'I revive, get well' O.C Sl žich-ŭ from ži-va 'I live'. Forms with -ā-, -ē-, and denominative forms in § 813 Lith pa-vyděsme from pa-výd-žiu 'invideo' O.C.SI viděchů from viždą 'I see', Lith. lankós-me from lanko-zu 'I try to make soft or malleable' O.C Sl. lakach-ŭ from laka-1a 'I cheat, deceive'

§ 829. Lithuanian Besides the examples given in § 828 others were given in §§ 812 and 813, as milsz-me from mélž-u 'I milk', sés-me from séd-u 'I place myself, sit', žiós-me from žió-ju 'I open my mouth', gůděs-me-s from gůdě-jů-s 'I am greedy', jůků's-me from jůků'-ju 'I play, sport'

The vocalisation of the root in the forms under § 812 is always that of the sio-future There is no trace left of the Idg vowel gradation (§ 811 p 348)

From present stems with internal Nasal: jùnhs-me from jùng-iu 'I put in the yoke', shús-me from shùnd-žiu 'I lament' (cp § 761 p 278), to be compared with Skr. á-ywokš-mahi Lat. jūnx-ī From presents in -inu -enu. saŭsīs-me from saŭs-inu 'I make dry', gabés-me from gabe-nù 'I push something

forward, help it on (cp. § 761 p. 278), to be compared with Gr. ατηνα for *(ε)σαυσ-αν-σα (§ 822. 2 p. 359), and again with O.C.Sl vrīgnach-ŭ, granting the correctness of the hypothesis offered in § 615 Rem p. 154.

§ 830. Slavonic Some examples were given in § 828, and more in §§ 812 and 813, as po-sluchă from -slu-ja 'I hear', orach-ă from or-ja 'I plough', răděch-ă from răžda 'rubeo', cělěch-ă from cělě-ja 'I get well' On the aorist in -nach-ă, as vrīclinachă from vrīg-na 'I throw', see § 615 p 154 and § 829.

The general question of the s-aorist inflexion has been discussed in § 829 p 366. In the 2^{nd} and 3^{rd} sing. -s-s and -s-t dropt entirely by rule, which gave forms like p the look of a preterite of our 1^{st} Present Class, those like 2na or a $r\ddot{a}d\ddot{c}$ the look of preterites of Present Class X, and denominatives like laka the look of preterites without -lapha0 such as Gr. Lesb. lapha1 (for *-lapha1) Probably, however, some of these forms really are what they look like, for instance lapha2 eras, erat may come from Idg *lapha4lapha5-s -lapha6 and lapha6 thou gavest, he gave may also come from Idg *lapha6lapha5-s -lapha6.

With roots in a consonant, the 2nd and 3rd sing, are found only when this root-final was a masal, r, or l; as $j \in (j \in N)$, žrė and žrī (žrėchũ for *žerchũ and žrīchũ from žīr-q 'I devour, offer'), kla (klachũ foi *kolchũ from kol-jq 'I slay'), otherwise the thematic agrist without s was used, as 2^{nd} and 3^{rd} sing, teče beside těchũ těchomũ etc. The reason is that these roots were the only ones which according to the laws of Slavonic did not drop their final consonant

The 2nd and 3rd sing often add -tŭ, the ending of the 3rd sing. pres., as pri-jetŭ instead of -je, bitŭ instead of bi (bija 'I strike'), u-mrětŭ instead of -mrě (u-mĭra 'I die'); dastŭ instead of da following dastŭ 'dat' This addition came up first in the 3rd sing aorist, and then went on to the 2nd sing. because the two persons had the same form Compare imper. jažďi both 2nd and 3rd sing. § 949, and again Skr. 2nd and 3rd dual cakr-áthur -átur § 1038.

§ 831. From what was said in § 811 p. 348 on the Idg. gradation of the root syllable, it follows that \$\bar{e}\$ is original in such forms as vėsũ nėsũ těchũ rěchũ (reka 'I say'), and the \$\bar{a} = Idg. \$\bar{o}\$ in basũ (boda 'I pierce', cp Lat. fodiō fōdā); the long vowel was originally confined to the singular Since a long vowel before \$2, \$\bar{u}\$, liquid, or Nasal + Consonant was shortened, as laid down in vol \$1 \ \ \ \ \ 615 \ \ \ p. 465, the same vowelgrade may be assumed for foims like bich-ũ (*bhēz-s-), cisũ (cǐta 'I count, reckon, honoui' cp Skr. cāits-), po-sluchũ (Skr. srāuš-), mrěch-ũ tor *merch-ũ (mǐra 'I die', *mēr-s-), vrěs-ũ for *vers-ũ (vrĩz-a 'I tie', cp. Lith 1st and 2nd pl. injunct. versz-me -te from verž-iù 'I tie', \$\square\$ uer\bar{gh}-), męs-ũ (mẹta 'I stir up').

Where the root syllable has a weak grade, this is always seen in the infinitive stem as well, so that we are not justified in assuming that it comes from the Idg weak form of the plural and dual active. E g žrich-ŭ (also žrěch-ŭ) beside žri-ti (also žrě-ti), klach-ŭ for *kolch-ŭ beside kla-ti for *kol-ti from q\vec{q}\vec{l}- like Lith. káls-me -te (§ 726 p 256), krych-ŭ beside kry-ti 'to cover' as contrasted with Lith. kráus-me kráu-ti

§ 832. Roots ending in a consonant also make aorists with the ending -ochū in () ('Sl, e. g beside nesū. sing. nesochū, pl nesochomū nesoste nesoše, dual nesochove nesosta nesoste. The W.-Slav. languages have -ech etc instead of S-E.-Slav. -ochū etc. The conjecture as to this inflexion offered in vol. I § 110 p 105, and supported now by Jagić, is untenable (Arch. slav. Phil, x 175, 191) It is far more likely that this is some peculiar Slavonic growth, probably a transformation of the aorist without s (nesū) on the analogy of the s-aorist. The relation of the 2nd and 3rd sing děla to the 2nd pl dělaste 2nd dual -asta 3rd dual -aste first caused the 2nd and 3rd sing. nese to change its foims nesete -eta -ete into neseste -esta -este, as the former were the same as those of the present. Next, nesochomū nesochově may have arisen beside nesomū nesově, and by and by the 1st sing. nesochū completed the group. Then

differences were levelled out, the West-Slavonic in all consistency putting e- in all persons (nesech etc.), while the other branch took -o-, and changed neseste to nesoste etc. A different view is taken by Wiedemann, Beitr. zur altbulg. Conj., 109 f.

II. Thematic s-stems.

§ 633. The forms which fall under this heading belong to our XXth Present Class They have been partly given in §§ 657 ff., and the only reason for reverting to them here is that they are very intimately connected with the non-thematic s-aorist.

(1) Indicative. In Sanskrit, as we saw in § 659 p. 194, the use of the thematic vowel with the s-aorist was conditioned by the form of the Root, as \acute{a} -mykša-t; but non-thematic inflexion is also found, as \acute{a} -dikš-i beside \acute{a} -dikša-t from dis-'to show, point', \acute{a} -drākš-am beside \acute{a} -dykša-t from dyś- to see', \acute{a} -srākš-am \acute{a} -sykš-i from syj- 'to free'. O Pers. my-apišam 'I wrote' seems to be similar to \acute{a} -dikš-a-m, see loc. cit. above. An Avestic thematic form is a-sqsa- \rlap/p from samh- (kens-) 'speak', with strong root

Remark. The Att. *Thenor 'I fell' *Zenor 'cacavi' do not come in here They got their a from the fut neaouna zenovua. See F. Hartmann, De aor sec, 66; Wackernagel, Kuhn's Zeitschr. xxx 313 ff.; the Author, Gr. Gr. 2 p. 169.

Latin Aorists of this sort are forms like $d\bar{\imath}xi$ -t $d\bar{\imath}xi$ -mus, see § 823 p 361. These forms were related to the conj. (fut.) $d\bar{\imath}\iota\bar{o}$ and to the opt $d\bar{\imath}xim$ just as Skr. \acute{a} -bhak $\dot{\imath}a$ -t to conj. $bh\acute{a}k\dot{\imath}a$ -t, and (if $\dot{\imath}$ - $\beta\eta\sigma\varepsilon$ to conj. $\beta\eta\sigma\sigma$ - $\mu\varepsilon\nu$.

Irish. Mid.Ir. serss 'has seated himself, sat' and 'sits' for *setse-t from V sed-, cp. Skr conj. sáts-a-t Gr. indic. εσσ-α. From serss as used for the present upsprang a redupl. pret. siassair 'he sat' for *se-(s)ess- (Thurneysen, Kuhn's Zeitschr. xxxi 99), to be compared with Skr. na-nákš-úr from nák-ša-ti 'reaches' and others (§ 659 p 194)

In O.C.Slav. the 1st persons are thematic, as jest jeso-mu jeso-vė On the ch of dachu trùchu etc., see I \ 588.1 and 2, pp. 442 f.; on the Idg sound-groups ks and qs in něsu (nesa) and rěchu (reka), see ibid., and \ 414 p 303 The s-type spread into the ch-series, and thus we have forms like jachu jachomu instead of jasu jasomu (ground-form *ētso-, \ ed'to eat'), as also in the 3rd pl jaše instead of jase

- (2) Imperative. Aryan and Greek forms come in here Ved. 2nd sing. nēša, cp. conj. nēš-a-t(i) from nī- 'to lead', parša, cp. conj. párš-a-t(i) from par- 'to bring over, transfer', mid. 3rd sing rāsa-tām 3rd pl. rāsa-ntām, cp conj. rās-a-t(1) from rā- 'to give'. Avest. 3rd pl janhe-ntu, cp. conj Gath. jēngha--itī from jam- (gem-) 'to go' (fr Ep. οἶσε οἰσέτω, cp. fut οἴσω 'I will carry, or bring', ὄψεσθε (sing ὄψεο in Hesych), cp. fut. οψομαι 'I shall see', άξετε άξεσθε, cp fut ἄξω 'I will lead'; ἐπι-βήσεο, λέξεο and others These Greek imperative forms were adduced in § 747 p 269 to support the theory that the o-future, at least in part, has grown out of the conjunctive of the s-aorist I admit that the parallel o-conjunctives of Aryan and Greek, with which the imperative forms went very closely, belong to the non-thematic indicative with s But I must remind my readers of the formal identity of the Skr. conj. tás-a-t(1) and the indic ta-sa-ti Goth -binsa. Imperative forms with a genuine personal ending are really Injunctive, and these have been used in the parent language and ever since both for the Indicative and for the Conjunctive (wish, futurity), see § 909 Compare § 854, on the imper perf Skr mumőc-a-ta Gr γεκοάγ-ε-τε
- (3) Participle Skr. dhīša-māṇa-s Avest. dīše-mna-beside Avest 2nd sing indic dāiš from dhī- 'to notice'. Avest.

xšnaoše-mna- beside 3rd pl. injunct. xšnaošen from xšnu- 'to join oneself to, comply with'.

B. stems in -es-, -as-, and -is-.

§ 834. Between -s- and what is usually called the Root there often appears -e-, -o-, or -i-. We have -e-s- in Aryan, Greek, ¹) Italic, perhaps Keltic; -ə-s- in Aryan, Greek, perhaps Keltic; -i-s- in Latin (-ī-s- in Sanskrit). In view of the connexion of verbal forms with -s- and noun-stems with -s- (§ 655 pp 189 f, § 824 p. 363), we may identify Gr. *Fειδες- in εἴιδε-α μίδε-α with *Fειδεσ- in gen. εἴδε-ος, 2nd sing. mid. ε-πελάσ-9ης with adv. πέλας, Skr. mid. ά-rōciš-ta with neut. rōciṣ-, 3rd pl. ά-jāriš-ur with Gr γῆρας, and Lat. vīdis-tis may be compared with cinis Gr. θέμισ- (II § 134 pp 425 f). The same intermediate vowels occur in the s-future: Gr. τενέω τενιᾶ, πελάω πελῶ, Skr rōciṣya-tē, see § 749 ff pp. 271 ff.

Special vowel-grades for the root-syllable, as in the s-aorist (§ 811), cannot be made out for the parent language; and regard being had to the variants -e-s-, -o-s-, -i-s-, which undoubtedly must often have been interchanged by form-transference, we might expect without further argument an intricate ablaut in the root syllable. The commonest grade in historical times is the e-grade (1st Strong Grade), as ueid- in Skr. vēdiš- Gr. εἰδε(σ)- Lat. vūdis-, gem- in Skr. gamiṣ-Umbr.-Osc. benes-; cp. the s-future Skr. hanišya-ti Gr. Θενέω etc.

As regards the tense, or kind of action denoted, we must observe that whilst the s-stems described under (A) are prevailingly aorist, so that we must regard this as fairly representing the proethnic use, these -es- -os- and -is-stems do not have the aoristic use anything like so often in proportion; for instance, Skr. arcas-ē Gr. josa never had it. The verb-

¹⁾ I no longer regard ε in Gr. $\eta^*\delta\varepsilon\alpha$ as representing Idg. 2. See p. 271 footnote 1

suffix -s- therefore, in all its forms, had originally nothing at all to do with tense. This explains the mass of instances in all sorts of languages where s runs light through the verb (cp. the s-verbs, in §§ 656 ff). Hence it happens that even where s does not go through a verb, s-forms often enough have no aorist meaning, as in Gr. $\epsilon l\partial - \epsilon \sigma - (j \partial \epsilon \alpha - \epsilon l \partial \epsilon \omega - \epsilon l$

I. es-stems

§ 835. There are no es-preterites in Aryan. But we may refer once more to the presents cited in § 656 pp. 190 f, Skr. v-ás-te (Gr. ἐπί-εσται) arc-as-ē Avest. rånh-anh-ōi etc.

§ 836. Greek. Πότα εἴδτα 'I knew', served for a preterite to οἶδα 'I know', cp. () Ir. ro-fetar 'I know' with -esor -is- (§ 838), Skr \acute{a} -vēdiš-am with -əs-, Lat. vīdis-tis with -is-, conj Ion.-Att εἰδτω εἰδιῶ (2nd sing εἰδτης εἰδης 3rd pl. εἰδτωτι εἰδιῶτι by transfer to the \bar{e} \bar{o} - conj.)) and (Hom.) iδτω, cp Skr vēdiš-a-t Lat vīder- \bar{o} , opt. εἰδεῖμεν for *fειδ-εσ- \bar{t} -μεν sing εἰδείην, cp Lat vīder- \bar{e} -mus vīder- \bar{e} -m.

Hom. $\tilde{\eta} \epsilon \alpha$ (unless it be properly $\tilde{\eta} \epsilon \alpha$ — see below —, the form in our texts is $\tilde{\eta} \epsilon \alpha$) Att $\tilde{\eta} \epsilon \iota \nu$ 'I went', imperf. and aor. preterite to $\epsilon \tilde{l}_{\mu}\iota$, ground-form * $\bar{e}_{\bar{l}}$ -es- $\eta \iota$, cp Uinbr. conj. (fut.) eest est 'ibit' for 'e½-es-e-e-e(ι), Skr. mid \tilde{d}_{y} - $i\tilde{s}$ - $t\alpha$ (gramm.), Lat us- (i e *e2-is-) in iis-tis ier- \bar{o} ier-i-m. As in pr. Greek ½ dropped between sonants, $\tilde{\eta} \epsilon \iota \nu$ (which should be * $\tilde{\eta} \epsilon \iota \nu$) must have got its iota subscript from $\tilde{\eta} \mu \epsilon \nu$ 'etc. (§ 502 p. 64), and it becomes a question whether the Homeric form should not be read $\tilde{\eta} \epsilon \alpha$. If Hom $\epsilon \tilde{\epsilon} \eta \nu$ is to be recognised for an

¹⁾ On the forms sit of sit of in the text of Homer, see W. Schulze, Kuhn's Zeitschr. XIX 251

optative of $\epsilon l\mu \nu$ (see Curtius, Verb II² p. 99), it is natural to derive it from $*\dot{\epsilon}(k)$ - $\epsilon(\sigma)$ - $k\eta$ - ν .

Remark. G. Mekler's theory (Beitr. zur Bild. des Gr. Verb., 69 ff.), that $ij \delta \epsilon \alpha$ comes from $ij \epsilon \delta \epsilon \delta \epsilon \omega$, an acrist of the verb $\epsilon \delta \delta \epsilon \omega$, is untenable See Wackernagel, Phil. Anzeiger 1887 pp. 240 f.

Furthermore, the future in $-\epsilon\omega$, as rootw $\tau\epsilon\nu\epsilon\omega$, if it be a conj. of the es-aorist and not for $-\epsilon\sigma$ - $\iota\omega$ (§ 747 p. 269). The difference in the use of this future and $\epsilon i\delta\epsilon\omega$ is explained because $\epsilon i\delta\epsilon\omega$ was bound fast to the indic. $\epsilon i\delta\epsilon\omega$.

-es- in Greek has been borrowed by perfect stems, as πεποίθ-εα πεποίθειν beside πέποιθα 'I believe', έστήκειν beside ξοτη/α 'I stand', έτετζμήκειν beside τετίμηνα 'I have honoured' (side by side with the old perf preterites like έπέπιθμεν ξοταμεν γεγάτην), the same with -is- in Latin, as totondis-tis totonder-ō totonder-1-m. I incline to think that this transfer is independent in Greek and Latin, πεποίθεα following εἴδεα and totondistis following vidistis; but some hold that it took place before the original language broke up. The matter is discussed by Mahlow, Kuhn's Zeitschr xxvi 583; the Author, Ber. d. kgl. sachs. Ges. d. Wiss., 1883, pp. 178 f., Thurneysen, Bezz. Beitr. How obvious this re-formation was VIII 274; and others can be seen from Irish, where in later times the perfect was very largely transformed on the analogy of the s-preterite, as tānacus 'I came' instead of tānac

In the Indicative, $-\epsilon\alpha - \epsilon\alpha\varsigma - \epsilon\epsilon(\nu)$ became in Ion.-Att. $-\eta - \eta\varsigma - \epsilon\iota(\nu)$. Then $-\epsilon\iota(\nu)$ by complementary analogy produces Att. $-\epsilon\iota\nu - \epsilon\iota\varsigma$, cp. $\tilde{\eta}\nu$ 'eram' instead of $\tilde{\eta}\alpha$ $\tilde{\eta}$ § 502 p. 65. The 3rd pl. was $-\epsilon\sigma\alpha\nu$ in older Attic; this followed * $-\epsilon\sigma-\tau\epsilon$ ' $-\epsilon\sigma-\tau\sigma\nu$ * $-\epsilon\sigma-\tau\eta\nu$ as $\tilde{\eta}\sigma\alpha\nu$ followed $\tilde{\eta}\sigma\tau\epsilon$ etc. (§ 1021). $-\epsilon\sigma\alpha\nu$ similarly caused the forming of $-\epsilon\mu\epsilon\nu$ - $\epsilon\tau\epsilon$, which are the endings of old Attic. The endings $-\epsilon\iota\mu\epsilon\nu$ - $\epsilon\iota\tau\epsilon$ - $\epsilon\iota\sigma\alpha\nu$ are first found at a late period; so it can scarcely be allowable to derive $-\epsilon\iota\mu\epsilon\nu$ from * $-\epsilon\sigma\mu\epsilon\nu$, which

has to be postulated for proethnic Greek Probably -&- came in from the singular.

A Greek new formation is doubtless the opt. $\delta \epsilon l \xi \epsilon i \alpha \nu$, for *- σ - $\epsilon \sigma$ - $\iota \alpha \nu$, which, on the analogy of the indicative, produced $\delta \epsilon l \xi \epsilon i \alpha \varsigma$ - $\epsilon \iota \epsilon$; similarly Skr \acute{a} - $y\bar{a}$ -s- $\iota \dot{s}$ -am (§ 839) and Lat. $d\bar{\imath}x$ -is-tis $d\bar{\imath}x$ -er- $\bar{\imath}$ $d\bar{\imath}x$ -er- $\bar{\imath}$ (§ 841). Compare §§ 944 and 1021 1

- § 837. Italic has nothing but Conjunctive forms
- (1) o-Conjunctive used as future in Umbr-Osc. (cp fust § 824 p. 362) Umbr eest est 'ibit' for *ei-es-e(ti) · Gr. yeiv § 836, ferest 'feret', an-penes 'impendes'. Osc. pert-emest 'perimet' The same future could be made from present stems with some characteristic, as Osc didest 'dabit' beside Vestin. di-d-e-t 'dat' (§ 553 p. 107), to be compared with Skr. mid. á-ilad-iš-ta beside dá-dā-ti dá-d-a-ti; Umbr. heries 'voles' heriest 'volet' beside heris 'vis' Osc. heriiad 'velit' (§ 706 p. 233, § 716 p. 249).
- (2) ē-Conjunctive in Latin and Umbr.-Oscan (cp. Lat. es-s-e-m Osc. fu-s-i-d, § 824 p 362).

Lat. ager-e-m ager-\(\bar{e}\)-s. cp Skr 3rd pl \(\delta_ji\)s-ur. unguer-e-m: cp Skr. \(\delta_nji\)s-am merger-e-m cp. Skr. \(\delta-ma_jji\)s-am. v\(\bar{v}ver-e-m: cp. Skr \(\delta-j\)vi\(\delta-am\) I think it more likely that forem comes from *fu-es-\(\bar{e}\)- (I \§ 172.3 p 152), than from *fu-s-\(\bar{e}\)-; it therefore belongs to $-b\bar{o}$ for *fu\(\bar{o}\), as agerem to ag\(\bar{o}\) The same formation is made from characterised present stems; as sisterem from si-st-\(\bar{o}\), jungerem from jung-\(\bar{o}\) \(\frac{\gamma}{\gamma}\)jeug- (cp. Skr. \$\gamma_j\)-as-\(\bar{e}\) \§ 656 p 191, \(\bar{a}indh\)-i\(\delta-ta\) \§ 839), sternerem from ster-n\(\bar{o}\), gn\(\bar{o}scerem\) from gn\(\bar{o}-sc\(\bar{o}\)

Umbr ostensendi 'ostenderentur' for *-tendes-ē-ntēr (§ 1082 1). Osc. herrins 'caperent' for *heres-ē-nt from a pres *herō, patensins 'aperirent' for *patenes-ē-nt from a pres. *patenō (§ 622 p. 159)

§ 838. Keltic. O.Ir. ro-fetar 'I know' 3rd sing. ro-fitir for *yid-es- (I § 521 p 379, and Thurneysen Kuhn's Zeitschr. xxxi 62 f., 98): Gr. η΄δεα conj. Hom ιδέω beside ειδέω, § 836 p. 373 I conjecture that ro-fetar originally meant 'I have

learnt', hence its present meaning 'I know', op seiss § 833 p. 370. The phonetic rules however permit of another derivation, from *uid-is-, in which case it would come near to Lat. vīdis-tis.

II. əs-stems.

§ 839. Aryan -iš- in Sanskrit and in the Gatha dialect of the Avesta.

In the Gathas we find three forms. 1st sing. conj. xšnev--īš-ā from xšnu- 'to attach oneself' (cp xšnao-še-mna- § 833 p 371), indic. mid. civ-īš-ī civ-iš-tā from ku- 'to look away to something, to hope', ī is probably to be read ĭ, as often.

The formation is common in Sanskrit. As regards the 2^{nd} pl. mid. in -idhvam, is ájanidhvam, it is to be noted that -idh- is due to the analogy of the other persons which have -iš- instead of *- \bar{i} dh- = *- \bar{i} dh- (I § 591 pp 447 f)

Usually with e-grade (1st Strong (irade) in the root. á-star-iš-am from star- 'to strew' 2nd sing mid. kšan-iš-thās from kšan- 'to wound' 3nd sing mid. yám-iš-ta from yam-'cohibere'. 2nd dual cay-iš-tam from ci- 'to put in layers, collect' 3rd sing mid á-nav-iš-ta from nu- 'to praise' á-dharš-iš-ur from dharš- 'to be brave, dare' Conj. jambh-iš-a-t from jambh- 'to snap at' á-šas-iš-am from šas- 'to praise' 3rd pl mid. á-bōdh-iš-ata, conj bódh-iš-a-t from budh- 'to awake, notice' 3rd sing mid á-sah-iš-ta opt. sah-iš-ī-māhi from sah-'to subdue'. 3rd pl áj-iš-us from aj- 'agere'.

Other grades of root. \acute{a} -bhār-iš-am from bhar- 'to carry'. \acute{a} -tār-iṣ-am conj. tāriṣ-a-t opt tāriṣ-ī-mahi from tar- 'to carry across, pass through'. 3^{rd} pl mid. (pass) \acute{a} -nāy-iṣ-ata from nī- 'to lead'. Opt. idh-iṣ-ī-mahi from idh- 'set afire'. Opt. gm-iṣ-īya from gam- 'to go'.

As the root of 2^{nd} sing mid. $p\bar{u}r$ - $i\bar{s}$ -thas (par- 'to fill') shows it to have been based upon verbal forms like $p\bar{u}r$ -dhi, so also the $i\bar{s}$ -aorist is often made from a characterised present stem 3^{rd} sing mid a-dad- $i\bar{s}$ -ta beside da- $d\bar{a}$ -ti da-d-a-ti from

dā-'to give' (cp. Osc didest, § 837.1 p. 374) 3rd sing. mid. aíndh-iṣ-ta opt. indh-iṣ-tya (also idh-iṣ-) beside in(d)dhé pl. indh-itē from idh-, á-drh-iṣ-am beside dŕh-a-ti from darh-'to make firm' (cp. Lat. junger-e-m § 837 2 p. 374) aips-iṣ-am beside ip-sa-ti from āp- ap- 'to attain', 1st sing. mid. jiṇās-iṣ-i beside ji-jūā-sa-tē from jūā- 'to learn' 3rd pl. mid á-hlāday-iṣ-ata beside hlād-ayu-ti causal of hlād- 'to refresh, give life to', 2nd sing mid. pyāyay-iṣ thās beside pyāy-aya-ti causal of pyá-ya-tē 'swells' (§ 796 p 333). Compare 1st sing pres. mid. qāyiṣ-ē beside gā-ya-ti 'sings' (§ 656 p 191).

Remark In Mss of the Veda occur forms with -\$i\vec{s}-\text{ instead of} -si\vec{s}-\text{, as } py\vec{a}-\vec{s}i\vec{s}-\vec{s}-mah. This shows the same phonetic change as \$\vec{s}u\vec{s}-ka-s\$ for *su\vec{s}h\vec{d}-s I \vec{s} 587 4 p 413 Compare Whitney, Am Journ Phil vi 277; Bloomfield and Spieker, Journ Amer Or Soc XIII 118

The 2nd and 3rd sing. of the arists with -iṣ- and -siṣ- ended regularly in -ī-ṣ and -ī-t, as á-starī-ṣ -t beside á-starīṣ-am, á-yāsī-s -t beside á-yāsīṣ-am. The original endings must have been *-iṣ(-ṣ) and *-iṣ(-ṭ). That of the 3rd sing. is still seen in injunctive forms like ariṣ-t-u (§ 909), and the influence of the 2nd sing can be made out in arist forms such as á-jay-i-t (§ 574 p. 115). -ī-ṣ ī-t cannot be got out of *-iṣ-ṣ and *-iṣ-ṭ. They rather belonged in origin to our IXth Present Class, and were not sigmatic arist at all; á-star-ī-t is like á-rōd-ī-t

á-brāv-ī-t (§ 574 p. 116). As á-star-ī-t is to staru-ti, so is á-hās-ī-t to há-sa-tē, and á-bhās-ī-t to bhá-sa-ti.') These forms in -īš-īt took the place of *astariš *ahāsiš (2nd and 3rd sing.) because it then became possible to distinguish the persons; then -īš and -īt drove *-īš *-īt out of the field altogether. Compare ī instead of i in ú-dhī-mahi, mṛ-nī-más and the like § 498 p 62. How -sīš -sīt passed afterwards from the sīš-aorīst to the s-aorīst, see in § 816 p. 354

In Keltic, -os- may be looked for in the s-preterite of the 1st and 2nd Conjugations, as O Ir ro-charus Mid.Cymr. cereis 'I loved' For the Britannic dialects only -ās(s)- and not -ās(s)- may be assumed. 3rd sing O Ir. ro-char for *-caras-t, 2nd sing depon. -asser for *-as-thēs+r (Thurneysen, Idg. Forsch. 1 463). Also found, pl ro-charsam -charsid -charsat for *carassomo(s) *carassete *carassont(o) Thurneysen, who sends me this explanation of ro-char, throws out the question whether ss did not come from forms in which st originally was: the 2nd pl *caras-te became *carasse, this was enlarged to *carassete by adding the usual ending of the 2nd pl., and then by analogy *carassomo(s) etc. May we venture to suggest a parallel with the relation of Gr. ε-κοεμάσ-θης (see above) and ε-κοεμασσα (§ 842)?

¹⁾ Jackson believes that he has found an Avestic 2nd sing. of this kind in $fr\bar{a}$ - $d\bar{a}h\bar{i}$ Yt. 3. 2, from $\swarrow d\bar{a}$ - (Proceed. Am. Or. Soc., Oct. 1889, p. CLXV).

III. žs-stems

§ 841 In Latin, -is- appears in the inflexion of the perfect stem. Indicative only -is-tis -is-tī and -erunt, if the last is for *-is-ont(i) (§ 1023), Conjunctive (fut. perf) -erō -erimus for *-i-s-ō *-is-i-mus Optative (conj. perf.) -erim -erīmus for *-is-ō-, and in the late-born plupeif with -eram = *-is-ā-m vīdis-tis. ep Skr. vēdiš- Gr. ɛidi(o)-, iis-tis for *eis- *ei-is-: ep Ski ayiš- Gr ɛɛi(o)-. līquis-tis, fīdis-tis vīcis-tis And doubtless fūgis-tis rūpis-tis jūvis-tis (juv- for *diugu-, beside Lith. džiauguū'-s 'I am glad') with $\bar{u} = \text{Idg. eu. vertis-tis scandis-tis}$ Also scābis-tis cāvis-tis, fōdis-tis and lēgis-tis vēnis-tis may come in here, the last two to be compared with Gr. $\gamma \bar{\eta} \rho a_{\rm S}$ (§ 834 p. 371)

Phonetic law forbids our assuming that -es- has been weakened to -is- in vidis-tis (vidis-sem § 842); cp. scelestin-s capessō and the like. It is not a sufficient explanation to say that -e- became -i- because of -imus, or that the relation of amāmus · amāssem produced vertissem beside vertimus (Bartholomae, Bezz Beitr xvii 112). Nothing is left but to hark back to Idg. -i-s- 1). In § 834 p. 371 we compared cimis-Gr. 9im-σ-. Compare further af-i-σ- in ènaiσ-το-ς η̃iσ-(σ)α from

¹⁾ I will here give a possible way of identifying Lat -is- with Idg -es- or -is-; but I do not believe that any one will adopt it *sie-ti--tis *ste-ti-fī or -bī (Gr Ϝ-στα-τε Skr ta-sihi-tha), *tu-tudi-tis *tu-tūdi-fī (Gr τε-τεμίφα-τε Skr tu-tūdi-tha), *scidi-tis (Skr. ά-chida-ta) become steisis steistī, tuiudistis tutūdistī, scidistis on the analogy of *tūdes-tis *tūdes-tī; and then by reciprocal analogy, these became rūdis-tis -iī.

ἀίω 'I hear' for *ἀ $F\iota\sigma$ - ω and in αἰσ- \Im ε΄- $\sigma\Im$ αι beside Skr. άν-α-ti 'regards, favours', ') ἀF- ι - σ - in ἀίσ- \Im ω 'I breathe out' beside ἄ $\iota\sigma$ - ν (doubtless for *ἀ $F\iota\sigma$ - ν) beside ἄ(F)- η - μ ι 'I blow, breathe', variant stem ἀF- $\varepsilon\sigma$ - in ἀσ \Im μ α (ἀίσ- \Im ω: ἀσ- \Im μ α = Lat. $v\bar{\imath}dis$ -: Gr. ε ιδ ε (σ)-). Further, άλ- $i\sigma$ / $\iota\sigma$ - μ αι ἀρ- α ρ- $i\sigma$ $\iota\sigma$ ω beside ἀρ- $i\sigma$ - $\iota\sigma$ ω (§ 673 p 206) Lastly, Skr. ά-grah- $\bar{\imath}$ - $\bar{\imath}$ -am, where I hold $\bar{\imath}$ -to be merely an ablaut variant of the -i- now under discussion. If, as we must assume, it was in proethnic Latin that -is- spread from the verbs to which it properly belongs to all others, then according to I § 33 p 33, -er- in $v\bar{\imath}$ der $\bar{\imath}$ 0 etc. must be derived in all instances from -is- 'Thus e g $verter\bar{\imath}$ 0 will be for * $vertis\bar{\imath}$ 0 (but verterem for * $vertes\bar{\imath}$ -m)

 $v\bar{\imath}dev\,a-m$ shows the same \bar{a} -suffix as -bam eram (§ 583 p. 124), and probably it is due to analogy, being made to complement $v\bar{\imath}der\bar{o}$ like eram $ev\bar{o}$ Observe that $d\bar{\imath}\,v\bar{o}$ $d\bar{\imath}xim$ have no * $d\bar{\imath}xam$.

The endings of vīdistis -istī vīderō vīderim vīderam vīdissem were transferred both to forms like totondī tetigī and to those like dīxī, so that we have totondistis totonderō and dīxistis dīxerō etc. The former may be compared with Gr. πεποίθεα (§ 836 p 373), the latter with Skr. άyāsišam (§ 839 p. 376). The efficient cause of these new formations may have been that in the Indicative many of the original forms of the 2nd sing. and pl had become rather awkward, as 2nd sing. *totons(s)ī 2nd pl *totons(s)is (or *totonstī *totonstis with t restored from estis) and 2nd sing. *dīx(s) 2nd pl *dīxtis

We proceed to mention the $\overline{\imath}s$ -aorists of Latin and Irish belonging to $\underline{\imath}o$ -present stems (Class XXVI).

In Latin, those verbs whose 2nd sing indic pres. ended in -īs, had the ē-conjunctive in -īrem, as farcīrem from farciō. The only exception is fierem like agerem, § 837 2 p. 374. But from verbs like capiō -īs the conj. was -ĕrem, caperem; and it remain suncertain whether this be for *-is-ē-m or *-es-ē-m, cp capis-sō and capes-sō § 842.

To assume a 'Root' ανιε- for ἄιον and a present *ἄfεισω I hold to be wrong (Schulze, Kuhn's Zeitschr. XXIX 249 ff.).

It must be remembered, in considering Lat. farcīrem and the like, that these went hand in hand with the original denominatives in -1-20, as fīnio, whose s-aorist, fīnīrem, is to be compared with (ir ἐνόνῖσα O C.Sl gostichǔ (§ 813 p. 351) Hence the question presents itself — whether farcīrem is really like Skr. á-grahīš-am, whether it was not rather produced simply by the analogy of the īs-formation. In this case it might be compared with O C Sl. bichomǔ (§ 727 p. 257), which was modelled upon gostichomǔ

In the s-aorist of the 10-piesent (3rd Conjugation) in Irish, the 3rd sing ended with *-1-s-t, as -lēic for *leikuis-t. A short is seen also in Mid Cymr, which in this aorist had -yss-, e. g. eistedyssant 'they sat' Compare § 840 on ro-char for *-caras-t. The question which there had to be answered on behalf of ro-charsam, now crops up again for -lēcsem. Hand in hand with these 10-verbs went those in *-1-20 and those in *-610, as 1st sing. do-ro-dālius from -dālim 'I divide', 1st pl. ro-moit-sem from mordum 'I extol'.

C STEMS WITH -8-8-.

§ 842. As the s-suffix was in no sense a special agrist suffix, but was used in the parent language with other tenses of a certain number of verbs, it need not surprise us to see that verbal s-stems often make an agrist with a second s. Analogous formations with -2s- have been brought before us in § 839, the Sanskrit agrist series of which one is \$\textit{dk-\tilde{sis}-ur}\$.

Greek. Hom. έ-σπασ-σα Att. ἔσπασα from σπάω 'I pull' for *σπα-σω, ἔ-σπασ-ται. ἔ-κλασ-σα from κλάω 'I break off' for *κλα-σω, κέ-κλασ-ται. ἔ-νρέμασ-(σ)α 'I hung' ἐ-κέρασ-(σ)α 'I mixed' ἐ-σνέθασ-(σ)α 'I scattered' beside κριμασ-τό-ς νε-κέρασ-ται ὲ-σκέθασ-ται. (f)-έσ-(σ)α 'I clothed' beside 2^{nd} sing. ἔσ-σαι. ἔ-σβ-εσ-(σ)α 'I quenched' beside σ β-εσ-τό-ς ἔ-σβεσ-ται. ἐ-νόρεσ-(σ)α 'I satisfied' beside κε-νόρεσ-ται. ἀρ-έσ-(σ)ασθαι 'to come to an understanding'

beside $\partial_{\varphi} \varepsilon \sigma - \tau \delta - \varsigma$. $\dot{\varepsilon} - \varkappa \dot{\alpha} \lambda \varepsilon \sigma - (\sigma) \alpha$ 'I called' $\ddot{\alpha} \lambda - \varepsilon \sigma - (\sigma) u$ 'I ground' $\ddot{\varepsilon} \mu - \varepsilon \sigma - (\sigma) \alpha$ 'I spewed' from the presents $\varkappa \alpha \lambda \dot{\varepsilon} \omega$ $\dot{\alpha} \lambda \dot{\varepsilon} \omega$ $\dot{\varepsilon} \mu \dot{\varepsilon} \omega$, perhaps for * $\varkappa \alpha \lambda \varepsilon \sigma \omega$ * $\dot{\alpha} \lambda \dot{\varepsilon} \sigma \omega$ * $\dot{\varepsilon} \mu \dot{\varepsilon} \sigma \omega$. $\dot{\varepsilon} \dot{\omega} v \sigma - (\sigma) \alpha$ 'I pulled' beside $\dot{\varepsilon} \dot{\omega} v \sigma - \tau \alpha \iota$. Compare § 575 p. 117, § 656 p. 191, § 661 p. 196, § 836 p 372 f., § 840 p. 377.

Remark. There is too little support for the theory that these Greek an-aorists stand in a direct historical connexion with the Sanskrit sis-aorist, — that originally the singular active had -ses- (-ses-) and the plural -ss-, and that Sanskrit kept only the singular form, Greek the form of the plural (W Schulze, Kuhu's Zeitschr. xxix 266 ff)

Italic. With Lat vīsō for *μent-sō, quaesō for *quais-sō (§ 662 p. 197), compare petes-sō O Lat. ad-petis-si-s, capes-sō O Lat. capis-su-m, luces-sō, faces-sō. And to the same group as fuxō faxitur faxim (§ 824 p 362) belong amās-sō amāssim, turbūs-situr, infin. averruncās-sere, habēs-sō pro-hibēssim, licēssi-t; amb-īssim, -ss- after a long vowel, which should be -s-, is due to the analogy of forms with -ss- following a short vowel, cp. ēssem instead of *ēsem (edō) on the analogy of ēssem (from sum). With petissis capessam are associated forms like vīdis-se-m, ē-conjunctives, whose analogy produced (1) totondissem and (2) dīxissem etc. The forms with -is-s- have their nearest parallels in Gr. η̃ισ(σ)α from αF-ισ- (§ 841 p. 378 f.).

THE PERFECT.4)

§ 843. The chief marks which keep the Idg. Perfect distinct from Present and Aorist are two. (1) Firstly some peculiar personal endings in the Indicative; as from $\sqrt{\text{weid}}$ -

Except in Armenian and Balto-Slavonic, the pr. Idg. Perfect remained in all branches of the language a large and comprehensive group. It was least changed in Aryan, Keltic, and Germanic In Greek it was mixt up with a x-formation, and in Italic with a whole series of non-perfect tense forms.

The proethnic perfect forms may be divided into two groups according to the stem.

II 400 Mullenhoff, Angebliche Aoriste oder Perfecta auf r im Altnord. und Hochd, Zeitschr f deutsch Altert, xii 397 ff Zarncke, Zu den reduplicierten Praetenten, Paul-Braune's Beitr. xv 350 ff. J von Fierlinger, Die 2 ps sg perf starker Flexion im Westgerm., Kuhn's Zeitschr XXVII 430) Works on the weak Germanic Preterite are given under § 907.

- (1) Reduplicated Stem, with o in the root syllable of the 3rd sing. indic. act.. if the root belonged to the e-series E. g. *ge-gon-, *ge-gn- *ge-gy- from √ gen- 'gignere'. Gr. γέ-γον-ε γέ-γα-μεν, Skr. jα-jάn-α jα-jñ-úr
- (2) Unreduplicated Stem Sometimes the ablant is the same as in (1), as *μοχd-*μιd- from $\sqrt{μexd-}$ · Gr. οἶδ-ε ἴδ-μεν, Skr. véd-u vid-má. Sometimes different, as with ē in roots of the e-series, e. g. 'mēd- from $\sqrt{med-}$ 'measure'. O.Ir. ro mīd-ar Goth. mēt-um, *sēd- from $\sqrt{sed-}$ 'sit' Goth. sēt-um Lith. séd-ēs; *sēŷh- from $\sqrt{segh-}$ 'conquer, hold'. Skr. sāh-vás-.

In perfect stems like $\tilde{g}e$ - $\tilde{g}on$ - or *uoud- the o-grade prevailed in the 2^{nd} and 3^{rd} sing Indic. Active (ologa ologa), and, in the opinion of most scholars, the 1^{st} sing, as well (ologa), the e-grade in the Conjunctive $(\epsilon i \dot{o} - o - \mu \epsilon v)$ Skr. ta-ta-n, and, according to some scholars, in the 1^{st} sing. Indic. Active too $(\pi \dot{\epsilon} \psi_{t} \cdot v_{t} - a)$, the weak grade in the plural and dual Active, and right through the Indicative Middle $(\gamma \dot{\epsilon} - \gamma a - \mu \epsilon v)$ $\ddot{\epsilon} - i \kappa - \tau o v$ $\tau \dot{\epsilon} - \tau \mu a n - \tau u$ Skr. ni-ny-u ni-ny-u, and in the Optative (Skr. va- $v_{x}t$ - $y\bar{a}$ -t Goth. $va\dot{u}r\bar{p}$ -ei-ma) To o in *ge-gon-e answers \bar{o} in *se- $s\bar{o}$ -(Gr. aq- $\epsilon \omega \times \epsilon$ Goth sai- $s\bar{o}$) from $\sqrt{s\bar{e}}$ - 'send forth, sow'.

Remark Considering that the ending of the 1st sing indic act was Idg. -a, while that of the 3rd sing was Idg -e, there is a difficulty in the difference between Skr 1st sing. ja-ján-a and 3rd sing. ja-ján-a. I have identified jajāna with payors (I § 78 p 69). De Saussure (Mém sur le syst prim 72 f) and Osthoff (Perfect, 61) equate jajúna -- Idg. *gegena, on which view yeyora would be due to levelling and should be *yeyera; and as a matter of fact no difficulty worth mentioning faces this view From the standpoint of those scholars who deny that Idg o becoms Ar. a in open syllables, no explanation of Skr. jajána has been found which is in the smallest degree satisfactory (see the last attempt in Bechtel, Die Hauptprobleme der idg Lautlehre, 57, 165), cp. § 790 p 322 on the ā of bhāraya-ti. It may be observed in passing that the means lately used by J. Schmidt to combat my theory of this Aryan a are very little calculated to help in solving the points (see Kuhn's Zeitschr. xxxi A long list of authorities and ex cathedra statements will never decide the matter, this can only be done by constant and scrupulous examination of the facts Perhaps the question may be helped to a conclusion by the study of Indo-Germanic accent which has lately been taken up

§ 844. When the root ends in a consonant, some part at least, large or small, of the indicative forms in all the different languages have a short vowel before those personal endings which begin with a consonant.

Sanskrit. -i- in 2nd sing. act. ās-i-tha ru-rōj-i-tha (but vēt-thu ta-tán-tha), 1st pl. act. pa-pt-i-má (but yu-yuj-má vid-má), 2nd sing. indic. mid. āc-i-šē ja-jn-i-šē (but da-dīk-šē), 3rd pl. mid. ja-jn-i-rē, to which answers Avest. vaoz-i-rem, cp. Skr. partic. act. pa-pt-i-vás- (but da-dīx-vás- vid-vás-).¹) In Vedic this i is found only when the preceding syllable is long. In Avestic, -amu in daiāy-ama beside pass di-āae-iti (§ 537 p. 97).

(freek shows -a- in the 1st and 2nd pl $\tau \varepsilon - \tau \rho \dot{\alpha} \varphi - \alpha - \mu \varepsilon \nu \tau \varepsilon - \tau \rho \dot{\alpha} \varphi - \alpha - \varepsilon \varepsilon$ (but $i \delta - \mu \varepsilon \nu \varepsilon l \lambda \dot{\eta} \lambda \sigma \upsilon \vartheta - \mu \varepsilon \nu \varepsilon \sigma \tau \varepsilon$). Compare partic. $\pi \varepsilon \pi \tau \dot{\omega}_{\mathcal{G}}$ for $*\pi \varepsilon - \pi \tau - \alpha - F \dot{\omega}_{\mathcal{G}}$, answering to Skr. $pa-pt-\iota - \nu \dot{\alpha} s$ - (but $\varepsilon l \dot{\sigma} - (F) \dot{\omega}_{\mathcal{G}}$), and the mid $\pi \varepsilon - \pi \tau - \alpha - \mu \omega$ beside $\pi \varepsilon \tau - \dot{\alpha} - \sigma \sigma \omega$. On $-\alpha \varsigma$ beside $-\vartheta \omega$ in the 2nd sing., see p. 386.

Latin. 1st pl. tu-tud-1-mus sed-1-mus

Old Irish. 1st pl. ce-chn-ammar 2nd pl ce-chn-aid.

Gothic. 1st pl vit-um sēt-um skai-skáid-um 2^{nd} pl vit-u- \bar{p} sēt-u- \bar{p} skai-skáid-u- \bar{p} .

It is hard to decide when or how this intermediate vowel was to be found in the various perfect schemes of the parent language (for the same scheme did not do duty for all perfects). Perhaps then, as in the Veda, the quantity of the preceding syllable had something to do with it

What complicates the problem greatly is the suspicion that so many forms may have been changed by analogy. In Aryan, Greek, and Italic the question arises whether forms with the intermediate vowel were not influenced by forms from a root ending in a long ā-vowel, as Skr. ta-sthi-má Gr. ξ-στα-μεν Lat. ste-ti-mus (for stetimus cp. however § 869). In Greek, Italic, Keltic, and Germanic the 3rd pl. has an nt-suffix, Gr.

¹⁾ I do not here consider the a of the 2nd and 3rd dual active vidáthur vidátur, because it may have been identical with that of the 2nd and 3rd pl vid-á and 3rd sing. vžd-a (§ 1088).

-αντι -ατι (mid -αται), Umbr -Osc -ens O.Ir. -atar and Goth -un, and it is quite possible that the vowel of these endings passed on to other persons. In Greek, there was mutual attraction between the perfect and s-aorist, because one or two personal endings were the same, τέτροφ-α -ε having the same suffixes as εδείξ-α -ε (beyond doubt τέτροφ-ας follows εδείξ-με, and in later Doric γέγον-αν follows εδείξ-αν), then which came first, τετράφ-α-μεν -ατε or εδείξ-αμεν -ατε? Italic, again, as early as the proethnic stage, the old perfect had got mixt up with thematic agrist If, for instance, a was the thematic vowel in fu-1-mus tetig-1-mus dīx-i-mus as well as with fu-i-t tetig-i-t $d\bar{\imath}x$ -i-t (cp. pres. ag-i-mus), yet it is uncertain whether the -i- of Lat -i-mus, when used with consonantal roots, was ever anything else but Idg -om Keltic the question meets us whether the plural forms had not the thematic vowel

Since Avest dardy-ama cannot be kept apart from optative forms like pum-y-ama (see § 1001), to assume an Idg suffix -mme as variant of -me in the perfect seems almost inevitable, and therefore I am inclined to refer to this the Gr. -auev in τετράφ-αμέν etc., and the Goth -um in skaiskaid-um etc., Lat -imus and () Ir -ammar may also ın some cases represent the same But agam the conjecture itself that the difference between \mathbf{Skr} papt-1-má уи**уи)-**та́ , between (fr τετρά-φαμεν and είλήλουθ-μεν, represents a difference of structure like that which exists in Skr rud-1-más (Class IX §§ 572 ff) and us-más (Class I §§ 492 ff) It may be that once *papt-ama *sazd-amá (like Avest. dardy-ama) and tasthi-má (= $\xi \sigma \tau u - \mu \varepsilon \nu$) dadhi-má existed side by side, and that the former were transformed to match the latter and became paptimá sēdimá. But proved this cannot he, not even by the Vedic law of quantity. There is always the possibility that the parent language itself possessed perfect stems like *pe-pto- (and thus 1st pl. *pe-pto-me).

§ 845. The preterite connected with the ldg. perfect — pluperfect as it is called — which is only found with certainty

in Aryan and Greek, shows the same personal endings as other augmented preterites. Like the conjunctive and optative of the perfect, this cannot be distinguish from the corresponding forms of our Vth Present Class; see § 485 p. 39, § 555 p. 108.

In the same languages the pluperfect sometimes has thematic inflexion. These forms are to be compared with the corresponding forms of Present Class VI (§§ 561 ff.).

Proethnic Indo-Germanic

§ 846. (A) Reduplicated Perfect.

With roots beginning in a consonant, the syllable of reduplication originally ended in -e, no matter what ablant series the root might belong to Examples. *ge-gon- *ge-gon- Gr γ '- γ or- ε O.Ir ro $g\bar{e}nar$ (for *ge-gn-) Skr. ja-jan-a from \sqrt{gen} -, *se- $st\bar{a}$ - *se- $st\bar{a}$ - Gr ε -gra- μ sr Lat. ste-ti-mus Skr. ta-- $sth\bar{a}$ \dot{u} from $\sqrt{st\bar{a}}$ -. But even then there were not lacking perfect forms with \bar{e} in the reduplicator, which one may call the Intensive Perfect. Gr $\dot{\varepsilon}\gamma\dot{\eta}$ - $\gamma\varepsilon_{\theta}$ - μu Skr. $j\bar{a}$ -gar-a from \sqrt{ger} -. See §§ 471, 472 pp. 15 and 17. The treatment of the initial root-consonants in the reduplicator has been already described, §§ 475 and 476, pp. 20 ff

It cannot be proved for the parent language, that in roots beginning with a vowel, an e (or some other short vowel), serving for the reduplicator, contracted with the root-initial (as some have inferred from Lat $\bar{e}d-\bar{\iota}$ Goth. $fr-\bar{e}t$ Skr $\bar{a}d-a$ from \sqrt{ed} , Gr. $\tilde{\eta}_{\chi\alpha}$ O.Icel. $\bar{o}k$ Skr. $\bar{a}g-a$ from $\sqrt{a}\bar{g}$) It is very likely indeed that all these forms belong to the unreduplicated perfect type. See § 848.

√ der- 'split, tear, flay', act. 3rd sing. *de-dór-e 1st pl *de-d⁄r-mé mid. 1st sing. *de-dr-á? (conj. *de-dér-e-t(i) opt. *de-dr-½-t or *de-dr-½-t). § 847. Perfect forms from Extended Roots

Root + suffix $-\bar{a}$ -, $-\bar{e}$ - $-\bar{o}$ - (§§ 578 ff. pp 118 ff.). Skr. \jmath_1 - \jmath_2 \jmath_4 \dot{u} , Gr Ion $\beta \varepsilon$ - $\beta i\eta$ - τu ($\beta \varepsilon$ - $\beta i\eta \times \varepsilon$) from * $g(i)_2$ - \bar{a} -, \checkmark ge_2 -'compel, subdue'. Skr. ma- $mn\bar{a}u$ (gramm), Gr. Dor. $\mu \acute{\varepsilon}$ - $\mu \nu \ddot{a}$ - τu from mn- \bar{a} - \checkmark men-'think, mean'. Skr. ju- $gl\bar{u}u$, Gr. $\beta \acute{\varepsilon}$ - $\beta \lambda \eta$ - τu ($\beta \acute{\varepsilon}$ - $\beta \lambda \eta \times \varepsilon$) from $gl\ \bar{e}$ - \checkmark gel-'fall' (cp. § 587 p. 127). Skr va- $v\bar{a}u$,

Goth. vai-vō from y-ē- νay- 'blow'. Skr. ja-jñāú, Gr. ε-γνω-σ-ται with σ added later (ἔ-γνωνε), O.Ir. ad-gēn (§ 877) from ŷn-ō-ν ŷen- 'know'. On the Sanskrit conjugation of these perfects, see § 850

Root + s-suffix (§§ 655 ff pp 189 ff.). ten-s- 'pull, draw' Skr 3rd pl. mid. ta-tas-rē (Goth. at-Juns -Juns-un) tuei-s- 'shake' Skr ti-tviš-ē, Gr σέ-σεισ-ται

Root + dh-suffix (§§ 688 ff. pp 218 ff.) $r\bar{e}$ -dh- Skr. ra-rádh-a ra-rādh úr (pres rādh-no-ti 'finishes successfully, makes all right'), Goth qu-rair $\bar{o}\bar{p}$ -rair $\bar{o}dun$ (pres qa-r $\bar{e}da$ 'I consider, busy myself')

In the same way the present sk-suffix in seen in Skr pa-prach-a pa-prach-ur and Lat po pose-t for *poporeset from prek- 'ask', beside these we have Umbr pepurkurent 'rogaverent' Mid Ir mid im-chom-arc-air, Goth trah (§ 670 p 203) Probably perfect forms with sk are not so old as the parent language

§ 848 (B) Unreduplicated Perfect

(1) First comes a group in which the vowel gradation was the same as in the Reduplicated Perfect. No perfect of this kind can now be recognised in particular forms of Italic, Keltic. or Balto-Slavonic, and in Germanic, only with those roots which do not belong to the e-series

¹⁾ Skr. virêda 'he tound out' does not ask for consideration here, although it comes from the same root. It probably first arose when the root had become differentiated into two — vid- 'know' and vid- 'find' (pres. vindá-ti viitž).

(2) Next these I place a number of forms which perhaps had e for the root vowel in the parent language itself Gr. Hom. έρχ-αται έρχ-ατο from (F)έργω 'I shut up, shut off' 1) Gort κατα-Γελμένο-ς 'collected'2) from *Fελ-νω Lesb. ἀπ-έλλω ctc., see § 611 p. 150; parallel reduplicated stem Hom. ἐέλμεθα, Pind. plpf έόλει έπί-τευχται έν έπιτυχία έστί (Vis έστω) Hesych beside ἐπι-τυγγάνω, but redupl τέ-τευχ-ε. Hon déy--αται from δέχουαι 'I receive', but redupl δε-δεν-ται Compare further Curtus, Verb 112 163 ff G Meyer, Gr. Gr. 2 pp 480 f Skr. yam-ur yam-átur beside ya-yām-a yēm-úr from yam-'cohibere' darš-i-vas- beside da-dárš-a da-drš-úr da-drš-i-vasfrom $dar\dot{s}$ - 'to see' $\bar{o}k$ - $v\dot{a}s$ - beside $u\cdot v\dot{o}c$ -a $\bar{u}c$ - $u\dot{r}$ from uc-(Veug-) 'to take pleasure in shambh-ur skambh-áthur beside a-skambh-a ca-skabh-āná-s from skambh- 'to support' sas-ur sas-urē beside šu-šas-a ša-šas-ur (instead of *ša-šas-ur) from sas- (kens-) 'to prophesy, praise' takš-ur takš-atur beside tu-tákš-a ta-takš-úr from takš- 'to fashion' sah-vás-(Rig-V)Pada text) beside sā-sāh-a sēh-i-mu sa-sah-ē from sah- 'to subdue' (cp. sah-vás- under 3) In forms like darš-i-vas-, the strong grade in the root may be explained as due to the analogy of the sing indic active, as in reduplicated forms like sa-sas-ur But an argument for the formation of the whole group from a stem which is not really perfect to begin with is found in the partic vi-jān-úš-as Rig-V x 271, which must be derived from 1904- 'to know' and was modelled upon the present janá-ti (§ 598 p 141 f), and in the perfects belonging to reduplicated present stems, such as sīd-atur (from sīd-a-ti), vivak-vás- (from ví-vak-ti), didās-i-tha (from dí-dāsa-ti), nonāv-a (from no-nav-ī-ti), see § 850, compare vis-i-vás-, cited under (1), beside pres. viŝ-á-ti and dhi-šē dhirē beside aor ά-dhi-ta, also Gr ἄγ-νια 'way, road' (sc. οδός) beside ηγα ηγμαι and pres. ayo.

¹⁾ Whether Proxaro is augmented or reduplicated is doubtful.

²⁾ Wrongly read -.Fηλμέ-νος by Baunack

Remark 1. Skr. su-sah- \bar{e} (beside $s\bar{e}h$ -) may have been formed from the stem seen in sah-vás-, just as sa-sāh- \bar{e} was from that of $s\bar{a}h$ -vás-(see below). Again, there is no need to ascribe the re-formation $\bar{s}a$ - $\bar{s}as$ -u-1 instead of * $\bar{s}a$ - $\bar{s}as$ -u-u-1 to the influence of the singular alone ($\bar{s}a$ - $\bar{s}as$ -a), op § 852 For Greek, too, we should have one more point in favour of the explanation of the secondary vocalism of the root in forms like \bar{s} - \bar{s} -u-u (instead of *f-s-f-u-u-u-u), op § 859

(3) Form, with \(\bar{e}\)- in the root-syllable from roots of the e-series ending in a single consonant, the connexion with present stems having similar vocalism is obvious (§ 480 Rein p 28 f, § 494 p. 28). O'ld mid ro m\(\bar{e}\)-\(\alpha\)-\(\alpha\)-\(\epsilon\) indicavi, (both pl m\(\bar{e}\)-\(\epsilon\)-\(\epsilon\) opt \(\begin{array}{c} 1^{\text{st}} \phi \) pl \(\mathreve{me}\) to m\(\bar{e}\)-\(\epsilon\) and from \(\nu\) med-'measure', op (ir presimily-\)\(\epsilon\)-\(\epsilon\)-\(\epsilon\) sed-'sit' (op § 494 p. 54, § 859 on (ii \(\bar{\epsilon}\)\)\(\epsilon\)-\(\epsilon\) whose initial is perhaps to be explained by supposing that *\(\sigma\)\(\alpha\)-\(\epsilon\) was represented in (ireek), op. Lith pres s\(\epsilon\)-m\(\epsilon\) s\(\alpha\)-\(\epsilon\) s\(\alpha\)-\(\epsilon\)-\(\epsilon\) s\(\alpha\)-\(\epsilon\) s\(\alpha\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\) and \(\epsilon\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\) and \(\epsilon\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\) and \(\epsilon\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\) d\(\alpha\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)-\(\epsilon\)

Since Latin $s\bar{e}d$ - in $s\bar{e}d$ - \bar{i} $s\bar{e}d$ - \bar{i} $s\bar{e}d$ - \bar{i} -mus can be regularly derived from *se-zd- (cp. $s\bar{i}d\bar{o}$ for *si-zd- \bar{o} I § 594 p 450), it is reasonable to assume that $l\bar{e}y$ - \bar{i} $v\bar{e}n$ - \bar{i} are simply cast in the same mould by analogy. Just as in Sanskrit $p\bar{e}t$ - $u\bar{i}$ $s\bar{e}c$ - \bar{e} and others must really be looked upon as coined on the analogy of $s\bar{e}d$ - $y\bar{e}m$ - (§ 852). On the other hand, $s\bar{e}d$ - \bar{i} can also be connected with Goth. $s\bar{e}t$ -un Lath $s\dot{e}d$ - $\bar{e}s$, and $v\bar{e}n$ - \bar{i} with Goth. $q\bar{e}m$ -un; and this theory has the advantage that it becomes unnecessary to suppose that all \bar{e} -perfect forms from roots of the e-series with initial consonant are due to the analogy of the single form $s\bar{e}d$ - \bar{i} .) However compare § 841 Rem., p 378.

¹⁾ After what has been said on Umbr ander-sistu in § 553 p 107, the question would be at once decided if one such ē-perfect could be found in Umbrian or Samnitic For Umbr-Osc sēd- is probably not derived from sexd-.

Furthermore, Idg. perfect forms of roots beginning with e and ending in a single consonant may also be brought under this \bar{e} -type. (if $\hat{e}\partial_{-\eta}\partial_{-\omega}$) instead of $\hat{e}\partial_{-\eta}\partial_{-\omega}$ (§ 858), Lat $\bar{e}\partial_{-\bar{t}}$ $\bar{e}\partial_{-\eta}\partial_{-\omega}$. (So the friet $-\bar{e}\partial_{-\eta}\partial_{-\omega}$) instead of $\hat{e}\partial_{-\eta}\partial_{-\omega}$ (§ 858), Lat $\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\eta}\partial_{-\omega}$. (CSI. $\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{t}}\bar{e}\partial_{-\bar{$

(4) Roots with initial a-vowel, and ending in a single consonant, seen to have made this perfect in all forms with \bar{a} in the parent language $\times \bar{a}\bar{q}$ -e egit' from $\vee a\bar{q}$ - Skr. $\bar{a}j$ -a (gramm), Gi $\bar{\eta}\chi$ -e $\bar{\eta}\gamma$ - μai (η for \bar{a}), () Icel $\bar{o}k$ 3^{rd} pl $\bar{o}k$ -o -u, * $\bar{a}n$ -e from \vee an-'breathe' Ski $\bar{a}n$ -a (toth $\bar{o}n$ $\bar{o}n$ -un, Goth. $\bar{o}q$ 'I fear' beside agis (ii agoc (Lat $\bar{e}q$ -i co- $\bar{e}p\bar{i}$ — Skr. $\bar{a}p$ -a $\bar{a}p$ - $\bar{u}r$ -— are Italic re-foractes as much as $c\bar{e}p\bar{i}$, see § 870) Similarly with \bar{o} - the perfections and of * $\bar{o}d$ - \bar{e} (§ 858), Lith \bar{u} d- \bar{e} s $\bar{a}\bar{q}$ - $\bar{o}d$ - from $a\bar{q}$ - odseem to be formed on the same principle as $\bar{e}d$ - from $e\bar{d}$ -, and if there is no reduplication in $\bar{e}d$ -, there was none in $\bar{a}\bar{q}$ - or $\bar{o}d$ -Then again, some forms which never had reduplication are no doubt to be found amongst the perfects of Germanic and Latin from roots with initial Consonant, as (toth $sk\bar{o}f$ $sk\bar{o}b$ -un Lat $sc\bar{a}b$ - \bar{i} $sc\bar{a}b$ -i-mus ($sk\bar{o}b$ -un . $s\bar{e}t$ -un = $\bar{o}n$ -un fr- $\bar{e}t$ -un)

Remark 2 In II § 136 p 438 I have offered a conjecture on the origin of the originally unreduplicated perfect, namely, that the participle with the suffix-ues-never had any reduplication. When these ues-participles became associated with the Perfect system in the parent language, two results followed (1) either the participle itself was reduplicated, or (2) the finite verb with which it went sometimes lost its own reduplication. That the perfect participle once stood independent of the reduplicated perfect type, such as Gr ye-you-a ye-ya-ue, can be argued on the strength of the root-vocalism in Gr sldw'c legaysia beside olds logwys etc (II p. 439). Sanskrit shows sāh- and duš-as perfect stems only in sāh-vás- and dūš-vás-. Again, it may be mentioned that in Balto-Slavonic, which only shows participles of the above type with the sole exception of indic Slav

¹⁾ The Conjunctive with similar root-vocalism (είδ-ο-μεν Skr. ta-tán-α-t, § 843 p 384), also did not belong originally to the proper perfect forms, being thematic.

věd-ě, all these are unreduplicated; and they include the large group exemplified by Lith. sẽd-ẽs vẽś-ẽs O.C.Sl. vsz-ũ. Lastly, it must be added that it is easy to explain the wide diffusion by analogy of stems like sẽd-and skāp- in roots with initial consonant, displacing the older reduplicated forms, by supposing that they were taken up in order to get rid of a number of awkward and unnatural sound-groups which had developed amongst the weak forms in (plural and dual indic, etc).

§ 850 Perfect Forms derived from an Extended Root, or from a Present Stem with some characteristic attacht (Suffix or Determinative). Compute § 847

From Roots + -a-, -e- or -o-, only in Sanskrit These Skr. perfects, of which propad mamnau ja-glau va-vau 1a-1hau are represented in the European languages (see loc. cit.), have the a only in the strong stem; being in this unlike the Present, where a runs through all the persons (e. g. dr-a-ti dr-ā-nti §§ 578 ff. pp 118 ff) The reason why in their weak forms they followed Perfects with root gradation was that so many of the perfect endings began in a sonant. As we have $ja-j\hat{n}-\check{e}$ (beside $ju-j\hat{n}\check{a}\check{u}$), $yu-y-\check{u}$ ya-y-ur (beside $ya-y\bar{a}\check{u}$ ya-y $-y\bar{a}$ -tha, y-a- 'to go'), da-dr-ur (dr-a- 'to run'), ta-tr-\(\hat{e}\) (tr-a-'to protect'), so also pa-ph-1-vás- instead of ja-phā-vas-, ya-y-i-vásinstead of *ya-yā-vás-, pa-py-vás- instead of *pa-prā-vás- (beside pa-prā pa-prāu pa-prā-thu, pr-ā- 'to fill') jajhīvás- and papyvás- belonged properly to the Indicatives *ja-jan-a and pa-par-a (gramm); and it is possible that there has been contamination of the extended root (gn-ē gn-ō-, pl-ē-) and the unextended (gen-, pel-); 1) compare Gr Té-Tha-Mev and

¹⁾ Parallel to paprāú: papāra we have papyē (pres. pyā-ya-tē) and pīpāya (pres. páy-a-tē), so that it is naturally doubtful with which of the two perfects Ved pipyē is to be connected. The i in the reduplicator decides nothing, cp. ji-jyāú.

τε-τλ-η-ώς τέ-τλ-η-κα), πίμ-πλα-μεν and πίμ-πλ-η-μι (§ 594 p. 185. However, yayivás- at any rate is a new form, following some such analogy as ta-sthi-vás-.

Root + Nasal Infix or Nasal Suffixes (§§ 596 ff. pp. 136 ff) Skr. ta-stámbh-a ta-stabh-úr (stabh- = *stmbh-) and ta-stambh-ur (§ 852) conj ta-stámbh-a-t beside stambh-a-tē 'makes itself firm, supports itself' from \vee stebh-, sa-sanj-a from \vee seg- 'hang, affix', da-dámbh-a beside da-dábh-a from dabh- 'to hurt, deceive', see § 629 p. 167. ju-ghūrn-a beside ghūr-na-ti 'wavers'. ji-jinv-a beside ji-nva-ti 'sets in motion, helps on', pi-pinv-a beside pi-nva-ti 'swells, makes fat'.

With sk-suffix. Skr pa-prach-a see p. 391. mu-mūrch-a beside mūrcha-ti 'curdles, congeals'. ju-hūrch-a (gramm.) beside hūrcha-ti 'slips, falls' Compare too the thematic ān-archa-t beside z-chá-ti ar-cha-ti 'hits, attains', like ān-arṣ-a-t \$ 854.

With t-suffix (§§ 679 ff. pp. 211 ff.) Skr. ci-t- 'to notice, recognise' (§ 680 p. 212) Skr. ci-két-a ci-kit-ur ci-kit-ē ci-kit-vás-, Avest. 3rd pl. Gath ci-koit-er'š (cp. § 852) part. ci-kip-wâ. Skr. yu-t- 'to join on to, strive' (§ 681 p. 213), weak steni *ja-zt-. Skr. yēt-ē, Avest ya-yat-u yaṣp-ma (Gath. yōip-mā) part. yaṣt-uš-. Skr. na-nart-a na-nṛt-ur beside nf-t-ya-ti 'dances'. pu-sphōt-a beside sphuṭa-ti bursts, splits' (beside phâl-u-ti, § 680 p. 211). ci-cēṣt-a beside céṣ-tu-ti 'is in motion'.

With dh-suffix. Skr ra-rádh-a see p. 391. yu-yódh-a yu-yudh-é beside yō-dha-ti 'gets in motion' (§ 689 p. 219).

Skr. 11-11-va 11-11v-ē beside jt-va-ti 'lives' (§ 487 p. 41).

From a reduplicated Present is often formed a Perfect having no further reduplication besides what the present had sīd-atur (beside sa-sād-a sēd-úr) from sīd-a-tī Idg. *si-zd-e-tī from V sed- 'sit'. nind-i-ma from ni-nd-a-tr 'abuses, reviles'. sec § 550 p. 106 vivak-cas- from vi-vak-ti speaks -tha from di-dāsa-ti desid, or dá-dā-ti 'gives. nónav-a nonvo-ur from no-nov-i-ti no-nu-mas inten-. of nau-ti praises. davidhav-a beside part. dávi-dhi-at- intens. of dhū-nố-ti 'shakes'.) We may also if we choose place here jāgár-a (ep. Gr. ἐγή-γεφ-μαι) beside μα-gar-ti 'wakes, watches', since the present may be regarded as an intensive (§ 560 p. 109). d instead of a in the reduplicating syllable is found elsewhere in Arvan too, and we have noticed in § 472 p. 17 that the spread of this ā in the reduplication is certainly not unconnected with the similarity in meaning of the Perfect-present and the Intensive In later times another perfect ja-jagar-a was made from $j\bar{a}yar-ti$ That a perfect $bi-bhik\check{s}-\bar{e}$ was formed for bhikša-të (desid of bhij-a-ti 'divides, distributes, assigns', § 667 p. 200), and for $sajja-t\bar{e}$ 'hangs on to' (for *saz-j-a-, § 562 p. 110) a perfect sa-sajj-ur Mahābh (beside sa-saj-ur sēj-ur and sa-sanj-a p. 397), is not surprising in view of the complete obscuration of the reduplication in the present.

As regards the above named perfects without special perfect reduplication, compare \(\xi \) 848 p 392.

¹⁾ We should expect davidhav-a by § 467 p 13 The z seems to me to be more simply explained by supposing that the perfect is a comparatively late analogical form from dividhi-than by adopting Wackernagel's conjecture, Dehnungsgesetz der gr. Compp. p 18.

§ 851. The syllable of reduplication had originally a = Idg. e with Roots beginning in a Consonant; the variant $\bar{a} = \text{Idg. } \bar{e}$ is also found (ep. § 850, p. 398).

This was changed in Aryan where a root had i- or u-vocalism

(1) Of Roots with internal or final i- or u-vowel only three retained the a in the reduplicator Skr. ba-bhūv-a Avest ba-rāi-a, Skr. sa-sūv-a (beside su-šūv-a), part mid. śa-šūy-ānā-s (beside indie ši-šy-ē). In all others, i and u had taken the place of a in proethnic Aryan, as Skr. di-dvēṣ-a di-dviṣ-ē Avest dī-dvaṣṣ-a di-dvīṣ-ma, Skr vi-vyādh-a vi-vidh-ur, Ski ru-rūc-a ru-ruc-ūr Avest "rū-raod-a "rū-rud-uṣ-. Skr su-ṣvāpv-a su-ṣup-ūr This tendency affected even roots with initial diphthong hence Skr iy-ūy-a īy-ūr i. e. i-iy-ur instead of pr. Ar 3rd sing *āi-a 3rd pl *āi-rr (cp. Lith. part fem ēj-us-i) beside ē-ti goes'. Skr ūv-ur i c. *u-uv-ur beside u-tū-s woven' ō-tu-m, Skr u-vōc-a ūc-ūr beside uc-ya-ti takes pleasure in' ōhas- pleasure, satisfaction' (cp. the archaic adjectival participle without reduplication ōk-i-vūs-§ 848 p. 392).

One important factor in this development we may conjecture to have been the influence of reduplicated presents with i and u in the reduplicator. If the stems of Skr. $d\bar{\imath}$ -dhay-a $d\bar{\imath}$ -dhi-ma, $d\bar{\imath}$ -dáy-a $d\bar{\imath}$ -di-vás-, $p\bar{\imath}$ -pē-tha $p\bar{\imath}$ -pi-vás-, $b\bar{\imath}$ -bhāy-a are really and truly the same which are contained in the present forms $d\hat{\imath}$ -dhy-ē $\hat{\imath}$ -dh-dh-t, $d\bar{\imath}$ -dy-at $d\bar{\imath}$ -di-hi $\hat{\imath}$ -d\bar{\imath}-d\bar{\in}-t, $p\bar{\imath}$ -pi-hi $p\bar{\imath}$ -páy-a-t, $b\bar{\imath}$ -bhay-a-t (§ 537 pp 97 f.)—compare $j\bar{a}$ -gár-a: $j\bar{a}$ -qar-ti, $n\hat{o}$ -nāv-a· $n\hat{o}$ -nav-\bar{\in}-ti\\$ \$850 p. 398. — then we shall have to connect e.g. bi-bhāy-a bi-bhy-ur, iy-āy-a \bar{\imath}y-\hat{u}r, \mu-h\bar{u}v-a \mu-huv-ur \mu-hv-\bar{e}\ directly with bi-bh\bar{e}-ti\ bi-bhy-ati, \mu-\bar{e}-ti\ (§ 537 p. 97), \mu-h\bar{o}-ti\ j\hat{u}-hv-ati. Beginning then with perfects like these, the reduplication with i and u could easily spread to other perfects from i- and u-roots to which there was no corresponding reduplicated present.

(2) Roots beginning with z- and z-, of the form of Ar zat-'join on, strive' and wak- wac- speak', still had wa- and wa- for reduplication right through the Perfect in proethnic Aryan Skr. yēt-ē Avest. ya-yat-a yaep-ma, Skr ya-yām-a yēm-úr. Skr. yēj-ē, Skr. va-vāc-a Avest va-vac-a vaox-emā, Skr. va--vah-a Avest vaoz-1-rem, Skr va-vam-a, with the weak stems compare pres Skr $y\acute{e}\acute{s}a-ti = {}^*yu-i\acute{s}-a-ti$ and not $\acute{u}-v\bar{o}ca-t$ Avest, paoca-b = 'ya-yc-a- § 562 p. 110. These forms stood on the same level as those like Skr va-vart-a va-vrt-ur vi--vés-a ri-vis-úr and with Gr i-όλ-ιι (§ 848 p. 392) ε-οργ-ε (\$ 846 p 389) e-oux-e (\$ 848 p 392) and Goth. vai-vald Next, in Sanskrit, those verbs which had amongst their nonperfect forms some in which the root, being of the weak grade, began with 2- or u-, substituted 2- and u- for ua- and va- as the reduplicator; and thus we get $i-y\hat{a}j-a$ $\bar{i}j-ur$ (1 e. *i-ij-ur) heside ij-yú-te iš-tú-s esc., u-vát-u ūc-úr (i. e. *u-uc-ur) beside uc-yá-tē uk-tá-s etc., on the analogy of iy-áy-a iy-úr beside ıy-ē 1-tás etc., vi-vyādh-a 11-vidh-ur beside vídh-ya-ti viddha-s etc., su-šváp-a su-šup-ur beside sup-ya- $t\bar{e}$ sup-tá-s etc.) On the other hand, ya-yām-a yēm-úr va-vas-ē (from vas- 'to clothe'), and other such remained simply because none of their forms had such beginnings as im- or us- Only here and there did u- transgress these prescribed limits as in u-vām-a (Satap.-Brāhm i instead of pa-vani-a from vam- vomere.

With this Sanskrit development compare Lat. sci-cul- $\bar{\imath}$ from scind \bar{o} as contrasted with ce-cid- $\bar{\imath}$ from cad \bar{o} , § 868

Remark. The reason why we have in Sanskrit vavr-ur and not *vor-ur, and vavn-us-nor 'vonus- (cp Avest vaonus-), as might have been expected from maghon-, the weak form of the stem maghavan- 'giver, offerer', was the analogical influence of forms whose ending began with a consonant, such as va-v7-má and va-van-má va-van-vas-, perhaps also that of by c-forms with a weak-grade root syllable which still remained

¹⁾ I hold accordingly that the favourite theory which sees pr. Idg. 1et'uplications i- u- or \underline{i}_2 - $\underline{u}u$ - in i- $y\dot{a}j$ -a u- $v\dot{a}c$ -a is incorrect. Observe turther, that the evidence offered by i- $y\ddot{a}j$ -a ij- \dot{e} and the like for the view that the $\bigvee yuj$ - began in Idg with \underline{i} - and not with the spirant j is only indirect (I § 598 p. 453)

a syllable by itself (op. ta-tan- \bar{c} i. e. *- $t\eta$ n- $a\bar{z}$ beside ta-tn- \bar{c} , t_1 - st_1 r- \bar{c} i. e. *- st_1 r- $a\bar{z}$). Thus va-vn- in this way depended upon va-van-; and, by a contrary application of the principle, $y\bar{c}m$ -i-vas- instead of *ya-yan-vas- (op. ja-gan-vas- from gan- 'to go') depended upon $y\bar{c}m$ -ur $y\bar{c}m$ - $u\bar{s}$ - (op. jaqm-i-vas- instead of jayan-vas-following jaym- $u\bar{s}$ -).

Hence afterwards arose $\bar{a}n$ -arc-a $\bar{a}n$ -gc-ur from arc- 'to shine, praise', $\bar{a}n$ -gdh-ur from ardh- 'to thrive', $\bar{a}n$ -gh-ur from arh- 'to earn'.

§ 852. Form of the Root Syllable.

The pr. Aryan distinction between Skr. 1st sing ja-ján-a with \ddot{a} , and 3^{rd} sing. ja-ján-a with \ddot{a} (§ 843 p. 384), was lost. Thus we have in later Sanskrit the 3^{rd} sing. form used for the 1st as well as 3^{rd} (still, jajána was not dropt altogether), and in Avestic the 1st singular form was used for both (e. g. va-vac-a beside the regular hi- $\dot{s}\dot{a}y$ -a).

In mitation of such forms as $sa-s\acute{a}d-a:s\~{e}d-\acute{u}r$ (for *sa-zd-ur) and $ya-y\acute{a}m-a:y\~{e}m-\acute{u}r$ (for *ia-ym-ur), arose the Skr. forms $s\~{e}h-ur$ (sah- 'to subdue'), $s\~{e}j-ur$ (saj- 'to hang, fasten'), $p\~{e}c-\acute{u}r$ (pac- to cook'), $s\~{e}c-\~{e}$ (sac- 'to be with, accompany', but also $sa-\acute{s}c-\~{e}$), $p\~{e}t-\acute{u}r$ (pat- 'to fly, fall', but also

The Avestic change was natural enough because tatašu (Skr. tatákša) had got in amongst roots with single final consonant.

Brugmann, Elements. IV

pa-pt-úr), nēm-ur (nam- 'to bow, bend'), tēn-é (tan- 'to stretch', but also ta-tn-é) This type recommended itself because it avoided certain awkward sounds which had developed in some roots, as was the case in Germanic with the type $q\bar{c}m$ - (§ 893) mēthur beside ma-mánth-a (manth- 'to shake, knead'), and bēdh-úr beside ba-bándh-a (bandh- 'to bind'), arose because the weak roots math- and badh- in mátha-ti badh-ná-ti etc (-a- = -a-) were conceived as being parallel to roots like sad- or yaj-, which also explains mamáth-a beside mamanth-a, mathišya-ti beside manthišya-ti and the like That a Perfect stem such as sēd- or yēm- was to the consciousness of the speaker nothing more than an ablaut-form of the unreduplicate root is shewn by forms with initial media aspirata like bhēj-ur (beside ba-bháj-a from bhaj- to distribute'), and those which begin with a double consonant as trēš-ur trēs-ur (beside ta--trās-a from tras- 'to tremble')

The strong singular stem seems often to have invaded forms proper to the weak stem. Skr tastambhur (but also tastabhúr) following tastámbha, cp § 850 p 397. babandhur following babándhu. μυγοριπά following μιιγόρα from yup- 'to obstruct'. vivēšur (but also vivišē) following vivēša from viš-'to enter' bibhēdur (but bibhidur also) following bibhēda from bhid- 'to split' vavāhatur (but ūhatur) following vavāha from vah-'vehere' nanāmu ē (but nēm-ur) following nānāma. šašāsur following $\dot{s}a\dot{s}\bar{a}sa$ (cp. aor. $\dot{a}-\dot{s}i\dot{s}-a-t$) from $\dot{s}\bar{a}s$ - 'to order' cp. pres. 3rd pl šás-ati beside opt šiš-yā-t dadāvás- (but dadvásdadıvás-) following dadāú from dā- 'to give' Avest. 3rd pl cikoiteres (but cikipwa) following *cikoita from cit- 'to observe' (§ 850 p 397) 2nd pl hamhāna following 3rd sing. *hamhāna from han- 'to give, earn' But we may see, from what has been said in § 848 pp 392 f on sa-sah-ē ša-šas-ur and sa--sāh-ē da-dāś-1-ma, that it is possible to hold that the germ of these consists of unreduplicated forms with a strong root (such as Skr. *stambh-ur) which received reduplication in Aryan

In Skr. 1st and 3rd sing. ta-sthūú da-dhāú pa-prāú etc, the origin of -āu is obscure. Now and then we meet with variants

 3^{rd} sing. $pa-pr\tilde{a}$ and Avest. 3^{rd} sing. $da-\bar{d}a.^1$) Some regard -u as a particle affixed to the perfect with final $-\bar{a}$, as $pa-pr\hat{a}+u$ == $pa-pr\bar{a}\hat{u}$; and others compare $ta-sth\bar{a}\hat{u}$ with $sth\bar{a}v-ira-sth\bar{a}v-ar\hat{a}-sth\bar{u}-r\hat{a}-$, or $pa-pr\bar{a}\hat{u}$ with Lat. $pl\bar{e}v-\bar{i}$, $ja-j\bar{n}\bar{a}\hat{u}$ with Lat. $n\bar{o}v-\bar{i}$. All these are thoroughly uncertain conjectures.

§ 853. As regards the -1- which precedes the personal ending in -1-tha -1-ma -1-va -1-šē -1-mahē -1-vahē, which is much commoner in the later language than it is in the Veda, the most essential facts have been pointed out in § 844, pages 385 f.

The same i is seen in the unreduplicated $t\dot{s}$ - \bar{c} (§ 848 p 391) $\cdot t\dot{s}$ - ι - $\dot{s}\bar{c}$ (beside $t\hat{k}$ - $\dot{s}\bar{c}$) $t\dot{s}$ - ι - $dhv\bar{c}$ like $j\alpha$ - $j\bar{n}$ - ι - $\dot{s}\dot{c}$ $j\alpha$ - $j\bar{n}$ -i- $dhv\bar{c}$. After what was said in § 574 p 115, it is not strange that beside $t\dot{s}$ - $t\bar{c}$ we find $t\dot{s}$ - ι - $t\bar{c}$ Compare however the pres. $t\dot{s}$ - $t\dot{s}$ - $t\dot{c}$ beside $t\dot{s}$ - $t\dot{c}$ - $t\dot{c}$ (like $t\dot{s}$ - $t\dot{c}$ -

§ 854. The so-called Pluperfect, and Thematic Forms of the Perfect Stem (cp. § 555 p 108, § 845 p. 387 f).

Thematic Pluperfect Skr. \acute{a} -ca-kr-a-t beside $ca-k\acute{a}r$ -a \acute{a} -da- $d\gamma h$ -a-nta beside da-darh-a (gramm.) from darh- 'to make firm'. $\ddot{a}n$ -ar \check{s} -a-t from $ar\check{s}$ - 'to stream', an analogous form is $\ddot{a}n$ -archa-t (beside perf. $\ddot{a}r$ -a $\ddot{a}r$ -ur) from pres. r-chá-t1 ar-cha-t1 'hits, attains, seizes' (cp § 850 p. 397). Avest. ja- γm -a-p beside Skr γa - $g\acute{a}m$ -a ta- $ta\check{s}$ -a-p beside 1st sing. ta- $ta\check{s}$ -a=

On the assumed Avest. dudo = Skr. dadhāú, see Bartholomae, Bezz. Beitr. IX 301.

Skr. ta-takš-a from takš-'to shape, form'. Compare Gr. $\hat{\epsilon}$ - $\mu \hat{\epsilon}$ - $\mu \eta \kappa$ -o- ν § 865

The Thematic Imperative, as Skr. 2nd dual $mu-m\delta c-a-tam$ 2^{nd} pl. $mu-m\delta c-a-ta$ (muc- 'to loose') 2^{nd} sing mid. $v\bar{a}-v\gamma dh$ -a-sva (vardh- 'to grow'), stood beside the Unthematic mu-muk-tam mu-mug-dhi, as in Greek e.g. $\kappa\varepsilon$ - $\kappa\varrho\check{\alpha}\gamma$ - ε - $\tau\varepsilon$ $\kappa\varepsilon$ - $\chi\check{\eta}\nu$ - ε - $\tau\varepsilon$ beside $\kappa\varepsilon$ - $-\chi\varrho\bar{\alpha}\chi$ - ϑ - ε ; and they were related to the Thematic Conjunctive Skr. mu- $m\delta c$ -a-t(i) Gr $\varepsilon\check{\iota}\delta$ - $-\mu\varepsilon\nu$ as, in the s-aorist, Skr. 2^{nd} sing. imper. $n\bar{e}$ - \check{s} -a to the conj. $n\check{e}$ - \check{s} -a-ti, Gr. 2^{nd} pl. imper. $\check{\alpha}$ - \check{s} - ε - $\tau\varepsilon$ to conj. (fut.) $\check{\alpha}$ - \check{s} - ε - $\tau\varepsilon$ (§ 833 p. 370).

The forms Skr. $\bar{\imath}\dot{s}$ -a- $t\bar{e}$ Avest. $\bar{\imath}s$ -a- $it\bar{e}$ beside $\bar{\imath}\dot{s}$ - \bar{e} $\bar{\imath}s$ - \bar{e} 'has brought into his power' doubtless first arose because the latter had ceased to be looked upon as belonging to the Perfect. Thus they are classed along with Presents like Skr. han-a-ti Avest. janaiti beside han-ti jainti (§ 498 p 58). Compare § 888 on Goth. aihan aihands

Armenian.

§ 855. The old Perfect inflexion seems to be wholly lost. gitem 'I know' may have been transformed from * μoid -a in the same way as Lesb. $oid\eta\mu u$ from oida; but it may also be regarded as a present of Class II A (§ 517 Rem. p. 82). For another even more uncertain trace of the Perfect in Armenian, see Meillet, Mém. Soc Ling. VII 164

Greek.

§ 856. We begin with a few examples in addition to those given in § 846.

έ-σπαρ-ται from σπείριν 'I sow'. έ-ολ-ε ἔ-ελ-ται from εἴλω 'I press' \checkmark Fελ- (§ 848 p. 392). ἔ-στολ-ε (gramm.) ἔ-σταλ-ται from στέλλω 'I place, ordain'. δέ-δρομ-ε beside ἔ-δραμ-ο-ν 'I ran'. Hom. δείδιν 1 e. *δέδFω 'I fear' for *δε-δFο_κ-α, δείδια i. e. *δέ-δFι-α, δείδιαν 1. e. *δέ-δFι-μεν, δειδιότ-ες 1. e. *δέ-δFι-ότ-ες (I § 166 p. 147), Att. δέ-δι-μεν δέ-δι-θι δε-δι-ώς δε-δι-έναι.

κέ-κρι-ται from κρίνω 'I separate, choose, decide' (§ 611 p. 150). πέ-πορδ-ε from πέρδομαι 'pedo'. πέ-φασ-ται from φοάζω 'I give to understand, show', \(\sigma\) aherd-: Lith. part. isz-gird-ēs from isz-girstù 'I perceive' (§ 707 p. 236, § 686 pp. 216 f.). τέ-τροφ-ε τέ-τραφ-ε τέ-τραπ-ται from τρέπω 'I turn'. ε-ολπ-ε from ελπομαι 'I hope', Fελπ- π έ-πονθ-ε π επαθ-νῖα beside fut. $\pi \epsilon i \sigma o \mu \alpha \iota$ for " $\pi \epsilon \nu \vartheta + \sigma$ -, pres. $\pi \dot{\sigma} \sigma \chi \omega$ 'I suffer' (§ 673) p. 205). $\dot{\epsilon}$ -oix- ϵ is like ϵ -ix-tov $\ddot{\eta}$ -ix-to $\ddot{\epsilon}$ -oiy- $\mu\epsilon\nu$ $\dot{\epsilon}$ -oly- α - $\mu\epsilon\nu$ εἰκ-ώς ἰ-οιν-ώς, $\sqrt{f_{είκ}}$. $\pi \acute{\epsilon}$ -ποίθ-ε $\acute{\epsilon}$ -πέ-πιθ-μεν $\pi \acute{\epsilon}$ -ποίθ-α-μεν πέ-πεισται from πείθω 'I persuade'. τε-τευχ-ώς τέ-τυν-ται τε-τεύχ-αται from τεύχω 'I prepare'. νέ-χοδ-ε from χέζω 'caco'. τέ-τον-ε beside ε-τεν-ο-ν 'I begat, bore'. έ-ρρωγ-ε έ-ρρηγ-εία from δήγ-νι-μι '1 break', Γρηγ-. λέ-λην-ε λε-ληγ-ώς $(-\eta$ - for $-\bar{\alpha}$ -) λε-λαγ-νῖα beside ε-λαγ-ο-ν 'I spoke'. μ ε- μ ην-ως $(-\eta$ - for $-\bar{\alpha}$ -) μ ε- $\mu\alpha$ /- ν iα beside μ ακών 'bleating, crying'. λ έ--λαμπ-ε from λάμπω 'I shine'

Forms with so-called Attic Reduplication. Hom. $\epsilon i\lambda \dot{\eta}\lambda o v \vartheta a$ $\epsilon i\lambda \dot{\eta}\lambda o v \vartheta \mu \varepsilon v$ Att. $\epsilon \lambda \eta \lambda v \vartheta a$ $\epsilon \lambda \eta \lambda \dot{v} \vartheta a \mu \varepsilon v$ beside $\epsilon \lambda \varepsilon \dot{v} \sigma o \mu a u$ 'I will come' aor. $\ddot{\eta}\lambda v \vartheta \sigma v$, $\dot{\epsilon}\lambda \dot{\epsilon} v \vartheta - .$ Ion. $\dot{a}\rho - \eta \rho - \varepsilon$ $\ddot{a}\rho \eta \rho \dot{\omega} c$ $\dot{a}\rho - a\rho - v \dot{a}\rho$ beside $\dot{\eta}\rho - a\rho - v \dot{a}\rho - u$ 'I joined'.

- § 867. Numerous Perfect forms based upon Roots extended in some way, and upon Presents of all sorts and kinds. Compare § 847 pp. 391 f.
- (1) $\delta \acute{\epsilon} \delta \rho \ddot{\alpha} \tau \alpha \iota$ from $\delta \rho \ddot{\alpha}$ to do'. $\varkappa \acute{\epsilon} \varkappa \rho \ddot{\alpha} \tau \alpha \iota$ from $\varkappa \rho \ddot{\alpha}$ to mix'. $\tau \epsilon \tau \lambda \eta \omega \varsigma$ from $\tau \lambda \ddot{\alpha}$ to bear'. $\varkappa \epsilon \varkappa \mu \eta \omega \varsigma$ from $\varkappa \mu \ddot{\alpha}$ to weary'. $\tau \acute{\epsilon} \tau \mu \eta \tau \alpha \iota$ from $\tau \mu \ddot{\alpha}$ to cut'. $\tau \acute{\epsilon} \tau \rho \eta \tau \alpha \iota$ from $\tau \rho \eta$ to wear away, pierce'. $\varkappa \acute{\epsilon} \varkappa \lambda \eta \tau \alpha \iota$ from $\varkappa \lambda \eta$ to call'. $\varkappa \acute{\epsilon} \varkappa \rho \eta \tau \alpha \iota$ from $\chi \rho \eta$ to lend, borrow'. $\tau \epsilon \tau \iota \eta \omega \varsigma$ $\tau \epsilon \tau \iota \eta \tau \alpha \iota$ from $\tau \iota \eta$ to be still, overawed' Idg. $q i \rlap/{\epsilon} \ddot{\epsilon}$, see § 590 p. 132. $\varkappa \epsilon \varkappa \alpha \rho \eta \omega \varsigma$ $\varkappa \epsilon \varkappa \alpha \rho \eta \omega \varsigma$ breathing hard'. $\delta \epsilon \delta \acute{\epsilon} \eta \tau \alpha \iota$ from $\delta \acute{\epsilon} \omega$ Hom. Aeol. $\delta \epsilon \acute{\nu} \omega$ 'I need'. $\varkappa \epsilon \varkappa \epsilon \mu \eta \tau \alpha \iota$

- from νέμω 'I distribute'. βε-βούλη-ται from βούλομαι 'I wish' for *βολνο-μαι. τε-τύπτη-ται from τίπ-τω 'I strike'. Compare § 750. 1 p. 271. § 756. 4 pp. 275 f., § 822. 5 p. 360.
- (2) Along with these go Perfects from later denominatives, as Hom. ε-εστη-ώς, Boeot. gen pl fε-f̄ικονομειόντων (Att. ψκονομηνότων. ep § 866), τε-τίτη-ται (-η- = -ᾱ-), πε-φίλη-ται, με-ιάσθω-ται, εε-γόνῖ-ται, όε-δά/οῖ-ται ('ompare § 756.5 p 276. § 773 pp. 290 f., § 813 p. 351, § 822.6 p. 360.
- (3) $d\varepsilon$ -δίδαχ- ε $d\varepsilon$ -δίδαν- τ αι $d\varepsilon$ -δίδαγ- ι αι beside δι-δάσκω 'I teach' (§ 678 p. 210), ep. aoι ε -δίδαξο
- (4) πέ-φην-ε (Dor. πέ- $q\bar{\alpha}$ ι-τ) πέ- $q\alpha$ ν-ται from φαίνω 'I make appear, show' for * $q\alpha$ -νl-ω /τ-/ην-ε (Dor νέ- $\chi\bar{\alpha}$ ν-ε) from χ αίνω 'I gape' for * $\chi\alpha$ -νl-ω. ε-ξαν-ται εξαμμαι from ξ-αίνω 'I scratch, comb'. On the forms πέ $q\alpha$ πμαι εξασμαι (= εξαμμαι), see § 862. πl00-βέl60νλε beside l60νλοιιαι (see under 1). Compare § 822. 2 p. 359.
- (5) Nasal Infix ε΄-Λαγγ-ε, also ε΄-Ληγ-ε, beside κλαγγάνω and κλαζω (for */λαγγ-ιω) 'I make a sound, cry out'. The verb κανδάνω 'I have room for' (\sqrt{ghed} -, § 631 p. 168) perhaps had both ε΄-κανδ-ε and ε΄-κονδ-ε (like λέλογκε from λαγκάνω) for its perfect; see Mekler, Beitr zur Bildung des griech. Verbums, 60 f.; Wackernagel, Berl Phil. Wochenschr 1891, col. 1475 f. Aeol. part. πε-φύγγ-ων (Att πε-φευγ-ώς) from φυγγάνω 'I flee' ε΄-σφιγκ-ται 1st sing. ἐσφιγμαι (-γμ- for -ωgm-, I § 492 p 363) from σφίγγω 'I tie'. Compare § 822 3 p. 359.
- (6) ἔ-σπα-σ-ται, νέ-νλα-σ-ται, κε-νέρασ-ται, έ-σκέδασ-ται, έ-σβ-εσ-ται, νε-κόρεσ-ται, ε-ξυ-σ-ται, εἴρυσ-ται See \S 661 p 196 \S 842 pp 380 f
- (7) Syrac. πέποσχε instead of πέπουθε from πάσχω (§ 673
 p. 205). Compare Skr. papracha Lat. poposcī from V prek-.
- (8) κατα-πέπυθα κατερούηκα Hesych., beside πύ-θω 'I make to rot'. βέ-βρτθ-ε from βρί-θω 'I weigh down'. Compare § 694 p 223. πέ-φλοιδ-ε beside έ-φλι-δ-εν' διέρρεεν. δια-κεχλοιδώς and δια-κεχλοιδώς beside χλίω 'I am weakly'. 3rd pl. έ-ρράδ-αται from φαίνω 'I sprinkle' for *σρ-ανιω (§ 621 p. 159). Compare § 695 p. 224.

- (9) Hom. πεφυζότες from *φύζω for *φυγ-μω (§ 707
 p. 286).
- § 858 The Reduplication with ε in roots with initial consonant has been more taithfully kept in Greek than in any other language. The vitality of this type can be best seen in its use with denominative forms like πε-φίλανται δε-δυστύχηνε, τε-θαλασσονράτηνε, Βοεοτ Γε-Γτονομικόντων

Remark On the analogy of compounds like λμ-πεποίηκε were made others such as ἐν-δεδί,μηκε ἀπο-δεδί,μηνε instead of *ζνδημηκε *ίποδήμηκε from ει-δημο-ε ἀπό-δημο-ε The gloup was further enlarged by θεο-πεποίηκε εἰδο-πεποίηκαι ἰπτο-τετροφηκε and many other like them

On the treatment of the initial consonant or consonants of the reduplicator, see §§ 475 f pp 20 ff

Verbs with initial vowel were treated in two ways, as in Sanskrit:

(1) By lengthening the initial vowel 2nd sing ησ-θα from \sqrt{es} - 'to be' (cp. Skr άs-i-tha), which form came afterwards to be used as imperfect because ηα ηπεν ήστε ηστον belonged to both; ησικε from ερίζω 'I strive'. ηχ-ε ηγ-μωι (η = α) from άνω 'I lead'. Skr. αj-α O.Icel. δk- (here comes ἄν-ωγ-ε from ἀν-άγω according to Danielsson, Nord. tidskr. f. filol., ny række, vii 138 ff.); ηση-τωι from ἀσκίω 'I practice'; ησχ-ε ησγ-μωι from άσχω 'I begin', ημφίεσ-τωι from ἀπφι-έσ-σωι 'to draw on, clothe'. ωγνω-τωι from ὀγκέω 'I grow big, swell up'. This perfect formation has been treated in

§ 848 p. 393 f.; it is very doubtful whether it ever had any reduplication.

(2) By the "Attic Reduplication", which corresponds to the structure of Skr. ān-á\$-a (\$ 851 p. 401). This flourished considerably at the expense of the last named (1). Ed-nda's Skr. ád-a; ὄρ-ωρ-ε Skr. ár-a, οδ-ωδ-ε Lith. ů'd-ēs Att δμ--ιόμο-ται (and ομ-ώμο-σ-ται) from ομ-ντ-ιιι 'I swear' Hesiod has 20-holoral from 201500 'I strive', but hours above Perhaps Hom. Enoda 'eras' and Env Hyr, as contrasted with Hode Her Hr (§ 502 p. 65 f), was based upon a form *2\sigma-\eta\sigma-; ep. § 583 p. 124, and the Author, Gr Gr 2 p 164, Bartholomae, Stud. z. idg. Spr. II 118 f. Ion an-an-angertae and an-ang-son-tae from αν-αιοέω 'I raise up on high', but αν-η'οη-ται. Hom. δο--ωρέχ-αται from ὀρέγω 'I stretch out', but ιὂρεγ-μαι, from Vreg- (O.Ir perf. re-raig 'porrexit') On the analogy of ελ-ήλυθ-ε · ελυθεῖν, the form έν-εγν-εῖν 'to bring', which already had the Attic reduplication (cp Skr. ān-ás-a), formed a perfect έν-ήνεγν-ται, which next called into being the act. έν-ήνοχε beside rat-ήνοχε (§ 846 p 390), έν- in έν-ήνεγγ-ται and έν-ήνοχε must then be the preposition ir, which I see in the agrist έν-εικα (§ 504 p 68), if so, έν-ήνεγκ-ται must be compared directly with Skr an-ás-a Ion. ορ-οίοηκ-ε (Herodas) beside ξόρακε ξώρακε from όράω 'I see' for *Foρα-, late Attic ελ-ηλιγ--μένο-ς beside είλι/-ται from έλίσσω 'I wind' for *Fελιγ-. '

§ 859. The original differences of root-gradation in the group of Perfect forms transmitted from the parent language were very largely wiped out by analogy

First, the vowel-grade of the indic active invaded other forms; as γεγόν-α-μεν γεγον-ώς, έφθόρ-α-μεν έφθορ-ώς, πεπόνθ-α-μεν, τετρόφ-α-μεν, ἔοιγ-μεν ἐοίκ-α-μεν, πεποίθ-α-μεν conj. Hom πεποίθ-ο-μεν Att πεποίθ-ω-μεν, ελλήλουθ-μεν ελληλουθ-ώς, ἐρρώγ-α-μεν, ἀφ-έω-ται

Next, the weak form sometimes became the type; as $\partial \dot{\epsilon} \partial \iota - \alpha$, $\tau \dot{\epsilon} \tau \varrho \alpha \varphi - u$, $\dot{\epsilon} \lambda \dot{\gamma} \lambda v \vartheta - \alpha$.

Thirdly, s is often found where it originally was not, as

πέφενγ-ε πεφεύγ-α-μεν, πέ-πλεχ-ε, λέ-λεγ-ε; particularly often in the Middle, as πέπλεχ-ται πέπεισ-ται. The original place of this ablaut-grade was in the perfect Conjunctive, sometimes in the Participle active (II § 136 p. 438 f), and also, according to the hypothesis of De Saussure and Osthoff, the 1st sing Indic. active (§ 843 Rem. p. 384) Again, ε-ελ-ται and like forms may be based upon the unreduplicated (κατα-) Εελμένο-ς; see § 848. 2 with Rem 1, pages 392 and 393 Lastly, non-perfect verbal forms with ε may have had a hand in it; thus φεύγω may have influenced πέφενγε, or πείθομαι πέπεισται

The \bar{e} -grade seen in ().Ir. $m\bar{\iota}d$ -ar Goth. $s\bar{e}t$ -um Lith. $s\dot{e}d$ - $\bar{e}s$ etc. (§ 848.3 p. 393), has been conjectured for Gr. $\bar{\eta}\sigma\tau\omega$ 'sits', whose aspirate is odd as contrasted with Skr $\dot{a}s$ - $t\bar{e}$. It is quite possible that, in Greek, middle forms of ' $s\bar{e}d$ - were confused with the verb * $\bar{e}s$ -. Compare pres. Lith $s\dot{e}d$ -m § 494 p. 54.

§ 860. On the $-\alpha$ - of $\tau \in \tau = 0$, on Dor. $\gamma \in \gamma = 0$ and part. $\tau \in \tau = 0$ see § 844 pp. 385 f.

The 3rd pl. ἐστᾶσι 'they stand' is contracted for *ἐ-στά-σσι, which had taken the place of a previous *ἔστᾶσι. So also Ερ. γεγάᾶσι μεμάσσι βεβάᾶσι Att. βεβᾶσι See § 1021. 4.

§ 861 Aspirated Perfects like δέδειχε (√ δεικ-) πέ-πλεχε (πλεκ-) κεκήρυχε (κηρυκ-) τέτροφε τετράφαται (τοεπ-) νέκλοφε

(κλεπ-) ηχε (άγ-) λέλεχε (λεγ-) ὁρωρέχαται (ὁρεγ-) τέτρησε τετρίφαται (τρῖβ-) have borrowed the aspirate, and put it in place of media or tenuis, from perfect stems which properly ended in an aspirate, such as γέγραψε γεγράφαται and τετεύχαται. The cause of this change was that in some perfect forms and in forms outside the perfect, these phonetic differences disappeared, and the aspirate was no longer distinguished from the tenuis or media. Thus τέτραμμαι τέτραψαι etc. and έτρεψα τρέψω looked exactly like γέγραμμαι γέγραψαι etc. and έγραψα γράψω, hence the analogy of γεγράφαμεν gives rise to τετράφαμεν instead of *τετραπαίεν Compare Osthoff, Perf. 284 ff., 614 ff. Curtius, Zur Kritik der neuesten Sprachforschung, 58 ff

§ 862. Perfects from verbal stems in s generally show in the middle the endings -σμαι -σμεθα -σμενος, as εζεσμαι εξωσμαι ηκοισμαι οεσεισμαι εσβεσμαι τετέλεσμαι εσπασμαι κεκέρασμαι, thus traversing the law laid down in vol I 565 § p. 422, by which we should expect forms without σ, and with a lengthening of the preceding vowel when this was short. There are some of these regular forms, as εξωμαι (\sqrt{j} σε-) είγενμαι (\sqrt{g} εμε-) είγενμανος (\sqrt{e} με-) But the other set are a re-formation on the model of those with -στ-, as εζεσμαν instead of *εζειμαν following εζεσταν, εζωσμαν following εζωσταν On the contrary, εζωμαν and γέγενμαν suggested εζωταν instead of εζωσταν, εγέγενντο instead of *γγεγε(νσ)-ατο

Similarly, in the Middle Voice of Perfects from Verbalstems in 9 and δ the σ of -σται spread into the forms in -μαι
-μεθα -μενος, as λιλασμαι following λίλασται (act. λίληθε),
πίπνσμαι following πίπνσται (pres πεύθομαι) πέπεισμαι following
πέπεισται (pres. πείθω), ιενάσμεθα following ιέκασται (ναδ-),
πέφρασμαι following πίφασται (aor πέφραδον). Forms like Hom.
εκορυθμένος πεφραδμένος Pind. κεναθμένος are regular. Similarly,
Att. ἴσμεν (Hom. ἰδ-μεν) may be regarded as a re-formate
following ἴστε; but it may also follow the pret. ἦσμεν i. e
η--Γιτ-σ-μεν just as ἴσασι follows ἴσαν ἦσαν (§ 863 p 411).

The agreement of forms like $\sigma \epsilon l \sigma \omega$ $\epsilon \sigma \epsilon \iota \sigma \omega$ (for $\epsilon \sigma \epsilon \iota \sigma \sigma \omega$) $\epsilon l \epsilon \iota \sigma \omega$ $\epsilon l \epsilon \iota \sigma \omega$ $\epsilon l \epsilon \iota \sigma \omega$ (for $\epsilon l \epsilon l \epsilon \omega$) with such forms as $\epsilon \iota \ell l - \sigma \omega$ $\epsilon l \epsilon \iota \sigma \omega$ ($\epsilon l \epsilon l \epsilon \omega$) had this result, that the endings $-\sigma \iota \omega$ $-\sigma \iota \omega \omega$ etc. spread from $\sigma \epsilon \sigma \epsilon \iota \sigma \iota \omega$ $-\sigma \iota \omega \omega$ $\epsilon l \epsilon l \epsilon \omega$ which ended in a vowel: $\epsilon l \epsilon l \epsilon \omega$ $-\sigma \iota \omega \omega$, $\epsilon l \epsilon l \epsilon \omega$ instead of $\epsilon l \epsilon l \epsilon \omega$ $\epsilon l \epsilon l \epsilon \omega$ and $\epsilon l \epsilon l \epsilon l \epsilon \omega$. The same cause gave rise to $\epsilon l \epsilon l \epsilon l \epsilon \omega$ of these forms from verb stems with final vowel may have originated from the $\epsilon l \epsilon l \epsilon l \epsilon \omega$ sing. mid. in $-\sigma l \epsilon l \epsilon l \epsilon \omega$ $\epsilon l \epsilon l \epsilon l \epsilon l \epsilon l \epsilon \omega$ (Wackernagel, Kuhn's Zeitschr. xxx 312, Henry, Précis de gramm. comp. $\epsilon l \epsilon l \epsilon l \epsilon l$ $\epsilon l \epsilon l \epsilon l$ $\epsilon l \epsilon l \epsilon l$ $\epsilon l \epsilon$

Lastly, we must place here forms from v-stems such as πέφασμαι beside πέφαν-ται (φαίνω 'I show'), σεσήμασμαι beside σεσήμαν-ται (σημαίνω 'I make a signal'); but we also find εξαμμαι for *ε-ξαν-μαι (ξαίνω 'I scratch, comb'), ἤσχυμμαι for *ἤσχυν-μαι (μἰσχύνω 'I disgrace'), and others. We may conjecture that first *πεφαν-σθε *σεσᾶμαν-σθε became regularly *πεφασθε *σεσᾶμασθε, and then, since these looked like έσπασθε κεκέφασθε, the forms πέφασμαι σεσήμασμαι were made to match ἐσπασμαι νεκέφασμαι; on the other hand, πέφανται produced the form πέφανθε.

§ 863. The 3rd pl of οίδε ἴδμεν was in Homer ἴσσᾶσι (Att. ἴσᾶσι Dor. ἴσαντι by vol. I § 563. 2 p. 419), an ad-formate of the s-aorist *ἴσσαν ἴσαν, augmented ἢσαν (§ 812 p. 349, § 821 p. 358). The formation of ἴσσᾶσι was due to ἴστε ἴστον beside ἢστε ἦστον. Compare § 862, on Att. ἴσμεν.

ἴσαντι, associated with τσταντι 'they place', caused the Doric dialect to make the further forms ἴσᾶμι ἴσαμεν ἰσάμεναι etc. following τσταιι and the rest.

In Heraclean, this σ went on to the middle of the perfect: γεγράψαται. Then, on the strength of the relation of γεγράψαται to ἐγράψαντο, we get *μεμισθώσανται beside ἐμισθώσαντο — the conj. μεμισθώσωνται is found.

§ 864. There can be no doubt that the x-perfect, as Forther, existed in all its important features as early as proethnic Greek, although it only become a large group in Greek itself As to the origin of the formation very diverse theories have been set forth, they are collected and criticised by Johansson, Beitr. zur gi Sprachkunde. pp 56 ff. (compare Per Persson, Wurzelerw., 209 f.)

Remark The explanation which has most in its favour is the following. > is called a Root-Determinative, which came from the parent language into Greek in a few verbs, and then it became a fertile perfect suffix in pr Greek just as s became a fertile aorist suffix in the original language. It was not confined to the perfect any more than s was confined to the aorist: we have for instance aor $\xi \partial_{\tau \times \alpha}$ as well as perf. $\tau \not= \partial_{\tau \times \alpha}$, aor $\not= \partial_{\alpha \times \alpha}$ as will as perf $\partial_{\alpha \times \alpha}$, $\partial_{\alpha \times \alpha}$ as well as $\partial_{\alpha \times \alpha}$, $\partial_{\alpha \times \alpha}$ as well as $\partial_{\alpha \times \alpha}$, $\partial_{\alpha \times \alpha}$ as well as $\partial_{\alpha \times \alpha}$, $\partial_{\alpha \times \alpha}$ as well as $\partial_{\alpha \times \alpha}$, $\partial_{\alpha \times \alpha}$ as well as $\partial_{\alpha \times \alpha}$, $\partial_{\alpha \times \alpha}$ as well as $\partial_{\alpha \times \alpha}$, $\partial_{\alpha \times \alpha}$ as well as $\partial_{\alpha \times \alpha}$, $\partial_{\alpha \times \alpha}$.

Beside the above named perfect forms with the root-suffixes -ā- and -ē- -ō-, were formed others, such as πεχάρηκε γεγάμηκε ηθέληνε δεδείπνηνε μεμίσθωνε τετίμακε δεδάνουκε. Compare νελαφηρός νενοτημός νενέμηται πεφίληται etc., § 857.1 and 2, p. 405 f.

Again, the relation of έστηνα to στήσω έστησα, of δέδο ακα to δο άσω εδο απα, produced perfects like πέπεινα beside πείσω έπεισα (πείθω 'I advise'), πέφο ανα beside φο άσω εφρασα (φράζω 'I give to understand, show' for *φραδ-μω), γεγύμνακα beside γυμνάσω εγύμνασα (γυμνάζω 'I exercise), ή ομονα beside άρμόσω ή ομοσα (άρμόζω 'I fit, join'), εσπεινα beside σπείσω εσπασα (σπάω 'Τ pour'), εσπανα beside σπάσω εσπασα (σπάω 'Ι pull' for *σπα-σ-ω).

By analogy of the perfect middle (cp δέδο αται: δέδο ακα) arose e. g. Phoc τέθεκα (instead of τέθηκα) following τέθεται,

Att. είνα (*εενα) following είναι (*εεναι), δέθενα following δέθενοι, έφθαρκα following εφθαργαι, κέκλικα following πέκλικαι, ηγγελνα following ήγγελναι. Vice versa, mid Dor. άφ-έωναι follows εωκα (§ 859 p. 408).

Following είκα είται, the forms τέθηκα τέθεμαι were changed in late Attic to τέθεικα τέθειται.

Following ξστάκα: ξστάμεν we get γέγάκα (Pind.) beside γέγαμεν (*ĝe-ĝų-); vice versa ἠρίσταμεν (Comedy) beside ἠρίστηκα (ἀριστάω 'I breakfast').

- § 865. For the Pluperfect Greek, like Sanskrit, at first had two formations, thematic and unthematic (cp. § 555 p. 108, § 845 p 387, § 854 p 403)
- (1) The Unthematic type is found in the Active only for Plural and Dual, e.g. ε-πέ-πιθ-μεν γε-γά-την ε-στα-μεν; the 3rd pl. ends in -σαν, e.g. ε-στα-σαν μέ-μα-σαν εδείδισαν i.e. *ε-δέ-δει-σαν (§ 1021.2) Far oftener, and found in all three numbers, this occurs in the Middle, as τε-τύγ-μην ε-τέ-ταχ-το βε-βλή-ατο κε-χόλισ-σο. Compare Skr 1st and 3rd sing. ά-jα-gan.
- (2) Thematic Forms are e. g ε-μέ-μηκ-ο-ν (but με-μηκ-ώς), ε-πέ-πληγ-ο-ν (but πέ-πληγ-α), αν-ωγ-ο-ν (but αν-ωγα), δείδιε i. e. *δέ-δ-Γ-ε (but perf. δέ-δι-μεν), with κ, ε-πέ-φῦκ-ο-ν (but πέ-φῦ-κα). Compare Skr. ά-ca-kr-a-t Sometimes it is doubtful whether a form comes here or in the VIth Present Class (§ 563 p. 111); as λε-λα^{*}-ο-ντο (cp. λέληκα λελακνῖα and ἔ-λακ-ο-ν).
- (3) To these formations are added all which are based upon an original s-aorist (a) On the one hand, the forms $\eta \delta \epsilon a$ and $i \sigma a r \sqrt{\sigma} a v (\sqrt{\sigma} \mu \epsilon r) \sqrt{\sigma} \epsilon s$, (b) on the other, those in which the Aorist ending was affixt to the Perfect stem, as $\pi \epsilon \pi o \theta \epsilon u$ $\pi \epsilon \pi o \theta \epsilon u$ $\theta \epsilon v$ beside $\pi \epsilon \pi o \theta \epsilon v$ and $\theta \epsilon v$ beside $\theta \epsilon v$ beside $\theta \epsilon v$ and $\theta \epsilon v$ beside $\theta \epsilon v$
- § 866 Like the thematic pluperfect $\hat{\epsilon}-\mu\hat{\epsilon}-\mu\eta\kappa-\sigma-\nu$ etc., mentioned in § 865. 2, the thematic imperative $\kappa\epsilon-\kappa\rho\hat{\alpha}\gamma-\epsilon-\tau\epsilon$ and so forth belong to the parent speech; cp. Skr. $mu-m\delta c-a-ta$, § 844 p 404

But thematic forms occur more or less in all other formations of the Greek perfect system. Indicative Hom.

μέ-μβλ-ε-ται 'it is dear' beside μέλ-ει (which may also belong to Present Class VI, § 563 p. 111), $\delta \varrho - \omega' \varrho - \varepsilon - \tau \alpha \iota$ 'is aroused' beside $\delta \varrho - \omega \varrho - \alpha$, $\alpha \nu - \omega' \gamma \omega$ beside $\alpha \nu - \omega \gamma \alpha$, Syrac. $\delta \lambda \alpha' \lambda - \omega$ beside Att. $\delta \lambda - \omega \lambda - \alpha$. And again, $\eta \times \omega$ 'I am here' may have taken the place of a perfect * $\eta \times \alpha$; the last essay to explain the etymology of this verb is by Johansson, Beitr. gr. Sprachk., 62 f., who would connect it with a root $\varrho - \bar{\ell} - \bar{\ell}$ 'to go'. Conj Hom. $\alpha \varrho - \eta \varrho - \eta \bar{\ell} - \bar{\ell}$ Att. $\beta \varepsilon - \beta \lambda \dot{\eta} \times - \eta \bar{\ell} - \bar{$

Italic.

- § 867. The "Perfect" of Latin and Umbro-Samnitic is a mixture of elements very widely different. Ten distinct types contribute to make it up.
- (1) Genume Reduplicated Perfects like Lat. tu-tud- $\bar{\imath}$ = Skr. tu-tud- \dot{e} , de-d- $\bar{\imath}$ = Skr. da-d- \dot{e} (§ 1044). In § 846 we have compared with perfect forms of other Idg. languages these others: peper $\bar{\imath}$, tetul $\bar{\imath}$, memin $\bar{\imath}$ mement \bar{o} , tetin $\bar{\imath}$, memord $\bar{\imath}$ momord $\bar{\imath}$, crēdid $\bar{\imath}$, bib $\bar{\imath}$, stet $\bar{\imath}$, scicid $\bar{\imath}$, cecin $\bar{\imath}$, pepig $\bar{\imath}$; to which add Umbr. dersicust.
- (2) Probable Unreduplicated Perfect forms. First $l\bar{e}g-\bar{\imath}$ $v\bar{e}n-\bar{\imath}$ and the like, with possibly $\bar{e}d-\bar{\imath}$, cp. § 848.3 p. 393. Next $scand-\bar{\imath}$, $vort-\bar{\imath}$ $vert-\bar{\imath}$ Umbr co-vortus 'converterit', $sc\bar{a}b-\bar{\imath}$, $\bar{o}d-\bar{\imath}$, cp. § 848.1, 2 and 4, pp. 391, 392, 394.
- (3) Forms of the s-Aorist, both thematic and non-thematic, as $d\bar{\imath}x-\bar{\imath}$ $d\bar{\imath}x-\imath-t$ $d\bar{\imath}x-\imath-mus$, cp. Gr. $\acute{\epsilon}-\delta\epsilon\imath\xi-\alpha$ Skr. $\acute{\alpha}-d\imath k\xi-a-t$. See § 823 p. 360 f.
- (4) Forms of the non-thematic is-Aorist, as vīdis-tis (vīdis-tī) vīder-ō vīder-i-m, cp. Skr. á-vēdiš-am Gr. η δεα. See § 841 pp. 378 ff.
- (5) Thematic Aorists of Class II. Lat. fu-i-t fu-i-mus, Osc. fuid 'fuerit': Skr. á-bhuv-a-t. Lat. scid-i-t: Skr. á-chid-a-t. fid-i-t: Skr. á-bhid-a-t. ex-uit for *-uy-e-t (Class II B) or

- *-ey-e-t (Class II A). Osc. dic-ust 'dixerit' beside *dic-e-d 'dixit': Skr. imperf. á-dis-a-t. Osc. kúm-bened 'convēnit' ce-bnust 'hue venerit' 1): Skr. á-gam-a-t Avest. \(\gamma \bar{p}, \subseteq \gamma \bar{p}, \subset
- (6) Possibly amongst forms like *lēg-i-t lēg-i-mus* (√ *leg-*) were some like Gr. *i-μήδ-ε-το* (√ *med-*) Skr ά-sūh-u-t (√ seĝh-). See § 841 Rem. p 378

To these must be added (8) the Latin perfect in $-v\bar{\imath}$ and $-u\bar{\imath}$, (9) the Umbr.-Samn perfect with f, and (10) the t-perfect of Oscan, Pelignian, and Volscian, see §§ 873 ff

This fusion of the forms of Aorist and Perfect implies that the Idg. Perfect had become a historic tense as early as proethnic Italic

- 1) Conway (Amer Journ Phil, xi 308) defends the old view of cebnust as a reduplicated form
- 2) The Umbr.-Osc ending -e-d is odd as compared with forms like first, where the short vowel of the last syllable is syncopated (I § 633 p 474) Whether the law of syncopation allowed certain exceptions in the case of a final dental (say, depending on what the preceding syllable was, or the accent), or whether -e- in this -e-d is due to some analogy, I do not here discuss.

Of the endings of the perfect indicative, these belonged to the perfect in Idg. Lat. -7 in the 1st sing = Skr. -7, -t7 which fused with the aorist element -is- made the 2nd sing. (. Skr. -tha § 988.3), and -imus in tutud-imus vēn-imus may be equated with Skr. -i-ma, Avest. -ama Gr. -auev Goth. -um (ste-ti-mus = Gr. \(\frac{\pma}{\pma} \) \(\f

The precise way by which this fusion of different endings came about is not clear, nor will it be made clear so long as the 3rd singular and 3rd plural are the only endings we know in Umbro-Samnitic dialects (as to Osc. manafum, see § 874). Thus much only seems certain, that as early as proethnic Italic some thematic forms had joined on to the old perfect system, cp. Lat. de-d-i-t Osc de-d-e-d beside Lat. de-d-i, pe-pig-i-t beside pe-pig-ī.

Beside -e-d = Idg -e-t, Latin has also $-\bar{\imath}d$ $-\bar{\imath}t$, on inscriptions $-e\imath t$, as funest reduct. Since interveists also occurs on inscriptions, the simplest explanation is that the $\bar{\imath}$ came from the 1^{st} sing, which had $-\bar{\imath}$.

Remark Bartholomae (Stud idg Spr., ii 195) derives fuit from Idg. *bhey-i-t or *bhuy-ck-t, which seems to me very far-fetcht I identify fuit with Skr á-bhuz-a-t (Osc. conj. fuid for *bhuy-ë-t § 872), and I regard für (Ennius has fürmus) as a re-formate like plüi (cp. Osthoff, Perf. 254 f.).

§ 868. The Idg. e of the reduplicating syllable seems to have been kept without change in proethnic Italic. Compare O.Lat vhe-vhaked 'fecit' Osc. fe-facid 'fecerit', Lat. de-dī Osc. de-ded Umbr ře-ře, Lat. me-mordī pe-pugī ste-tī, Umbr. de-rsicust 'dixerit' pe-purkurent 'poposcerint, rogaverint'.

But Latin, if the vowel of the syllable which followed the reduplicator was the same as that of its present stem, assimilated this e to it; as mo-mordī: mordeō, cu-currī: currō, pu-pugī: pungō, sci-cudī: scindō, di-dicī: discō, sti-tī: sistō; whilst in Old Latin we still find the regular forms me-mordī pe-pugī etc. (see above). Compare Skr. u-vác-a instead of va-vác-a following uc-yá-te uktá-s and the like, § 851 p. 400. However, e remained if the vowel of the next syllable, and the present vowel, were of the e-kind; as pendī: pendō pendeō, pe-pēdī: pēdō; and the same if it differed from the present vowel, as ce-cinī. canō, ce-cidī cadō, pepulī: pellō, pe-perī: pariō, ste-tī· stō stās etc.

In compounds four syllables long (in the 1st and 3rd singular), the reduplicator underwent syncope in proethnic Latin, as a consequence of the accentuation then given to the first member; as reppulī rettulī reccidī for *ré-pepulī *ré-tetulī *ré-cecidī, dēcidī attigī incurrī for *dé-cecidī *át-tetigī *in-cecurrī (I § 633 p. 474).

That both reduplicated and unreduplicated forms occurred in pr Italic within the perfect system of the same verb is shewn by O Lat. vhe-vhaked Osc fe-facust as compared with Lat. fēcī Umbr. fakust. Compare further Lat. sci-cidī and scidī, te-tulī and tulī, Umbr. de-rsicust and Osc. dicust, Lat. ce-cinī and Umbr. pro-canurent Thus we have no right to assume that Lat. tulī was abstracted from compounds in which the reduplicator had suffered syncope, as in rettulī attulī When a form has only survived in compounds, as -culī (per-culī), it is impossible to say whether it never was reduplicated or whether syncope has hidden the reduplication.

This loss of reduplication in Latin compounds helped to link reduplicated and unreduplicated forms all the closer

Beside Lat $abs\text{-}cond\bar{\iota}\bar{\iota}$ (from $abs\text{-}cond\bar{\iota}$) the form $abs\text{-}cond\bar{\iota}$ sprang up on the analogy of $scand\bar{\iota}: scand\bar{\iota}$, since $cond\bar{\iota}$ in this word joined with abs had ceased to be regarded as a compound; cp. $absc\bar{\iota}nsum$ beside absconditum. On the contrary, $condid\bar{\iota}$:

condō, crēdidī: crēdō and the like gave rise to perf. dēscendidī beside dēscendī.

As regards verbs with initial vowel, such forms as Skr. $dn-d\dot{s}-a$ (§ 851 p. 401) and Gr $\dot{o}_{\bar{q}}-\omega_{\bar{q}}-a$ (§ 858 p. 408) were foreign to Italic. Lat. $\bar{e}d-\bar{\imath}$ $\bar{e}m-\bar{\imath}$ (from $ed-\bar{o}$ $em-\bar{o}$), as well as $s\bar{e}d-\bar{\imath}$ $v\bar{e}n-\bar{\imath}$, $\bar{e}g-\bar{\imath}$ $coep\bar{\imath}$ (from $ag-\bar{o}$ $ap-i\bar{o}$), as well as $c\bar{e}p-\bar{\imath}$ $p\bar{e}g-\bar{\imath}$, $\bar{o}d-\bar{\imath}$ (od- $\imath\bar{o}$), as well as $f\bar{o}d-\bar{\imath}$, may be regarded as formwhich never had any reduplication at all. See § 848 p. 393 f. § 870.

§ 869. Of the old Ablaut in the Root Syllable of the Perfect little trace is left.

The reason for the variants $tut\bar{u}d\bar{\imath}$ and $tutud\bar{\imath}$ is doubtless a difference of ablaut, such as we see in Ski. $tu-t\delta d-a$ $tu-tud-\hat{\imath}r$ (cp. also Goth. $stai-st\hat{\imath}ut$), then $tu-t\bar{\imath}ud-$ will come from * $t\hat{\imath}u-t\hat{\imath}ud-$, as $in-cl\bar{\imath}ud\bar{\imath}d\bar{\imath}$ for * $in-claud\imath$ 0

The o-grade of the sing indic. appears in spopondī totondī, which had run into one verbal system with the éjo-present-spondeō tondeō (§ 802 p. 338) spopond-imus instead of *spe-pend-like Gr. πεπόνθ-αμεν instead of πε-παθ- (part. πεπαθνῖα) momord- in momordī momordimus (pres. mordeō like spondeō) may be both Idg. *me-mord- and *me-mṛd- (Skr. ma-mard-a ma-mṛd-ur) Similarly, we have cu-currī from currō for *corsō *kṛsō (§ 662 p. 197) Umbr pepurkurent from \$\squar prek-\$re\cdots\$ may like de-rsic-ust contain the weak stem (*pe-pṛk-), although persklum persnimu, which have changed the position of \$r\$ (§ 674 p. 207), suggest some doubt.

Strong and Weak torms may be found, again, in meminitetini pepuli tetuli (memin-i-mus tetul-i-mus. Gr $\mu \acute{\epsilon} \mu \alpha - \mu \epsilon \nu$ tetul-i-mus. Gr $\mu \acute{\epsilon} \mu \alpha - \mu \epsilon \nu$ as Skr jagm-i-ma jagan-ma Gr $\beta \acute{\epsilon} \beta \alpha - \mu \epsilon \nu$, and as Skr. jagm-i-vás-. jagan-vás-), only the weak form in pepigif for *pepagī (but Gr $\pi \acute{\epsilon} \pi \eta \gamma \epsilon$) tetigī ceculī. But it is doubtful how far we are to look for the origin of these perfects in old reduplicated anists (§ 867 7 p 415).

Doubtless it is the weak stem in Osc. fefacust beside Lat. fect from $\sqrt{dh\bar{e}}$. The a of Lat. vhevhaked is difficult

Remark. If it is short, this seems to prove that at the time of the Manios inscription (attributed to the 6th century B. C.) the weakening of *pépagī to *pépagī and the like (I § 680 p. 547) had not yet been completed. But hear what Bücheler says (Rhein. Mus. XLII 317): "After the second h the carver first put i, which he afterwards erased, though not so completely but that the intent is clear". Again, p. 318 "The quantity of the a is not known. What we know of the reduplicated perfects which are preserved in Latin, makes it likely that the a was short. Possibly this is the reason of the i which was first engraved (cano cecini, infacetus inficetus)" If this i is rightly so explained, and if the a put in on second thoughts was short, it must be a reversion to the old type on the analogy of facio etc. (as with in-facetus); but such a reversion in the perfect is hardly credible. If \vec{a} was meant, it must be assumed that *fefāk- was made in connexion with *fefāk- *fefik- on the analogy of some such form as *pepāy- (beside weak *pepāg- *pepīg-) — We may now refer to Buck, Der Vocalismus der osk. Spr., 26 f

The weak stem (regular) in Lat. de-d-\(\bar{\tau}\) = Skr da-d-\(\bar{\tau}\)
(cp. tu-tud-\(\bar{\tau}\) = Skr. tu-tud-\(\bar{\tau}\)) and in Umbr. te-\(\bar{\tau}\)-ust 'dederit'
= Skr. da-d-\(\dau\). (cp. de-rsic-ust = Skr. di-di\(\bar{\tau}\)-\(\dau\).), also Lat. ste-t-\(\bar{\tau}\) = Skr. ta-sth-\(\bar{\tau}\). The form "de-d-e-d, common to all Italic dialects, and Lat. ste-t-i-t, correspond exactly to the present forms Vestin di-d-e-t 'dat' Lat si-st-\(\bar{\tau}\) Umbr sestu \(\bar{\tau}\) 543 p. 103, \(\bar{\tau}\) 553 p. 107 Uncertain it is whether Lat. sistimus is *si-sta-mos answering to Gr. \(\bar{\tau}\)-oτα-μεν, and it is equally uncertain whether ste-ti-mus de-di-mus are *ste-ta-mos *de-da-mos precisely like Skr ta-sth-m\(\dau\) Gr. \(\bar{\tau}\)-oτα-μεν Skr. da-di-m\(\dau\).

§ 870. A word of explanation is needed on those reduplicated perfects which have \bar{c} where the present has an a-sound. Lat. $f\bar{e}c\bar{\iota}$ (beside vhevhaked). $faci\bar{o}$, $cap\bar{\iota}$: $capi\bar{o}$ (cp. Goth. $h\bar{o}f$), $j\bar{e}c\bar{\iota}$. $jaci\bar{o}$, $p\bar{e}g\bar{\imath}$ (beside pepig $\bar{\iota}$ (fr. Dor. $\pi \dot{\epsilon} \pi \bar{a} \gamma \dot{\epsilon}$): $pang\bar{o}$, $fr\bar{e}g\bar{\imath}$. $frang\bar{o}$; ()se conj. hipid 'habuerit' fut. perf. hipust 'habuerit' hafiest 'habebit', sipus 'sciens': Lat $sapi\bar{o}$ (cp. O.H.G. int-suab). With initial vowel Lat $\bar{e}g\bar{\imath}$ $ag\bar{o}$ (cp. O.Icel. $\bar{o}k$), $co-\bar{e}p\bar{\imath}$ $coep\bar{\imath}$ · $capi\bar{o}$. \bar{e} is certainly original in $f\bar{e}c\bar{\imath}$, 1) compare Gr $\dot{\epsilon}'g\eta_{\ell}a$ (§ 864 Rem. p. 412), and doubtless

Bronisch sees fēk- in Umbr feitu fetu fetu fetu 'faoito' =
 *fēke-tōd. Another explanation, but less probable, is offered by Conway,
 Amer. Journ. Phil. xi 307, Class. Rev. v 300.

in freq., compare Goth. brekum from \checkmark bhreg- (on frangō see § 632 p. 168), and perhaps $j\bar{e}c\bar{\tau}$ (Johansson. Beitr. gr. Spr. 61). Beginning with these forms, \bar{e} spread to those which originally had a; in the causing of which not only the present with a, but also the to-participle had some effect. captu-s for example being like factu-s; the reason why scabō (= Goth. $sk\bar{o}f$) remained, from scabō, whilst *copī (= Goth. $h\bar{o}f$) changed to $c\bar{e}p\bar{\iota}$, was perhaps the lack of any participle *scaptu-s. It was natural, too, to make $p\bar{e}g\bar{\iota}$ like $frcg\bar{\iota}$, simply because the verbs had opposite meanings.

§ 871. Perfect from Present stems with stem-characteristic. Compare § 847 p. 390 f.

Lat. po-pose from pose for *por(c)-se \(\bar{o}\), ep. Skr. papracha. fe-fell for *fe-fall from fall for *fal-n\(\bar{o}\) (\§ 608 p. 149). tetend-\(\bar{v}\) from tend \(\bar{o}\), \sqrt{ten} - (\§ 564 p. 111, \§ 696 p. 225).

Lat. $pre-hend\bar{\iota}$ from $-hend\bar{\iota}$ from \sqrt{ghed} , $lamb\bar{\iota}$ from $lamb\bar{\iota}$ beside O.H.G. laffu, $pand\bar{\iota}$ from $pand\bar{\iota}$ beside $pate\bar{\iota}$ (§ 632 p. 168 f.). $c\bar{\iota}d\bar{\iota}$ from $c\bar{\iota}-d\bar{\iota}$ (§ 696 p. 225). Osc. com-parascuster 'consultus erit' beside Lat $-pesc\bar{\iota}$ for * $perc-sc\bar{\iota}$ or * $parc-sc\bar{\iota}$ (§ 674 p. 207). Umbr. esscurent 'poposcerint, arcessierint' beside pres Skr. $sch\dot{\iota}-ti$ etc (§ 670 p. 203). If Bugge's explanation of the Osc. fut. perf. fifikus as 'feceris' is right (Altital. Stud. 31), we must allow Oscan a present stem * $fi-f\bar{\iota}-ti$ -(o-), showing the same reduplication as Gr. $\dot{\tau}i-\eta\eta-\mu$, and to be compared with Vestin. di-d-e-t 'dat' Lat. $si-st\bar{\iota}$ etc. (§ 553 p. 107); ep Skr. part. $si-st\bar{\iota}$ from pres. $si-st\bar{\iota}$ etc. (§ 850 p. 398).

mnu $\bar{\imath}$ sternu $\bar{\imath}$ (pres m-nu \bar{o} ster-nu \bar{o} § 649 p. 185) keep the present stem in the perfect; this being due to imitation of ex-u $\bar{\imath}$: ex-u \bar{o} , plu $\bar{\imath}$. plu \bar{o} and the like. The same is true of perf. statu $\bar{\imath}$ from the denominative statu \bar{o} .

§ 872. The Moods of the Idg. perfect, and its preterite the Pluperfect, died out in Latin owing to the influx of sigmatic acrist forms into the perfect system. Still, mement $\bar{o} = \text{Gr. } \mu \epsilon \mu \dot{a} \tau \omega$ remains, because memin $\bar{\imath}$ was used as a perfect present.

Umbro-Samnitic has an \bar{e} -conjunctive (§ 926 c). Osc. fefacid 'fecerit' hipid 'habuerit' fuid 'fuerit', Umbr. stiti-steteiens 'stiterint'. From the f-Perfect Osc. sakrafir 'sacraverint', Umbr. pihafei = *pihāfēr 'piaverint', from the t-Perfect, Osc. tríbarakattíns 'aedificaverint'. This Conjunctive may be derived from either conj. of the Idg. perfect (cp. Gr. $\pi \epsilon \pi \acute{e} n\acute{e} \nu \partial - \eta$ Skr $paprc-\bar{a}-si$) or conj. of the thematic aorist (Osc. fuid = Skr. $bhuv-\bar{a}-t$).

In the same area, the Idg. wes-participle held its own. Osc. sipus 'sapiens' probably like nom. sing. Skr. vidúš Avest. vīđuš (II § 136 p. 439 f, III § 193 p 73). From this form was built up the future perfect (cp. W Schulze, Kuhn's Zeitschr. XXVIII 272 f, the Author, Ber. sachs. Ges. Wiss., 1890, pp. 223 ff.), by combining it with injunctives, used for future, of the stem s-o- (from es- 'esse'). 2nd sing. -us = *-us-ses, 3rd sing. -ust = *-us-set (*-us-sed). Umbr kuvurtus 'converteris' dersicust 'dixerit', Osc fefacust 'fecerit'. Osc fust 'fuerit' (beside fust 'erit') for *fu-ust from conj. fuid. *fu-ust *fust existed in Umbrian too, this explains the form amprefuus 'circumieris' (beside apr-etu 'circumito')1), which will be due to analogy of it. On the analogy of the Ist future, where -zent is the ending of the 3rd pl, - as Osc. censazet 'censebunt' Umbr. furent 'erunt', - arose the plurals Osc. tribaråkattuset 'aedificaverint' Umbr. pepurkurent 'poposcerint'. But we also find Umbr. covortuso 'conversum erit, converterint' for *covortus so(1), benuso 'ventum erit, venerint' for *benus so(r).

§ 873. The us-formation mentioned in the last section was used with other preterite participles besides those described.

¹⁾ The u is doubtless long in Osc. tribarakattuset too; if it had been short, we should expect *tribarakattiuset (I § 49 p. 41). I assume the same analogy here. — G. Bronisch, in his new work on the Osc. i- and e-vowels, regards the nominative ending -us as earlier *- \bar{v} s for *- $u\bar{v}$ s, and supports his view by amprefuus and tribarakattuset.

Umbr. en-telust 'intenderit' a-pelust 'impenderit' derived from *tend-lo- *pend-lo- (Lat. pendulu-s 'hanging'). Compare the Slavonic part. pret. act. with -lo-, as nes-lü from nes-ti 'to carry' (II § 76 p 212).

Umbr. sesust 'sederit' from *sesso-s 'seated, sitting' (Skr. sattá-s). So too the Osc. t-preterite, which we must follow Danielsson in connecting with the to-participles, is derived from the fut perf. in -t-us- First arose forms like tribarakattuset from partic tribarakato-. On the analogy of *aamanafust to ind. aamanaffed etc arose such Indicatives as prufatted profated 'probavit' and Conjunctives like tribarakattins. The same new formation is seen in Pelign coisatens 'curaverunt' and in Volsk sistiatiens 'statucrunt' = *sistatens. The frequent spelling with double t in Oscan is the same in principle as ff in the f-perfect; it is possible that it is entirely due to the analogy of the f-perfect, which was the model for the whole t-perfect system (§ 874).

Remark In Umbr-Oscan, as we shall see in § 874, the \bar{a} -denominatives can make a strong perfect. It may therefore be held that as the perfect pruffed was made for the present stem $prof\bar{a}$ -'probare', so the perfect prufatted was made for * $prof\bar{a}t\bar{a}$ -'*probatare' But I prefer the explanation given above, so long as no forms are found from a stem * $prof\bar{a}t\bar{a}$ or anything like it

An origin similar to that of these future perfects must be postulated for Umbr. combifiansiust beside combifiatu 'mantiato', purdinsiust 'porrexerit' beside pur-ditom 'porrectum', which presuppose noun-stems *combifiankio-*purdinkio- (see Johansson, Beitr. z gr. Sprachk., 84 ff., 147 ff).

§ 874. We pause a moment here to explain the origin of the f-perfect in this Umbro-Samnitic. Examples are indic. Osc aamanaffed 'mandavit' aikdafed '*aequidavit', Osc. manafum, which may be 1st sing ('mandavit') or 1st pl. ('mandavimus'), it is uncertain which; conj. Umbr. pihafei(r) 'piaverint' Osc. sakrafír 'sacraverint', fut. perf. Umbr. aterafust andirsafust 'circumtulerit' ambrefurent 'circumierint'.

This formation belongs to the Italic imperfect compounded with *bhu-a-m 'I was' (Lat. ama-bam Osc. fu-fans 'erant') and

the Latin future compounded with *bhu-ō 'I shall be' $(ama-b\bar{o})$. found also in Keltie (§ 899); the Umbr.-Samn. -fed is indic. aor. = Idg. *bhu-e-t (Avest. bva- \bar{p}), cp. Lat. fuit Osc. conj. fund, to be connected with Skr. á-bhuv-a-t (§ 867.5 p. 414). If Osc. mana-fum is 1st sing., its second part must be = Idg. *bhu-o-m. In the ff of Oscan, as aamanaffed, we should perhaps recognise another effect of the \bar{u} which once followed f. But it is possible to explain the sharpening of the consonant if we take as our starting point f (for $f\bar{u}$); see Danielsson, Pauli's Altit. Stud. iv 139 ff. For the Umbr.-Samn. conjunctive stem $-f\bar{e}-=*fu-\bar{e}-$ may be equated with O CSI. be (§ 578 p. 119, § 587 p. 128)

The attraction of these forms into the Perfect called up a future perfect with -us- Umbr. ampr-e-fuus shows that the u was long, and this may be explained as due to the analogy of the fut. perf *fūst = Osc. fust for *fu-ust (§ 872 p 420 f.).

No complete explanation has been given for the forms Umbr. portust 'portaverit' beside portatu 'portato', Osc. upsed 'operatus est' 3rd pl. uupsens oungers beside úpsannam 'operandam', prúffed 'probavit' prúftú-set 'probata sunt' beside prúfatted 'probavit', urust 'oraverit'. They look as though formed after the fashion of primary ā-verbs with strong perfect. Umbro-Samnitte perhaps had, as Latin had, primary ā-verbs with strong perfect (cp. juvāre jūvī § 583 p 124), and thus the ā-denominatives may have followed their inflexion in some particulars, as in late Latin we meet forms like part. probitus or imper. probuntō from probāre (sec Georges, Lex Lat Wortf., 556).

§ 875. We now return to Latin, in order to finish with the perfect in -vī and -uī, as ī-vī scī-vī sē-vī plē-vī nō-vī flā-vī fīnī-vī amā-vī and genuī texuī crepuī monuī saluī

Of the attempts hitherto made to explain these, which are summarised by Stolz, Lat. Gr.² 370 f., and more fully by Per Persson, Wurzelerw. 210 (Ernault, Du Parfait, 63 and 92 f should also be consulted), the simplest and most credible is the

following. The analogy of $m\bar{v}$ -tu-s (Umbr. comoho-ta abl. commota') $j\bar{u}$ -tu-s. $m\bar{v}v$ - $\bar{\imath}$ $j\bar{u}v$ - $\bar{\imath}$, and the like, suggested (1) $pl\bar{v}v\bar{\imath}$ $n\bar{v}v\bar{\imath}$ ama $v\bar{\imath}$ beside $pl\bar{e}tu$ -s $n\bar{v}tu$ -s amatu-s etc, to which were added $s\bar{v}v\bar{\imath}$ $\bar{v}v\bar{\imath}$ etc., and (2) e g *gene- $u\bar{\imath}$ beside *gene-to-s (gentus), which became $genu\bar{\imath}$ 1) Between $genu\bar{\imath}$ and $fl\bar{u}v\bar{\imath}$, then, there would be the same relation as between Gr $\delta\mu\omega\mu\nu\kappa\alpha$ and $\delta\epsilon\delta\rho\bar{\alpha}r\alpha$.

The reason why $m\bar{o}v\bar{v}$ $j\bar{u}v\bar{v}$ had this influence, in spite of their present $move\bar{o}$ $juv\bar{o}$, is the specially close connexion between the to-participle and the perfect active, $m\bar{o}tus$ sum being the passive of $m\bar{o}v\bar{v}$. The Gr $\tau'\mathcal{E}\mathcal{H}\gamma\alpha$ $\delta\dot{e}\delta\alpha\gamma\alpha$ etc., it will be remembered, caused the r-type of perfect to spread (as $\beta\dot{e}\beta\lambda\eta\gamma\alpha$ $\ddot{e}\gamma\nu\alpha\alpha\alpha$), in spite of their connexion with the acrist $e\mathcal{H}\gamma\alpha\alpha$ $ed\omega\alpha$, which themselves were not fertile.

The forms in -vī and -m, like all perfect forms not based upon the is-aorist, were attracted to take the endings of this tense in the other persons novistī novistis genuistī genuistis novero genuero noverim genuerim noveram genueram novissem genuissem.

A few original s-perfects were transformed to match genuī pēxuī nēxuī instead of pēxī nēxī (§ 823 p. 361) from pectō nectō (§ 683 p. 214 f.), messuī instead of *messī from metō.

Keltic.

§ 876. Outside of Irish, few survivals remain of the Idg. perfect. Gall. dede 'dedit' or 'posuit', Mid.Cymr. ciglef 'audivi' = O.Ir. ro chuala.

Beside pōnō for *po-s(i)nō stood po-sīvō and since po-situ-s was incorrectly analysed pos-itu-s, there arose the other Perfect form posuō. See Osthoff, Perf., 261 and 611 f.

Of Irish examples, we have already cited, and compared with perfect forms from other Idg. languages in § 846, the following · do-ro-chair 'cecidit, periit', ro gēnar 'natus sum', do-mēnar 'putavi', ro gegon 'interfeci', ro lil 'adhaesit' 3rd pl. ro leldar, ro chuala 'audivi', ro bōi 'fuit', ad-con-dairc 'conspexit', do-roigu 'elegit', ro cechan 'cecini'; in § 847 im-chom-arc-air 'interrogavit', in § 849 ro tāich 'fugit' 3rd pl. ro tāchatar.

To these examples a few more may be added which show the reduplication either retained, or changed only in accordance with the phonetic rules ro reraig 'porrexit' for *re-rog-e, pres. rigim, \(\sqrt{reg-} \) cp O.Icel rak ro memaid 'he broke' (intr.) 3rd pl. ro me-md-atur, pres. maidim. ro de-daig 'oppressit' 3rd pl. ro de-dg-atar, pres for-dengat 'opprimunt'. fris-racacha 'speravi', pres ad-chiu '1 see' ro selaig 'he struck down' i. e se-slaig, pres sligim. cp Goth slöh \(\sqrt{8}\) 888. ro cechladatar suffoderunt', pres -cladar 'he is buried'. ro sescaind 'he sprang', pres Mid.Ir. scinnim Skr ca-shánd-a 'he sprang', on the vocalism of this root see \(\sqrt{5}\) 520 p 84 ro sescaing 'he leapt out', pres. Mid.Ir. scingim Mid.Ir ro leblaing 'he leapt' instead of *lelaing beside pres. lingim O.Ir lengaim (R. Schmidt, Idg. Forsch. I 48 f.). ro cechaing 'he stepped', pres cengaim.

The perfects fo nenary 'he cleansed' and ro senarch 'it dropped, trickled' beside pres. $nigim \ \sqrt{nexg}$ - and $snigid \ \sqrt{snexgh^*}$, may be derived from *-nenoige *-sesnoige, as nothing certain is known of the treatment of or in internal syllables. But perhaps they are modelled after perfects like reraig, cp. Goth bap from bidja § 722 p. 253.

Mid.Ir. ro-fiu 'he slept', not from \(\supersup \supersup \text{suep-}\), but, as Thurneysen holds, from \(\supersup \upersup \text{ues-}\) (Skr. vas- 'to pass the night' perf \(u-vas-a \), therefore for *\(ue-uo(s)-e \), which became first *\(fi-ui \), 3rd pl. -\(feotar \) for *\(ue-uo(s)-atar \); cp. \(feiss \) 'sleep'. Observe the analogical \(e \) of the reduplicator, for by I \(\supersup \) 66 p. 54 f. *\(ueuos-\) must have become *\(uouos-\).

§ 877. Perfects based upon presents with stem-characteristic (cp. § 847). *in-roigrann* '1 pursued' beside

in-grennim from \vee ghredh- (§ 628 p. 165). do-sefainn 'pepulit' 3^{rd} pl. do-sefnatar, if the present senum § 613 p. 151 is rightly derived from *suem-no ro nenasc 'I bound, promised' beside nascim from \vee nedh- (§ 675 p. 208)

ad-gēn 'cognovi' 3rd sing. -genin 1st pl. -gēnammar 3rd pl. -gēnatar comes from the Idg perfect *ģe-ģn-ō- (Skr jajnāń (tr. εγνωκα εγνωσται, also perhaps (toth. *kai-knō, see p. 128 footnote 1), from V ģen- The plural may be derived at once from this ground-form The 1st and 3rd sing., which point to 'ge-gn-a and *ge-yn-e, are later re-formates. Compare in Sanskrit the forms jajūmá jajūmás- beside jajūāń etc. (§ 850 p. 396).

§ 878. The syllable of reduplication usually has the vowel e quite clear; e g ro ge-gon ge-guin like Gr. πέ-φαται, ro ce-chan ce-chuin like Lat. ce-cinī

By dissimilation, the initial consonant of the unaccented reduplicating syllable was dropt after ro, after which the e-vowel of this syllable was contracted with ro into the genuine diphthong oi (I p. 483 footnote 1). Of the examples already given do-roigu for *-ró-geyu, and in-roigrann, come in here. Others are for-roichan beside ro cechan, fo-roiblang beside ro leblang, arob-roinasc beside ro nenusc, fo-roichland beside ro cechladatar.

By a process of re-formation which cannot now be traced exactly we have u in the reduplicator of ro chuala, for *cu-clou-a; the Mid.Cymr ci-glef (3rd sing ci-gleu) gives no help in determining the age of Ir. cu-, because its ci-admits of more than one explanation. In Irish, i seems also to have been used in reduplicating i-roots rolli 'adhaesit' pres. lenim V lei-, ro givil adhaesit' pres glenim V glez-, do-rad-chivir 'redemit' 1st sing. -chēr pres. crenim V qrez- (§ 598 p. 142, § 604 p. 145). The last attempts to deal with this difficult group of perfect forms are those of Thurneysen, Kuhn's Zeitschr. xxxi 89, and R. Schmidt, Idg. Forsch. I 62 f.') The forms which must be

Thurneysen informs me that he does not back his explanation against R. Schmidt's, which he recognises as being right in all essentials.

postulated as those which just preceded these show the personal ending affixed immediately to the root-final consonant: 3rd sing. *li-l-e *gi-gl-e *ki-kr-e, 1st sing. *ki-kr-a (-chēr) 3rd pl. *li-l-ontor (leldar). And again the perfect of renim 'I sell' (for *pr-na-mi from \sqrt{per} , § 598 p. 141) shows this perfect formation, 3rd sing. ro rir = *pi-pr-e (this first becomes *ir, instead of which we get rir by § 476 p. 23), whilst what one would expect is *reir = *pe-pr-e (with strong stem *pe-por-e). R. Schmidt conjectures that this *pe-pr-e and *li-lo(i)-e etc., the present formation being the same for both, became *pi-pre and *li-le by mutual analogy. Is it not better to suppose that -rir is based upon a reduplicated preterite +pi-pr-e-t, in Class IV? In Thurneysen's opinion the Conjunctive of this present class is represented in futures like do-ber (§ 565 p. 112), and we shall see anon (in § 879) that some of the Keltic perfects probably come from a thematic preterite (aorist -ciuir too may be derived from *qi-qr-e-t, as or imperfect). the "root" grez-, it may be conjectured, is possibly an extension of ger- 'make'.1) If this be the origin of -rir (and -civir), the difficulty of -lil and the rest at once vanishes.

t-ānac 'I came' 3^{rd} sing t-ānac beside Skr. ānáśa, also to be compared with Gr. $\dot{\epsilon}\nu$ - $\dot{\eta}\nu\epsilon\gamma\nu$ - $\tau\alpha\iota$, if $\dot{\epsilon}\nu$ - is the preposition and not a reduplicator. See § 846 p. 390, § 858 p. 408.

§ 879. Beside the reduplicated forms appear unreduplicated not a few. To those already cited, do-ro-chair, ro bōi, ad-con-dāirc, im-chom-arc-air, ro tāich, we may add 3rd sing. ro scāich beside scuchim 'I yield', ro gāid beside gudim 'I beg', 1st sing. fo-ro-damar for -dāmar beside fo-dam 'patitur', 3rd sing. du-fu-tharcair 'wishes'.

There is no proof that these forms have lost a reduplicating syllable in Keltic itself. Like ro-mīdar (§ 848.3 p. 393), they

¹⁾ See Per Persson, Wurzelerweiterung p. 108 (where Ir. taid-chur 'redemptio' must be struck out; as I learn from Thurneysen, the word rather means 'return').

are forms which never had reduplication; -dairc may be compared with Skr. dars-i-vas- (§ 848.2 p. 392).

Unfortunately there is nothing to decide whether in the plural of the Irish perfect, in such forms as ro cechnammar cechnaid cechnatar, the vowel preceding the personal ending was the thematic vowel, or Idg θ (= pr. Kelt. α); in the 1st plural another question offers, whether a does not come from the initial sonant of the personal ending (-mm-) If, as is most probable, these are thematic, there may have been thematic preterites amongst the above unreduplicated forms, and -dairc, for instance, may be identical with Gr edgaze, bon with Skr. abhavat, do-cer 'cecidit' too, beside do-ro-chair, gives the impression of such a preterite Compare the aorist forms which have obstained a footing in the Latin Perfect, e. g. $scidit = Skr \ \acute{a}chidat \ (\S 867.5 p 414)$ In § 878 p. 427. I conjectured that -rir was a reduplicated thematic agrist. In the 3rd singular, the original endings *-e (perf.) and *-e-t (thematic pret) must have run together in Irish; so in the 1st plural with -o-m- (Skr. -1-ma), -nm- (Goth. -um), and -o-m-; and this may have brought about the commingling of the different tenses.

§ 880 Of the Idg. vowel gradation in the Root Syllable little now remains Within the indic. active, the differences of gradation between singular and plural were all levelled away in Old Irish; e. g 3rd sing. ro gegiun 'vulneravit, trucidavit' for *yegon-e (Skr. jaghán-a) 2nd pl. ro gegnaid for *gegon- (Skr. jaghn-á). But the original middle shows in some forms the weak stem proper to it, e. g. ro gēnar 'natus sum' for *ge-gn-, like Skr. ja-jn-é.

The vocalism of some forms is exceptional: ro tāich beside techim 'I flee', ro rāith beside rethim 'I run', cp. ro scāich beside scuchim, ro gāid beside gudim. Except ro mīdar, all unreduplicated preterites with roots having a single initial consonant show -ā-.

§ 881. One thing yet remains to say of the personal endings. The 1st and 8rd plural have a deponent formation (-ammar and -atar).

Germanic.

§ 882. I first give once again the forms cited in § 846, and compared with perfects from other languages. Goth. ga-tar 'he tore up, destroyed' -tērun, O.H.G. zar zārun. Goth. man 'remembers, wishes' munun, O.Icel man muno. Goth. gam 'came' qëmun, OHG. quam quamun Goth. ga-pars 'dried up' - paúrsun Goth ga-dars 'dares' - daúrsun, O.H.G. gi-tar Goth. varb 'became' vaúrbun, O.H.G. ward wurtun. Goth. hlaf 'stole' hlēfun Goth. band 'bound' bundun, O.H.G. bant buntun. Goth gatáih 'showed, recounted' -taihun, O.H.G. zēh zigun. Goth báit 'bit' bitun, O.H.G. Goth. láthv 'lent' lathvun, O.H G. leh liwun. berg bizzun. O.H.G. sēh 'strained, filtered' sigun. Goth. káus 'tried, chose' kusun, O II.G. kos hurun, Goth, ana-baub 'bade, commanded -budun, O.H.G. bot butun. Goth. báug 'bent' bugun, O.H.G. boug bugun. O.H.G. roz 'wept' ruzzun. O.Icel. svaf 'slept' svofo. Goth. gavag 'moved' -vēgun, O.H.G. wag wagun. Goth sat 'sat' setun, O.H.G saz sazun. Goth. saî-sō 'sowed' sai-sōun. Goth. skai-skaip 'separated, parted' skai-skáidun Goth. stai-stáut 'pushed', knocked' stai-stáutun.

The Idg. difference in accent of singular and plural (cf. Skr. véda: vidmá, cakára: cakymá) has left its traces in the final consonants of the root in OH.G. ward. wurtun, zēh: zigun, kōs: kurun and the like (I § 530 p. 386 f., § 580 p. 434).

Whether the ending of the 1st pl. indic. -um represents Idg -nme, or is due to the analogy of 3rd pl. -un and was originally Idg. -me or -a-me, is doubtful; see § 844 p. 385 f.

Besides the indic. perf, the Optative is seen in Germanic; e. g. 1st pl. Goth. vit-ei-ma O.H.G. wizz-ī-mēs, Goth. skaiskaid-

-ei-ma. Then there is one isolated Conjunctive form, used as an imperative, Goth $\bar{o}gs$ 'fear thou' (beside indic. $\bar{o}g$ he fears'), and a few substantives based upon the Participle, as Goth. $b\bar{e}r$ -us-j $\bar{o}s$ 'parents' and A.S. $\bar{e}zesa$ $\bar{e}zsa$ O.Sax. $\bar{e}cso$ 'owner' (II § 136 p. 445, Johansson Beitr. zur griech. Sprachkunde, 134).

The Germanic Perfect falls into two divisions, (I) Reduplicated and (II) Unreduplicated

§ 883. (I) The reduplicating syllable of the Idg. reduplicated perfect is kept clear and true in Gothic; but this only by roots which as far as Germanic is concerned do not belong to the e-series. 1)

All Gothic reduplicating syllables have ai, which is regular for i = Idg. e before h and r, e. g. hai-háit rai-rop (I § 67 p. 58). Begining with those cases where it was regular, ai spread to the rest by analogy, hence skai-skáip; which regularly would be *ski-skáip. As regards Johansson's view that Goth. ai is to be read as a long vowel, see Addendum to page 17.

The fact that the analogy of ai really did so act is clear from the new forms ai-auk (= O.Icel. $j\bar{o}k$ § 885) beside auka 'I increase', and af-aiaih beside af-aika 'I deny, refuse' (§ 473 p. 19).

The root syllable of these reduplicated forms is always the same in the plural as in the singular; the strong grade of the singular has become general. skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-skai-sk

^{1) &}quot;As far as Germanic is concerned", because the analogy of these attracted into the same group some others which in the parent language did have e-vocalism, for instance, Goth. valvald beside valda "I rule" for *\varpsilon \text{Idho} from \sum uel-.

also shows itself not to be in its original form by the ending -un, taken over from the stems which had initial consonant. lai-lot 'let' lai-lotun, pres. lētu, V lēd- (§ 521 p. 85).

§ 884 This Gothic reduplicated Perfect was also formed from extended roots, or from presents with some stem-characteristic (cp. §§-847, 889, 891).

vai- $v\bar{o}$ 'blew' Skr va- $v\bar{a}u$ from u- \bar{e} - 'to blow', pres. vaia '= $u\bar{e}$ - $u\bar{o}$ (§ 587 p. 128, § 735 p. 262).

fal-fāh grasped' fal-fāhun (cp. O.H.G. fiang fiangun § 885) beside pres. fāha (O H G. fāhu) for *fanzō, probably a nasal present from V pā \hat{h} - (§ 632 p. 168, § 634 p. 171).

fal-fal \bar{p} 'folded' fal-fal \bar{p} un beside pres, fal \bar{p} a groundform * $p\bar{l}$ - $t\bar{o}$ (§ 680 p. 213); hal-hald 'tended, pastured' beside pres halda ground-form * $k\bar{l}$ - $t\hat{o}$ (§ 585 p. 215). val-vald 'he ruled' val-valdun beside pres. valda ground-form * $u\bar{l}$ - $dh\bar{o}$ (§ 689 p. 219), ga-rair \bar{o} \bar{p} 'considered' -rair \bar{o} dun beside pres ga-r \bar{e} da ground-form * $r\bar{e}$ - $dh\bar{o}$ (§ 689 p. 220). sal-salt 'he salted' beside pres. sal-ta = Lat sall \bar{o} for *sal- $d\bar{o}$ (§ 690 p. 221)

§ 885 In West Germanic and Norse there are only a few distinct traces of the reduplicated type. The most important forms for our purpose are the following

First some Anglo-Saxon forms, as $reo-rd = (ioth. rai-r\bar{o}\bar{p}, (leo-rt = lai-l\bar{o}t), leo-lc$ 'he leapt' = $lai-l\bar{a}ik$ with long vowel lost in the find syllable, as it is in hwylc 'which' swylc 'such' = Goth. hvileiks svaleiks

More uncertain are some forms which Bopp regarded as reduplicated. O H.(† Alemann 3rd pl ind. pleruzzun 3rd sing. opt ca-pleruzzi beside pres bluozu '1 offer', 3rd sing. ind ki-skrerot beside pres scrōtu '1 cut' (= Goth *skráuda), 3rd sing. ind. steroz beside pres. stōzu '1 knock, push'. According to Holz (Urgermanisches geschlossenes ē, p. 28) *ske-skrōd- became *skre-skrōd- *skre-rōd-, *be-blōt- became *ble-blōt- *ble-lōt-*blerōt-, this, he says, produced a perfect type with r, whence *sterōt- instead of *ste-stōt- A different view is taken by Zarneke, P.-B. Beitr xv 350 ff., but his is more dubious even than that of Holz.

O. Icel sera 'I sowed' for *se-zō- = Goth. sai-sō; sera is inflected as a weak preterite in the singular (as is Goth. 2^{nd} sing. saisōst perhaps from *saisōs); in the plural, serom. O. Icel jōk 'I increased' (pl jōkom) for *eauka = Goth. ai-auk (§ 883 p. 430).

In these dialects we usually find, parallel to the Gothic reduplicated perfect, forms whose structure is apparently different; on which works have been brought out of late by Ljungstedt, Ottmann and Holz, whose titles are given in the footnote to page 383.1) The facts about O H.G. are as follows:

- (1) Verbs with ou or $\bar{o} = \text{Goth}$. $\acute{a}u$ in the present, and verbs with present uo = Goth \bar{o} , have, instead of the Gothic dissyllabic reduplicated stem, a monosyllabic stem with eo, whence io in ie leof hof haf hef 'I ran' leofun hofun from pres. loufu: Goth. hai-hláup hai-hláupun. stroz 'I pushed, knocked' stiozun from pres stōzu. Goth. stai-stáut stai-stáutun. (h)riof 'I called' (h)riofun from hruofu.
- (2) The others, instead of the Gothic dissyllabic reduplicated stem, show a monosyllabic stem with ē, which becomes ea ia ie (I § 75 Rem 2 p 65):
- (a) hiaz 'I was called' hiazun from pres. heizu: Goth. hai-háit hai-háitun. sciad 'separated' from sceidu: Goth. skai-skáiþ.
- (b) fiald 'folded' fialdun from pres faldu: Goth. fai-falþ fai-falþun. halt 'held' from haltu: Goth. hai-hald. wialt 'rules' from waltu. Goth. vai-vald. salz 'salted' from salzu: Goth. sai-salt. fiang 'seized' fiangun from fāhu: Goth fai-fāh fai-fāhun; the difference between the Gothic and Old High German, h. g, is explained by remembering that in accordance with the old difference in accent, the singular came to have h and the plural g (cp. § 882 p. 429). fial 'fell' from fallu for *fal-nō, wial 'bubbled, boiled'

On Holz' attempt, see Holthausen, Anzeig deutsch. Altert., 1891,
 187; and Sievers, Paul-Braune-Sievers Beitr., xvi 252 ff. Ljungstedt's work is not accessible to me; his views are only known to me by reviews and citations.

wialun from wallu for *ual-nō, see § 614 p. 151; l for ll because a long vowel precedes. spian 'I stretched' spianun from spa-nnu, see § 654 p. 188; n for nn has the same reason. lar 'ploughed' larun (part. larun) from larun 'I plough' (the perf. of Goth. larun is not found), see § 723 p. 253.

(c) liaz 'I let' liazun from lāzu: Goth. lai-lōt lai-lōtun. riat 'I advised' from rātu: Goth. rai-rōp. sliaf 'slept' from slāfu contrasted with Goth. sai-zlēp sai-slēp pres. slēpa.

Remark $s\bar{a}u$ 'I sow' passed over to the weak conjugation, hence pret. $s\bar{a}ta$ (part. g_t - $s\bar{a}it$), not like Goth sai- $s\bar{o}$ See Braune, Ahd. Gr. 2 § 351 Anm 3 p 249, § 359 Anm 3 p 254

There can hardly be a shadow of doubt that some at least of these perfect formations, which are repeated to a great extent in the other West Germanic dialects and in Norse, have come from reduplicated forms such as we see in Gothic. But how this happened has not yet been clearly made out. The eopreterite has been best explained, if explained be the word. It is probable that the type of this group arose from verbs which began with $au - 1^{\text{st}} \sin g$. *é-auka (Goth. aiáuk) became *éōka *eoka (O. Icel. $j\bar{o}k$), then on the analogy of *eoka beside pres. *aukō was formed beside *hlaupō the perf. *hleopa 'I run' (O.H.G. leof O. Icel hljōp), and so forth.

Ljungstedt regards this whole perfect class as being composed partly of Idg. reduplicated perfects, and partly of acrists and imperfects; for instance, he calls O. Icel kom 'I came' (beside kvam Goth. qam) an original acrist

§ 886. Perhaps the West-Germ. preterite of V $dh\bar{e}$ - 'to place, do' is a reduplicated perfect. OHG indic. 1st and 3rd sing. teta (2nd sing. tāti) pl tātum tātut tātun opt. 1st and 3rd sing. tāti; O.Sax. 1st and 3rd sing. deda 2nd sing. dedōs pl. dedun and dādun opt. dedi and dādi, A.S. dyde dydes(t) etc. like nerede, but pl. also dædon.

It is not clear whether this preferite is to be connected with the Idg. perfect (Skr dadhāú), or the Idg. imperfect (Skr. ádadhāt Gr. ετ/θη, see § 539 p. 99, § 545 p. 103), or both. In any case, however, there can be no comparing of the Brugmann, Elements IV.

1st and 3rd sing. O.H G. teta O. Sax deda and the Skr. middle form dadhé

The y of A.S. dyde is difficult. Sievers deduces an opt $^*du-d-\bar{\imath}-$ (Paul-Braune-Sievers' Beitr., xvi 236). This would bring us to a weak preterite from a stem du-, as to which consult Wilmanns, Zeitschr. fur d. Alt., xxxii 425.

*dēd- in the weak forms seems to be connected with -dēdum in the Gothic weak preterite. To explain how it got there, the following theory is less strained than others. We may suppose that Germanic once had a present answering to the Skr. dá-dh-a-ti Lith. de-d-ù (§ 540 p. 101, § 561 p. 110); then tātum was an ad-formate of gābum etc. The suggestions of Johansson (Kuhn's Ztschr xxx 550) and Holz (as cited, 44) are unsatisfactory

Remark Collitz (Am Journ Phil 12.51) and Johansson (as cited, p. 549) see in Goth $idd_{I}u$ 'I went' a 1st sing perf mid. = Skr. * $\bar{\imath}y$ - $\hat{\epsilon}$ (cp. act. 3^{rd} pl $\bar{\imath}y$ - \hat{u}) But there never was any pr Idg. perfect stem $\bar{\imath}z$ -, which fact alone wrecks the hypothesis, Skr $\bar{\imath}y$ - $\hat{u}r$ is an Aryan formation; see § 851 p 399 On $idd_{I}u$, see § 478 p 26, § 587 p. 128, § 592 p 183

§ 887. (II) We now turn to the Second chief class of Germanic Perfects, those which show no reduplication in any Germanic dialect. This class falls into two sections, (A) those which have no vowel variation within their own perfect system, as Goth sköf sköbim opt 1st pl sköbeima, and (B) those which have, as Goth. man munim muneima, gam gemun gemeina.

A part of these forms, what are called the Preterite-Presents, kept hold of the proethnic function of the perfect to express the present perfect, and did not become a historic tense, as Goth $\bar{o}g$ 'I fear' $\acute{a}h$ 'I have' $\acute{v}\acute{a}t$ 'I know' $\acute{m}an$ 'I think'. In this they are like Lat $\acute{m}emin\bar{i}$ and $\bar{o}d\bar{i}$ As they were isolated in use, so they were exceptional in form. (1) In the Indicative, roots of the e-series, ending in a single consonant, lacked the \bar{e} -form; cp Goth. $\acute{m}an$ $\acute{m}unun$ or $\acute{s}kal$ $\acute{s}kulun$ as contrasted with $\acute{q}am$ 'I came' $\acute{q}\bar{e}mun$ $\acute{s}tal$ 'I stole' $\acute{s}t\bar{e}lun$. (2) The present meaning demanded an infinitive and participle. The place of these was filled by thematic forms of present Class II, which in verbs that retained ablant were taken from Class II \acute{g} , e. \acute{g} $\acute{a}ihan$ $\acute{a}ihands$

beside ath I have', vitan vitands beside vait. Of the forms taken from Class II B, some few had come down from pre-Germanic times; as vitan munan skulan ga-daursan (§ 532 p. 93 f.). The adj un-agands 'fearless' is related to og 'I fear' as us-anands 'exhaling' to us-on 'I exhaled'. (3) A past tense was needed for them. For this the 'Weak Preterite' was used, as Goth. rissa O.H.G. wissa wessa beside vait weiz, Goth. ga-daursta O.H.G. wissa wessa beside vait weiz, Goth. ga-daursta O.H.G. wiss-um -ut -un belong to the s-aorist, they must be related to weiz just as note of the s-aorist, they must be related to weiz just as note of the s-aorist, they say to of the s-aorist, \$821 p. 358, \$827 p. 365, \$863 p. 411).

With the Preterite-Presents based upon the Idg. Perfect were associated a variety of Present stems.

Three or four new-classes Goth kun-nu-m O.H.G. un-nu-m O.Sax. *dur-nu-m, to which were added, by analogy of the Perfect singular, the forms kann an darn; see § 646 p. 183 f.

Then Goth. O H.G. may 'I can, am able' pl. magun is probably a transformation of a present of Class II B *mazō = O.C.Sl. moga 'I can' (§ 523 p 87), it belongs to the root of Gr. μῆχος μηχανή Dor. μᾶχανά, and must have been an orig. perfect *mōg *mōgun. Its transformation into a perfect is easily understood from its meaning. Beside magan magands were formed mag magun following áth átgun beside áthan áthands, and ga-mōt -mōtun beside -mōtan -mōtands. 1) The form muz-, found in West-Germ. beside maz-, e. g. O.H.G. mugun beside magun, is due to later re-formation, as Osthoff shows (P.-B. Beitr. xv 213 ff.).

Remark. Osthoff (op cit pp 217 f) holds may to be a genuine perfect, and assumes that *mōy magun levelled out the strong stem. This view is contradicted by ōg ōgun (beside un-agands) áth átgun (beside Skr iš-) skōf skōbun (beside skaban) and so forth, which all show levelling in favour of the singular stem

¹⁾ Similarly, in the Rhine-Frankish dialect of Mod.H.G the identity of inflexion in ich brauch(e) wir biauche(n) inf. brauche(n) pret. braucht(e) and ich muss wir misse(n) inf musse(n) pret musst(e) led to the coming of a 3rd sing. er brauch, instead of er braucht, parallel to er muss.

§ 888. Group II A. The unreduplicated perfects which had no gradation, with the single exception of mag (for which see above), show ai or \bar{o} in the root

an only in Goth. áth 'has' pl átgun (by levelling also átg and áthun) O.H G. pl. etgun (from the participal stem *atz-us-comes A.S ēzesa ēzsa O Sax ērso, see § 882 p. 430): Skr mid tš-ē, see § 848 p. 391 As this Sanskrit form shews, Germanic has levelled in favour of the singular vocalism, átgun instead of *īgun or *tgun. That áth has no reduplication (as af-atátk stat-skátē etc. have, §§ 883 ff.) shows that this was lacking in pre-Germanic times, and makes the immediate connexion with the Aryan verb certain. Inf. áthan part áthands are Germanic re-formates (cp the thematic Skr. īš-a-tē Avest. ts-a-tē, § 854 p. 404).

All other examples have \bar{o} , which is the vowel of the These perfects, if we look at Germanic alone, all singular. belong to roots of an a- or o-series. Goth. skof 'scraped' skobun O.H.G. scuob scuobun O Icel skōf skōfo from pres. skaba scabu skef: Lat. scābī from scabō Goth. hof 'raised' hofun (instead of *hobun) OHG huob (instead of *huof) huobun from pres hafja heff(i)u. Lat. capiō. O.H.G. int-suab 'I marked' -suabun from pres. int-seff(i)u: Lat supiō. Goth, skōb 'I hurt' skōpun from pres skapja. cp. Gr ά-σληθής 'scatheless' $(\eta = \bar{\alpha})$. Goth. us- $\bar{o}n$ 'exhaled' $-\bar{o}nun$ from pres. us-ana: Skr. ana, ep. Gr. $\alpha \nu \epsilon \mu \sigma - \varsigma$ 'wind' $\dot{\eta} \nu \epsilon \mu \dot{\sigma} \epsilon \iota \varsigma$ 'windy' (η for $\bar{\alpha}$). O. Icel. $\bar{o}k$ 'drove' $\bar{o}ko$ beside pres. ek. Gr $\bar{\eta}\chi\epsilon$ $\bar{\eta}\gamma\mu\alpha\iota$ (η for $\bar{\alpha}$) O.H.G. buoh 'baked' buohhun from pres. bahhu (Class II B) beside buchu (for *bak-nō Class XIII § 614 p. 152) Gr. πέφωγμαι pres. φώγω (Class II A). Pret-pres. Goth. σ̄q 'fears' ogun (2nd sing. conj. ogs § 882 p. 430) beside un-agands 'fearless'. O.Ir. -āgur 'fear' may also have been originally perfect.

A certain number of perfects of this group come from roots of the e-series. Goth. för 'drove' förun O.H.G. fuor fuorun from fara faru, \sqrt{per} - Gr. $\pi \varepsilon \rho \acute{a}\omega$ 'I pass through'. Goth. $m\ddot{o}l$ 'I ground' O.H.G. muol from mala malu, \sqrt{mel} - O.Ir. melim

O.C.Sl. melją beside Armen, malem Lat. molō Cymr. malaf (§ 523 p. 86). Goth. grof 'dug' O.H.G. gruob from graba grabu, \(\sqrt{ghrebh}\)- O.C.Sl. greba. Goth, sl\(\bar{o}\)h 'struck' sl\(\bar{o}\)hun (instead of *slogun) O.H.G sluoh (also sluog) sluogun from slaha slahu, V slek- sleg- O.Ir. sligim. O H.G. qu-wuoq 'mentioned' from gi-wahann(i)u (§ 623 p. 161), vueg- Gr. inoc word'. In most, if not all, of the Verbs of this sort, the first step must have been for the present to get an a, and the next to form a perfect with \bar{v} on the analogy of $sk\bar{v}f$ $sk\bar{v}bun$ from shaba. See § 509, page 75. There is no need to suppose that $f\bar{o}r$ and $m\bar{o}l$ were formed thus in connexion with some present, if we suppose that they date from a period when this whole class of perfects still had the weak stem in the plural of the indicative, and so forth At such a period, *far- and *mal- = *pr- and *ml- may have been the weak perfect stem. If so, then the sing, $f\bar{v}$ and $m\bar{v}$ were formed beside them just as in Greek μέμαλε took the place of *μεμολε on the analogy of forms with us-uat- (§ 859 p 40), a step further, and we have forun and molun following the singular.

§ 889. Some perfects of this class are based upon an extended root or a present stem which already has some characteristic (cp. §§ 847, 884, 891). O.H.G spuon 'I enticed' from spunu (§ 614 p 152), Mod.H.G. būk instead of Mid.II.G. buoch O.H.G. buoh following backe O.H.G. backu for *bak-nō (§ 888 p. 436). Goth vōhs O.H.G. uuohs 'I grew' from vah-s-ja wahsu (§ 657 p. 192) O.H.G. wuosc 'I washed' from wascu probably for uat-shō (§ 676 p 209). Goth stōp O.II.G. -stuot stuont 'stood' from sta-nda sta-ntu 'I stand' (§ 634 p. 172, § 685 p. 216). O.H.G luod from (h)la-du A.S. hla-de 'I load' (§ 689 p. 220).

§ 890. Group II B. Perfects which ever since proethnic Germanic have had vowel gradation in their root, but no reduplication, were formed from roots of the e-series. We divide them into two classes, (1) those in which the ablaut of the preterite present agrees with that in other tenses, (2) those

in which it does not Most of the following examples have come down from the parent language, as we have seen above.

(1) Goth. báit 'I bit' bitun opt. 1st pl. biteima O.H.G. beig bizgun bizgīm O.Icel. beit bito bitem Pret-pres. Goth. váit 'I know' vitun O.H.G. weig wizzun O Icel. veit vito. Goth. -báup 'offered' -budun O.H.G. bōt butun O Icel. bauā buāo. Pret-pres. Goth. dáug 'valet' O.H.G. toug tugun.

Goth band 'I bound' bundun O H.G. bant buntun O.Icel. batt bundo. Goth. varp 'I became' waurpun O.H.G. ward wurtun O.Icel. vard urdo'). Pret.-pres Goth. ga-dars 'dares' -daursun O.H.G. gi-tar -turrun

- (2 a) Perfects with Preterite meaning. Goth. bar 'carried' bērun O.H.G. bar bārun O.Icel bar bōro (bāru). Goth. qam 'came' qēmun O.H.G. quam quāmun O.Icel. kvam kvōmo (kvāmu). Goth. sat 'I sat' sētun O H.G saz sāzun O.Icel. sat sōto (sātu). Goth. brak 'I broke' brēkun O H.G. brah brāhhun. Goth. frah 'asked' frēhun O.Icel frā frōgo (frāgu). There are reformates following this class, one is Goth baþ 'I bade' bēdun O.H.G. bat bātun from pres. bidja bitt(i)u, √ bheidh- (§ 722 p. 253).
- (b) Preterite-presents. (ioth skal ishall skulun O.H.G. scal sculun O.Icel. skal skolo Goth. man ithinks munun O.Icel. man muno. Goth. ga-nah is enough *-nauhun O.H.G. gi-nah A.S. pl. ze-nuzon (probably akin to O.C.Sl. nesą I carry, 'nek-).
- § 891. Numerous perfects of this class are made from roots already extended, or from characterised present stems (cp. §§ 847, 884, 889).

With n-suffix (§ 614 p. 151 f.). O.H.G. spurnun 'they trod, kicked' (sing. *sparn) A.S. spearn spurnon from spur-nu. O.Sax. fragn 'I asked' frugnon A.S. fræzn fruznon (cp. 1st sing. ga-fregin in the Prayer of Wessobrunnen) from frig-nu friz-

¹⁾ Of the same sort is Goth. prask 'I threshed' pruskun O.H.G. drask druskun, which probably contains the present suffix -sko-. Cp. § 676 p. 209, and § 891.

-ne Goth. fraih-na. Goth. skáin 'appeared' skinun O.H.G. scein scinun from skei-na scī-nu; so too O.H.G. swein 'disappeared' from swī-nu etc. O.H.G. qual(l) 'welled up' quullun from quillu for *quel-nō; so also hal(l) 'sounded, rang out' hullun from hillu for *hel-nō, and other like forms.

With Nasal Infix (§ 634 pp. 170 ff) Goth sagg 'sank' suggun O.H.G. sank sunkun from sigga sınku, V sezg- sezg-. (toth stagg 'struck, knocked' stuggun from stigga, \sqrt{steig-.} ().H.G chlamb 'climbed' chlumbun from chlimbu, from glei-p-. O H.G. sprang 'sprang' sprungun from springu, O.H G scrant 'burst' scruntun from scrintu, sger-dh- - (toth fank 'found' funkun ().H (+ fand funtun from finha undu, as I conjecture from pet. — Goth. vand 'turned' vundum () II (i want wuntum from vinda wintu, from yet-t. The Goth perha () II. (dihu 'I thrive', for *perazō, which is connected with Lith tenhù inf têk-ti (\sqrt{teg-}), had originally a perf. *pan, *pungun, which is now represented only by A.S. dunzon (ep part ze-dunzen () Sax qi-thungan); the regular phonetic change of the present led to the formation of the perf forms (Joth Dáth () II († dēh following stáig beside sterga etc (I § 67 Rem 2 p 57)

From Present stems in -nnō for -ny-ō and in -nnō for -ony-ō (\$ 654 pp 187 f) (foth. du-gann 'began' -gunnun (),H.G. bi-gan -gunnun from du-ginna bi-ginnu = Skr. hi-nva-ti. (foth. rain' rain' runnun O.H.G. rain runnun from runna runnu = Skr ri-nvāmi Idg *ri-ny-ō or = Idg *r-enyō. O.H.G. tran 'I separated myself' trunnun beside trinnu = Idg. *dr-enyō.

Root with s-extension (§ 664 p 197). Goth. -pans 'l pulled' -punsun O.H.G. dans dunsun from pin-sa din-su, \sqrt{ten} -O.H.G. bal(l) 'barked' bullun from billu = *bhel-sō. Goth. fra-láus 'I lost' -lusun O.H.G vir-lōs -lurun from -liu-sa -liu-su 'I lose'

From the sk-Present ().H.(†. ir-lisku 'I quench', the perf. ir-lask *-luskun (§ 676 p. 208)

Root with t-extension (§ 685 p. 215 f.). O.H.G. flaht

'planted' fluhtun from fluh-tu, faht 'fought' fuhtun from fih-tu'). Goth ga-va \bar{p} 'bound' - $v\bar{e}$ dun OHG wat wātun from ga-vida witu, ground-form doubtless *u-t \acute{o} Compare the perf. Goth vand, which belongs to a t-present with nasal infix, p. 439.

Root with dh-extension (§ 698 p 225). O.H.G. brat(t) 'I swung, jerked' bruttun AS bræzd bruzdon from brittu brez-de. Also with internal nasal OIIG. scrant from sqer-dh-, p. 439.

Root with d-extension (§ 699 p 225 f.) Goth. gaut 'poured' gutun O.H.G gōz quzzun from gru-ta giu-zu. O.H.G. flōz 'flowed' fluzzun from flu-zu. Goth. svalt 'was burnt up' svultun O.H.G swalz swulzun from svil-ta swil-zu.

§ 892. Levelling between perfect singular and plural as we see it in Mod H.G biss 'I bit' following bissen, quoll 'welled up' following quollen, banden following band 'I bound', which is also seen here and there in Middle H.G, is comparatively rare in the old Germanic dialects, examples are A.S. nom nomon contrasted with O.H G. nam namun', O.Icel. of ofo instead of vaf ofo = O H G wab uābun (O Icel vefa O.H.G. weban 'to weave').

§ 893. We now have to examine in Group II (A) and (B) those forms which lack the reduplicating syllable

The following perfects were always unreduplicated.

(1) Weak forms like Goth. sētun mētun qēmun; see § 848.3 p. 393. The reason why they drove out of the field forms of the same type as Skr pa-pt-úr sēdúr = "sa-zd-ur, was that in course of phonetic change the unity of the tense-system had been considerably destroyed, thus the reduplicated 3rd pl. of the Goth. mitan must needs become *mintun (sing. mat), from Goth. saihvan the form must be *sisk(u)un (sing. sahv), from Goth qipan it must be *qaihtun (sing. qap), from O.H.G. jesan

¹⁾ Mid.H.G pl vlähten vähten, and even in O.H.G. brästun, beside an earlier form brustun from bristu 'I break' For the change in the perf plural see Osthoff, Perf. 119

nōmon is regular, and drew the singular under the influence of for /oron.

it must be *jīrun (sing. jas), and from O.H.G. lesen it would be *lillun (sing. las). Thus the same difficulty had to be met here as was met in Sanskrit by the spread of the type sēd-yēm- (§ 852 p. 401).

(2) The pret.-pres. Goth dih and probably also $v\acute{a}it$ which answers to Skr. $v\acute{e}da$ and Gr $o\acute{l}\delta\varepsilon$, see § 848 p. 391, § 888 p. 436.

Further, the following may be regarded as perfect forms originally unreduplicate

- (3) Goth fr-et -etun OIIG az O.Icel at, and
- (4) O.Icel. $\bar{o}k$ $\bar{o}ho$, Goth. $\bar{o}n$ and $\bar{o}g$, see § 848. 3 and 4, pp 393 f.

As regards the Preterite-Presents in particular, we must remember that the $3^{\rm rd}$ pl Goth munum and ga-daursan were in all probability injunctive, as we may regard vitum (§ 508 p. 74 f.). The two former may not have been associated in one tense with man and ya-dars until the reduplication was quite lost in the singular

If, again, we remember that among forms like $sk\bar{o}f$ (Lat. $sc\bar{a}b\bar{\imath}$) there may very well be some which were unreduplicate when they became part of the Germanic stock, it cannot seem strange that Germanic has lost its reduplication to such a great extent. Such forms as the perfect of $h\acute{a}itan$ or valdan were exempted from the change, and kept their reduplication, simply because their present and perfect had the same root-vowels, and without the reduplication there would be no sufficient difference between them.

As in the Italic perfect system we find preterite forms of our Present Class II B (e g. Lat fid-i-t, § 867. 5 p 414), so we do in West Germanic From this group we cite the 2nd sing. like O.H.G. bizzi A.S. bite 'thou didst bite' (Skr. ά-bhid-a-s Lat. fid-i-t), O II.G. zigi AS. tize 'thou didst draw' (Skr. ά-dis-a-s), see § 532 p 928, further perhaps those like O.H.G. māzi AS mæte 'thou measuredst' (Gr. ε-μήδ-ε-o), see § 514 p. 81. Such forms as these were at first quite rare In proethnic W.Germ. they had become identical with the 2nd sing.

optative, whose ending *-īz became -i, e. g. A.S. bite opt. for *bitiz. And by analogy of these forms, which legitimately had both optative and indicative meanings, a large number of others which originally were optative only and nothing more, took the indicative meaning too. An example is O.H.G. pange A.S. fenze. But in O.H.G. and O.Sax the 2nd sing, opt and indic were differentiated afresh, -i being restricted to the indicative, and in the optative the ending -7s (-ist), used since proethnic Germanic beside *-āz, being made proper ending: O.H.G. indic. bizzi opt bizzīs(t). but AS bite opt. and indie. both. reason why the old forms in -t (-b) preserved in Gothic and Norse such as Goth báist 'didst bite' gaft 'gavest', were driven out of the West Germanic speech, is doubtless chiefly this, - that the stem-final consonant which preceded the personal ending was so often changed, the form thus becoming isolated (cp. Gr. $\pi i \pi \sigma v \theta v_s$ etc. with $-a_s$ instead of $-\theta a$)

This West-Germ 2nd sing pret, seems to belong entirely to unreduplicated present stems. (It seems impossible to prove that any old reduplicated forms like Lat. te-tig-i-t Gr. xe-xáó--o-rro are included amongst O H.G. fiangi hiazi and that type.) But since they were absorbed into the Perfect system in West-Germanic, not before, we have no right to assume that they have at all aided in the tendency to drop the reduplicating syllable.

By analogy of the thematic present we have O.H.G. Alemann. eigamēs. uāramēs (cp. piramēs instead of piram).

Balto-Slavonic

§ 894. The inroads into the Idg. Perfect system here took a direction opposite to their course in Keltic and Germanic. The Participle survived, while the Finite Verb disappeared.

One vestige of this has been left in Slavonic; the O.C.Sl. věd-ě 'I know', answering to Skr. véda Gr. olda Goth. váit, with the middle ending, which here as in Lat. (tutud-ī) drove

out the active. This perfect was transformed into a present, giving věmǐ 'I know' 3rd sing. věstǔ; the 2rd pl. věste opt. 1rd pl. vědimǔ imper. věždǐ (which keep ě instead of ǐ by levelling out all but the strong stem) may be real perfect forms; if so their present inflexion is due to the attraction of the other forms into the present system

How the first-named participles, kirtes critic and the like, lost their reduplication, cannot be made out, the losses which the Perfect System of this group of languages had undergone before the historical period begins are too great to admit of this being done. But anyhow the reason was not regular phonetic change, any more than it was in Germanic.

The agreement of the initial syllable in Lith. $\tilde{e}j$ - $\bar{e}s$ $ki\tilde{r}t$ - $\bar{e}s$ etc. and the connected present stems $\tilde{e}j$ -o $ki\tilde{r}t$ -o (§ 586 p. 126 f.) caused the coining beside $d\tilde{e}$ -jo $st\acute{o}$ -jo of the part. $d\tilde{e}j$ $\bar{e}s$ $st\acute{o}j$ $\bar{e}s$. Just so the agreement between mir- $\bar{e}s$ gim- $\bar{e}s$ etc and mir-e gim-e (§ 593 p. 133) caused the coining beside $\tilde{e}m$ -e of the partic. $\tilde{e}m$ - $\bar{e}s$ instead of *im- $\bar{e}s$ (Pruss. immus- O.C.Sl. $im\tilde{u}$). Vice vers \hat{a} , by analogy of participles similar to $s\tilde{e}d$ - $\bar{e}s$, as $v\tilde{e}m$ - $\bar{e}s$ (from vemiu 'I vomit') $g\tilde{e}r$ - $\bar{e}s$ (from geriu 'I drink') were formed the preterites $v\tilde{e}me$ $g\tilde{e}re$ with e in the root syllable.

PERIPHRASTIC FORMATIONS

§ 895. We may notice here a number of periphrastic formations which were more or less intimately connected with the Verbal System. Some of them undoubtedly existed in the parent language, though at that time not one had become fused into a single word.

In the historical period, these syntactical groups, which for convenience we shall call phrases, are sometimes found in the shape of single words, as Lat. ferē-bam O.C.Sl. nesē-achū, sometimes they seem to be changing from phrase to word before our very eyes, as Skr dātāsmi instead of dātā asmi; 1) sometimes they were still phrases, as Lat. factus sum, O.H.G. nard ginoman. Where the position of the auxiliary is not fixed as regards the verbal noun, coming either before or after it, the phrase could not fuse into one word.

The use of a Participle for the predicate, particularly the part. pret middle or passive, with or without the auxiliary esor a synonym of it, is a usage which occurs all over the Indo-Germanic area, examples of this are Skr. ištā dēvātāh honoured are the gods' ištā dēvātā āsan 'honoured were the gods' (see Delbruck, Altind Synt 392 ff., Spiegel, Altpers. Keilinschr ² § 68 p. 189). This predicative use of the participle was found in the parent language, especially when it was wished to lay stress on the duration of an action more than could be done by the simple forms of the finite verb. In several languages periphrases of this kind were permanent parts of some tense, where they were combined with simple forms, as Att. γεγραμμένου εἰσί instead of γεγράφαται, Lat. āctus est (cp. Gr ἦνται), Goth. gemēliē ist 'γέγραπται'.

§ 896. Sanskrit.

Beginning with the Brahmanas, we find a periphrastic future, consisting of a nomen agents with the suffix -ter- (as dātár-

¹⁾ Compare Ital. canterd Fr chanter at for Lat. cantare habed, Serv. ubiću ('I will kill') = O C.Sl ubiti choštą, Pol działałem -aleś etc. 'I have built') = działał jesm. — jeś etc. '

'dator') and the verb 'to be', but only in the 1st and 2nd persons. There is a difference in usage between this and the sió-future (§ 752 p. 273 f.), the latter being used only for something about to take place at a certain particular point of future time, without any reference to the intention or hope of the speaker. On the analogy of dātāsmi instead of dātā asmi we have 1st pl. dātāsmas instead of dātārah smas etc (cp. Lat potis sumus, not *potēs sumus), a certain token that the phrase has become a word. Middle forms are found as well, e. g dātāsmahē. Compare II § 122 p 385.

Again, it is not until the historical period that we see a productive type arising out of the Periphrastic Perfect, the union of a case inding in -åm with cakåra, åsa, or babhåva, as vidå cakāra 'I knew', gamayā cakāra 'I caused to go'. The outspread of this type was due to a lack which it supplied, for there was need of a historic preterite to perfects which had a present meaning, as vēda 'I know' bibhåya 'fears'. Such a preterite was also wanted by Causals and Denominatives, which originally had no simple perfect. Lastly, they were most desirable where present and perfect were not clearly distinguisht in form, as in ās- 'to sit'. Following vidām āsām and the like, forms like gamayām and bibhayām were derived from the present stem (pres. gamā-ya-ti bi-bhē-ti)

Remark. Since in such formations cuhára is almost exclusively used in the older language, and babhûva never, Delbrück (Altind Synt 426 f) infers that $-\hat{a}m$ is the ending of the acc sing of an abstract noun in $-\bar{a}$ (op $bhid\hat{a}$ 'split') The accusative must have crystallised, much as the infinitive did, before asa and babhuva could be used with it. But there 18 such a striking parallel in Lat. are facio and are fio (Deecke, Facere und fieri in ihrer Composition mit andern Verbis, Strassburg 1873), arē--bam, flū-bam, amū-bam and OCSI nese-achu dela-achu, that we can hardly separate the $-\bar{\alpha}m$ of Sanskrit from the cases in $-\bar{e}$ or $-\bar{a}$ preserved in these forms. -ē and -ā must surely be instrumental; be it observed that the forms in -ē can often be connected with o-stems (cp. III § 275 p 176), and often with e-stems like Lat. quie-s Gr. χεή δμο-κλή (§ 578 p. 120), e g. plē- in plē-bam It may be that vidam when used with cal ara is accusative; but when used with as- or bhu- it may be instrumental. That vidām might be instr. is shewn by O C.Sl. raka (III § 276 p 179) and Skr. pratarām (Hirt, Idg Forsch. I 20) and the like. Compare too the 3rd sing imper mid. vidām § 968.2.

§ 897. Armenian has several periphrastic formations; as the part, aor. (active or passive) in -eal coupled with em'I am', e. g gereal \bar{e} 'cepit, captus est' gereal $\bar{e}r$ 'ceperat, captus erat' from gerel 'capere, to take prisoner'

§ 898. (Freek. Here we find as far back as we can go variants γέγοαπται and γεγοαμμένος έστι with little or no difference in meaning; and in Attic. beginning about 400 B.C., the periphrastic form became obligatory, and that in -αται and -ατο dropt out of use altogether γιγοαμμένοι είσι and ησαν. In the other tenses and moods -αται and -ατο had dropt in Attic long before, giving place to -νται and -ντο

A future perfect, to express what will be completed in the future and will have enduring effects, could be formed only in the Middle and only from a few verbs, e. g. λελείωεται βεβλήσεται (§ 756 6 p. 276). For the Active, and for such verbs as could not form this tense, a participle + εσται had to be used; as κατακεκονώς εσται he will have killed, he will be a murderer, τετελεσμένον ἔσται he will be accomplisht.

The periphrasis of the perfect by using εχω with a participle, as κρύψᾶς εχω 'I keep hidden' (Lat abditum habeō), gained currency largely because certain verbs were without the simple perfect form, e. g. ερασθείς εχω (Plato) from εράω 'I love', στήσᾶς έχω (Soph.) from τστημι 'I place' (because Εστηκα is intransitive).

Desideratives in -σείω at first used only the participle active, as ὀψείων 'wishing to see'. This form, as Wackernagel makes very probable, comes from ὁψει ἰών 'going out for to see' (Kuhn's Zeitschr, xxviii 141 ff.), similarly ξυμβασείων 'wishing to make a bargain' from ξύμβασες, ἀπαλλαξείων 'wishing to get rid of' from ἀπάλλαξες. When the phrase had become a single word, the Attic added Indicative, ('onjunctive, and the other parts of the conjugation. Compare Lat. eō with the supine, as datum eō (the same in Umbrian, aservato eest 'observatum ibit'), from which type of sentences sprang the so-called fut. inf. passive datum īrī (Kühner, Ausf. Gr. der lat Spr., ii 534 f.).

§ 899. Italic and Keltic. In both we see the present of bhey- 'to become' joined with a preceding infinitival word to express the future. Lat. arē-bō vidē-bō albē-bō, cubā-bō flā-bō plantā-bō, (O.Lat.) scī-bō audī-bō, ī-bo da-bō, Falisc. carē-fō pipā-fō. O.Ir. no charub 'I will love' for *-bhy-ō, elsewhere stem *-bhy-ā-, as in 3rd sing. -carfa carfid; dolēciub 'I will relinquish' -lēicfea lēicfid.

The Umbr.-Samn Perfects like Osc. aa-mana-ffed 'mandavit' contain the Idg thematic aorist *(e-)bhu-e-t, see § 874 p 422 f. The pret. of Class X *(e-)bhu-ā-m (§ 583 p. 123 f.) from the time of pr Ital. made Imperfects, e. g Lat. ārē-bam vidē-bam albē-bam plē-bam nē-bam dīcē-bam (in O.Lat also a future like dīcē-bō), capiē-bam farciē-bam fīniē-bam, cubā-bam flā-bam plantā-bam, (O Lat) scī-bam fīnī-bam, ī-bam da-bam, Osc fu-fans 'erant'.

There is unquestionably some connexion between the first word in Latin phrases like are facio and the case-forms in -ē and -a (instr. sing.) in the first part of the O.C.S. imperfect, vidě-achă děla-achă, there is probably a connexion with such a form as Skr. vidám in vidá carati. See § 896 Rem., § 903. Following the lead of Lat. plantā-bō, we may derive O.Ir. no charub from *carā-bō (carfid from *carā-bāt(i), etc.). But there is no proof that a was long; and as the saorist ro-char comes from *carās-t (§ 840 p 377), it is possible that *carā-bō was the pr Keltie form. Still, that the first member was originally a nomen actionis need not be doubted whichever theory we adhere to.

§ 900. In Italic the Idg. perf und. passive gave place to a periphrasis with sum and the to-participle. Lat. ortus sum, captus sum, plantātus sum, fīnītus sum, Umbr. screhto est 'scriptum est' screihtor sent 'scripti sunt', Osc. prúftúset 'probata sunt. How firmly rooted in the verbal system this periphrasis became is clear from two facts. (Whether the same holds for Umbro-Samnitic we cannot say; there is too great dearth of material.) (1) As the act. fīnīvit meant both 'he has

ended and done with', and in narrative 'he put an end to', so finitum est, which properly meant 'it is ended and done with', got in addition the meaning 'it was ended'; and finitum erat meant not only 'it was' but 'it had been ended. Beside praeceptum est 'it is prescribed' we get praeceptum fuit 'it was prescribed'. (2) The other fact is the use of this periphrasis with deponents, where we see e.g. confessus sum made the perfect of confiteor for all purposes, and taking the same construction (II § 79 p. 219)

Just as in Attic the 3rd pl. γεγοάφαται was driven out by γεγοαμμένοι εἰσί; so in Latin — perhaps even in proethnic Italic — the old 2nd pl. middle (cp Skr bháradhvē Gr. φέφεσθε, § 1063) was superseded by a periphrasis with a participle *feriminī estis — Gr. φεφόμενοί ἐστε, which in the historical period dropt its copula, and then the participial character of feriminī fell out of sight; see II § 71 p 165. We may conjecture that *feriminī erātis, *feriminī essētis were also used. By and by this form buried itself in the present system, which it became part of; then its ending -minī became recognised for a personal suffix, and lastly we have ferāminī ferēminī ferēminī ferēminī ferēminī ferēminī.

Old Latin had an indeclinable inf fut. in -tūrum, as crēdō mimīcōs meōs dictūrum (C. Gracchus), which Postgate (Class Review, v 301) neatly explains as compounded of dictū and erum — Umbr erom Osc ezum 'esse' To this crystallised infinitive esse was superadded, as dīxērunt omnia . . . prōcessūrum esse, and then, the apparent analogy of hoc prōcessūrum (esse) with hoc factum (esse) caused the form to be inflected as an adjective (o-stem), e g. hanc rem prōcessūram (esse) etc. Similarly, as beside (ir ἀψείων an indic ἀψείω was formed (§ 898 p 446), so beside mē datūrum (esse) we have e. g datūrus sum.

Remark. The traditional interpretation, that $dat\bar{u}$, us is an extension of dato. (cp II § 122 p 387), has been recognised for wrong by Kretschmer too (Kuhn's Zeitschr, XXXI 463 f). He also connects the form with the supines in $-\bar{u}$ and -um, but assumes the suffix to be -ro-, comparing Gr $la\chi \bar{v} e \bar{v} - \bar{v}$ from $la\chi \bar{v} - \bar{v}$. Postgate's explanation I think the likelier.

In formation, as in meaning, there is no connexion between the verbal adj. in $-t\bar{u}rus$ and the abstract noun in $-t\bar{u}ra$; the latter has nothing future in it, and contains a secondary suffix $-r\bar{c}$. As regards Desideratives like $parturi\bar{v}$ canturi \bar{v} , see § 768 p. 282, § 778.1 p. 301.

Further, Latin has the periphrastic inf. fut. passive, datum iri, mentioned above in § 898 p. 446. The complete fusion of these two words is shown by the spelling -tuiri instead of -tum iri (see Brandt, Arch. Lat. Lexicogr II 349 ff.; Schmalz, Fleckeisen's Jahrbb., 1892, pp 79 f).

In Umbro-Samnitic, we have the part. perf. active (suffix -ues-) combined with an injunctive from es- 'esse' to make a future perfect, as Umbr. dersicust 'dixerit' Osc. fefacust 'fecerit'. See § 872 p. 421.

§ 901 Germanic The Idg. perf. passive in its original meaning, that of a present perfect, used to describe what has been completed in the past and is now a finished result, has been superseded all through Germanic by the phrase made up of the part. pret pass + the auxiliary bin, e. g. Goth. gamēliþ ist 'γέγραπται, it is written', O.H.G. ginoman ist 'it is taken'; similarly pret. Goth. ana þammer sö baúrgs izē gatimrida vas 'ἐφ' οὖ η πόλις αὐτῶν ψ' οὐόμητο, was built, stood builded', O.H.G. ginoman was 'it had been taken, was in that condition'. Cp. Lat. scrīptum est 'it is written' scrīptum erat 'it was written' § 900 p. 447 f.

The same Idg form in its later function of a historic perfect was superseded by the same participle with the auxiliary ward (wurde), e. g. Goth. fralusans vas jah bigitans varþ 'άπολωλω'ς γ̈ν και ηύριθη, was lost and has been found again', O.H.G. ginoman ward 'it was taken'.

Everywhere but in Gothic the present passive too had to be superseded by a periphrasis: O.H.G. ginoman wirdst or ist 'is being taken' (Goth, nimada).

In the Active, the preterite present meaning could no longer be clearly put by the old perfect, Goth. skaiskaip 'parted, divided' nam 'took' for example, as this had become a historic tense. Nor could it be put any better by the "weak" Preterite, as Goth. vaúrhta 'worked' nasida 'saved'. This led to a periphrasis (not found in Gothic) of bin and habe with the preterite participle, as O.H.G queman ist 'he has come, and is here' pret. queman was 'he had come and was here', funtan habet 'he has found and possesses' pret, funton hubēta 'he had found and possessed'. The participle with haben was a true passive and belonged predicatively to the accusative object, ep Lat cognitam hanc rem habet and gr. Jounto'r sym 'abditum habeo' beside ιρύψας εχω (see Thielmann, Abhandlungen W. v. Christ dargebracht, München 1891, p 298) The participle with the presents bin and habe was used later, in Upper and Middle German, as a simple narrative tense without any reference to the present (cp. Lat finitum est 'it was ended' on the analogy of finivit 'cuded'), whilst with the preterites war and hatte it had always served to express the pluperfect (cp. Lat. finitum erat 'it had been ended')

In Germanic the Idg sco-future was lost, nor did this branch, as others did, use certain conjunctive forms with future meaning only (as Lat $er\bar{o}$). For future events were used either perfect Present forms (see Streitberg, P.-B Beitr. xv 119 ff); or the living conjunctive, i. c. the Idg. optative (as Got. jah sijamu po tra du leika samin 'zai foortai oi dvo είς σύργα μίαν) or thirdly, periphrases with auxiliaries which naturally pointed to the future. But the use of these last with dependent infinitive (Goth. haban, duginnan, skulan, O.H.G. scolan. muozan, wellen wollen) did not lead to any fixt type in the old Germanic dialects, and each auxiliary bore its own Only phrases with sollen and wollen gained proper meaning by degrees a simple future sense. Besides these periphrastic turns there was an idiom made up by werden (Goth. vairpan O H.(f. werdan) with the present participle, which is found a few times, in Gothic, as jus suurgandans vairbib vusic λυπηθήσεαθε, you shall be grieved' This idiom in O.H.(4 little by little won its way till all others had disappeared, but in Mid II G. the participle was exchanged for the infinitive.

§ 902. Baltic. In Lithuanian all the old middle forms which were used passively dropt out of use, and the reflexive with -si only partially did for the passive, as telp kalba-si instead of telp kalbamà 'so it is said'; hence a periphrasis was used for the passive in all tenses. To express habit or duration the pres. part. in -ama-s is used, as tal (yrà) sākoma 'that is being said, that is usually said', jls prakéikiams bùs nu visu 'he is constantly curst by all'. For completed action the participle in -ta-s is used; as jls (yrà) prakéiktas 'he is accurst', dùrys uždarýtos bùvo 'the door was shut'. But it is usual to avoid passive constructions and so to express the idea as to make the active do for it.

Active Preterites like villaü (§ 586 p. 126) and viriaü (§ 593 p. 133) combine the meanings of historic perfect and present perfect, as isz-áugo 'he grew up' and 'he is grown up'. If it is needful to make the latter meaning clear beyond a doubt, the part. pres. act. with esù may be used, as àsz (esù) iszáugēs 'I am grown up', àsz (esù) iszmókēs 'I have learnt', is bùvo pavañgēs 'he was impoverished'. This participle with buvaŭ also serves for a more exact expression of pluperfect time, cp. O.H G geman was 'he had come' § 901 p. 450

Wish is expressed by the Injunctive forms 1. pl -bime 2. pl. -bite from 1/bheu- preceded by the Supine in -tum, as suktum-bime See § 727 p 257 The 3rd sg. pl. and dual suktu is without the auxiliary, for the 1st sing we have sukcziau sukcze There are a great many bye-forms of this mood in the dialects (see Schleicher, Lit Gramm 228 f.; Kurschat, Gramm d. litt. Spr. 300 f.; Bezzenberger, Beitr. z. Gesch. d. lit. Spr. 212 ff; Leskien-Brugmann, Lit Volksl. u. Märch. 315 f., for Lettic, see Bielenstein, Die lett. Spr. II 158 ff.); we cannot here enter into the history of these, which is sometimes very obscure.

§ 903. Slavonic. The Slavonic Imperfect is the imperf. * $jach\tilde{u}$ 'eram' for * $\tilde{e}s-o-m$ (§ 510 p. 76) added to the Instrumental case of nomina actions in $-\tilde{e}$ and $-\tilde{a}$. To the first members of these compounds there are parallels in Italic

and Keltic. and doubtless in Sanskrit. as we have seen in § 896 Rem. p 445, § 899 p 447 O.C.Sl. vidě-achů 'I saw' like Lat. vidē-bam, oslabě-achů 'I became weak' like albē-bom, nesě-achů 'I carried' pečaachů 'I backed' for *peké-achů (I § 76 p. 65) like ferē-bam, borjo-achů 'I fought' for *borjé-achů (see as cited) like capiē-bam, laka-achů like plantā-bom

For Present Perfect was used the pres. part in -lū (II § 76 p. 212) with jesmī, as prišīlū jesmī 'I am come, I am here' The same participle and béarhū or běchū formed the Pluperfect, if need were to express this point of time exactly, as posūlātū běaše 'he had sent'

As in Germanic, when the old sio-future was lost (cp. § 760 p 278), future time was expressed either by the present of perfect verbs, or by a periphrasis consisting of Auxiliaries — dependent Infinitive. Such auxiliaries were in O.C.Sl. imamī ('I have'), chošta ('I wish'), načīna ('I will begin'), all of which with others (Miklosich, Vergl. Gr. iv 862 ff.), including bada ('I will, will be'), occur in other dialects. In some of the modern dialects, one or other of these verbs is used exclusively, just as werde with the infinitive in High German.

UNEXPLAINED FORMATIONS.

§ 904. A number of fertile tense types have now, with certain reservations, been compared with those of other languages, or explained as due to some analogy which has been pointed out within the same language, for instance the Greek a-perfect (§ 864 Rem p. 412), or the Latin preterite in -vī and -uī (§ 875 p. 423) But there are many such types, characteristic enough in their own language, whose origin is still so dark that they cannot be brought in place amongst those already given These may now be mentioned.

§ 905. Aryan. The 3^{rd} sing aor. pass. (also mid.) in -1, mostly with \bar{a} in the root-syllable, in Vedic and Avestic, with or without augment like the other augmented tenses (as

usual, the unaugmented forms can have a conjunctive meaning). Examples: Skr. á-vāc-i vác-i Avest. Gath. a-vāc-ī vāc-ī vueq'speak', Skr. á-dhār-i O.Pers. a-dār-iy v dher- 'hold fast';
Skr. ájani v gen- 'gignere', ádarši v derk- 'see', áyōji
v jeug- 'yoke', á-jñā-yi stem gn-ē- gn-ō- 'noscere'; Avest. jaini
v ghen- 'strike, slay'.

It has often been assumed that -i is identical with the ending of the 1^{st} sing. mid -i (as in \acute{a} -kr-i), just as $-\bar{e}$ in the perfect did for both 1^{st} and 3^{rd} singular. The difference of vowel grade in the root syllable is generally compared with that in the 3^{rd} sing. u- $v\acute{a}c$ -a: 1^{st} sing u- $v\acute{u}c$ -a Compare § 1054. 3.

- § 905. The Armenian verb is permeated with analogical formations, which have largely destroyed the original structure of it. Specially difficult are the Conjunctive, Aorist, and Future forms characterised by -c-, such, for instance, as conj pres. gericem (for *gerēcem) aor. gereçi (for *gereaci, 3rd sing. gereac) fut gerecic from gerem 'capio', where not only does c need further explanation (cp § 672 pp. 204 f.), but also the vowels that go with it.
- § 906. In Irish, no explanation has been found for what is called the Secondary Present (indic. and conj impf.), 1) as no berinn 2nd sing no bertha etc. The 3rd sing. no bered is perhaps for *bhere-to = Gr. φέφε-το.
- § 907. In Germanic, explanation is still to seek for the much discussed Weak Preterite, 2) whose chief mark is a t-sound.
- 1) Windisch, Das ir praes secundarium, Kuhn's Zeitschr. xxvii 156 ff.
- 2) Begemann, Das schwache Präteritum der german. Sprachen, Berl 1873 Idem, Zur Bedeutung des schw Prat. der germ. Spr. Berl 1874. Fr. Carter, On Begemann's Views as to the Weak Preterite of the Germanic Verbs, Transactions of the Am. Phil. Assoc VI (1875) pp 22 ff Wickberg, Über den Ursprung der schwachen Präteritalbildung in den german Sprachen, Lund 1877 Bugge, Das schwache german praeteritum, Kuhn's Zeitschr. XXIII 523 Amelung, Die Perfecta der schwachen Conjugation, Zeitschr deutsch. Altert. XXI 229 ff Paul, Zur Bildung des schwachen Präteritums und Participiums, Paul-Braune's

This is found alongside of the so-called primitive Presents, as often as their part, pret. pass is formed with the suffix -to-, as Goth. vaúrhta O.H.G. worhtu from caúrkja v urk(i)u 'I work' Goth. þūhta O.H.G. dūhta from Goth. þūgkja O.H.G. dunk(i)u 'I think', Goth. O.H.G. brāhta from brigga bringu 'I bring'. Next, the Preterite Present has also this preterite as Goth. ga-daúrsta O.H.G. gi-torsta from qa-dars gi-tar 'I dare'. Goth skulda O.H.G. scolta from skul scal 'I shall', Goth. munda from man 'I think', kunþa from kann 'I know, learn'. Lastly, it is found with all weak verbs, as Goth. nasula O.H.G. nerita from nasja neriu 'I save', Goth salbōda O.H.G. salbōta from salbō salbōm 'I smear, anoint', Goth. habáida O.H.G. hapta habēta from haba habēm 'I have'

In the Indicative, the dental was followed by \bar{e} sometimes and sometimes \bar{o} , as Goth. 2^{nd} sing. nasidēs contrasted with O.H.G. neritos (but also chi-minnerodēs like O Sax. habdes); 1st and 3rd sing. Goth -da O.H.G. -ta, Norse Run 1st sing. worahto 'I made' 3rd sing wurte urte 'he made', in the plural O.H.G. -tum -tut -tun (Alemann. -tom -tot -ton), Goth. -dēdum -dēdup -dēdun. Opt. Goth. -dēdjau -dēdeis etc., O.H.G. -ti -tīs etc.

The connexion with the to-participle is unmistakable, if the treatment of the participal t under Verner's Law be borne in mind, e. g. Goth. kunpa like partic. kunpa, munda like partic. munda-.1) But is does not follow that the dental of the weak preterite was always Idg. t. Not so, but forms with Idg. dh, d, or th may be included in this group, and the relation to the participle may be secondary. Indeed, there must be some

Beitr. VII 136 ff Möller, Kunpa und das t-Präteritum, ibid. VII 457 ff Sievers, Zur Flexion der schwachen Verba, ibid VIII 90 ff. Collitz, Das schwache Prateritum des Germanischen, Am Journ Philol. IX 42 ff = Bezzenberger's Beitr XVII 227 ff. Johansson, Zur Flexion des schwachen Präteritums im Got, Kuhn's Zeitschr XXX 547 ff. Other works are cited in those here enumerated

¹⁾ For OHG forah-tu 'feared', whose old participle is the adj forah-t Got faühr-t-s 'timid', the present t must be taken into account (furiht(i)u Got faŭihtja). See § 685 p. 216.

such forms in the group; for example, O.Sax. libda 'lived' from \sqrt{leip} - cannot have had Idg. t in the ending, and the partic. qe-libd must be instead of *-lift and due to the analogy of the preterite.1) Just as the Latin Perfect included a variety of quite different tense forms, to which similar use has given the same inflexions, so the Weak Preterite in Germanic may have absorbed alien elements. That Goth iddia (pl. iddiedun) is the Sauskrit \acute{a} -y \ddot{a} -m or perhaps its byeform $iy\ddot{a}$ -m we have seen in § 478 p. 26, § 587 p 128 (compare § 886 Rem. p. 434). Preterites of our Present Class I. may be included in the weak preterite, since e g Goth mun-des 2) vil des may be equated with Skr 2nd sing mid. ma-thas (á-ma-thas) vy-thás $(\acute{a}-v_f-th\bar{a}s)$, compare (ir $\acute{c}-\tau\acute{a}-\vartheta_{IS}=$ Skr $\acute{a}-ta-th\bar{a}s$ § 503 p. 67. Again, () II (; wissun as an s-aorist may be compared with (ir. loar (§ 827 p 365), and forms like salbo-ta may be compounds of the same kind as Lat amā-bam OCSI děla-achū (§ 899 p. 447, § 903 p 451 f), having for the second member the preterite of $dh\bar{e}$ - 'do' *(e-) $dh\bar{e}$ -m, or the preterite \bar{a} -injunctive *dh-ā-m (§ 507 p 74, § 937)

§ 908 In Lithuanian, the growth of the Imperfect of habit in -darau is obscure, examples are pian-darau 'I used to cut' 3rd sing pian-daro part. pian-darēs (fem -darusi), sùk-darau 'I used to twist', matý-darau 'I used to see' The ending -arau recals baltarau pret. of baltayu 'I gleam white', and recals d in the present endings -d-inu and -d-au, treated in §§ 700 f. pp. 226 ff

¹⁾ Nothing prevents our putting this re-formation of the participle back to proethnio Germanic, and so Goth ga-hugd-s O.Sax yi-hugd thought, reason, understanding beside pret. O.Sax. hoyda hugda OHG. hocta part. O.Sax. gi-hugd O.HG ge-huct does not weigh against the connexion of Germ hug- with Skr šuc- (I § 439 p. 327, § 447 p. 332).

²⁾ For Goth. $mun-d\bar{e}s = Skr$ $ma-th\hat{d}s$ compare some recent remarks by Streitberg, Zur Germ Sprachgesch., 79.

FORMATION OF THE MOOD STEM.1)

INJUNCTIVE 2)

§ 909. Injunctive (or Spurious Conjunctive) is a name given to forms which look like unaugmented indicative forms belonging to a tense which is properly augmented; thus *bhere-t = Skr. bhárat Gr. $\varphi \dot{\epsilon} \varphi \varepsilon$, or imperf á-bhara-t $\dot{\epsilon} - q \varepsilon \varphi \varepsilon$. Injunctive forms therefore have the secondary personal endings.

In the parent language they had a very wide scope: perhaps these are really the oldest forms of the verb finite, which do not yet show in their form either distinction of time. or distinction of the ideas conveyed by the words indicative and conjunctive (wish, futurity) In historical times we find these used in three different ways

¹⁾ L Tobler, Übergang zwischen Tempus und Modus etc, see p. 33 footnote 1 S. Jellinek, Germanische Conjunctive, in: Beitr. zur Erklärung der germ Flexion (Berl 1891) pp. 94 ff

²⁾ The Author, Der sogen unechte Conjunct, Morph. Unt III 1ff. M Bloomfield, On Certain Irregular Vedic Subjunctives or Imperatives, Am. Journ. Phil v 16 ff Thurneysen, Der ir. Imperativ auf -the, Idg. Forsch. 1 460 ff.

(1) Indicative Present. Skr. Ved. cōdaya-t 'he sets afire' and others (Delbrück, Altind. Syntax 354 f.). Gr. Dor. and Cypr. φέρε-ς 'thou bearest', Att. τίθη-ς 'thou placest'; cp. also the Author, Gr. Gr ² § 160 Anm p. 185 on the present (timeless) use of the ind. aor., as in rάτθαν' ὁμῶς ὅ τ' ἀεργὸς ἀνηρ ὁ τε πολλὰ ἐοργώς ¹) Lat. vehi-s im-plē-s ī-s s-u-m (§ 528 p. 91) O.Ir. 2nd sing. -bir 'fers' for *bhere-s 3rd sing. -beir for *bhere-t O Icel ero eru 'are' for *iz-tinh (§ 507 pp. 73 f., § 508 p 74) Lith bij-o-si 'he fears' for *bhiz-ā-t, jű sto 'he girds' for *jōstā-t, Pruss u aitia 'he speaks' (§ 782. 4 p. 310); O.C.Sl. beretű 'fert' 3rd pl beratű for *bhere-t *bhero-nt with the particle u (§§ 999 and 1026).

The only difference between these and the indic forms in -ti -nti is that the latter have the particle i affixed; and this is apparently just what marked the new forms clearly out as present indicative (§ 973)

- (2) Indicative Pretente Skr Ved bhára-t 'he bore'. Gr. Hom. qερε 'he bore', special mention must be made of the Ionic frequentatives φεν'γεσνον etc. (§ 673 p 206), which regularly lack the augment Lat -bā-s Osc 3rd pl -fans, Lat erā-s (§ 583 p 124), Osc. kúm-bened 'convēnit' (§ 867. 5 p. 415). O Ir do bert 'he brought' for some middle form in -to (§ 506 p. 72 f., § 826 p 364) O.H G bizzi 'thou didst bite' = Skr (á-)bhid-a-s (§ 893 p. 441). Inth. bùvo he was'; O.C Sl. tekŭ 'I ran' Cp § 483 p 31 ff
 - (3) Conjunctive
- (a) Conj = Wish The 2nd pl and 2nd and 3rd dual were firmly rooted among the imperative forms as early as the parent language: Skr bhára-ta 'ferte' bhára-tam bhára-tām, Gr. φέφε-τε φέφε-τον, Lat. agi-te; O.Ir. 2nd pl. beri-d, Goth. 2nd pl. baíri-þ (2nd dual baíra-ts with primary ending); beside *es-ti is' Skr. s-tá s-túm s-tám, Gr. έσ-τε ἔσ-τον, Lat es-te,

¹⁾ The use of the augmented forms in the same way may be compared with the use of Skr aaāt instead of gāt after mā in the Maha-Bharata (Holtzmann, Gramm. aus dem Mahābh., 28).

8-Aorists Skr. αιιζ-tά-na (-na is a particle, see § 1010) aviš-tám aviζ-tám from áv-a-ti 'he desnes. Gr. δείξα-τε δείξα-του from δείχ-ντ-σι 'shows'. In the other persons the proethnic imperative has other formations.

But in some of the derived languages these other persons also are found with the sense of Wish: and here and there one of them does duty for some part of the imperative.

Skr. Ved. prå võcam 'I will praise', dås 'give', jušata 'let him be pleased' 3rd pl. jušanta, and many more. Then we have as part of the Aryan imperative such forms as 3rd sing. Skr. bhárat-u Avest. barat-u 'ferto' 3rd pl. Skr bhárant-u Avest. baran-tu 'ferunto', Injunctives + particle u (§§ 992 2 and 1017).

Gr. 2^{nd} sing mid. $q'\varphi_{\epsilon}\sigma \varphi'\varphi_{0}\sigma$ for $*\varphi'\varphi_{\epsilon}-\sigma\sigma$ (cp. imperf ξ - $\varphi'_{\epsilon}\varphi_{\epsilon}\sigma$), $\beta a\lambda \sigma \tilde{v}$ for $*\beta a\lambda \dot{\epsilon}-\sigma\sigma$ (on the accent of this form see § 958), $\varphi'_{\alpha}\sigma$ from $\varphi\eta_{-}\mu i$ 'I say', aor. $9\dot{\epsilon}\sigma$ $9\sigma\tilde{v}$ beside ξ - $9\varepsilon_{-}\mu\eta\nu$ 'I placed for myself', used as regular imperative forms. Rarely also the corresponding 2^{nd} sing. act. as $i\nu i$ - $\sigma\pi$ - ε - ε beside $i\nu i$ - $\sigma\pi$ - ε 'insece', ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-ini-

Lat. sequere = gr $i\pi \epsilon o$, as regular imperative.

O.Ir forms of the s-aorist, as comēir 'get up' for *-rec-s-s, tair 'let him come' for *-inc-s-t (§ 826 p. 363). Also the 2nd sing. imper mid in -the, as cluinte 'exaudi' beside indic. 10-chluinethar, aigde 'fear' beside -āgur, foilsigthe 'revēla', since -the is the Skr. secondary ending -thās (§ 1051).

O.H.G. ni curi 'noli' for *kuz-i-z *ĝus-e-s beside 2nd pl ni cur-e-t; Goth visa-ni vaila 'εὐφρανθῶμεν', O.H.G. fara-m (fara-mēs) 'transcamus'

Lith. te ne ei 'let him not go' for *e½-t, tè-suha 'let him turn' te-māto 'let him see', ') 1st pl. ei-mè 1st dual ei-và 'let us go' (§ 511 p 77), OC.Sl. bada 'sunto' (also found badată 'erunt'), veli-te 'command ye' (also indic veli-te 'ye command'), see § 955 Rem.

¹⁾ Since torms like "iila māto were also used for pres. indic, it came about that indicative forms with primary endings, as ei/(i), could be used with a "permissive" meaning; e.g. t'eit(i).

(b) Conj. = Future. Skr. Ved. ném (= ná im) agha našat 'him no mischief will reach' (cp. Delbrück, Altind. Syntax 358). In Lithuanian, some dialects have forms of the s-aorist like dé-s-me 'we will lay' déste désva désta (§§ 828 f. pp. 365 f.).

CONJUNCTIVE.1)

§ 910. It has been pointed out (§ 489 pp. 47 f.) that in all the languages the same formative elements which mark what from its use is called the Conjunctive are also found in the Indicative. In this way we find used both -e- and -o-, the "Thematic Vowel", and also -ā- and -ē- (-ō-) It follows that these forms had originally a much wider use than they came to have afterwards, and it was only by degrees that some of then were appropriated to the Indicative and others for the Conjunctive. Even in the parent language the rule held good that forms with a thematic vowel were Conjunctive, where the Indicative was distinguisht by having none, whilst if the Indicative had a thematic vowel, the Conjunctive had the suffixes -ā- or -ē- (-ō-) If the Indicative itself had -ā- or -ē--ō- (Classes X and XI, §§ 578 ff pp 118 ff.), then Injunctive forms commonly served for the Conjunctive mood (§ 930).

Remark As stems with -e- -v- and stems with -ā- -ē- (-ō-) originally did for both Indicative and Conjunctive, we may suppose that

Bréal, Un mot sur les subjonctifs latins en am, Mém. Soc. ling, vi 409 ft L Job, Le subjonctif latin en -am, ibid. vi 347 ff. V Henry Esquisses moiphologiques III Le subjonctif latin, Douai 1885. G Curtius, Der lat Conjunctiv des Imperfects, in his Stud. viii 460 ff. Corssen, Die syncopierten Futurformen auf -s im Umbr., Osk und Volsk, in: Beitr. zur ital Sprachk. 533 ff

tense-stems of other kinds had the same double use. As a matter of fact this was so in the fullest sense wherever these stems had the secondary personal endings, that is, were Injunctive (§ 909). But even some forms with the primary endings and without these conjunctive suffixes are so used. Skr 2nd sing. $i\bar{e}-\bar{i}_l$ 'thou comest near' and 'come near' (3rd sing $i\bar{e}-\bar{i}_l$ 'he comes near'), $i\bar{e}-\bar{i}_l$ 'thou abidest' and 'abide thou' (3rd sing $i\bar{e}-\bar{i}_l$ 'he abides') are two examples out of many (Delbruck, Altind Verb 31 and 34 f), Avest Gath $d\bar{v}i\bar{s}$ 'perceive thou', Gr. imper. 2nd sing $i\bar{e}+\bar{i}_l$ 'lay thyself' for $*ie-\sigma-\sigma ai$ (§ 969 2) Compare § 974 Rem. On the use of the Att indic forms $ui\sigma \sigma \bar{v}i\bar{s}$ $\mu u\sigma \sigma \bar{v}i$ for the conjunctive see § 923

The Conjunctive has a simple Future meaning in addition to that of wish (in which I include deliberative and dubitative). Often these forms drop their other meanings in the separate languages, and have that of Future only, or chiefly. Then they are called future in the grammars, as are for instance Lat. erō viderō

In Armenian the Conjunctive formation appears to be entirely lost.

In Germanic and Balto-Slavonic it is lost all but a few scanty survivals, which will be given below. In both these branches the Optative took its place. First both these groups were used together (as in the Latin conjunctive, edā-mus agā-mus true conj. and edī-mus si-mus optative); then the Optative won the day. Examples of Opt forms used as Conj. in these languages are: Goth. paírhgaggiama 'διέλθωμεν, let us go through', ni mairþrjáis 'μη φονεύση, ', te-sukē' 'let him turn' (imperative) '), O.C.Sl. ne vũvedi nasũ vũ iskušenije 'ne nos inducas in tentationem, μη εἰσενέγνης ήμῦς' etc.

We now come to details. The Conjunctive formations may be divided into two groups, according as the Indicative stem (I) ended in a consonant, as *es-ti *ex-ti *rneu-ti, and contained the thematic vowel, as *bhere-ti, or (II) ended in a long vowel, as *e-stā-t *plē-ti.

¹⁾ May also mean 'he may turn, he is to be allowed to turn'.

I. CONJUNCTIVE WHERE THE INDICATIVE STEM ENDS IN A CONSONANT OR HAS A THEMATIC VOWEL.

A. Indicative Stem ends in a Consonant.

§ 911. The Conjunctive from these stems had in the parent language, and continued to have, the Thematic Vowel, as *ex-e-t(i) (Skr. áyatı áyat) beside Indic. *ei-ti 'goes'. The stemhad its strong form, the ablaut-syllable the 1st strong grade (e-grade in the e- o-series) pres. conj *ex-e-t(i) beside indic. ei-i-, *x-nex-e-t(i) (Skr x-náv-a-t(i)) beside indic. *r-nex-*y-nu-, *stex-e-t(i) (Skr stáv-a-t(i)) beside indic *stēx-*stu- (§ 494 p. 54 f.); s-aor conj *qex-s-e-t(i) (Skr cé-š-a-t(i) Gr 2nd pl. τεί-σ-ε-τε) beside indic (e-)qēx-s- *(e-)qi-s- (§ 811 p 348), perf. conj. *te-ten-e-t(i) (Skr ta-tán-a-ti) beside indic. *te-ton-*te-tn-*te-ty- (§ 843 p 384).

§ 912. Pr. Idg Conjunctives of this group have been touched upon frequently in our discussion of the Tense Stem. I therefore confine myself here to a few examples

Present Class I (§§ 492 ff.) *έs-e-t(s) beside *έs-ti 'is': Skr ásat(s), Gr 1st sing. ε-ω (but εης ης etc. belong to B), Lat. (fut.) er-s-t Class III (§§ 536 ff.) Skr. bs-bhar-a-t beside bi-bhar-ti 'bears', bī-bhay-a-t beside bi-bhē-ti 'fears'. Class V (§§ 555 ff.) Skr. ba-bhas-a-t beside bá-bhas-ti 'eats, devours'. Class VII (§§ 567 ff.) Skr. μαν-ghán-a-t beside μάν-ghan-ti intens. 'strikes, kills' Class XV (§§ 625 f.) Skr. τιμάς-α-t beside rinák-ti 'lets go, makes empty' Class XVII (§§ 638 ff.). Skr. γ-μάν-α-t beside γ-μό-ti 'excites, sets in motion'. Class XIX (§§ 656). dvē-š-a-t beside dvē-š-ti 'hates'.

s-Aorist (§§ 810 ff.). Skr. $n\acute{e}-\check{s}-a-t(i)$ beside $\acute{a}-n\bar{a}n-\check{s}-am$ 'I feared', Gr. $\tau \acute{e}i-\sigma-\sigma-\iota \iota \epsilon \nu$ beside $\acute{e}-\tau \acute{\epsilon}i-\sigma-\alpha$ 'I paid', Lat. (fut.) $d\bar{\iota}x-\bar{\sigma}$ beside $d\bar{\iota}x-\bar{\iota}$, () Ir for-tias 'subveniam' beside injunct. for-t\bar{e} subveniat' (§§ 826 p 363 f.). Gr. $\acute{\epsilon}i\partial-\acute{\epsilon}-\omega$ $\acute{\epsilon}i\partial\widetilde{\omega}$ (but $\acute{\epsilon}i\partial\widetilde{\eta}s$ etc. belong to B) beside $\check{\eta}\partial\check{\epsilon}a$ 'I knew' for $\mathring{*\eta}$ -Fei ∂ - $\varepsilon\sigma-\alpha$,

Umbr. eest est 'ibit' beside Gr. yˈειν 'l went' instead of *ēi-es-ŋ (§ 836 pp. 372 ff.) Ski. bödh-iš-a-t beside ind. 3rd pl. mid. ά-bōdh-iš-ata from budh- 'watch, notice', gā-siš-a-t beside ind 3rd pl ά-gā-siš-ur from gā- 'to sing', add perhaps (ir. fut νοιμάω from stem νοιμασ- 'to hang' (§ 840 p. 377). Lat. (fut.) νād-er-ō beside ind. 2nd pl νīd-is-tis Gr ἐρί-σσ-ο-μεν beside εἴρν-σσ-α 'I dragged', Lat. amā-ss-i-t.

Perfect (§§ 843 ff) Skr ta-tán-a-t(i) beside ind. ta-tán-a from \sqrt{ten} - 'stretch. Gr. $\pi \varepsilon \pi o i \vartheta o \mu \varepsilon \nu$ instead of * $\pi \varepsilon$ - $\pi \varepsilon i \vartheta$ -o- $\mu \varepsilon \nu$ beside $\pi \varepsilon$ - $\pi o i \vartheta$ - ε 'he trusts', $\varepsilon i \vartheta$ -o- $\mu \varepsilon \nu$ 1) $\varepsilon i \vartheta$ -o- $\mu \omega$ beside $o l \vartheta$ - ε ; but it can be grouped with the pres. * $\mu e i \vartheta$ -m Skr. $v \varepsilon \vartheta$ -m (§ 493 p 52) Goth. $\bar{o} g s$ 'fear thou' for *a g h-e-s beside $\bar{o} g$ 'fears' (§ 882 p. 430)

§ 913. Aryan The Thematic formation is fertile in Vedic, Avestic, and Old Persian. In later Sanskrit nothing remains but the 1st persons, which are now called 1st person Imperative

The personal endings here as in the ā-conjunctive (§ 921) were in Sanskrit and Avestic sometimes primary and sometimes secondary; the Middle had the primary almost always (details may be seen in Delbruck, Altind Verb. 191 ff; Whitney, Skr. Gr. §§ 560 ff., Bartholomae, Altiran Verb 130 f.) The few Old Persian forms which occur all show a primary ending. As to Skr middle forms like kṛnávāmahāi instead of kṛnávāmahē, see § 922.

Further examples (cp § 912). Present. Skr $k\acute{a}r$ -a-ti kar-a-nti Avest. 1st sing. $car \vec{a}$ - $n\vec{i}$ beside ind Skr $k\acute{a}r$ - $\vec{s}i$ Avest. cor^{ϵ} - \vec{p} from $\bigvee qer$ -'make'; Skr. $\acute{a}y$ -a-t(i) Avest ay-a-p beside ind \acute{e} -ti ae-nti from $\bigvee er$ -'go', Avest anh-a-nti -a-p O Pers. ah-a-tiy Skr $\acute{a}s$ -a-t(i) beside ind Skr. $\acute{a}s$ -ti etc. from $\bigvee es$ -'esse' In Sanskrit this Conjunctive formation is also found beside Indicatives with the suffix -i-, as $br\acute{a}v$ -a-t(i) beside $br\acute{a}v$ -i-ti 'speaks' (§ 574 p. 116) Skr. ju-hav-a-ti beside ju- $h\acute{o}$ -ti 'offers', Avest. ci-kay-a-p 3rd pl. cikaen = ci-kay-en

¹⁾ Compare for this Conj W. Schulze, Kuhn's Zeitschr XXIX 251

beside Skr. ci-kē-ti 'observes, perceives'. Skr. yunáj-a-tē beside yunák-ti 'yokes', Avest. 1st pl. mid. cinap-ā-maiāē beside cinas-ti 'teaches'. Skr. kṛ-ṇáv-a-t(i) Avest. 1st sing. ker'-nav-ā-ni beside kṛ-ṇō-mi ker'-nao-mi 'I make'. s-Aorist. Skr. vá-s-a-ti Avest. vēngh-a-tī from Vuen- 'win, get, conquer'. Skr. san-iš-a-t beside á-sān-iš-am 'won', Avest. 1st sing. xšnev-īš-a from xšnu-'join oneself'. Perfect. Skr. ja-ghán-a-t(i) beside ja-ghán-a from Vghen- 'strike, kill', mu-mōc-a-t beside mu-mōc-a from muc- 'let go', Avest 1st pl ånh-ā-ma beside ånh-a (Skr. ás-a) from Ves- 'esse' (but the form may also be connected with the 3rd sing. ånh-ā-p, under B)

Rarely we find a divergence in the Present from the rule of gradation which holds for this Conjunctive formation (§ 911 p. 461), as Skr. 3^{rd} dual $u\bar{n}_{j}$ -a-tas beside 3^{rd} pl. $an\acute{a}j$ -an (indic. $an\acute{a}k$ -ti 'anoints, adorns') formed as though the indic. were * $\acute{a}n\acute{a}k$ -ti. On the numerous analogical forms in the s-aorist, such as Skr. dfk- \ddot{s} -a- $s\bar{e}$ $t\bar{a}r$ - $i\ddot{s}$ -a-t, see § 815 p. 353 and § 839 p. 375.

For the a-Conjunctive with an unthematic Indicative see § 921

§ 914. Greek The 1st sing. act. in -\omega is regular in all dialects and periods. With this exception, the Conjunctive with a long vowel proved a formidable rival to the thematic formation. The latter held its ground most tenaciously in the s-acrist.

Very little trace is left in the stem of the proethnic law of gradation (§ 911 p 461).

Some such conjunctives survived elsewhere, for instance in Attic, crystallized and used only for the Future; $\tilde{\epsilon}\delta$ -0- $\mu\alpha$ 'I will eat' (cp inf. $\dot{\epsilon}\delta$ - $\mu\epsilon\nu\alpha$, Skr indic $\dot{\alpha}t$ -ti), πi -0- $\mu\alpha$ 'I will drink' (beside imper. $\pi \tilde{\iota}$ - $\theta \iota$), $\chi \dot{\epsilon}(F)$ - α 'I will pour' (beside indic $\dot{\epsilon}$ - $\chi \epsilon(F)$ - α $\dot{\epsilon}$ - $\chi \nu \tau \sigma$)

Remark 1 In an Aeolic inscr. (discussed by Meister, Anzeiger für idg Spr- und Altertumsk, 1 203 f) we have the 3rd pl τεκοισι with the meaning of Att τέκωσι If the reading is true, we must grant it to be an instance of the o-conj invading the domain of the long vowel. If so, we should have a right to question whether Homeric conjunctives like στρέφεται (in subord clause after or ἀν) ought really to be denied. These are collected by Stier in Curtius' Stud ii 138 f; Curtius himself regards them as mythical (Verb, ii ² 87 ff.).

s-Aorist. There are many examples in Homer and other Homeric poets, as τείσοιτεν τείσετε, βιήσεω, ἀμείψετω. So there are in inscriptions of the 5th cent. B.C., from Ephesus, Teos, and Chios; as 3rd sing in -ει, ἀποιούψει, and 3rd pl. ποήξοισιν (Att. πράξωσιν) with -οι- instead of -ον- by Lesbian influence (I § 205 p. 172) In Cietan we find such forms as 3rd sing. δείξει. Then there are Epic imperatives such a ἄξ-ε-τε 'bring ye' ἄξ-ε-σθε όψ-ε-σθε 'see ye' (§ 833 p. 370), and the futures ἄξω ὅψομωι, which must not be separated from the imperatives; indeed the whole Greek s-Future may perhaps come from the Conj of the s-aorist (§ 747 p. 269). Lastly, the 1st sing. εἰδέω εἰδῶ (2nd sing εἰδῆς etc goes under B) beside indic. ἤδεω 'I knew' for *ἢ-Γειδ-εσ-ω (§ 836 pp. 372 ff)

Perfect Survivals in Homer πε-ποίθ-ο-μεν ἔδ-ο-μεν, see § 912 p. 462; mid προσ-αρήρε-ται Hes. Op 431 (Vat 2 προσαρήσεται). Attic imper. like κε-γράγ-ε-τε κε-χήν-ε-τε (§ 854 p. 404)

Remark 2 It is strange that while Homer has $\tau \epsilon lao_{\mu\nu}$ etc he has no complementary conj forms in $-\epsilon \iota_{\Sigma} - \epsilon \iota_{\Sigma} - o \iota_{\Omega}$. We may conjecture that he really had, but that the symbols of the old alphabet, $-EI\Sigma - EI$ $-O\Sigma I$, which had more than one value, were here misunderstood, and the forms disappeared, $-\eta_{\Sigma} - \eta_{\Sigma} - \eta_{\Sigma}$

Those conjunctives which are not used exclusively for future or imperative, are being attracted even in Homer to follow the

lead of those with long vowels, as $i\omega\mu s\nu$, $\ddot{a}\lambda\eta\tau a\iota$, $n\epsilon\pi o/\vartheta\omega\mu s\nu$ See § 923.

§ 915. Italic. Only found as a Future (cp. Att. $\tilde{\epsilon}$ 3-o- $\mu\alpha i$, § 914).

Present. Lat. erō er-i-s: Skr. ás-ā-ni Gr. š-ω, see § 912 p. 461.

s-Aorist Lat. dīx-ō dīx-i-s, fax-ō fax-i-tur, cap-s-ō and the like, Umbr. Osc. fust 'erit', Umbr. furent 'erint' prupehast 'ante piabit', Osc. deivast 'iurabit' (§ 824 p. 362) Umbr. eest est 'ibit' ferest 'feret', Osc. pert-emest 'perimet' (§ 837 p. 374). Lat. vīderō līquerō, then by analogy sciderō totonderō dīxerō etc. (§ 841 pp. 378 f) In the 3rd pl. of these future perfects, the ending *-erint, which was also the ending of the 3rd pl. indic. perfect, gave place to the optative ending -erint (beside 1st sing. vīd-erim), just as we find vīderīmus instead of vīderimus, vīderītis instead of vīderitis. Lastly, Lat. amāssō turbāssitur habēsso, for which infinitives were coined, as impetrāssere, on the analogy of capessere to capessō (§ 842 p. 381)

In the Conjunctive use (Wish), only the \bar{a} - and \bar{e} -forms (B) remained fertile, these also spread into the thematic conjunctive, as Lat. e- \bar{a} -s beside indic. $\bar{\imath}$ -s, $pl\bar{e}$ -r- \bar{e} -s beside indic. Skr. \acute{a} - $pr\bar{a}$ -s-am.

- § 916 Keltic s-aorist with meaning of Wish and more rarely of the Future, as from tragim 'I step, go' the 1st sing. -tias, 3rd sing. tes tess, see § 826 p 364.
- § 917. Germanic. Isolated Got. $\bar{o}gs$ 'fear thou' beside perf. $\bar{o}g$ 'fears' (§ 822 p. 430, § 912 p. 462).

B. Conjunctive to a Thematic Indicative.

§ 918. These Conjunctives have for the Suffix long vowels, not subject to gradation, $-\bar{a}$ - or $-\bar{e}$ - ($-\bar{e}$ -). These are the same

¹⁾ With this contamination compare the use of sim edim as conj. On the analogy of the fut perf viderint itself we have erint poterint instead of erunt poterint.

as in the Indicative, Gr. $\tilde{\epsilon}$ - $\delta \rho$ - $\tilde{\sigma}$ - ν Lat pl- \tilde{e} -s, which also have no gradation; this has been pointed out in § 578 p. 119.

-ā- 15 a Conj. vowel in Italic, Keltie, Slavonic, Germanic (*),
-ē- in Greek and Italic: -ō- in Greek -ē- and -ō- (φέρ-η-τε
φέρ-ω-μεν) are connected closely (cp Gr. indic. ζ-ῆ, and ζ-ώ-ω,
ψ-ῆ, and ψ-ω-ρό-ς); but their distribution in the Greek system
can hardly be original, through it is the same as -e- and -oin the Indicative It is likely that they just unitated the
Indicative, differing only in length, for symmetry (cp Arc. conj.
"-στā-τω beside indic "-στā-μεν, Mess. conj τ΄-θη-ετι
beside indic. τί-θη-μι τί-θε-μεν § 9.34). What was the quality
of sound which became Aryan -ā- cannot now be seen. And
as long as this remains daik, so long it will be unknown how
the ā- and ē- (-ō-) formations were distributed in the parent
language No inference can be drawn from the different use
in Latin of αη-ā-s and αη-ē-s

Remark. From the form of the 1st sing, act Ved $\acute{a}i$ cā (3rd sing, $\acute{a}rc$ -ā-t). Avest $per^{\delta}s$ -ā (3rd sing, $per^{\delta}s$ -ā-iti) we may perhaps assume some direct connexion with the Greek formation ($\varphi \acute{e}_{\ell}$ - ω beside 3 sing $\varphi \acute{e}_{\ell}$ - η), compare Lat aq-a-m O.Ir do-ber for *ber-ā-m OCSl. bera for *ber-ā-m. The O Lat 1st sing age may be for *agō by qualitative assimilation with $aq\bar{e}s$ etc. *aqō beside $er\bar{o}$ like Skr $\acute{a}rc\bar{a}$ beside $br\acute{a}t\bar{a}$

Pr.ldg Class II (§§ 513 ff.): Skr. $bh\dot{a}r-\bar{a}-t(i)$, Gr. q'o-m-usv q'so-n-r. Lat. (conj) fer-d-s (fut) fer-e-s, O Ir. do-ber for *ber-ā-m, beside indic. Skr bhár-a-ti etc. from V bher- 'bear', Skr vid-ά-t(ι) Gr. ιδ-ω-αεν beside indic. Skr. d-vid-a-t 'found' (ir ε/δ-ε id-ε 'sam' from / ueid-; Skr. bhuv--ā-m Lat. fu-ā-s ()se fuid 'fuerit' (for 'fu-ē-d) beside indie Skr. á-bhuv-a-t Lat (perf) fu-i-t from \(\sho\) bheu- 'be, become'. Class IV (§\$ 547 ff): Gr. γί-γν-η-ται Lat gi-gn-ā-s gi-gn-ē-s beside indic. 7/-7v-:-rai gi-yn-i-t, Mid.Ir. gignid 'nascetur' groundform *g1-gen-ā-ti (§ 544 p 103) from √ gen- beget Class VI (§§ 561 ff.) · Avest /α-/n-α-β (fr. πί-φν-ω-иεν Mid.Ir 1st pl. (fut.) gēnam for *qe-gn-ā-m beside indic. ε-πε-φν-ε from \(\sqrt{ghen-} \) 'strike, kill', Avest vuoc-a-β Gr. εἴπ-ω-μεν beside indic. Avest. vaoc-a-p Gr. ε-ειπ-ε Idg. *(e-)μe-μq-e-t from V μeq- 'speak'. Class XIII (§§ 607 ff.): Gr. nt-v-10-usr from nt-vw 'drink', Lat. li-n-ā-s li-n-ē-s from indic. li-nō (cp. § 935). Class XVI (§ 627 ff.): Skr. sinc-á-s beside sinc-á-ti 'sprinkles' from V seig-, Gr. σφίγγ-τυ-μεν from σφίγγ-ω 'I tie, bind', Lat. jung-ā-s -ē-s from jung-ō. Class XVIII (§§ 648 ff.): Skr. inv-ā-t from i-nva-ti 'subdues, oppresses', O.Pers. kū-nav-ā-hy from a-kū--nav-a 'he made', Gr. Att. τίν-ω-μεν from τίνω 'I pay' for * r_i - $v \not = \omega$, Lat. $m_i n u - \bar{a} - s - \bar{e} - s$ from m_i - $n u - \bar{o}$ Class XX (§§ 657 ff.): Avest. 3rd pl. baxš-å-nti from bax-ša-iti 'divides, receives as a share', Gr. αέξ-το-μεν αύξ-ω-μεν from αέχ-σω αύχ-σω 'I increase', $\tau \rho e^{-i\omega - \mu \epsilon \nu}$ from $\tau \rho e^{-i\varepsilon(\sigma) - \omega}$ 'I tremble, flee', Lat. $\nu \bar{\imath} s - \bar{\alpha} - s - \bar{e} - s$ from vīsō for *vīt-sō Class XXII (§§ 670 ff.): Skr. prch-ā-t Lat. posc-ā-s -ē-s beside prchá-ti posci-t from \sqrt{prek} - 'ask, demand', Gr. φάσκ-ω-μεν from φά-σνω 'I inform, say' O.Ir. 1st pl. -nasc-a-m beside nascim 'bind' from \(\sqrt{nedh} \). Class XXIII (§ 678). Gr. $\delta\iota\delta\acute{\alpha}\sigma_{\ell}-\omega-\mu\iota\nu$ from $\delta\iota$ - $\delta\acute{\alpha}(\kappa)$ - $\sigma\kappa\omega$ 'I teach', Lat. disc-ā-s -ē-s from discō for *di-tc-scō. Class XXIV (§§ 679 ff.): Gr. πέκτ-ω-μεν from πέν-τω 'I comb', Lat pect-ā-s -ē-s from pec-tō. Class XXV (§§ 688 ff.). Gr $\pi \lambda \dot{\eta} \vartheta - \omega - \mu \epsilon \nu$ from $\pi \lambda \dot{\eta} - \vartheta \omega$ 'I am full', ἔλδ-η-ται from έλ-δο-μαι 'I wish, desire', Lat. cūd-ā-s -ē-s from cū-dō. Class XXVI (§§ 705 ff.). Skr. har-y-ā-s Gr. χαίρ-ω-μεν Osc herriad 'veht' beside Skr. hár-ya-ti χαίρω from V gher- 'take pleasure in', Skr pášy-ā-t(i) Lat con--spicī-ā-s -ē-s beside páš-ya-tī -spīc-iō from √spēk- 'see'; O.Ir. 3rd sing. do-lēcea beside -lēc-ru 'I let'. Class XXVII (§§ 728 ff.) Gr. yagyaig-or-usv beside yag-yaigo 'I swarm with', Lat. $tin-tinni-\bar{a}-s$ $-\bar{e}-s$ beside $tin-tinn-i\bar{o}$. Class XXVIII (§§ 734 ff.): Skr. 2^{nd} sing, mid $py\bar{a}y\bar{a}-s\bar{e}$ beside $py-\dot{a}-ya-t\bar{e}$ 'swells', Gr. ζώ-ω-μεν (Gort. 3rd pl. δώ-ω-ντι) beside ζ-ώ-ω 'I live', Lat. -pleā-s for *plē(ι)- \bar{u} -s beside pleō for *pl-ē-(ι) \bar{v} , videā-s for *vidē(i)-ā-s beside videō for *vid-ē-(1)ō (hiē-s for *hiā(1)-ē-s? beside $hi\bar{o}$ for * $hi-\bar{a}$ -(2) \bar{o}). Class XXIX (§§ 742 ff.). Skr. prtan-y-a-t from prtan-ya-ti fights', Gr. laiv-w-uev from laive for *l(o)aveo 'I quicken, make alive'. Class XXX (§§ 766 ff.). Skr. apasy-ā-t from upas-yá-ti 'is active', vasūy-ā-t from vasū-yá-tı 'desires wealth', Gr. τενταίν-ω-μεν from τενταίνω 'I fashion' for *τεκταν-μω, τιμά-ω-μεν τιμώμεν τιμά-η-τε τιμάτε § 920. In all the languages which have this Conjunctive, forms of the type are found in connexion with an unthematic Indicative; and it may be assumed that in the parent language itself both types of Conjunctive were sometimes used with the same verb, just as many verbs had thematic and unthematic inflexion in the Indicative and elsewhere Skr. 3rd pl. ád-ā-n Gr. ¿δ-ω-μεν Lat. ed-ā-s beside indic. Skr. át-ti Lat. ēst, cp. ind. Skr ád-a-t (imper 2nd sing mid ad-a-sva) Gr. žő-60 Lat. ed-ō Goth, it-a from Ved- 'eat'. Skr. ás-ā-t 2nd pl. as-ā-tha Gr έ-ω-μεν beside Skr. ás-ti Gr. έσ-τι, cp. Hom. έ-ο-ν έ-ο-ι ε-ούν Lat s-u-nt O.C Sl. (O Russ.) s-atī from Ves- 'to be' Skr $ay-\bar{a}-s$ $ay-\bar{a}-t$ Lat. $e-\bar{a}-s$ beside indic $\hat{e}-ti$ i-t, op $\hat{a}y-a-t\bar{e}$ Lat e-ō e-u-nt from Vez- 'go' For the long-vowel Conjunctive from the s-aorist, as Skr má-s-ā-tār Gr deiz-10-uer elde-10-uer Lat. es-s-ē-s ager-ē-s, thematic Indicatives like Skr á-aik-š-a-t (3r. ξ -dei ξ -e ξ -o- ν Lat $d\bar{\imath}x$ - \imath -t must be compared (§ 833) p. 369). So for Perfect forms like Skr vā-vrdh-ā-ti Gr Ledylan Osc. fefacid 'fecerit' we compare the thematic indic Skr. α -ca-kr-a-t Gr. $\hat{\epsilon}$ - μ ' - μ 7x-0- ν u' $\hat{\epsilon}$ - μ 8 λ - ϵ - τ α 1 Lat te-tig-i-tvhe-vhak-e-d 'fecit' (\$ 854 p. 403 \$ 865 2 p 413, \$ 866 p 413 f., § 867 5, 6, and 7 p. 414 f., §§ 872 f. pp. 420 ff).

§ 921. Aryan On the distribution of primary and secondary Personal endings see § 913 p. 462.

Further examples for the normal Conjunctive formation (cp. § 919). Skr $y\acute{a}j$ - \bar{a} - $t\bar{e}$ Avest. yaz- \bar{a} - $t\bar{e}$ beside $y\acute{a}j$ -a- $t\bar{e}$ yaz-a- $t\bar{e}$ 'he honours with an offering'. Skr. $bh\acute{a}v$ - \bar{a} -ti Avest.

2nd sing. bav-å O.Pers. bav-a-tiy beside Skr. bháv-a-ti etc. 'becomes'. Avest. per's-a-iti O.Pers. pars-a-tiy Skr. prchá-t(i) beside Skr. prchá-ti etc. 'asks'. Skr. many-a-tē Avest. many--ē-itē O.Pers. 2nd sing. act. many-a-hy beside Skr. mán-ya-tē 'thinks'. Skr. pāráy-ā-t(i) Avest. pāray-ā-p beside Skr. pāráya-ti 'carries over'; O.Pers. 2nd sing. gauday-ā-hy from gud- 'hide'.

Not uncommonly we find an a-Conjunctive to an unthematic Indicative (cp. § 920); here we must bear in mind that in Aryan the 1st persons of the Active and Middle were the same in the two Conjunctive series, 1st sing. act Skr -ā (-ā-m) Avest -a (-ā-m) mid. Skr. and Avest. -ā1, 1st pl. Skr. act -ā-ma mid. -ā-mahē (-ā-mahāı) (1) Present Skr. ús-ā-t Avest. anh-ā--iti 2nd sing. anh-å beside Skr. ús-ti 'is', cp. O.Pers. 3rd sing. pret. aha 1. e āha Skr ay-ā-t Avest ay-ā-þ beside Skr. é-ti 'goes', cp Skr mdie áy-a-tē. Skr. 2nd pl. han-ā-tha Avest. jan-ā-þ beside Skr hán-ti 'strikes, kills', ep. indic Skr han-a-ti Avest jan-a-iti Skr brav-ā-t Avest 3rd pl. mid. mrav-ā-ırē beside Skr. bráv-i-mi Avest mrao-mi 'I speak', cp. Avest. indic. mrav-a-iti Skr. bi-bhar-ā-si beside bi-bhar-ti bears', cp. Avest indic bi-bar-a-mi. Avest 3rd sing mid. voi--vīd-ā-itē beside Skr. part. vé-rud-āna-s intens of vid- 'find', cp. Avest. indic nue-niž-a-iti (§ 570 p 113). Skr. 3rd pl. yunaj--ā-n beside ındıc. yu-nák-tı 'yokes'. Skr. kr-náv-ā-t Avest. ker navā-b O.Pers 2nd sing kūnavā-hy beside indic. Skr ky-no-ti etc 'makes', cp. indic O Pers. a-kū-nav-atā and the like, § 649 p. 185. (2) s-Aorist. Skr 3rd sing mid. más-ā--tāi beside indie. 1st sing. mid. á-mā-s-i from mā- 'measure', Avest. janh-a-h beside conj Gath. jēngh-a-itī from V gem-'go' (§ 814 p. 352), cp. the thematic Indicative Skr. á-dihš-a-t Avest. a-sas-a-b § 833 p. 369. (3) Perfect. Skr. va-vrdh--ā-ti beside indic. va-várdh-a from vardh- 'to grow', pa-prc-ā-si beside indic. 3rd pl pa-pre-ur from pare- 'to mix', Avest. åmh-a-p beside indic åmh-a from as- 'to be', cp. the thematic Ind Skr. \acute{a} -ca-kr-a-t etc. § 854 p. 403

§ 922. In Sanskrit an extra mark was added to the Middle of the \bar{a} -conjunctive; the final $-\bar{e}$ of those persons that ended therewith was changed to $-\bar{a}i$, as $-mah\bar{e}$ to $-mah\bar{a}i$. This came from the 1st sing., as $bh\dot{a}r\bar{a}i$, which was all that had it in pr Idg. (§ 1042.1).

First were formed 1st pl. bhárāmahā 1st dual bhárāvahā instead of *bhárāmahē *bhárāvahē, to distinguish conjunctive from indicative so that bhárāmahā answered to indic. bhárāmahē as bhárā to indic. bhárē.

Next -mahāi and -vahāi took their place in other conjunctives which had no confusing indicative of the same form, both in \bar{a} - and a-conjunctives e. g. aor. $v\bar{c}c\bar{a}$ -vahāi beside indic. a- $v\bar{c}c\bar{a}$ -vahi ($v\bar{c}c\bar{a}$ -vahi) 3^{rd} sing. a- $v\bar{c}c$ -a-ta from vac- 'to speak', pres. $krn\acute{a}v$ - \bar{a} -mahāi beside indic. kr-nu-máhā. Amongst these we find also the older -mahā used, as in $k\acute{a}r$ - \bar{a} -mahā beside indic. \acute{a} -kr-ta from kar- 'to make', sanis- \bar{a} -mahā beside indic. \acute{a} -san-is-fa from san- 'to get, gain'.

From the 1st pl and dual $-\bar{a}i$ next went on to the other persons of the \bar{a} -conjunctive. 2^{nd} sing. $-\bar{a}$ -s $\bar{a}i$ beside $-\bar{a}$ -s \bar{e} , 3^{rd} sing. $-\bar{a}$ -t $\bar{a}i$ beside $-\bar{a}$ -t $\bar{e}i$, 2^{nd} pl $-\bar{a}$ -dhv $\bar{a}i$ beside $-\bar{a}$ -dhv $\bar{e}i$, 3^{rd} pl. $-\bar{a}$ -nt $\bar{a}i$. In the Rig-Veda two such new forms, but only two, occur. yaj- \bar{a} -t $\bar{a}i$ from yaj- 'to honour with an offering' and $m\bar{a}day$ - \bar{a} -dhv $\bar{a}i$ from mud- 'to enjoy'.

In the 2nd and 3rd dual the ending -āi is not found. Here the endings were -āithē -āitē, in which -āi- on account of the 2nd dual trāsāthē (indic á-trā-s-ta from trā- 'to protect') must doubtless be regarded as also coming from the 1st sing. in -āi. following bhárāi beside indic. bhárē were coined the conj. bhárāithē and bhárāitē beside bhárēthē and bhárētē. See Bartholomae, Kuhn's Zeitschr. xxvii 214 f.

Some few instances occur of a 3rd pl. in -antāi beside a thematic indicative, as vartantāi beside indic. várt-a-ntē 'vertuntur'. The origin of this form is clear: bhárāi bhárāwahāi bhárāwahāi are distinguisht from bhárē bhárāmahē bhárāvahē only by the ending, which suggested a symmetrical relation and caused -antāi to arise in place of -antē.

§ 923. Greek. Examples in § 919.

The Personal endings are nearly all primary. But in the 3^{rd} singular many dialects (amongst others Arcadian and Cyprian) have $-\eta$ for $-\eta$ - τ , as $\tilde{\epsilon}\chi\eta$, instead of $-\eta$: $(-\eta)$.

In the 3rd pl. φέρωντι (Att. φέρωσι) φέρωνται, ω is not regular there is the same analogical change as in ἄηνται instead of *ἀενται cp. act. ἄεισι (I § 611 Rem p. 462, IV § 582 p. 123).

In Attic the ending $-\eta s - \eta$ (§ 987.1, § 995) ran together with the indic. $-\epsilon \iota \varsigma - \epsilon \iota$, that is $\eta \epsilon \varrho \eta_s$ and $\varphi \epsilon \varrho \epsilon \iota \varepsilon$ had the same pronunciation, so too $\eta \iota \lambda_{11}^{\omega}$ (for $\eta \iota \lambda \epsilon \iota_{12}^{\omega}$) and $\eta \iota \lambda \epsilon \iota_{13}^{\omega}$ (for $\eta \iota \lambda \epsilon \epsilon \iota_{13}^{\omega}$). And since after contraction $\tau \bar{\iota} \iota \iota \iota \dot{\iota}_{11}^{\omega}$ became the same as $\tau \bar{\iota} \iota \iota \dot{\iota}_{12}^{\omega}$, namely $\tau \bar{\iota} \iota \iota \dot{\iota}_{12}^{\omega}$ and $\tau \bar{\iota} \iota \iota \dot{\iota}_{13}^{\omega}$, and since the 1st sing. In all verbs of this form was the same for both indic and conj, — $\varphi \epsilon \varrho \omega \eta \iota \lambda \dot{\iota}_{11}^{\omega}$ $\tau \bar{\iota} \iota \iota \iota \dot{\iota}_{13}^{\omega}$ $\iota \iota \iota \iota \iota \dot{\iota}_{13}^{\omega}$ — the result was that the indic. $\iota \iota \iota \iota \iota \dot{\iota}_{13}^{\omega}$ $\iota \iota \iota \iota \iota \dot{\iota}_{13}^{\omega}$ caine to be used as conjunctive too.

By degrees, the η - ω -inflexion drove out that with ε and σ from the Conjunctive Mood, as imper instead of ioner (§ 914 p. 463 f.), the latter only held its own where any form was used exclusively in the sense of a future or imperative. This tendency, which, as we saw in § 920 p. 468, may have begun in the parent language, was made easier because the 1^{st} sing. act. in both these conjunctive systems ended in $-\omega$; as $\dot{\varepsilon}\omega$ ($\dot{\omega}$) beside indic. $\dot{\varepsilon}\sigma$ - τi (Lat. ω - $\bar{\sigma}$ 3^{rd} sing er-i-i), $\psi\dot{\varepsilon}\rho\omega$ beside indic. $\psi\dot{\varepsilon}\rho\varepsilon i$ (cp. Skr. $\dot{\alpha}rc\bar{\alpha}$ beside indic. $\dot{\alpha}rc$ -a-ti).

It remains for the present a question whether the reverse be true, and the thematic conjunctive ever took the place of a long-vowel form; see § 914 Rem. 1 p. 464.

§ 924. Italic. The long-vowel Conjunctive drove out the Optative in thematic tenses (e. g. ag-ā-s is used as equivalent to both ățiis and ăjois), whilst in Germanic and Balto-Slavonic the Optative won the day (§ 910 p. 460). The short-vowel Conjunctive had a different fate. It remained only as the Future (§ 915 p. 465), and its conjunctive use (Wish, Deliberation, Doubt) passed either to the long-vowel series, for which see below, or to the Optative (as Lat. s-iē-s s-ī-s beside es-t).

The suffixes $-\bar{a}$ - and $-\bar{e}$ - are both found, and the personal endings are secondary. Lat. ag-a-m (like injunct. — pret. — -b-a-m). 3^{rd} sing Osc pútiad fuid. 3^{rd} pl. Osc. putians herrins (but Osc. has also 3^{rd} sing $tadait = *-\bar{a}(2)\bar{e}-ti$, § 996)

On the spread of long-vowel forms in place of those with a short vowel, as in Lat $e-\bar{a}-s$ $es-s-\bar{e}-s$ Osc. fefacid, see § 920 p. 468

§ 925. The \bar{a} -suffix appears in the Present only. To the forms cited in § 919 add the following. Lat fu- \bar{a} -s beside indic. fu-i-t. Lat. $d\bar{i}c$ - \bar{a} -s Osc deicans 'dicant' beside indic. Lat. $d\bar{i}c$ -i-t. Umbr emantur 'emantur'. Lat. fac- \bar{a} -s Umbr fasia 'faciat' beside indic fac- $i\bar{o}$ Lat. $f\bar{i}ni$ - \bar{a} -s beside indic $f\bar{i}ni$ - \bar{o} i. e $f\bar{i}ni$ - $i\bar{o}$, claude-a-s beside indic claude for *claude-a-s beside indic claude for *claude-a-s beside indic claude

In Umbrian -iā- spread from fasia and like forms to the ā-denominatives, hence kuraia 'curet' etaians itent'.

Lat $e-\bar{a}-s$ beside indic i-t (like Skr $ay-\bar{a}-t$), whilst in the verbs est vult $\bar{e}st$ the Optative ($s-i\bar{e}-s$ $s-\bar{i}-s$, $vel-\bar{i}-s$, $ed-\bar{i}-s$ beside $ed-\bar{a}-s$) added the conjunctive function to their own. The opt. of i-t may have been lost by the plural $*i-\bar{i}-mos$ becoming $*\bar{i}mos$, and thus being identical with the indicative.

Remark The only example of -ā- outside the Present would be Lat dum-luxat, if Bréal be right in taking -luxat as the conj. of the s-aorist of tangō (cp. opt lax-i-s) 'doneo tetigerit, jusqu'à ce qu'il ait atteint', then 'jusqu'à (ct non plus loin)' (Mém Soc Ling v 35 f, Dict étymol 2 p 385) As in the whole area of Italio the s-aorist has only the ē-conjunctive (§ 926), it would be better to take -laxat as conj. of an indic *taxō, Class XX (§ 662 p. 197)

- § 926. The ē-suffix appears in all tense Stems
- (1) Present Lat (fut) fer-ē-s cupi-ē-s farci-ēs fīni-ē-s.') Umbr. heriiei 'velit' or 'volet' (cp. Osc. heriiad 'velit' § 919 p 467).

The following may also be examples. Osc. deivaid 'uret' for *deiva($\underline{\imath}$)- \bar{e} -t, tadait 'censeat' for *tadā($\underline{\imath}$)- \bar{e} -ti, sakahíter 'sacretur' for *sahā($\underline{\imath}$)- \bar{e} -ter, Lat. nēs plantēs for *nā($\underline{\imath}$)- \bar{e} -s 'plantā($\underline{\imath}$)- \bar{e} -s (indic. 1st sing. nō plantō for *-ā-($\underline{\imath}$)ō), similarly

¹⁾ These forms are wrongly explained in vol. I § 81 Rem. 3 p 74 f

- stēs for *stā(2)-ē-s (indic. 1st sing. stō for *stā-(2)ō), by analogy of which would come $d\bar{e}s$ (cp. § 946). The difference between plantēs and claudeās $f\bar{v}ni\bar{a}s$ the conj. suffix being in the one group \bar{e} and in the other \bar{a} may be explained by remembering that *plantā(i)-ā-s must become *plantās, and a confusion with the indicative would result (compare § 930 sub fin); the loss of *claude(1)-ē-s (cp. fīm-ē-s plantēs), because it too would become *claudēs like the indicative. But all these \bar{e} -forms may be optative *deivā-iē-t *plantā-iē-s, *da-iē-s. If, "as is possible, the origin of these forms is double, the intermingling of Conjunctive and Optative would be due to formal analogy as well as syntax See § 946.
- (2) s-Aorist (cp Skr må-s-ā-tāi (ir. δείξ-η-τε εἰδέ-η-τε § 920 p 468) Lat es-s-ī-s in-trā-r-ē-s im-plē-r-ē-s vidē-r-ē-s plantā-r-ē-s Osc fusíd 'foret' Pelign upsaseter 'operaretur' or 'operarentur' (§ 824 p 362) Lat ag-er-ē-s gnōsc-er-ē-s, Umbr. ostensendi 'ostenderentur' for -tend-es-ē-ntēr, Osc herríns 'caperent' for *her-es-ē-nt (§ 837 p. 374) Lat. vīd-is-s-ē-s totondissē-s dīxissē-s (§ 842 p. 381). Compare the short-vowel conjunctive-futures Lat fax-i-tur rīder-i-s Umbr Osc fust § 915 p 465
- (3) Perfect Forms (cp Skr ιā-vṛdh-ā-ti Gr. λε-λήν-η § 920 p. 468) occur only in Umbro-Sammite, as in Latin the s-Aorist hād intruded in place of the perfect forms. Osc fefacid fecerit' hipid 'habuerit' fuid 'fuerit, Osc. sakrafír 'sacraverint' Umbr pihafei 'piaverint', Osc tríbarakattíns 'aedificaverint' See §§ 872 f pp. 420 f Most of these forms may be regarded as belonging originally to a thematic aorist, as fuid to indic. Lat. fu-i-t = Skr. ά-bhuv-a-t (see loc cit), if so they belong to (1).1)
- § 927. Keltic For Irish examples see § 919. Only -ā-is proved as the Conjunctive suffix Conjunct flexion, e. g sing. do-ber, -berae -bere, -bera, pl -berum -berid -berat based

¹⁾ In regarding the Umbro-Samnitic forms in this section as ε-conj. I follow my pupil G Bronisch Meanwhile Bartholomae likewise explains sakahiter as a conj like Gr. δράη-ται (Stud. Idg. Spr., ii 154, 185).

upon *ber-ā-m -ā-si -ā-t, -ā-m- -ā-te -ā-nt(o); with primary endings, the "absolute" 1st sing. bera (certainly a new form), 3rd sing. berid, pl bermme beithe berit. Similarly 3rd sing. dolēcea for *leikyi-ā-t etc

With the conj. -bera harmonised fully in inflexion -cara, beside indic. no charu for 'carā-tō, cp. Cymr. conj 3rd sing. caro pl carom caroch caront with o for ā. The conj carāmay be for *carāt-ā-, but may also be for orig. carā- (§ 930).

To the Present in -enim (Class XII, § 604 pp. 145 f.) the conjunctive was a series of forms without the nasal suffix. E. g. with crenim 'I buy' (from $\sqrt{qre_2}$) and benim 'I strike, cut' (beside O.C.Sl bi-ti 'to strike') the conjunctives are 3^{rd} sing. (ni-)cria for *qri2-ā-t (cp (ir noi- ω - μ ai noi- η - τ ai) and (fom-)bia for *bhi2-ā-t. Compare Thurneysen in Kuhn's Zeitschr. xxxi 87 f. On the analogy of these, ienim 'I sell' for *pr-nā-(\sqrt{per} -) had the conj m-ria made for it, levelling seems to have taken place between these two verbs in the indic. perfect too, though in the reverse direction (§ 878 p 426 f.).

§ 928. Germanic Only one form, and that very dubious, the 1st sing bairau = O.Icel bera beside the clear optatives Goth. bairai-s bairai etc., this has hitherto been derived from *berai-u Idg *bheroi-m (cp. 1 § 142 p. 126), which is called the "only tenable hypothesis" by Kluge, Paul's Grundr. 1 381.1) According to Hirt (Idg. Forsch. 1 206) the form comes from "berō-m = Lat. feram, and -au must be pronounced -au, that is as a single sound, similarly Goth. viljau O.H.G. wille would be derived from *uel-i-ā-m, pr Germ. *uiljān. Compare § 947.

§ 929. Slavonic. 1st sing. indic. bera for *berām is a conj. form used as future, which displaced the old form in $-\bar{o}$

¹⁾ I cannot agree to a recent criticism of this explanation, that it violates well establish laws of sound. i would drop between vowels in unaccented syllables, and u may have been contracted with the preceding a, before acc *frijond-u became frijond, if this form really so arose (see III § 219 p 96) Others see the particle u in bajrau (cp. Wiedemann, Lit. Prät. 159)

first in perfect verbs whose present served for the future. Compare § 955 on imperative pija-te and the like.

- II. CONJUNCTIVE WHERE THE INDICATIVE STEM ENDS IN A LONG-VOWEL.
- A. Indicative Stem ends in -ā-, -ē- -ō- without gradation.

§ 930. We have here the Conjunctive to our Present Classes X and XI (§§ 578 ff. pp. 118 ff.), that is, stems such as *dr-ā- 'to run' (Skr. $dr\bar{a}$ -ti Gr. ε - $d\varrho\bar{a}$ - ν), *pl-ē- 'fill' (Skr. $dr\bar{a}$ -ti Gr. π), *myn-ē- 'to think' (Gr. $\dot{\varepsilon}$ - $\mu\dot{\alpha}\nu\eta$ Lith. $min\dot{e}$), *tak-ē- 'to be silent' (Lat tacē-s O.H.G. $dag\bar{e}$ -s), with which are grouped denominative stems without -20- like Lat. plantā- (plantā-mus) O.Ir. carā- (no chara-m) Goth salbō-(salbō-m) Lith. jūstō- (jū'stō-me) (†r Aeol. $\tau\bar{\iota}\mu\bar{\alpha}$ - ($\tau\dot{\iota}\mu\bar{\alpha}$ - $\mu\varepsilon\nu$) (§ 769 pp. 283 ff.) and Perfects like Skr. ji- $jy\bar{a}$ u Gr $\beta\varepsilon$ - $\beta\dot{\iota}\eta$ - $\tau a\iota$ $\beta\dot{\varepsilon}$ - $\beta\dot{\iota}\eta$ - $\tau u\iota$ $\tau\varepsilon$ - $\tau\dot{\iota}\mu\bar{\alpha}$ - $\tau u\iota$ (§ 847 pp. 390 ff.).

The long vowels of these stems we have already identified with the conjunctive suffixes $-\bar{a}$ - and $-\bar{e}$ - $(-\bar{o}$ -), in § 578 p. 119 f. Thus the Conjunctive and Indicative had here originally the same stem.

In Aryan we get Injunctive forms with Conjunctive use; as Ved. $pr-\hat{a}-s$ from $pr-\hat{a}-s$ 'to fill' Forms with primary ending in conj. meaning do not occur, except $pr\hat{a}-si$ 'let him fill', which however belongs to the group $v\hat{e}-\tilde{s}i$ $k\tilde{s}\hat{e}-\tilde{s}i$ etc. (§ 910 Rem. pp. 459 f.).

Greek. Messen. $-\gamma \rho \dot{\alpha} \phi - \eta - \nu \tau \iota$ conj of $\dot{\epsilon} - \gamma \rho \dot{\alpha} \phi - \eta$ 'it was written' 1^{st} pl. $\dot{\epsilon} - \gamma \rho \dot{\alpha} \psi - \eta - \mu \epsilon \nu$, $-\sigma \kappa \epsilon \nu \dot{\alpha} \sigma \vartheta \eta - \nu \tau \iota$ beside $\dot{\epsilon} - \sigma \kappa \nu \dot{\alpha} \sigma \vartheta \eta$ 'was prepared'. Perf. Gortyn. $\pi \dot{\epsilon} - n - \bar{\alpha} - \tau \alpha \iota$ beside indic. $\pi \dot{\epsilon} - n - \bar{\alpha} - \tau \alpha \iota$ 'he has gained, he possesses' from $k \psi - \bar{\alpha} - (II \S 117 \text{ p. } 370 \text{ f.})$, Ther. $\pi \dot{\epsilon} - \pi \rho - \bar{\alpha} - \tau \alpha \iota$ beside indic. $\pi \dot{\epsilon} - \pi \rho - \bar{\alpha} - \tau \alpha \iota$ 'is sold', also conj. Heracl. $o \dot{\iota} \sim o \dot{\delta} \dot{\iota} \mu \eta - \tau \alpha \iota$ from $o \dot{\iota} \sim o \dot{\iota} \sim o \dot{\alpha} \dot{\iota} \omega$ 'I build', Gortyn. $\dot{\epsilon} \sigma - \tau \epsilon \tau \dot{\epsilon} \kappa \nu \omega - \tau \alpha \iota$ beside (Att.) $\dot{\epsilon} \sim \tau \epsilon \iota \nu \dot{\alpha} \omega$ 'I beget children' For clearer distinction between conj. and indic. these forms followed the

analogy of our Ist conjunctive class hence we have on the one hand forms with short conj. vowel, as Hom $\beta\lambda\eta' - \epsilon - \epsilon \alpha \iota$ $\tau \varrho \alpha \eta' - \epsilon - \mu \epsilon \nu \gamma \nu \omega' - \epsilon \mu \epsilon \nu \nu \gamma \nu \omega' - \epsilon \mu \epsilon \nu \nu \gamma \nu \omega' - \epsilon \mu \epsilon \nu \nu \gamma \nu \omega' - \epsilon \mu \epsilon \nu \nu \gamma \nu \omega' - \epsilon \mu \epsilon \nu \nu \gamma \nu \omega' - \epsilon \nu \omega' - \epsilon \nu \gamma \nu \omega' - \epsilon \nu \omega' - \epsilon \nu \gamma \nu \omega' - \epsilon \nu \omega' - \epsilon$

From Keltie we may cite the conj of ā-verbs, as O Ir. -cara for *carā-t (cp § 927 p 474), and from Germanic the corresponding conjunctives, such as Goth. salbō -ō-s -ō -ō-ma -ō-p -ō-na O.H.G. salbo -ō-s -o -ō-m -ō-t -ō-n, also O.H.G. conj. habe -ē-s -e -ē-m -ē-t -ē-n beside indic. habēm -ēs etc, and Gr conj. γράφ-η-νται beside ἐ-γράφη-μεν.²) Similar Latin forms, *plantā-m -ā-s etc, may have been the predecessors of plantem -ēs etc; cp § 926 p 473.

B. Indicative Stem has a Long Final Vowel, with Gradation.

§ 931. We have now to deal with the Conjunctive of Indicative Stems like ${}^{k}dh\bar{e}$ - ${}^{*}dh(\partial)$ - (Skr \acute{a} - $dh\bar{a}$ -t \acute{a} -dhi-ta), *dhi- $dh\bar{e}$ - *dhi- $dh(\partial)$ - and *dhe- $dh\bar{e}$ - *dhe- $dh(\partial)$ - (Gr τi - $\partial \eta$ - σi τi - $\partial \varepsilon$ - τai $\tau \varepsilon$ - $\partial \varepsilon$ - τai , Skr $d\acute{a}$ - $dh\bar{a}$ -ti da-dh- $m\acute{a}s$ da- $dh\bar{a}\acute{a}i$ da--dh- $\acute{a}ir$), * $m_{\vec{i}}$ - $n\bar{a}$ - * $m_{\vec{i}}$ - $n(\partial)$ - (Skr. $m_{\vec{i}}$ - $n\acute{a}$ -ti $m_{\vec{i}}$ -n-anti Gr $\mu\acute{a}\varrho$ - νa - τai).

Two conjunctive types appear to be proethnic; one with the thematic vowel, which we may call the regular type, as Skr du-dh-a-tē beside indic. dú-dhā-ti, and one with long

¹⁾ It is true there is nothing to prove that the forms Homer really used were not $\partial_i \alpha_{ij} - \epsilon_{ij}$, $\gamma_i \omega_i - \epsilon_{ij}$, compare § 934, on conj. like $\sigma \tau_{ij} \gamma_i \epsilon_{ij} \alpha_{ij} n$. The absence of such forms as $\partial_i \mu_i \gamma_i \omega_{ij} = \partial_i \alpha_{ij} \gamma_i \epsilon_{ij} \sigma \tau_{ij} \omega_{ij} = \sigma \tau_{ij} \omega_{ij} \sigma \tau_{ij} \sigma \tau_{i$

²⁾ But how are we to explain Goth habau -ars -ur? That habēs in Gothic became habars (ur = long at) by simple action of regular change is to my mind as little proven as the identity of Goth sifars and Lat. sies. The student may now refer to Streitberg, Zur Germ Sprachgeschichte 73 f, who regards habars habar as optative with the suffix -½ē-.

vowel, as Skr. da-dh-ā-tāi, Gr. ἐπί-στ-ω-μαι ἐπί-στ-η-ται beside indic. ἐπί-στα-ται, Lat. si-st-ā-s. The latter are not independent of the fact that the Indicative so often has a thematic side by side with the unthematic series, thus Skr. da-dh-a-tē beside indic. dá-dhā-tı, da-dh-ā-tāi beside indic. dá-dh-a-ti (§ 562 p. 110 f.) Cp. conj. áy-a-t and ay-ā-t and the like (§ 920 p. 468).

§ 932. (1) Thematic Conjunctive Type.

Skr do-dh-a-t 2nd dual dá-dh-a-thas mid. da-dh-a-tē beside indic dá-dhā-ti 'places' 2nd dual mid. dh-ēthē 3rd sing. act. práti-dhat beside indic. á-dhā-t. mi-n-a-t beside indic. mi-nā-ti 'lessens, injures' The forms with secondary personal ending. da-dh-a-t mi-n-a-t, may be regarded as injunctive to the thematic indic dá-dh-a-ti á-mi-n-a-nta; -dh-a-t as injunctive is to be compared with áda-t (§ 524 p 88). Avest. 1st sing. xšt-ā (cp. indic 3rd sing paiti-štā-ħ Skr. á-sthā-t from V stā-'stare') may come in here as easily as under (2); cp. § 933.

§ 933 (2) Long-Vowel Conjunctive Type.

Aryan. Skr. da-dh-ā-tāt da-d-ā-tāt beside indic. dá-dhā-ti 'places' dá-dā-tī 'gīves', cp indic dá-dh-a-tī dá-d-a-tī Avest. da-p-a-itī (§ 562 p. 111) Skr dh-ā-tī d-ā-tī sth-ā-tī sing. d-ā-nītī sing. d-ā-nītī mid. d-ā-itī xšt-ā-itī 3rd pl. mid. d-ā-nītī beside indic. Skr. á-dhā-t ú-dā-t ú-sthā-t Avest. dā-p-stā-p, cp. indic. Skr áda-t (§ 524 p. 88). Skr 2nd pl krī-n-ā-tha mid 3rd sing. krī-n-ā-tāt beside indic. krī-ṇā-tī 'buys' (Whitney, Skr. Gr § 720), Avest. mid. 3rd sing. per-n-ā-itī ver-n-ā-tā (with secondary ending) 3rd pl. ver-n-ā-nītē

beside indic, ger^ew -nā-iti 'grasps, comprehends', cp. indic. Skr. mg-n-á-ti (§ 598 p. 141, § 609 p. 149).

On the ending -ā-tāi see \$ 422 p. 470.

§ 934. (Freek. ἐπί-οτ-ω-ναι ἐπί-οτ-η-ται beside indic. ἐπί-οτα-ται 'understands' δί-ν-ω-ναι beside indic. δί-να-ται 'can', ναφ-ν-ώ-μεσθα (Hesiod) beside indic. μάο-να-ται fights', cp. opt. μαφ-νο-ί-μεθα (Od 11, 513) and indic. like πτάφ-νο-ναι (§ 611 p. 149). Whether the Attic accent be τίθωμαι or τιθώμαι (for *τιθέωμαι) cannot be decided, the grammarians contradict each other, and the MS, tradition is uncommonly inconsistent; τί-θ-ω-ναι τί-θ-η-ται would answer to Skr. da-dh-ā-tār

In the same way, and at the same time, with the forms $\gamma \varrho \dot{\alpha} \varphi \eta r \tau \iota$ etc., Conjunctives like $\tau i \partial \eta r \tau \iota$ came under the influence of o- and ω -conjunctives. Hom. $\sigma \tau \dot{\eta}$ -o- $\mu \epsilon \nu$ $\sigma \tau \dot{\eta}$ - ϵ - $\tau o \nu$, $\partial \dot{\eta}$ -o- $\mu \epsilon \nu$ $\partial \dot{\eta}$ -o- $\mu \alpha \iota$, $\partial \dot{\omega}$ -o- $\mu \epsilon \nu$ and Hom. $\sigma \tau \dot{\eta}$ - ηc

¹⁾ The forms here treated have been wrongly explained in vol. I §§ 113 ff pp. 106 ff

Perhaps in Homeric times the forms used were στήεις στήαυσι φήεις. See p 476 footnote 1.

Delph. δώ-η, Boeot. καθ-ιστάει. Contracted Att. στῶ στῆ-, ίστῶ ίστῆς, ἑστῶ ἑστῆς, θῶ θῆς, δῶ δῆς.

The relation of $\tau l \vartheta \eta \nu \tau \iota$ to indic. $\tau l \vartheta \epsilon \nu \tau \iota$ produced in Messenian a conj. $\vec{\eta} \nu \tau \alpha \iota$ 'sint' beside indic. $\vec{\epsilon} \nu \tau \iota$. With this must be grouped Hom. $\mu \epsilon \tau - \epsilon \iota \omega$ (II. 23. 47), for which read $\mu \epsilon \tau - \dot{\eta} \omega$ and place it parallel to $\vartheta \dot{\eta} - \omega \epsilon \dot{\varphi} - \dot{\eta} \omega$. Compare also § 502 p. 66 on $\epsilon \mu \dot{\epsilon} \nu$ and $\epsilon \dot{\omega} \dot{\epsilon} \nu$ $\epsilon \mu \epsilon \nu \omega$ and § 914 p. 463 on Hom. $\nu \dot{\epsilon} \omega \dot{\epsilon} \nu$.

§ 935 Italic Lat $si\text{-}st\text{-}\bar{a}\text{-}s$ cp. indic. si-st-i-t \checkmark $st\bar{a}\text{-};$ $ser\bar{a}s$ for *si-s- $\bar{a}\text{-}s$ cp. indic se-r-i-t \checkmark $s\bar{e}\text{-};$ $red\text{-}d\text{-}\bar{a}\text{-}s$ Osc. da-dad 'dedat' (da- prefix) cp. indic Lat. red-d-i-t (the indic. forms $d\bar{a}s$ dat may contain the same stem $d\text{-}\bar{a}\text{-}$ which with injunctive Flexion could also be indic. pres., cp § 505 p. 71, § 909 p. 456 f.), Pelign. di-d-a 'det' Umbr. di-rs-a 'det' cp. indic. Vest. di-d-e-t 'dat' \checkmark $d\bar{a}\text{-}$. Compare § 493 p. 53, § 524 p. 88, § 550 p. 106, § 553 p. 107

Lat $ster-n-\bar{a}-s$ $li-n-\bar{a}-s$ ep. indic. ster-n-i-t li-n-i-t. Compare § 603 p. 145

§ 936. From Irish we may cite the Mid.Ir. 2^{nd} sing. eba 'bibas', ep. indic ibid for *pi-b-e-ti $\sqrt{p\bar{o}}$. Compare § 539 p. 100, § 554 p. 108

§ 937. Germanic In § 507 p. 74 it was pointed out as possible that O.Sax. $d\bar{o}$ -m O.H.G. tuo-m 'I do' may represent the stem dh- \bar{a} - of Lat. cond \bar{a} -s and be compared with Lat. indic. d- \bar{a} -s (§ 935) The same stem as Conj. is seen in O.Sax. 1st 2nd and 3rd pl dnu-n O.H.G. 2nd pl. tuo-t 3rd pl. tuo-n.

OPTATIVE 1)

§ 938. The Optative of the Unthematic Indicative has for suffix in the Singular Active -iē- -iiē- (Strong form), in the Plural and Dual Active and in the Middle of all numbers -ī-

¹⁾ Th. Benfey, Uber die Entstehung und die Formen des idg. Optativ (Potential) so wie über das Futurum auf sanskritisch syāmi u. s. w., Abhandl. der Gött Gesellsch d Wiss xvi 135 ff. J. Schmidt, Die

The Personal endings of the Optative are Secondary. Compare § 942 Rem

In Armenian and Irish 1) the Optative seems completely dead; in Italic the 02-type can no longer be traced. The comminging of optative and conjunctive has been described in § 910 p. 460.

I OPTATIVE WITH - 10- -7-.

§ 939. Pr.Idg

Class I (§§ 492 ff). * $gm-y\bar{e}$ - * $gm-\bar{i}$ - beside indic. * $g\acute{e}m-ti$ 'goes' (Skr. \acute{a} -gan) Skr $gam-y\acute{a}$ -t mid. 1*t sing $gm-\bar{i}ya$, A.S. cyme (Goth. *tkumjau) * $bh\ddot{u}$ - $i\bar{e}$ - *bhy- $i\bar{e}$ - *bhy- $i\bar{e}$ - *bhy- $i\bar{e}$ - beside

^{1) &}quot;What the British conjunctive, in which s seems to be mixt up with \bar{o} (for \bar{a}), really is, has not yet been made out. It may be partly derived from an optative of the s-aorist" (Thurneysen.) Compare also Loth, Mém. Soc Ling v 133 ff.

Ist pl. Skr. ά-bhū-ma Gr. š-φū-μεν from √bhey- 'be, become'. Skr. bhū-yắ-t O.Pers. b-ιyā, Gr. Cypr. φύμη, 1st pl. Avest. buyamā 1. e. bviyamā for *bhy-ij-ημη- (§ 942). *yid-jē- *yid-ī- beside Skr. vēd-mi from √ yejd- 'see, know' (see § 493 p. 52): Skr. vɪd-yắ-t Goth. 1st pl. vɪt-ei-ma. *s-(i)iē- *s-ī-: Skr. s-yắ-t s-ιyắ-t, O.Lat s-ie-t 1st pl. O.Lat. and class. s-ī-mus, O.H.G 1st pl. s-ī-m. *d-(i)iē- *d-ī- beside Skr. ád-mi 'esse'. Skr. ad-yắ-t Lat. ed-ī-mus O.C.Sl. jad-ι-mū; ın all three branches a strong root-form has taken the place of the weak.

• Indicatives like *é-dhē-t 'he placed' had two optative types, one having the "unaccented weak grade" of root (dh-) and the other the "weak grade with secondary accent" (dha-); compare the two forms of the root in Skr d-yá-ti and dá-ya-tē, and the like (§ 707 p 238). (1) * $dh_{-1}\bar{e}_{-}$ * $dh_{-1}\bar{e}_{-}$. Avest, $d_{-1}\bar{q}_{-1}$ Osc. da-did 'dedat' (-ī- from the plural), cp. redupl Avest. daidyā-b mid. daidī-tā. (2) *dhə-zē- *dhə-z- (cp *bheroz- and Skr. superl. sthéštha-s 'the steadiest, most stable' for *sta-is-to- II § 81 p. 244). Gr. pl θεῖ-μεν δοῖ-μεν σταῖ-μεν (θε- δο- instead of and θα- *δα-, see § 493 p. 53), beside which we have θείην δοίην σταίην instead of *θε-ιη-ν etc., like 3rd pl. φέροιεν -οίατο instead of *-o(ι)εν -o(ι)ατο following φέροιμεν etc. *dhēma 1) *dēma *sthēma (cp. precative dē-š-ma § 942), whence sing. dhēyā-t dēyā-t sthēyā-t instead of *dha-yā-t etc. (cp. bhárēyane following bhárē-ma instead of *bharāy-am § 951, and compar. sthéyas- following superl. sthéštha-s instead of *sthā-yas- II § 81 p. 244), and hence again by further analogy pl. dhēyāma dēyāma sthēyāma like syá-ma following syá-t and like Gr. Feinuer following Feinu (§ 945), the root syllable in

¹⁾ The 2nd pl Ved. dhētana, R V. VIII. 56. 5, x. 37 12 (-tana as often instead of -ta, see § 1010), probably does not belong to this place, it is either a thematic form like Avest. 2nd sing. dōi-š Gr. ἐπί-θοιτο -θοιμέθα, or a new form coined beside dhēhi on the analogy of attana attá beside addhi, itana itá beside i-hi, yātána yātá beside yāhi, and the like The latter view is supported by Pali pres dhēmi dhēsi eto and dēmi dēsi eto, which undoubtedly are new formates complementary to the imperative dhēhi and dēhi.

the presumptive form * $dh\bar{e}$ -ma stands to that of 3^{rd} sing. mid. da-dh-7- $t\acute{a}$ just as the indic. 3^{rd} sing mid. pret. \acute{a} -dhi-ta to the 3^{rd} sing mid pres. dha-t- $t\acute{e}$. It is uncertain whether Lat $d\bar{e}$ -comes from *da- $(2)\bar{e}$ -s (§ 946), and whether O.H G. 1^{st} pl. $st\bar{e}n$ is to be equated with Gr $\sigma \tau a \tilde{u} \mu \epsilon \nu$ (§ 947).

Remark Others assume that Ski dhēyā-t Gr Sein come from *dho-iṣē-t. With this view, attractive enough at first sight. I cannot agree. The explanation, now put forward again by Jellinek (Beitr. zur Erklärung der germ. Flexion, p. 95), that bhárēyam comes from Idg *bhero-iṣ-m, is proved by the evidence of Iranian to be wrong

Class VII (§§ 567 f) Skr. $v\bar{e}$ - $v\bar{e}$ - $y\bar{a}$ -t beside indic. $v\hat{e}$ - $v\bar{e}$ - \bar{e} -ti 'works, is active'.

Classes X and XI (§§ 579 ff). Skr $j\bar{n}\bar{a}-y\bar{a}-t$ (gramm) Gr. $\gamma\nu\bar{o}i\mu\epsilon\nu$ for $^*\gamma\nu\nu_{\nu}-\iota_{-}\mu\epsilon\nu$ from $\bar{g}n-\bar{e}-\bar{g}n-\bar{o}-$ 'to learn'. Skr. $mn\bar{a}-y\bar{a}-t$ 'commemoret' 3^{rd} pl $mn\bar{a}-y-\imath\nu$. Gr. $\delta\varrho\bar{a}i\mu\epsilon\nu$ for $^*\delta\varrho\bar{a}-\iota_{-}\mu\epsilon\nu$ beside $\check{e}-\delta\varrho-\bar{a}-\nu$ 'I ran'. Lat. $n\bar{e}s$ for $^*sn-\bar{a}-\bar{\imath}e-s$? (s. § 946). — Gr $\varkappa\imath\check{e}i\mu\nu\nu$ beside $\varkappa\dot{\iota}-\varkappa-\eta-\mu\epsilon\nu$ 'we reach, find'.

Class XII (§§ 597 ff) Skr. 3^{rd} sing. mid. $5r-n-7-t\acute{a}$ beside $5r-n\acute{a}-t\imath$ 'shatters' ($i\imath$ $5\acute{v}$ raito (beside $5\acute{v}$ -ra- τ ai 'is able') for "du-n-1-to stands to Skr. $5r-n-7-t\acute{a}$ as $\tau \imath \vartheta \tilde{\epsilon} \tilde{\iota} \tau \sigma$ (on the accent see § 944) to $dudh\tilde{\iota} t\acute{a}$

Class XV ($\S\S n25 f$) Skr yuny-ya-t mid. yunj-7-ta beside yunak-tr 'yokes'.

Class XVII (§§ 638 ff.). Skr. γ-nu-yū-t mid. γ-nv-ī-tā beside γ-nō-tī 'excites, sets a-going', mid aṣ-nuv-ī-tā beside aṣ-nō-tī 'attains' Hom δυννῖτο for *δω-νι-ζ-το beside δαί-νν-ται 'eats', 3rd pl. δωινῦατο for -νν-ζ-ατο (§ 944). Goth. kunnerma for *kun-nv-ī- Idg 'ŷγ-nu-ī- beside kun-nu-m 'we learn, know'.

Class XIX (§ 656). Skr. dviš-yā-t beside dvē-š-ți 'hates'.

s-Aorist (§§ 811 ff.). Skr. mid. dikṣ-ī-ta beside 1st sing. ά-dik-š-i, Lat. dīx-ī-mus beside dīx-ī, V deik- 'show'; Skr. mid. ma-s-ī-ta Idg. *mŋ-s-ī-to, V men- 'think'; O.H.G. wiss-ī-mēs 'we knew' must be named here, if wissun 'they knew' is to be compared with Gr. ἴσαν (§ 827 p. 365). es-Aorist: Gr. εἰδεῖμεν 'we should like to know' for *fειδ-εσ-ī-μεν (cp. Lat. vīd-er-ī-mus), δεἰξειαν for -σ-εσ-ι-αν or -σ-εσ-ι-αν see § 944. əs-Aorist: Skr. 1st pl mid. jan-iṣ-ī-mahi beside indic. ά-jan-iṣ-ṭa from jan-'gignere', pyā-s-iṣ-ī-mahi from pyā- 'swell'. is-Aorist: Lat. vīd-er-ī-mus for *yeud-ıs-ī- beside conj. vīder-ō (cp. Gr. εἰδεῖμεν).

Perfect (§§ 843 ff). *ue-uyt-iē- -ī- from vuert- 'vertere': Skr. va-vyt-yā-t 1st pl. mid. va-vyt-ī-maht. Goth. vaurp-ei-ma (instead of reg. *vaurdeima) O.H.G. wurt-ī-mēs. *se-zd-(i)zē- -ī-from v sed- 'sedere' · Skr. sēd-yā-t Avest hazd-yā-p, cp. Goth. sēt-ei-ma Skr. 3rd sing. mid. tš-ī-ta Goth. 1st pl. áig-ei-ma beside indic. tš-ē áih 'has something in his power' (§ 848 p. 391).

Often both types, $-i\bar{e}$ - and -oi-, occur together, just as in the Indicative thematic and unthematic forms are found side by side, and as in the Conjunctive we see both long-vowel type and thematic. Examples are: Gr. $\check{\epsilon}oi$ Lith. $tes\tilde{e}$ beside $\epsilon i \mu i$ es-mi 'I am', Avest. $d-\bar{o}i-\check{s}$ Gr $\hat{\epsilon}ni-\vartheta oi\tau o$ beside indic. $d\bar{a}-\bar{p}$ $\dot{\epsilon}-\vartheta \epsilon-\tau o$ from $\sqrt{dh\bar{e}}$ - 'place', Pruss. dais 'give' from $\sqrt{d\bar{o}}$ -, Gr. $\mu u a \rho v o u b e$ beside $\mu \dot{a} \rho - \nu u - \tau a u$ 'fights', $n \epsilon n \dot{o} v \partial o u$ beside $n \dot{\epsilon} - n o v \partial - a u$ 'I have experienced'.

§ 940 Aryan. In Sanskrit, the $-y\bar{a}$ - of the sing. active is invariable for active plural and dual forms that have a personal ending with initial consonant, as $s-y\hat{a}-ta$ instead of * $s-\bar{t}$ -ta (Lat. $s-\bar{t}$ -tis), $j\hbar\bar{a}-y\bar{a}-ta$ instead of * $j\hbar\bar{a}$ -ta (Gr. $\gamma\nu\bar{\nu}\bar{\iota}$ - $\tau\bar{e}$); in the Middle it is invariably absent. The same relation may be seen in Indicative stems like $dh\bar{a}$ - (Idg. * $dh\bar{e}$ -): as $va-vrt-y\bar{a}$ -t $va-vrt-y\bar{a}$ -ta mid. $va-vrt-\bar{\iota}$ -ta, so $a-d\bar{a}$ -ta mid. a-di-ta (§ 495 p 55) In Avestic $-y\bar{a}$ - preponderates for the plural active, as Gath. $\dot{x}y\bar{a}$ -ta = Skr. $sy\bar{a}$ -ta; but $-\bar{\iota}$ - seems to occur, as in $srv\bar{\imath}m\bar{a}$ i. c. $sruv-\bar{\imath}$ -mā beside imper. srao-tū = Skr. $\dot{s}r\dot{o}$ -tu from \sqrt{kleu} - 'hear'.

Instead of the Skr. ending -īyu of the 1st sing... as va-vyt-īy-a, we should expect -ya or -iya following the -y-ur -iy-ur of the 3rd pl. active, indeed, the MS i of the Veda must often be read short for metrical lea-ons. as in īšīya and iāsīya Rig.-V. vii. 32. 18, and Avestic regularly has tanuya i. e. tanv-iy-a (Bartholomae, Handh § 91 b p. 40). This -ī- came from the other middle forms. similarly we have bhārēyam following bhārē-š etc.. instead of *bharay-am or *bharāy-am (§ 951).

More examples to add to those given in § 939.

Class I. Skr. $kr-iy\bar{a}-t$ beside $\acute{a}-kar$ 'he made', $d\bar{i}r-y\bar{a}-t$ = * $d\bar{r}$ - $i\bar{e}$ -t beside \dot{a} -dar 'he split, burst' (cp. below. Class VII Avest. dar'-dairyā-b). mid vur-7-ta beside á-17-ta he chose'. Avest. 19m-ya-b O Pers 19m-74a with 19m- instead of gam-, which is preserved in Ski gam-yá-t (mid. gm-īya) (I § 451 Rem. p 334), cp. § 939 p 480. Skr han-yá-t Avest. jan-yā-h O.Pers. jan-iyā beside Skr hán-ti 'strikes, kills' from / ghen-: or.Ar *jhan-ia-t instead of *ghan- = *ghp-, with which we have the reg. mid Skr ghn-ī-ta Avest. yn-1-ta, but in Skr. following the active also han-ī-ta (I § 454 Rem. p. 335, II § 498 p. 57 f.). Skr. stu-yá-t mid stuv-ĩ-tá Avest. stu-yā-b beside indic. Skr stāu-ti (stu-mási) Avest. stao-iti 'he praises Skr. 1-yā-t beside é-ti 'goes' Skr 173-yā-t beside á-vark 'he twisted together' (pies unák-ti) Skr uš-yá-t Avest. us-yā-þ beside Skr. váš-ti Avest vas-tī 'wishes' (uš-mási us-mahī). On Skr. dēyā-t Avest d-yā-p and the like, see § 939 p 451; on Avest. 2nd sing dā-yā, below, Class X

Skr. $br\bar{u}$ - $y\bar{n}$ -t mid. bruc- \bar{i} -t (Avest mru- $y\bar{n}$ -p) beside $br\acute{av}$ - \bar{i} -ti he speaks Class IX (§ 574 p. 116).

Class III Skr. ju-hu-yá-t mid. 1st pl. jú-hv-ī-mahi beside ju-hó-ti 'offers'. Avest. daidyā-þ daiþyā-þ mid. daidī-tā daiþī--ta like Skr da-dh-yá-t da-d-yá-t da-dh-ī-tá da-d-ī-tá, § 939 p. 481.

Class VII Avest. dar'-darrya-b beside indic Skr.

¹⁾ On the active singular forms with $-\bar{i}$, like $s\bar{a}h\bar{t}\bar{b}$, which used to be wrongly taken as optative, see Bartholomae, Stud. Idg Sprachg 11 157, 169

dar-dar-ti intens. of dar- 'to split'; the ground-form may be *-dī-iē-t, see § 568 p. 112.

Class X. Skr. yā-yā-t beside y-á-ti 'goes'. Avest. pā-yā-p̄ from pā- 'protect' (§ 588 p. 129). The forms Skr. mnēyā-t jñēyā-t beside the regular mnā-yā-t jñā-yā-t (§ 939 p. 482) are adformates of such as dhēyā-t sthēyā-t (Class I), just as Skr. jyēṣṭha-s 'the mightiest' beside comp. jyā-yas- is an adformate of sthēṣṭha-s (II § 81 p. 244), compare the precative jñēṣām, § 942 Levelling in the reverse direction is shown by Avēst. dā-yā-p̄ beside d-yā-p̄

Class XII. Skr. mid. $pr-n-\bar{\imath}-t\acute{a}$ beside $pr-n\acute{a}-ti$ 'fills'; act. $pr-n\bar{\imath}-y\acute{a}-t$ with the same $-\bar{\imath}-$ as indic $pr-n\bar{\imath}-m\acute{a}s$, see § 597 p. 141.

Class XV. Skr rundh-yá-t mid. rundh-ī-tá beside runádh-mi 'I hold back, stay'. Avest. meraš-yā-ħ, see § 626 p. 162.

Class XVII. Skr k_f -nu- $y\acute{a}$ -t mid. k_f -nv- $\bar{\imath}$ - $t\acute{a}$ Avest. ker^e -nu- $y\ddot{a}$ -p beside k_f - $n\acute{o}$ -ti ker^e -nu-it 'makes, does'. Skr. $a\acute{s}$ -nu- $y\acute{a}$ -t $a\acute{s}$ -nuv- $\bar{\imath}$ - $t\acute{a}$ Avest $a\acute{s}$ -nu- $y\ddot{a}$ -p beside $a\acute{s}$ - $n\acute{o}$ -ti 'attains'. Avest. 1st sing mid. tanuya i. e. tanv-ty-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv-tanv

s-Aorist. Skr. 1st pl. mid dhuh-š-ī-máhi from duh- 'to milk', 1st sing. mid. di-š-īy-u from dā- 'divide, share'; Avest. dišyā-p from $\sqrt{de_ik}$ - 'to show, point' from a ground-form *dik-s-zē-t, cp. Skr. mid. dik-š-ī-ta. On the intrusion of the strong root in Skr, as ma-s-ī-máhi beside ma-s-īy-a, see § 815 p. 353. The iš- and siš-aorist in Sanskrit · ruc-iš-īy-a and rōc-iš-īy-a from ruc- 'to shine', sah-iš-ī-mahi and sāh-iṣ-ī-mahi from sah- 'to overcome', va-siš-īy-a from van- 'to gain' Optatives from signatic aorist are in Sanskrit only found in the middle voice, and the 2nd and 3rd sing. show regularly the precative form, as ma-s-ī-ṣṭhās ma-s-ī-ṣṭa van-iš-ī-ṣṭa yā-sis-ī-ṣṭhās (§ 942).

Perfect Skr ja-gam-yā-t Avest. jaymyam 1. e ja-ym-ıyam beside indic. Skr. ja-gām-a from V gem- 'go'. Skr. ri-ric-yā-t beside ri-rēc-a from ric- 'let loose'. Avest. vaonyā-p beside

indic. 3^{rd} pl vaon-ar* from van- 'to gain', O.Pers. 3^{rd} sing. $ca-xr-iy\bar{a}$ from kar- 'to make'.

§ 941. According to Bartholomae, Avestic has in the 1st pl. active forms with -ama for -mme. jam-y-ama (the 3rd sing. is jam-yā-þ, § 940 p. 484), buyamā i. e. bv-iy-amā (cp. tanuya § 940 p. 434) beside O Pers. biyā for *b(v)-iyā-t (Avest. 2nd sing. buyā 3rd sing. buyā-þ may also be derived from bv-iyā-, because of the Avestic mode of spelling). Following buyama we have 2nd pl. buya-ta perhaps 2nd pl. dāya-ta springs from 3rd sing. dāyā-þ in the same way. A similar explanation is given of Skr. duhīyá-t beside 3rd pl. duhīyán, perhaps the ī of this 3rd pl. may be accepted as evidence that -ī-ma and -ī-ta once existed in the Sanskrit language (cp. middle -īy-a following -ī-thās etc.) See Benfey, Abh. Gott. Gesellsch. Wiss. xvi 182 f., 197; J. Schmidt, Kuhn's Zeitschr. xxiv 318; Bartholomae, ibid. xxix 274 f

§ 942 The "Precative", as it is called, is a mood peculiar to Sanskrit This is a optative with -s- between mood-suffix and personal ending; 1) in the middle, the 1st persons and the 3rd pl. could not take this form. Examples are act. sing. 1st bhū-yá-s-am 2nd and 3rd-yá-s (2nd*-yā-s-s 3rd*-yā-s-t) pl. -yá-s-ma -yá-s-ta -yá-s-ur, mid sing. 2nd muc-ī-š-thās ma-s-ī--š-thás yā-sis-ī-š-thās 3rd muc-ī-š-ta etc.

Beside \acute{a} - $d\bar{a}$ -t 'gave', 1st pl. $d\bar{e}$ šma i. e. * $d\bar{s}$ -i-s-me (confirming the assumed * $d\bar{e}$ -ma = Gr. $\delta o\tilde{i}$ - $\mu \varepsilon v$, see § 939 p. 481); 3rd pl. $sth\bar{e}$ -s-ur beside \acute{a} - $sth\bar{a}$ -t. To this the 1st sing is $d\bar{e}$ šam $sth\bar{e}$ šam. $j\bar{n}$ \bar{e} šam (from $j\bar{n}$ - \bar{a} - 'know'). $d\bar{e}$ šam = $j\bar{n}$ \bar{e} y \acute{a} -t $d\bar{e}$ y \bar{a} -t, see § 940 p. 485.

The history and origin of the Precative are as yet unknown. But there must doubtless be a connexion between its s and the agrist s.

Remark. If the optative suffix is the same as the Root-determinative $\bar{\imath}$, described in § 498 p. 61 and § 572 p. 114, it would be obvious to

¹⁾ Avest $t\bar{u}tuy\hat{u}$ is not a precative, see Bartholomae, Kuhn's Zeitschr XXIX 561. On Skr forms assumed to be precative, which do not have s just before the personal ending, see the same, p. 587.

§ 943. Greek. Here we see -ie- -ī- always and only after sonant vowels, with which -ī- is contracted.

§ 944 Class I IIom $\epsilon i \eta \nu$ 'sım' for $* \epsilon \sigma_{-1} \eta - \nu$ or trisyllabic $* \epsilon \sigma_{-1} \eta - \nu$, 3^{rd} pl. $\epsilon i \epsilon \nu$ for $* \epsilon \sigma_{-1} - \epsilon \nu$ or $* \epsilon \sigma_{-1} - \epsilon \nu$ (ep. Skr. $s_{-1} \gamma \epsilon m$ $s_{-1} \gamma \epsilon \mu$ beside $s_{-1} \gamma \epsilon \mu$ for $* \epsilon \sigma_{-1} \epsilon \nu$ (ep. Skr. $s_{-1} \gamma \epsilon \mu$ with intrusion of strong root (ep § 502 p 65). El $\epsilon \bar{\alpha}$ for $* \epsilon \bar{\alpha}$ 3^{rd} pl. $\sigma \nu \nu - \epsilon \sigma \nu$ possibly for $-\epsilon \epsilon \nu$ answering to the Ion. $\epsilon i \epsilon \nu$ (ep I § 64 p. 51, § 72 p. 63, where $\epsilon \bar{\alpha}$ must be read and not $\epsilon i \bar{\alpha}$, and IV §§ 952, 1020. I a) ϵi - in Att. $\epsilon i \gamma \nu$ $\epsilon i \epsilon \nu$ is either to be explained by the fact that the Greek ground-forms $* \epsilon \sigma \iota \eta \nu$ * $\epsilon \sigma \iota \nu$ were trisyllabic, or else if these were really $* \epsilon \sigma \iota \eta \nu$ * $\epsilon \sigma \iota \iota \nu$ it must have come from $\epsilon i \iota \iota \epsilon \nu$, as $\vartheta \epsilon \iota \iota \eta \nu$ follows $\vartheta \epsilon \sigma \iota \iota \iota \nu$ and $\vartheta \epsilon \rho \epsilon \nu$ follows $\vartheta \epsilon \sigma \iota \iota \nu$ (I § 131 p. 118, IV § 939 p. 481).

On $\theta \sin \nu$ doint oraint see § 939 p 481 Of the same sort are gaint quiten mid. $2^{nd} \sin q$ and from $\phi \eta - \mu i$ I say.

Cypr. $\varphi v_{l\eta}$, see I § 130 p. 118 · Skr. $bh\bar{u}-y\bar{a}-t$, see § 939 p. 481. Hom. $\dot{\epsilon}_{l}-\delta \bar{v}_{\mu\epsilon\nu}$ (beside $\ddot{\epsilon}-\delta \bar{v}$ 'went in' $\ddot{\epsilon}-\delta \bar{v}-\mu\epsilon\nu$) for * $\delta v_{l}-\mu\epsilon\nu$ (like $\sigma \tau a \tilde{\iota}_{\mu\epsilon\nu}$ yro $\tilde{\iota}_{\mu\epsilon\nu}$) stands for * $\delta v(f)-\bar{\iota}_{-\mu\epsilon\nu}$ or * $\delta f-\bar{\iota}_{-\mu\epsilon\nu}$, 3rd sing. $\delta \dot{v}_{\eta}=*\delta v_{l\eta}$ like $\sigma \tau a \dot{\iota}_{\eta}$ beside $\sigma \tau a \bar{\iota}_{-\mu\epsilon\nu}$. Cp. $\delta a \iota \nu \bar{v} \tau o$ $\delta a \iota \nu \bar{\iota}_{\alpha\tau} \tau o$ Class XVII p. 488. Whether Hom. $\varphi \partial \tilde{\iota}_{\tau} \tau o$ (beside $\epsilon-\varphi \partial \iota-\tau o$ 'was destroyed' is regularly descended from * $\varphi \partial \iota \bar{\iota}_{\tau} -\tau o$, which must be assumed as original, is a question; it may have been coined beside $\tilde{\epsilon}\varphi \partial \iota \tau o$ on the analogy of $\delta o \tilde{\iota} \tau o$ to $\tilde{\epsilon} \partial \sigma \tau o$.

Class III. $\tau_i \vartheta \epsilon i \eta \nu$ διδοίην iσταίην like $\vartheta \epsilon i \eta \nu$ etc., cp. § 939 p. 481. $\tau_i \vartheta \epsilon i \tau_0$. Skr. $dadh \bar{\imath} t \dot{a} = \tau_i \dot{\imath} \vartheta \epsilon \mu \epsilon \nu \cdot dadh \bar{\imath} \dot{a} \dot{a}$. If the Gr. Indicative with ϑ need not be regarded as a new formation in Greek (cp. Skr. $dadh i - dh \nu \dot{e}$ $\jmath a - h i - mas$), neither need $\tau_i \vartheta \epsilon \bar{\imath} \iota \iota \epsilon \nu$ $\tau_i \vartheta \epsilon \bar{\imath} \tau_0$ be such; we should then postulate Idg. * $dh i - dh \vartheta - i - = *dh i - dh \vartheta - i - But$ in that case the accentuation $\tau_i \vartheta \epsilon \bar{\imath} \iota \iota \epsilon \nu$ διδοί $\iota \iota \epsilon \nu$ etc. (not certain before the Alexandrian period) must be new, and the original accent * $\tau_i \vartheta \epsilon \iota \iota \iota \epsilon \nu$ * $\vartheta i \dot{\vartheta} \iota \iota \iota \iota \epsilon \nu$ as $\vartheta \nu \iota \iota \iota \iota \iota \iota \iota$ shows (see below); the influences at work in the change may have been the accent of $\epsilon \dot{\imath} \dot{\vartheta} \epsilon \dot{\imath} \iota \iota \iota \iota \nu$ for * $f \epsilon \iota \iota \dot{\iota} \dot{\iota} \epsilon \iota \iota \iota \nu$ (beside $\epsilon \dot{\imath} \dot{\iota} \epsilon \iota \iota \iota \iota \nu$), $\pi \iota \iota$ (beside $\epsilon \dot{\imath} \dot{\iota} \iota \iota \iota \iota \iota \iota$), $\pi \iota \iota$ (beside $\epsilon \dot{\iota} \iota \iota \iota \iota \iota \iota \iota \iota$). Similarly the accent of $\epsilon \iota \iota$ and $\delta \iota \iota \iota \iota \iota \iota \iota \iota$ is not original.

The Middle formation $\hat{\epsilon}\mu$ - $\pi\lambda\tilde{\eta}\tau o$ (beside $\pi\lambda\tilde{\eta}$ - τo 'filled itself') is to be compared with the 3rd pl. indic $\tilde{\epsilon}\mu$ - $\pi\lambda\eta r\tau o$ · as this is a transformate of *- $\pi\lambda\epsilon\tilde{\tau}\tau o$ (§ 582 Rem. p. 123). The same is true of $\mu\epsilon\mu\nu\eta'\mu\eta\nu$ × $\epsilon\tau\tau\eta'\mu\eta\nu$, p. 489. $-\pi\lambda\tilde{\eta}\tau o$ $\mu\epsilon\mu\nu\eta'\mu\eta\nu$ · $\beta\lambda\epsilon\tilde{\iota}\mu\epsilon\nu$ $\delta\varrho\alpha\tilde{\iota}\mu\epsilon\nu$ = $-\pi\lambda\eta\nu\tau o$ $\mu\epsilon\mu\nu\eta\tau a$ · $\tilde{\epsilon}\beta\lambda\epsilon\nu(\tau)$ · $\tilde{\epsilon}\delta\varrho\alpha\nu(\tau)$.

Class XII. Apparently the only form found is δύναιτο from δύναμαι 'I am able'; $\iota\iota_0 \nu \alpha i \eta \nu$ from $\iota\iota_0 - \nu \eta - \mu u$ 'I mix' and the like may be left out of count. $\delta \nu - \nu \alpha - \iota - \tau_0$ beside Skr. $\dot{s}_7 - n - \bar{\iota} - t\dot{a}$ like * $\iota \iota_1 - \iota_2 - \iota_3 - \iota_4 - \iota_5$ beside $\dot{d}a - dh - \bar{\iota} - t\dot{a}$.

Class XVII Hom. $\delta a \nu \bar{\nu} \bar{\nu} r \sigma$ (beside $\delta a i - \nu \nu - r \alpha i$ 'eats') for $-\nu \nu_{\bar{l}} - r \sigma$, like $i \times -\delta \bar{\nu} \mu \epsilon \nu$, instead of $i - \nu \nu (F) - \bar{\iota} - r \sigma$ or $i - \nu F - \bar{\iota} - r \sigma$, cp. Skr. $a \dot{s} - n u \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - t \dot{\alpha} k_{\bar{l}} - n \nu - \bar{\iota} - n \nu -$

8-Aorist. εἰδείην εἰδείμεν (beside ἤδεα 'I knew') for *Fειδεσ-μη-ν or -εσ-ιη-ν and -εσ-τ-μεν, cp. Lat. vtd-er-τ-mus; Att.
εἰδείην is to be explained in the same way as εἴην, page 487.
On the optative of εἶμι 'I go' see § 836 p. 372 f.; the form ἰείην
II. 19 209 may, like Plato's δεδιείην, be an adformate of εἰδείην,
cp. ἰέναι δεδιέναι · εἰδέναι.

 $\delta \epsilon i \xi \alpha \iota_{\mu \iota} - \alpha \iota_{\varsigma}$ etc. is a new formation following the optative $-\sigma \iota_{-\mu \iota} - \sigma \iota_{-\varsigma}$ etc., which sprang up when α in the σ -aorist had spread beyond its proper sphere; cp. § 820 p. 357.

Remark For the latter development ($-\sigma_{eia}$; $-\sigma_{eie}$) there would be a second motive if there ever was a 1st pl in * $-\sigma_{eiauer}$, answering to the Avest. jam-y-ama (§ 941 p 486), $-\sigma_{eiuer}$ $-\sigma_{eiuer}$ as jamyama: sivīmā And $-\sigma_{eiaugr}$ would make it easier to understand the 3rd pl. -iar beside the usual form -ier.

Perfect. ἐσταίην ἑσταῖμεν beside ἐσταμεν 'we stand' like ἱσταίην ἱσταῖμεν beside ἵσταμεν. Mid. μεμνημην (beside μέμνημαι Dor. μέμναμαι 'I remember') νεντήμην (beside νέντημαι 'I have gained') instead of regular *μεμναιμην *νεντειμην, like indic. $3^{\rm rd}$ pl. μεμνηνται νέκτηνται instead of *μεμνανται *νεντενται, see p. 488.

With perfect stems having a final consonant the thematic optative is always found; as πεπόνθοι

§ 945. In the Active of the Optative -ιη- constantly passed into the Plural and Dual, as εἴημεν beside εἶμεν, σταίημεν beside σταῖμεν, εἰδείημεν beside εἰδεῖμεν, ἑσταίημεν beside ἑσταῖμεν;

Homer has only one example of this sort, σταίησαν II. 17 733. Compare Skr. syáma instead of *s-7-ma following s-yá-t § 940 p. 483.

§ 946. Italic. O.Lat s-ie-m sies siet s-\tilde{\tau}-mus sitis s-i-ent beside indic. es-t; in classical Latin the weak stem only is found, and we have sim sis etc. The same levelling is seen in the sister dialects: Umbr sir si sei 'sis' si 'sit' sins \15 'sint'. Marruc. pacr-si 'propitius \15' or 'sit'. Lat. vel-i-m vel-\tilde{\tau}-mus beside vul-t, with irregular strong root (cp Skr. mid. vur-\tilde{\tau}-ta), see § 505 p 69 Similarly ed-i-m ed-\tilde{\tau}-mus beside \tilde{\text{es}}-t from \(\nabla \text{ed}\)- 'cat', see § 505 p. 70, § 939 p. 481 The reason why siem is the only optative with strong opt suffix which survives in historical Latin is probably that its i carried the word-accent

On the reason for the loss of the optative of i-t see § 925 p. 472.

Osc. da-did 'dedat' beside Avest. $d-y\bar{a}-p$, cp. Marrue. -si 'sit'

Lat. dem may be derived from * $da-(\underline{\iota})\bar{e}-m$, and stem from * $sta-(\underline{\iota})\bar{e}-m$; $d\bar{e}mus$ $st\bar{e}mus$ for * $da-(\underline{\iota})\bar{e}-mos$ * $sta-(\underline{\iota})\bar{e}-mos$ should be compared with Gr $\deltaoi\eta_{u\bar{e}\nu}$ $\sigma\tauai\eta_{u\bar{e}\nu}$ (§ 945). Lat. nem plantem may come from * $(s)n\bar{a}-(\underline{\iota})\bar{e}-m$ * $plant\bar{a}-(\underline{i})\bar{e}-m$, Osc devaid from * $dexu\bar{a}-(\underline{\iota})\bar{e}-t$, cp § 939 p. 482. But all these forms. as we saw in § 926 p 472, may be Conjunctive.

s-Aorist. Lat dīxim axim, see § 824 p. 362. vīderim līquerim totonderim dīxerim, see § 841 p. 378. amāssim prohibēssim ambīssim, see § 842 p. 381. On the intrusion of such optative forms into the Future Perfect system, 1 c. their Conjunctive, see § 915 p. 465.

§ 947. Germanic. The suffix forms -ī- had got into the singular in proethnic Germanic, cp e. g. 3rd sing. Goth. vaúrħ-i O.H.G. wurt-i Norse Run. urħ-i would be' for -ī-ħ as contrasted with Skr. va-vṛt-yā-t, 2nd sing. O.H.G. s-ī-s O Icel sēr (= pr. Germ. *sīz) 'mayst thou be' as against Skr s-yā-s; so in the 3rd pl.. Goth. vaúrħ-ei-na O.H.G. wurt-ī-n

'they would become' Norse Run. varin 'they would be'. The history of the 1st sing. (Goth. -jau O.H.G. -i O.Icel. -a) is still obscure (cp. § 953 on Goth. nimau); in explaining Goth. -jau let it be remembered that j in viljau and j in vitjau seem to be different (see below).

Present A.S. cyme pl. cymen (from cuman 'to come') would be Goth. *kumpau *kumenma: Skr gam-yά-t, see § 939 p. 480. Goth viljau vilei-s etc., cp. Lat. vel-1-m § 505 p. 69; the 1st sing. viljau may with O.H.G. wille have been originally 1st sing. conj. to indic. O H.G. willu 'I will' = O.C.Sl. velja, whose tense stent is also represented by Goth. viljan and viljands (§ 505 p. 69, § 716 p. 249, § 727 p. 259), cp. § 928 p. 474. O.II.G sī 'I should be' pl 1st sī-mēs sī-m 2nd sī-t 3rd sī-n beside is-t 'is' Skr. s-yá-m etc., see § 939 p. 481, Goth. sijuu sijáis etc. (like bairau baíraís) is perhaps a transformation of the dissyllabic Idg *s-izē-m etc It is possible, that O.H.G. 1st pl stēn gēn (sing 1st and 3rd gē stē 2nd gēs stēs) are optative like Gr. σταίμεν

The following may be counted amongst those parts of the Preterite-Present system which are not really perfect. 1st pl. Goth. vit-ei-ma O.H.G. wizz-ī-mēs (Skr vid-yā-t), Goth. mun-ei-ma, ga-daúrseima O.H.G. gi-turrīmēs see § 508 p. 74. Goth. kunneima O.H.G. kunnīmēs (beside Goth OHG. kun-nu-m 'wē learn, know' Class XVII) for 'gū-nu-ī- like Skr. z-nv-ī-tá, see § 939 p 482, similarly OH.G. unnī-mēs beside indic. an 'I grant', N.-Ger durne beside indic. darn 'I dare', see § 646 p. 184.

Perfect. Goth. skai-skaid-ei-ma O.H.G. sciad-ī-mēs 1st sing. skai-skaid-jau sciadi beside indic. skai-skaip sciad 'I divided', similarly Goth. nēm-ei-ma O.H.G. nām-ī-mēs beside nam 'I took' etc. Similarly in the weak preterite (§ 907 pp. 453 ff.), as Goth nasidēd-ei-ma O.H.G. nevit-ī-mēs. On O.Sax. dedīn 'they would do' sing. dedi (instead of regular *did-) see § 939 p. 482.

The intermingling of 2nd sing opt. and 2nd sing. indic. preterite of strong verbs has been discussed in § 893 p. 441 f.

§ 948 Balto-Slavonic

In Baitic this optative cannot be traced. Pruss. dais 'give, let' imper. 2nd pl. daīti (read daiti) doubtless do not go with Gr. doite — dais would have to be an adformate of the plural — but are thematic like jeis jeiti idaiti, §§ 510 f. pp. 75 f., § 954.

§ 949. Slavonic offers but a few specimens, all with hortative force. O.C.Sl. 1st and 2nd pl. jad-i-mũ i-te 1st and 2nd dual -i-vẽ -i-ta beside indic jad-ętũ 'they eat' (§ 510 p. 76). Skr. ad-yá-t Lat. ed-ī-mus, see § 939 p. 481. dad-i-mũ etc. beside dad-ętũ 'they give' (§ 546 p. 103 f.) · Skr. mid. da-dh-ī-tú etc., see § 939 p. 482. věd-i-mũ beside věstũ 'he knows' 3nd pl. věd-ętũ with the perfect stem uoid-, originally confined to the singular indicative, see § 894 p. 442 f. Side by side with this, from the same root, imperative vidi-mũ 'videamus' etc, the 2nd sing. viždī — Lith veizdi, which must be explained with vidimũ, proves it to be old and to belong to the Idg. present *ueid-mi (§ 493 p. 52, § 510 p. 75), here ei — Slav. ī became the only suffix, as oi — Slav. ĕ did in věstũ.

The 2nd and 3rd sing to these imperatives are juždī duždī věždī and the already mentioned viždī. The ending -ī makes it probable that these should be derived from genuine imperative forms in *-dhi. Their original shape was *ězdī (cp. Skr. addhī), *dazdī (cp. Skr. dēhī daddhī Avest. dazdī) or *dādī (= O.Lith. dūdī), *veždī and *vīzdī (= O.Lith. veizdī, cp. Skr. viddhī (ir ĭσθī). Side by side with these stood the 2nd and 3rd sing. opt *ědīā *dādīā etc. (= orig *ēd-īēs *ēd-īē-t, *dōd-īē-s etc.). By levelling arose *éd-īt *dādīt etc, which became the forms actually found, jaždī etc. () Compare I § 547 p. 401,²) II § 962 The use of jaždī etc. for the 3rd singular has a parallel in 3rd sing. pri-jetū for the 2nd singular; see § 830 p. 367.

¹⁾ That e g eždi jaždi are not simply contaminations of *ėzdi and *ėždū is shewn by the other Slavonic languages, which imply an older ending $-d\tilde{\chi}$ E g Pol wiedz: O.C.Sl. rėždi = Pol miedza: O.C Sl mežda

²⁾ Here "*yēzdī = 0 Lith. veiz(d)i" is a misprint for "*yīzdī = ...".

II. OPTATIVE WITH -oj-.

§ 950. The ending in the 1st sing. act. is $-oi_{-m}$ (§ 976. 3), in the 3rd pl. $-oi_{-n}t$ (1017. 1. b).

In all languages which have this optative at all it is a living and creative type.

For pr. Idg. a few examples will suffice. *bheroi- beside *bhér-e-ti 'bears', 2nd sing *bheroi-s 2nd pl. *bheroi-te: Skr. bhárē-š-ta Gr. φέροι-ς -τε (foth. baírái-s -ħ O.C Sl. beri berĕ-te; Lith. 3rd sing te-sukë beside sukù 'I turn'. *urĝioi- beside *urĝ-ié-ti 'works': Avest ver®zyae-ta Gr. ὁέζοι-τε Goth. ναὐκ-μία-ħ, Skr 3rd sing. mid. sphāyē-ta beside indic. sphā-ya-tē 'increases, grows', O.C Sl 2nd sing. spēn 2nd pl spēn-te beside spē-ja 'I succeed' Skr. 3rd sing. pṛtanāyē-t beside pṛtanā-yā-ti 'he fights', Gr. 2nd sing. ττμάοι-ς ττμοῦς beside ττμάοι 'I honour', A.S. 3rd sing. sealfie beside sealfie 'I salve, anoint', O.C.Sl. 2nd sing. lakaji beside laka-ja 'I trick, deceive'.

§ 951. Aryan. For examples see § 950. No examples of this optative occur in Old Persian, certainly a mere accident.

In Skr 1st sing act bhárēyam 3rd pl. act. bhárēyur 1st sing. mid. bhárēya 2nd and 3rd dual mid bhárēyāthām bhárēyātām, ē has taken the place of a (*bharay-am etc), coming from the other optative forms (bhárē-š etc.); in Avest. we still see 3rd pl. act. baray-en mid. 1st sing Gath. vāuray-ā 3rd pl. baray-anta.) Compare Skr. vavrt-īy-a instead of *vavrt-y-a § 940 p. 484, and possibly duhīyán instead of *duh-y-an § 941 p 486, also ábhāv-am instead of á-bhuv-am following á-bhū-š § 497 p 57.

In the Brahmana and Sutra period verbs in -aya-ti sometimes show an opt middle of the Ist type, as vēday-ī-ta beside vēdáya-tē 'gives to know', kāmay-ī-ta beside kāmaya-tē 'wishes'. These must be connected with participles like vēdayāna-s beside

¹⁾ If \bar{a} in open syllables represents Idg. o (I § 78 p. 68), we must assume pr Ar. * $bhar\bar{a}_k$ -am * $bhar\bar{a}_k$ -an. In Avestic, \bar{a} will have been exchanged for a following the lead of these persons in which a_k was tautosyllable Compare § 939 Rem p 482.

vēdaya-māna-s and such indic. forms as dhvanay-ī-t (cp. á-brav-ī-t, § 574 p 116). Compare § 789 Rem. p. 321; Bartholomae, Stud. Idg. Spr. 11 71, 127.

§ 952 Greek. Examples given in § 950.

On the endings of the 1st sing. -o₁- μ ₁ -o₁- ν see § 979.3; of the 3rd pl. -o₁e ν El. -o₁a ν Delph. -o₂ ν , § 1020.1. b

Because of the formal agreement between σχοῖμεν (indic ε-σχ-ο-μεν) φιλοῖμεν (indic. φιλοῦμεν for φιλέομεν) μισθοῖμεν (indic. μισθοῦμεν for μισθοῦμεν for μισθοῦμεν (indic. μισθοῦμεν διλοῖμεν (indic. ἔ-λο-μεν δί-δο-μεν), there arose in Ionic-Attic, and in Doric here and there, a new formation for the singular following Type I, σχοίην φιλοίην μισθοίην by analogy of δοίην διδοίην; but the old singular forms were not discarded (παρά-σχοιμι φιλοῖμι μισθοῖμι); similarly τῖμιψην beside τῖμιῷμεν (indic. τῖμιῶμεν for τῖιιάομεν). A further consequence of this was the plural series φιλοίημεν etc., cp. σταίημεν complementary to σταίην, § 945 p. 489.

§ 953. Germanic Goth. nimái-s nimái etc. O H.G. nemēs neme etc., Goth. mid.-pass. 2nd sing. nimái-zau 3rd sing. nimái-dau with the indic. nima nimu 'I take': Gr. νέμοι-ς etc. The A.S. sealfie pl. sealfien may be compared directly with Skr. pṛtanāyé-t O.C.Sl lakaji (cp. § 781.1 p. 304), but O.H.G salbōe-oēs(t) -ōēm etc. beside salbo -ōs(t) -ōm etc. is a new formation (cp. Lith. pa-darai § 954), and so is habēe -ēēs(t) -ēēm beside habe -ēs(t) -ēm etc., see § 930 p. 476.

§ 954. Balto-Slavonic.

Lithuanian retains the 3rd sing. act. (used also for 3rd pl and dual) and calls it a Permissive; e. g. te-sukë 'he may turn' beside indic. sukù, te-ateinë 'he may come' beside indic. ei-nù 'I go', te-vertë 'he may turn' for *vertie (like 2nd sing. indic. pres. reflex verté-s for *vertie-s, I § 147 p. 131) beside indic vercziù. te-dûdë 'he may give' beside indic. dû(d)-mi and dû'du (§ 546 p. 104) like tesë 'he may be' beside indic. es-mì and es-ù (§ 510 p. 76, § 939 p. 483). The Permissive to the Indic. in -au has the ending -ai in the old books, as te-darai beside darañ

'I make'. te-darai: te-sukē = 2nd sing. indic. daraī-s(i): sukė-s(i) (§ 991), i. e. the optative suffix è (ai) is added to indic. stems in -ō (-ā) just in the same way as O.H.G. salbōe is formed on the analogy of bere (§ 953). We also find 1st pl. pa-praszaim (pa-praszaū 'I beg for, win over') and 2nd pl. šinait (šinaū 'I know'), Bezzenberger, Zur Gesch. der lit. Spr., 223. Furthermore, the op-optative is a living type in Prussian, where it is used for the Imperative; e. g. imais immers 'take thou' 2nd pl. imait, en-gaunai -gaunei 'let him receive'; to compare with Lith. tesē we have 2nd pl. seiti 'be ye', and again jeis 'go thou' pl. jeiti like Gr. ĭoig (§ 511 p. 77), idaiti ideiti 'esset' beside Lith. ėdu (§ 510 p. 76), dais 'give thou' 2nd pl daīti like Avest. dōi-š (§ 948 p. 492) Similarly in Lettic 2nd pl. meti-t 'throw ye' we'lzi-t 'pull ye' mafgáji-t wash ye' lükûji-t 'look ye'.

§ 955. The same optative type, like the other (§ 949 p. 492), is used for the Hortative (Imperative) in Old Church Slavonic. Sing. 2nd and 3rd beri (I § 84 p. 82) pl. 1st berë-më 2nd -ĕ-te dual 1st -ĕ-vĕ 2nd -ĕ-ta from berq 'I carry, bear', dĕji -ji-mü -ji-te etc. (I § 84 p. 82) from dĕją 'I lay'. On the root syllable in rīci tīci pīci žīzi see § 534 p 95 f.

Along with forms having -ji = -ioi—we get in the Old Bulgarian literature forms with -ja—for $-j\check{e}$ —(cp. sto-jati for *stojěti I § 76 p. 66), as pijate beside pijite from pija 'I drink', glagoljate beside glagoljite from glagolja 'I speak' (see Leskien Handb.² p. 138, Wiedemann Beitr. zur abulg. Conj. 27 ff.) So long as no such forms as *tičate instead of tičete are found, it is likely that \check{e} comes from forms like berëte, ') and the group $j\check{e}$ thus made, along with $j\check{e} = \mathrm{Idg.}\,i\check{e}$, became ja; more likely than Oblak's view (Arch. slav. Phil. x 143 ff.), that we have here orig. $i\check{e}$, i. e. a conjunctive like Lat. capiē-s (§ 926. 1 p. 472), pijate standing to pijā in the same relation as Lat. capiē-tis to capiā-m (cp. § 929 p. 475).

¹⁾ Similarly in OHG, after 10 in final syllables had become 10 and then e, -an was replaced in the infinitive of the First Weak Conj. on the analogy of verbs without -i, e g nerian instead of older nerien following neman and similar infinitives.

Remark. Present Stems of Class XXVI, as velją veliši inf. velėti 'to command' (§ 727 pp 257 ff), of Class XXXI, as goštą gostiši inf yostiti 'to entertain as a guest' (§ 782 pp. 308 f.); and of Class XXXII, as vraštą viatiši inf viatiti 'to turn' (§ 807 pp. 343 f.) all have throughout their imperative -i-: veli velimū gosti gostimū vrati vratimū; from the Idg optative forms which it is necessary to assume we should expect *velji *velimū *gostīji *gostījimū *ii atīji *vratījimū The forms are then doubtless not optative at all, but Injunctive, and velimū velite are related to indic velimū velite as bądą 'sunto' (§ 909 p 458) to indic bądątī (bądątū) Some might wish to take 2nd sing. veli for orig *velī, i e 2nd sing imperative (cp Lat farcī § 958) Against this may be urged that chošti 'wish thou' is sometimes used in sentences which are not imperative (Leskien, Handb 2 p. 143)

IMPERATIVE.1)

§ 956. The forms classed as Imperative in the various Indo-Germanic languages have all kinds of different origins (1) Some of them are Injunctive, as 2nd pl. dual Skr bhára-ta bhára-tam Gr φέφε-τε q έφε-τον, which were already well establisht in the imperative system of the parent language; Skr. 3rd sing. bhárat-u 3rd pl. bhárant-u (with the particle -u), Gr. 2nd sing. mid. φέφεο φέφον, O.Ir 2nd sing. mid cluinte 'exaudi' (§ 909 p 458). (2) Conjunctive forms. Skr 1st sing. pl and dual, as 1st pl act bhárama mid. bháramahai, the 2nd and 3rd persons of the conj. are dropt in classical Sanskrit, and the 1st persons, which are kept, go with the Imperative system (3) Optative forms: OCSI. beri berëte (§ 955 p. 495) (4) Indicative forms Skr. 2nd sing. vē-ši 'come

I. N. Madvig, De forms imperativi passivi, Kopenh. 1887 = Opusc. II 239 ff J N Schmidt, Über den lat. Imperativ, Zeitschr. für d. Gymnasialw. 1855 pp. 422 ff. Ch Thurot, De l'imperatif futur latin, Revue de phil, iv 113 ff.

Kern, Eine Imperativform im Got, Kuhn's Zeitschr. xvi 451 ff.

here', Gr. $\lambda \dot{\epsilon} \xi a \dot{\epsilon}$ 'lay thyself' (§ 910 Rem. p. 459 f.). (5) Forms of the Verb Infinite: as Lat. 2nd pl. sequi-minī (II § 71 p. 165). Lastly (6) some are forms which, so far as we can trace them, were never used for anything but the Imperative.

It is the last group, which I call the Genuine Imperative, that will concern us in the following pages. But along with them we shall include some others from the different languages whose origin has not been clearly made out, amongst which may be a few which properly belong to one of the other five groups.

I THE PROETHNIC IMPERATIVE.

A. Bare Tense Stem as 2nd sing. act.

§ 957. The forms which come in this section are such as Gr $"\sigma\tau\eta$ 'place thou' $\varphi\epsilon\varphi\epsilon$ 'bear thou', which like the voc. $\delta\eta\iota$ $"\tau\eta\iota$ do without any personal suffix whatever. I regard the Idg. forms in $-dh\iota$ (§ 959) and $-t\bar{\upsilon}d$ (§ 963) and the Skr. forms in -sva (§ 968) as being nothing but extensions of these

(1) Unthematic

Pr.Idg Class I. *e½ beside *e½-ti 'goes' · Gr. έξ-ει, Lat. ei $\bar{\imath}$ ex- $\bar{\imath}$, Lith e $\bar{\imath}$ -k. *d \bar{o} beside *é-d \bar{o} -t 'he gave' · Lat. ce-do (2nd pl cette for *ce-d(i)-te § 505 p 71),1) Lith. dû'-k, cp. Gr. δi - $\delta \omega$ (Class III). — Class X. Lat. hiā Lith. ži δ -k 'open thy mouth' beside indic Lat. hiā-mus, on the same principle Lat. plantā O.Ir. car Goth salbō Lith. dovan δ -k (see below). Lat. v-dē Lith. p-v-v-v-dé-k 'invide' beside indic Lat v-dē-mus. Compare Gr $\delta \gamma$ -/iv- ρ σ σ - σ - σ - σ (Class XI). — Class XVII. Skr. s-r-r-u Gr. σ -r- σ -v \bar{v} beside indic. s-r-r- σ -t-t (s-t-r-u-u-s) σ -t-v- σ - σ 'sternit'.

Aryan This formation is clear only in the XVIIth Class in Sanskrit, where however -dhi or -hi is usually affixt, śr-nii

¹⁾ Others, not so well, take ce-do as a combination of two particles, 'here-wards, hither' cette then is explained as derived from cedo as Slav. na-te from na See Per Persson Studia Etymol, p. 71.

and *in-nu-dhi* 'hear thou' (§ 960). In the later language it was the rule to use -hi only where the root ended in a consonant.

In § 600 p 143 I conjectured that grhānά is grhā — the particle na, and that *grh-ā comes from *-ā: cp. Att. roίωιη.

Compare further what is said in § 641 p. 180 about kuru. Greek Class I. Att. ἐξ-α, see above Eph. Acol. πῶ 'drink thou' beside πῶ-θι — Class III - δί-δω (gramm.) 'give thou'. ὅ-στη Dor. ὅ-στὰ Lesb ι-στὰ 'place thou'. — Classes X and XI. Dor. ἐγ-κίνρὰ, from κίγ-νρα-ω 'I mix'. Att. πίμ-πρη. from πία-πρη-ω 'I kindle (cp § 594 p. 135). Lesb. πίτη from κίνη-ω 'I move', Lesb qίλη from qίλη-ω 'I treat as a friend', μύρω from μύρω-ω 'I anoint' · cp Lith kète-k balnů-k. — Class XII. Att νρίωνη from κρίμ-νη-ω 'I hang. let hang' Lesb. δάμ-νὰ from δώμ-νὰ-ω 'I tame, subdue'. — Class XVII. ὄρ-νῦ from δρ-νῦ-ω 'I arouse' · Skr. χ-νν.

Latin. 7 ce-do, see above 1) The forms fer ēs es can hardly belong to this group. It is more likely they are injunctive like vel = *yel-s (§ 505 p. 69) — Class X Besides hiā plantā we have flā nā domā portā etc. and by analogy stā dā, unless we must take stā to be another form of Class I like ce-do (cp Lith. stó-k) Others like vidē (above) are implē nē tacē (on albē, see § 958).

Irish car 'love thou' for cara, see above.

Germanic. (ioth salbō O.H.G salbo anomat thou' doubtless from pr Germ *salbō, like Latin plantā (above) But the forms actually used are not regular; -ō has been restored from the other imperative forms which had it, a 2nd pl. Goth. salbō-ħ () H.G. salbō-t (ep. 1st sing. indic pres. Goth. salbō, § 982 1) Similarly, () H.G habe have thou' (indic. habē-m), with its final vowel assimilated to ē in pl habē-t

Baltic. In Lithuanian, a particle -ki -k (-ke) is always affixt to these imperatives. Whether the i-vowel representate original ending of the particle is very questionable. It is usual to compare Lat ce (ce-do si-c), which is plausible.

¹⁾ fu in the Arval Song will be another if it means 'be thou', which is doubtful Compare Pauli, Altital. Stud iv 29 ff

Class I. eī-k indic. eī-ti 'he goes': Gr. εξ-ει Lat. ī. dử-k 'give thou' beside Skr. ά-dā-t (§ 493 p. 53): Lat. ce-do. dĕ-k 'lay thou' beside Skr. ά-dā-t (see loc. cit.). bǔ-k 'be thou' beside Skr. ά-bhū-ma (§ 497 p. 56). — Class X ne-biyókı-s 'fear thou not' beside bijo-s 'he fears'. žió-k beside žió-ju 'I open my mouth': Lat. hiā beside hiā-mus. yō-k beside yō-ju 'I ride'. klō-k beside klō-ju 'I spread out', mıné-k beside mine 'he remembered'. lukĕ-k beside lukĕ-ju 'I wait a bit' dovanō-k beside dovanō-ju 'I present', pāsako-k beside pāsako-ju 'I relate' cp. Lat plantā. kĕtē-k beside kēte-ju 'I grow hard' cp. Lesb. φίλη. balnū'-k beside balnū'-ju 'I saddle' cp. Lesb. μύρω

It is the rule that this whole Imperative formation takes its stem from the Infinitive. The reason is that some of the forms belonged to the aorist, whose stem differed from the present stem and agreed with the s-future etc., that is, the infinitive stem; the others then conformed to the same type. Hence we have vartý-k beside vartaŭ 'I turn', jŭsty-k beside jŭstau 'I gird'. And similar imperatives are made for all thematic present stems: thus the relation between dŭ-k and dŭ-ti suggested an imper vèsk from vèsti 'to lead' (pres. vedù), sùk(k) from sùk-ti 'to turn' (pres suhù), and so forth.

As the original meaning of these singular forms with -k(i) was forgotten, a plural and dual was made from them thus $d\mathring{u}kime$ $d\mathring{u}kite$ $d\mathring{u}kiva$ $d\mathring{u}kita$ from $d\mathring{u}ki$ $d\mathring{u}k$, on which see § 463 Rem p. 9. $d\mathring{u}ki-te$ $d\mathring{u}k(i)$ as Lett. weddi-t: wedd(i) 'lead thou' (cp. § 958)

§ 958. (2) Thematic

Pr.Idg. *bhére, from indic. *bhére-ti 'bears'. Skr. bhára Armen. ber Gr. φέρε O.Ir beir Goth. baír; Lat. age Skr. ti-šth-a Lat. si-st-e, indic. tí-šth-a-ti si-st-i-t from V stā- 'stand'. Skr. gácha Gr. βάστε beside gá-cha-ti from √ gem- 'go'. Skr namas-yá indic namas-yá-ti 'honours', Gr. τέλεε τέλει from indic. τελείω -έω -ω, 'finish thou', for -εσ-μω, Skr. gā-tu-yá indic. gātu-yá-ti 'goes an errand', Lat. metue from metuō. Skr. sādáya Goth. sater from indic. sādáya-ti satn-þ causal

of V sed- 'sit', Gr. $\varphi \circ \beta \varepsilon \varepsilon - \varepsilon \iota$, indic $\varphi \circ \beta \varepsilon \omega - \iota \bar{\upsilon}$, 'scare thou off'. s-Aorist· Skr $n\bar{e}$ -š-a beside conj $n\acute{e}$ -š-a-t(i) from $n\bar{\iota}$ - 'to lead', Gr. $olo-\varepsilon$ beside conj (fut.) $olo\omega$ 'I will bear or bring' (§ 833 p. 370).

Wherever 20-presents of Class XXVI show -1- and -1- in the indic. pres. beside -20-, these weaker grades are naturally found in the imperative too Lat. cape for *capi ep indic capi-s, farcī ep. indic. farcī-s, OH.G. biti ep. indic bitis 'thou prayest'; perhaps we may venture to add O.Lith girdi, ep. ind. girdi-te 'ye hear'

Aryan Skr. jīva O.Pers. jīvā beside indic. Skr. jīva-ti 'lives'; Avest. ja-sa (Skr. gá-cha) beside indic. ja-sa-iti 'goes' (§ 671 p. 203).

Armenian ber 'bring thou' beside bere-m aor. ber-i, ac 'lead thou' beside ace-m aor. ac-i, ker 'eat thou' beside aor ker-i, tes 'see thou' beside aor tes-i, arb 'drink thou' beside aor. arb-i.

Greek $\tilde{\alpha}\gamma$ - ϵ 'age' from $\tilde{\alpha}\gamma\omega$ 'ago' $\kappa\alpha\tau\dot{\alpha}$ - $\sigma\chi\epsilon$ beside $\tilde{\epsilon}$ - $\sigma\chi$ -o- ν pres. $\tilde{\epsilon}\chi$ - ω 'I have' $\tau t \mu\alpha\epsilon$ $\tau t \mu\alpha$ from $\tau t \mu\dot{\alpha}\omega$ - ω 'I honour', $\delta \omega \dot{\nu} \delta \epsilon = -\omega v$ from $\delta \omega \dot{\nu} \delta \omega - \bar{\omega}$ 'I enslave' (cp. Lesb $u\dot{\nu} \rho\omega$ \ \ \ 957 p. 498) There are a great many bye-forms of this class used as variants to others of the first class (\ 957), when the tense stem ends in $-\bar{\alpha}$ - $\bar{\epsilon}$ or $-\bar{\sigma}$, as Att $\kappa\alpha\theta$ - $i\sigma\tau\bar{\alpha}$ Dor. $i\sigma\tau\eta$ for * $i\sigma\tau\alpha\epsilon$, Att. $\tau i\theta\epsilon\iota$ $\delta i\delta\omega v$, Att. $\pi i\mu$ - $\pi \lambda\bar{\alpha}$ Dor. $\tau i\mu$ - $\pi \lambda \eta$, Att. $\epsilon \sigma$ - $\beta\bar{\alpha}$ Dor $\dot{\epsilon} \mu$ - $\beta\eta$ for * $\beta\bar{\alpha}\epsilon$, similarly $\dot{\sigma} \mu \nu v$ - ϵ Perf. $\gamma \dot{\epsilon} \gamma \omega \nu \epsilon$ from $\gamma \dot{\epsilon} - \gamma \omega \nu - \omega \gamma \epsilon \gamma \dot{\omega} \nu \omega$ 'I announce, say'.

The five words $i\delta\dot{\epsilon}$ $\lambda\iota\dot{\beta}\dot{\epsilon}$ $\epsilon\dot{\iota}n\dot{\epsilon}$ $i\lambda\dot{\beta}\dot{\epsilon}$ $\epsilon\nu\dot{\varrho}\dot{\epsilon}$ have kept the accent which they had in pr Idg at the beginning of a sentence $\lambda\dot{\iota}n\epsilon$ and the others with the same accent were originally enclitic (I § 669 p. 532, § 676 Rem. 1 p 541). The corresponding middle imperatives $i\delta\dot{\varrho}$ $\lambda\iota\dot{n}\varrho$ for $-\dot{\epsilon}\cdot(\sigma)\varrho$ (§ 909 p 458) have always the accent which they bore as first in a sentence, even when compounded, $n\varrho\varrho\sigma-\lambda\iota\dot{\varrho}\varrho$ (but active $n\varrho\dot{\varrho}\sigma\lambda\iota\dot{\varrho}$). $i-\vartheta\iota$ (contrast Skr. i-hi, § 959) is accented on the same principle as $\lambda\dot{\iota}n\epsilon$, and so too $i\sigma\vartheta\iota$ $ni\vartheta\iota$ and others, but $\varrho\alpha-\vartheta\iota$ is like $i\delta\dot{\epsilon}$, and also has a variant $\varrho\dot{\alpha}\vartheta\iota$.

Italic. Lat. age. Whether albe mone are for *albe(1)e *mone(2)e is as doubtful as the derivation of albes mones from *-eie-s (§ 788 p. 319).

Lat. cape for *capi,1) farcī, see above.

Keltic. O.Ir. *ib* Mod.Cymr yf 'bibe' for *(p)i-be. $l\bar{e}ic$ for * $l\bar{e}ci$ or $-\bar{i}$, see § 702. p. 229, § 719 p. 251

Germanic Goth bair; in OH.G forms like hilf 'help thou' for *hilfi are regular, but e. g. bir stands for *biri (I § 662.2 p. 520). O.H.G. neri 'make thou whole' for pr. Germ. *nazi, see loc. cit.; Goth. nasei seems to prove that *nazi, had not yet become *nazī in pr Germ. (cp. nom. frijondi I § 660.2 p. 515)

With Idg -1 OHG hevi from heff(1)u 'I lift', biti from bitt(1)u 'I beseech', like Lat cape for *cap1, see p. 500. But Goth hafe instead of *haft *haf follows nase etc.

Balto-Slavonic. In O Lith. and Lett. -i is found with presents like Lith iedù 'I lead', as O.Lith vedi ved Lett. weddi wedd, gawiléji 'I exult, shout for joy' By the sound laws it is impossible to explain this as the 2nd sing. opt. (cp. Pruss wedders), or to assume that -i is -e weakened; and therefore

¹⁾ The forms fac and aic duc may have elided -e as hace for hacee has But the injunctive fer at the same time must have helped to make the short forms current (§ 505 p. 68) [It is true Skutsch has lately derived fer from *fere, denying most distinctly that it comes from *fer-s (Forschungen zu lat. Gramm 55 ff) But his reasons will not hold water. That ferre was originally a thematic present, and that forms like fert come by syncope of the thematic vowel, is bare assumption and nothing more the scansion of ter as long by Plantus (Bacch. 1127) is taken as evidence of the older pronunciation *terr (for *ters, cp. Bucheler, Rhein Mus XLVI 236 ff), and since the same poet has fer twice short and once long (Mil. 1343 a fér aequo ánimo), any candid enquirer will see in this a confirmation of my view rather than his. Why the MS, should be corrupt in fer acque animo, and genuine in the two examples of fer short, as Skutsch says, there is nothing to show. If in Plautus' day people spoke -r = -rs before a vowel, it is in the first degree probable that this was not done always, but that the form with 1, which was right before consonants and at the end of a sentence, was sometimes used too In any case Skutsch ought to prove the contrary before unconditionally supporting the transposition fér animo aéquo To transpose is simple, it does not follow that it is necessary]

I conjecture that -1 is due to the analogy of forms like girdi, which answer to the Lat. cape (for *capi) farcī etc., and are identical with the 2nd sing. indic. (vedi beside indic ved-ì follows girdi beside indic. girdì); and that veizdi 'see thou', i. e. *ueid+dhi, helped to make the type current, — perhaps we should add dù-di (§ 962). 1)

In O.C.Sl. the 2nd sing. veli (indic. velją veli-ši inf. veli-ti 'to command') may possibly be a form like Lat. farcī. But it is no doubt better to regard it as injunctive, for *-\(\tau-\text{\$\tilde{\text{\$r}}\$} \); see § 955 Rem p. 496.

B. 2nd Person Singular in -dhi.

§ 959. Forms with this suffix occur in Aryan, Greek and Balto-Slavonic; they occur in Unthematic tense stems. Thurneysen (Kuhn's Zeitschr. xxvii 180) compares Skr. ádhi 'up!' (like Ger. auf! geh! 'up! go!'), with its variant dhi, like abhi with variant bhi; others again compare the infinitive endings -dhyāi Gr. -9ai, which is less credible. In both cases we may assume that the imperative type described in § 957 lies at the foundation of this.

-dhi is added to the Weak Stem.

Pr.Idg. Class I *i-dhi from *ei-ti 'goes'. Skr i-hi Gr i-9ι. Skr. śru-dhi Gr κλῦ-θι 'hear thou' from √ kleu-. 'uid"-dhi (I § 494 p 363) beside Skr. véd-mi and véd-a from √ ueid- 'see, know' (§ 493 p. 52). Skr. viddhi Gr. ἴσθι, O Lith. veizdhi O.C Sl ιιἔdῖ instead of *vizdī (§ 962). *z-dhi from *es-ti 'is' Avest Gath. zdī Gr ἴσ-θι. — Class X. Skr. yā-hi 'go thou', Gr. γνιῦ-θι 'learn, know'. — Class XVII. Skr. š̄g-nu-dhi š̄g-nu-hi from š̄g-nō-ti 'hears', Gr. ὄμ-νν-θι from

¹⁾ With the change of *pede to ved: following girds etc should be compared the change of O C Sl. 1st pl. pres. *nesomu to nesemu following znasemu § 1008 sub fin , with the effect of veizds which possibly helped, compare the change of O.C.Sl. imper chošts 'wish thou' to chošts following rižas

ὄμ-ντ-σι 'swears'. — Perfect. Skr. mumugdhi beside mu-mốc- α from muc- 'to let go', Gr. Hom. δείδιθι i. e. *δέ-δFι-θι beside *δέ-δFι-μεν 'we feared'.

§ 960. Aryan. Sanskrit has both -dhi and -hi. Of these -hi is used only after sonants, -dhi in Vedic after both sonants and consonants, in the later language after consonants only. See I § 480 p. 354, and von Bradke, Zeitschr. Deutsch. Morg. Gesell. XL 658 ff., where the variants -dhi and -hi (śrnudhi and śrnuhi for instance) are convincingly explained as dialectic byte-forms

Class I. Skr. 1-hi Avest. 1-di (). Pers 1-dīy beside indic. Skr é-ti 'goes'. Skr. stu-hi Avest, stūiđi beside indic. Skr stāú-ti 'praises'. Skr kr-dhí beside ind. hár-ši from kar- 'to make'. Skr. ga-dhi ga-hi Avest guidī beside indic. Skr. á-gan from V gem-'go, come'. Skr ja-hí Avest jaidi () Pers. ja-dīy beside indie Skr. hán-ti from V ghen- 'strike', the common groundform *jha-dhi stood instead of regular pr Ar *gha-dhi, I § 454 Rem p. 335, and § 480 p 354, in Sanskrit we also have han-dhi by re-formation Beside Avest Gath. zdī, to which a Skr. form *dhi would correspond, Sanskrit has a variant ēdhi, for *az-dhi, I § 591 p 447. Similarly, with intrusive strong stem, we have Skr addhi 'eat' (indic atti) from Ved-O.C.Sl. jaždī § 962 — Classes III and V. Skr. dhēhi and daddhi place thou' dehi and daddhi give thou' Avest. dazdi beside indic. Skr. $d\acute{a}$ - $dh\bar{a}$ -ti $d\acute{a}$ - $d\bar{a}$ -ti, see § 540 p 101. ci-kī-hi beside ci-kē-ti 'observes, notices' ši-šī-hi and with strong stem \$i-\$a-dhi and \$i-\$a-ti 'whets, sharpens' (\$ 538) p. 98). - Class VII. Skr car-kr-dhi beside car-kar-ti 'remembers', nē-nig-dhi beside né-nēk-ti 'washes'. — Class IX. Skr. stani-hi from stun- 'to thunder'. brū-hi and with strong stem bravī-hi beside brávī-ti 'speaks'

Class X. Skr. vā-hi beside vá-ti 'blows'. Skr. pā-hi O Pers pā-dīy from Ar. pā- 'to protect' (§ 588 p. 129)

Class XII Skr. $\dot{s}_r - n\bar{\imath} - hi$ from $\dot{s}_r - n\bar{a} - ti$ 'breaks to bits, crushes' (§ 597 p. 141), sometimes the strong stem appears, as $st_r - n\bar{a} - hi$. — Class XV. bhindhi from bhinad-mi 'I split',

pṛndhi from pṛnák-ti 'mixes, mingles'. — Class XVII Skr kṛ-ṇu-hi Avest ker'-nū-iđi beside indic. Skr. kṛ-nó-ti 'makes', Skr. dhṛš-nu-hi beside dhṛš-nó-ti 'dares'; cp. § 957 p. 497 f

s-Aorist. aviddhi instead of regular *avīdhi (cp. I § 591 Rem. 1 p. 448), with indic áviš-am from av- 'to favour, help' Perfect Skr. pi-prī-hi, beside indic. pi-priy-ē pret á-pi-prē-t from prī- 'to enjoy', šu-šug-dhi beside indic

śu-śóc-a from śuc- 'to shine'

Class X. $\gamma \nu \tilde{\omega} - \vartheta \iota$ 'learn thou, know'. $\tau \lambda \tilde{\eta} - \vartheta \iota$ 'endure thou'. $\beta \tilde{\eta} - \vartheta \iota$ 'go thou' Lac $\nu \dot{u} - \beta \bar{u} \sigma \iota$ (I § 495 p. 364). $\varphi \dot{u} \nu \eta - \vartheta \iota$ 'appear thou', $\pi \sigma \varrho \epsilon \dot{\nu} \vartheta \eta - \tau \iota$ 'start off' (I § 496 p. 364). Of this class we have further $\sigma \nu \tilde{\eta} - \vartheta \iota$ Lac $\tilde{u} - \nu \nu \bar{u} \sigma \iota$ (I § 566 p. 423), see § 495 p. 55. — Class XI. $\tilde{\iota} \lambda \eta - \vartheta \iota$, see above, $\tilde{\iota} \mu - \pi \iota \pi \lambda \eta \vartheta \iota$ 'imple'

Class XVII. ŏorv-91 from ŏo-rī-ot 'arouses'

Perfect. \mathcal{E} -στα- \mathcal{G} ι 'stand thou' beside indic. \mathcal{E} -στα- μ ει τέ-τλα- \mathcal{G} ι 'endure thou' beside τέ-τλα- μ εν. π έπιο \mathcal{G} ι 'tryst thou' (Aesch. Eum 599, MSS π έπεισ \mathcal{G} ι) beside π έ-ποι \mathcal{G} -α \mathcal{E} - π έ- π ι \mathcal{G} - μ εν Of the same kind are ελλα \mathcal{G} ι χένλν \mathcal{G} ι, which I placed in Class V (§ 557 p. 109).

§ 962. Balto-Slavonic. O.Lith. veizdi veizd see thou' (by this analogy véizdmi instead of *veid-mi) O.C.Sl. viždī instead of *vizdī: cp. Skr. viddhi Gr. ĭoθi. O.Lith. důdi důd 'give thou' may be Idg. *dō-dhi, in which case it stands to dů'-k as Gr. $\pi\tilde{\omega}$ -θi to $\pi\tilde{\omega}$, O.C.Sl. daždī instead of *da-dī = dů-dī Class I, or instead of *dazdī like Avest. dazdī, Class V O.C.Sl. jaždī 'eat thou' instead of *ězdī. cp. Skr. addhi O.C.Sl. věždī instead of *vězdī beside indic. vědě 'knows'. See I § 547 p. 400, IV § 949 p. 492.

C. The Forms with -tod.

§ 963 These forms, for instance *uit*-tôd from \(\square\) uerd-'see, know', *bhére-tōd from \sqrt{bher-} 'ferre', served originally for the 2nd and 3rd persons of all numbers, as their use in Thus -tod was properly not a personal Sanskrit indicates suffix at all, probably it was an affixt particle, the abl. sing of the pronoun stem 'to- this, that' (Skr. tad), used in the sense of 'from there, then' (III § 424 p. 348). This theory suits the use of the forms in Sanskrit and Latin, where they are chiefly employed when the command is not to be straightway carried out, but only after a particular point of time, or under certain circumstances. Take, for example, vánuspátir ádhi tvā sthāsyati tásya vittāt (Tāittirīya-Samhītā) 'the tree will fall on thee; beware of it'. tu velim suepe ad nos scribas, si rem nullam habebis, quod in buccam venerit scribito (Cic.). Greek also has often this manner of using it, but its use was much restricted by preference for the infinitival imperative

The basis of this $t\bar{o}d$ -series is the imperative type described under (A), §§ 957 f, of which it may safely be assumed that it was not originally restricted to the 2nd singular, which it is most commonly used for cp Skr ky-nu-tād Gr $\sigma \tau o \rho - r \dot{\tau} - r \omega$ with ky-nu $\sigma \tau \dot{o} \rho - r \ddot{v}$, Lat. $im-pl\bar{c}-t\bar{o}$ with $impl\bar{e}$, Gr. $\lambda \iota n \dot{\eta} - r \omega$ Lat. $lic\bar{c}-t\bar{o}$ with $vid\bar{e}$, Skr. $bh\dot{a}ra-t\bar{a}d$ Gr $q \iota \rho \dot{e} \dot{e} - r \omega$ Lat. $veh \iota - t\bar{o}$ with $bh\dot{a}ra$ $q \dot{e} \rho \dot{e} - r \omega$.

Remark. The arguments urged against this view by Windisch do not convince me (Ber. sächs Ges. der Wiss., 1889 pp 21 ff).

§ 964. Pr.Idg.

(1) Unthematic Forms. Stems with gradation have the Weak grade. Class I. 'Skr. vittad Gr. ἴστω beside Skr véd-mi and véd-α from √ μενd- 'see, know' (§ 493 p. 52). Gr. εσ-τω Lat. es-tō beside ἐσ-τὶ es-t; strong grade in the root as in ἐσ-τὲ es-te etc. Gr. δώ-τω Lat. dα-tō beside ε-δο-μεν dα-mus from √ dō-. — Classes III and V. Skr. dhα-t-tād Gr. τι-θέ-τω

from $\sqrt{dh\bar{e}}$ 'place', Skr. da-t- $t\bar{a}d$ Gr. $\delta\iota$ - $\delta\acute{o}$ - $\tau\omega$ from $\sqrt{d\bar{o}}$ -'give' — Class X. Gr. δρά-τω beside ε-δοά-ν 'I ran', σβή-τω beside ε-σβη-ν 'I quenched', γνώ-τω beside ε-γνω-ν 'I learnt'. Lat. flā-tō beside flā-s, im-plētō beside im-plēs — Class XII. Skr. pu-nī-tād beside pu-nā-ti 'purifies'. Gr. 119-rá-tw beside xίο-νη-ιιι 'I mix' — Class XVII kṛ-nu-tād beside kṛ-nō-ti 'makes' Gr ομ-νί-τω beside ομ-νυ-σι 'swears'. — Perfect. Gr. με-μά-τω, Lat. me-men-tō beside Gr. μέ-μον-α μέ-μα-μεν Lat. me-min-ī from √ men- think, devise'.

- (2) Thematic Forms Skr vaha-tād Lat. vehi-tō beside Skr. váha-ti 'vehit'. Ski vōca-tād Gr. sìné-va beside á-vōca-t Gr ϵ - ϵ - ϵ (§ 561 p. 110) Skr. $r\acute{a}k \acute{s}a$ - $t\bar{a}d$ beside $r\acute{a}k \acute{s}a$ -ti'protects'. Skr pātaya-tād beside pātáya-ti 'makes fly', cp Gr. mid. ποτείσθω § 966; Gr φορεί-τω φορείτω from φορέω 'I carry about with me, wear'
- § 965. Aryan. No examples occur in Iranian. Sanskrit examples are given in § 964

The forms in Sanskrit are most commonly used for the 2nd person singular, but are also found as 3rd sing, and as 2nd plural.

Since vaha-tād as 2nd pl was associated with váha-ta 'vehite', a middle form vaha-dhvād was coined to complement váha-dhvam (vār ayadh vād in the Brahm. is the only form actually found) Compare Gr. $\varphi \varepsilon \rho \varepsilon' - \sigma \mathcal{H} \omega$ § 966, Lat fruimino § 967

§ 966 Greek Further examples (see § 964) φά-τω from φη-μὶ 'I say', "-τω from ε--μι 'I will go'. 'έτω from "-η-μι 'I send forth'. βλή-τω from ε-βλη-ν 'I received a missile, was struck', Lesb $\tau \bar{\iota} \mu \dot{\bar{\alpha}} - \tau \omega$ from $\tau \dot{t} \mu \bar{\alpha} - \mu$ 'I honour'. $\dot{\omega} \vartheta \dot{\eta} - \tau \omega$ from ώθη-μι 'I press, oppress'. δαμ-νά-τω from δάμ-νη-μι 'I tame' $\delta \epsilon i z - \nu \dot{v} - \tau \omega$ from $\delta \epsilon i z - \nu \bar{v} - u \iota$ 'I show'. $\delta \epsilon \iota \xi - \dot{\alpha} - \tau \omega$ from $\dot{\epsilon} - \delta \epsilon \iota \xi - \alpha$ I showed'. έ-στά-τω from έ-στα-μεν 'we stand'. ἀγέ-τω from ἄγω 'ago', τιμαίτω τιμάτω from τιμάω - ω 'I honour'.

On the analogy of act. φέρετε. mid. φέρεσθε a middle σερέσθω was comed to complement φερέτω; this happened in

proethnic Greek. Compare Skr. vārayadhvād § 965, Lat. fruiminō § 967.

In Greek, the forms with $-\tau\omega$ and $-\sigma \mathcal{D}\omega$ are regularly used for the 3^{rd} singular. The active form is used as 2^{nd} sing., with the additional suffix -s to make the person clear, in the word $\partial \mathcal{D}_{\ell} \tau \tilde{\omega} \zeta \cdot \dot{\alpha} \tau \tilde{\iota} \tau \tilde{\upsilon} \tilde{\upsilon} \partial \mathcal{D} \dot{\varepsilon}$. Salaulivioi, a gloss given by Hesychius; cp § 987. 1. The Corcyrean $\varphi \varepsilon \varphi \dot{\varepsilon} \sigma \partial \omega$, 3^{rd} plural, may be taken as evidence that once $\varphi \varepsilon \varphi \dot{\varepsilon} \tau \omega$ could be used for the plural. But another explanation is possible; that the coincidence of $\partial \iota \partial \dot{\omega} \sigma \partial \omega \partial \dot{\omega} \partial$

For the 3rd plural, different dialects made new forms on the basis of -τω and -σθω φερέτω-ν φερέτω-σαν φερόντω (cp. Lat feruntō) φερόντω-ν φερόντω-σαν and φερέσθω-ν φερέσθω-σαν φερόσθω-ν (for *-ονσθω *-ονσθω-ν, cp. I § 204 p. 171); see the collections of G Meyer Gr. Gr.² pp. 498 ff Two remarks must be made here. (1) The origin of φερέτω-ν φερόντω-ν φερένω-σαν φερόντω-σαν is later than the change of *-τωδ to -τω (I § 652.5 p 498).¹) (2) The forms with -ντ-(-οντω -οντω-ν -οντωσαν), it may be conjectured, were not based directly upon the indicative *bheront *ebheront (Att. φέρουσι ἔφερον), but on the imperative-injunctive form *bheront (cp. σχέ-ς φέρε-τε φέρε-τον φέρε-ο and 3rd pl. Skr. bháran bhárant-u O.C.Sl. badą § 909 pp. 457 f.).

The active and middle endings of the 3rd plural did not always correspond; thus Arcadian has act -ντω mid. -(ν)σθων (ζαμιόντω ἐπαλασάσθων). In this and similar cases the explanation is that it was attempted to distinguish the 3rd plural from the 3rd singular middle.

No certain explanation has been given for Lesb. 3rd pl. φέροντον φέρεσθον; see the Author, Gr Gr.² 173, Windisch Ber. sachs. Ges. der Wiss. 1889 p. 20, O. Hoffmann Das Prasens der idg. Grundspr. 21. The medio-passive forms ἱστάνθω and

¹⁾ So the identification of Goth balrandan with Gr. φερόντων (Hirt, Idg. Forsch. I 206) is wrong.

iστάνθων, found in a late Boeotian and a late Phocian inscription, are re-formates instead of iστάσθω and iστάσθων by analogy of the active forms, made in order to clearly mark the 3rd plural.

§ 967. Italic. The forms in $-t\bar{o}d$ (Lat $-t\bar{o}d$ $-t\bar{o}$ Umbr -tu Osc -tud) were used for the 2^{nd} or 3^{rd} singular

Class I. Lat. fertō instead of *for-tō like 2^{nd} pl fer-te instead of *for-te; on Umbr fertu fertu 'ferto' see § 505 p. 69. Lat. er-tō ītō Umbr etu etu eetu instead of *i-tōd· Gr. i-tw; cp Lat ei-te i-te l'elign er-te instead of *i-te = i-re Umbr. futu futu 'esto' (ir $q \dot{v}$ -tw Lat. es-tōd estō Osc estud estud Volsc estu Gr. ω -tw, see § 964 l p. 505 — Class X Lat. $n\bar{e}$ -tō, in-trātō. Lat. $hab\bar{e}$ -tō Umbr. habetu habitu, Lat $lic\bar{e}$ -tōd $lic\bar{e}$ -tō Osc. likitud licitud. Lat $port\bar{a}$ -tō Umbr. portutu, Osc. deivatud 'iurato' — Perfect. Lat me-men-tō: Gr. μ - μ - μ ' α - τ - α — Thematic. Lat. agi-tōd Umbr aitu aitu Osc. actud (I § 502 p. 368). Lat. $s\bar{u}mi$ -tō Umbr sumtu. With Idg. i, Lat. faci-tō Osc. factud.

These forms with -tōd were made the basis of new formations like the Greek. Here, as in Greek, we find forms with a plural characteristic, and medio-passive forms parallel to the active.

(1) A 2nd plural was made in Latin by adding *te (fer-te), as fertō-te agutō-te, which should be compared with Gr. 3rd pl. qερέτω-ν qερέτω-σαν first arose *fertōtte (cp cette for *ce-dite), and the double consonant was then thinned because of the preceding long vowel. Again, a 3rd pl with -nt- makes its appearance, e.g. feruntō, suntōd suntō; probably this form has a similar history to Gr. φερόντω; the Umbrian formation does not correspond, which makes it very unsafe to suppose that the type originated at a time when Greek and Italic were still united.

In Umbrian the 2^{nd} and 3^{rd} plural are made by affixing -tu $-t\bar{o}$ -ta (for $-t\bar{a}$ I § 105 p. 98) to $-tu = *-t\bar{o}d$. futu-to 'estote' etu-tu etu-to etu-ta 'eunto' fertu-ta 'ferunto'

habetu-tu habitu-to 'habento'. This -tā may be either Lat. -te + some interjection (ep. ἔāσον α Ar. Lysistr. 350, κατολολύξατ' α Aesch. Ag. 1118, dringā drinc Parsifal 220. 28), or an ending of the 2nd dual (ep. Lith. and O.C.Sl. -ta) which, like the dual ending -tis in Latin (§ 1013), got into the plural. First futu 'esto' had the 2nd pl. futu-to made for it, like Lat. agitō-te from agitō, and then since futu could be used for 3rd singular too, futu-to came to be used for the 3rd person (ep. O.C.Sl. 2nd sing. jaždī used also for 3rd sing. § 949 p 492). Still, -tā, if it was a dual ending, may have been originally the ending of the 3rd person too (ep. O.C.Sl. -ta as 3rd dual, § 1040); in that case futu-to was originally a 3rd person form as well a 2nd

Remark The ending $-t\bar{\alpha}$ seems to all appearance to be used in its proper and original way in VI b 63 (= I b 21 22) etato Itovinur itate Iguvini, and this $-t\bar{\alpha}$ medialised into $-m\bar{\alpha}$ (cp -mu(d) following -tu(d), below) might be seen in arsmahamo cuterahamo Iovinur ordinamini centuriamini Iguvini VI b 56 = I b 19 But I fear that it is only appearance For in the first place this medialising would be very remarkable in itself, and secondly, it is natural to suppose that etato arsmahamo are shortened by dissimilation from $t=t_0$ (itatote) arsmāmā-mō, and that the latter has caused by analogy the shortening of $t=t_0$ and $t=t_0$ which follows it

(2) Complementary to datōd datō dantō there were formed in Latin dator dantor, like damur beside damus. There also arose a 3rd sing in -minō for the 2nd pl in -minō (II § 71 p 165), as frummō fāminō profitēminō beside fruimnā etc.

Corresponding to the latter formation Umbr has persnimu persnihimu 'precamino, supplicato', and the relation of pl. habituto 'habento' and habitu 'habeto' suggested a plural persnihimumo 'pecantor, supplicanto'. On the 2nd pl arsmahamo caterahamo, see the last Remark. Osc. censamur 'censemino, censetor' shows the mid.-pass. -r added to the mid-pass. m-suffix As regards the relation of the Umbr-Osc suffix -mo- to Lat. -mino-, see II § 72 p 166.

II. SOME IMPERATIVE FORMS PECULIAR TO CERTAIN LANGUAGES

§ 968. Aryan.

(1) The 2nd sing. mid in pr Ar -sua. Skr. kṛ-švá Avest Gath. ker²-švā beside indic. 3rd pl. Skr. á-kr-ata from V qer'make'. Skr. īr-švá Avest. ar²-šva beside indic. Skr. īr-tē from Ver- 'set in motion' (§ 497 p 57). Skr. dhatsvá Avest. dasva for *datsva (I § 473. 2 p 349) beside indic. Skr. dá-dhā-ti from V dhē- 'place'. Skr. jáni-šva (from V gen- 'gignere') vási-šva (from u-es- 'clothe') like stani-hi (§ 960 p. 503). Skr. váha-sva Avest. vaza-vuha beside Skr váha-ti 'vehit', Gath. gūša-hvā beside gūša-itē 'hears', O Pers pati-paya-uvā 'take care' (I § 558 p. 415).

It can hardly be doubted that this middle form is an extension of the Imperative discussed in §§ 957 f. by means of the reflexive pronoun (III § 438 p. 370 ff.). -sva is the form which in Greek is the accusative, $f \not\in \mathcal{E}$.

(2) The 3rd sing and pl. mid. in -ām.¹) Skr. sing kz-nu-tām pl kz-nv-átām from kz-nō-ti 'makes', sing. dhattām pl dadh-atām from dá-dhā-ti 'places'. Skr. sing. bhára-tām pl bhára-ntām from bhára-ti 'fert', Avest sing. verezya-tam from verezye-iti 'works', pl jase-ntam (Skr. gácha-ntām) from jasa-iti 'goes', O.Pers sing. varnava-tām beside Avest. vere-nav-a-itē 'believes' (§ 649 p 185).

The ending of these forms is connected with that of the Skr. 3rd sing imper. mid. duh-ām vid-ām šay-ām and the 3rd pl. imper. mid duhr-ām, which again can hardly be treated apart from the form vidām which is contained in vidā cakāra (§ 896 p 445), thus we are drawn to see in them verbal nouns

^{1) -}ām is also seen in Avest ūcam should be proclaimed. Since in Skr -ām is found only with verbs whose 3rd sing indic. shows the ending -ē beside -tē, it is natural to assume (as my pupil Mr. E. Kleinhans has pointed out to me) that, say, duhām beside duhē is due to the analogy of duydhām beside duydhē duhrē would then have suggested the 3rd pl. duhrām (§ 1078.)

used with the imperative meaning. Then e. g. bháratam bhárantām may be a transformation of the injunctive bhárata bháranta, completed in proethnic Aryan, on the analogy of duhām etc. And, as we have seen already (§ 909 p. 458), the corresponding active forms bhárat-u bhárant-u are also based upon the Injunctive.

In Avestic - $t\bar{a}m$ passed over to the Optative, as $d-y\bar{a}-tam$ from $dh\bar{a}$ - 'to place' (Bartholomae, Ar. Forsch. II 63 ff.).

§ 969. Greek.

- (1) The 2^{nd} sing, act. of the s-aorist in $-\sigma o \nu$, as $\delta \epsilon \tilde{\iota} \xi o \nu$ from $\dot{\epsilon} \delta \epsilon \iota \xi \alpha$ 'I showed'. The Syracusan dialect has $-o \nu$ in the thematic aorist as well $\lambda \alpha \beta o \nu$ (not as Attie, $\lambda \alpha \beta \dot{\epsilon}$). Its origin is obscure
- (2) Among the possible explanations of the 2nd sing, mid of the s-aorist, as δείξαι λέξαι, two in particular deserve attention. (a) λέξαι ('lay thyself') may be the 2nd sing. mid. *λεκ-σ-σαι, connected with λέντο for *λεκ-σ-το (§ 820 p. 357), and its primary personal ending may be compared with Ved. 2nd sing. act. vé-si 'come here' and like forms (§ 910 Rem. p. 459 f.). λέξαι would be to the injunctive λέξο, i. e. *λεγ-σ-σο (also used for imperative), as Skr. prá-si 'fill thou' to the imper. injunct prā-s. But since in the speaker's throught λέξο was associated with the system λέκτο λέχθαι etc., λέξαι because of its α was supposed to go with the α-forms έλεξάμην έλέξατο etc. (b) The other possibility is that this imperative was a Present form, that e. g &oou (V sed- 'sedere') was the middle to the Skr. imper. sát-si 'place thyself, sit', and ouooξαι the 2nd sing. to Association of these with the s-aorist was easy Skr. mrš-té. when they were so completely isolated. Perhaps — there is nothing to prevent this either - forms of both kinds have been united to form our Aorist Imperative.

§ 970 (fermanic Unexplained forms: Goth. at-steigadau 'rαταβάτω', lάμεραdau 'ψυσάσθω', and hugandau 'γαμησάτωσαν'. The explanations offered for these may be seen collected by

verb. Thus a connexion with ancient personal pronouns is in fact possible for the followings endings. in the 1st sing. -m -mi, cp. Skr. mā Gr. uè (III § 434.2 p 365); in the 1st dual Ski-vas -va, cp. Skr. vām Goth vi-t Lith. vè-du (III § 436 l p. 367, § 457 p. 396); in the 3rd sing. -t -ti, cp. Skr. tá-m Gr. vô-v (III § 409 p. 327)

It is not necessary that given forms shall originally have had the meaning which they actually convey in any language Just as the Lat. -minī in sequeminī even in proethnic Italic was anything but a personal ending (see II § 71 p. 165), so many others which now do duty for personal endings may have had very different meanings originally. There is the highest probability in favour of what has been said in § 956 p. 496 f regarding certain imperative suffixes. And again, it is hardly

§ 972. The etymological connexion of Middle and Active ending is quite obscure. What, for instance, is the connexion between 3^{rd} sing. mid. Gr. $-\tau a\iota$ and 3^{rd} sing. act. $-\tau \iota$?

Remark. It is probable a prior; that the Active endings as a class are the oldest. For these characterise an action simply, without the secondary meanings which the Middle Forms convey over and above those of the Active. On this principle we may regard the *-medhaz or *-medhaz of the 1st plural as an extension of the act *-me. *-so *-to *-nto are doubtless extensions of the active *-s *-t *-nt, and if a particle i were added to these, the former would become *-saz *-taz *-ntaz or *-szz *-tzz *-ntaz, the latter *-si *-ti *-nto. But in the 2nd pl. the middle Skr. -dhri-dhvam are obviously to be kept quite apart from the active -tha -tu And who is to prove that *-saz *-taz did not become *-si *-ti by loss of accent, and *-so *-to become *-s *-t in the same way? This explanation is actually suggested by Begemann, Zur Bedeutung des schwachen Präteritums der german Sprachen, p 188, and Osthoff, Morph Unt. IV 282.

For the Passive Voice there were originally no special and characteristic endings in the Indo-Germanic languages. All so-called passive forms in the verb finite are either middle or active.

§ 973. Each person, both Active and Middle, had in the parent language at least two endings.

Sometimes there is no possibility of tracing any connexion between these different endings, as between -ti and -e in the 3^{rd} sing. active (Skr pres \acute{as} -ti and perf. \acute{as} -a). In particular there were a number of special endings in the Perfect Indicative, whose origin, it would appear, was quite distinct from that of the endings in the other tenses and moods.

But the rest are obviously variant forms of the same thing. This is true of -m and -m in the 1st sing. active, of -tai or -tai and -to in the 3rd sing. middle. The -i which distinguishes the active endings 1st sing. -m 2nd sing. -s 3rd sing. -t 3rd pl. -nt from -m -s -t -nt in the same persons, may, I suggest, be an affixt particle (perhaps implying present time). The same -i, forming a diphthong with a preceding -a-vowel, is seen in the middle endings 1st sing. -a or -a (Skr. perf. tutud-ē) and

 $-\bar{o}_k$ (Skr. conj kx- $n\acute{a}v$ - $\tilde{a}i$), 2^{nd} sing. $-sa_k$ or $-sa_k$, 3^{rd} sing. $-ta_k$ or -ta, 1st pl -medhaz or -medhaz, 3rd pl. -ntaz or -ntaz beside 1st sing. -2 (Skr pret. \acute{a} -dviš-i) and -0 (Skr. opt. $dvišiy-\acute{a}$), 2nd sing -so, 3rd sing. -to, 1st pl -medho (Skr. -mahi Gr. -μεθα), 3rd pl. -nto Other differences distinguish the endings of the 1st pl. act Skr. -mas (-masi) and -ma, the endings of the 2nd and 3rd dual act. Skr. -thas -tas and -tam -tam, and so forth.

8 974. Leaving aside the endings peculiar to the Indic. Perf. Act, the other personal endings are divided into Primary and Secondary, the 3rd sing. for instance has primary endings -ti active and -tag (-tag) middle, and secondary -t active and -to middle.

The Primary endings belong to the Indic. Pres. Active and Middle (Skr. dádā-ti dat-té), and include the szo-future (Skr dāsyá-tr -tē), and the Indic Perf. Middle (Skr. dad-é). But forms with a secondary ending (Injunctive) could also serve as indic. present, see § 909 p. 457.

The Secondary endings belong to the augmented Indic. Active and Middle (Skr á-dā-t á-dī-ta, á-dadā-t á-dat-ta etc.), to the series which has such wide and varied use, the Injunctive Active and Middle (Skr. dá-t di-tá etc.), and to the Optative Active and Middle (Skr. dadyā-t dadī-tá etc)

The Conjunctive varies, and takes both kinds.

Remark. Some light may be had from Irish syntax to explain why the Augment required secondary endings. The augment was an independent adverb (§ 477 pp. 24 f), and we find in Irish double forms, one for Conjunct and one for Absolute use, e. g. 3rd sing. do-beir for *-bere-t (secondary ending) and berid for *bere-ti (primary) Probably the Irish usage in some degree reflects that of proethnic times, and we should suppose that in the parent language, while bhére-tr would be used alone, such a form as *pro bhere-t would be used when the verb was coupled with a prefix. On this supposition, Skr prå bharati is due to the analogy of independent bharati, and vice versa Lat. véhis to that of the compounds, as ád-vehis. But this kind of variation cannot be assumed for all tenses and moods in the parent language (of course the perfect indicative active is always excepted) It certainly was not found in the optative, which in the existing languages always shows secondary personal endings And notwithstanding Skr 2nd sing. imper vé-ši and Gr. lėžai (§ 910 Rem p. 459 f), we must not venture to allow it for imperative expressions.

§ 975. Amongst the suffixes of persons, r has a place to itself. It is found sometimes alone as a personal ending (as Skr. 3^{rd} pl. $cakr-\acute{u}r$), sometimes in conjunction with others (as Skr. 3^{rd} pl. pres. duh-r- $at\bar{e}$ Lat. 3^{rd} pl. sequo-ntu-r). As Italic and Keltic have it in almost all persons, and as the forms which contain it must be treated together, a special chapter will be given to it after the other endings have been discussed (§§ 1076 ff.).

ACTIVE ENDINGS

1ST PERSON SINGULAR.

- § 976. Proethnic Indo-Germanic.
- (1) -mi, Primary Ending for Unthematic Stems. *és-mi 'I am'. Skr. ásmi Arm em Gr εἰμὶ Alban. jam (for *em *esmi, § 493 p. 52) Goth. im Lith. esmì O.C Sl. jesmī. Skr. dádā-mi Gr. δίδω-μι 'I give'. Skr. śṛ-nā-mi 'I break to pieces' Armenbaṛ-na-m 'I lift' Gr. δάμ-νη-μι 'I tame' O.Ir. glenim 'I remain hanging' (for *gli-na-mi) O.H.G. gi-nō-m 'I gape'. Most languages came indepently to use this ending with Thematic stems: Skr. bhárāmi Armen berem O.Ir. berim 'fero' O.H.G. wirðon 'I become' Serv nesem 'I bear'.
- (2) ²-ō, the Primary Ending for Thematic Stems. *bherō 'fero': Avest. Gath. ufyā 'I weave, extol' Gr. φέφω Lat. ferō O.Ir. as-biur 'effero, dico' Goth baîra Lith. vežù 'veho'. Future Avest. Gath. vax-šyā 'I will speak' Lith. dã-siu 'dabo'. Conjunctive *es-ō from indic. *es-mi · Avest. Gath. anhā Skr. bráv-ā 'dicam' Gr. šω ω Lat. (fut.) erō. -ō also in the Greek long-vowel Conjunctive, as φέφω (pl. φέφω-μεν φέφη-τε), and the Aryan -ā seems to be identical in the forms Skr. árcā (3rd sing. árc-ā-t) Avest. Gath. per sā (3rd sing. per s-ā-iti), see § 918 Rem. p. 466.
- (3) -m (after sonants) and -m (after consonants) Secondary Ending for any Stem. *bhéro-m: Skr. ά-bhara-m Gr. è-φερο-ν Lat. su-m O.C.Sl. nesŭ 'bore'. Conj. Lat. fera-m O.Ir. do-ber

- O.C.Sl. berą (§ 929 p. 474). Skr. ά-yā-m 'I went' Gr. ĕ-δοᾶ-ν 'I ran' Lat. era-m O Ir ba 'fui' Goth. i-ddja 'I went'. Opt. *s-(i)¿ē-m 'sim': Skr. syá-m Gr. εἴη-ν Lat. sie-m si-m. *ēs-m 'eram' (before sonants also *ēs-mm): Skr. ás-am Gr η-α s-Aorist Skr. ά-cāiš-am Gr ἔ-τεισ-α from ν qei- 'pay a penalty, etc.'. Opt. *bheroi-m: Skr. bhárēy-um
- (4) -a in the indic perf. "μομά-a 'I know'. Skr ιēd-u thr. οἶδ-a O.Ir. ro cechan 'cecini' (1oth. váit
- § 977. Aryan. (1) -m Skr. ás-m Avest. ah-m O.Pers. amīy. Skr dádhā-m 'I place' Avest. daāq-mi. Skr. kr-nō-m 'I make' Avest ker'-nao-mi.
- (2) The ending $-\bar{a} = 1 \text{dg} \bar{o}$ is regular in the Gatha dialect of Avestic for the indic. present, as spasyā conspicio, I watch' (Bartholomae, Kuhn's Zeitschr. xxix 271 ff.) Independently both Sanskrit and later Avestic adopted the re-formation with -mi (§ 976 1); as Skr. bhárāmi dāsyāmi late Avest. barāmi O.Pers dārayāmīy (Skr. dhāráyāmī). The reason for this innovation was that there were often parallel forms, one thematic and the other unthematic, as Skr. dá-dhā-ti and dá-dh-a-ti, Avest. da-āā-iti and da-p-a-iti, and it was a recommendation for -mi with the thematic stem that by this the number of syllables became the same in all persons of the singular. Another thing which may have had some influence is that in the 1st sing, mid indic press of both classes the same ending (-a) was used from the proethnic Aryan period.
- (3) The short-vowel (or thematic) conjugation and the long-vowel both show the endings -ā and -āni side by side, the former was proethnic Idg. (§ 976. 2 p 517): Skr. Ved. bravā Ved and class brávāni (3rd sing. bráv-a-t) Avest mravā mravāni (3rd sing Gath. mrav-a-itī) beside indic. Skr. bráv-ī-ti 'speaks' 1st pl. brū-más; Skr. Ved. vōcā (Gr. (f)sinn) Ved and class vōcāni (3rd sing. vōc-a-ti) beside indic. á-vōc-a-t (Gr. ś-(f)sins) from vac- 'to speak', Avest. per sā (3rd sing. per s-a-iti) beside indic az-a-iti 'asks', azāni beside indic az-a-iti 'agit'

The origin of -ni is obscure. Perhaps we should connect

it with the Ar. -na of Avest. 2nd sing. bara-nā and the ending of the 2nd pl. -than-a -ta-na (§ 600 p. 143, § 1010).1)

- (4) -m. Skr. á-bhara-m Avest. barem O.Pers. abaram. Skr. á-dadhā-m Avest. dada-m. Optative Skr. dadh-yá-m Avest. daiðya-m.
- (5) -m appears in Aryan regularly as -am, which we may consider the ante-sonant form (-nm). See I § 231 Rem. p. 196 -am seems to have been helped in beating *-a = Gr. -a out of the field by various causes. In Skr. á-han-am and other such by the existence of thematic and unthematic variants together (cp á-han-a-t § 498 p. 58); in ás-am ád-am by a wish to distinguish these from the perfect (ás-a ád-a); in the optative bhán ēy-am, by a wish to distinguish active and middle (bharēy-a). Skr á-brar-am Avest mraom i. e mrav-em I spoke', Skr ás-am () Peis ah-am 'cram'. Avest diāaem i. e. diāay-em beside di-dae-iti 'sees'. Skr. á-kšāi-š-am ((tr. ž-q-9+i0-a)) from kšar- 'to flow, pass away'. Optative Skr. bhárēy-am (not found in Iranian).
- (6) -a in the Perfect. Skr. véd-a Avest. Gath. vaed-ā 'I know': Gr olda. On Skr dadhāú see § 852 p. 402 f.
 - § 978 Armenian. Perfect -a not found.
- (1) -m = Idg. -mi. em 'l am' for *es-mi § 501 p 63. mnu-m 'l remain, wait for janu-m 'l take pains' § 581 p 122. ba-na-m 'l open' § 601 p 144 jer-nu-m 'l warm myself' § 642 p. 180.

This -m spread to the Thematic stems (§ 976.1), as berem 'fero'; e before the -m comes from the 2nd and 3rd singular (as in Serv. nesem, § 983), partly from the analogy of em. The same innovation is seen in the 3rd pl. beren, § 1019

(2) The history of Idg -m and -n is not clear The ending -m is believed to occur in e.g. etu 'I gave' edi 'I placed' beri 'I bore' Compare Bartholomae, Stud. Idg. Spr. 11 36 f.; Bugge, Kuhn's Zeitschr xxxII 75

d) What Mahlow suggests and Wiedemann approves (Lang Voc. 162, Lit. Prat. 160) does not convince me in the least.

- § 979. Greek.
- -μι εἶμι 'I go'. Skr. ἐ-mι ἄη-μι 'I blow': Skr. νά-mι
 Lesb. τίμα-μι 'I honour'. cp. Armen. jana-m O.H G. salbō-m
- (2) - ω . $\check{\alpha}\gamma\omega$. Lat. $ag\bar{o}$. Conjunctive $\imath l\delta\acute{\epsilon}\omega$ - $\tilde{\omega}$ 'sciam' Lat. $\imath \bar{\imath} der\bar{o}$. Conj. $\varphi\acute{\epsilon}\varrho\omega$ 'feram': cp. Skr. Ved. $\acute{\alpha}rc\bar{a}$. In Homer the Conjunctive is extended by - $\mu\iota$, a re-formation $\imath \tau \bar{\epsilon} \ell r\omega$ - $\mu\iota$ with indic. $\check{\epsilon} \pi \bar{\epsilon} r\alpha$, $\check{\epsilon} \vartheta \acute{\epsilon} \lambda\omega$ - $\mu\iota$ indic. $\check{\epsilon} \vartheta \acute{\epsilon} \lambda\omega$, cp $\check{\epsilon} \vartheta \acute{\epsilon} \lambda_{\ell}\sigma\vartheta \omega$ § 987 and $\check{\epsilon} \vartheta \acute{\epsilon} \lambda_{\ell}\sigma$. § 995.
- (3) $-\nu$ for -m. $\tilde{\eta}\gamma_0-\nu$ Skr. dja-m. $\hat{\epsilon}-\tau i\partial \eta-\nu$ Skr. a-dadha-m. Optative $\partial \epsilon i\eta-\nu$ $\tau i\partial \epsilon i\eta-\nu$. Skr. $dadh-y\dot{a}-m$.
- -a for -m. Aorist $\tilde{\epsilon}$ - $\chi \epsilon(F)$ -a 'I poured', $\tilde{\epsilon}$ - $\delta \iota \xi$ -a 'I showed'. The opt form ${}^{*}\varphi \epsilon \varrho o(\underline{\iota})$ -a which Skr. bhárēya-m leads as to expect, is lacking. In its stead we find $\varphi \epsilon \varrho o\iota -\mu\iota$, which is undoubtedly a re-formation (-oi $\mu\iota$. -oi ϵ like $\tau i \vartheta \eta \iota \iota$. $\tau i \vartheta \eta \epsilon$), and one or two cases in Attic of $\varphi \epsilon \varrho o\iota \iota$, which stands to Skr. bhárāya-m as ϵ - $\varphi \bar{\nu}$ - ν to \acute{a} -bhūv-am.
- (4) $-\alpha = \text{Idg.} \alpha$ in the Perfect. $\delta \not\in \delta o \rho x \alpha$ 'I have seen': Skr. $dad\acute{a}r\dot{s} \alpha$.
 - § 980. Italic -mi and -a (Perfect) are not found.
- (1) $-\bar{o}$. Lat $ag\bar{o}$. Gr. $\tilde{a}\gamma\omega$; Umbr. sestu 'sisto'. Lat. plantō for $-\bar{a}$ -(2) \bar{o} , Umbr. subocauu sobocau 'adoro' (-uu and $-u = -\bar{o}$) 1). Conj. (fut.) Lat. $er-\bar{o}$ Avest. Gath. $anh-\bar{a}$; cp. § 918 Rem p. 466.
- (2) -m. Lat. ()sc. s-u-m § 528 p. 91; add Osc. manafum, if it means 'mandavi', see § 874 p 423. Lat. amā-bam () Ir. ba. Conj. Lat. ag-a-m. Opt. Lat s-ie-m sim. -m seems to be lost.
 - § 981. Keltic.
- (1) -m aus -mi. O.Ir. cre-nim 'I buy' Mod.Cymr. pry-na-f for *-na-mi § 604 p. 145. scaraim 'I separate, separate myself for *scarā-mi, caraim 'I love' for *carā-mi § 584 p. 125.

¹⁾ As the Umbr. inf. steplo(m) 'stipulari' etc. shows the group \$\tilde{a}\$ contracted in unaccented syllables (\(\) 1094. 7), it apparently follows that subocau is a new form instead of *suboco by analogy of stake 'sto' and the like.

Forms like *löcim* (beside -*löciu*) and *berim* (beside -*h.ur*) are re-formed on the model of the verbs in -*mi* above mentioned. Compare § 976. 1.

Why is -m constantly doubled in Irish, thus shewing that the nasal was not spirant (mh) as in Cymric? This is no effect of the analogy of the Irish representative of Idg. *es-mi I am' (with mm for sm): because am (never written amm) has no claim to be considered such (see § 506 p. 72). "Can it be true after all that Irish -ām- when following the accent became -amm-?' (Thurnevsen)

- (2) Idg. -ō. hiu 'I am' Lat fīō. no quidiu 'I beg'. -biur 'I bear'. Lat. ferō. no charub 'I will love'. cp Lat. amā--bō. See I § 90 p 85
- (3) Idg. -m. ha 'fui' for *hhy-ā-m. Lat. amā-bam (§ 584 p. 125). Conj. -ber 'feram' for *hherā-m; the absolute form bera is analogical, and no ground-form can be inferred for it.

Idg. -w seems to be quite lost

(4) Idg. -a in the Perfect 10 restach 'I struck down' for *se-slag-a: cp. Goth. sloh

§ 982. Germanic

(1) Idg. -mi is common in West Germanic Goth. im O.H.G. b-im b-in 'I am' for *es-mi (§ 507 p. 73) O.H.G. sestō-m 'sisto, I arrange' (§ 545 p. 103), salbō-m 'I anoint' (§ 585 p. 126), habē-m 'I have (§ 592 p. 133), stā-m 'I stand' (§ 708 p. 240), ginō-m gei-nō-m I gape' (§ 605 p. 146).

Goth. salbō doubtless has not the secondary Idg. -m, but gets its ending from salbō-m -nd by analogy of baira: baira-m -nd. On Goth. haba see § 708 p. 238 f.

(2) Idg. -5. Goth. baira O.H.G. bru 'fero' O.Icel. heito-ml 'I call myself', Goth. nasja O.H.G. neriu nerru 'I save', on forms like O.H.G. hilfu see I § 661.2 p. 517. In High German dialects, especially Rhine Frankish, the -n of verbs in -mi has been spreading to the thematic class since the 11th century; e. g. wirdon gihun instead of wirdo gihu, and so too O.Low Fr. wirthon (cp. § 976.1).

- (3) Idg. -m. Goth. i-dd/a 'I went': Skr. \acute{a} -yām; Goth. nasida () H.G. nerita 'I rescued' Norse Run. tawido 'I made'. No trace is left of *-un = - η , it must have been once used in the opt. (60th baíran, the origin of this form (O Icel. bera) is very uncertain, see § 928 p. 474.
- (4) Idg. -a in the Perfect. Goth. váit ().H G. weiz 'I know': Skr. véd-a Gr ολδ-a.
 - § 983. Balto-Slavonic -a (Perfect) is wanting.
- (1) -mi. Lath. es-mi () ('.Sl. jes-mi 'I am'. on Lath. es-mi bee § 510 p. 75. () C Sl ima-mi 'I have' (§ 586 p. 127), reformation with -mi, bi-mi etc., see § 727 p. 257.

It is true the Lath reflexive ending -me-si (důmė-si, velme-s § 511 p. 76) contains the middle ending -mè = Gr. -ua¹ (cp. Piuss. asmai),¹) and by I § 664.3 p. 523 it follows that -mė becomes -mì Still it does not follow that -mi must always come from -me, active and middle endings must have existed side by side, and only in the si-reflexive was -me made regular on the strength of 1st sing. -û'-s:-ù, 1st pl. -me-s -me. Compare § 991 on důsi důse-s

In Servian -m(i) runs through all conjugations. first, beginning with the 13th century, -a-m, as čuva-m 'I protect' (cp. O.C.Sl. ima-mi), then -i-m, as hvali-m 'I protect' (cp. O.C.Sl. bi-mi), lastly -e-m, as nese-m 'I bear', which should be compared with Armen. bere-m (§ 978 p. 519), only mogu 'I can' and hoću 'I wish' kept fast to the old ending. The same is true of Slovenian.

- (2) Idg. -ō only in Baltic; Lith. suků 'I turn' suků-s(1) 'I turn myself' (I § 664.3 p. 523), dů'siu 'dabo'. On the spread of -u to stems in orig. -ā and ē, as Undau, see § 586 p. 127, § 593 p. 133 f., § 991.1.
- (3) Idg -m only in Slavonic. O.C.Sl. vezŭ 'I transported' for -o-m: Skr. váha-m, da-ch-ŭ 'I gave' (§ 833 p. 370). Con-

¹⁾ No help can be got from O.C.Sl. -mi instead of -mi, which some might be inclined to negard as another instance of middle conding. Miklosich cites it as a very rare variant (Vergl. Gr. 1112 63).

junctive oczą = Lat. veha-m as indic. pres., see § 929 p. 474. Idg. -m is quite gone.

2'D PERSON SINGULAR.

- § 984. Proethnic Indo-Germanic. On the imperative -dhi, and imperatives without any personal ending like Skr. bhára, which we here disregard, see §§ 957 ff. pp. 497 ff.
- (1) -si, Primary ending. *ei-si `is': Skr. é-și Gr. si for *si-(\si)i. Skr. hhára-si O Ir. beri for *bere-(s)i Goth. bairi-s 'fers'. Conj. Skr. bhár-ā-si. () Ii cari 'amas' for *carā-(s)i. Goth. salbō-s 'thou anomte-t'.

From 1 es- 'esse' two forms 1. 'est.' Skr úsi (ir. el for *è(o). Alban jë for *e(st) (ii. Meyer, M. Hertz zum 70. Geburtstag, 1888, pp. 86 f) 2 *es-st Armen. es Gr. Hom. èo-où: On the relation of the two Idg forms, see III § 356 Rem. p. 258. On (foth is see § 990 1 on Lith est O.C.Sl. jest, § 991.

- (2) -s, Secondary ending *e-stū-s from 1/stū- 'stare': Skr. ά-sthū-s (fr. ε-στη-ς: Skr ά-yū-s (foth, i-ddjē-s 'wentest'. *bhére-s: Skr. ά-bhara-s (fr. φέφε-ς έ-φεφε-ς Lat. αψ-ι-s O.Ir. do-bir O.C.Sl. ιετε, Goth õg-s 'fear thou'. Opt. *bheroi-s: Skr. bhárē-s (fr. φεφω-ς (foth bairái-s Pruss. ımai-s 'take thou' O.C.Sl. beri; *s-(i)jē-s Skr syá-s Gr. είη-c Lat. siē-s sī-s Goth. ιitei-s 'scias'
- (3) -tha in the ind perf. Skr. ift-tha Gr. ologa 'knowest', O.H.G. gi-tars-t 'darest'

§ 985. Aryan

(1) -si. Skr. váh-ši Avest vaši beside 3rd sing. Skr. váš-ți Avest. vaš-ti 'desires'. Skr. dádhā-si 'placest', Avest dađa-hi. Skr. bhára-si Avest. bara-hi. Conj. Skr. bhárā-si, Avest. barā-hi (also barāi with h dropt) O.Pers. vamā-hy 'videas'. Imperative Skr. sát-si 'place thyself, sit' see § 910 Rem. p 459 f.

Skr. ást Avest ahi (10th. ahy 'thou art', see § 984.1.

(2) -s Skr. dhā-s á-dhā-s Avest. dā from V dhē- 'to place', Skr. ákar for *a-kar-š 'madest', Avest. var'š 'didst work' ground-form *verk-s, sas didst say' ground-form *kens-s (§ 493

- p. 52). Skr. á-dadhā-s Avest dadā. s-Aorist Skr. ájānš for *á-jāiš-š, áchān for *a-chānt-s-s see § 816 p. 354. Skr. bhára-s á-bhara-s Avest. barō O.Pers. gaudaya 'dıdst hıde' (I § 558.4 p. 415). Conj Skr ás-a-s Avest. anh-ō, Skr. bhár-ā-s Avest. barōi-š, Skr. dadhyá-s Avest. daiþyå
- (3) -tha in the Perfect. Skr véttha Avest Gath. võistä (I § 475 p. 351), Skr. dadhá-tha Avest. Gath. dadā-pā.
- § 986. Armenian es 'art': Gr. èo-où. Hence beres 'fers', like berem following em (§ 978 p. 519).

Remark. The ending -, found in many tenses and moods Bugge thinks he can explain as -s + particle *ra = Gr. $\dot{\theta}\dot{\alpha}$, e. g aor. ar-ar-er (pres. ar-ne-m 'I make') = Gr $\ddot{\eta}_{\theta}$ -a $_{\theta}$ - $\dot{\theta}$ - $\dot{\theta}$ - $\dot{\theta}$ (Beitr. zur etym. Erläut der arm Spr., Christiania 1889 pp 44 ff.). This particle he sees in the ending of the 3rd sing imperf., as beier alair toloii. However, it is not found elsewhere in Armenian

§ 987. Greek

(1) -si. Only left in Hom. and Syrac. $\dot{\epsilon}\sigma$ - $\sigma \dot{\epsilon}$ 'thou art', with a variant $\dot{\epsilon}$ for $\dot{\epsilon}\dot{\epsilon}(\sigma)\iota$, and in $\dot{\epsilon}$ 'wilt go' for $\dot{\epsilon}\dot{\epsilon}(\sigma)\iota$. When the secondary ending -s was added to these forms on the analogy of $\phi\dot{\eta}$ - $\dot{\epsilon}$ 'sayest' and the like, arose the Hom and Herod. $\dot{\epsilon}\dot{l}$ -s or $\dot{\epsilon}\dot{\iota}$ -s 'thou art' and Hesiod's $\dot{\epsilon}\dot{l}$ -s 'thou wilt go', in the same way was produced 2^{nd} sing. $\dot{\epsilon}\lambda\vartheta$ $\dot{\epsilon}\tau\dot{\eta}$ -s, § 966 p. $\dot{\tau}$ 07.

φέρεις 'fers' either for *φερε(σ)ι = Skr. bhárα-sι with secondary -ς added (see the Author's Gr. Gr.² p. 145, and Fay in the Amer. Journ. Phil. xi 219 f.); or for ldg. *bherēι-s (by I § 611 p. 461), a form like Skr. άj-āi-š (see footnote to page 61). The latter view, on which φέρεις is really injunctive, is to my mind likelier, because it explains at the same time the 3rd sing. φέρει in the simplest way (§ 995). The conjunctive φέρης sprang up by the side of φέρεις because of the existence of φέρητε beside φέρετε.

(2) -s $\tilde{\epsilon}$ - $\beta\lambda\eta$ - ς : Skr. \acute{a} - $gl\bar{a}$ -s (§ 587 p. 127). $\acute{\epsilon}$ - $\tau i\vartheta\eta$ - ς . Skr. \acute{a} - $dadh\bar{a}$ -s. $\mathring{\eta}\gamma\varepsilon$ - ς . Skr. \acute{a} -ja-s. Opt. $\mathring{\eta}\varepsilon\dot{\varphi}$ 00- ς $\mathring{\epsilon}\mathring{\iota}\eta$ - ς . Observe the injunctive forms with indicative present use, Dor. Cypl. $\mathring{\varphi}\varepsilon\dot{\varphi}\varepsilon$ - ς Att. $\mathring{\varphi}\mathring{\eta}$ - ς $\tau i\vartheta\eta$ - ς Lesb. $\mathring{\varphi}i\lambda\eta$ - ς etc., § 909 p. 457.

- (3) -tha in the Perfect. Only two original forms are left:
 ολοθα: Skr. véttha 'knowest' and ησ-θα from èg- 'to be'. The latter, which was afterwards used as imperfect (§ 858 p. 407), was the origin of many analogical forms, for instance έφησθα μέσθα τίθησθα conj. έθέλησθα opt. βάλοισθα εἴησθα. ολοθα-ς ησθα-ς are of very doubtful authority before the Alexandrian age; ολοθα-ς occurs in Herodas II 55. In the indic. perf. -α-ς was usual instead of -θα, e. g. τέτροφ-α-ς, also ολοας beside ολοθα; this ending came from the aorist, and was recommended by the ease with which it could be added to consonant stems (§ 844 p. 386).
 - § 988. Italic.
- (1) -si cannot be traced. But since in the 3rd sing. *-ti seems very early to have become -t (§ 996), nothing prevents our deriving Lat. es 'art' and es 'eatest' from *essi and *etsi.
- (2) -s. Lat. $v\bar{\imath}$ -s (§ 505 p 69), vel for *vel-s (loc. cit.); but in fer-s the -s is due to analogy $n\bar{a}$ -s $n\bar{e}$ -s plantā-s $vid\bar{e}$ -s, $am\bar{a}$ -bās. $ag\iota$ -s farcī-s, Umbr. heris heri heri 'vis, vel' (p. 68 footnote, and § 715 p 248). Conjunctive Lat. er-i-s $v\bar{\iota}$ der-i-s, ag-ā-s ag-ē-s Optative Lat. $s\iota\bar{e}$ -s $s\bar{\iota}$ -s, Umbr. sir si sei 'sis'.
- (3) Idg. -thu in the Perfect Lat. $v\bar{\iota}dis$ -ti (inser. also -tei) got its - $\bar{\iota}$ either from the 1st sing with the middle suffix - $\bar{\iota}$; or else the middle ending existed in Italic in the 2nd person too (*-s $\bar{\imath}$ for pr. Lat *-sa_{\beta}) and -t $\bar{\iota}$ got its - $\bar{\imath}$ from this, in the same way as - $\bar{\imath}i$ in O C Sl bere $\bar{\imath}i$ is a mixture of active Idg. *-sa_{\beta} and middle Idg *-sa_{\beta} or *-sa_{\beta} (\xi 991).
- § 989. Keltic -tha (Perfect) is lost The ending of cechan cecinisti is obscure.
 - (1) -si. O.Ir. beri 'fers' for 'bere-si (I § 576 p. 431).
- (2) -s. Injunct. comer 'get up' for *com-ecs-rec-s-s (§ 826
 p. 363) -bir 'fers' for *bere-s (I § 576 p 431, § 657. 5 p. 508).

In the a-conjunctive, berne bere and do-berne -e for a supposed berasi, remember that even in the indicative the primary -i kept on intruding more and more into the conjunct flexion: only a few verbs, as -bir, kept clear of it.

§ 990 Germanic.

(1) -si. ().Icel. ber-r = pr. Germ. *biri-zi, O.H.G. burns = pr Germ *bn i-si, similarly O Icel. tem-r 'tamest' kalla-i 'callest' pr. Germ. *-zı, O.H.G. zemi-s salbō-s pr. Germ *-sı Whether Goth. bairs-s gatamji-s salbo-s have *-zi or *-si cannot be made out, as both pr. Goth. -2(i) and -s(i) must needs become -s (I § 660 5 p 516). The breathed -s in West Germanic is thus explained. — in O.H.G. tuo-s qū-s, in O.H.G. and A.S bis (ground-form *bhu-i-si, with a dropt on the analogy of forms like tuos biris, cp. I § 661 pp. 516 ff.), and in the present of Class II B (§ 532 p. 93), the vowel before s had the word-accent Still the breathed s would probably not have become general even so, but that the pronoun "bu 'thou' so often adhered to the verb form, as in O.II.G. biristu, see I § 661 Rem. p. 519 Compare pr. Germ. -bi and -di in the 3rd singular, § 998.

Whether Goth. is 'thou art' be Idg. *esi or *essi is not clear (§ 984 1).

(2) -s. Goth pr Norse -z, pr.W.Germ. -z and -s. Goth. gatumidēs O.Icel. tamāer O H.G. zemitos A.S. temedes. O.II.G zigi pret. 'thou didst accuse': Skr á-diṣ-a-s § 893 p 441, m curi 'noli' § 909 p. 458. Goth. conj. ōg-s ('fear thou') § 917 p. 465. Opt. Goth bairái-s O.H.G. berē-s A.S. bere; O.H.G. sī-s 'mightst be', Goth bitei-s O.H.G. bizzī-s A.S. bite 'mightst bite', see § 893 p. 441. The constant use of affixt *pā 'thou' partly caused the secondary ending to be kept in West Germanic

The O.II.G. compounds biris-tu tuos-tu (see under 1.) zemitōs-tu sīs-tu bizzīs-tu were misunderstood, and in the 9th century people began to regard them as birist + du (thu) and so forth. This was due to kanst beside kanstu Some part of this mistake is due to bist, which got its t earlier from the preterite-presents. In the same way we explain A.S. birest beside bires, and the like.

(3) Idg -tha in the Perfect. Goth. las-t 'thou didst pick' (pres. lisa) slōh-t 'didst strike' (pres. slaha) O.H.G. gi-tarst

'darest' (1st sing. gi-tar). By their analogy Goth. váist ().11.G. weist 'knowest' (1st sing. váit weiz), Goth. qast 'didst say' (pres. qipa) with st instead of regular ss. Further, Goth. bar-t 'didst bear' skal-t AS. scealt 'shalt' instead of *bar-p etc. See I § 553 p. 406. The sole example of pr. Germ. -pa = -tha is A.S. pres. ear-ā ar-ā 'art', which must therefore be a transformate of pres. mid. *ar-pēs = Skr. īr-thās (§ 509 p. 75).

In West-Germanic and Norse -t spread from the preterite present to the Present. O.H.G. bis-t O.Icel. es-t 'thou art', wil-t 'wilt, wishest'.

In West-Germanic, the Perfect as an historic tense exchanged the form with -tha for that of the thematic aorist, as O.H.G. $zigi = Skr. \ \emph{a-dis-a-s}$, whence followed intermixture with the optative perfect, see § 893 pp. 441 f.

- § 991. Balto-Slavonic. -tha (Perfect) is wanting
- (1) Idg. -si. Lith ei-sì 'goest', düsi 'givest' for *dü-t-si.
 Whether Lith. esì is to be compared with Skr. dsi or (tr ἐσ-σὶ (§ 984 p. 523) is still uncertain

Starting from esì, -ì spread to the other verbs. dử dinstead of dŵsi beside dử (d)-mi dử d-u, degì beside degmì degù, sukì beside sukù, vertì for "vertù beside vercziù, fut dử si for "deside dử-siu. Further, "lìndō-i, which became lìndai, beside 3rd sing. lìndo which drew after it the 1st sing. lìndou = "lindō-u; this adoption of ì and ù by d-stems took place first in the present, whence it passed to the preterite d-stems because both had the same ending in the 3rd sing. and in the plural and dual (e. g. bùvo 'he was' like lìndo); from the d-preterite, -ì and -ù then proceeded to the preterite with ē See § 586 p. 127, § 593 p. 133, § 983.2 p. 522 Another thing may have aided the change of dŵsi to dử di; — dŵsi was also the 2nd sing. future, 1) and thus also the present *lìndo-si (cp. O.C.Sl. ima-ši) may have been exchanged for *lìndō-i, because the former agreed with the 2nd sing. future

¹⁾ els, 'is' and eis, 'ibis' are distinguisht by accent.

The Reflexive in Lithuanian has always the middle endings -sē-e, as dese-s (1st sing. dè(d)-mi § 546 pp. 103 f.), suké-s verté-s (for *vertie-s, cp te-verté § 954 p. 494): similarly the old books have essie-gu i. e. esé-gu (-gu is a particle). In the same way we have Pruss. assai assei essei 'thou art' seggē-sai 'thou doest' Still, although -é had to become -è anyhow by rule, we must not assume that all instances of -è in the 2nd singular come from -é. The truth is no doubt that both active and middle endings were in use together, and it was only in the si-reflexive, as we saw was the case with the 1st sing.'-mi, that the middle ending became the rule; cp. § 983.1 p. 522.

Proethnic Slavonic had -sī = Idg. -si, e. g. in *bere-sī 'fers': Little Russian, Mod.Sloven., Serv., and Czech beres. Along with this it had the middle -sī = Idg. -saī -saī in verbs with -mi: O C.Sl. jesi 'art' jasi 'eatest' dasi 'givest', Little-Russ. jesy jisy dasy Mod.Slov. si 'art', Serv. jesi 'art', Czech jsi 'art'. By contamination of -sī and -sī, O C.Sl. bere-sī ima-sī etc.

(2) Idg. -s can no longer be traced in Lithuanian, but in Old Prussian it can, — opt. *imai-s* 'take thou'. O.C.Sl. aor. veze: Skr váha-s, opt vezi Skr. váhē-š. As regards da 'gavest' for *dō-s-s see p. 830 p. 367, where also the origin of the 2nd sing dastă instead of da is treated.

3RD PERSON SINGULAR.

§ 992. Proethnic Indo-Germanic.

(1) -ti Primary ending. *es-ti 'est': Skr. ás-ti 'Gr. εσ-τι Lat. es-t O Ir is Goth. is-t Lith. ēs-ti ēs-t O.C.Sl. (Russ) jes-tī. Skr dádā-ti 'Gr. Dor. δίδω-τι Lith. dử/s-t(i) O.C.Sl. (Russ) das-tǐ 'dat' Skr. vá-ti Gr ἄη-σι 'blows' Lat. ne-t planta-t O Ir. carid 'loves' Goth. salbō-ħ 'anoints' O.C.Sl. (Russ.) ima-tĩ 'hat'. Skr. šṛ-ṇā-ti 'breaks to pieces', Armen bar-nu-y 'lifts', Gr. δάμ-νη-σι 'tames', O.Ir. lenid 'catches hold' (for *li-na-ti) () H.G. gi-no-t 'gapes'. *bhere-ti 'fert'. Skr bhára-ti Armen. berē Lat. agi-t O.Ir beri-d Goth. bairi-ħ O.C.Sl. (Russ.) bere-tī. Conj. Skr. ás-a-ti 'sit' Lat. (fut.) er-i-t.

*ē-gem-t 'he went': Skr. á-gan Arm. e-kn; *ε-dhē-t 'he placed': Skr. á-dhā-t Armen. e-d. Skr. á-dadhā-t Gr. è-τ/θη 'he placed'. Skr. ά-yā-t Goth. i-ddja 'he went'. s-Aor. Skr. á-jāi-š 'he conquered' for *-š-t, O.Ir. for-tē 'he must help' for *steigh+s+t, O.C.Sl. da 'gave for *dō-s-t. *bhére-t: Skr. bhára-t á-bhara-t, Gr. φέφε ἔ-φεφε, Osc. kúmbened 'convēnit', O.Ir. pres. -beir O C.Sl. veze 'vexit' Conj. of s-Aor Skr. jē-ṣ-a-t O.Ir. tēs tēis; long-vowel Conj. Skr bhár-ā-t, Arcad.-Cypr. φέφ-η, Osc. deivā-i-d 'uirct' heriia-d 'velit', O.Ir. do-bera Opt. Skr. s-yā-t Gr. sǐη O.Lat. sied O.H.G sī wizzi; Skr. bhárē-t Gr φέφοι Goth baírái Lith. te-sukē 'turn' O.C.Sl. beri.

A combination of -t with the particle u produced the personal ending -tu Skr ás-tu 'esto' OCSI (Bulg.) jestŭ 'est', Skr bhára-tu 'ferto' OCSI (Bulg.) beretŭ 'fert' (§ 909 p. 458). Cp. -ntu in the 3rd pl., § 1017

(3) -e in the Perfect Skr νέd-a Gr. οίδ-ε Goth. váit 'he knows'. Skr. μα-ημάn-α 'he struck, killed' O.C Sl. ro ge-guin 'vulneravit, trucidavit'

§ 993. Aryan

- (1) -ti. Skr ás-ti Avest asti O Pers. astiy. Skr dádhā-ti Avest. dadā-iti Skr bhára-ti Avest. bara-iti, O.Pers. tarsa-tiy he foars'

Skr. á-tṛnat = *a-tṛnat-t beside pres. tṛnat-tī from tard- 'to pierce', Avest. cinas beside pres. cinas-tī 'teaches' (§ 626 p. 162). s-Aor. Skr. á-jāiš 'he conquered' = *a-jāiš-t, ábhār 'he brought' = *a-bhār-š-t. Skr. á-bhara-t Avest bara-þ O.Pers abara. Opt Skr. han-yā-t Avest janyāþ Ö.Pers. janyā, Skr bhárē-t Avest. barō-þ.

For the laws which apply where a word ends in two or more consonants, see I §§ 647 ff. pp. 491 ff When combined with -u (§§ 992 2) the -t is always kept, cp. Skr. ás-t-u

Avest. as-t-u with Skr. $\acute{a}s$ Avest $\ddot{a}s$, Skr. $g\acute{a}n$ -tu Avest. Gath jan- $t\bar{u}$ with Skr. \acute{a} -gan, Skr. $p_{\bar{i}}n\acute{a}k$ -tu with \acute{u} - $p_{\bar{i}}nak$, i- \check{s} -Aor. avi \check{s} -tu (§ 839 p. 376).

(3) -a = Idg. -e in the Perfect. Skr. ás-a Avest. ånh-u from \sqrt{es} - 'to be'. On Skr. pa- $pr\tilde{a}$ pa- $pr\tilde{a}$ Avest. da-da see § 852 p. 402 f.

§ 994. Armenian. -e (Perfect) is wanting

- (1) The t of -ti becomes 1 after vowels (Hubschmann, Arm. St. 1 74, above I § 360 p. 276).\(^1\)) ber\(\bar{e}\) 'fert' for *bfre-\(\bar{e}\) *bere-ti, barna-y 'lifts' for *barna-ti, alay 'grinds' for *ala-ti, xausi 'loquitur' for *xausi-2 -ti.
- (2) e-d 'he placed' Skr. á-dhā-t. e-kn 'he came': Skr. á-gan, Idg. *e-gem-t.

The -r of the 3^{rd} sing. imperf., as $ber\bar{e}r$, is obscure; see § 986 Rem. p. 524.

§ 995. Greek.

- (1) -ti. $\xi \sigma$ - τi , $\alpha \eta$ - σi , Dor. $\delta i \delta \omega$ - τi Att. $\delta i \delta \omega$ - σi .
- (2) -t dropt off (I § 652.5 p. 498). Dor. Arcad.-Cypr $\tilde{\eta}_S$ 'erat'. $\hat{\epsilon}$ - $\tau i \vartheta \eta$ Injunctive $\tau i \vartheta \eta$ serves as indic. present in Lesbian, cp. $2^{\rm nd}$ sing Att. $\tau i \vartheta \eta$ - ς . $\hat{\epsilon}$ - $\varphi s \varrho \varepsilon$. Optative $\epsilon i \eta$, $\varphi \acute{\epsilon} \varrho \sigma$. Conjunctive Arcad.-Cypr. and other dialects $\varphi \acute{\epsilon} \varrho \eta$, like Skr. $bh\acute{a}r \ddot{a}$ -t.

The explanation of $\varphi \acute{\epsilon} \varrho \epsilon_i$, which cannot be derived from ${}^*\varphi \acute{\epsilon} \varrho \epsilon_i - \tau_i$, depends on that of the 2^{nd} sing. $\varphi \acute{\epsilon} \varrho \epsilon_i c$. If $\varphi \acute{\epsilon} \varrho \epsilon_i c = {}^*\varphi \epsilon_i \varrho \epsilon_i c (\sigma)i + c$, $\varphi \acute{\epsilon} \varrho \epsilon_i$ has been coined as complementary on the model of $\varphi \acute{\epsilon} \varrho \epsilon_i c$. $\varphi \acute{\epsilon} \varrho \epsilon_i c$: $\acute{\epsilon} \varphi \epsilon_i e c$. But if $\varphi \acute{\epsilon} \varrho \epsilon_i c$: is a form like Skr. $\acute{\epsilon} \jmath \bar{\epsilon} a_i - \dot{\epsilon} j$, which I have preferred as more probable, $\varphi \acute{\epsilon} \varrho \epsilon_i$ must go parallel to Skr. $\acute{\epsilon} \jmath \dot{\epsilon} a_i a_i - \dot{\epsilon} i$ he broke to bits', then $\jmath \dot{\epsilon} b e r \bar{\epsilon} j - \dot{\epsilon} i$ was the ground-form. In any case it follows that $\jmath \dot{\epsilon} \varrho \epsilon_i c$ had the secondary ending. Conj. $\jmath \dot{\epsilon} \varrho \gamma_i$ is an ad-formate of $\jmath \dot{\epsilon} \varrho \epsilon_i c$, as $\jmath \dot{\epsilon} \varrho \gamma_i c$ of $\jmath \dot{\epsilon} \varrho \epsilon_i c$. Compare § 987.1 p. 524. In Epic dialect $\jmath c_i$ spreads from the unthematic indicative to the

¹⁾ Not so Bartholomae (Stud Idg. Spr. 11 27 f.), who holds that t just simply disappears between vowels.

last named conjunctive form, e. g. ἐθέλησι instead of ἐθέλη, . cp. ἐθέλω-μι § 979.2 p. 520, ἐθέλησθα § 987.3 p. 525.

(3) -e in the Perfect. οἶδ-ε, γέ-γον-ε.

§ 996. Italic. e (Perfect) is wanting.

The endings -ti and -t are nowhere left unchanged. It is assumed that in all Italic dialects they became -t and -d. these remain in Oscan; in Umbrian -t remains (but the spelling varies, and we sometimes find -t and sometimes nothing, just as happens with other final consonants), while -d is dropt; in Latin, -t became the only ending, although instances of -d are found in old inscriptions. But an explanation has yet to be found why the -i of -ti (as of -nti in the 3^{rd} plural) has disappeared without leaving a single trace. Compare I \S 655. 7 p. 504.

- (1) -t representing Idg. -ti Lat. es-t Umbr. est Osc. est ist. Lat. agi-t ama-t. Umbr. tisit 'decet' trebei-t 'versatur' habe habe 'habet'; Osc faama-t 'habitat' stai-t 'stat', Marruc. fere-t 'iert', Vestin. dide-t 'dat'.
- (2) -d representing Idg. -t Thematic Preterite (§ 867 p. 414 f.): Lat. inser vhevhake-d 'feeit' fece-d; Umbr. řeře Osc. dede-d 'dedit' Osc. kúm-bene-d 'convēnit' aamanaffe-d 'mandavit' (§ 874 p 422) Optat.. Lat inser. sie-d; Umbr. si si -sei 'sit', Osc. da-di-d 'dedat' Marrue -si 'sit'. Long-vowel Conj. (ep. Skr. bhárā-t, O.Ir. -air-ema § 997 2). Umbr fasia 'faciat' kuraia 'curet' Osc. heriia-d 'velit', Umbr heriiei 'velit' Osc. deivai-d 'iuret' Osc. fusí-d 'foret'; Osc. tadait like Skr. bhárā-ti, and Lat. mitat in the Duenos inser, beside sied feced (unless we should read with Conway, Amer. Journ. Phil. x 452, mitu(n)t).

In Latin -t early becomes the sole ending, fui-t $am\bar{a}$ -bat sie-t si-t, like -nt in the 3^{rd} pl. Something may be ascribed to sentence-position, which would sometimes cause a change of -d to -t (e. g fuit tum for fuid tum).

§ 997. Keltic.

⁽¹⁾ Idg. -ti, whose vowel disappeared by I § 657.1

- p. 506 f O Ir. 18 '18' for *es-ti (I § 516 p. 377) berid 'fert' for *bere-ti carall 'amat' O Bret crihot 'vibrat' for -ā-ti
- (2) Idg -t dropt (1 § 657 9 p 509) co-tī 'donec venat' for *-t(o)-incs-t (§ 826 p. 364) no beir 'fert' for 'bere-t, no chara 'loves' for *carā-t, hin-glen for *-gli-na-t (ep absol glenaid 'remains hanging' for *gli-na-ti). Conj. tēs tēis 'eat' for *steiks-e-t, -air-ema 'suscipiat' for *-emā-t, ro-chara 'amet' for *carā-t
- (3) Idg. -e ro cechuin 'cecinit' for *ce-can-e (I § 657 1 p. 505 f

§ 998 Germanic

- (1) -ti. Goth O.H.G is-t After sonants, liquids and nasals pr Germ. - p_i or - $\bar{d}i$ according to the position of the word accent (I § 530 p 386). Gothic has only - \bar{p} , which may represent both -p(i) and - $\bar{d}(i)$ (I § 660 5 p. 516). e g trudi- \bar{p} 'steps' Class II B like Skr tudá-ti, bairi- \bar{p} 'fert' = Skr bhárati. West Germanic has both forms, O H.G. using -t = pr. Germ - $\bar{d}i$ always, whilst A.S. has usually - $\bar{d}i$ = pr. Germ - p_i ; O H G biri-t hevi-t and the like (§ 720 p 251) are regular and tuo-t analogical, A.S. $d\bar{w}d\bar{d}i$ dize- $\bar{d}i$ (loc cit.) regular and bire- $\bar{d}i$ analogical
- (2) -t dropt in all Germanic dialects (I § 659.6 p 513) Goth. *i-ddja* he went' Skr. á-yā-t. Goth. nasida OffG nerita 'he preserved' Optative Goth bairái O.H.G. beir pr. Germ *béraṣ-ā, Goth vairþi O.H.G wurti 'he would become' pr Germ. *yurāt-þ.
- (3) -e, pr Germ. -i in the Perfect Goth shai-shaib O.H.G. sciad 'he separated': Skr. ci-chēda. In Gothic -i disappeared by universal rule. O.H.G was nam and the like follow the lead of bant etc. (I § 661.2 p. 517). That the lost vowel had i-quality is still indicated, according to W. van Helten (P.-B Beitr. xiv 282 f.), in the ē of words like O Fris. wēt 'he knows' = Goth. váit, which is due to mutation.
 - § 999. Balto-Slavonic. -e (Perfect) is wanting.
 - (1) -ti in Baltic occurs only with a few unthematic stems,

in Old Russian both with these and with the thematic Lith. es-ti est Pruss. ast (astits = asti tas 'est hic') O.C.Sl. (Russ.) jes-ti 'is'. Lith. eī-ti eīt Lett. i-t 'goes' Pruss. eit. Lith. di'sti reflex. di'sti-s O.C.Sl. (Russ.) dastī 'dat'. OCSl. (Russ.) bere-tī Skr. bhára-ti.

(2) -t dropt in both branches (I § 663.3 p. 521). O C SI aor veze: Skr. váha-t, s-aorist -č 'ate' for *ēts-t (1st sing. -ēsŭ). Lith injunctive used for indic. pres. and preterite: sāko 'says' bùvo 'was', tùri has'. Optative Lith te-režē O.C.Sl. vezi Ski váhē-t. Another example is Lith. vēža 'velut' for *veža-t. The a of this form, and of the 2nd pl vēža-te and the 2nd dual vēža-ta, came in from the 1st pl vēža-me and displaced e, this levelling was helped by present stems which had i all through, and those which had o in the plural, dual, and 3rd singular (tùri-me etc., sāho-me etc.), cp O.H G Alemann. 2nd pl bera-t, § 1015

In Baltic the 3rd singular of all verbs served also for 3rd plural and 3rd dual. According to J. Schmidt (Kuhn's Zeitschr. xxv 595), the form yià 'est' (from the V of Skr. *\(\tilde{tr}\)-t\(\tilde{e}\), \ \ 497 \quad p. 57) was originally a substantive used predicatively ('existentia'), which did for all numbers, when this idiom became familiar, the 3rd singular of real verbs got to be used for all numbers alike. To my mind it seems likelier that the idiom is derived from that idiom of proething speech which allowed a neuter plural or dual subject to have a verb in the singular (cp Homer's δούρα σέσηπε and δοσο δεδήει): this rule held in proething Baltic, and led by and by to using of the masculine or feminine plural in the same way.

In Lithuanian and Prussian, another ending besides these is found, namely -ai. Present Lith. pa-vystai 'withers' = pa-vyst(a) and conjunctive (see § 909.3 a p. 457) te-lystai 'let him grow haggard' = te-lyst(a), Pruss. swintinai 'he sanctifies' = swintinai (also -ei -e instead of -ai) turi ei 'has' = turri s-Future Lith. su-gausai 'he will or must get' = su-gaūs, turesgi 'he will or must have', in Prussian always used as conjunctive, as boūsai 'be hè' dāsai 'let him give' (also -ei or

-e instead of -a1). All these forms with -ai can be used for the plural. I regard -ai as something originally independent which has attacht itself to the verb, the same which appears in the nom. sing. tasai as compared with tas (III § 414 Perhaps, however, it was not -ar but -sar (see p. 336). loc cit.).1) In this case we must assume that it was first added to the future, which seems to have ended with -s = -s-t in proethnic Baltic (injunctive of the s-aorist), cp. § 828 p. 365 f.; and after the double s was thinned (*būs-sai becoming *būsai), -ai was mentally abstracted and then added to the present.

In Old Bulgarian we find instead of -ti the ending -tu i. e. -t + particle u (§ 909 p 457), e. g. O.Bulg. jest u beret u, cp. 3rd pl. sątŭ beratŭ. Perhaps proethnic Slavonic had 1esti and beret(ŭ) corresponding to Lith. esti and veža, and levelling took different directions in the dialects

In Old Bulgarian -tu spread from the present to the aorist, and thus we have pri-jetu instead of -je; these aorist forms then came to be used for the 2nd singular. See § 830 p. 367.

1st PERSON PLURAL.

§ 1000. Proethnic Indo-Germanic. The different languages show a vast number of endings, the original distribution of which can only be partly made out. from Sanskrit, with its primary -masi -mas, and secondary and perfect -ma; from Old Irish, with -mi -me in absolute flexion, -m in conjunct; and from Old High German, whose - $m\bar{e}s$ properly belonged to the indic. present (with -m in indic. preterite and the optative), we should regard the forms with a characteristic s as being the primary of proethnic speech. Whether the vocalic suffixes and those ending in a nasal

¹⁾ This -sai may be identified with the Goth. sai OHG. sē, which Osthoff connects with Skr. sed = sd id 'that same' (P.-B. Beitr. VIII 311).

- (1) Primary Forms.
- (a) -měs -mos. Perhaps originally -més e. g. *i-més 'imus', but -mos e. g. *bhéro-mos 'ferimus', cp. III § 228 p. 111 f. on the endings of the gen.-abl. sing. -es and -os. Skr. i-más bhárā-mas, Gr. Dor. ἴ-μες φέρο-μες, Lat. ī-mus feri-mus, O.H.G. tuo-mēs bera-mēs Perhaps we should add O.Ir. do-bera-m (for *-mos), Czech js-me nese-me (for *-mes) Serv. jes-mo plete-mo (for *-mos).
- (b) -mesi -mosi, possibly for -mes -mos extended on the analogy of the other primary endings in -1. Skr. Ved. s-mási bhárā-masi O.Ir ammi 'sumus' for '*esmesi or *s-es-mesi, berme for *beromi *beromesi, but phonetic law would permit us to assume for this language *-mēsi (ep above O.H.G. -mēs)
 - (2) Secondary or Perfect forms.
- (a) -mē -mō Skr á-bharā-ma bhárē-ma perf. vid-má; Ved. also -mā. Osc. manafu-m comes in too, if it is 1st pl. ('mandavimus'), see § 874 p 422. Goth. vitum O.H.G. wizzum, opt. Goth. baírái-ma vitei-ma (for *-mē or *-mō). Lith. reflex. sùko-me-s, with variant sùko-me Perhaps also Q.Ir. do-bera-m (for *-mo), Czech js-me nese-me Serv. jes-mo plete-mo.
- (b)* -mem -mom or -men -mon.¹) Gr. έ-φέρο-μεν φέρο-μεν ἔδ-μεν, O.C.Sl. aor neso-mü Perhaps also O Ir do-bera-m (for *-mom *-mon), but there is no trace of a final nasal. O.C.Sl. neso-my may be derived from -mōm -mōn.
- § 1001. It is a difficult question how far the -m- of our ending, and likewise that of the middle ending Skr. -mahē Gr. - $\mu\epsilon \vartheta \alpha$, had a sonant pronunciation (- ηm -) in the parent language.

^{1) -}mem -mom appear to deserve the preference to judge from Skr., -tam beside Lith -ta OCS1 -ta in the 2nd dual (§ 1031), and Skr. -tām beside O.CS1 -te -ta in the 3rd dual (§§ 1038 and 1040)

The following are cited from Avestic by Bartholomae (Kuhn's Zeitschr. XXIX 273 ff.). 1st pl. aur. jun-ama from √ gem- 'go', 1st pl pres. hišc-amaidē beside 3rd sing hi-šax-ti (§ 540 p. 101), opt jam-y-ama (§ 941 p. 486) For the Perf. examples are Avest -ama in daidy-ama, Gr -amer Goth, -um Lat. -imus O.Ir -ammar, see § 844 p 386 Lastly, for the Signatic addist, Gr - σαμέν - σαμέθα Lat -simus, sec § 820 p. 356, § 823 p. 361.

§ 1002. Aryan

- (1) Primary -mas and -masi. Both are kept in Sanskrit, but in Iranian only the latter is found. Skr. s-más s-mási Avest. mahi O.Pers. a-mahy 'sumus'. Skr. bhárā-mas -masi Avest. barā-mahi O Pers pahyā-mahy ('dıcımur').
- (2) Secondary and Perfect -ma, whose Vedic variant -mā may be compared with Goth -ma Lith -me(-s). Skr. á-dhā-ma Avest. Gath dā-mā from / dhē- 'to place', Skr. ú-kar-ma O.Pers a-kū-mā from V ger- 'make'; Avest jim-ama (§ 1001). Opt Skr syá-ma Avest x'yā-ma jam-y-ama (§ 1001), Skr bhárē-ma Avest. barae-ma Further, the Aryan conjunctive always has -ma, by which the ind. and conj. pres. of thematic stems were distinguisht) Skr bhárā-ma Avest barā-ma Perfect śu-śru-má su-sru-ma from V ĥleu- 'hear', Avest daidy-ama (§ 1001)

As in other languages, so in Sanskrit, the difference of primary and secondary endings was not strictly kept in the later language, thus we have in the Maha-Bharata imperf a-pašyāmas 'we saw' and pres. pašyāma 'we see', and similarly 1st dual syāvas unstead of syāva 'we both would be'

§ 1003. Armenian. The ending of the indic present suffix -mk is not clear, examples are ta-mk 'damus' bere-mk 'ferimus'; Bugge (Beitr. zur etym Erl der arm. Christiania 1889, p. 44) derives -mk from -mes+v (the particle u), cp. UI § 313 p. 212 on the case-suffix -k in dsterk mek etc. Still more obscure is the -k of other tenses, as of aor. tuak 'they gave'.

Remark. In explaining the endings of the 1st and 2nd plural (§ 1011) we must not forget the possibility of a personal pronoun being affixt, cp. Mod.Cymr. 1st pl. carvon Alban. 1st pl. jena § 1006. 2, O.Ir. 2nd pl. adıb (§ 506 p. 72 f). In considering the -4½ of the 2nd plural, where 2 seems to come from t for -te, we must also remember that the 2nd pl. may have imitated the ending of the 1st plural, op. O.Ir berthi Lith sùkate-s §§ 1014, 1016 Compare Hubschmann, Kuhn's Zeitschr. XXIII 12

- § 1004. Greek. In Doric, $-\mu\varepsilon_{\zeta}$ (primary) becomes universal E. g $\varphi\dot{\epsilon}_{\zeta}$ 00- $\mu\varepsilon_{\zeta}$ in- $\mu\varepsilon_{\zeta}$ 0 in- ε 0 in ε
- •§ 1005. Italic. Latin has always -mus for *-mos (primary), as \(\bar{\text{t}}\)-mus agi-mus s\(\bar{\text{t}}\)-mus momordimus. Examples of this person in the other Italic dialects are wanting, unless indeed Osc manafum is 1st plural (see \(\xi\) 1000 2\(\alpha\) p. 535).
 - § 1006. Keltic.
- (1) Primary O Ir -mi for *-mesi (or -mēsi) ammi 'sumus' for *esmesi or *s-esmesi (§ 506 p 72 f), guidmi we beg' (1st sing. -guidiu). -mi became -me when the preceding syllable had no palatal vowel (1st and 2nd conjugations), thus berme for *bero-mi *bero-mesi, carme for carā-mi *carā-mesi Then comes confusion of various kinds; guidme beside guidmi, and tiagmi beside tiagme
- (2) Secondary () Ir -m tor '-mo or *-mos, hardly for *-mom *-mon (§ 1000 1 a, 2 a and b., p 535) Indic. pres. do-berane, no charam, do-lêcem, and so in the a-conjunctive. -beram -caram.

The primary ending -mi, as the frequent spelling -mmi -mme shows, had a hard, not a spirant m. This was irregular in forms with orig. vowel before the personal ending, and is due to the analogy of ammi, where mm = sm. But Cymric shows -un in the pres indicative, as carum ('we will love'),

¹⁾ On the same principle, we find in Pali dudamha following amha for asma 'sumus', Prakrit citthamha -mho following amha -mho; and in Prakrit there is a 1st sing yacchamhi instead of yacchāmi. As regards the 1st plural something may be put down to the influence of the s-aorist ending (Skr. -s-ma), ep. Pali apacamhā beside apacimhā (E Kuhn, Beitr zur Pali-Gramm, 109; Torp, Die Flexion des Pāli, 47).

1. e. -wf + the personal pronoun n-,1) and therefore had the regular spirant m; however, ym 'sumus' has hard m, for sm

Of the secondary ending -m the reverse is true -m in O.lr. do-beram and the like is never written -mm, and therefore was spirant. Cymric however has -m, not -f, except in the indic present; as conj. carom. As regards this Cymric -m Thurneysen writes: "It is possible that other forms with -sm- (s-aorist and injunctive) may have had something to do with the matter. There are many traces of s-forms in British dialects, which have not yet been properly explained".

§ 1007. Germanic

- (1) O.H.G. -mēs = Idg *-mēs must, as the breathed -s shews, have originally belonged to the pr. Germ. unthematic present stems (cp. gā-mēs). It very soon spread to the hortative Injunctive, as bera-mēs (with variant bera-m like Goth. baira-m, see § 909 p. 458), and then to the Indic. preterite, bārumēs, and then to the Optative, bārīmēs. Compare Braune, Ahd Gramm 2 pp. 223 f., and the works there cited.
- (2) Goth. -m = Idg -me or -mo in vitum bērum baira-m. Goth. -ma = Idg -mē or -mō in the optative: bairái-ma bērei-ma. The West-Germ -m, O.H.G. wizzum bārum bera-m berē-m bārī-m, may be equivalent either to -m or to -ma in Gothic (I § 661.2 pp. 517 ff.).

§ 1008. Balto-Slavonic.

Lith. -mė = ldg -mē (§ 1002. 2. a) before the reflexive -si and -s · sùko-me-s sùku-me-s. The -me of sùko-me sùka-me ei-mè eanus' eī-me 'imus' may come from -mė by I § 664. 3 p. 523. Perhaps however Idg. *-me and *-mē have run together into -me. The suffixes -ma -mo-s found in a few instances as variants of -me and -mė-s (Bezzenberger, in his Beitrage, ii 268), and Lett. ei-ma 'we go' and 'let us go'. are a re-formation in agreement with the dual -va -vo-s (§ 1030);

¹⁾ The personal pronoun is added in this way in the Albanian dialect of Škodra, e g. jena 'sumus' instead of jemi. See G. Meyer, M. Hertz zum 70 Geburtstag, 1888, p. 89.

so too in the 2nd plural there is contamination with dual forms (§ 1016). Lett. -mi(-s) is to be connected with Pruss. -mai (as-mai 'we are' turri-mai 'we owe, should'), as also 2nd pl. -ti(-s) with Pruss. -tai -tei -ti (as-tai es-tei as-ti 'ye are' druwē-tai 'ye believe' turri-ti 'ye should'): the diphthong comes from the 1^{nt} and 2nd singular (§ 983 p. 522, § 991 p. 528).

The following endings may be regarded as proethnic Slavonic

- (1) -me = Idg. -mes or -me. Mod Bulg. sme 'sumus' aor. nesoh-me Little-Russ dial (in the Carpathians) vydy-me. Czech js-me 'sumus' jime 'edimus' nese-me opt. nesme.
- (2) -mo = Idg -mos or -mo. Little-Russ, with the ind. present in -mi, jeś-mo jimo Serv. and Mod.Sloven. also in other stems. Serv jes-mo ijemo Mod.Slov. s-mo jēmo, Serv. and Mod Slov. plete-mo opt pleti-mo
- (3) -mũ = Idg. -mom or -mon In O.C.Sl. this is the usual ending pes-mũ damũ nese-mũ aor. neso-mũ opt nesẽ-mũ dadi-mũ. So in Great-Russ nese-m dadi-m damus; Little-Russ. nese-m opt. neśi-m; Pol. niesie-m (see below), Czech aor. nesecho-m imperf nesjécho-m.
- (4) -my either from -mom or -mon (I § 92 p. 86 f.), or else modelled after my 'we' (cp. 1st dual -ve, as jes-ve, with ve 'we both', § 1030). O.Bulg e g. vemy beside vemu, vidi-my beside vidi-mu. Pol. wiemy, messemy beside niesie-m. East-Sorb. and Mod.Sorb. vemy

It is uncertain how these endings were distributed in proethnic Slavonic. As regards -mo it should be observed that the accents justify an inference that it at first belonged, as it still does in Little-Russian, only to the indic. Present of verbs in -mi, and that it is only their analogy which produced Serv. plete-mo etc. The forms we find in modern dialects have been often affected by the fact that -mü ran into one with the -mi of the 1st singular; hence in Polish while niesiem exists beside niesiemy (1st sing. mose), we have only wiemy (1st sing. wiem) and działamy (1st sing. działam).

Thematic O C.SI pres nese-mi nese-ve as against aor. neso-mi neso-ve The former follow the analogy of 20-stems such as 2naje-mi -ve, where e is regular for o (I § 84 p 80) In the aorist o remains, because there were no 20-stems in the aorist.

2ND PERSON PLURAL.

§ 1009. Proethnic Indo-Germanic Only in Aryan do we see a pair of endings, one primary and the other secondary, Ski -tha and -ta (cp 2nd dual -thas and -tam). All the forms of European languages can be derived from the single one Idg -te. Still it must be admitted that much darkness still hangs over the tenues aspiratae in European languages (cp. I § 553 pp 405 ff, II § 81 Rem 2 p. 243, Bartholomae Stud Idg. Spr. 1 44)

Again Aryan, and Aryan alone, shows a special perfect ending. -a, which may be related to the Gr. $-\tau \epsilon$ as Skr $-\bar{\epsilon}$ to Gr $-\tau a$ in the 3rd sing perf. middle, and may possibly be identical with the a of the Sanskrit endings 2^{nd} dual $-\dot{a}$ -thur 3rd dual $-\dot{a}$ -tur (§ 1038)

- (1) Primary Skr -tha Gr. -τε etc. Skr. s-thá Gr εσ-τε Lith. ε̃s-te O.C. Sl jes-te Skr. bhára-tha Gr. φέρε-τε O Ir do-berr-d Goth baíri-p Lith vēža-te O.C. Sl. bere-te
- (2) Secondary Skr -ta Gr. - τs etc. Pret. Skr. á-vida-ta Gr. $\epsilon i'\delta \epsilon \tau s$ O C Sl (nor) nese-te. Hortative Injunct. Skr bhára-ta Gr $\phi \epsilon_{01}$ - τs Lat. agi-te O Ir beri-d Goth. bairi- \bar{p} . s-Aor. Skr. á- $dh\bar{a}$ -s-ta Gr $\bar{\epsilon}$ - $\partial \epsilon i \bar{\epsilon} a$ - τs Lith. (injunct. as fut) dé-s-te O C.Sl. dě-s-te Opt. Skr bhár \bar{e} -ta Gr. $\phi \epsilon_{00}$ - τs Goth. bairá- \bar{p} O.C.Sl ber $\bar{\epsilon}$ -te
- (3) Perfect Skr -a Gr -τε etc. Skr vid-á Gr. ἴσ-τε O Ir. gegnuid Goth vitu-þ.
 - § 1010. Aryan
- (1) Primary ending pr. Ar. -tha. Skr. bhára-tha Avest. bara-pa Skr s-thá Avest. Gath. s-tā (cp. $v\bar{v}ist\bar{a} = Skr. v\acute{e}ttha$ I § 475 p. 351).
- (2) Secondary ending pr. Ar. -ta. Skr. á-bhara-ta Avest. bara-ta. Opt. Skr. bhárē-ta Avest. barae-ta.

In Vedic we also meet with -thana and -tana, the latter very common with hortative forms: e. g. s-thana vada-thana i-tana punī-tana. -na is a particle, which, if my conjecture be right, is contained in other forms, namely 2nd sing. imper. Avest barana and Skr. grhāna (§ 600 p. 143), and which may be akin to the -nı of the Aryan 1st sing. conj. in -āni (§ 977.3 p. 518)

- (3) Pr Ar -a in the Perfect. Skr $ca-kr-\acute{a}$ (3rd sing. $ca-k\acute{a}r-a$ 'he made'), Avest $hanh\bar{a}n-a$ from han- 'to present, earn' (§ 852 p 402)
- § 1011. Armenian. All tenses and moods have -k final; e. g berēk 'fertis' for *bere-ik, abaik 'moltis', aor edik 'ye placed'. The i of -ik appears to be the same as t in -te, for further discussion refer to the Remark to § 1003, on page 536
- § 1012. Greek Always -τε έσ-τε φέρε-τε φέροι-τε ίστε τετρόφα-τε.

Remark The -θε of the Perfect forms Hom and πέποσθε (Aristarchus πέποσθε) imper. εγρήγος θε ανωγθε is not the Skr -tha, but a middle ending.

§ 1013. Italic. In Latin -te only in the hortative Injunctive (Imper) fer-te agu-te

Elsewhere -tis es-tis agu-tus agā-tus sī-tus vīdus-tus. the relation of agite to age produced agits beside agis (Osthoff. Zeitschr. f. osterr Gymn, 1880, p 70), is less probable than that -tis (earlier *-tes) is really a dual ending (Skr. -thas Goth. -ts). Outside the imperative the forms with -te, which often elided their vowel, became too much like those of the 3rd singular; and so by the time that dual and plural had got confused and the feeling for the special dual sense of the endings in question was dulled, -tis was preferred to -te because it was clearer. Of course the relation of agite to age may have made it easier to use agitis as a plural of agis. In Lettic also, where as in Latin the dual number was discarded, the 2nd dual en-ta remained in use as a plural form. 'ye go' and imper 'go ye'. Compare further under § 967 p 509, § 1034 on Umbr. futu-to 'estote', and § 1015 on O.H.G. beret fertis'.

On Pelign. lexe, which is apparently 2nd plural, see Thurneysen Rhein Mus. xLiii 352.

§ 1014. Keltic. Ir -d for -te in conjunct inflexion: do-berid 'datis', conj. of s-aorist for-tesid 'succurratis, succurretis'. So in the imperative: berid 'ferte'.

The absolute forms have -thi for their ending (-the for -thi in the 2nd conjugation, as in 1st pl. -me for -mi, see § 1006 p. 537); e. g. ber-thi for *berethi, lēcthi for *lēct-thi, carthe for *carā-thi; by levelling, berthe (with a glance at berme too) lecthe. This ending -thi is an imitation of -mi, as in Lithuanian sùka-tė-s imitates sùka-me-s (§ 1016). 1) On udib 'estis', see § 506 p. 72 f.

§ 1015. As far as the Germanic sound-laws go, either -the or -te may be taken as the form to start from. The consonant fared precisely like that of the 3rd sing. ending -ti, see § 998.1 p 532 Goth. indic. pres. bairi-b perf. bēru-b opt. bairái-þ bērei-þ like the 3rd sing. pres. bairi-b. ga-sihi-t 'ye behold' (Monsee or Mondsee "Fragments", see Braune Ahd. Gr.2 p 1) perf. bāru-t opt. berē-t bārī-t like 3rd sing, pres biri-t.

In the indic. present O.H.G. originally had -2- for its thematic vowel; and this remains in ga-sihit and a few other forms from the authority just cited. Alemannic bera-t with -a- following the 1st and 3rd plural (cp. Lith. vēža-te § 999. 2 p. 533), which served to distinguish 2nd plural from 3rd singular

The commonest in O.H.G. is the form beret. With Kogel (P.-B. Beitr. viii 138) we may regard this as a dual form, either *bhere-thos (Skr. bhára-thas Goth. baira-ts), or *bhere-tom (Gr. φέρε-τον), or *bhere-tā (O.C.Sl. bere-ta); cp. §§ 1031 ff.

§ 1016. Balto-Slavonic.

Lith. -te and -t, as es-te veža-te (on -a- instead of -e-, see § 999. 2 p. 533) pret. vēžė-te. The ending -tė-s in the reflexive

¹⁾ Just in the same way *faiz *diz became faites dites in Old French by analogy of farmes and dimes (Neumann, Zeitschr. fur rom. Phil, xiv 581, 584).

follows -me-s beside -me in the 1st pl. (cp. § 1014). The endings -to-s, sometimes found in place of -te-s, and -ta in Lett. ei-ta 'ye go' or 'go ye', are dual; just as -ma and -mo-s in the 1st plural of Lith., which sometimes take the place of -me and -me-s, and in Lett. ei-ma, have the dual vowel (§ 1008 p. 538 f.). On Lett. -ti-s and Pruss. -tai -tei -ti, see the same place.

Slavonic: -te: jes-te nese-te aor. nese-te de-s-te opt. nese-te.

3rd PERSON PLURAL.

- § 1017. Proethnic Indo-Germanic. We here deal with the *nt*-suffix only. On Skr. perf. vid-úr and like forms see §§ 1076 f. and 1079
- (1) After Consonants -énti -ént and -nti -nt, which appear to be related in the same way as -és and -s of the genitive singular. Compare footnote to page 50.
 - (a) -énti and -ént.

Primary -énti *s-énti 'are' Skr. s-únti (Armen. en, cp. § 1019), Gr. Dor. èvrì Att ɛloì, Umbr. s-ent Osc. s-et s-et, O.Ir. it O Cymr int, Goth s-ind 'd-énti 'they eat' \(\sigma ed \).

Skr. ad-anti O.C Sl. (Russ.) jad-çtī. *mr-n-énti beside 3rd sing. *mr-nd-ti 'crushes, grinds to dust' (§ 598 p. 141): Skr. mr-n-ánti. *r-nu-énti beside 3rd sing. *r-néu-ti 'excites' (§§ 638 f. pp. 176 f.): Skr. r-nv-ánti

Secondary -ént. *s-ént Skr. s-án ás-an (cp. gm-án á-gm-an), with the particle u, s-ánt-u, Gr. Dor. $\tilde{\eta}_{\nu}$ for * $\tilde{\eta}(\sigma)$ - ε_{ν} , O.Bulg. jad- ϵt - \tilde{u} with the particle u (but cp § 1026). Skr. á- $\tilde{s}r$ - \tilde{n} -an, á-su-nv-an. Opt. *s- $(i)_{\tilde{k}}$ -ént 'may they be': Gr. ϵl - ϵ_{ν} O.Lat. si-ent; of the same kind, apparently, is Skr. duh- $\tilde{u}y$ -án, see § 941 p. 486, § 951 p. 493

(b) -nti and -nt.

Primary - ηti . * $d\acute{e}$ -d- ηti from $\sqrt{d\bar{o}}$ - give': Skr. $d\acute{a}d$ -ati O.C.Sl (Russ) dad-eti. In Greek - $\check{a}\sigma \iota$ for the Perfect, as $\lambda \varepsilon - \lambda \acute{o} \gamma \chi$ - $\check{a}\sigma \iota$

Secondary -nt. The type *dé-d-nt is preserved in Aryan only as embodied along with the particle u in the Skr. dá-d-at-u.

In other cases *-at in Sanskrit is replaced by -ur (á-da-d-ur), in Avestic by -an (da-d-en) Another form which comes in place here is the O Bulg. dad-et-\tilde{u}' 'dant' (but ep. § 1026), and another is O Sax ded-un 'they did' from \$\subset\$ dh\tilde{e}_-\$, if it be a reduplicated imperfect (§ 545 p 103, § 886 p. 433, § 1025). Then again some forms of the thematic aorist appear to have had -yt originally, as we are led to believe by Ski part nom sing dh\tilde{u}\tilde{k}\tilde{u}at^{-1}\$) and so perhaps O.C.Sl. -s-\epsilon\$, as da\tilde{e}_c\$, belong to the same group, and O II († wissum if it is rightly compared with Gr. \tilde{u}ov (§ 827 p 365, § 907 p. 455). Lastly, our suffix should be claimed for the ox-optative *bh\tilde{e}rox-yt\$, instead of which we have in Skr bh\tilde{a}r\tilde{e}y-ur Avest. baray-en Gr. \quad \tilde{e}\varphi ov-\tilde{e}v Goth ba\tilde{e}r\tilde{a}i-na.

(2) After Sonants -nti and -nt.

Primary -nti *μē-nti 'they blow'. Skr. vắnti Gr άεισι, Armen. aλa-n 'they grind', Lat ple-nt ama-nt, O Ir carit they love', Goth salbō-nd, O C.Sl (Russ.) imatī 'they have' Long-vowel Conjunctive Avest. patā-nti Gr. Dor φέρωντι Att. φέρωσι *bhero-nti 'ferunt': Skr. bhára-nti Armen. bere-n Gr. Dor φέρο-ντι Lat feru-nt O Ir. berit Goth baira-nd O.C.Sl (Russ) beratī

Secondary -nt (it e-mys-v syvo-v, O.Bulg. mat-ŭ ithey have' (with the particle u). Long-vowel Conj. Skr bhárā-n, Osc. dewa-ns 'dicant' *bhéro-nt. Skr. bhára-n á-bharā-n, (ir. qégo-v sqego-v, OCSI ba for *bhuo-nt (§ 525 p. 88) aor nesa

§ 1018. Aryan

- (1) After Consonants Idg. -énti -ént and -pti -pt
- (a) -énti and -ént

Primary -énti = pr. Ar. -ánti. Skr. s-ánti Avest h-enti O Pers. h-atiy. Skr y-ánti Avest. y-einti. Skr. grbh-n-ánti Avest geren-n-enti Skr. yuny-ánti Avest. merenc-inti (I § 94 p 89) Skr. hr-nv-ánti Avest kerenv-anti.

Secondary -ént = pr Ar. -ánt. Skr. s-án ás-an Avest. h-en O Pers. ah-a, Skr. áy-an O.Pers. ay-a. Aor. Skr. gm-án

¹⁾ For the 3rd plural of the s-Aorist with vowel gradation (\$\frac{c}{3}\$ 811 p. 848 f), it is necessary to assume the ending *-s-ént.

á-gm-an Avest. g*m-en; with ā-stems of our Classes I and X Sanskrit adopted the ending -ur, as á-sth-ur d-g-ur from sthā-and gā-; but in Vedic there remain a few examples of -an, as vy-āsthan (Bartholomae, Stud. zur idg. Sprachg. I 32 ff., II 64 ff.). Skr. á-śr-n-an á-yuñj-an á-kr-nv-an. An Optative form of this kind is apparently Skr. duhīy-án; otherwise we have Skr. s-y-úr and Avest. h-yan = *s-yā-nt, no. (2).

(b) -nti and -nt.

Primary - ηti = pr. Ar. -atı Skr. $d\acute{a}$ -dh-ati Avest. Gath. da- $d\mathring{-}at\ddot{\imath}$, Skr sa- $s\acute{c}$ -ati $b\acute{i}$ -bhr-atı $d\acute{a}vi$ -dynt-ati. Cp. part nom. pl. $d\acute{a}$ -dh-at-as II § 126 p. 400. In the Avesta, -atı is usually exchanged for -antı, which showed the plural mark more clearly, as da-p-entı (sımılarly in the part. da-d-ant- instead of *da-d-at-); cp mid. -ante instead of -ante § 1067. 1

Secondary -vt = pr. Ar. -at, which remains in -at-u as Skr. dá-d-atu 'danto', and also seems to be represented in its unextended shape by four Avestic examples from the Gathas, viz. da-d-ab za-z-ab jī-ger'z-ab daidy-ab (Bartholomae, Kuhn's Zeitschr. xxix 280 ff, 291 f.), but elsewhere it is lost. It should be remembered that whilst -ati corresponds to -anti and -nti, -at stood in sharp contrast to -an and -n, and therefore -at did not suit the general types of 3rd pl. in the Aryan verb. In Sanskrit this is replaced by -ur, as á-da-dh-ur á-bi-bhar-ur, 1) s-aorist á-mats-ur á-tāriṣ-ur á-yāsiṣ-ur (cp. § 1017.1. b), opt. bhárēy-ur. But in Avestic we have -an, in the same way as we have -anti instead of -ati: da-p-en (cp. da-p-enti) opt. baray-en.

(2) After Sonants, Idg. -nti and -nt.

Primary -nti Skr vá-nti Avest vå-nti. Skr. bhára-nti Avest. bara-inti O Pers. baratiy, Skr. bhāráya-nti Avest. bāraye-inti. The long-vowel Conjunctive in Avestic has -nti and -n, as patd-nti and patan, but only -n in Sanskrit — páta-n.

Secondary -nt. This form retains its -t before the particle

^{1&}gt; Ved. abibhran I regard as a-bi-bhr-a-n, 1. e as a thematic form (§ 539 p. 99).

u: Skr bhára-ntu Avest bara-ntu 'ferunto' (§ 909 p 458). Elsewhere -n. Skr. á-bhara-n Avest bare-n O Pers. a-bara. The short-vowel conjunctive always has this ending. Skr. ás-a-n Avest anhen In place of 'a-gā-n (= Gr. $\ddot{\epsilon}$ - $\beta\bar{a}$ - ν , beside 3rd sing. á-gā-t $\ddot{\epsilon}$ - $\beta\eta$) Sanskrit has á-g-ur, and similarly á-y-ur instead of *a-yā-n (3rd sing. á-yā-t), answering to the form á-dh-ur = Avest. Gath. d-ar $\ddot{\epsilon}$. But Avest. dan beside d-ar $\ddot{\epsilon}$ makes us infer such forms as *gan = β a- ν (Idg *gā-nt) — dan dā-ma following 'gan qā-ma — as in the optative, beside 1st pl. Gath \dot{x} -yā-mā was coined 3rd pl \dot{x} -yē-n = 'late Avestic h-yan (compare with this h-yā-r $^{\circ}$, also with strong form of optative suffix).

As regards the 3^{rd} pl with -r (Skr. -ur Avest. $-ar^s$ $-ar^s$ š), see §§ 1076 f.

§ 1019. Armenian The 3rd plural has -n always, this seems to represent a coincidence of -ntn and -nt.

ala-n 'they grind' for *ala-nti. cp. Lat. juva-nt. en 'sunt' for *s-enti, but this must have been influenced by other forms of the paradigm (em es etc.), for by I § 63 p. 50 *in was to be expected (cp. Bugge, Kuhn's Zeitschr. xxxii 71). beren 'ferunt' follows en like 1st sing. berem: em § 978.1 p. 519

etūn 'they gave', edin 'they placed', cp. Avest. da § 1018.2 above. But why not *etn *edn by I § 651.1 p. 497?

§ 1020. Greek

- (1) After Consonants Idg -énti -ént and -nti -nt
- (a) -énti and -ént.

Primary -énti Dor. èvrì Att. eion instead of *évri = Idg. *s-énti with smooth breathing following eiuì etc 1)

Secondary -ént Doric and other dialects $\tilde{\eta}_{\nu}$ 'erant' for * $\tilde{\eta}_{i}(\sigma)$ - ε_{ν} . Skr. s-án ás-an; cp. § 502 p. 65 on the 3rd sing $\tilde{\eta}_{\varepsilon\nu}$ $\tilde{\eta}_{\nu}$ 2 $\tilde{\varepsilon}$ -Optative $\tilde{\epsilon}_{i}$ - $\tilde{\epsilon}_{\nu}$ $\tilde{\epsilon}_{i}$ 0 $\tilde{\epsilon}_{i}$ 0. Lat. \tilde{s}_{i} -ent; on El. $\sigma_{\nu\nu}$ -éar refer to § 944 p. 487.

(b) -nt and -nt.

Primary -nti = Gr. -ατι. Instead of *7στ-ατι *τ/θ-ατι

¹⁾ eio: 'eunt' in Theognis 716 is too uncertain to make it a ground for assuming pr Gr *k-err: = Skr. y-dnti. See Osthoff, M. U. iv 288 f

¹diδ-ατι (Skr. bibhr-ati dádh-ati) we find (Dor.) ἴστα-ντι τίθε-ντι δίδο-ντι, as in (2). But -ατι is preserved in the perfect, as Dor. ἐθώκ-ατι (Hesych.), Phoc. ἰερητεύκ-ατι Hom. λε-λόγχ-ασι, and I may suggest that this ending was taken from reduplicated present stems (cp. § 555 p. 108).

Secondary $-\eta t = \text{Gr.} - a$ is lost; all examples of secondary 3^{rd} pl. took $-\nu$ $\varepsilon - \iota \iota - \vartheta \varepsilon - \nu$ $\varepsilon - \delta \iota - \vartheta o - \nu$ like $\varepsilon \iota' - \vartheta \varepsilon - \nu \tau \iota$. Similarly * $F\varepsilon \tilde{\imath} \pi - a(\tau)$ 'they said' = * $u \dot{\varepsilon} - u \dot{q} - \eta t$ gave way to $F\varepsilon \tilde{\imath} \pi a \nu$, thus following no. 2 (§ 557 p. 109). Again, $-a\nu$ got into the s-aorist, where originally either $-\dot{\epsilon} n t$ (with roots that had gradation), or $-\eta t$, seems to have been the ending; e. g. $\tilde{\imath} \sigma - u \nu$ $\tilde{\varepsilon} - \delta \varepsilon \tilde{\iota} \xi - a \nu$ (instead of * $F\iota \sigma \sigma - \varepsilon \nu$ * $\dot{\varepsilon} - \delta \iota \xi - \varepsilon \nu$?) * $F\varepsilon \iota \delta \varepsilon - a \nu$ (instead of * $F\varepsilon \iota \delta \varepsilon - a \nu$?); on the last see § 1021. The $o \dot{\varepsilon} - o \rho t$ ties took over the ending of the $u \bar{\varepsilon} - o \rho t$ tive $u \nu \varepsilon (\varepsilon - u \nu) = u \nu \varepsilon (\varepsilon - u \nu)$ instead of * $u \nu \varepsilon (\varepsilon - u \nu) = u \nu \varepsilon (\varepsilon - u \nu)$ seems to have arisen by regular change from $u \nu \varepsilon \varepsilon - u \nu \varepsilon \varepsilon - u \varepsilon \varepsilon \varepsilon = u \varepsilon \varepsilon - u \varepsilon \varepsilon \varepsilon = u \varepsilon \varepsilon - u \varepsilon \varepsilon \varepsilon = u \varepsilon \varepsilon - u \varepsilon \varepsilon = u \varepsilon \varepsilon \varepsilon = u \varepsilon = u \varepsilon \varepsilon = u \varepsilon = u \varepsilon \varepsilon = u \varepsilon = u$

(2) After Sonants Idg. -nti and -nt.

Primary -nti. αεισι 'they blow' for *α΄-η-ντι: Skr. νά-ntı; Lesb. φίλεισι 'they love' δίψαισι 'they thirst': Lat ple-nt vide-nt ytva-nt. Conj. Dor. φέρω-ντι Att. φέρωσι (§ 923 p. 471). Dor El. N.-W. Gr. φέρο-ντι Att. φέρονσι.

Secondary $-nt = (4r. -\nu. s-\delta \rho \ddot{\alpha} - \nu \varepsilon - \tau \lambda \ddot{\alpha} - \nu \varepsilon - \mu \nu \nu \varepsilon - \mu \nu \nu \varepsilon - \mu \nu \nu \varepsilon - \nu \varepsilon - \nu \nu$

The vowel before the personal ending is sometimes long instead of short. The reason is undecided. Examples are Hom. $\mu u \hat{\alpha} r \Im \gamma \nu$ Cret. $\delta \iota \epsilon \lambda \hat{\epsilon} \gamma \gamma \nu$ Hom. $\epsilon \varphi \bar{\iota} \nu$

These endings -vr. and -v spread to all stems with

gradation that ended in $-\bar{a}$, $-\bar{e}$, or \bar{o} . $\tau i - \Im \varepsilon - \nu \tau i \quad \dot{\varepsilon} - \tau i - \Im \varepsilon - \nu \quad \ddot{\varepsilon} - i \Im \varepsilon - \nu^{-1}$). ∂i -δο-ντι $\ddot{\epsilon}$ -δι-δο-ν $\ddot{\epsilon}$ -δο-ν (cp 1. b) Dor. $\varphi \alpha$ -ντὶ Att. $\varphi \bar{\alpha} \sigma \iota$, $\varphi \dot{\alpha}$ -ν อัลแขลิกเ (อัลแขลิกเ) for *อิลแ-ขล-ขาย instead of *อิลแ-ข-ยาย. By analogy δήγευσι (δηγεύσι) for *Fony-re-rti instead of *Fon,- $-y_{\ell}(f)-evti.$

§ 1021. The ending -av, which developed first in Greek (8 1020. 1. b), spread widely and was the model for many innovations.

(1) $-\alpha \nu$ instead of $-\epsilon \nu$ and instead of $-\alpha$ became usual in the Indicative of stems which did not end in -ā, -ē, -ō. Son. have been already mentioned $\epsilon i\pi - \alpha v$, $i\sigma - \alpha v$ $\hat{\epsilon} - \delta \epsilon \iota \xi - \alpha v$ * $f \epsilon \iota \delta \epsilon - \nu v$ (by analogy, the ind. perf. γέ-γον-αν § 844 p. 386). So Boeot $\pi ag = \tilde{\epsilon} i a r$ for *-n(o)-av (I § 72 p. 63) from \sqrt{es} to be, Hom. Aeol. exev-av (§ 504 p 67 f) and others Also opt. deligence instead of *Jeitei-ev as we should expect (§ '144 p. 489).

In the tendency which exchanged -sv for -av the middle ending -aro may have had some influence, e. g. in έχευαν (instead of *\(\epsi-\cup v-\alpha v\)), beside which there once was a 3rd pl middle $*\dot{\epsilon}$ - χv - $\alpha \tau o$ (ep. 3^{rd} sing $\dot{\epsilon}$ - χv - τo)

That -ev remains in the Opt., as videi-ev, must be put down to the strong stem $\tau i \vartheta \epsilon i \eta$ (cp. $\dot{\epsilon} \mu i \gamma \epsilon r$: $\dot{\epsilon} - \mu i \gamma \eta$, $\dot{\epsilon} \tau i \vartheta \epsilon r$. Then ridei-er propped up qégoi-er despite the mid, i-τιθη-). φερηί-ατο.

(2) $*\tilde{\eta}$ - αr 'erant' (Boeot. $\pi \alpha \rho$ - $\epsilon \tilde{r} \alpha r$) under the influence of $\bar{\eta}\sigma - \tau \varepsilon \quad \bar{\eta}\sigma - \tau \sigma \nu \quad \bar{\eta}\sigma - \tau \eta \nu \quad \text{became} \quad \bar{\eta}\sigma - \alpha \nu, \quad \text{which may be compared}$ with εσ-μεν (§ 502 p 65). Similarly Feldegar ηθεσαν depend upon a lost *Fειδεσ-τε (§ 836 p. 372); the form was once * $F_{\epsilon i}\delta_{\epsilon-\alpha\nu}$ (cp. § 1020.1 b). Then the ending $-\sigma\alpha\nu$ became familiar, and was detached as a type, beginning partly with these, and partly with σ-aorists of the form ἔπηξαν (to whose system once belonged *έπακμεν *επακτε, see § 820 p. 357); examples are $\ddot{\epsilon}$ - $\varphi \alpha$ - $\sigma \alpha \nu$ $\dot{\epsilon}$ - $\tau i \vartheta \epsilon$ - $\sigma \alpha \nu$ $\ddot{\epsilon}$ - $\vartheta \epsilon$ - $\sigma \alpha \nu$ $\ddot{\epsilon}$ - $\gamma \nu \omega$ - $\sigma \alpha \nu$ $\dot{\epsilon}$ - $\mu i \gamma \eta$ - $\sigma \alpha \nu$ ε-δινάσθη-σαν (Hellenistic also ελάβοσαν είπασαν and the like),

¹⁾ Although we must assume Idg. *dh-ént *é-dh-ent, we can hardly venture to say that the Greek form is derived straight from this groundform.

- iplpf. ε-στα-σαν, opt. εἴη-σαν, imper. έστω-σαν. The wider use of -σαν was assisted by a wish to make the number of syllables the same in 1st 2nd and 3rd plural (εφασαν: εφαμεν εφατε).
- (3) On the analogy of $i\sigma \tau a \nu$ to $i\sigma \tau a \nu \tau_i$, $\tilde{\epsilon} \tau_i \vartheta_{\tilde{\epsilon}} \nu$ to $\tau i\vartheta_{\tilde{\epsilon}} \nu \tau_i$, $\tilde{\epsilon} \delta_i \delta_0 \nu$ to $\delta_i \delta_0 \nu \tau_i$, a primary $-\alpha \nu \tau_i$ sprang up as complement to $-\alpha \nu$. Beside $*\tilde{\eta}\alpha\nu$ 'erant' then stands the pres. Ion. $\epsilon \tilde{\alpha}\sigma_i$; we also have $i\tilde{\alpha}\sigma_i$ 'eunt', $\dot{\rho}\eta \nu \nu \dot{\rho} \sigma \sigma_i$. Beside $i\sigma \alpha \nu$, the pres. (perf.) $i\sigma \sigma \bar{\alpha}\sigma_i$ 'sciunt' Dor. $i\sigma \alpha \nu \tau_i$ (§ 863 p 411). Also perf. $\delta_{\tilde{\epsilon}} \delta_i \tau \rho \dot{\alpha} \dot{\rho} \sigma \sigma_i$ Dor. $\tau \epsilon_{\tilde{\epsilon}} \vartheta \dot{\epsilon} \times \alpha \nu \tau_i$.
- * Doubtless something is due to the analogy of the middle -arai, as $\dot{\varrho}\eta\gamma\nu\dot{\nu}$ - $\dot{\alpha}\sigma$ i: * $\dot{\varrho}\eta\gamma\nu\dot{\nu}$ - $\alpha\tau$ ai (like $\epsilon l\varrho$ i'- $\alpha\tau$ ai § 1068.1 a), $\tau\epsilon\tau\dot{\varrho}\dot{\alpha}\varphi$ - $\alpha\sigma$ i. $\tau\epsilon\tau\dot{\varrho}\dot{\alpha}\varphi$ - $\alpha\tau$ ai. For the Perfect cp also the ending - $\alpha\tau$ i, § 1020.1 b
- (4) Following ἴ-σοι beside ἴ-μεν, ὑηγνύ-σοι beside ὑήγνν-μεν, δεδί-σοι beside δέδι-μεν sprang up τιθέ-σοι διδό-σοι *ίστά-σοι ἱστῶσι as 3rd pl. to τίθε-μεν δίδο-μεν ἵστα-μεν, Hom βεβά-σοι Hom. Att. *ἐστά-σοι ¹) ἑστῶσι to βέβα-μεν ἑστα-μεν, Boeot. δεδό-συθι (on the θ see § 1068). Si milarly Boeot. ἀν-έθεαν (εθειαν έθιαν), by which form the number of syllables in the 3rd plural was made to agree with the 1st and 2nd plural (as with -σαν, see no. 2. above)
- Remark These imperf ἐν-εφανίσσον αστ ἐδούκαεν ἀν-εθείκαιν ἐταϊζείν are not yet properly explained If their -εν -ιν = pr. Gr. -εν, their model must have been *η-εν 'crant' (§ 1020.1.a) εἰ-εν φέροι-εν; if again -εν (-ιν) is regular in Thessalian for -αν (Prellwitz, De dial Thess., 9), they fall into line with Boeot. ἔθε-αν mentioned above Solmson conjectures that the endings -ον -αν were pronounced -οη -αη, to get an equal number of syllables with the 1st and 2nd plural, and that -αεν -αεν -αεν are various attempts to write these sounds (Bezz Beitr. XVII 338).

Late Greek new forms in the 3rd pl are treated by Buresch in the Rhein. Mus., xLvi 193 ff

§ 1022. Italic. •In Umbro-Samnitic the endings *-nti and *-nt become -nt and -ns respectively, and are thus kept distinct. But in Latin the primary ending -nt was made universal in

¹⁾ This uncontracted form is wanting in Epic, because it did not suit the dactylic metre.

prehistoric times in the same way, though earlier, as the primary -t can be seen before our eyes usurping the place of the secondary -d (§ 996 p. 531). The form quotiens. Skr. kiyat (III § 225 p. 106) makes it probable that Latin once had Umbr.-Samn. -ns = Idg. *-nt.

The complete disappearance of -i from -nti in Italic is remarkable; the same thing in seen with the ending -ti (§ 996 p. 531).

Along with -ns Latin must once have had a sentence doublet -n, if Johansson is right in saying that O.Lat. danunt is really *dan + the ending of legunt which it took by analogy (Akadem afhandl til Prof. S. Bugge, pp. 29 ff), compare § 1023 on sēder-unt, and the O.H.G. and A.S. sind-un instead of sind, § 1025. Similarly ex-plēnunt prōd-īnunt would stand for *plen *in (cp the form int beside eunt, formed complementary to īmus ītis as sint was to sīmus sītis, instead of sient). The same -n may perhaps be the ending of Umbr staheren 'stabunt'.

Remark. I will not pass unmentioned Danielsson's conjecture (in Pauli's Altital Stud III 148) that -ns originally belonged to the indic perfect only, and that -s is the same as we see in Avest -ares (§ 1077) Compare further Johansson, Bezz Beitr. xvIII 49.

- (1) The post-consonantal Idg. -énti -ént and -nti -nt run together into -ent(i) -ens in Italic.
 - (a) -éntr and -ént

Primary -énti = Ital. -ent(i). Umbr s-ent Osc. set set 'sunt'.

Secondary -ént = Ital. -ens. Opt. Lat. sn-ent instead of *si-ens; new form sint following sī-mus sī-tis, so also Umbr. sins sis with the secondary ending kept. Lat. vīderint like sint.

(b) -uts and -ut.

Primary -nt = Ital. -ent(i). Since in Umbr.-Samn. the orig. -o-nt(i) has disappeared and given place to -ent(i) (see below), we may assume as 3rd pl. to di-d-e-t 'dat' (§ 553 p. 107) the form *dident, which would be a parallel to Skr dá-d-ati.

Secondary -vt = Ital. -ens seems to be lost.

(2) After Sonants -nti or -nt.

Primary -nti Ital. -nt(i). Lat. ple-nt fla-nt vide-nt ama-nt, Umbr. furfant 'februant'. Hence by analogy Lat. da-nt like Gr. ε-δο-ν § 1020 p. 548, i-nt (beside eu-nt). Lat. feru-nt su-nt: Skr. bhára-ntı O.Russ. sątř. Thematic Conjunctive Lat. eru-nt.

Secondary -nt = Ital. -ns, instead of which Latin has the primary -nt. Osc. fu-fa-ns 'erant' Lat. umā-ba-nt. Conj. Umbr. dirsa-ns dirsas 'dent' Osc. deica-ns 'dicant', Lat. dica-nt, Osc herri-ns 'caperent' tribarakatti-ns 'aedificaverint', Lat age-nt agere-nt Also, with -n for -nt, Lat ex-plēn-unt etc. according to Johansson's explanation, for which see above p. 550.

In Umbr.-Samn often -ent, where -ont is expected. Osc filet 'fiunt'. Thematic Conjunct of the s-Aor. Umbr. furent 'erunt' Osc. censazet 'censebunt' (§ 824 p 362), and these served as the model for fut. pf Umbr benurent 'venerint' Osc tribarakattuset 'aedificaverint' (§ 872 p. 421). Of the same kind are perhaps Umbr. citipes 'decreverunt' Osc. prufattens 'probaverunt', cp. the thematic 3rd sing prufatted (§ 867 p. 416, §§ 872 f pp. 420 ff.) The spread of -ent (-ens) was probably not due to the solitary form sent; probably there also existed *ed-ent 'they cat' O.Russ. jad-eti, forms of the XIIth Present Class in -n-ent = Skr. -n-ánti, of the XVIIth in -ny-ent = Skr. -nv-ánti (-nuv-ánti), and again the form *did-ent = Skr. dád-ati (see above, 1 b).

§ 1023. The Perfect in Latin shows the endings -erunt -ērunt and -ēre, to which we must add from inser. ded-rot ded-ro C. I. L. i 173, 177, and some other forms which have been gathered by Deecke (De redupl. Lat. lingu. praeterito, pp. 17 f.). Though it is natural enough to derive -erunt, beside -is-tis -is-tī, from *-is-ont(i) (§ 841 p 378), still the r of these 3rd pl endings is doubtless connected in some part at least with the Skr. -ur. Avest. -are, Skr. mid. -rē, and others of like nature (§§ 1076 ff). With the extension of the -r-form by -ont compare Skr. -r-anta -r-atē -r-ata (on the form -r-an,

which looks as though it were most closely connected, refer to § 1078. 8). That there is no doubt of its being a middle -r-form extended by the active nt-suffix is shewn by the 1st sing. tutual-7 (§ 1044), which has the middle ending. For further conjectures I refer to Osthoff, Perfect 210 ff. 509 f.. Windisch. Über die Verbaltormen mit dem Charakter R. pp. 47 f; Henry, Mém. Soc. Ling. vi 373 ff.; Zimmer Kuhn s Zeitschr. xxx 281 ff.; Schweizer-Sidler and Surber Lat Gramm 12 139: Stolz, Lat. Gr.2 372 f. Bartholomae, Stud. Idg. Spr. ii 195 ff.

§ 1024. Keltic

Primary Ending. Idg -énti remains in O.Ir it O.Cymr int 'they are' for pr. Kelt. *s-enti, see footnote to II p. 196 (in the light of which I \$ 243 3 p. 202 must be corrected). Elsewhere only Idg. -nti () Ir berit: Gr. qéqo-rii carit for *carā-nti. cp. Lat. ama-nt (Conjunctive berit. Lat fera-nt. cp. Mid.Cymr gwelo-nt 'videant'. lenit 'they hold' for *lina-nti, as Gr. dáuvāsi (dauvāsi) tor *dau-va-vii (§ 1020 p. 548), instead of Idg. *-n-énti.

Side by side runs the Conjunct inflexion. indic do-berat, in the oldest glosses -ot is still found, as tu-thegot = later do-thiagat 'they go away', no charat 'amant'; conj. do-berat Whether these are descended straight from forms in Idg. -nt (*bero-nt *cara-nt *berd-nt), or are middle forms with the Idg ending -nto, has not been made out (see I § 657.1 p 506, and § 82.1 p. 76); the second alternative however seems better Zimmer, who identifies -berat with Gr. qéqo-rio, explains the active function of this form by supposing that berit represents a confluence of two, *bero-nti and *bero-ntai (Kuhn's Zeitschr xxx 236).

- § 1025. Germanic.
- (1) After Consonants, -énti -ént and -uti -uti -ut.
- (a) Primary -énti = pr. Germ. -inpi. Goth. sind O.H.G. sint 'they are' for pr. Germ. *sindi, which is either the unaccented form of the word (cp. I § 669 p. 534) or has taken the place of the regular *sinpi = Goth. *sinpi O.H.G.

*sind on the analogy of bairand berant; () H.G. also sint-un sind-un (O.Sax. and A.S. sind-un) with an additional ending following 1st pl. birum 2nd pl. birut. Secondary -ént is quite lost.

(b) Primary -nti is lost. Secondary -nt = Germ. -un is perhaps original in O.Sax. ded-un 'they did' O.H.G. uissun 'they knew' (§ 1017. 1. b p. 544). -un is always found in the 3rd pl. of both strong and weak Perfect, and also sometimes in the Present e. g. Goth skaiskáud-un bēr-un O.H.G sciad-un bār-un, Goth. nasidēd-un O.H.G nerit-un, Goth. vit-un O.H.G. vizzun (§ 508 p 74), O Icel er-o er-u 'they are'. Perhapthese endings have been under the influence of the middle *-undax *-unda = Idg. -ntax -nto, which we may assume to have lasted down to proethnic Germanic.

(2) After Sonants -nti and -nt

Primary -nts. Goth salbō-nd O.H.G. salbō-nt, O.H.G. habē-nt. Goth baira-nd O.H.G. bera-nt. instead of the latter, Frank. berent, formed doubtless like the 1st pl. berenēs (instead of beranēs) under the combined influence of the 2nd plural beret (§ 1035) and present stems with -20- (suoche-mēs -nt).

Secondary -nt. Perhaps it is old in O H.G. conj salbō-n like O.Ir. -carat 'ament' (§ 930 p 476) Further, *-nt, but not original, in all optatives, as O H.G s-ī-n bār-ī-n, which are to be compared with Lat. s-i-nt instead of s-i-ent (it is hardly likely that sīn is for *s-i-inp = Idg. *s-i-int), and O.H.G. berē-n (instead of Idg *bhéroi-nt), which falls in line with Gr pécoi-v (§ 1020. 1. b p. 547). (tothic in the optative shows -na. salbō-na bērei-na bairāi-na, and the -n of Old Swedish must come from -na (cp. Kock, P.-B Beitr xv 244 ff.), while the W.-Germ. -n may possibly have once been followed by a vowel, now lost. This -na displaced -n = Idg. *-nt on the analogy of the 1st plural -ma (§ 1007.2 p. 538). I suggest that in the 1st plural of these forms there were first two parallel suffixes -ma and -m, and that this fact produced -na beside -n; then the fuller form won the day in all persons.

§ 1026. Slavonic1) The variation of (O.Russ.) -nti

¹⁾ In Baltic, the 3rd singular did for 3rd plural too; see § 999 p. 533.

- and (O.Bulg) -nt \ddot{u} (= nt + particle u) ran parallel to that of -tī and -t-ū in the 3rd sing, see § 999 p. 532 f.
- (1) After consonants, -énti-ént and -uti-nt, both running into -etl -e.
- (a) Primary -entr = -etr O C Sl. (Russ.) jad-eti Skr. Secondary -ént in O.Bulg. jad-et-ŭ (but cp below).
- O.C.Sl. (Russ.) dad-eti: Skr. (b) Primary -nti = -etiSecondary -ut in O Bulg. dad-et-ŭ like Skr dád-at-u dád-atı (but cp. below) and perhaps in the -e of s-Aorists, as O.C.Sl. daše (§ 1017, 1, b p. 543 f.
 - (2) After sonants, -nti and -nt

Primary -ntr. OCSI (Russ) imati beside 3rd sing. ima-ti. beratī satī znajatī

Secondary -nt. Aor. O C.Sl. nesq, injunct. bq for *hhy-o-nt (§ 523 p. 87), bada (§ 909 p. 458) With the particle u, O.Bulg imatŭ beratŭ satŭ znaratŭ

On smrideti -etu for *-inti *-int-u, see § 637 Rem. p. 176. If in proethnic Slavonic the mi-presents had -nti, the rest -ntŭ (jadeti - beratŭ), and if levelling took place in different directions in the several dialects (cp. § 999 p. 534 on -ti and -ti in the 3rd singular), O.Bulg. jadetŭ could not be brought in

1ST PERSON DUAL.

evidence for Idg. -ént (1. a), nor O.Bulg. dadetű for Idg. -nt (1. b)

- § 1027. Proethnic Indo-Germanic. The suffix began with u- and shows in its ending some kinship with the 1-t plural suffixes beginning with m-. It can only be traced in Aryan, Germanic, and Balto-Slavonic.
- (1) Primary forms -ues -ues and -uest -uest. Skr s-vás bhárā-vas, Avest. Gath. us-vahī (3rd sing. vaš-tī 'wishes'). Also doubtless Goth. bairos salbos, cp. § 1029.
- (2) Secondary or Perfect forms -ue -ue. Skr. á-bharā-va Goth. opt. bairán-va; perf bēru for *bēru-u(i) or -u(a), possibly for *ber-um or -um with a form of suffix that makes a parallel to -nme -nmo (= Goth. -um?); cp. § 1001 p. 535. Lith. pret. sùko-va refl. -vo-s, O.C.Sl. aor. vezo-vê (but cp. § 1030)."

* § 1028. Aryan. In Sanskrit only -vas and -va, in Avestic only -vahī and -va are found. That Sanskrit has no -vas, Avestic no -vō, may be considered an accident. For examples see § 1027; I add Avest. injunct. jvāva i. e. jīvā-va from Ar. jīv- 'to live' (Bartholomae Handb. § 91 a Anm. 4, p. 40).

§ 1029. Germanic.

The primary form appears to occur in Goth. bairōs (3rd sing. bairī-p) salbōs (3rd sing. salbō-p), cp. 1st pl. O.H.G. -mēs. salbōs perhaps for *sulbō-us (cp. Streitberg, Die germ. Compar. auf -ōz-,* p. 9 as against I § 181 Rem. p 159). Instead of bairōs we should expect *bairāus To assume an Idg. ground-form *berōues on the strength of Goth. bairōs, as Streitberg does (Zur germ. Spr., 108) seems to me to be open to criticism.

Secondary forms. Opt. Goth bairái-va like 1st pl. bairái--ma. Perf. bēru see § 1027; similarly Norse Run. waritu for *writ-u 'we both scratched, or wrote'

A neat conjecture is that of van Helten (P.-B Beitr. XV 472), who sees a 1st dual injunct. agrist in O.Sax wita come along, very well' orig 'tendamus', for *wita-w- Compare 1st pl. A.S. wuton 'come along' § 532 p. 94.

§ 1030. Balto-Slavonic

Lith. $\tilde{e}s$ -va $s\tilde{u}ka$ -va reflex $s\tilde{u}ka$ -vo-s, cp. 2^{nd} dual $s\tilde{u}ka$ -ta $s\tilde{u}ka$ -to-s. $-v\bar{o}$ is a secondary ending like -me (-me-s -me) in the 1^{nt} pfural. But $-v\bar{o}$ is doubtless not = Idg *- $u\bar{o}$ (for which we ought rather to have $-v\tilde{u}$), but a transformation of the ldg. secondary endings on the analogy of the 2^{nd} dual (cp. Slav. -va below).

O.C.SI. -vē. jes-vē veze-vē aor vezo-vē opt. vezē-vē As representing Idg. *-vē we expect -vi (cp. mati 'mother' I § 76 p. 66). There seems therefore to have been an imitation of vē we two' (cp. § 1008 p. 539 on 1st pl. -my). The ending -va, rare in O.C.SI, more common in Mod.Slov. and Czech, I prefer to regard as an imitation of -ta (2nd dual) than as representing Idg. *-vē (cp. above Lith -va). In Mod.Slovenian, which has -vē and -va both, a difference of gender has developed between them, because it so happened that there were feminine words

like rącė (III § 286 p. 194) and masculines like vlūka (III § 285 p. 193), and vė and va were grouped accordingly (cp. what is said of -tė in § 1036).

2'D PERSON DUAL.

- § 1031. Proethnic Indo-Germanic.
- (1) Primary ending something like *-thes *-thos; observe that the aspirate rests on the authority of Aryan only; the same is true of the 2nd plural (§ 1009 p 540). Skr. s-thás bhára-thas. Lat. es-tis agi-tis (cp. § 1034). Goth. baīra-ts (cp. § 1035).
 - (2) Secondary or Perfect forms.
- (a) -ta. Lith. pret. sùko-ta reflex. -to-s, O.C.Sl. aor. veze-ta. And, no doubt, Umbr. futu-to 'estote' (§ 1034).
 - (b) -tom (also -tem?) Skr á-bhara-tam. Gr. έ-φέρε-τον
- § 1032. Aryan. Skr. primary -thas: s-thás bhára-thas; secondary -tam: ås-tam u-bhara-tam. The Avestic forms in -pō and -tem, which answer to these, are used for the 3rd dual.

On Skr. -athur in the Perfect, see § 1038.

§ 1038 Greek. The secondary ending -rov drove out the primary in prehistoric times (cp. the levelling out of all but - μ er in the 1st plural, § 1004 p. 537) pret $\vec{\eta}\sigma$ -rov $\vec{\epsilon}$ - φ é ϕ ε-rov, pres. $\vec{\epsilon}\sigma$ -ròv φ é φ ε-rov.

A consequence of the use of $-\tau o \nu$ for both 2^{nd} and 3^{rd} dual in primary tenses was that the same was done in historic tenses, where $-\tau o \nu$ belonged properly to the 2^{nd} dual and $-\tau \bar{\alpha} \nu$ (Ion.-Att $-\tau \eta \nu$) to the third Thus we get $\epsilon \varphi \epsilon \psi \epsilon \tau o \nu$ for both persons, and by similar reasoning $\epsilon \varphi \epsilon \epsilon \tau \eta \nu$ for both also.

§ 1034. Italic. Lat. es-tis agi-tis agē-bātis sī-tis are probably dual forms, see § 1013 p. 541.

The secondary ending -ta may have taken plural use in Umbrian forms like futu-to 'estote', for which see § 967 p. 509, and § 1040

§ 1035. Germanic. The primary ending is represented by Goth. -ts, which at the same time acted as secondary:

balira-ts (-a- instead of -i-, cp. O.H.G. 2nd pl. bera-t § 1015 p. 542) perf. bēru-ts opt. vilei-ts. On the -t of -ts — for which *-ps would be expected — see I p. 406 footnote 1, Kluge in Paul's Grundr. I 324 (§ 10. 1. b), and Johansson Kuhn's Zeitschr. xxx 554 f.

The O.H.G. 2nd pl. bere-t 'fertis', which cannot be explained as being for Idg. *bere-t(h)e, may be a dual form. As far as sound-laws go, it may be compared with any of these three, Skr. bhára-thas bhára-tam or O.C.Sl. bere-ta, see § 1015 p. 542.

\$ 1036. Balto-Slavonic.

Lithuanian has the secondary ending -ta (reflexive -tō-s) = Idg. -tā as its only form. sùko-ta, sùka-ta (instead of *suke-ta, see § 999 2 p 533), ēs-ta

So also Slavonic aor veze-ta opt. vezè-ta pres. veze-ta jes-ta. A few instances of -tě are found, as also in the 3^{rd} dual, probably in imitation of -vě in the 1^{st} dual, so by reverse attraction -va is found instead of -vě (§ 1030 p. 555). -tě in the 2^{nd} and 3^{rd} dual is used where the subject is feminine, as we saw in the case of -vě (loc. cit)

3RD PERSON DUAL

§ 1037. Proethnic Indo-Germanic. This person is only preserved in Aryan, Greek, and Slavonic (as regards Lithuanian see § 999 p. 532 f), which makes it difficult to determine what suffixes were used in the parent language. The only thing certain is that -tām is nothing but secondary: Skr. ās-tām Gr. ησ-την.

§ 1038. Aryan

Primary ending pr. Ar -tas Skr bhára-tas Avest. bara-tō. Avest. yūndya-pō 'they both fight' shows the 2nd dual ending.

Secondary, pr Ar. -tām. Skr. á-bhara-tām. In Avestic always -tem, the ending of the 2nd dual, as ān-tem 'they both went', just as in Greek we see -tor in place of -tār (§ 1039).

In the Perfect pr Ar. -a/gr, Ski -átur Avest. -atar^e: Skr. ca-kr-átur sēd-átur da-d-átur, Avest. yaet-atar^e (from yat- to stretch, strive to reach), beside this Gath. vaocatar^e (from vac-

'to speak'), where a, we may conjecture, comes from the middle suffix -āntē (maman-aitē). The r-ending is undoubtedly borrowed from the 3rd pl. in -r (Skr. -ur Avest. -ar', § 1077), and the Skr. -áthur of the 2nd du., e. g. cakr-áthur, is due to the use of both -thas and -tas (cp. O.C Sl. pri-jetū as 2nd and 3rd Person § 830 p 367). The a of -atur appears to be that of the 3rd sing. and 2nd plural perfect.

§ 1039. Greek. Primary -τον. ἐσ-τον φέρε-τον. Secondary -ταν and τον: ἤσ-την ἐ-φερέ-την and ἦσ-τον ἐ-φέρε-τον. Cp § 1033 p. 556

§ 1040. Slavonic -te and -ta are variants without any distinction O.C.Sl. pres. and aor. veze-te and -ta, opt. vezë-te and -ta -te may be derived from *-tes, cp. Skr. -tas. Whether -ta originally belonged to the 3rd dual or was the ending of the 2rd dual is not clear. Perhaps -ta must be identified with Umbr. -ta in etu-ta 'eunto', see § 967 p. 508. As regards a third form -te (used with a fem. subject), see § 1036 p. 557

MIDDLE ENDINGS.

1st PERSON SINGULAR,

- § 1041. Proethnic Indo-Germanic
- (1) Primary endings there appear to be two:
- (a) -max or -məx in unthematic stems: Gr. 'ί-στα-μαι δί-δο-μαι, Lith. reflex. vel-me-s(i) Pruss as-mai 'sum'.
- (b) $-\bar{o}_k$ in thematic stems (vgl. $-\bar{o}$ in the active). Skr. thematic Conjunct. $k_{\bar{i}}$ -náv- \bar{a} r (3rd sing. $k_{\bar{i}}$ -náv-a- $t\bar{e}$). Norse Run haite O.Icel. heite 'I bid, call'. The same ending in the long-vowel Conj.: Skr. bhárāi (cp. § 918 Rem. p. 466).
 - (2) The Secondary endings are quite obscure:
- - (b) Thematic Stems. Skr. ά-bhar-ē. (fr. έ-φερό-μην.
 - (3) -az or -az in the Perfect, is doubtless connected with

the -a of Skr. dvišty-a and the -i = -s of Skr. a-dviš-i (cp. § 1054.3). Skr. tutud-é. Lat. tutud-ī. O.C.Sl. věd-ě. § 1042. Aryan.

(1) Primary ending. The -āi of the thematic Conj. is old · Skr. mán-āi Avest. Gath. mēn-āi beside indic. Skr. ά-ma-ta, s-Aor. Skr. ma-s-āi Avest. Gath. mēngh-āi beside indic. Skr. ά-ma-ta, Skr. kṛ-náv-āi beside indic. kṛ-nu-tē. Also -āi in the long-vowel Conj. Skr. bhárāi Avest. barāi. So there was once indic pres. *bharāi (cp active indic. Avest ufyā Gr. φέρω like conj. Avest anhā Gr. έω Lat. erō and conj. Skr. árcā Gr. φέρω § 976. 2 p 517), which was exchanged even in pr. Aryan for *bharāi = Skr. bhárē Avest barē following the -ai of the unthematic Indicative, and the analogy of -sai -tai etc., for the purpose, I would suggest. of distinguishing the conj. and indic moods.

Instead of $-\bar{a}\iota$ in the conj Avestic has sometimes $-\bar{a}n\bar{e}$, a new formation based upon the active $-\bar{a}n\iota$ and its termination imitating the middle -t as compared with act. $-t\iota$ etc., e. g $var^e\bar{s}\bar{a}n\bar{e}$ beside $3^{rd}\sin g$. $var^e\bar{s}-a-\iota t\bar{e}$ (s-aorist of varz- 'to work'), $yaz\bar{a}n\bar{e}$ (beside $yaz\bar{a}\iota$) with $3^{rd}\sin g$. $yaz\bar{a}-\iota t\bar{e}$ (from yaz- 'to offer').

Aryan $-a_{\bar{i}}$ in the non-thematic indic present. Skr. bruv-é Avest. mruyē i e mruv-ē beside 3^{rd} sing. $br\bar{u}$ -té $mr\bar{u}$ -itē, Skr. duh-é, Avest γn -ē (\sqrt{ghen} - 'strike, slay') This $-a_{\bar{i}}$ I regard as borrowed from the perfect in place of orig *-ma_{\beta} (vice versa we have in Greek perf $\delta \dot{c} \dot{\delta} o$ -uu following pres. $\delta \dot{c} \dot{\delta} o$ - $\mu a \dot{c} a$), just as in the 3^{rd} sing. Skr. $-\bar{e}$ (§ 1055), and in the 3^{rd} pl Skr $-r\bar{e}$ (§ 1078. 1), came from the perfect to the non-thematic present.

(2) Secondary ending. Thematic Skr. á-bharē Avest. a-barē O.Pers. a-takšary (from takš- 'to shape, make all right').

Unthematic In the Indicative Ar. -i for -2. Skr. á-duh-i á-kr-i, Avest (fath. a0j-ī (from a0j- to speak), s-a0rist Skr. á-ruts-i, O Pers. a-darš-iy (from dar- to hold). But in the Optative Ar -a. Skr. tanvīy-á Avest tanuya 1. e tanviy-a from tan- to stretch (§ 940 p 485), Skr. bhárēy-a Avest. Gath.

vāuray-ā (from var- 'to choose'), Avest mainya for *manyay-a (I § 643 p 482) = Skr. mányēy-a.

- (3) Pr. Ar -az in the perfect Skr. šu-šruv-č Avest. susruyē i. e. su-sruv-ē from \sqrt{kleu} 'hear'.
- § 1048 Greek. Primary -μαι; on the analogy of δίδο--μαι ἄρνν-μαι we get φέρο-μαι φέρω-μαι and perfect δέδο-μαι rέτνγ-μαι, etc

Secondary (Dor.) -μαν ἐδιδό-μην ἐδεικνί-μην ἐξειξάμι,ν τετύγ-μην τιθεί-μην φεροί-μην.

- § 1044. Italic. Only the perfect Idg -a or -o remains, but it loses its middle meaning. Lat. tutud-ī: Skr. tutud-ē, ded-ī: Skr. dad-ē (§ 867 p 414) Perhaps we should explain revertī beside revertor, ussēnsī beside assentior as due to the originally middle force of -ī.
- § 1045. (fermanic Idg -ōi (§ 1041.1.b) in O.Icel heite heiti 'I bid, call', beside Goth. háita.

Remark. I cannot agree with Jellinek's conjectures in his Beitr. zur Erklärung der germ Flexion, 1891, pp. 70 ff.

In Gothic the 3rd sing háitada does duty for the 1st sing. too, so also A.S. hātte is 3rd and 1st sing., cp. Goth. 3rd and 1st pl. háitanda. On this use of the 3rd person for the 1st see Jellinek in the work just cited, pp. 103 ff.

. § 1046. Balto-Slavonic.

In Baltic Idg. -max or -mox remains. Lith. reflex. velme-s(i) (§ 511 p. 76), Pruss as-mai 'I am' Cp. § 983 p. 522.

The perfect -az or -az occurs in the single form O C.Sl. věd-ě 'I know'.

2ND PERSON SINGULAR.

- § 1047. Proethnic Indo-Germanic.
- (1) Primary ending -saz or -saz. Skr. bhára-sē, Gr. φέρεαι φέρη, Goth baira-za; thematic Conj. Skr. ma-s-a-sē Gr. βιή-σ--ε-αι (Theogn.), long-vowel Conj. Skr. bhár-ā-sē Gr. φέρηαι φέρη Skr. da-t-sé dha-t-sé, Gr. δί-δο-σαι τί-θε-σαι, Lith. důsi dese-s O.C Sl. dasi

The same ending in the Perfect: Skr. da-di-šέ ri-rik-šέ, Gr. δέ-δο-σαι λέ-λειψαι.

- (2) Secondary endings -so and -thēs, the latter connected with perf. act. -tha (§ 984.3 p. 523), and recalling Gr. -μαν (§ 1041.2 p. 528). Originally it would seem that -so belonged only to thematic and -thēs only to unthematic stems.
- (a) -so. Avest. bara-reha, Gr. φέρεο φέρου ἐ-φέρου ἐ-φέρου,
 Lat. sequere. Possibly also Idg. -se, see § 1082. 1.
- (b) -thēs. Skr. \acute{a} -di-thās, Gr. $\acute{\epsilon}$ -d \acute{o} - $\vartheta\eta\varsigma$. s-Aor. Skr. \acute{a} -śramiš-thās from śram- 'to grow tired' Gr. $\acute{\epsilon}$ - $\tau \varrho \varepsilon \mu \acute{a} \sigma \vartheta \eta_{\varsigma}$ from $\eta \varrho \acute{\epsilon} \mu \alpha \mu \alpha \iota$ 'I hang'. O.Ir cluin-te 'exaudi'.
- § 1048. Aryan On -suu in the imperative see § 968 p. 510.
- (1) Primary ending, pr Ar. -saz. Skr. bhára-sē Avest. bara-vhē. Conj. Skr prchā-sē Avest per sā-vhē, on -sā in the Skr. conjunctive, see § 922 p. 470 Skr brū-šē kr-nu-šē, Avest. raosē beside 3rd sing injunct Gath. raostā (from rud-'to grow'). Perfect Skr. dadi-šē
- (2) In the Secondary endings Sanskrit and Avestic do not go together; the former has only pr. Ar. -thās, the latter only pr. Ar. -sa. Skr. á-kṛ-thās á-dhat-thās á-dhūnu-thās janiš-ṭhās, opt. vāvṛdhī-thás bhárē-thās, pret. á-bhara-thās. Avest. a-yasa-nha (cp. Skr. á-yacha-thās), Gathic aoyžā beside 3rd sing. azg'dā, (I § 482 p 356), då-nhā (but Skr. á-dhi-thās), opt. daiāt-ša baraṣ-ša (but Skr dadhī-thās bhárē-thās)

§ 1049. Greek.

- (1) Primary ending -σαι ἦσαι 'thou sittest' for *ἦσ-σαι (§ 494 p. 54), δίδο-σαι δάμ-να-σαι φέρεαι φέρη, 1) conj. φέρηαι φέρη. Perf. γέγραψαι δέδο-σαι μέμνη-σαι. That the 2nd sing. imper. of the s-Aorist, as λέξαι, comes in here, we saw in § 910 Rem. p. 460, § 969.2 p. 511.
- (2) Of the two secondary endings, $-\vartheta\eta\varsigma$ holds its ground in the Present of Classes I and X and in the s-Aorist, as $\dot{\epsilon}$ - $\dot{\delta}$ 0'- $\vartheta\eta\varsigma$ = Skr \dot{a} -di- $th\bar{a}s$ (3rd sing. ϵ - δ 0- τ 0 = Skr. \dot{a} -di-ta) $\dot{\epsilon}$ - $\pi\tau\dot{a}$ - $\vartheta\eta\varsigma$ = Skr. \dot{a} - $k\ddot{\varsigma}a$ - $th\bar{a}s$ (3rd sing $\dot{\epsilon}$ - $\pi\tau a$ - τ 0 = Skr. \dot{a} - $k\ddot{\varsigma}a$ -ta), $\dot{\epsilon}$ - $\beta\lambda\dot{\eta}$ - $\vartheta\eta\varsigma$

^{1).}On the supposed middle forms in -et, see Meisterhans Gramm. d. att. Inschr. 2 131, the Author, Gr. Gr. 2 p. 147.

Brugmann. Elements IV 36

(3rd sing $\ddot{\epsilon}$ - $\beta\lambda\eta$ - τo), $\dot{\epsilon}$ - $\mu\epsilon\dot{\iota}\chi\vartheta\eta_S$ (3rd sing. $\ddot{\epsilon}$ - $\mu\epsilon\iota \iota \iota \tau o$ for * $\dot{\epsilon}$ - $\mu\epsilon\iota \iota \iota \tau o$ - τo . On these forms is founded the whole "Weak" passive aorist $\dot{\epsilon}$ - $\delta\delta\vartheta\eta$ - ν etc. See § 589 pp. 130 f.

The σ of $-\sigma a_i$ and $-\sigma o$ of course dropt in pr. Greek after vowels (I § 564 p. 420 f) In Attic on the analogy of forms such as $\gamma \acute{e}\gamma \rho \alpha \psi \alpha i \acute{e}\gamma \acute{e}\gamma \rho \alpha \psi o$, the σ was restored in the perfect, pluperfect, and unthematic present and imperfect, with a very few exceptions of which one is $\acute{e}\delta\acute{o}\nu a_i$ $\acute{o}\delta\acute{o}\sigma a_i$ $\acute{o}\delta\acute{o}\sigma a_i$ $\acute{o}\delta\acute{o}\sigma a_i$ etc. Homer has still the unrestored forms, $\beta\acute{e}\beta\lambda\eta a_i$ plpf. $\acute{e}\sigma a_i$ $\acute{o}\delta\acute{o}\gamma a_i$ $\acute{e}\mu\acute{a}\rho\nu a_i$ imper. $\pi a_i \rho -i\sigma \tau a_i \sigma$, side by side with $\delta\acute{v}\nu a_i \sigma a_i$ $\pi a_i \rho -i\sigma \tau a_i \sigma a_i$ imper. $\eta \sigma \tau a_i \sigma o$. The aorist everywhere kept clear of this tendency: Att. $\acute{e}\delta \sigma o i$ $\acute{e}\delta\acute{e}\delta \delta o$.

In later times, the vulgar dialect used $-\sigma \omega$ with thematic stems as well, e. g. in the N.Test. $\pi i \epsilon \sigma \omega$.

§ 1050. Italic Latin keeps -so in the form -re (I § 81 p. 73): — seque-re Gr επε-ο, rē-re vidē-re fābulā-re, conj sequā-re.

Side by side with -re there is a variant -ris, found everywhere except in the imperative; e.g sequeris. The reason for this formation, which is analogical, is that agis and age were associated as being both second person. In the older language, -re is still commoner than the other.

As regards sequere sequeris the student may further compare the remarks in § 1082 on Osc. vincter.

Inscriptions also have -rus, as spatiarus ūtārus. I offer the following conjecture as to this ending. We may suppose that at the time when *spatia-so was the form, a suffix *-so-r arose answering to *-to-r -tur in the 3rd singular,1) and that

^{1) *-}so-r *-run beside *-so -re like O.Ir -the-r beside -the (§ 1051)

*-rur changed to -rus following -ris. This I think more probable than supposing that -ris changed to -rus on the analogy of -ur and -tur. Compare further p. 577 footnote.

§ 1051. Keltic. Irish retains Idg. -thēs.

-the for *-thēs in the injunctive with imperative function, as cluin-te 'exaudi'; this is found almost exclusively with verbs which are altogether or mostly deponent in flexion. See § 909 p. 458.

-ther, made up of -the + the deponent suffix -r, appears in the conjugation of deponents, e. g. pres indic. -sechther 'sequeris' conj. -sechther 'sequeris'. In the s-aorist *-s-thēs became -sse. and with -r -sser; as ro-sudigser from sudigin 'pono', like Skr. janiš-thās

§ 1052. Germanic Here only -sai can be traced, Goth. -za (cp. III § 263 Rem. p. 165 f., Hirt, Idg Forsch. i 217) salbō-za cp. Gr. perf τε-τίμη-σαι Lat. injunct. pres. amō-re; baira-za (a as the thematic vowel, as in 3rd sing. baira-da, comes from the plural bairanda in all probability): cp. Gr. φέφε-αι.

The ending -zau in opt. bairái-zau is, like -dau in the 3rd sing. and -ndau in 3rd plural, obscure. Compare imper. ***stejgadau liugandau, § 970 p. 511

§ 1953. Balto-Slavonic. Here also the only suffix is -sai, with active meaning.

In Lithuanian. it occurs with unthematic verbs, as desë(-s) for *det-sė. Skr. dhatsé, Piuss. seggē-sai 'thou doest'. See § 991 p. 528.

In Old Church Slavonic, also with verbs in -mi, as dasi givest for *dō-t-sai: Skr. datsē. See ibid.

3RD PERSON SINGULAR.

§ 1054. Proethnic Indo-Germanic.

(1) Primary ending -tal oi -tol Skr. άs-tē Gr. ήσ-ται. Skr. γ-ņu-té Gr. οὐρ-νν-ται. Gr ἀη-ται Lesb. ποίη-ται τίμα-ται 'Goth'. salbō-da. Skr. bhára-tē Gr. φέφε-ται Goth. baíra-da.

Thematic Conjunct. Skr kar-a-tē mā-s-a-tē Gr. φθί-ε-ται αμείνυ-ε-ται. Long-vowel Conjunct. Skr. manyā-tē Gr. μαίνη-ται.

(2) Secondary ending -to. Skr ά-di-ta Gr. ἔ-δο-το Latda-tu-r Skr ά-stō-š-ţa Gr. ἔμεικτο for *ἐ-μεικ-σ-το. Opt. Skr. dadhī-tá Gr. τιθεῖ-το Lat. duī-tu-r, Skr. bhárē-ta Gr. φέροι-το. Skr. ά-bhara-ta Gr ἐ-φέρε-το Lat. agı-tu-r. Conj. Lat. ferā-tu-r O.Ir. do-berthar.

-to also in Venetian: zo-to 'εδοτο', zonas-to 'εδωρήσατο, donavit'. See p. 53 footnote 2. In Armenian Bugge (Idg. Forsch. 1 440) sees -to in the -v of the 3rd sing. Formation. If mid., as cnav 'natus est' for *gena-to, cp. 3rd pl. cna-n § 1066. I also conjecture -to in such forms as Lith. rìms-ta, see footnote to p. 216.

On the strength of Osc. -ter beside Lat. -tur = -to+r, e. g vincter 'vincitur', we should perhaps assume another Idq. form -te beside -to (and similarly in the 3^{rd} pl. -nte beside -nto), see § 1082

(3) -az or -ez in the Perfect Skr. ca-kr-é da-dh-é

In § 1041 3 p 560 I said that $-\bar{e}$ in Skr. 1st sing di- $dvi\bar{ş}$ - \bar{e} is doubtless connected with $-\imath = -\vartheta$ in the 1st sing. d- $dvi\bar{s}$ - \imath . If so, we must connect $-\bar{e}$ in 3rd sing. $didvi\bar{ş}$ - \acute{e} with $-\imath$ in 3rd sing. aor. mid pass., as al. \acute{a} - $v\bar{a}c$ - \imath ; all the more because the root-vowel so strikingly recals the Skr. 3rd sing. perf. act (u- $v\bar{a}c$ -a) Compare § 905 p 453.

- § 1055. Aryan As regards -ām and -tām in the Imperative, see § 968 2 p 510.
- (1) Primary ending Ar. -taz. Skr vás-tē Avest. vas-tē (from vas- 'to clothe oneself'), Skr. dhatté Avest. Gath. dazdē (I § 482 Rem. 1 p 356). Skr. bhára-tē Avest. baratē O Pers. ganba-taiy 'is called'. Conj. Skr. yam-a-tē Avest yamatē (from yam- 'cohibere'), Skr. yáy-ā-tē Avest. yazātē O.Pers gaubā-taiy, on -tāi in the Skr. Conj. see § 922 p. 470.
- (2) Secondary ending Ar. -ta. Skr. ά-brā-ta Avest. Gath. mrū-tā, Skr. ά-hu-ta O.Pers. α-μα-tā. s-Aor Skr. ά-praṣta Avest. Gath fraṣtā from √prek- (§ 814 p. 352). Skr. ά-bhara-ta Avest. baru-ta O Pers. α-naya-tā 'was *led'.

- Opt. ai. bruvī-tá Avest. Gath. mrvī-tā Skr. dadhī-tá Avest. daipī-ta, Skr. bhárē-ta Avest. barae-ta.
- (3) Perfect Ar. $-a\dot{i}$. Skr. $da-dhr-\dot{e}$ Avest. Gath. $da-dr-\bar{e}$, Skr. $da-dh-\dot{e}$ Avest. $daid-\bar{e}$. The -i of Skr. $\acute{a}-v\vec{a}c-i$ Avest. Gath. $a-v\vec{a}c-\bar{i}$ may be regarded as in some degree the secondary ending of this $-a\dot{e}$, see § 1054. 3.

It is not uncommon to find Ar. -tai and -ai interchanging, in consequence of the close connexion between Present and Perfect. Thus on the one hand we have Skr iš-tē instead of iš-ē (Avest. 1s-ē, Goth. act. áih, § 848.1 p. 391).1) On the other hand, Skr. bruv-ē Avest. mruyē 1. e mruvē instead of mrū-tē mrūtē, Ski šṛnv-ē instead of šṛnu-tē. There is the same confusion in the 3rd pl (§ 1078.1). Compare also act. nō-nav-a beside nō-navī-ti § 850 p. 398 There is nothing to prevent forms like Skr bruv-ē from being called an unreduplicated perfect

- § 1056. Greek. On the imper. -σθω see § 966 p. 506 f
- (1) Primary ending -ται (Boeot. -τη Thess. -τει I § 96 p. 90). ἴστα-ται φέρε-ται, conj ἀμείψε-ται φέρη-ται. Arcad. -τοι instead of -ται, but (notwithstanding O. Hoffmann, Die griech. Dial i 180 f) this comes from the analogy of -το
- Even in pr Greek perf. δέδο-ται πέπυσται following the present (cp. Skr. ίξ-ţē ınstead of ίξ-ē § 1055.3), just as δέδο-μαι follows δίδο-μαι (§ 1043 p. 560).
- (2) Secondary ending -το (Cypr. -τυ I § 80 p. 71)· ΐστα-το ε-φέρε-το, opt. τιθεῖ-το φέροι-το.
- § 1057. Italic. Here we have -to with -r. Lat. $d\alpha$ -tu-r. Gr. $\delta \acute{o}$ -ro. sequi-tu-r. Gr. $\epsilon \pi \epsilon$ -ro. As to Osc. -ter see § 1054 2 p. 564, § 1082.
 - § 1058.2) Keltic. Probably only -to First in the 3rd sing, of the t-preterite, as O Ir as-bert

¹⁾ Compare the change of Upper-Germ er weiss to er weisst and of O.Fris. āch 'he has' (= got áih) to ācht.

²⁾ Whoever assumes with Zimmer that the 3rd pl act berit represents both *beronti and mid *berontaz (see § 1024 p 552) may also regard 3rd sing, sechidar and 3rd pl, sechitar as representing -taz+r and -ntaz+r.

dixit', which is followed by 1st sing. -burt etc. after -t became part of the stem; see § 506 pp 72 f.

Next, in the middle ending -thar for -to+r, as conj. doberthar: Lat. ferā-tur.

§ 1059. Germanic. Only -tay remains. Goth háita-da AS. hatte for *hazta-daz, Goth. salbo-da. See § 1045 p. 560. -a- is the thematic vowel, as in the 2nd sing. háita-za § 1052 p. 563.

The ending -dau in Goth. opt bairái-dau (also used as 1st sing.) is obscure. Compare bairái-zau, loc. cit.

1ST PERSON PLURAL.

§ 1060. Proethnic Indo-Germanic. We may suppose that -medhai or -medhai = Skr. -mahē is the Primary, and $medh\theta = Skr - mah\epsilon Gr. - \mu \epsilon \theta \alpha$ the Secondary ending, e. g pres Skr. bhárā-mahē pret. Skr á-bharā-mahi Gr. έ-φερό-μεθα. Compare § 973 p. 515 f.

Goth. bairanda is doubtless 3rd pl. and not for *bira-mda *-midai (§ 1071).

As to -mmedhaz (Avest. hisc-amaide), answering to act. -mmes, see § 1001 p. 535 f.

§ 1061 Aryan. Skr -mahē -mah with h = dh is to be explained like the imper ending -hi beside -dhi, see § 960 p. 503.

(1) Primary ending Skr. -mahē Avest. -maidē. Skr bhúrā--mahē Avest barā-maiðē Conj. Skr. sanišā-mahē Avest. cinapa-maide (beside cinas-ti 'he teaches' § 626 p. 163), ou Skr. conj forms like yájāmahāi see § 922 p. 470.

The same ending in the Perfect Skr. mumuc-mahe.

(2) Secondary ending Skr. -mahr Avest. Gath. -maidī. Skr. á-yuy-mahi, s-Aor. Skr. á-ga-s-mahi (from gam- 'to go') Avest a-mehmaidi (from man- 'to think', § 815 p 353). Opt. Skr. bhárē-mahı Avest. barōi-maidī.

In late Avestic -maide is also used as secondary (just the opposite in Greek, § 1062), e. g. opt. barōi-maidē.

§ 1062. Greek. Only -μεθα, the secondary ending, is kept, and used for both primary and perfect suffix as well as secondary. ὀρ-νύ-μεθα φερό-μεθα, ἐ-φερό-μεθα, φεροί-μεθα, perf. πεπύσμεθα.

Homer. $-\mu\varepsilon\sigma\vartheta u$ with σ by analogy of $-\sigma\vartheta\varepsilon$ $-\sigma\vartheta o\nu$ $-\sigma\vartheta \eta\nu$.

Remark V. Henry (Mém Soc. Ling. VI 73 f.) thinks that Greek once had in the active $\varphi \acute{e} \varrho o u \varepsilon$, * $\mathring{e} \varphi e \varrho o u \varepsilon$, and at this period the type $\varphi \epsilon \varrho \acute{e} \mu \varepsilon \sigma - \vartheta a$ was produced on the analogy of $\mathring{e} \varphi \acute{e} \varrho o u \varepsilon - \vartheta a$; after that $-u \varepsilon \sigma \vartheta a$ was employed as secondary as well as primary

Acol $-\mu\varepsilon\vartheta\varepsilon\nu$, only known through the grammarians, appears to be modelled upon $-\mu\varepsilon\nu$ ($-\mu\varepsilon\vartheta\varepsilon\nu$. $-\mu\varepsilon\nu = -\sigma\vartheta\varepsilon$: $-\tau\varepsilon$). Compare $3^{\rm rd}$ pl Thess $-\nu\vartheta\varepsilon\iota-\nu$ § 1068.

2ND PERSON PLURAL

§ 1063 Proethnic Indo-Germanic. All that can be fairly inferred from Ar. -dhuai (primary) -dhuam (secondary) and Gr $-\sigma\theta\varepsilon$ (both) is that the original ending contained dh. It is phonetically possible to derive Gr. $-\sigma\theta\varepsilon$ from *- $\sigma\theta\varepsilon$. The original ending of the suffix may perhaps be that shewn by Aryan It is possible that Gr. $-\sigma\theta\sigma\nu$ was orig 2^{nd} plural $(-\sigma\theta\sigma\nu = Skr.$ -dhvam), and turned into a dual because of the dual meaning of $\phi\varepsilon$ for $\sigma\theta$ was made for the plural to match $-\tau\varepsilon$.

Remark. The σ of $-\sigma \vartheta_t$ is the most obscure part of this suffix. Three explanations are possible

- (1) The suffix originally began with -zdh-, which became Gr $-\sigma\theta$ -In Aryan z dropt between consonants, and the type thus produced became general
- (2) It orig. began with -dh. Then Gr. $\eta\sigma \vartheta\varepsilon$ nenvo- $\vartheta\varepsilon$ come straight from it. In mentally analysing these forms, σ was conceived to be part of the suffix, whence $\varphi\varepsilon e^{-\sigma\vartheta\varepsilon}$ etc. On this supposition it remains doubtful whether such forms as $\varepsilon\sigma\pi\alpha\varrho\vartheta\varepsilon$ $\varepsilon\sigma\tau\alpha\vartheta\varepsilon$ $\pi\varepsilon\varphi\upsilon \lambda\alpha\chi\vartheta\varepsilon$ still have the orig suffix, without the intrusive σ , or whether they once had σ and it disappeared as it regularly would.
- (3) There was a double suffix, with initial -zdh- or -dh-, and each of the two types was preferred by certain languages

Compare Bartholomae, Rhein Mus. xLv 153.

- § 1064. Aryan ()n Skr. -dhvād imper., see § 965 p. 506.
- (1) Primary ending Ar. -dhuai -dhuai: Skr. -dhvē, also -dhuvē in Vedic, Avest. -duyē i. e. -duvē. Skr. ang-dhvē

(from anák-ti 'he smears, anoints') Avest. Gath. mer'ng'-duyē (from marc- 'to destroy', § 626 p 162) Conjunctive Skr. kāmáyā-dhvē; as regards -dhvāi in the conj., see § 922 p 470.

The same ending in the Perfect bubudhi-dhvé.

- (2) Secondary ending. Ar. -dhyam -dhuyam: Skr. -dhvam, also -dhuvam in Vedic, Avest. -duem -dūm (I § 159 p. 142) Skr á-bhara-dhvam Avest bara-dwem. Avest. s-aorist Gath prā-z-dūm from trā- 'to push through' (§ 813 p. 351).
- § 1065 Greek. Always - $\sigma\vartheta\varepsilon$, see § 1063. ϕ έ φ ε $\sigma\vartheta\varepsilon$ $\tilde{\eta}\sigma\vartheta\varepsilon$ $\tilde{\varepsilon}$ - ϕ έ $\varphi\varepsilon$ - $\sigma\vartheta\varepsilon$ ϕ έ φ ε φ οι- $\sigma\vartheta\varepsilon$. Perfect πέπνο $\vartheta\varepsilon$.

Perf. $\pi \acute{\epsilon} \varphi \alpha \nu \vartheta_{\epsilon}$ beside $1^{\rm st}$ sing $\pi \acute{\epsilon} \varphi \alpha \sigma \mu \alpha i$ $3^{\rm rd}$ sing. $\pi \acute{\epsilon} \varphi \alpha \nu \tau \alpha i$ is doubtless a transformation of * $\pi \acute{\epsilon} \varphi \alpha \sigma \vartheta_{\epsilon}$ on the lines of $\check{\epsilon} \sigma \pi \alpha \varrho \vartheta_{\epsilon}$ beside $\check{\epsilon} \sigma \pi \alpha \varrho \vartheta \alpha i$, see § 862 p. 411

3RD PERSON PLURAL.

- § 1066 Proethnic Iudo-Germanic.
- (1) After consonants -ntai or -ntag and -nto.
- (a) Primary ending -ntai or -ntoj. Skr ás-atē Gr. Hom. η-ατω, Skr dá-dh-atē pu-n-até ta-nv-até.
- (b) Secondary ending -yto. Skr. ás-ata Gr. Hom. $\tilde{\eta}$ -aro. Skr. á-kr-nv-ata, s-Aor á-dykš-ata. Opt. Gr. γ evol-aro.
 - (2) After sonants -ntal or -ntal and -nto.
- (u) Primary ending -ntal or -ntal Skr. bhára-ntē Gr φέφο-νται Goth baίνα-ndα Thematic Conj. Skr. ma-s-a-ntē Gr. Hom. ἐπ-εντύνο-νται (ἐπ-εντύνω 'I arrange'). Long-vowel Conjunctive Avest hacâ-ntē Gr. ξηω-νται. Gr. δίζη-νται Lesb. ηφο-νόη-νται τίτια-νται Goth. salbō-nda.
- (b) Secondary ending -nto. Skr. á-bhara-nta Gr. έ-φέρο-ντο Lat. feruntu-r O.Ir. do-bertar. Conj. Lat. fera-ntu-r O.Ir. do-bertar. Gr. έμ-πλη-ντο Lat. im-ple-ntu-r planta-ntu-r.

-nto is conjectured by Bugge (Idg. Forsch i 440) in the -n of the Armen 3rd pl. aor. II mid., as cna-n 'nati sunt' for *geno-nto.

On account of Oscan forms of the 3^{rd} plural like karanter pascuntur beside Lat -ntur = -nto + r, we should perhaps

assume an Idg. form -pte -nte beside -pto -nto (similarly in the 3rd sing. -te beside -to), see § 1082.

- (3) Perfect. What connexion there is between the Aryan forms, as Skr. du-duh-ré ja-gm-i-ré, and O.Ir. do-mēn-atar (Gr. τετράφ-αται) is still a riddle. See §§ 1076 ff.
- § 1067. Aryan On the Imperative in -atām -ntām see § 968 p 510
 - (1) After sonants Ar -ataz -ata
- (a) Primary ending -ataz Skr vás-atē, indh-até indh-átē, Avest. merenc-aitē.
- (b) Secondary ending -ata Skr á-gm-ata ú-tanv-ata, Avest Gath $dar^e s$ -atā ($\sqrt{-der \hat{h}}$ -)

In Avestic -attē -ata as a rule gave way to -antē -anta, which mark the plural number better, cp. act. dap-ent as contrasted with Skr. dádh-ati § 1018.1 b p. 545. E. g. ånhantē dadentē verenvantē (Skr. ás-atē dádh-atē vŗnv-átē), mravanta (3rd sing. mrao-tā mrā-ta), opt. barayanta.

As regards O.Pers. ahutā 'erant' it is impossible to say whether it ought to be spelt with a nasal or not (I § 197 Rem p. 166)

- (2) After sonants Ar -ntag -nta
- (2) Primary ending -ntaz. Skr bhára-ntē, Avest bara-ntē. Short-vowel Conjunctive Skr na-s-a-ntē (from nam- 'to bend, bow oneself'), long-vowel Avest yazā-ntē On -ntāz in the Skr. Conjunctive see § 922 p. 470.
- (b) Secondary ending -nta. Skr. á-bhara-nta, Avest yaze-nta O.Pers. a-baratā (read abarantā).
- (3) In the Perfect we have an r-ending, Skr. -rē Avest -rē, see § 1078.1. Observe that in Sanskrit this ending crept into the Present like the -ē of the 3rd sing. (§ 1055.3 p. 565). e. g. duh-rē sunv-i-rē.
- § 1008 Greek On unper. -σθω -σθων -σθωσαν see § 966 p. 506 f.
 - (1) After consonants -arai -aro.
 - (a) Primary ending -αται. Hom. ή-αται for *ήσ-αται,

κέ-αται for $^{\sim}$ /ε_L-αται (variant κείαται with γει- following κεῖ-μαι etc., see I \S 130 p. 117 f.), εἰρύ-αται.

(b) Secondary ending -ato. Hom η' -ato xel-ato elov'-ato. Opt. Hom. and elsewhere yevol-ato $\ell\pi\iota$ -qoassal-ato $\ell\pi\iota$ -stal-ato, whose diphthongs of and at are to be explained like yel-atal (a), $\delta \alpha u r' \alpha \tau o = -v v \iota$ -ato (§ 944 p 487)

-αται -ατο are special favourites in the Perfect system, where they occur even in Attic prose; e. g τετεύχ-αται γεγράφ-αται ε΄-τετάχ-ατο (cp § 898 p. 446).

Instead of * $\tau\iota\vartheta$ - $\alpha\tau\alpha\iota$ * $\delta\iota\delta$ - $\alpha\tau\alpha\iota$ (Skr. $d\acute{\alpha}$ -dh- $at\bar{e}$) we have $\tau\iota'\vartheta$ ϵ - $\nu\tau\alpha\iota$ $\delta\iota\delta\sigma$ - $\nu\tau\alpha\iota$ (2), as act. $\tau\iota'\vartheta$ ϵ - $\nu\tau\iota$ instead of * $\tau\iota\vartheta$ - $\alpha\tau\iota$ (§ 1020 1. b p. 547)

- (2) After sonants -νται -ντο
- (a) Primary ending -νται. φέρο-νται. Conj. φέρω-νται. δίζη-νται Lesb προ-νόη-νται.
- (b) Secondary ending -ντο $\dot{\epsilon}$ -φέρο-ντο. $\pi \lambda \tilde{\eta}$ -ντο $= {}^{\times}\pi \lambda \bar{\alpha} v$ -το pres. $\pi \epsilon \lambda \dot{\alpha} \zeta \omega$, $\epsilon \mu$ - $\pi \lambda \eta$ -ντο from $pl\bar{e}$ 'fill'.

Of the same kind are perf μέμνη-νται δεδούλω-νται ε-μέμνη-ντο.

Wherever a long vowel precedes -via -vio it was previously short, as it should be (I \S 611 p. 461). Compare opt. - $\pi\lambda\tilde{\eta}$ to $\mu\epsilon\mu\nu\eta\mu\eta\nu$ \S 944 p 488 With $\phi\epsilon\rho\omega\nu\tau\omega$ cp. act. $\phi\epsilon\rho\omega\nu\tau\nu$ \S 923 p. 471.

Both -αται -ατο and -νται -ντο overstep their proper boundaries in one or more dialects. In Ionic the former pair are applied to stems in \bar{a} , \bar{c} , or \bar{o} ; as Hom, $\beta \epsilon \beta \lambda \dot{\eta}$ -αται $\beta \epsilon \beta \lambda \dot{\eta}$ -ατοι instead of $\beta \dot{\epsilon} \beta \lambda \dot{\eta}$ -νται $\beta \dot{\epsilon} \beta \lambda \dot{\eta}$ -νται instead of $\beta \dot{\epsilon} \beta \lambda \dot{\eta}$ -νται $\delta \dot{\epsilon} \dot{\theta} \lambda \dot{\eta}$ -νται and τιθέ-αται διδό-αται, cp. act. τιθέ-αται (§ 1021.4 p. 549). On the other hand, -νται -ντο are added to stems in i and i in Attic and elsewhere, sometimes in Ionic itself; e. g. κεῖ-νται εκει-ντο λύ-ντο ἀ;νν-νται (should be *ἀγνν-αται, cp. Skr. asnuv-ατε̄) εἴρν-νιο, opt. γένοι-ντο τιθεῖ-ντο, with which compare 1st sing ερῦ-ν (§ 979 3 p. 520) and opt. 1st sing. φέροι-ν (ibid) and 3rd pl. φεροι-ν (§ 1020.1.b p. 547). Further, ἢνται ἦντο beside ἣαται ῆατο, since ἦμαι ἣμεθα (for *ησ-μαι *ησ-μεθα) were regarded as similar in structure to αν-μαι etc.

Boeotian and Thessalian have ϑ in place of τ in the 3^{rd} plural endings, as Boeot. $\dot{\epsilon}\sigma\tau\rho\sigma\tau_{\epsilon}\nu\dot{\alpha}\vartheta\eta$ (= Ion. $\dot{\epsilon}\sigma\tau\rho\sigma\tau_{\epsilon}\dot{\alpha}\tau\alpha\iota$) $\dot{\epsilon}\beta\dot{\alpha}\lambda\sigma\vartheta$. Thess. $\dot{\epsilon}\gamma\dot{\epsilon}\nu\sigma\vartheta$; and Boeotian has ϑ in the active endings too, $\kappa u\lambda\dot{\epsilon}\sigma\nu\vartheta\iota$ $\delta\dot{\alpha}\dot{\alpha}\nu\vartheta\iota$. It may be suggested that ϑ came in from the middle endings $-\mu\iota\vartheta\alpha$ and $-\sigma\vartheta\iota$, and in Boeotian had spread from the 3^{rd} pl. middle to the 3^{rd} pl. active.

In Thessalian we get $-\nu \vartheta \varepsilon \iota - \nu$ as a primary ending, in which $-\nu$ probably came from the active; cp. § 1062 p. 567 on $-2\mu \varepsilon \vartheta \varepsilon \nu$ Example $\dot{\varepsilon} \varphi \alpha \nu \gamma \varphi \dot{\varepsilon} \nu \vartheta \varepsilon \iota \nu$.

§ 1069 Italic Here we have -nto + -r. Lat feru-ntur ama-ntur, Umbr ema-ntur 'emantur'. On Osc kara-nter see § 1066. 2. b p 568.

§ 1070.') Keltic Here too we have -nto+r, as O.Ir do-bertar 'dantur' Lat feru-ntur Beside this -nto without -r is possibly contained in do-berat 'dant', see § 1024 p. 552.

§ 1071. Germanic. -ntal or -ntal in Goth baira-nda salbō-nda, used for both 1st and 2nd plural (cp. § 1060 p. 566).

An obscure form is -ndau in the opt. bairái-ndau (also used for both 1st and 2nd plural), cp. \$ 1052 p 563.

PERSONS OF THE DUAL MIDDLE

§ 1072. 1st Person. Aryan alone has any special suffix, Skr. prim. -vahē sec. -vahī, which if we judge by -mahē -mahī will be derived from *-uedhaī or *-uedhaī and *-uedha.

E. g. bhárā-vahē opt. bhárē-vahī; on -vahāī in Conjunctive forms like sacāvahāī see § 922 p. 470.

Greek. $-\mu\epsilon\vartheta\sigma r$, only found in rare instances and questionable at that, is doubtless a transformation of $-\mu\epsilon\vartheta\alpha$ made to match the ending of $-\sigma\vartheta\sigma r$.

§ 1073 2nd and, 3rd Person. Here there is hardly anything to do but to present the facts. Aryan alone shows suffixes that can have any claim to be regarded as original.

§ 1074 Aryan. Skr primary 2nd dual -āthē 3rd dual -ātē,

¹⁾ See footnote 2 to § 1058 p. 565, above.

secondary 2^{nd} dual $-\bar{a}th\bar{a}m$ 3^{rd} dual $-\bar{a}tam$ in unthematic stems. Indic. pres. $dvi\bar{s}-\bar{a}th\bar{e}$ $-\bar{a}t\bar{e}$, imperf. $a-dvi\bar{s}-\bar{a}th\bar{a}m$ $a-dvi\bar{s}-\bar{a}t\bar{a}m$ It has the primary endings in the Perfect, $cakr-\bar{a}th\bar{e}$ $-\bar{a}t\bar{e}$ In Avestic the same stems have the secondary 3^{rd} dual $-\bar{a}tem$ = pr. Ar. *- $\bar{a}tam$ $a-srv-\bar{a}tem$ von sru- 'hear'. In Vedic are other secondary endings, $-\bar{t}th\bar{a}m$ $-\bar{t}t\bar{a}m$: 2^{nd} dual injunct aor $tr\bar{a}-s$ $-\bar{t}th\bar{a}m$ 3^{rd} dual indic. aor $a-dh-\bar{t}t\bar{a}m$.

Skr primary 2nd dual -ēthē 3rd dual -ētē, secondary 2nd dual -ētham 3rd dual -ētām in thematic stems Indic pres. bhárēthē bhárētē, imperf. á-bharēthām á-bharētām. On the Conjunctives bhárāithē bhárāitē see § 922 p 470. In Avestic there is a 3rd dual indic pres vaenāipē, answering to the form of the Skr 2nd dual, but injunct. 3rd dual jasaetem

Rarely Skr. $-th\bar{e}$ etc without any preceding vowel in the ending itself Skr. 2^{nd} dual indic. perf $ci-k\bar{e}-th\bar{e}$, 3^{rd} dual indic. pres. $patya-t\bar{e}$ conj. aor. $yam-a-t\bar{e}$, 2^{nd} dual injunct. $d\bar{i}-dh\bar{i}-th\bar{a}m$ Similarly Avest. 3^{rd} dual indic perf. $dazd\bar{e} = *dha-dh+tal$.

See further details in Bartholomae, Kuhn's Zeitschr. XXIX 283 ff, Jackson, Amer Or. Soc. Proceed., Oct. 1889, p. CLXV.

§ 1075. Greek Indic. pres. 2^{nd} dual $\varphi \dot{\epsilon} \varphi \dot{\epsilon} - \sigma \vartheta o \nu$ 3^{rd} dual $\varphi \dot{\epsilon} \varphi \dot{\epsilon} - \sigma \vartheta o \nu$, imperf. 2^{nd} dual $\dot{\epsilon} - \varphi \dot{\epsilon} \varphi \dot{\epsilon} - \sigma \vartheta o \nu$ ($\dot{\epsilon} - \varphi \dot{\epsilon} \varphi \dot{\epsilon} - \sigma \vartheta o \nu$) 3^{rd} dual $\dot{\epsilon} - \varphi \dot{\epsilon} \varphi \dot{\epsilon} - \sigma \vartheta o \nu$ ($\dot{\epsilon} - \varphi \dot{\epsilon} \varphi \dot{\epsilon} - \sigma \vartheta o \nu$) answering to the active $\varphi \dot{\epsilon} \varphi \dot{\epsilon} - \tau \sigma \vartheta o \nu$ was originally 2^{nd} plural (§ 1063 p. 567), and caused $-\sigma \vartheta \dot{a} \nu$ to be made on the model of $-\tau \dot{a} \nu$

ARYAN, ITALIC, AND KELTIC ENDINGS WITH R1)

§ 1076 In this section we discuss those endings of the Aryan, Italic, and Keltic branches which consist of, or contain, the suffix -r.

Remark It is not impossible, but certainly it is unlikely, that the r which we noticed in the 2nd and 3rd singular in Armenian has the same origin (§ 986 Rem p 524)

¹⁾ These have been more fully treated by Windisch and Zimmer in their essays cited on pages 512 and 513.

Italic and Keltic are very much alike in these endings. Aryan is quite different; and it has not yet been shewn which best represents the parent language, or how the present variation came about. Perhaps r was originally a perfect suffix, for the perfect has peculiar endings in other of its persons. But whether r properly belonged to the 3^{rd} plural, or denoted an indefinite subject or subjects, such as one says, one comes, or what, it is at present quite impossible to say. Certain r-forms in both Italic and Keltic appear to belong to the separate history of those branches.

I shall not indulge in any speculations as to the earliest value of this r. The latest discussion may be seen in Johansson's paper, Bezz Beitr xviii 49

§ 1077. Aryan shows it almost exclusively in the 3rd plural (exceptions are the 2nd and 3rd dual perf. act. in -athur-atur in Sanskrit).

The Active voice has it in the 3rd pl. perfect, aorist, and optative, with exception of the 2nd and 3rd dual perfect.

First as regards the usage in the 3rd plural. Here ~r sometimes is the only personal suffix and sometimes it is combined with s. Tracing the forms back to proethnic Aryan, we get four.

- (1) $-r = \text{Avest } -r^{\circ}$. opt. $hy\bar{a}-r^{\circ}$ 'sint', a later re-formate with the strong opt. suffix $-y\bar{a}$ (§ 1018.2 p. 546).
- (2) -yr (the form taken by y before sonants) = Skr. -ur Avest. -ar^e (I § 290 p. 233) perf Skr. ās-úr Avest. ånh-ar^e, aor. Skr. á-dh-ur Avest. Gath. d-ar^e, opt. Skr. sy-úr bhárēy-ur. But Skr. -ur may be equated with Avest. -er^eš (4).
- (3) $-r\check{s} = \text{Avest.} -r^{\check{s}}\check{s}$, opt. $dai\bar{p}y\bar{a}-r^{\check{s}}\check{s}$, a new form like $hy\bar{a}-r^{\check{s}}$ (1).
- (4) $-r\check{s} = \text{Avest.} \cdot -er^e\check{s}$. perf. $cik\bar{v}it$ - $er^e\check{s}$ (§ 850 p. 397, § 852 p 402). This form may also be the origin of Skr. -ur, compare gen. abl Skr. $m\bar{a}t\check{u}r$ with Avest. $ner^e\check{s}$ III § 235 pp. 125 f

Exceptionally Skr. -ur appears in the indic. present as well, as duh-ur 'they milk'. But this formation, 3rd pl. mid. duh-ré and

 3^{rd} sing. mid duh- ℓ , may if you will be called an unreduplicated perfect. In any case duh-ur does not justify our assuming that r originally belonged to the indic present.

The combinations Skr -atw Avest. -atar in the 3rd dual, and Skr. -athur in the 2rd dual, are without doubt peculiar to Aryan, see § 1038 p. 557 f

§ 1078 In the Middle and Passive r is found only with the 3rd plural, and only combined with other elements, added after it, which usually appear as middle and passive suffixes in other connexions.

(1) -rax in the 3rd pl. perf., and by analogy in the 3rd pl. present, is proethnic in Aryan Skr du-duh-ré da-dh-ré, pres. or unreduplicated perf. duh-ré (cp. duh-úr § 1077); Skr. śé-rē Avest sae-rē sōi-rē 'they lie' (cp. 3rd sing. śáy-ē beside śé-tē). In Sanskrit -rē is generally preceded by -i- = Idg. -2-, regularly so in Vedic with a long stem-syllable (cp. § 844 p 385), as īś-i-ré ja-jū-i-ré (cp. Avest. vaoz-i-rem under 2); so also pres. śṛnv-i-ré (cp. 2nd sing. śṛnv-i-ṣé § 853 p. 403)-irē became a new suffix and in classical Sanskrit was the only one used for the Perfect, as duduh-irē cikriy-irē (pres. śay-irē beside śē-ratē) By analogy of forms like duduh-ré and like 1aīū-irē we have in Vedic duduh-rirē jagrbh-rirē, and others

In Avestic $-r\bar{e}$ passed into the \bar{a} -Conjunctive $\hat{a}_{i}dh\bar{a}-r\bar{e}$ beside indic, $\bar{a}_{s}-t\bar{e}$ 'sits'

Ar. -raz seems to have the same relation to act. -r (-z) as -ntaz to -nt, 3^{rd} sing -taz to -t and the like

(2) Further, -ram in the augmented preterite is pr Aryan, as á-dṛṣ-ram a-sṛy-ram, Avest. vaoz-i-rem (§ 844 p. 385, § 854 p. 403). -ram is usually compared with the middle ending of 2nd pl. -dhvam.

The following 1- suffixes appear in Sanskrit only.

- (3) -ra in augmented preterite: á-dúh-ra. á-duh-ra·duh-ré = á-duh-ata. duh-até (duh-átē).
- (4) -ratē and -rata. pres. duh-ratē śé-ratē, opt. mas-ī-rata bharē-rata.
 - (5) Isolated -- anta in á-va-vrt-ranta.

- (6) -rām and (7) -ratām in the Imperative: duh-rām and duh-ratām. Cp duh-atām § 968.2 p. 510. Lastly
- (8) -ran in the augmented preterite, as a-va-vṛt-ran \acute{a} -ca-kr-i-ran \acute{a} -dṛ \acute{s} -ran \acute{a} -śē-ran, and in the Optative, as da-d̄ \imath -ran bh \acute{a} rē-ran. That the ending -an is the same as -an in the active (for *-ant) I cannot regard as proved at all. It may be some element not found elsewhere as a personal suffix, of like character with -s in the Avestic active ending -r s s.

§ 1079. As regards the r-suffixes in Italic and Keltic, the first remark to be made is that not one of them can be confidently held to have originally had an active meaning. All of them may be explained as originally deponent or passive (cp. § 1081 sub fin).

The Latin suffixes of the 3^{rd} pl. indic. perf -erunt -erunt -ere (with dedrot etc.) are at least in some degree akin to the Aryan r-forms. This has been already pointed out as likely in § 1023 p. 551. But there is no need to believe that the Latin forms have any such basis as the Aryan active forms of the 3^{rd} plural perfect. Since the 1^{st} sing tutud- \bar{t} was properly middle, the 3^{rd} plural may be derived from a middle type like that of 3^{rd} plural may be derived from a middle type like

The remaining r-forms in Italic and Keltic fall into two groups.

§ 1080. (I) Forms in Umbro-Samnitic and in Keltic where r appears to be the only personal suffix.

The Umbro-Sammitic forms seem best translated by aid of the indefinite one or they Umbr. pihafei(r) 'let them have appeased', Osc. sakrafir (with últiumam for object) 'let them have consecrated' (§ 874 p. 422, § 926.3 p 473). Umbr ferar 'let one carry', ier 'one will go' possibly for *ier-er 1. e *e(i)-es-er (§ 837 p. 374), benuso(r) 'one will have come' (§ 872 p 421) 'With Zimmer and Conway, I formerly regarded these as 3rd plural active (Ber. sachs. Ges. der Wiss, 1890, pp. 214 ff.) But, as we infer from a comparison of sakrafir with sakrim fakriadon the other Oscan inser. of the same kind (Rhein. Mus. xLIII 557 f.), they may be 3rd singular

deponent Compare the active and deponent imperatives with -tu and -mu, used with indefinite subject in the ritual rules of the Iguvine Tables; and the Avest. 3rd sing. zazan-ti 'one trains, breeds' and others like it (Bartholomae, Ar. Forsch. ii 82); and a great deal of illustrative matter may be found in Miklosich's essay on Sentences without a Subject (Subjectlose Satze, 2nd ed. 1883). There is a third possibility. They may be 3rd singular passive, answering to Latin impersonal constructions (legitur 'one reads, they read'); Osc. sakrafír últiumam would exactly correspond to Lat. legitur Vergilium, legendum est Vergilium (see Weisweiler, Lat. part. fut. pass, pp 70 ff.). The last view is best; it is best supported by Keltic, as will now be shewn

These Umbro-Samnitic forms run on parallel lines with the Keltic 3rd sing passive, e.g. O.Ir do-berar 'datur' (also -berr because of the two r's, but this syncope is not otherwise found — we only have -canar, for example; Zimmer, Kuhn's Zeitschr. xxx 252 takes a different view), whose absolute bye-form berir, like the 3rd pl. bertir beside do-bertar (§ 1082), I believe to be a new Keltic development; imper. berar 'should be brought', Mod.Bret quemerer (i. e. *com-berer) '1staken', Mod.Cymr ni chenir 'there will be no singing'. Zimmer's view that these Keltic r-forms, like the Umbrian and Oscan, are 3rd plural active, has not enough to support it.

Remark 1. Zimmer's attempts to prove that the active indefinite idiom with one is kept in Britannic (loc cit., pp. 237 ff) fail, according to Thurneysen "They are proved to fail by the single fact that in expressions like 'he is killed' or 'one kills him' the pronoun which is the object can be left out, even in Cymric, thus shewing that the person is regarded as the subject Furthermore, Zimmer forgets that the passive preterite to the informs in Britannic, as in Irish (and in Italic), is represented by the part passive with to. This indicates that the inform was regarded as a real passive, possibly in proethnic Keltic (or, if you will, in Italo-Keltic)"

Remark 2 If we assume these Italo-Keltic r-forms to be 3^{rd} sing. deponent or passive, the question arises whether their -r came from *-ro, a form which may have stood to the middle ending *-to in much the same relation as Pali 3^{rd} pl $socar\bar{e}$ 'they trouble themselves' to Skr. $\bar{so}cant\bar{e}$

§ 1081. (II) , in combination with other personal endings,

active and middle, which always precede it (cp. Skr. 2nd and 3rd dual -athur -atur § 1077 p. 574).

These forms may be either deponent or middle in Latin. In Keltic, however, these two moods were distinguisht in form; for in the deponent conjugation, r runs through all persons except the 2^{nd} plural, but the passive forms only the 3^{rd} singular and plural with such suffixes.

It is possible that once, in proethnic Italo-Keltic, r was used only with middle endings, that in this use it came to be a medio-passive sign; and that it was afterwards added to middle or active endings with the effect of making them middle or passive.

§ 1062. (A) r added to Middle endings

(1) Italic and Celtic 3rd pl -nto+r. Lat. depon. sequi-tur sequo-ntur sequā-tur sequa-ntur etc., pass agi-tur agu-ntur etc. Umbr. e. g. emantur 'emantur'. O Ir. depon. -sechethar 'sequitur' -sechetar 'sequontur' perf. do-mēnatar 'putaverunt', pass. do-bertar 'dantur, dentur'; in the 3rd sing indic. pass this ending is shown only in the 2nd and 3rd Conjugations in Irish, as no charthar 'amatur' do-lēicther 'linquitur' (1st Conjugaberar, conjunct. -berar and -berthar). 1) The absolute forms sechidir 'sequitur' sechitir 'sequontur' bertir 'feruntur, ferantur' carthir 'amatur' lēicthir 'linquitur' etc. are analogical like berir 'fertur' (§ 1080 p. 576).

No *satisfactory explanation has been given of the Umbr.-Samn. endings with e-vowels, which answer to Lat. -tur -ntur. Osc. vincter 'vincitur' sakarater 'sacratur' sakahiter 'sanciatur' comparascuster 'consultus erit' karanter 'pascuntur', Pelign. upsaseter 'operaretur' or 'operarentur', Marrue. ferenter 'ferantur'. Umbr. herter herte herti hertei 'oportet' ostensendi 'ostenderentur'; for the form emantur, see above. The Oscan forms had undoubtedly a short e, and I venture to conjecture that parallel to -to -nto there were Idg. forms -te -nte (cp 1st pl. -mo(s) -mc(s), -mom -mem, § 1000 p. 535).2) Umbr. herter points

¹⁾ See footnote 2 to § 1058, page 565

²⁾ If this be correct, there would be no need to derive the -re of Lat sequere (op Gr fne-o) from Idg. *-so, it might be derived from Brugmann, Elements. IV 37

to \bar{e} . Very well — we may suppose that there were variants $-t\bar{e}$ -ntē beside -te -nte, as we saw -mēs beside -mes in the 1st plural (loc. cit.). But herter is used in such a way that we may believe it to be conjunctive; and then we are led to ask whether its \bar{e} , and that of ostensendi (-i for $-\bar{e}$), be not the conjunctive suffix -e-, which could easily creep into the personal ending when there was such a form as *fere-r (cp. ferar).

Remark. On Zimmer's view of these Umbro-Samnite forms (Kuhn's Zeitschr xxx 277), which I regaid as wrong, see Buck, Der Vocalismus der osk. Sprache pp 79 f.

- (2) Latin forms of the 2nd singular, like spatiarus possibly contain +-ru-r = *-so+r See § 1050 p. 562.
- (3) In Oscan censamur 'censemino, censetor' r is seen combined with the Umbr-Samn mid.-pass. suffix *-mod. -d was exchanged for -r. See § 967 pp 508 f.
- (4) O.Ir -ther in the 2nd sing of deponent verbs, e. g. -sechther 'sequeris', is derived from -the = Idg. *-thēs, which is preserved without -r in the imperative type cluin-te. § 1051 p. 563.
 - § 1083. (B) r added to Active endings.
- (1) Italic and Keltie 1st sing. *-or, in Keltic only deponent. Lat. sequor O.Ir. -sechur 'sequor', Lat. gradior O.Ir. -midur 'indico', pass. Lat. feror capior. Lat. ferar beside Act. feram," ferrer beside act. ferrem; -r takes the place of -m.

Remark 1. It is of course not certain that $i-\bar{o}r$ is the active $-\bar{o}+r$ It may be that Italo-Keltic had the 1st sing. mid *seqōk (§ 1041 1 b p. 558), and that this was transformed to *seqor, as in Oscan *-mod *-mud became -mw (§ 1082.3).

(2) Italic and Keltic 1st pl. *-mor, in Keltic only deponent. Lat. sequimur sequāmui sequēmur ferimur etc., O.Ir -sechemmar 'sequimur, sequamur' perf. do-mēnammar 'putavimus'. Whether *-mor was transformed to *-mos by exchanging -s for -r, or whether it was an extension of *-mo (cp. § 1000.2. a p. 535), is doubtful mm instead of m in Irish is due to the active forms ammi bermm etc. (see § 1006 pp. 537 f.)

Idg *-se. ūlūi is would be related to ūtārus as Osc. vincter to Lat. viņcitur Compare § 1050, page 562

(3) In the Irish deponent perfect we have 1st sing. do-mēnar 2nd sing. do-mēnar beside the active forms 1st sing. cechan for *ce-can-a 2nd sing. cechan (§ 981.4 p. 521, § 989 p 525) In 3rd sing. do-mēnair beside act. cechum the non-palatal pronunciation of the n is a difficulty. Is this due to the analogy of other persons of the perfect, or because -gēnair comes from *ge-gnā-?

Remaik 2 Neither Italic nor Keltic have an r-form in the 2nd plural. Latin has sequimint ferimint (see II § 71 p. 165) The Irish deponents have the active ending, as -midid beside -midiur, do-menaid beside do-menai.

PERIPHRASTIC MIDDLE IDIOMS (REFLEXIVE).

§ 1084. In several languages, where the Idg Middle (Skr. bhára-tē Gr. φέφε-ται) either dwindled or quite died out, its place was filled by the combination of the Active (or some Middle form degraded until it could not be distinguisht from the active) and an Oblique Case of the pronoun which answered to the active form in question, and which referred to it.

From a comparison of Sanskrit and Greek we may believe that this roundabout idiom was general at the time when the Idg. Middle was still in living usc. For in Greek and Sanskrit both periphrastic reflexive and middle are used side by side; and this is true, both when the contrast between the subject and object is important, that is, when there is a contrast with some other person, which makes it necessary to lay stress on the person implied by the middle form, and also when the cases are not clearly shown by the middle, or where this could be understood as a passive, so that there was every need to make the expression as clear as possible. Thus we have Skr. yád yazamanabhagá prašnáty atmánum evá prinati (Taitt. Sah. I 7 5. 2) when he cats his share of the offering, he gets new life in himself' (otherwise it is his task to quicken others), néd atmána va prthiví va hindsani (Satap.-Brahm I 2. 4. 7)

'that I may not destroy either myself or the earth', Gr. έμοὶ δὲ δέκ' ἔξελον οἴφ (Od 9. 160) 'but for myself alone I chose ten (goats)', ἀποκρύπτω ἐμαντόν 'I hide myself' beside ἀποκρύπτομαι 'I hide for myself' or 'I am hidden'. Often enough we find the middle used with the reflexive pronouns, as tābhir ναί κί ατπάπαπ άρτιπτα (Ταιτ -Sah v 1. 8. 3) 'therewith he enjoyed himself', κά γαμαί ατπάπα νγὰσλατα (Μαϊτ.-Sah. 1 9, 3) 'he changed himself into the offering', η κακωσαι ήμας η σφάς αὐτοὺς βεβαιώσασθαι (Thuc. I. 33. 3), ὅτι Ξενοφῶν βούλεται ἑαντῷ ὄνομα καὶ δύναμιν περιποίήσασθαι (Xen. 'An. v 6, 17) Cp. Lith bùrna sáu μιαικά-s(ι) § 1086.

§ 1085. The next step is represented in Italic and Keltic. Here the original Middle had got mixt up very much with the r-deponent (§§ 1081 ff.). E. g. Lat. sequitur O.Ir. -sechethar 'sequitur' = Skr. sácatē Gr. έπεται, Lat. re-minīscor O.Ir. do-muiniur 'I think' = Skr. mányatē. But it partly gave place to the periphrastic reflexive, Lat. dedecore se abstinebat (ἀπείχετο), gloriam sibi peperit (ἐπορίσατο, ἐκτήσατο), mecum reputo (στοποῦμαι, λογίζομαι), O.Ir no-m-moidim 'glorior' (Wb. 14°), lit. 'I pride myself', act r-an-glana 'si emundaverit se' (Wb. 30°). In Latin this idiom is often hardly distinguishable from the deponent, as immiscemus nos rei and immiscemur, castris se effundunt and effunduntur, relaxat se and relaxatur.

§ 1086. Next come Germanic and Balto-Slavonic, where the Idg Middle with middle meaning had died out in prehistoric times — In Gothic the forms remain but have passive meaning, in Balto-Slavonic there are forms of the 1st and 2nd sing, middle in the place of active forms, see § 1046 p. 560, § 1053 p 563, and footnote to page 216 above. — Here then the Periphiastic Reflexive is regularly used in place of the Idg. Middle.

Remark Regularly so used, but not always Sometimes the Active form alone does duty for the Idg middle, as Goth. ga-nisip 'he gets happily through, finds protection or health' as against Skr. násaie Grréera., Lith. sekù 'I follow' against Skr sácate Gr. Enera: (Lat sequitur O.Ir -sechethar), O C Sl měnya 'I think' as against Skr mányate (O.Ir, do-muiniur). In Gothic, veibs in -nan may represent the old Middle, as

and-bundnip 'he lets himself go, gets free, sets off' beside pass. and-bindada 'he is released' act. and-bindip 'he sets free'. There are more of the kind.

Gothic gavandja mik O.H.G. gi-went(i)u mih 'I turn myself towards, converto me, convertor, return'. Goth. skama mik O.H.G. scamem mih 'I am ashamed'. Goth. og mis 'I fear' (for myself). O.H.G. furht(1)u mir, the same. Goth. gaginand sik 'they gather together', reflex. In Norse, about the 8th century, the pronoun affixt itself firmly to the verb in a contracted shape (-sk for sik, dat. -ss for -sex). Then -sk and -ss were used for the 1st and 2nd persons as well as the third. However, in the oldest period we do find a 1st sing -mk (for mil), as heito-ml 'I call myself' (where the ending -ō is kept, though it drops with heat 'I call'). This Norse type, much altered and obscured by sound-change and analogy, was also used as a passive. Compare Norecn, Aisl, und Anorw. Gramm. pp. 185 ff.; Paul's Grundriss i 518 ff.; Specht, Das Verbum Reflexivum und die Superlative im Westnord, (Acta Germ. III 1), Berlin 1891.

In Lithuanian -si (for *sė) became a universal reflexive, and coalesced with the verb, being used for all persons. was originally only locative or dative, but afterwards came to be used for the accusative (III § 447 p. 385). -si at the end of words has now generally become -s. kelů'-s(1) 'I raise myself, get up 2nd sing. kelë-s(i), and so forth. $bi/a\tilde{u}$ -s(i) 'I fear'. džiaugių -s(i) 'I enjoy myself'. burną prausių -s(i) 'I wash my face'. Also bùrną sáu prausιά'-s(ι), like Gr. περιποιήσασθαί τι έαυτῷ (§ 1084 p. 580). mùsza-s(i) 'they struck each other'. When a verb has a prefix, si stands between prefix and verb, as pa-st-kelu 'I raise myself, rise' (dial. also pa-st-kelů-s). Compare Lett. bistů-s 'I fear' (in folk-poetry -si sometimes survives, and has not vet become -s); Pruss. grīki-si 'they fall into sin' (III § 447 p. 385), with a variant -sin, obviously the accusative case, as etlaihu-sin 'let him abstain, forbear'. In O.C.Sl. we see the acc. se answering to Pruss. -sin as a (Continued on p. 594.)

[Here follow Tables of the Verb Finite pp. 582-593.]

§ 144 pp. 456 f., and § 156 pp. 470 ff. Their Suffixes, both formative and case-suffixes, have been described each in its proper place. It remains to pass them in general review, and to point out certain peculiarities which have not yet been touched upon, or others on which I have had reason to change my view.

1 VERBAL SUBSTANTIVES

- § 1088 Nomina Actionis, which appear in more than one language as Infinitive, Supine, or Gerund.
- (1) Root-Nouns Dat. Skr. $nir-áj\bar{c}$ 'to drive out', Lat. $ag-\bar{\iota}$; in Greek this type may be represented by infinitives such as $\chi \in \hat{v}-\alpha i$ $\hat{c}r \in \gamma v-\alpha i$ (§ 504 p. 67 f) See II § 162 pp. 489 f
- (2) -s- -es- between Root and Case-Suffix, this cannot be separated from the Noun-suffix -es- (-9s- -s-) or -s- in the aorist. Dat Skr. ji- \tilde{s} - \tilde{e} ' to conquer', doh-ds- \tilde{e} ' to milk', Gr. $\delta \epsilon \tilde{t}$ \text{\$\tilde{c}} a \text{\$c\$} is how', Lat. da-r- \tilde{t} (cp. loc da-r-e ag-e1-e). Sec II § 132 pp. 413, 414 f, 416, 418. § 162 p. 489 f., III § 251 p. 153, § 254 p. 155, § 272 p. 172, IV § 655 p. 190, § 824 p. 363.
- (3) Suffix -men- Dat Skr. dά-man-ē Gr. δό-μεν-αι 'to give' Lat 2nd pl imper da-min-7, Skr. vid-mán-ē 'to learn' Gr. ἴδ-μεν-αι 'to know'. Loc. Skr. dhár-man 'to hold up' Gr. δό-μεν 'to give'. See II § 71 p 165, § 117 p 367, III § 251 p. 153₄ § 257 p. 158.
 - (4) Suffix -uen- Dat Skr. dā-ván-ē Gr. Cypr δο-Γεν-αι

Keltic Windisch, Zum irischen Infinitiv, Bezzenberger's Beitr. ii 72 ff Loth, Le particip de nécessité en celtique, Mém Soc Ling vi 66 ff.

Germanic. A. Denecke, Der Gebrauch des Infinitivs bei den ahd Übersetzern des 8. und 9 Jahrh., Leipz. 1880. Paul, Zur Bildung des schwachen Präteritums und Participiums, Paul-Braune's Beitr. vii 136 ff

Balto-Slavonic •W Miller, Uber den letto-slavischen Infinitiv, Kuhn-Schleicher's Beitr viii 156 ff. Schleicher, -te (d i. -tai) als Endung des Infinitivs im Litauischen, ibid i 27 ff Forssmann, Der Infinitiv im Ostromir'schen Evangelium, Festschr. des Protest Gymn zu Strassb 1888 p 245 ff Miklosich, Das Participium praet. act. I (in Old Slovenian), Sitzungsber. d. Wiener Akad. LXXXI (1875) 83 ff. Idem, Das Partic. praes. act. auf e statt auf y, ibid. 95 ff.

Att $\delta o \tilde{v} v a i$ 'to give', Avest. $v \bar{u} d - v a n - \bar{o} i$ Gr. $\epsilon i \delta \dot{\epsilon} v a i$ for * $F \epsilon i \delta - F \epsilon v - c i$ 'to know'. Loc Avest. $r \bar{o} i b - i v a n$ 'to make run together', with which perhaps should be compared Greek Infinitives like as $\delta o \tilde{v} v = *\delta o - F \epsilon v$ (§ 1093. 4).

- (5) -sen- i. c. s+en (cp. 2) Skr loc. -san-i, e. g. sak-šán-i to be with. With this probably goes the Gr. infin. type Ion Att. $q \neq q \epsilon \nu$ Dor. Lesb. El. $q \neq q \nu$ for * $q \epsilon \rho \epsilon \nu$. See II § 114 p 347.
- (6) Suffix -tr- Dat. Skr. pī-túy-ē 'to drink', see II § 100 p. 298, III § 249 p 149, § 251 p 153. The explanation • of Avest. mrūtē is uncertain, see III § 249 p 150, § 260 Rem. p. 161. Loc. Lith. dektè 'to burn', see III § 260 p. 161, Hirt, Idg Forsch 127. The Lith infinitive in -ti, as du-ti 'to give', and the OC.Sl. inf in -ti as du-ti 'to give', are probably locative, standing for *-tel or '-tel. But Lith. -ti may be derived from *-ti-ai (dative), this would become *-tie, then *-te, and lastly, because of the accent (cp. dat. do-uevai), -ti (cp. 2nd sing. vert) for ren-tie § 991 p. 528) and would be related to Skr. -tay-ē (see above) as Pruss. -tw-ei to Skr. -tav-ē (7). And O.C.Sl. -ti may also be the Idg. locative -ē for -ēz (cp. Lith. dektè). See III § 260 p. 161, Hirt, Idg. Forsch. 1 28, Streitberg, ibid. 271 und 289. It is wholly doubtful how we are to explain such Lith. infinitive forms as dű-te; see III § 260 p. 161, Hirt, as cited pp. 27 f., Streitberg ıbid. 271.
- (7) Suffix -tu-. Dative Skr dhā-tav-ē 'to place', Pruss. dā-tw-ei 'to give'. Locative supine Lat. da-tū O.C.Sl. da-tu 'to give', ground-form -tēu or -teu. Accusative Skr. dhā-tu-m Lat. sup. con-ditum Lith. sup dė-tų (dė-tū, cp. opt. 1st pl. dėtum-bime) O.C.Sl. sup. dė-tū from \sqrt{dh} ē- 'place'. See II § 108 pp 323 ff., III § 250 p. 152, § 261 p. 161 f.
- (8) Suffix -o-. Accusative Skr. adverbial gerund abhy-d-krámam 'approaching', Umbr. er-om Osc. ez-um 'esse'; Greek similar forms perhaps are aor. 2nd sing. imper. Syrac. λάβον 'take' Att. δεῖξον 'show' etc. (λάβον:

- $δείξον = Skr. -άj-ē Gr. χεῦ-αι : ji-ξ-ἑ Gr. δείξαι = Skr. bhuj-yāί : a-vyáth-iṣ-yāi). See <math>\Pi$ § 60 p. 114.
- (9) There is a close connexion between the Aryan dative infinitive in $-dh_{\ell}a_{\ell}$, as Skr. $vdha-dhy\bar{a}i$ 'to convey' (other suffixes with the same value are used, $-dh\bar{e}y\bar{a}ya$ $-dh\bar{a}i$ and $-dh\bar{e}i$), and the Greek dative infinitive in $-\sigma \partial ui$, as $\xi \pi \varepsilon \sigma \partial ui$ 'to follow'. See § 1089. 12, § 1093. 8, Bartholomae in Rhein. Mus. XLV 151 ff
- § 1089. Aryan Alongside of complete Infinitives we meet many other forms which stand on the line between infinitives and nomina actionis. Thus it is impossible to define shaiply the infinitive in this branch. In what follows no attempt has been made to give complete lists, at least of what may be called Infinitives in posse.

But it is only in the older dialect that Sanskrit shows this rich variety of infinitive forms. The classical language knows only that in -tum (9).

- (1) Root-Nouns, see § 1088. 1 Dative Skr $dr^{\dot{s}}$ - \dot{e} Avest. $dar^{e}s$ - $\bar{o}\iota$ 'to see'. Locative Skr $dr^{\dot{s}}$ - $\dot{\iota}$ 'to see'. Gen.-Abl Skr. \bar{a} -tfd-as 'to pierce'. Accus Skr $\dot{s}\dot{u}bh$ -am 'to shine, be magnificent', Avest dam 'to place'
- (2) -s- -es- between Root and Case-Suffix; sec § 1088. 2. Dat 'Skr ji-š-ē 'to conquer' dōh-ás-ē 'to milk', Avest av-anh-ē 'to he'p' Gen.-Abl. Avest. aenanh-ō 'to force'.
- (3) Suffix -men-, see § 1088 3 Dative Skr. då-man-ë 'to give', Avest. stao-mainë 'to praise' Locative Skr. dhán-man 'to hold up'; Loc. Skr. sávī-man-ı 'to uplift', Avest caš-mainī 'to behold' (so the new recension, in place of the form caš-mainē (given in II § 117 p. 369).

Remark The Avestic loc forms cas-man etc, which we classed as infinitive in II § 117 p. 369 and III § 257 p 158, comparing them with Cret inf $\partial \dot{o} - \mu \eta r$, are now denied to be infinitive at all by Bartholomae (Idg Forsch I 495 f).

(4) Suffix -uen-, see § 1088.4. Dative Skr. dā-ván-ē 'to give', Avest. vīd-van-ōi 'to know'. Locative Avest. rōnp-wan 'to 'cause to flow together'.

- (5) -sen-, see § 1088. 5. Dative Avest. srao-šān-ē 'to hear'. Locative Skr. sak-šán-i 'to be with'.
- (6) Suffix -ter-, cp. Avest dar'-prāi, no. 11. Locative Skr. vi-dhartár-i 'to divide up, distribute'.
- (7) Suffix -i- Dative Skr. $d_{\vec{r}}\dot{s}$ - $d_{\vec{y}}$ - \bar{e} 'to see'. See II § 93 p. 280, III § 249 p. 149, Bartholomae, Bezz. Beitr. xv 238
- (8) Suffix -ti-, see § 1088.6. Dative Skr. $p\bar{t}$ -táy- \bar{e} 'to drink'. Avest. $ker^{\bar{e}}$ -tē \bar{e} 'to complete'. Locative Skr. $s\bar{a}t\bar{a}u$ 'to attain' (III § 260 p. 159 f.). Instrumental Skr. ut-t 'to help', Avest. fra- $mr\bar{u}iti$ 'to recite', sec III § 249 p. 150, Bartholomae as cited 245 f. Gen.-Abl. Avest $dar\bar{s}t\bar{v}i$ -s 'to see'. Accusative Avest. $ast\bar{i}m$ (= *a-sth-ti-m) 'to stand by'.
- (9) Suffix -tu-, see § 1088. 7. Dative Skr. dhá-tav-ē 'to place' (cp. dátavaí no. 16). Gen.-Abl. Skr. dhá-tō-š 'to place'. Accusative dhá-tu-m 'to place', which, as has been said, is the only classical type of infinitive.
- (10) Suffix -tno--tuno-. Locative Avest. auvi-šōi-p̄nē 'to inhabit', O.Pers car-tanary 'to do'. See II § 69 p. 161.1) But these may be regarded as the dative from stems containing the suffix -ten-.
- (11) Suffix -tro-. Dat. Avest dar -prāi 'to hold fast' (cp. 6).
- (12) Suffix -10- (cp. -10- as participial suffix § 1099. 3). Dat. Skr. bhuj-yāi 'to enjoy', also -yaj-yā 'to honour' like sahhyā, and -yājyāya 'to honour' like vikāya (III § 246 p. 145), Avest. vaēd-yāi 'to recognise'. Skr. a-vyāth-iṣ-yāi beside the s-Aorist 2nd sing. mid vyath-iṣ-thās from vyath- 'to waver' (Bartholomae as cited, 229 f.). Loc. Avest. vereiāyē 'to help on' (Bartholomae, as cited, 240). Acc. Skr. -vidya-m 'to find'.

The same suffix occurs in the Aryan inf. in *-dhiāi (dative), as Skr. $v\acute{a}ha$ -dhyār Avest. vazai dyāi 'to convey, carry'. This form is a combination of the two noun-stems vaha- and dh-ya- ($\sqrt{dh\bar{e}}$ -), compare these other forms, also used

¹⁾ The connexion there assumed between the Latin gerund in and the Lithuanian participia necessitatis in -tina- now seems to me kery dubious. See Remark to § 1103.

as infinitive, vayō-dhēyāya vayō-dhāi 'for giving of strength' and śrad-dhē 'for cherishing of trust'. When váhadhyāi had got associated with váha-ti 'conveys, carries', Sanskrit formed išayá-dhyāi beside išayá-ti 'is strong', pṛná-dhyāi beside pṛ-ná-ti 'fills', Avest. srāvayeidyāi beside srāvayeiti 'causes to hear', verōn-dyāi beside verōn-tē 'chooses' (§ 599 p. 142), merōng-dyāi beside merōnc-inti 'they destroy' (§ 626 p. 162) and the like. See § 1088. 9.

- (13) Suffix -2a-. Acc. Avest. xwarryam 'to devour'.
- (14) Suffix -t-10- (cp. -t-10- as a participal suffix § 1100. 4). Dat. Skr. i-ty $\bar{a}i$ 'to go'.
 - (15) Suffix -uo- Loc. Avest. dā-vōi 'to place, to give'.
- (16) Suffix -tego- (cp. Gr. διων-τέο-ς § 1099 4). Dat. Skr dá-tavāi 'to give', also sár-tavā 'to stream' like sakhyā (III § 246 p 145). See Bartholomae as cited 224 ff., where conjecture a is offered by way of explaining the double accent.

§ 1090. The Sanskrit Gerund (II § 108 p. 327) in -y-ā -ty-ā, as ā-gam-yu ā-ga-tyu lit 'with a coming' (III § 278 p. 182), and that in -tvā as shu-tvā lit 'with a hearing' (II § 108 p. 327, III § 279 p 183), are Instrumental. There is another group in -tvī, as bhū-tvī, which Bartholomae explains as locative (Bezz. Beitr. xv 227, 240, 241), a group in -tvāyu, which is dative, e. g. drš-tvāya (see Bartholomae, pp. 239 f.); and an accusative "adverbial gerund" as abhy-ā-krāma-m 'approaching'.

§ 1091. Another class of verbal substantives in Sanskrit consists of the forms which are found in the well-known periphrasis with cakára ása babháva, the accusative in -ām, as vidám. See § 896, p. 445.

§ 1092. In Armenian, the Inf. has an *l*-suffix, as *ta-l* 'to give' from indic. *ta-m*. See II § 76 p. 202, Bugge, Etruskisch and Armenisch i 15.

§ 1093. Greek Infinitive.

• (1) It is doubtful whether χεῦ-αι ἐνέγκ-αι and the like

are the dative of Root-Nouns, to be placed with Sanskrit and Latin infinitives such as $-\alpha j - \bar{e}$ and $\alpha g - \bar{\iota}$. See § 1088. 1.

- (2) Dative in $-\sigma$ - ω , belonging to the s-aorist, e.g. detta. See § 1088 2. Thess. aor. ∂v - $\gamma \rho \dot{\omega} \psi \epsilon i \nu$ (Att. $\dot{\omega} v a$ - $\gamma \rho \dot{\omega} \psi \epsilon i \nu$) with $\epsilon \iota = \alpha \iota$ (1 § 96 p. 90), and $-\nu$ added on the analogy of other infinitives.
- (3) Suffix -men-. Dative - $\mu\nu$ - α , loc - $\mu\nu$, e g $\delta \dot{o}$ - $\mu\nu$ and $\delta \dot{o}$ - $\mu\nu$. See § 1088. 3 By contamination of - $\mu\nu$ and - $\epsilon \iota \nu$ ($\phi \dot{\epsilon} \rho \epsilon \iota \nu$) arose Rhod - $\mu\epsilon \iota \nu$, e. g $\vartheta \epsilon$ - $\mu\epsilon \iota \nu$. Cret $\delta \dot{o}$ - $\mu \rho \nu$ is probably, like δo - $\mu\epsilon \nu$, Locative, with a strong-grade formative suffix; cp Avest. loc. $ca \dot{s}$ -man, see III § 257 p. 158, IV § 1089 Rem. p. 599.
- (4) Suffix -yen-. Dative Cypr. So-Fev-at Att Sovrat 'to give', Att. $\mathring{a\eta}vat$ 'to blow' for ' $\mathring{a}f\eta$ -(f)evat (III § 251 p. 153). Forms like Sov ν (Theognis), $\mathring{e}\xi$ - $\mathring{e}\tau$ (Oropus), Lesb. $\mu e \vartheta \mathring{v} \sigma \vartheta \eta \nu$ may perhaps be locative in -yen like Avest. $r\ddot{o}ip$ -wan. See § 1088. 4.
- (5) A Locative in *-s-en may perhaps explain Att φέρειν for *φερε-εν. See § 1088. 5
- (6) Doric and Arcadian infinitives in -ν, such as άρχεν ἀγαγέν, are obscure. See the Author's Gr. Gr.² § 146.5 p. 175.
- (7) Perhaps the imperative in -ov (2nd sing), as Syrac. $\lambda\alpha\beta$ ov (Att $\lambda\alpha\beta\dot{\epsilon}$) Att $\delta\epsilon\hat{\epsilon}\xi$ ov, are infinitive; see § 1088 %.
- 8) The medio-passive Infinitive in $-\sigma\theta\alpha$ is connected with the Skr. inf in $-dhy\bar{a}i$ $-dh\bar{e}y\bar{a}ya$ $-dh\bar{a}i$ $-dh\bar{e}$, see § 1088 9, and § 1089 12. $\epsilon i\partial\epsilon\sigma\theta\alpha$ for instance is the dative of a compound consisting of the noun stem $F\epsilon\iota\partial\epsilon\sigma$ ($\epsilon i\partial\sigma\rho$) + *dhē
 idh- $\sqrt{dh\bar{e}}$ 'place, do'), cp $\epsilon n\epsilon\sigma$ - $\beta i\partial\sigma\rho$ and the like, II § 29 p. 50; the Skr. ϵnd -dh- ϵ corresponds exactly. After the second member of such compounds had sunk into a mere suffix, $\epsilon i\partial\epsilon\sigma\theta\alpha$ was mentally analysed $\epsilon i\partial\epsilon$ - $\sigma\theta\alpha$ because such was the structure of the forms associated with it, $\epsilon i\partial\epsilon$ - $\epsilon\alpha$ and the rest Then this supposed suffix $-\sigma\theta\alpha$ was added to other tense-stems, and became a type. It received its medio-passive

meaning because this was the meaning of $-\mu \varepsilon \vartheta \alpha$ $-\sigma \vartheta \varepsilon$ and similar personal endings with ϑ .

- § 1094. Italic Infinitive.
- (1) Dat. of Root-Nouns, Lat. depon. pass. $sequ-\overline{\imath}$ ag- $\overline{\imath}$, see § 1088. 1.
- (2) Dat. in $-s-\bar{\imath}$ $-r-\bar{\imath}$ = *-s-a½, Lat. depon pass. $da-r\bar{\imath}$ (O Lat. $das\bar{\imath}$) fer-ri Loc. in -s-e -r-e -er-e = *-s- \imath *-es-i, Lat act. da-re es-se ag-ere. See § 1088. 2.
- (3) In Old Latin, and later in poetic style, we meet with deponent or passive forms with the ending -ier -rier, having the same value as -ī -rī; e. g. ag-ier da-rier. In II § 162 Rem 2 p 490 f an attempt is made to explain this type, and my attempt has been followed by others, those of Henry, Miodoński, and Miles (see tootnote, page 595); compare further Stolz, Lat. Gr. 2 pp. 380 f. The origin of these forms is still not quite cleared up.

Remark. If we agree with Fi Muller (Grundr der Sprachwiss III 2 p 651) that -er is the exponent of the deponent and passive, and that this was added to forms in -ī, we must suppose that it has been abstracted from forms like Osc vincter 'vincitur' karanter 'pascuntur'. As pointed out in § 1082. 1, it is possible that the Latin language once had likewise these indicative forms in -er

- (4) An infinitive with formative suffix -men- is probably to be seen in the Lat. 2nd pl. imper. in -minī, as da-minī sequi-minī. See II § 71 p. 165, § 117 p. 373, IV § 1088.3.
- (5) On the Lat. inf. fut in $-t\bar{u}rum$, as $da-t\bar{u}rum$, see § 900 p. 448 and no. (7) below
- (6) An Infinitive type is also to be seen in forms like are in are facio, see § 578 p. 120, § 896 Rem. p. 445, § 899 p. 447.
- (7) In Umbr.-Samn. the inf. pres. act. ends regularly in -om, as Umbr. er-om Osc ez-um 'csse', Umbr. fasiu 'facere' stiplo 'stipulari (for *stiplā-om), Osc. deikum 'dicere' moltaum 'multare' fatium 'fari'. See II § 60 p. 114, IV § 1088.8, § 1103 Rem., Buck, Der Vocalismus der osk. Spr. 123, von Planta, Vocalismus der osk.-umbr. Dialekte 111 f., 272.

Postgate holds that the Latin inf fut in $-t\bar{u}rum$ represents the same type, and that its ending is $*-t\bar{u}+erom$; see § 900 p. 448.

§ 1095. In Latin there are two Supines, in -tu-m (acc) and in $-t\bar{u}$ (loc), e. g da-tum da-t \bar{u} . The former occurs in Umbr., aseriato 'observatum' (-o(m) for -u(m), I § 49 p 42). See § 1088 7

On the Latin Gerund with -ndo- see § 1103.3.

§ 1096 Where other languages use the Infinitive, Irish has instead a group of nomina actions which do not lose their noun character, and when an object is exprest, it is put in the dependent genitive (II § 156 p. 471) As a rule, each verb has some noun from the same root ready to be used as the infinitive, the strong verbs having nouns with the suffixes -men-, -ti-, -ti- and others (Zeuss-Ebel, Gr. Celt. 483 ff, Windisch, Bezz. Beitr. II 75, Ir Gr. pp. 97 ff), and the weak verbs usually nouns with -tu-, c. g nertad 'a strengthening' beside nertiam 'I strengthen' (II § 108 p. 329). Most commonly these are used in the dative with do 'to', as Mid.Ir. do blith 'to grind, for grinding' (pres melim) do nertad 'for strengthening'. This is as near as Irish ever comes to the infinitive of the other European languages

For the infinitive in Britannic dialects, which differs from Irish only in unimportant particulars, see Zeuss-Ebel, Gr. Celt. 534 ff

§ 1097. In Germanic there used to be in prehistoric times a noun with the suffix -ono- used in the accusative case as an infinitive, c. g Goth. itan O.H.G ezzan 'to eat' = *ed-ono-m, Goth. áihan O.H.G. eigan 'to possess, own'. These come very near the Skr ádana-m neut. 'an eating', and Irish infinitive-nouns such as Mid.Ir. blegon 'a milking'. See II § 67 p. 153.

§ 1098. Balto-Slavonic. (1) -ti- forms the infin. stem in Lithuanian, where the infinitive ends with -ti or -tė, and in Old Church Slavonic, which has -ti; e. g. Lith. dė-ti dė-tė, O.C.Sl. dė-ti 'to place, lay'. There are also Lith. inff. in• -tè

- (loc.), as dektè dega 'it burns fiercely' (cp. Leskien, Bildung der Nomina im Lit., 404). See § 1088.6.
- (2) The Suffix -tu- occurs in the Supines Lith. $d\vec{e}t\vec{u}$ i. e. $d\vec{e}-tu$ (cp. opt. 1st pl. $d\vec{e}tum-bime$) O.C.Sl. $d\vec{e}-t\vec{u}$ (acc.) and O.C.Sl. $d\vec{e}tu$ (loc.), beside which observe Pruss. acc. $d\vec{a}-tun$ $d\vec{a}-ton$ and dat. $d\vec{a}-twei$ 'to give' used in the ordinary infinitive way (the more usual ending for this meaning is -t, as $d\vec{a}-t$). See § 1088.7.
- (3) A verbal substantive in -è is seen in O.C.Sl. vidě-achŭ 'I saw'. See § 903 p. 452.

2. VERBAL ADJECTIVES

- § 1099. As already explained, no clear line can be drawn between Verbal Adjectives (Participle, Gerundive) and other Adjectives. I mention first such suffixes as are found in more than one language with verbal adjectives.
- (1) -to-, part. perf , mostly passive. *dhɔ-tó-s 'placed, laɪd': Skr -dhɪtá-s hɪtá-s Gr. Əɛzó-ç Lat. crēdɪtu-s Lɪth. dĕta-s. Mɪd.Ir do-breth 'datum est Skr. bhṛ-tá-s 'borne'. Goth. vauhr-t-s Avest. varš-ta- 'done'. O.C.Sl žṛ-tŭ 'cut, mown' Skr. ha-tá-s 'struck, kılled'. See II § 79 pp. 218 ff., § 140.3 and 4 p 452 f.
- (2) -no- -eno- -ono-, part pret., mostly passive. Skr. pūr--nā-s filled, Alban. 9:ns (Gegian dialect 9an) said for *9ons-no-(G. Meyer, Kurzg. Alban. Gramm, p 42 f., Alban. Stud ii 76, iii 65 f.), O II.G gi-tān done O.C.Sl. o-dēnā done again, turned over, A.S. bund-en O Icel bund-enn Goth. bund-an-s O.H.G. gi-buntan bound, O.C.Sl. nes-enā borne. See II §§ 65—67 pp. 138 ff, § 140.3 p. 452.
- (4) -teμo-, -tμo- -tuμo-, part. fut. pass. (Gerundive). Gr. διωχ-τεό-ς 'to be followed' for *-τεΓο-ς (Hesiod φατειό-ς for

- $^+q_{\alpha-\tau\varepsilon F-\iota o-\varsigma}$?), Skr. $kar-tavy\dot{\alpha}$ -s 'faciendus' (implies *kar-tava-, cp. inf. in -tavai § 1089 16 p 601), Skr. $k\acute{a}r-tva$ -s $k\acute{a}r-tuva$ -s 'faciendus'. See II § 61 p. 116, § 63 p. 127, § 64 p. 135, § 140 p 452.
- (5) -lo-. Armen. part. aor. act. and pass., gereal 'capiens', captus' from gerem 'capio', O.C.Sl. part. pret. act. II nes-lŭ 'having borne'. See II § 76 p 212, § 140 p. 451.
- (6) -ent- -nt-, part. pres., aor., and fut act. Skr. bhárant-Gr. qέρων Lat. ferēns Goth baírand-s O C.Sl. bery 'ferens', Lith. νēžās 'vehens'. s-Aor. Skr dhák-š-at- 'burning', Gr. πέψᾶς 'cooking'. syo-Fut. Skr. dā-syá-nt- Lith. dial. då-sius for *-sians High Lith. dů's ξs Gr δώσων 'daturus'. See H §§ 125 f. pp. 394 ff, § 140 p. 451, IV § 491 p. 50 footnote.
- (7) -yes- part. perf. act. Skr. ririk-vás- Gr. λελοιπ-ώς Lith. likę̃s 'having left', O.C.Sl mlŭz-ŭ 'having milked'. See II § 136 pp 438 ff., § 140 p 451.
- (8) -meno- -mono- -mno-, part mid.-pass. Pres. Skr. $y\acute{a}ja$ -māna-s Avest. yaza-mna- Gr. $aζ\acute{o}$ - $\mu\epsilon vo$ - ς from \checkmark $\mu a\mathring{g}$ 'honour', Pruss. po-klausi-manas ($\bar{\imath}$) nom pl fem 'being heard' Fut. Skr $d\bar{a}$ - $sy\acute{a}$ -māna-s Gr. $\delta\omega$ - $s\acute{o}$ - $\mu\epsilon vo$ - ς from \checkmark $d\bar{o}$ 'give'. Perf. Gr. $\delta\epsilon$ - $\delta\acute{o}$ - $\mu\epsilon vo$ - ς . The suffix -āna-, which replaces this in Sanskrit with unthematic stems, e. g. pres. $d\acute{a}$ -dh-āna-s perf. viric-āná-s, may perhaps come from *- $\bar{\eta}ino$ -. See II § 67 Rem. p. 152, § 71 pp 163 ff, § 140 p 451.

§ 1100. Aryan

- (1) -to-, part perf mostly passive. Skr. kr-tá-s Avest ker'-ta- O.Pers. kar-ta- 'made', Skr. Avest. O.Pers. i-ta- 'gone' See § 1099. 1.
- (2) -no-, in Sanskrit, beside -to-, as $p\bar{u}r$ - $n\acute{a}$ -s = $p\bar{u}r$ - $t\acute{u}$ -s 'filled', $bhun\acute{a}$ -s 'split'. See § 1099.2.
- (3) -30-, part fut pass (Gerundive), Skr. dýś-ya-s dárś--1ya-s Avest. dar's-ya- 'conspiciendus, visible'. See § 1099.3.
- (4) Skr. -t-ya- instead of -ya- (3) when the root ends in a short vowel, as ki-tya-s 'faciendus' See II § 63 p. 123. Cp. infin. 1-t-yāi beside bhuy-yai § 1089. 12, 14 pp. 601 f.
 - (5) Skr. -ay-ya -ay-iya-, part fut. pass., based upon the

Infinitive in -āy, as śraváy-iya-s 'laudandus, praiseworthy'; next we have stušéyiya-s 'celebrandus, praedicandus' based upon the Infin. stu-š-é (§ 1089.2 p. 599). Cp. Mod.H.G. der zu lobende, ein zu lobender from zu loben.

- (6) Skr. -tva- -tuva- and -tavya-, part. fut. pass., kár-tva-s kár-tuva-s and kar-tavyà-s 'faciendus'. See § 1099.4.
- (7) Skr -anīya-, part. fut. pass., derived from nomina actionis in -ana-m (II § 67 p. 150), as karantya-s 'faciendus' from karana-m 'a making', cp. gghamēdh-tya-s adj. of ggħamēdhá-s 'house offering', tgt-tya-s 'tertius' (II § 63 p. 122). These gerunds did not grow common until the later period.
- (8) Skr $-\bar{e}nya -\bar{e}nya-$, part. fut. pass., as $dr^{\frac{1}{2}}e^{nya-s}$ 'conspiciendus', from an s-aorist $yas-\bar{e}nya-s$ 'cohibendus'. A suggestion may be offered that this form comes from the infin. with $-\bar{e}$; compare the remarks on -na- as a secondary suffix in Sanskrit, vol II § 66 p 142.
- (9) -ent- -nt-, part. pres, fut, and aor. active. Skr. s-ánt-Avest. h-ant- 'being', Skr váha-nt- Avest. vaza-nt- 'vehens', fut Skr vak-šyá-nt- Avest. vaz-šya-nt- from vac- 'to speak', s-aorist Skr. dhák-š-at- from dah- 'to burn' See § 1099.6.
- (10) -o-, part. pres. active Skr. pra-mina-s 'destroying' with indic. -mina-ti, Avest. per so 'asking' with indic. per sa-iti. See IM § 198 p. 78
- (11) Skr. -u-, part. pres. active of s-Desideratives (§ 667 pp 198 ff), as dipsú-š 'wishing to hurt' beside indic. dipsa-ti, and from verbs in -áya-ti (§ 794 pp. 326 ff., § 795 pp. 330 f.), as bhājayú-š from indic. bhājáya-ti. See II § 104 p 314 With the latter participles compare those from denominative verbs, such as aśvayú-š. II § 105 p. 319.
- (12) Skr. -uka-, part. pres. active, formed from -u- (11) with -ka-, as \$ik\$u-ka-s 'sharing' (specially common in the Brāhmanas) See II § 88 p. 264.
- (13) -ues-, part. perf active. Skr. ci-kit-vás Avest. ci-kip--wah- beside indic. Skr. ci-két-a 'knows'. See § 1099. 7.
 - (14) Skr. -tavant-, part perf. active, formed from -ta- (1)

with -vant-, as $krt\acute{a}$ -vant- 'factum habens, $\pi\epsilon\pi\alpha\eta\varkappa\acute{\omega}\varsigma$ ' (cp. the unique Avestic $(v\bar{\imath}$ -) $ver^{\imath}zda$ -vant- = a1. $vrddh\acute{a}$ -vant- from vardh- 'to help, exalt). See II § 127 p. 406, Bartholomae, Stud. zur 1dg. Sprachg I 14 ff.

- (15) Skr. -māna- Avest. -mana- -mna-, part. mid.-pass. with thematic stems. Pres. Skr bhára-māna-s from bhar- 'to bear', Avest. bar'ze-mana- bar'ze-mna- from barz- 'to raise oneself, be high'. Fut. Skr yak-šyá-māna-s from yaj- 'to honour' Avest. var'šya-mna- from varz- 'to work'. See § 1099. 8.
- (16) Ar. -āna-, part. mid.-pass. with thematic stems. Pres Skr. dá-dh-āna-s Avest da-p-āna- beside indic. Skr. dá-dhā-ti 'places' Perf. Skr ja-gm-āná-s from gam- 'to go', Avest. vāver z-āna- from varz- 'to work'. The ground-form of this -āna- is doubtful. See § 1099. 8.

§ 1101. Armenian.

- (1) -lo-, part. aor, e. g. gereal 'capiens, captus', from the c-Aorist gereceal (§ 905 ° p. 453) See § 1099.5.
- (2) -auλ (later -ōλ -oλ) forming nomina agentis and part. pres. act, e. g yerauλ 'captor, capiens'. Bugge, Idg. Forsch. I 437 derives -auλ from Idg -ə-tro- (II § 62 pp. 118 ff., § 119 pp. 376 ff.).
- (3) Two part. fut., both with active and passive meaning, are made from the infinitive in -l + -i and -oc, as geretic and geneloc.

§ 1102. Greek.

- (1) -to-, part. perf, mostly passive (but generally used as adj) and gerundival (expressing capacity, possibility, or the like, II § 79 p. 220), e.g. $\delta \varrho a \tau \dot{o} g$ 'skinned', $\lambda v \tau \dot{o} g$ 'capable of being set free'. See § 1099.1
- (2) -teuo-, part fut passive, as διωκ-τόο-ς 'fit to be pursued'.
 See § 1099. 4.
- (3) -ent- -nt-, part. pres., aor., and fut. active, as λείπων λιπών λείψῶς λείψων from λείπω 'I leave'. See § 1099.6.
- (4) -yes- (-yet), part perf. active, as λε-λοιπ-ώς See § 1099.7.

- (5) -meno-, part. mid.-pass. from any mid.-pass. indicative; λειπό-μενο-ς λιπό-μενο-ς λειψό-μενο-ς λειψό-μενο-ς λειμ-μένο-ς. See § 1099. 8.
 - § 1103. Italic.
- (1) -to-, part. perf., mostly passive (for the use of this participle with deponents see II § 79 p. 219 f). Lat. scrīp-tu-s, Umbr. scriehtor pl. 'scripti' Osc. scriftas pl. 'scriptae'. See § 1099.1.
- (2) Lat -tūro-, part fut. active, as datūru-s. Possibly developed out of the inf. in -tūrum. See § 900 p. 448
- (3) Ital. -endo-, part. fut. passive (Gerundive.) Lat ferundu-s ferendu-s faciundu-s faciendu-s, juvandu-s, videndu-s, Umbr an-ferener gen 'circumferendi' pihaner gen. 'piandi', Osc úpsannam 'operandam'. In the explanation suggested in vol. II § 69 p 161 f. (cp. Bartholomae, Stud. idg. Spr. ii 96) I went far astray, chiefly because the Lith. participles in -tina-s, which I compared, are probably analogical and belong only to Balto-Slavonic (§ 1106 3). Of the explanations which I have met with in the meantime, those of Thurneysen, Conway, and Dunn (for references see footnote to page 596) in my opinion none will do

Remark Weisweiler's investigations (for which see same page) make it extremely probable that 'something to be done' is really the original meaning of this Gerundive, and that the Gorund (which is not found in our records of Umbrian or Samnite) is a mere outgrowth of the gerundive, such a phrase as virtus colendu est suggesting colendum est (similarly patrice defendendue causā suggested defendendue causā) as an impersonal construction with similar meaning (coliun = cultio fit, cultum est = cultio facta est, hence colendum est = cultio facienda est). And since the other Idg. languages, so far as we know, have nothing which we can compare with the suffix of the Italic gerundive, it becomes probable a priori that the gerundive grew up in Italy, and was based upon the infinitive of purpose, just as Mod II G der zu lobende, ein zu lobende comes from zu loben, and Skr šiavāy-iya-s 'laudandus' from inf *šravāi (§ 1100 5 p 102) On this I base the following conjecture 1)

¹⁾ This was written before I learnt that Pott (Et Forsch. II 239 and II 2517) and Schrodei (Kuhn's Zeitschr xiv 354) had already analysed ferendus into feren-do-, and that in the final part of it, -do-, they saw the Mod H G. zu (Engl to). But their view of the first part of feren-do- is untenable

In pr Italic it was customary to combine the accus. infinitive in -m, such as Umbi fcro(m) fasiu(m), with the postposition *dō or 'de 'to' (cp Lat en-do indu, do-nicum dō-nec, Avest vaesman-da 'to the house', Gi huitegor-ōe huétegor ōw, O Ir. do 'to' AS tō O H G. zuo and zi 'to', see III § 223 Rem 3 p 102, Fick, Wtb ' 457), the combination meaning the same as our to with the infinitive -md-must have become -nd- in pi. Ital. (cp O Lat quan-de Umbr pane and the like, I § 207 p 174); this isolated the inf. + postposition from the ordinary inf in -m Then these forms ending with dō or de were made the foundation for derivative adjectives in the o-declension, on the same principle as subjugu-s, antenotissimu-s, per hdu-s come from sub jugō, ante novissimum, per fidum (II § 15 p 31, § 35 p 62)

The explanation of the forms plendu-s videndu-s flandu-s arandu-s depends upon our view of the Umbr -Samu infinitive (Osc. fatium 'fari' censaum 'censere' Umbr stiplo(m) 'stipulaii' - -o(m) contracted from -ā-om) Firstly, these may be transformations of -ē-m and -ā-m on the lines of the thematic conjugation. In view of all that has been said in § 187 p 41 f §§ 578 ff pp. 118 ff, and of min. forms like Avest dam 'to place, give' (§ 1089 1 p 599), *plē-m 'vidē-m *flā-m *aiā-m in the same sense as plēre, vidēre etc would seem nothing strange In Lat. plendu-s ar undu-s Osc upsannam, then, we should see these older infinitive forms unchanged For Lat rotundu-s (beside rota) rubicundu-s (beside rubicare Rubico from *1 ubico-) it would be needful to assume inf "roto-m *rubico-m (cp aegro-tu-s), notundu-s for *notondo-s like latrunculu-s for *lation-And the agreement in form between arandu-s videndu-s and part pies arant-vident-, whilst in ferondo-s (ferundu-s) the vowel did not agree with ferent-, produced very soon, indeed in pr Italic, the Secondly it is possible that even in pr Italic re-formate ferendo-s the Oscan forms fatium censaum existed, in the shape *-ē-jom *-ā-jom (cp 1st sing. pres. in $-\bar{e}-\bar{\chi}\bar{v}$ $|-\bar{u}-\bar{\chi}\bar{v}|$, and so there were also in use -ē(1)on-do- -ū(1)on-do- (cp Lat faciundu-s beside Umbr. fassu(m) Then the relation of *ferondo- to the participal stem *feront-(cp eunt- etc II § 126 p 401) produced not only ferendo- following ferent- but also arando- videndo- following arant- vident-. In this case a simple explanation is possible for retundu-s rubicundu-s2) They would go with totale inbicare, and would come regularly from *rotā(1)ondo- rubicā(1)ondo- through the intermediate stage of *rotōndo-

¹⁾ This would allow a simple explanation for Umbr suboco in the formula sobocau suboco 'I entreat entreatingly'. 'It would be inf. like Lith dektè in dektè dëyu 'it burns up bright' (op. § 473 Rem p. 17 f). But it would be perhaps not acc, for '-\bar{\alpha}-20-m, but instr, for '-\bar{\alpha}-2\bar{\omega} ('with weeping'). For the ending of the 1st sing subocau see § 980 p. 520.

²⁾ What is gained by connecting the group in -cundu-s with the Greek --perfect I cannot see (cp. Weisweiler, p 41; Johansson, Beitr. Gr. Spr, 91 f.).

*rubicondo- (cp. 1st sing. roto for *roto-(t)o) — rotundus would mean that which goes rolling, rollable. These then will have kept the older form of the infinitive more exactly than rotandu-s rubicandu-s, because they so soon became simple adjectives

Of these two explanations I prefer the second.

The Lat adji in -bundu-s cannot be directly connected with the b-future, as is shown by fur ibundu-s (beside furere) paribundu-s (beside parēre) and like forms. It we are not to start from nouns with the suffix -bho--bhā-(II § 78 pp 216 ff), the best thing is to suppose that they are compounds containing -bhy-o- (from bey-'to be come, be', cp Ski &-bhv-a-m) We then compare the Skr. idha-dhyār and similar compounds (§ 1089 12 p 600)

- (4) -ent- -nt-, part pres active. Lat. prac-sēns Osc prac--sentid 'praesente', Lat. sedēns Umbr zeřef serse 'sedens'. See § 1099 6
- (5) The part perf active with -yes- must have been living in Umbro-Samnite, because it was used to make the future perfect, as Umbr. dersicust 'dixerit', cp. also Osc sipus 'sciens' Sec II § 136 p 445, IV § 872 p 421, § 1099, 7 p. 606.

§ 1104. Keltic

- (1) The -to- of the part perf. (passive), which is contained in the pret passive, e. g. Mid Ir. do-breth 'datum est', was exchanged for -te -the, which consist of -to- + -10-, e. g O Ir. brithe brethe 'brought'. Cymric had in place of -to- the ending -(e)tic 1 e. -t-7co-. See II § 79 p. 232 f., IV § 1099. 1.
- (2) O Ir -ti -thi, 1) part. fut passive ("participle of necessity"), e g. messi 'indicandus' carthi carthi 'amandus'. Mod.Cymr cara-dwy Cornish cara-dow

Romank. The last who has discussed this participle is Ascoli (Spiachwiss Briefe, 76 ff), but he comes to no definite conclusion Thurneysen writes "I know no plausible explanation Ir -thi admits of no ending with orig -os or $-\bar{a}$. British has for final the diphthong which has developed in stem-syllables from e_i (or from \bar{e} in borrowed words), e.g. O.Bret. in-aatoe, a gloss, 'ineundum' ($\swarrow ag$ -) Mod Cymi. caradwy 'amandus' The suffix perhaps originally had \bar{a} before the dental even in primary verbs, ep Brit 'aga-toi, Ir bethi for *biathi 'to cut' beside part passive bithe (this word bethi I have wrongly explained in Kulin's Zeitschi XXI 92), for-canti 'to teach' for *-canathi Its

¹⁾ The supposed ending -tī -thī is due to a scribe's blunder, dénta 'faciendum' being written dénta

connexion with the stem of the part passive, which came about in Irish with primary verbs, must then be secondary; it is not carried out in Old Irish. We should arrive at something like *-atervis as the original ending."

§ 1105. Germanic.

- (1) -to-, part. perf., mostly passive, in Weak Verbs and those Strong ones which had a weak preterite (§ 907 p. 454). (toth salbō-¬p-s O II.G. gi-salbō-t 'anointed', Goth. vaúrh-t-s O II (t. gi-worht -woraht 'worked. See § 1099.1.
- (2) -no- -eno- -ono-, with the same function as -to- (1), only in Strong Verbs O.H G gi-tān 'done', O.H G bund-en O Icel bund-enn Goth bund-un-s O.H.G gi-buntan 'bound' (II § 65 p 138, § 67 pp 151, 153). See § 1099 2.
- (3) -20-, part. fut. passive, seems establisht for the earlier periods of Germanic as a participial suffix, e g. Goth. un-qep-s inexpressible, O Sax un-fodi insatiate. See § 1099.3
- (4) -nt-, part. pres active. Goth. kiusu-nd-s O H.G. chiosanti 'trying, choosing' (II § 126 p. 402). Sec § 1099. 6.

§ 1106. Balto-Slavonic.

- (1) -to- part. perf, mostly passive. Living in all classes of verbs in Lithuanian, as silk-ta-s 'turned'. In O.C.SI. however its use is circumscribed; an example of it is žę-ti 'chopped, hewn, mown (II § 79 p 236). See § 1099. 1
- (2) -no--eno-, with the same function as -to- (1), and in () ('Sl. much the commoner, e. g danŭ 'given' nes-cnŭ 'borne, carried' (II § 67 p 151, 154). See § 1099 2.
- (3) A part fur passive is formed in Lithuanian and Slavonic from the part. in -to- (1), and in Slavonic from that in -no- -eno-, the further suffix used for this purpose being -nno- Lith. -nna- O C Sl -īno-; e g Lith. sùh-tina-s 'fit to be turned' O C Sl pri-petīnu 'acceptable, preasant', O.C Sl. ne-iz-d--ric-cinnă 'inexpressible' On consideration of what Leskien says in his Bildung der Nomina im Lit., 255 f, I now believe that the comparison of Lith -tina- with the O.Peis. infin. in -tanany and the Lat gerundive in -ndo- (II § 69. 2 pp. 161 f) must be given up

- (4) O.C.Sl. -lo-, so-called part. pret. active II, e. g. nes-lü in neslü jesmi 'I have borne' (§ 903 p. 452). See § 1099. 5.
- (5) O.Preuss. -mana-, part. pres. passive: madlas poklausimanas ast 'the prayers are heard'. See § 1099.8.
- (6) -mo-, part. pres. passive in Baltic and Slavonic; also part. fut. passive in Baltic Lith. vēža-ma-s O.C.Sl. vezo-mŭ 'being carried', Lith. fut. vèszi-ma-s Add the so-called Lith. part pres. active II in -da-ma-s, as sùk-dama-s 'turning', which is closely connected with the imperf. -davau (§ 908 p 455) and must originally have been middle (deponent). Compare Umbr. persnih-mu 'precamino', II § 72.1 p 166
- (7) -ent- -nt-, part. pres. and fut active. Lith. rẽžą̄s O C.Sl vezy 'vehens', Lith fut dialectic vèszius for *vessians, High-Lith vèsz̄ṣ̄s (O.C.Sl. byšąšteje byšṛšteje 'futurum, τὸ μέλλον'). See § 1099. 6.
- (8) -ues-, part perf. active. Lith. milž-ęs O C.Sl. mlūz-ŭ 'having milked'. In Lith. also in the so-called part. imperf act. in -davęs, belonging to the indic. in -davau (§ 908 p. 455) See § 1099.7.
